tive of the Forty Days' (Hort), a summary of the appearances of the risen Christ and their effect upon the apostles, concluding with His ascension,

and their subsequent work.

The probability, therefore, is that these last twelve verses did not belong to the original form of the Gospel. This probability is strengthened both by the case of the intermediate ending, and by the consideration that there was an inducement to supplement the narrative so as to remove the strangeness of the shorter conclusion. In view of the peculiarities of style and connexion, it is difficult to suppose that it was added by the original hand. It must have been of very early date, however, and it is not the kind of addition that can be readily explained as a work of mere invention. It embodies a true apostolic tradition, and may have been written by some companion or successor of the original author. In an Armenian manuscript of the Gospels, which was discovered in 1891 in the Patriarchal Library of Edschmiatzin, and is stated to be written A.D. 986, the paragraph bears to be the work Of the Presbyter Ariston. It is suggested by Mr. F. C. Conybeare, the discoverer of the manuscript, that this Ariston may be the Aristion who is named by Papias (Euseb. HE iii. 39) among the disciples of the Lord and that the question of the disciples of the Lord, and that the question of the authorship of these twelve verses is thus solved (Expos. viii. [1894] p. 241, etc., and in Swete's St.

Mark, p. ciii ff.).

The genuineness of the paragraph has been defended by R. Simon, Mill, Bengel, Wolf, Eichhorn, Storr, Kuinoel, Matthæi, Hug, Scholz, Guericke, de Wette, Olshausen, Bleek, Lange, Scrivener, Canon Cook, Dean Burgon, MocIellan, Wordsworth, G. Salmon, E. Miller, etc. It is contested by Michaelis, Fritzsche, Griesbach, Lachmann (although according to their method these mann (although according to their method these two give it a place in their texts), Credner, Ritschl, Meyer, Ewald, Reuss, Holtzmann, Keim, Hofmann, Tischendorf, Zahn, Tregelles, Schaff, Weiss, West-cott and Hort, Alford, Swete, and most English scholars. Some (Scholten, etc.) have solved the difficulty by supposing that the Gospel had originally a different conclusion; and attempts have been made (by Ewald, Holtzmann, Volkmar, and Ritschl) to restore this hypothetical ending. But these have been more venturesome than convincing. (See the great critical editions by Tischendorf, (See the great critical editions by Tischendorf, Tregelles, and especially Westcott and Hort (Appendix, pp. 28-51); Scrivener's Introduction to the Criticism of the NT; Burgon's The Last Twelve Verses of the Gospel according to S. Mark, etc.; Weiss, Das Markusevangelium; Klostermann, Untersuchungen, pp. 298-309; Martin, Introduction à la critique textuelle du NT, partie pratique tome ii.; G. vi. Genius of the Gospel.—The second Gospel has a noticeable individuality. Qualities which at once catch the eye distinguish it from its companions. One of its most marked characteristics is the simple objectivity of its narrative. It is not the product of reflection, nor does it give things coloured by the writer's own ideas. It has been called a 'transcript from life' (Westcott). It is in the main a simple and unqualified transcript. It has been described also as the realistic Gospel, and the description is just if it means that Mark brings things before us as they were, simply and

entirely as they were, and as if one's own eye were on them. With this, too, it has the charm of a singular vividness. It is beyond the others graphic and dramatic, rich in pictorial effects and lifelike This is true in some degree even of touches. the discourses. It is pre-eminently true of the deeds and incidents. Examples are seen in the narratives of the storm (4<sup>28-41</sup>), the demoniac (5<sup>1-20</sup>), pared with Matthew's  $d\eta \eta \eta$  and Luke's  $\eta \gamma e \tau o$ ; the evides  $d\eta e \tau o \tau$  and the  $\gamma e \mu l_{\xi}^{2} e \sigma \theta e$  in  $4^{37}$ ; the  $\pi e \rho e \pi a \tau o \tau$  in  $6^{39}$ ; the  $\pi \rho e \sigma a \tau o \tau$  in  $6^{39}$ ; the  $\pi \rho e \sigma a \tau o \tau$  in  $6^{39}$ ; the  $\pi \rho e \sigma a \tau o \tau$  in  $6^{39}$ ; the  $\pi \rho e \sigma a \tau o \tau$  in  $6^{39}$ ; the  $\pi \rho e \sigma a \tau o \tau$  in  $6^{39}$ ; the  $\theta e \rho \mu a \tau o \rho e \tau o \tau$  in  $14^{67}$  etc. It belongs to the same quality of vividness that the direct form of speech is so often chosen, e.g. 'Peace, be still'  $(4^{39})$ ; 'Come out of the man, thou unclean spirit'  $(5^{8})$ ; 'Send us into the swine'  $(5^{12})$ ; 'Come ye yourselves apart'  $(5^{81})$ : 'Thou dumb and deff spirit! Leharge thes (631); 'Thou dumb and deaf spirit, I charge thee, come out of him, and enter no more into him' (925).

So, too, Mark preserves notable words of Christ in the mother tongue (Boanerges, Talitha cum, Ephphatha, Corban, Abba), and delights to record His actual gestures and movements. Thus he tells us how He 'looked round about' on the men in the synagogue (35); how He 'turned him about in when He cured the deaf mute (7<sup>34</sup>); how He 'turned about, and looked on the disciples' (8<sup>33</sup>); how He 'sat down and called the twelve' (935); how He took little children 'up into his arms, and put his hands upon them '(9<sup>36</sup> 10<sup>16</sup>); how 'beholding' the young ruler He 'loved him,' and 'turned about and looked on his disciples' (10<sup>21, 23</sup>); how He 'looked round about upon all things' in the temple profaned (1111).

Akin to this, too, is the quality of peculiar circumstantiality. Mark's is the Gospel of greatest detail. As a general rule, it is richer than the other Gospels in the particulars which go to give certainty and distinctness to narrative. It is copious in indications of time, place, number, situation, and the like. It tells us, e.g., that the swine which 'ran violently down a steep place into the sea' were 'about two thousand' (5th), the the distribute ware controlled. (61); that the disciples were sent forth 'two and two' (67); that on the occasion of the miracle of the 5000 the people 'sat down in ranks, by hundreds and by fifties' (6<sup>40</sup>); that Jesus went to pray, rising up 'a great while before day' (1<sup>30</sup>); that it was 'the third hour' when they crucified Him (15<sup>20</sup>); that it was 'very early in the morning, the first day of the week, . . . at the rising of the sun,' that the women came to the sepulchre (16<sup>1</sup>). So, too, Mark explains how Jesus withdrew 'to the sea' (3'); how He 'sat in the sea' (4'); how He was in 'the hinder part of the ship, asleep on a pillow' (4<sup>28</sup>); how He sat 'over against the treasury' (12<sup>41</sup>), and on the Mount of Olives 'over against the temple' (13<sup>8</sup>); and how the healed demoniac preached 'in Decapolis' (5<sup>20</sup>); how Peter 'went out into the porch' (14<sup>88</sup>); how the centurion 'stood over against' Jesus (15<sup>89</sup>); how the young man was seen 'sitting on the right side' in the

sepulchre (165), etc.

'He is an author,' says Keim, 'in a flower-bedecked garment... He makes the narratives more effective by the contrast between rapid progression—marked by the continually repeated "immediately"—and contemplative stillness, painting the second with a thousand to when the form ing the scenery with a thousand touches, the house, the sea, the followers, the growing throng, the names of persons, the numbers of the men and of the animals and of the pieces of money, the greenness of the grass, the pillow in the stern of the boat on Gennesareth—all given with a preference for affectionate and familiar diminutives, and in the present tense' (Jesus of Nazara, Eng. tr.

i. pp. 128, 129.
It belongs also to its genius that it is distinctively the Gospel of action. It is this in a twofold sense. Its primary interest is in deed and incident rather than in discourse. It does not limit itself, it is true, wholly to the works of Christ. It gives a considerable place to dialogue, and records not a few of our Lord's briefer sayings. But these seem to be introduced mainly because of their connexion with the events and acts; while the longer discourses, which are characteristic of each of the other three evangelists in different ways, do not appear in Mark. The one great exception is the Eschatological Discourse in ch. 13. It is the Gospel of action, too, in the sense that its narrative of the deeds of our Lord is rapid, energetic, undisturbed by reflection, moving steadily and regularly to its goal. The only passage that is of the nature of an episode is the story of Herod (6<sup>17-29</sup>). With the briefest possible preface it goes straight to its main subject, the official ministry of Christ; and it proceeds with that subject with a simple and rapid directness, passing from one thing in it to another often by abrupt transitions and without pausing to study form or artistic connexion. The same holds true of it when it goes beyond the function of a chronicle. It does not always confine itself to the simple report of what was done by Christ and others or what befell them. In not a few cases it records the impressions which were producedthe awe and wonder with which the crowds beheld Christ's works or heard His words (122.27 212 62); the eager anxiety of the multitudes to get near Him as they thronged and pressed Him, so that there was scarce room to stand, or sit, or leisure even to eat (2<sup>2</sup> 3<sup>10</sup>. <sup>20</sup>. <sup>32</sup> 4<sup>1</sup> 5<sup>21</sup>. <sup>81</sup> 6<sup>31</sup>. <sup>32</sup> 8<sup>1</sup>); the feelings of fcar, sore amazement, astonishment, and the like, which overcame the disciples (44 65 1024 26. 22). At times Mark even explains cases that he records, e.g. Herod's attitude to the Baptist (619); the terror of the disciples when they saw Jesus on the sea (652); the silence of the women (168), etc. He deals in the same way now and again with things which he reports Christ to have done (e.g. the 'knowing in himself that virtue had gone out of ; the καθαρίζων πάντα τὰ βρώματα 719 etc.). But all is done rapidly and by a few clear strokes. It is in harmony with this that Mark presents Christ so largely in the energy of His superhuman power. The prevailing aspect in which the second Gospel sets forth its Subject is not that of the Son of David and Abraham, in whom Matthew sees the fulfilment of OT propliecy; nor that of the Son of Adam, in whom Luke sees the Perfect Man, the Saviour for all mankind, the minister of love and compassion for the worst and most despised; nor the eternal Word, in whom John sees the fulness of the Godhead. It is that of the 'Son of God with power' (Ro 14), nioving among men with His gift of miracle, and making the things of nature the servants of His grace. So Mark gives a large place to His mighty works, and exhibits Him in the majesty of His energy. He shows us how He used His miraculous power; how that power was felt and recognized by different classes; how the multitudes believed in it and made their appeal to it, and brought their sick to Him, confident that if they could secure His notice or even touch Him it would be enough (1<sup>32</sup> 3<sup>10</sup> 5<sup>28</sup> 6<sup>58</sup> etc.); and how resistless were the effects that were produced alike

on people and on disciples by His wonderful works  $(1^{27}2^{12}7^{51}$  etc.).

(1<sup>st</sup> 2<sup>12</sup> 7<sup>51</sup> etc.).

Yet this is not due to any neglect of His true humanity. It is a remarkable fact that, while this Gospel depicts the Jesus of history so preminently in His power, it records with literal faithfulness things which might seem so far to limit that power. It tells us how the unclean spirits first resisted (1<sup>24</sup>); and how He could 'do no mighty work' in Nazareth (6<sup>5</sup>). It describes with recipe and vivid circumstance those mirecles with precise and vivid circumstance those miracles which were wrought not instantaneously and by word, but with comparative slowness and by the use of means (7<sup>81-85</sup> 8<sup>22-26</sup>). It is also rich in touches which speak to the identity of Christ's human nature with ours in feeling and in the experience of infirmity, revealing Him not only in His compassion (6<sup>54</sup> 8<sup>2</sup>), His love (10<sup>21</sup>), His majesty and serenity (4<sup>37-40</sup> 9<sup>2-9</sup> etc.), but in His sense of hunger (11<sup>12</sup>), His need of rest (4<sup>38</sup>), His anger and displeasure (3<sup>5</sup> 10<sup>14</sup>), His sighing (7<sup>34</sup> 8<sup>12</sup>), His wonder (6<sup>5</sup>), His grief (3<sup>5</sup>), His longing for solitude (1<sup>25</sup> 6<sup>30-22</sup> etc.).

The peculiar place which the disciples have in this Gospel has also been noticed. They have a large place in all the Gospels, and much of each of the Gospels is given to the description of how the apostles were taught and trained by their Lord. But Mark appears to dwell with a special interest on all that belongs to the disciples—their intercourse with Christ, the way in which they became first attached to Him, the deepening of that attachment, the choice of Twelve from among them, the experience of the elect three, the things said and done by Christ with a particular reference to His immediate followers. So much is this the case that some would speak of it as distinctively the 'Disciple Gospel' (Weiss).

It has also been claimed for Mark that his is the chronological Gospel. But this is true only in a very qualified sense. His narrative is no more a history than are those of the companion Gospels, nor does it give events in strict chronological succession. There is at the same time a difference between Mark and his comrades in this respect as in others. Mark observes a certain order of a large kind in his report of Christ's teaching and in his account of His ministry. While he omits While he omits much, he gives what he includes in a certain con-nexion and sequence. The order which he exhibits, however, seems to be that in which facts came to him in the communications of his chief informant rather than that of actual occurrence. He does not follow the method of grouping words and events to the extent seen in Matthew, nor does he attempt the literary arrangement of the matter, as we observe it so far in Luke. It is by taking Mark's narrative, however, as the framework and adding to it from the other Gospels that we appear to come nearest the actual succession of events. His narrative, though not strictly chronological and by no means devoid of dislocations, is more continuous than those of the other Synoptists.
vii. HISTORICAL ATTESTATION.—The historical

testimony to the early circulation and acceptance of this Gospel is sufficient. It is scantier, how-ever, at the earliest point than might have been expected. There is scarcely any mention of the second Gospel in the Apostolic Fathers. In Clement of Rome there is one saying which looks like a reminiscence of Mk 4<sup>28, 29</sup> (1 Cor. 23), but it may come from another source. There are also two quotations (1 Cor. 15. 46) which are much in Mark's style. But they are scarcely sufficient to establish the fact of Clement's acquaintance with this Gospel (cf. Lightfoot, Apostolic Fathers, pt. i. in loc.). Nor is there anything in Ignatius, Polycarp, or Barnabas to point certainly to the exist-

ence of the written Gospel, although some find references to Mk 16<sup>14</sup> in Barnabas, c. xv. 9, and to Mark 9<sup>35</sup> in Polycarp, *Philipp*. v. Much the Mark 9<sup>35</sup> in Polycarp, *Philipp*. v. Much the same is the case with the Didaché, the Epistle to Second Clement. Nor is there any quotation from this Gospel, or reminiscence of it, in the fragments of Papias, although there is much that Mark and him within (French HE iii) 20 about Mark and his writing (Euseb. HE iii. 39, etc.).

It is perhaps somewhat different with Hermas, in whom we have one or two sayings which remind us of expressions peculiar to this Gospel. Thus ξνοχος έση της άμαρτίας in Mand. ii. 2 recalls Mk 329; and the sentence τοιοῦτοι οῦν δυσκόλως είσελεύσονται είς την βασιλείαν τοῦ θεοῦ . . . τοις τοιούτοις δύσκολόν έστιν είς την βασιλείαν τοῦ θεοῦ είσελθεῖν points to the form in which Christ's declaration on riches appears in Mk 1023. 24) as distinguished from Mt and Lk. In Justin Martyr, again, there are several passages which have been thought to indicate an acquaintance with the second Gospel, e.g. Dial. 88 and Apol. i. c. 16, as compared with Mk 6<sup>3</sup> 12<sup>80</sup>; Dial. 106; also Apol. i. cc. 39, 45, 49, 50, and Dial. 32 as recalling perhaps Mk 16<sup>19, 20</sup>. The most relevant of these are Dial. 88, where we have the phrase τέκτονος νομιζομένου applied to Christ, as Mark alone of the evangelists designates Him so; and Dial. 106, where mention is made of certain ἀπομνημονεύματα or Memoirs apparently of Peter, and the words Boavepyes, 8 έστιν υλολ βροντής are given. These words occur in Mk alone of the Canonical Gospels, and there seems little reason for supposing (e.g. with Harnack, Bruchstücke d. Ev. d. Petrus, p. 37, etc.) that they are taken from the Apocryphal Gospel of Peter rather than from Mark.

We are on much more certain ground when we come to Irenœus. His testimony is as unambiguous as it is ample. He speaks of the 'fourfold Gospel' His testimony is as unambiguous (τετράμορφον τὸ εὐαγγέλιον, iii. 11. 8). He tells us both about Mark himself and about his Gospel. He nuotes the opening words, Initium Evangelii Jesu Christi filii Dei, etc., expressly as Mark's (iii. 10. 6); and a number of passages are given by him in exact terms (e.g. 1<sup>24</sup> in iv. 6. 6; 5<sup>31</sup> in i. 3. 3; 5<sup>41, 43</sup> in v. 13. 1; 8<sup>31</sup> in iii. 16. 5; 8<sup>38</sup> in iii. 18. 6; 9<sup>23</sup> in iv. 37. 5; 9<sup>44</sup> in ii. 32. 1; 10<sup>38</sup> in i. 21. 3; 13<sup>32</sup> in ii. 32. 6. These greaterings extend also to the ii. 28. 6. These quotations extend also to the disputed ending, 1619 being introduced thus—'in fine autem Evangelii ait Marcus Et quidem Dominus Jesus, postquam locutus est eis, receptus est in cælum, et sedet ad dexteram Dei' (iii. 10. 6). A place in the line of historical witnesses may also place in the line of historical witnesses may also be claimed for Athenagoras (Legatio, c. 33, though less definitely), the Muratorian Canon (in all probability), Hippolytus (especially Els τὰ ἄγια Θεοφάνεια, Lagarde's Hippol. p. 38, where Mk 1<sup>7-8</sup> is quoted, also Περί χαρισμάτων and contra Hær. Noeti, Routh's Opp. i. 80, 545, as compared with Mk 16<sup>17-19</sup>), Tertullians (on whom see Rönsch, Das NT Testullians p. 148, etc.) Clement of Das NT Tertullians, p. 148, etc.), Clement of Alexandria (Adumbr. in Petr. p. 1007, Euseb. HE ii. 15, vi. 14), the Clementine Homilies (e.g.

ii. 19, iii. 54, 55, 57, xix. 20), etc.

There is evidence also to show that the second Gospel was known in the earlier heretical circles, especially the Gnostic. Irenæus refers to a sect who separated Jesus from Christ, and preferred Mark's Gospel (iii. 11. 7; the reference, however, is not quite certain), and to a Valentinian School as using Mk 5<sup>31</sup> (i. 3. 3). Clem. Alex. also (Strom. iv. 72, Exc. 85) reports Mk 8<sup>38</sup> as quoted by Heracleon, and the statement about Christ being 'with the wild beasts' as quoted by certain Valentinians (cf. also Sanday, Gospels in the Second Century, p. 177, etc.; Zahn, Gesch. d. NT Kanons, i. p. 741, etc.). References to our Gospel, especially to its last chapter, some doubtful, others more

definite, are found in the Gospel acc. to Peter (on these see Zahn, Einleit. in d. NT, ii. p. 237, Das Ev. des Petrus, p. 53; Lods, L'évangile de St. Pierre, p. 64; Harnack, Bruchstücke des Ev. u. d. Apoc. des Pt. p. 33; Swete, Akhnîm Fragment, p. xl; Rohrbach, Der Schluss des Markusev. pp. 27-33, etc.).

To this it must be added that, as far back as we can trace the idea of a fourfold Gospel or the practice of harmonizing the Gospels, Mark forms one of the four. The idea of a fourfold Gospel, however, is probably of older date than Irenæus, some discovering indications of it a generation before the Bishop of Lyons (Taylor, Witness of Hermas, 1, etc.); and the practice of harmonizing, of which the first great evidence is Tatian's Diatessaron, is probably of earlier date than that work. It appears, therefore, that there is valid evidence to the fact that this Gospel was in circulation by the middle of the 2nd cent.; that by the last quarter of that century it had an established position; and that it became so generally recognized as to find a place in all the early lists of canonical books, whether of the Eastern Church or of the Western, in which the Gospels are given, and in all the great versions of the NT, including the Old Latin, the Egyptian, both Memphitic and Sahidic, and the Syriac in all its forms.

viii. AUTHORSHIP.—Ancient tradition connects the composition of this Gospel with two names—those of Mark and Peter. Much of the historical testimony, from Papias on to Jerome, which attests the early circulation and acceptance of the Gospel, also speaks to Mark as the writer, and this Mark is usually identified with the disciple of that name who appears in the NT in relation both to Paul and to Peter. This identification, indeed, has not been universally accepted. Some have taken the different accounts to point to several Marks. Hippolytus, e.g. (Fragment on the Seventy Apostles), distinguished between the cousin of Barnabas (bishop of Apollonia), John Mark (bishop of Bibliotalia), and the coupling this position of the cousin of the cousin of the coupling t Bibloupolis), and the evangelist (bishop of Alexandria). On the ground that the earliest writers outside the NT do not call the person in question John, and represent him as the companion, not of Paul but of Peter, others (Grotius, Calovius, Schleiermacher, Tillemont) have held it necessary to affirm the existence of two Marks, a Pauline and a Petrine, and have ascribed our Gospel to the former (Kienlen). But the case is best satisfied by supposing, as most have done, that all the various references in Scripture and in tradition point to one and the same individual, especially as Barnabas makes the connecting link between Peter and Paul in the story of Mark.

The person to whom the preparation of this Gospel, therefore, is ascribed, is the disciple who in the NT is sometimes called simply Mark or Marcus (Ac 15<sup>29</sup>, Col 4<sup>10</sup>, 2 Ti 4<sup>11</sup>, Philem <sup>24</sup>, 1 P 5<sup>13</sup>), sometimes represented as having Mark for his surname, Ac 12<sup>12, 28</sup> 15<sup>37</sup>, and sometimes called John (Ac 13<sup>5, 13</sup>); while outside the NT he is spoken of as evangelist and as bishop of Alexandria, and in the later tradition as martyr (Euseb. HE ii. 16, iii. 39; Epiph. Hær. li. 6; Jer. de Vir. 1ll. 8; Niceph. ii. 43). In the Gospel itself he does not appear, unless it be in the person of the young appear, unless to be in the person of the young man who followed Jesus on the night of the betrayal, 'having a linen cloth cast about his naked body' (Mk 14<sup>51.52</sup>), or, as has also been conjectured, in the person of the 'man bearing a pitcher of water' whom the disciples were sent to meet in preparing for the passover (Mk 1413). But elsewhere we see that he was a Jew by birth (Col 4<sup>10,11</sup>), the son of a certain Mary, a Christian lady apparently of some position and means, whose house in Jerusalem was a gathering point for

believers (Ac 1212), and cousin (drevios) of Barnabas

See preceding article.

In the NT the traditional author of the second Gospel is associated mostly with Paul. He is mentioned as returning to Antioch with Paul and Barnabas, after their visit to Jerusalem with the contributions of the Antioch Christians (Ac 1225); as going with Paul and Barnabas on their first missionary journey, in the capacity of their ὑπηρέτης (Ac 13°); as breaking away from them at Perga, and returning to Jerusalem (Ac 1313); as causing a 'sharp contention' between the two friends when Paul proposed to revisit the Churches and declined to take him with them (Ac 15<sup>36-40</sup>). He reappears, however, in Paul's company at the time of his first imprisonment, and sends salutations along with others through Paul (Col 410, Philem 24). And he is referred to in appreciative terms by the great apostle in his second imprisonment in Rome as a

friend whose presence he desired (2 Ti 4<sup>11</sup>).

In the NT his association with Peter is quite subordinate. It is suggested in the notice of Mary his mother and Peter's reception in her house after his deliverance from prison (Ac 1212), and it is implied in 1 P  $5^{13}$ , where he is spoken of as Peter's convert (vlós  $\mu o v$ , however, not  $\tau \ell \kappa v o v \mu o v$ ). But this is all. In the non-canonical literature all is different. There the relation to Paul drops out of sight, and Mark is statedly associated with Peter. The tradition is both very ancient and remarkably continuous, beginning with Papias (reporting the Presbyter John, and giving also explanations of his own), and carried on by Justin Martyr, Irenœus, Clement of Alexandria, Hippolytus, Tertullian, Origen, Eusebius, Epiphanius, Jerome, etc. In these writers it assumes different forms, but as regards the main points it

is consistent.

In Papias (Euseb. IIE iii. 39) the presbyter speaks of Mark as Peter's έρμηνευτής, a term which is understood by not a few to mean that Mark acted as interpreter or dragoman, translating Peter's Aramaic into Greek; some (e.g. Bleek) supposing him to have served as Latin interpreter. It is better taken, however, to express the fact that he did the part of amanuensis, committing to writing, with more or less freedom in the composition, the oral communications of Peter. The Elder further says of him that he wrote down accurately, not, however, in order (ἀκριβῶς ἔγραψεν, οὐ μέντοι τάξα), all the things that he remembered, both those said and those done by Christ; that he was not himself a hearer of the Lord, but was indebted for his matter to Peter's instructions, which were adapted to the needs of his hearers, and were not designed to give a connected account of the Lord's words (ούχ ισπερ σύνταξιν τῶν κυριακῶν ποιούμενος λόγων); and that he made no mistake, but made one thing his care, namely, neither to omit anything he had heard nor to set down anything false. It is to be noticed also that this statement defines the scope of Mark's work, or, as it is understood by Zahn and others, the extent of his dependence on Peter. What he is said thus to have written down is 'Some things as he remembered them' (οὐδὲν ήμαρτε Μᾶρκος, οὕτως ἔνια γράψας ώς άπεμνημόνευσεν).

If Justin's απομνημονεύματα αὐτοῦ (Dial. 106) are taken in their most probable sense as Peter's memoirs, Justin also is a witness to the belief that Mark's Gospel was substantially Peter's. Irenœus likewise speaks of Mark as the μαθητής και έρμηνeurns Πέτρου, the interpres et sectator Petri, who committed to writing the things preached by Peter,' but adds that he did this after the decease of Peter and Paul (iii. 1. 1, 10. 6). Clement Alex. (Hypotyp., as in Euseb. HE ii. 14) enlarges the tradition, stating that when Peter had preached at Rome many who had heard him urged Mark to write down what had been spoken; that the evangelist did this; and that when Peter came to know it, he 'neither forbade nor encouraged it.' Tertullian (adv. Marc. iv. 5) says of the Gospel which Mark published that it 'might be affirmed to be the Gospel of Peter, whose interpreter Mark was'; and Origen (Euseb. HE vi. 25) speaks of Mark as having written 'as Peter directed him.' Eusebius himself, who has much to say on the subject, goes beyond Clement's negative position, and gives the report that the apostle confirmed or authorized Mark's writing at the request of the Churches (κυρῶσαὶ τε τὴν γραφὴν els ἔντευξιν ταῖς ἐκκλησίαις, HE ii. 15). And Jerome, who also speaks of Mark as Peter's disciple and interpreter (de Vir. Ill. c. 1), states in one passage that Mark wrote a short Gospel at the request of the brethren at Rome, and that Peter approved of it and authorized it to be read in the Churches (de Vir. Ill. c. 8), while in another (Ep. ad. Hedib. c. 2) he describes the Gospel as composed by Peter narrating and Mark writing ('habebat ergo Titum interpretem sicut et beatus Petrus Marcum, cujus Evangelium Petro narrante et illo ścribente compositum est').

There are variations, therefore, in the traditions, particularly as to the time when the Gospel was written and the measure of its dependence on the apostle. In some forms it is represented as written during Peter's lifetime; in others, as composed after his decease. As time goes on, too, the tendency is to make Peter more and more responsible for it, until in Eusebius it is described as authorized by the apostle to be read in the churches, and in Jerome it is said to have been dictated as well as sanctioned and authorized by Peter. But the tradition is consistent all through in referring the authorship of the Gospel in one sense to Mark and in another to Peter. And the general view which it gives us of the Gospel is that of a composition embodying Peter's recollections of Christ's words and deeds, written by Mark from his notes of the apostle's discourses, and giving the substance of these discourses exactly as he heard them. The tradition is so ancient, so consistent in its main affirmations, and so widely extended, that only internal considerations of exceptional weight could justify its rejection. Does the Gospel

as we have it, then, tally with it or not?

It has been contended by some that the second Gospel as we have it does not correspond with Papias' description, and cannot be the work which he ascribes to Mark (Schleiermacher, Weiffenbach, Beyschlag, S. Davidson, etc.). It is asserted that our Gospel is the composition of some unknown writer, who worked up into order and arrangement the unconnected notes which the evangelist had prepared. Mark's own work, it is held, cannot have been anything like a 'Gospel in the sense now understood, but something in the style of the Clementine Homilies—a κήρνγμα Πέτρου, in which Mark wrote down sayings, narratives, and teachings of the apostle Peter' (S. Davidson). Some (e.g. Wendt) have supposed that what Papias had in view was only a series of narratives, which are embodied in our present Gospel, and can be critically separated from it. And the hypothesis of an Urmarkus, a primitive pre-canonical writing, has been advocated in various forms (e.g. by Baur, Köstlin, S. Davidson, Jacobsen, etc.).

But there is no trace in ancient literature of this supposed *Urmarkus*. It has been thought, indeed, that we have a glimpse of it in a reference in Justin to a passage in Peter's dπομνημονεύματα, which is found only in the second Gospel (*Dial. c. Tryph. c.* 106; cf. S. Davidson's *Introd. to the NT*, i. p. 408). But this is utterly insufficient. There

is no suggestion anywhere in early Christian literature of a substitution of a later writing for an earlier, or a transference of the name and authority of a preceding composition to our present Gospel. Nor is it easy to understand how a primitive writing by the evangelist Mark, giving an apostle's account of Christ's words and deeds, if it ever existed, could have been so absolutely lost and forgotten. And with regard to the evidence which is thought to be furnished by the Gospel itself as it exists, it is enough to say that it is of the most slender kind. It is urged, e.g., that a series of older narratives is presupposed in 'the account of the replies of Jesus to objections and questions, given in the two groups, Mk 2-36 and 12<sup>13-37</sup> (Wendt, The Teaching of Jesus, i. p. 21, Wilson's tr., cf. Lehre Jesu, i. pp. 9 ff., 25 ff.), and that in 12<sup>13</sup> we have the narrative of 36 resumed. This is perhaps the strongest case, but it is not sufficient to take us back to an Urmarkus. The things, indeed, which are held by some to indicate that the book as we have it is the product of a process of compilation or literary remodelling are

few in number, and can all be otherwise explained.

Neither can it be said that the reasons advanced for the contention that our Mark does not correspond with the writing described by Papias, are of sufficient weight to discredit the tradition. The statement that Mark wrote 'not in order' is not inconsistent with the kind or measure of arrangement which may be discovered in our Gospel. For Mark comes short at any rate of recording things in each case in the succession in which they actually took place, and attempts no literary form. Nor can it be allowed that the occurrence of certain repetitions (such are alleged, e.g., in 614 etc. 828; 427-41 647-51), or the omission of some particulars bearing specially on Peter (e.g. the want of the word bitterly, which is given by Mt and Lk in their account of his repentance, and the fact that he is not named as one of the two sent to prepare for the Supper), are of much weight. Most of the reasons, indeed, which are urged in support of the position are highly arbitrary or hypothetical. The fact, e.g., that this Gospel gives the two distinct narratives of miraculous feedings is turned into an argument against its having derived its matter from an eye-witness. Much is made, too, of certain statements (e.g. 102-8 1528 as compared with 2 Co 37-11-18), which are declared to have 'passed through the mind of a Paulinist' (S. Davidson, Introd. to the NT, i. pp. 463-484).

On the other hand, the lifelike character of the

narrative, its vividness and circumstantiality, and the peculiar fulness and certainty of knowledge which show themselves often in minute details, suggest that it is due, directly or indirectly, to an eye-witness. The difference between it and the apocryphal Gospel according to Peter in these and other respects is significant. There is much in it also to connect it with the apostle, as indicated by Papias and others. The great bulk of its narrative consists of things of which Peter might have personal knowledge. Peter's call, Peter's confession, sonal knowledge. Peter's call, Peter's confession, the message of the risen Christ to Peter, are There are great turning-points in the story. many touches in the narrative (e.g. in 118-20 129 95 148-4 72 167) which indicate first-hand knowledge, and that on the part of one like Peter. There are some things noticed in the other Synoptists which are unexpectedly omitted by Mark, c.g. Peter's walking on the water (Mt 14<sup>29</sup>), his appearance in the incident of the tribute money (Mt 17<sup>24-27</sup>), Christ's statement that He prayed for him individually (Lk 22<sup>23</sup>), the great word addressed to him as the Rock (Mt 16<sup>13</sup>). On some occasions, too, his name is not given where it is introduced by Mt or by Lk (e.g. 7<sup>17</sup>, cf. Mt 15<sup>13</sup>; 14<sup>13</sup>, cf. Lk 22<sup>3</sup>).

VOL. 111.--17

The silence of this Gospel in matters honourable to Peter has been commented on from the time of Eusebius (Dem. Evang. iii. 5) onwards, and explanations of most of these cases of suppression may be suggested. On the other hand, there are reports of incidents which would come most occasions on which Peter, and there are suggestive occasions on which Peter is introduced in this Gospel, and only in it. It is only Mark who records, e.g., that 'Simon and they that were with him followed after' Jesus when He departed into a solitary place at the beginning of His ministry (186): that he called Christ's attention to the withered fig-tree (1121); that with his brother and the sons of Zebedee he questioned Jesus on the Mount of Olives about the destruction of the temple (138). It may be added that a comparison of the narratives which we have of the three scenes at which only Peter and James and John were present, the raising of the daughter of Jairus, the Transfiguration, and the Agony, will show that the versions given in the second Gospel have peculiar details and distinctive features which suggest not only that the writer had more immediate knowledge than Matthew and Luke, but that he had it from Peter. A certain likeness has also been observed between Mark and Peter in respect of style. Peter's First Epistle has at certain points a vividness that recalls Mark's way. His discourses as given in Acts show still more of the realistic faculty that is characteristic of Mark. It is noticed, e.g., that there is much the same wealth of picturesque detail in the account of the cripple healed by Peter (Ac 3<sup>1-11</sup>) as in one of Mark's narratives (see Farrar, The Messages of the Books, p. 61).

The phenomena of the Gospel, therefore, are not inconsistent with its Marco-Petrine origin. Of themselves they are quite insufficient to lead us to definite conclusions as to the authorship. But they are in harmony, on the whole, with the account of the composition of the second Gospel, which has come down to us from the 2nd century.

ix. Sources.—The chief source of the second Gospel is those discourses of Peter of which tradition speaks. Most of its matter looks like the apostle's reminiscences as transcribed and put together in a connected but unstudied way. This is most evidently and continuously the case with the first great section of the Gospel,—the narrative of the Galilæan ministry. It is the case also with the short intermediate section dealing with the Judæan and Peræan journeys, though the indications of particular acquaintance with dates, localities, and circumstances are somewhat fewer. And in the second main section, the narrative of the Passion, we have much the same features as in the first, with a greater fulness of statement, and with more of the element of discourse.

These Petrine reminiscences, however, will not account for all that is in the Gospel. The difference between the two main divisions in style and proportion, the more compressed character of the narrative in the former, the greater fulness and variety in the latter, the different treatment of discourse and the like, can scarcely be accounted for simply by the difference in the subjects. They seem to point to the employment now and again of other sources. There are some things which are due probably to Mark himself, such as the explanations about the Jewish washings (72.4), the comment on Christ's word regarding defilement—

'This he said, making all meats clean' (719), and the incident of the young man (1451.52). The long eschatological discourse in ch. 13 seems to require for its explanation a written source (cf. especially 1314). There are some paragraphs, too, which are of so distinct a style as to point to dependence

on another source, perhaps a written document. To these belong in particular the episode of Herod in ch. 6 and the opening of ch. 14.

It is difficult to say whether the Gospel owes any part of its matter to an editorial hand. It is most difficult to determine whether the Logia must be reckoned among its sources. especially Weiss and Titius (the latter in the Theologische Studien Herrn Prof. D. Bernhard Weiss zu seinem 70 Geburtstage dargebracht), are of opinion that its contents cannot be explained without the assumption of some written source such as the Logia. There are passages occupied with discourse or conversation, it is held, which cannot be referred to independent oral tradition (e.g. 3<sup>23-29</sup> 6<sup>7-11</sup> 10<sup>29-31.42-45</sup>). The opening quotations (1<sup>2,3</sup>), the secondary form of the voice from heaven at Christ's baptism (1<sup>11</sup>), the account of the Temptation (1<sup>12,31</sup>) and other things of a similar kind it. tion (112.18), and other things of a similar kind, it is argued by Weiss, indicate acquaintance with an earlier writing, and that writing can only have been the original apostolic source to which the other Synoptists are indebted. On the other hand, it is to be noticed that Mark, who is usually sparing in his report of Christ's sayings, is now and again fuller than Mt and Lk in the matter of Christ's private instructions to the Twelve, and that in Mk there is only one instance of a doublet proper (935 with 1043.44; cf. Hawkins' Horæ Synopticæ, pp. 73, 81, 178). These things rather tell against the idea of a written source additional to Mark's notes of Peter's reminiscences. At the most, the debt to the Logia can only be very limited, and the influence of such a source very occasional. But in a few passages, and especially m ch. 13, these may be recognized.

x. Relation to Matthew and Luke.—While

x. RELATION TO MATTHEW AND LUKE.—While the three Synoptical Gospels cover for the most part the same field, and have also a considerable measure of agreement, especially in their latter portions, in the arrangement of events, they have also notable differences in the amount, distribution, and connexion of their matter. Mk wants much that is found either in Mt or in Lk. Such sections, e.g., of Mt as chs. 1-2. 5-7, and of Lk such parts as chs. 1-2. 9<sup>51</sup>-18<sup>14</sup>, are entirely, or almost entirely, unrepresented in Mk. On the other hand, Mk has a small proportion of matter not found either in Mt or in Lk—amounting to about fifty verses. He has also a certain proportion of matter which is found either in Mt and not in Lk, or in Lk and not in Mt. Omitting the opening verse and the disputed conclusion, reckoning the second Gospel to consist of 106 sections, and deducting 5 as wholly peculiar to Mk, the result is that 93 are common to Mk and Mt and 8 not found in Lk, while 81 are common to Mk and Lk and 10 not found in Mt (Swete, Gospel acc. to

St. Mark, p. lxiii).

Tried, again, by the test of characteristic words and phrases, and defining these as words and phrases which occur at least three times in Mk, and are not found at all in Mt and Lk, or occur in Mk oftener than in Mt and Lk together, Mk is seen to contain a comparatively small proportion of such—only some 37 in all; while in Mt the number is about 140, and in Lk about 86 (Hawkins, Horæ Synop. pp. 1-12). In arrangement, too, Mk differs considerably, as we have seen, from Mt and Lk—more especially from Lk—in the arrangement of the common matter on to the end of the ninth chapter; while from this point onwards there is general agreement, the main departures being in the cases of the withering of the fig-tree and the exposure of Judas.

But it has also to be noticed that in not a few passages, some brief and others of greater length, the second Gospel shows remarkable coincidences in word and phrase with Mt or with Lk. These are seen, e.g., in Mk 4<sup>3-4</sup>, Mt 13<sup>3-4</sup>; Mk 4<sup>3-9-19</sup>, Mt 13<sup>5-9-22</sup>; Mk 8<sup>27</sup>-9<sup>1</sup>, Mt 16<sup>13-28</sup>; Mk 9<sup>2-9</sup>, Mt 17<sup>1-10</sup>; Mk 1<sup>24-25</sup>, Lk 4<sup>24-25</sup>; Mk 3<sup>4-5</sup>, Lk 6<sup>9-10</sup>; Mk 10<sup>14-19</sup>, Lk 18<sup>16-20</sup>. There are certain parts, again, in which Mk exhibits verbal agreement partly with Mt and partly with Lk, as, e.g., Mk 1<sup>40-44</sup>, Mt 8<sup>2-4</sup>, Lk 5<sup>12-16</sup>; Mk 2<sup>13-22</sup>, Mt 9<sup>9-17</sup>, Lk 5<sup>27-29</sup>. In what relation, therefore, does the second Gospel stand to these others? Is it independent of both and prior to them? Or does it occupy an intermediate position? Or is it dependent on both

and posterior to them?

Ancient tradition is not in favour of the priority of Mk. It generally regards Mt as the first of the Gospels. Clement Alex. (Euseb. HE vi. 14) gives the tradition regarding the order of the Gospels. He reports it, according to Eusebius, as 'derived from the oldest presbyters,' and as being to the effect that the Gospels which contain the genealogies were written first. Augustine regarded Mk as dependent on Mt (de Cons. Evang. i. 2). And many in modern times have held Mk to be later than Mt, or than both Mt and Lk. Griesbach (Opusc. Acad. ii. p. 358, etc.) propounded the hypothesis that the second Gospel was derived from the first and third, partly by combination, and in larger measure by abridgment. In this he has been followed, with minor modifications, by Fritzsche, de Wette, Baur, Bleek, Delitzsch, Köstlin, Kahnis, and many more. In some cases Griesbach's view is followed, but with the additional supposition of a third written source, a proto-Mark (S. Davidson, etc.).

The arguments in support of the theory of Mk's dependence and posteriority are taken so far from the witness of tradition already referred to; from general considerations, such as the improbability that a Roman Gospel would precede a Palestinian; and from the evidence of quotations in ancient Christian literature, the attempt being made (but with doubtful success) to show that the earliest citations from the Gospels, particularly in writings like the Gospel acc. to the Hebrews, presuppose Mt and I.k, but not Mk. But the main arguments are based upon an analysis of the Gospel itself. It is held to be improbable that a Gospel which contains so little of the discourses of our Lord should be the earliest, and this improbability is thought to be confirmed by an examination of the contents of Mk, which discovers, it is held, many evidences of dependence, condensation, and Cases of incompleteness, obscurity, alteration. incongruous combination, and the like, are said to exist, which are explained, it is asserted, by haste, inattention, or lack of discernment in drawing from Mt and Lk. But surely incongruities of that kind are more likely to disappear than to persist when a writer is not first in the field and has the opportunity of consulting previous authori-

Most of the instances, too, come to little. Why should it be necessary to suppose, e.g., that when Mk (5<sup>15</sup>) speaks of the demoniac as 'clothed,' he must have Lk's statement in view that 'he ware no clothes' (Lk 8<sup>27</sup>)? Or why should the centurion's cry, 'Truly this was a Son of God,' in Mark's record (15<sup>26</sup>), presuppose that the evangelist had before him Matthew's statement about the earthquake, the rending of the rocks, and the opening of the graves? Those peculiarly graphic descriptions, which are usually taken to indicate Mark's originality, are in many cases (e.g. 5<sup>1-7</sup>) 7<sup>24</sup> etc.) strangely interpreted as due to pragmatism, design, reflectiveness,—things suggestive of dependence and comparative lateness. For reasons which are not easy to grasp, the historical, geographical, and archæological explanations in such

passages as  $2^{26}$   $7^{26}$   $8^{10}$  etc., are supposed to betray the secondary character of Mark. But it is entirely to misunderstand these to speak of them as 'unimportant, prosaic, unsuitable, and trifling' (S. Davidson, *Intr. to NT*, i. 494).

Opinion, however, has gone more and more in the other direction. The independence and priority of Mk have been accepted by some (e.g. Ritschl) who originally held the other view; and scholars of different tendencies (Weisse, Wilke, Lachmann, Reuss, Thiersch, Ewald, Volkmar, Holtzmann, Schenkel, Weizsäcker, Weiss, Meyer, etc., and most English authorities) have been led, though not always in the same way, to the common conclusion that Mk is the most primitive of the Gospels. It is also very generally held that our second Gospel, or a source corresponding sub-

stantially to it, forms the basis of the first and

third Gospels.

Many considerations, not a few of them of great force, support this conclusion. The peculiar freshness and realism of the second Gospel, the vividness of its descriptions, its liveliness even in dialogue, its precision and circumstantiality in its notices of time, place, custom, situation, and the like, and the simple objectivity of its narrative, are not consistent with the idea that it is the laboured work of an epitomizer (as Augustine supposed), or of a compiler who produces his composition by selecting, curtailing, and combining. These are characteristics that speak of originality and priority. Nor is it easy to understand why a writer should have set himself to the task of constructing out of two larger Gospels, which nevertheless were neither of them very large, a smaller Gospel, following much the same plan, and having very little new matter by which to justify itself.

Further, if Mark had Mt and Lk before him, the use he has made of them is strange. His selection of matter is puzzling. An epitomist or a constructor of abstracts is expected to cultivate brevity. But Mk does not always do that. In many cases where he reports the same incidents as Mt or Lk his narrative gets enrichments peculiar to itself. Sometimes, too, we should have to suppose him preferring the fuller version of Lk to the briefer version of Mt. And why should he omit such passages as Mt 9<sup>27-31</sup> 12<sup>22</sup> etc., or 14<sup>28-32</sup> 17<sup>24-37</sup>, where Peter is introduced, and so much of the richest matter of Lk, while he takes over short and less significant sections, such as 6<sup>12.13</sup>, cf. Lk 9<sup>69</sup>; 6<sup>20</sup> etc., cf. Lk 9<sup>10</sup> etc.; 9<sup>28-41</sup>, cf. Lk 9<sup>49.50</sup> etc.,?

It is to be noted, also, that Mk preserves his distinctive character all through, and does not owe anything that is peculiar either to Mt or to Nor do the cases in which Mk is held to give the clearest evidence of dependence on the other Synoptists stand the test of a careful ex-Much is made, e.g., of Mk's tenamination. dency to adopt at points a copious narration and a twofold method of expression. This is explained by supposing him to have borrowed now from the one and now from the other. But it is found that these ways of writing are not confined to passages which might be regarded as extracts, but are generally characteristic of Mk. Not a few cases of agreement with Mt or with Lk, again, are thought to be best explained as the results of the carrying out of Mk's purpose to omit the longer discourses. But there are cases (e.g. 656 940) where discourses. But there are cases  $(e.g. 6^{56} 9^{40})$  where Mk quotes Lk without the occasion created by a discourse; and there are paragraphs, such as those where the Sermon on the Mount (121 etc.) and certain parables (426 etc.) might come in, where the selection of verses cannot be explained by the mere wish to pass over these discourses. In short, the

procedure which Mk must be supposed to have followed in these passages and in great parts of his narrative becomes incredible. He is made to leap from Mt to Lk and from Lk to Mt, taking a verse now from one and now from the other, and mixing up his borrowings in a way that can only

discredit the hypothesis.

xi. Purpose.—The second Gospel gives no such declaration of its aim and intention as is found in the third and the fourth (Lk 1<sup>1-8</sup>, Jn 20<sup>31</sup>). But that its object was a simple, practical one, appears to be borne on its face. More subtle meanings, however, have been read into its story. That it was composed with a specifically dogmatic purpose, and that in the choice and presentation of its material it was ruled by that purpose throughout, was the contention of Baur and his school. The Tübingen critics dealt with it as a Tendency-writing constructed with the view of mediating between two antagonistic parties in the Church, and effecting their reconciliation. In harmony with their idea of the rise of the Catholic Church and the relation of the NT writings to that event, they explained the second Gospel as a neutral composition, prepared on the principle of taking over from Mt nothing that would offend Gentile or Pauline Christians, and from Lk nothing that would offend Jewish or Petrine Christians (so, too, Schwegler, Köstlin, etc.). Even the choice of the name given to this professed author was supposed to point to this, Mark being associated in the earliest literature both with Peter and with Paul. The same general idea was put by Hilgenfeld in the particular form of a purpose to mediate between the Jewish-Christian Matthew and the Pauline Luke.

Pfleiderer, again, takes this Gospel to be the product of Pauline influences adapted to mediating uses. He thinks the opening sentence which speaks of the 'Gospel,' the summary of the preaching of Jesus in terms of repentance and belief (115, cf. Gal 326 56), and other things in what follows, run in terms of Pauline ideas and expressions; that the recital of the wonderful works and the polemical discourses of Jesus is so put as vividly to contrast the free spirit of the Gospel with the narrow legalism of Judaism; and that the accounts narrow legalism of Judaism; and that the accounts given of the lack of spiritual discernment on the part of the disciples (Mk 9<sup>12, 23</sup>, cf. 2 Co 4<sup>4</sup> 5<sup>16, 17</sup>, Gal 6<sup>12</sup>), the lack of power on their side to expel evil spirits, while it was possessed by one who did not follow in their company (Mk 9<sup>18, 19, 38, 39</sup>, cf. 1 Co 12<sup>28</sup> 15<sup>9, 10</sup>, 2 Co 12<sup>11, 12</sup>, Gal 2<sup>6</sup> 3<sup>5</sup>), and similar things which appear prominently in Mk's record, are the 'Pauline reply to the glorification of the Twelve in the Apocalypse at the cost of the Apostle to the Heathen' (Hibbert Lectures, pp. 170–177). Thus the second Gospel is made a Pauline writing, connected with the Roman Church and writing, connected with the Roman Church, and the product of the movement in behalf of a reconciliation between Paulinism and Jewish Christianity in which that Church took an early and leading part.

In the hands of Baur himself and his original followers, the purpose ascribed to Mk was connected with the place given to Mk as dependent on Mt and Lk. With the disproof of the latter position the situation is materially altered, and important members of the Tübingen school have broken away from Baur's presentation of the case. Hilgenfeld and Holsten deny that Mk can be later than Lk. Volkmar admitted that it canbe later than Lk. Volkmar admitted than not be later than Mt any more than Lk. feld finds in it a mild Jewish Christianity; Holsten Pfleiderer, too, who attempts to put a new complexion on the mediating purpose, has respect for the ancient tradition, but reads Mk through

Apart, however, from these differences, the Paul. Tübingen theory in all its forms involves an interpretation of many passages of the Gospel which is in a high degree fanciful and artificial. It allegor izes freely in dealing with the narrative. Even in the hands of Pfleiderer Mk's reports of Christ's announcements of His death and resurrection become a 'strong hyperbole,' and his account of the transfiguration is regarded as a 'hieroglyphic'; while Peter's words about the building of three tabernacles (Mk 95 etc.) are an expression of the desire to see the transient and the permanent, the old and the new, the letter and the spirit associated The theory for all time' (Hibbert Lect. p. 176). reads into the narrative references to divisions in the Church, and allusions to the condition of things in the post-apostolic age, which the common eye cannot see there. It does violence to the simple, natural, descriptive, reporting character of the record, and puts a strained meaning on Christ's words regarding the Law, His Messiahship, His Mission, the Sabbath, and much else.

A didactic purpose of another kind has also been attributed to the Gospel. It is understood to have been written with a view to the effect which the delay of Christ's Second Coming might have on the primitive Church. The hope of that event was waning. It was necessary to reawaken it, and to secure Christians against the loss of faith and courage. With this object the second Gospel was composed, Christ's life on earth being so set forth as to show that in it, 'apart from His glorious Return, Jesus has sufficiently attested the Messianic character of His Mission' (so Weiss, Man. of Introd. to the NI, § 46, 7). But even this is to ascribe too much art and didactic design to Mk. To give witness to Christ as the Messiah, of the other Synoptists. But beyond this Mk has no other object than to tell a simple story of things as they happened, and for the most part as Peter reported them to have been seen and heard.

xii. Destination.—So far as historical testimony bears on the destination of the Gospel, it mony bears on the destination of the Gospel, it points to Gentile readers. That is the inference from the terms in which Mk is spoken of by Irenœus (adv. Hær. iii.), Clement Alex. (Euseb. HE vi. 14), Jerome (de Vir. Ill. c. 8), etc. The way in which Rome is connected by some of the Fathers (e.g. Clement Alex. and Jerome) with the request that Mk should write a Gospel, implies that it was also understood to have been written for Roman Christians in particular. The internal evidence amply sustains the former position, but leaves the latter uncertain. The existence of a number of Latinisms in Mk is not enough to prove Roman readers to have been specially in view. For while Latinisms occur in larger measure in Mk than in the others, they are not absolutely peculiar to it. Far less can this definite destination be inferred from such alleged peculiarities of its narrative as the reduction of coins to the Roman quadrans (1242), its reference to the Roman practice of divorce, or the fact that it takes it for granted that the readers knew Pilate.

The locality of those addressed is not definitely

indicated. But that they were Gentile Christians appears from the fact that Aramaic terms, which would be strange to Gentiles, are interpreted, and that Jewish customs, localities, seasons, etc., with which Gentiles could not be presumed to be Tamiliar, are explained. Instances of the former are seen in  $\beta \alpha \nu \eta \rho \gamma \epsilon_1$  (3<sup>17</sup>),  $\tau \alpha \lambda_1 \partial \lambda \kappa \kappa \rho \mu$  (5<sup>41</sup>),  $\kappa \rho \beta \Delta \nu$  (7<sup>11</sup>),  $\epsilon \phi \phi \alpha \partial \Delta$  (7<sup>24</sup>),  $\delta \beta \beta \Delta$  (14<sup>36</sup>),  $\epsilon \lambda \omega t$ ,  $\delta \lambda \omega t$ ,  $\delta$ latter class belong the statements on the Jewish washings (7<sup>3</sup> and on what was done on 'the first day of unleavened bread' (142); the interpretation

of 'defiled' or 'common' as 'unwashen' (72); the explanation of the  $\lambda\epsilon\pi\tau\dot{\alpha}$   $\delta\nu\dot{\sigma}$  (1242); and the descriptions of the Mount of Olives as κατέναντι τοῦ Ιεροῦ (138), of the παρασκευή or 'Preparation' as 'the day before the Sabbath'  $(\pi\rho\sigma\sigma\dot{\alpha}\beta\beta\dot{\alpha}\tau\sigma\nu, 15^{42})$ , etc.

Certain suggestive omissions and insertions may also form part of the same case, e.g. the omission of the genealogies, the passing over of the limitations put upon the mission of the apostles according to Mt 105, and the insertion (only in Mk) of the  $\pi \partial \sigma i \nu$ τοι̂s ξθνεσιν in 1117. The way in which the Jewish law passes into the background and the limited use of the OT have also their significance. Mk himself never quotes the OT, except once in the introductory paragraph (12.3; the passage in 15.36 being of doubtful authority, as not found in N, A, B, C, D, X, etc.). The entire number of references of all kinds to the OT is 67. Of these, only 7 are peculiar to Mk. The quotations amount to 23. They are generally in agreement with the LXX, with a few exceptions (those giving Is 2918 408, Zec 137, Mal 31). With the one exception mentioned, all the references to OT in this Gospel and all the citations from it occur in reports of sayings of Christ or of those who spoke with Him.

xiii. PLACE AND DATE. - So far as historical testimony pronounces on the question of the place in which this Gospel was written, it is in favour of To this effect are the statements made by Clement Alex., Eusebius, Jerome, Epiphanius, and others. These statements have been suspected. But there is nothing to show that they were made under the influence of the belief that Mark wrote under Peter's superintendence; and they have nothing against them in ancient tradition, except that Chrysostom named Alexandria as the place. But in this he stood alone, his statement having no support even on the part of Alexandrian writers. The only other place which has been suggested is Antioch (so Storr). But the suggestion is founded on an uncertain inference from Mk 15<sup>21</sup> and Ac 11<sup>20</sup>.

The idea has been mooted that there may have been a publication of the Gospel both in Rome and in Alexandria (R. Simon, Lardner, Eichhorn). Alexandria (A. Simon, Lardner, Elennorn). There are, it is true, one or two passages in the Fathers which bring the composition of the Gospel and a mission of the evangelist to Egypt or to Alexandria in particular together. Eusebius, e.g., expresses himself thus: τοῦτον δὲ Μᾶρκον, πρῶτον φασὶν ἐπὶ τῆς Αλγύπτου στειλάμενον τὸ εὐαγγέλιον ὁ δὴ καὶ συνεραίνατο κπούξει, ἐκκλησίαν και προτέρι, ἐκκλησίαν και προτέρι ἐκκλησίαν και προτέρι. γράψατο κηρύξαι, έκκλησίαις τε πρώτον έπί αυτής 'Αλεξ-ανδρείας συστήσασθαι (HE ii. 16); and Jerome gives it even more explicitly, thus: 'assumto itaque evangelio quod ipse confecerat perrexit Ægyptum, et primus Alexandriæ Christum annuntians, constituit ecclesiam, etc. (de Vir. IU. c. 8; cf. also Epiph.  $H\alpha r$ . ii. c. 1). But the passages do not imply that the Gospel was written or published at Alexandria. Rome, therefore, remains the only place with any claim on our attention so far as ancient tradition goes, and that Mk was in Rome with Paul appears from the NT itself (Col 410, Philem 24). Whether it can be said that the NT represents Mk as in Rome also along with Peter, depends on the interpretation of έν Βαβυλώνι in 1 P 518.

As the Gospel itself gives no certain indication of its date, opinions have differed greatly on the subject. They have been largely influenced by the views which scholars have taken of the purpose of the Gospel and of Mk's relation to the other Gospels. Those who have seen in it a Tendencywriting composed with a view to the harmonizing of two opposite parties in the Church, have naturally placed it very late. Baur himself put it far within the 2nd cent., our present Gospels having been assigned by him to somewhere between A.D. 130 and A.D. 170.

Those, too, who deny that Papias' statements

refer to our Mk, and believe in the existence of an refer to our Mk, and believe in the existence of an earlier and simpler Mk, naturally assign our Gospel to a comparatively late date. Dr. Samuel Davidson, e.g., thinks A.D. 120 is as near the true time as we can get. Those who hold it posterior to Mt and Lk (Griesbach, etc.), or posterior at least to Mt (Hilgenfeld, etc.), put it at various dates after the destruction of Jerusalem. Volkmar referred it to A.D. 73. Hilgenfeld himself ascribes it to Domitian's time; Keim brings it down to about A.D. 115-120; Köstlin, distinguishing between two Marks, refers the earlier one to A.D. 65-70, and our Marks, refers the earlier one to A.D. 65-70, and our present Gospel to the first decade of the 2nd cent. On the other hand, some have attributed to it a very early date. Theophylact, e.g., and others place it some 10 years after Christ's death. The subscriptions of many manuscripts, both uncial and cursive, assign it to 10 or 12 years after the Ascension (cf. Harnack, Chronologie, pp. 70, 124). Schenkel refers it to A.D. 45-58; Hitzig, to A.D. 55-57 55-57.

The data available for the determination of the time of composition are limited and uncertain. The Paschal Chronicle places the Gospel at A.D. 40, and Eusebius in his *Chronicon* puts it in the third year of Claudius (A.D. 43). Irenœus and Clement Alex. both represent it as written after Peter's arrival in Rome, which might be early in A.D. 63. But they differ in that Clement speaks of it as composed while Peter was alive, whereas Irenæus describes it as published after the death

of Peter and Paul.

Of the various historical testimonies, that of Irenœus appears to be both the most definite and the most credible. Doubt has been cast upon it. Some allow it to be nothing more than an inference from the statement made by the author of the Second Epistle of Peter (115) regarding his purpose to 'have these things in remembranco' after his decease (Fritzsche, Hug, Eichhorn). Others suspect it as if it were more doctrinal than historical (Weizsäcker). But these objections are not of serious weight, and the difference between Irenæus and Clement on the one point is neither sufficient to discredit the whole tradition, nor large enough to affect by more than a few years the indication of date which we get from tradition.

The internal evidence points on the whole to the same approximate period. There are things indeed in the Gospel which are thought to point The references to the coming of the Son of Man, and the final tribulation in 91 1324, are said, when compared with their parallels in the first Gospel, to betray the disposition to put these events further forward than is the case in Mt. But it is precarious, to say the least, to build much upon the phrase 'till they see the kingdom of God coming with power,' as if it meant that the mighty effects of that kingdom must first be seen at large on earth. Nor can much be made of the change from 'immediately after the affliction of those days' in Mt 24<sup>29</sup> to 'in those days after that affliction' in Mk 13<sup>24</sup>. The use of the word εὐαγγέλιον in 1<sup>1</sup> is taken to be another sign of a late date, the term being supposed to mean there 'gospel history.' But it may mean simply the 'glad tidings' or announcement of the promised Messiah. considerations of this kind are altogether uncertain and inadequate. Nor do they gain much when it is urged in addition that it is antecedently improbable that any Gospel in the form of a regular, finished, written record could have been produced before the destruction of Jerusalem.

Much turns upon the view taken of the eschatological passages. The parable of the fruit-bearing earth (426-29) has been placed alongside these, and has been strangely regarded (by Weizsäcker) as an indication that the Gospel was composed after the destruction of Jerusalem. But the impression produced by the words on the end in ch. 13 (especially vv. 13. 14. 24. 30. 33) is different. They naturally suggest that the end as yet was only in prospect, and there is no passage which clearly means or certainly suggests that the fall of Jerusalem and the temple was an accomplished event. reasonable to suppose that, if so great a catastrophe in Jewish history had taken place within a recent or a comparatively recent period, there would have been indications of it in less obscure forms in the carliest of the Gospels. There are also occasional expressions, such as the reference to the presentation of the shewbread as if it were an existing custom (2<sup>26</sup>), which imply rather that the city and temple were still standing. And there are others which are difficult to harmonize with a late date. It is admitted, e.g., that 'the recollection implied in the notice that Simon was the father of Alexander and Rufus prevents the Gospel from being put too late into the 2nd cent.' (S. Davidson, Intr. to the NT, i. p. 508).

The period which seems to be made most probable, both by historical testimony and by internal considerations, is that between Irenaus' date and the year A.D. 70. Weiss proposes the close of the seventh decade, or about A.D. 67. A date only a little before the destruction of Jerusalem, perhaps early in A.D. 70, is as near as we can get. where facts are so scanty and the indications given in the writing itself are of such uncertain interpretation, it remains a question only of greater or

less probability.

pretation, it remains a question only of greater or less probability.

MARKET-PLACE is in RV the fuller and better rendering for the Gr. ayopd, oftener represented in

AV by the more general term 'market.' Its primary and comprehensive sense is that of a place of assembly, which may as such be associated with various uses. We find it mentioned accordingly in connexion with the holding of trials (at Philippi, Ac 16<sup>19</sup>), with public resort and discussion (at Athens, Ac 17<sup>17</sup>), with business dealings and traffic, such as the hiring of labourers (Mt 203) or the buying and selling of goods, which implies risk of pollution (Mk 74), with the sports of children in its open space (Mt 1116, Lk 732), and with the passing exchange of formal greetings in its thoroughfare (Mt 237, Lk 1143). It always conveys the suggestion of openness and publicity, and forms a contrast to what takes place in private or within doors. The like associations of a place of counsel, of truffic, and of idling gathered round the Latin word forum (see APPIUS, Market of). The ἀγορά was probably at first simply an open space; but it subsequently in the more important towns became marked off by colonnades, embellished by statues, and surrounded by public

WILLIAM P. DICKSON.

MARMOTH (Β Μαρμωθί, Α Μαρμαθί), 1 Es 8<sup>62</sup> (<sup>61</sup>

LXX)=MEREMOTH, Ezr 8<sup>33</sup>.

MAROTH (מרוֹם).—A town named only in Mic 112. There is a play upon the name of this town, which means 'bitternesses' (LXX tr. ישָרָת פְרִוֹח by κατοικοῦσα δδύνας), but there is much that is obscure both in this and in the preceding verse (see Well-hausen, Nowack, and esp. Ryssel, 32f.). The site is unknown; but as Maroth is noticed with Saphir and other places in Philistia, as attacked by the Hebrews, it is probably to be sought in the plain between Lachish and Joppa. ## MARRIAGE .-

Form and Duties of Marriage.
 The Sphere of Lawful Marriage.
 Conditions and Bars of Marriage.
 The Levirate Custom.

2. The Lovrate Custon.

iii. Marriage Procedure.

1. Betrothal.
2. Nuptial Rites and Customs.

iv. The Moral Subversion of Marriage (Adultery).
v. The Legal Dissolution of Marriage (Divorce).
vi. Marriage as a Symbol of Spiritual Truths.

Marriage (with Fr. mariage, Ital. maritaggio, marriage (With Fr. marriage, Ital. maritaggio, and transitional forms maridatge, maritatge, from Low Lat. maritaticum) is used to describe—
(1) the legal relationship of husband and wife;
(2) the act, ceremony, or process by which this relationship is constituted. In the former case it is equivalent to wedlock or the estate of matrimony (Electron of Old Fing and the constitution). mony (Ehestand, cf. Old Eng. aéw or aé, custom, marriage); in the latter it corresponds to the marriage ceremony (Germ. Eheschliessung), or, by an easy transition, to the whole of the proceedings of which that ceremony is the essential part (wedding, *Hochzeit*). For the estate of matrimony the OT has no name: where 'marriage' appears in our versions the translation is a circumlocution (Gn 34°, Ex 211°, Ps 7863), and the want was only supplied at a late date by the Talmudic mer and The function by which a union was constituted is also indirectly referred to by some verb indicating that one takes, or gives, or becomes a wife (see Note on Nuptial Rites). The idea of the rite is apparently conveyed by the word 'espousals,' but in Jer 22 nlbbp which is so translated really refers to the period of betrothal, while in Ca 311 and includes the whole marriage proceedings or wedding. The later word for the ceremony is julie or fine. In NT 'marriage' translates γάμος, which, like the Eng. word, means both the estate of marriage (He 13°) and the ceremony with its attendant proceedings (Jn 2¹·²), and also stands for the marriage feast (RV of Mt 22°).

i. THE FORM AND DUTIES OF MARRIAGE AS DEVELOPED UNDER THE INFLUENCE OF REVELATION.—The history of marriage, in the extent which here concerns us, is the history of a Semitic institution which by natural development had reached a comparatively excellent form, and which, under the successive influences of Judaism and Christianity, was gradually improved and perfected. The fresher problem relates to the evolution of Hebrew marriage anterior to its contact with OT revelation; and the difficulty is to do justice, neither more nor less, to the theories which have been propounded as to the early history of marriage, and which at certain points claim biblical support.

1. OT VESTIGES OF PRIMITIVE MARRIAGE .-The scriptural account of the origin and history of marriage cannot satisfy the thorough evolutionist. According to the biblical representation, its perfect type was exhibited in the union of the first pair, upon this followed a declension to imperfect forms and sexual licence, and finally Christianity summoned mankind to realize the ideal by reverting to the divinely instituted original. But on evolutionary principles the ideal is to be found, not at the beginning but at the end—if anywhere; and the problem is to show from what base beginnings, under what impulses, and by what stages, marriage as we understand it came to be, and to be entrenched behind the laws. The theory which has served as the basis of the discussion (M'Lennan, Prim. Mar.) distinguishes four stages in the development—(1) a state in which the unions of the sexes were 'loose, transitory, and in some degree promiscuous'; (2) the system of polyandry, of which the lowest form is a kind of communal marriage, the highest the union of a woman with a band of brothers; (3) the reversal of polyandry in the system of polygyny; and (4) as the result of prolonged experience, and also of changed conditions, an exclusive monogamy. For a time this scheme was generally accepted as an assured result of anthropological science, but during the last decade it has been subjected to searching criticism, esp. by Starcke and Westermarck, and has been discredited in various important points. In particular, there is growing incredulity as to the alleged original promiscuity. Though the poverty of primitive languages in words expressive of relationships lends it some support, the counterargument is stronger: human nature was suffi-ciently armed with jealousy, if not otherwise, to fight for and secure a better order from the first. As regards polyandry, it is not open to doubt that this form of union has played a part in human history of an importance which was till lately not even suspected. Still met with in widely remote parts of the globe, the custom of polyandrous marriage was yet more extensively prevalent in antiquity. The recollection of it is preserved in traditions and usages of the progressive nations of the old world, as well as in their notices of the manners of barbarians. It was doubtless at least one of the roots of the remarkable system of the Matriarchate, of which there are so many traces in ancient law, and which is still maintained by some score of peoples representative of all the great regions of the barbaric world.' But, important as this discovery is, there is a growing conviction that M'Lennan exaggerated. Even if it be admitted (and it is not admitted by all competent authorities) that the matriarchal system was exclusively the outgrowth of polyandrous marriage, the proof would still be far from complete that polyandry had been a universal and necessary phase in the evolution of the institution of marriage.

By the Matriarchate, maternal system or 'mother-right' is

not to be understood a system in which women actually rule (gynækocracy), but only one in which they are regarded as constituting the family bond. They determine the recognized relationships, so that maternal relatives are treated as kin, while the paternal are ignored; and names and property are consequently transmitted through the offspring of the female members of the group. Such a system, M'Lennan contends, points to a time when paternity was usually, or in a great proportion of cases, uncertain. 'The connexion between these two chings—uncertain paternity and kinship through females only—seems so necessary—that of cause and effect—that we may confidently infer the one where we find the other' (Prim. Mar. 2 126). This theory as to the origin of the maternal system is doubtless much more plausible than that of Bachofen, the pioneer in the field (Das Mutterrecht, 1861), who supposed that women, disgusted with the licentious primitive customs, rose in rebellion, procured the benefit of a marriage-law, and by their victory won an influence by which they reorganized the whole social life in their own favour. Starcke, however, denies that female descent necessarily points to uncertain paternity. 'The reckoning of kinship through the father only is a fact, yet no one has ever asserted that this is due to uncertainty with respect to the mother' (Prim. Fam. p. 18).

While Hebrew society in OT times represents an advanced stage in the evolutionary scheme, viz. that in which polygyny and paternal government are the dominant forms, the OT literature has nevertheless been largely drawn upon in the discussion, on the ground that it embodies survivals from the diverse customs of prehistoric times.

The evidence for a prehistoric stage of polyandrous marriage among the ancestors of the Hebrew stock is of no great weight. Most stress has been laid on the peculiar custom of the levirate marriage, which M'Lennan seeks to interpret as a right of succession derived from the special form of polyandry in which a family of brothers have a wife in common (*Prim. Mar.*<sup>2</sup> 163), but this explanation is viewed with growing disfavour. Some use has also been made of the observation that the Hebrew words for brother, sister, and father occur with considerable latitude of meaning (cf. especially by with root-meaning 'nurturer,' thence 'progenitor' and even 'husband,' Jer 34; W. R. Smith, Kin. and Mar. p. 118)—the suggestion being that this points back to a time when paternal relationships were not distinguished because not ascertainable. It may, how-ever, be safely said that these arguments would carry no conviction were it not for the assertion that an early stage of polyandry is proved to have been traversed by the kindred stock of the Arabs (ib.). And even the assertion that Tibetan polyandry prevailed among the early Arabs is only made in the modest form that it meets all the conditions of a legitimate hypothesis, and that the conditions under which this type of sexual relationship arises were actually present in Arabia

(p. 124).

The evidence for the operation of the so-called matriarchate or 'mother-right' is of much greater weight, though some of the arguments are farfetched and weak. (α) The custom of tracing descent through the female line may have survived in the distinction which long continued to be drawn between paternal and maternal relatives, with the consequence that marriage was allowed with a sistergerman, a father's sister, a brother's daughter, etc. (see Bars of Marriage). From the same point of view Abimelech seeks assistance against his brothers from 'the family of the house of his mother's father,' and urges the plea, 'Remember that I am your bone and your flesh' (Jg 9¹-²). Agreeably to the same system, under which the uterine brothers have special duties of guardianship, we find that Laban is prominent in the negotiations about Rebekah's marriage (Gn 24²), and that Simeon and Levi avenge the wrongs of Dinah (34²²). In the patriarchal history the family-tree of the two allied families in Syria and Palestine is worked out with reference to Milcah and Sarah (Fenton,

Early Heb. Life, p. 7).\* The force of much of this is indeed weakened by the obvious consideration that under a system of polygyny it is absolutely necessary for purposes of distinction to give prominence to the mother, and in case of domestic troubles to seek help of her kindred; but enough remains, especially in the matter of permitted degrees, to justify the belief that the Hebrew history contains fossil remains of the matriarchate. (b) The allegation that among these vestiges we are to reckon the so-called beena marriage, made simultaneously by M'Lennan and W. R. Smith, and since repeated with the utmost confidence, really rests on a most precarious foundation. 'In beena marriago,' to quote the former (Patr. Theory, p. 42), 'the young husband leaves the family of his birth and passes into the family of his wife, and to that he belongs as long as the marriage subsists. The children born to him belong not normal both to thin, but to the family of their mother. . . . His marriage involves usually a change of village; nearly always (where the tribal system is in force) a change of tribe.' Of this custom an example is furnished, it is said, in Jacob's marriage (Gn 29 ff.). He becomes a member of his wives' group, he buys his place by service, and Laban claims the wives and children as his own (3163). What has been overlooked is that Jacob is represented as a fugioverlooked is that sacon is represented a triple tive from vengence, who was not in a position to bring his wife into his own family, and that there is a design to exhibit Lahan as a grasping and churlish person; and in the light of these facts Jacob's marriage appears to be merely an exceptional arrangement with a hard man, to which he was driven by stress of circumstances. A further proof is discovered by W. R. Smith in the phrase 'go into'—a relic, as he thinks, of the time when the husband literally left his home to join his wife, while the same practice had its visible monument in the long-continued custom of pitching a special tent for the consummation of marriage (Kin. and Mar. pp. 176, 291). More impressive is the M'Lennan-Smith suggestion, widely accepted by later writers, that it is been a marriage which is indicated in Gn 224 in the words (of Adam [Del.]; of the narrator [Keil, Dillm.]): 'therefore shall (doth) a man leave his father and his mother, and shall (doth) cleave unto his wife; and they shall be (are) one flesh.' What is here contemplated, it is said, is that the man leaves the household, the family, of his birth and is adopted into his wife's kin. Now in interpreting the verse the first question which we have so ask is, What was the sense which the narrator intended to convey? And what seems quite certain is that it cannot have been the intention of a writer standing on the confines of the prophetical period to give his sanction, if not that of Adam, to a form of marriage which was obso-lescent if not obsolete. If it be admitted that in the historical period 'the man is the head of the family, and of the wife, who is transferred from her family to that of the man' (Nowack, Arch. i. p. 153), it cannot be supposed that the purpose of was to revive the abandoned and discredited type of family life. Much more likely is it that the command to leave father and mother and cleave to one's wife was directed against some loose form of marriage which does not involve the founding of a home, e.g. the so-called mota type, in which the husband's association with his wife is limited to occasional and clandestine visits (cf. Samson's marriage). There remains, indeed, the possibility that the saying 'therefore shall a

\* In the name of Eve, which he connects with havy (a group based on female kinship), W. R. Smith finds a recognition of the fact that female descent had been the original system (Kin. and Mar. p. 177); while, according to Stade, the older tradition was that the twelve tribes were descended from twelve wives of Jacob (GVI).

man,' etc., while employed by the narrator as suitable to express his own idea, was an ancient form of words, and that as first coined it sanctioned and commended beena marriage. But it is rather unlikely that the characteristic formula of one system should have been cherished by the rival system which displaced it. In general it must be granted that in prehistoric times beena marriage may well have existed; but it must also be said that no direct conclusive evidence of such marriage can be drawn from OT sources.

2. FORM AND DUTIES OF MARRIAGE IN OT TIMES.—(1) The Form of Marriage.—The typical, though, of course, not the exclusive form of Hebrew marriage in historical times was polygyny. It emerges as an early and firmly established institution; and the interest centres in the attitude taken up towards it by the OT religion, which as Law regulated it, and as Prophecy began to undermine it.

The practice of polygyny is vouched for throughout the whole of the period in question. It appears as patriarchal usage: Abraham has a principal wife and two secondary wives (In 16<sup>3</sup> 25<sup>1</sup>), Jacob has two wives of each class (29<sup>23-30</sup> 30<sup>4-9</sup>). It was practised by at least some of the Judges (Jg 8<sup>30</sup> 9<sup>3</sup>), and in the cases of David and Solomon it comes in to account for their personal backslidings, and for the troubles and calamities of their reigns (2 S 513, 1 K 111-3). From these examples it is clear that it was customary for exalted persons to take several wives —whether from a desire for a numerous progeny, or with a view to strengthen themselves by influential connexions, or even to satisfy what were deemed the requirements of their position. But it might still be open to question whether the practice was at all open to question whether the practice was at an general. Great importance accordingly attaches to the mention of Elkanah (1S 1<sup>1</sup>), who was doubtless representative of a large class. We are also justified in supposing that the peasant and the shepherd usually supplied themselves with two wives, or with a wife and a concubine. And this is confirmed by the implication of bigamy in Dt, which gives us a

the implication of bigamy in Dt, which gives us a glimpse of the strained relations within the bigamous family (2115m; cf. Nowack, Arch. i. p. 158 f.).

The wide prevalence of polygyny and bigamy becomes a certainty when we reflect upon the position of the female slaves in the Hebrew family. These were the property of the man, in the full sense of the word; and unless his establishment was on the scale permitting of the inter-marriage of slaves, they naturally became the conculings. of slaves, they naturally became the concubines either of himself or of his sons. The recognized limitation of this right which is indicated, is that he could not appropriate a slave belonging to his wife except on the initiative of the latter or at least with her consent (Gn 16<sup>2, 8</sup>). These slave-concubines were supplied from various sources especially in sale by impoverished Israelitish parents, or as booty of war. The foreign origin of one name (ψίρ, cf. πάλλας) has been supposed to point to an extensive traffic, through the medium of the Phonicians, in this class of slaves (Nowack, i. p. 159; cf. on the name and position of the concubine, art. FAMILY).

The measures taken for the legal regulation of

polygyny pursued two main objects. In the first place, there is some evidence of a purpose to con-line the practice within narrower limits. The Deut. code, voicing the sense of the calamities it brought upon royalty and the nation, forbids kings to 'multiply wives' (Dt 17<sup>11</sup>). With this censure of royal licence is closely connected, as has been acutely pointed out (art. 'Marriage' in Smith's DB) the continuities the Smith's DB), the contumelious treatment of the eunuch-state, which is a presupposition of the system. But the purpose to which the law addresses itself with most earnestness and particularity is the protection of the interests of the

several wives, and the amelioration of the condition of the slave-wives. The oldest code deals with the case of the Israelitish woman who has been purchased for a slave-wife, asserts her title to the three conjugal rights, and provides that if these are withheld she must be set free (Ex 21<sup>75</sup>). Incidentally it refers to the wife of the Hebrew slave. and humanely enacts that the two must not be compulsorily separated: when the time of emancipation arrives, the wife in one instance follows the husband, in the other he may elect to remain with her in slavery (21<sup>2n</sup>.). The cause of the foreign slave captured in war is maintained by Dt. She is to be allowed a month of mourning, and her master, after living with her as his wife, is forbidden to sell her (21<sup>10n</sup>.). A fourth case would be that in which there were two wives of equal standing; and in this instance Dt interposes in the interest of the wife who may have lost her husband's affection, and insists that her son, if the first-born, shall receive his due portion \* (vv. 15-17). The same spirit inspired, and to some extent the same end was accomplished by, certain provisions restricting the right of divorce (see below). To those enact-ments little was added by the later legislation, except that the ritualistic requirements may have militated against polygyny by enforcing a rule of continence within the pale of marriage (Lv 1516).

A spirit of protest against the whole system, and the promise of more drastic reforms, is discoverable within the prophetic school. In opposi-tion to existing practice, J sounds the significant note that in the beginning it was not so. According to the antique mode of thought, to say that the first man had one wife only, was as much as to say that monogamy was the ideal system; and it is no accident that according to the same narrative, which is deeply conscious of the disturbance and corruption introduced by the Fall, polygyny first makes its appearance in the lawless line of the Cainites (Gn 428). It is, further, not without significance that Noah, the second father of the human race, also represents monogamy (Gn 77). And it is noticeable that there is an apologetic strain in the references to patriarchal polygyny: the bigamy of Abraham is explained by Sarah's dethe digamy of Adraham is explained by Salam's ac-sire for children (Gn 16<sup>116</sup>), of Jacob by the deceit of Laban (29<sup>28</sup>). Of still greater importance than this class of incidents is the circumstance that monogamous marriage was extensively used in the prophetic teaching as the symbol of the union of God with Israel (Hos 2, Is 50 etc., see below), while polygyny had its counterpart in idolatry. The imagery shows that monogamous marriage was felt to be the highest form, and on the other hand the detestation of idolatry naturally strengthened the dislike of the form of marriage by which it was so eloquently typified (Hamburger,

art. 'Vielweiberei').
(2) The Wifely Status and Conjugal Duties.-In OT times various circumstances tended to depress the status of the wife—the logic of the patriarchal system, the custom of the 'dowry, which suggested property, and the institution of polygyny, which divided her legitimate influence among several claimants. In theory she was the 'owned one' (קעילקי), while the husband was the 'owner' (קעילקי, see Family), and in the Decalogue she is numbered with his possessions (Ex  $20^{17}$ ). And in certain strata of the population the practice doubtless largely corresponded to the theory—the wife being little more than chattel and over-driven drudge. But among the wealthier classes the wife had no small liberty of action (1 S 2518, 2 K 422). And where a woman possessed exceptional capacity,

or knew how to increase her husband's affection. she asserted her title to a very different status. The wives of the patriarchs are not only consulted in matters of importance, but often impress us as accomplishing their purpose by their superior force of character (Gn 21<sup>10</sup> 27<sup>13</sup>. 40). In the period of the Judges the interest centres more than once in a strong woman (4<sup>4,17</sup>); and in the history of the monarchy there are times when the queen or the queen-mother is the real power behind the throne. From the description of the virtuous woman in Pr 31 we learn how much influence could be acquired by a wise and energetic wife of the middle rank, and how much she might do to advance her husband's fortunes and to enhance his reputation.

Reference has already been made to the sympathetic attitude of the Law towards the wife, and we have to note in addition the bearing of the J narrative of Creation on the wifely status. It acknowledges that the subject and even servile position actually occupied by the wife is the appropriate one, but suggests that it is the punishment of her initiative in the original transgression (Gn 316), and thus contrasts it with the position of a 'helpmeet' which was designed by God in creation (218).

The duties of the husband were generally recognized to include all that is involved in the support of the home. Incidentally Ex 21<sup>10</sup> enumerates as the minimum of obligation the provision of food and raiment, and cohabitation. As regards sexual morality the OT theory as well as frequent practice field far short of the standard of equality of treat-ment. The chastity of the wife was jealously guarded by the heaviest penalties, but custom and law recognized no parallel obligation of conjugal fidelity as resting on the husband-provided always he respected the rights of other men. At the same time conjugal fidelity was naturally involved in the loving relations of the husband towards his wife, depicted in more than one touching instance (2 S 3<sup>14ff</sup>). And there is evidence that the Hebrew intelligence, as tutored by experience, came to realize the folly, and through it the iniquity, of all sexual licence (Pr 2). Still more clear is it that the prophetic conscience was possessed by a deep sense of the abomination of whoredom; and finally a principle which claimed absolute marital fidelity was laid down by Malachi when he taught that neglect and inconstancy have God for their witness and avenger (2<sup>14, 15</sup>). The duties of the wife are not so specifically stated. The fundamental ones were chastity and submission (Gn 316), with devotion to the husband's family and interests. And by general consent the standard maintained by the Hebrew wives was high. Many daughters have done virtuously (Pr 31<sup>29</sup>), and the invectives of Amos and Isaiah only illustrate the principle— 'corruptio optimi pessima.'
3. THE LEAVENING BY CHRISTIANITY.—With

Christianity begins a new epoch in the history of marriage. The changes which it introduced were due, partly to express enactment of Christ and His apostles, partly to the obvious implications of fundamental Christian principles.

(1) The Christian system involved the adoption of monogamy, and the prohibition of polygyny and bigamy. It is true that there is no direct condemnation of the latter. And the omission cannot be explained by saying it would have been superfluous, for, although in NT times monogamy was the rule, polygamy was certainly practised to some extent (Jos. Ant. XVII. i. 3).\* As in the case of slavery, Christianity, without directly

\*In opposition to the usual view (Selden, Ux. Heb. i. 9), it is contended by Abrahams that monogamy had become the settled Jewish custom in Roman times apart from imperial or Christian influence, and that the theory was only tardily brought into harmony with the established practice by Rabbi Gershom, c. 1000 A.D. (Jewish Life in the Middle Ages, ch. vii.).

<sup>\*</sup> Favouritism was also discouraged by historical examples, which suggested that childlessness was ordinarily the judgment upon the preferred wife (Gn 80<sup>1</sup>, 1 S 1<sup>3</sup>).

attacking the custom, inevitably discredited and destroyed it. Our Lord's emphasis on the intimacy of the union between husband and wife (Mt 194.5) at least suggested that no second woman could be admitted to the sphere. Above all, the golden rule was incompatible with polygyny, for under this system other men are robbed and wives are degraded.

(2) The duties of the married state were also revised in the spirit of Christianity. (a) The husband's duties, the minimum of which were promulgated as the demand of the law, were comprehended by St. Paul in the manner of His master under the requirement of love-a love which has self-love, and also Christ's love for His Church, for its standard (Eph 5<sup>28</sup>, cf. 5<sup>28</sup>, Col 3<sup>19</sup>).\* (b) The silence of the OT legislation in regard to licence outside the marriage bond was broken, and faithfulness was made strictly obligatory. The latter was evidently not taken for granted, from the first at least, among the Gentile Christians, and it was necessary for the Council of Jerusalem to educate their conscience by making it clear that fornication did not belong to the class of things indifferent (Ac 1529). In various passages of the Pauline Epistles the imperative obligation of chastity is enforced with the menaces of excommunication (1 Co 511st.) and of eternal judgment (1 Th 43, Gal 519, cf. He 134), while the loose state of Corinthian opinion on the subject may be gathered from the careful argument by which the apostle demonstrates from the doctrine of the body as an integral and abiding element of personality. the incompatibility of sexual licence with an interest in Christ (1 Co  $6^{13}$ ). (c) Yet again the range of the husband's duty is extended to include constancy in love, which has its practical expression in the recognition of the perpetuity of the marriage tie (see below, Divorce).

The duties of the wife, in spite of the improvement of the status of woman which Christianity carried with it, continued to be developed from the presupposition of her subordination, and were summed up, not in love, but in obedience (Eph 5<sup>22</sup>, Col 3<sup>18</sup>, cf. 1 P 3<sup>1</sup>). The new religion included various elements which tended to elevate and indeed revolutionize her position—especially the fact that in the spiritual sphere she was on the same platform as the man, redeemed by the same Saviour, saved by the same faith, destined to the same everlasting inheritance (cf. 1 P 37). In view of this stupendous fact, which St. Paul refers to in Gal 326, she could no longer be treated as an appanage to another, but was in herself an end. But the apostle did not hold it to be a consequence of this equality within the Kingdom that husband and wife were henceforth to be regarded as coequal partners in their union, or that women were to engage on equal terms with men in the varied work of the Church and of the world. The subjection of the wife to the husband, according to the apostle, was founded upon the original purpose and decree of God in creation, which could not be annulled (1Co 11°), and upon her constitution, which was modelled upon that of the man, and not, like his, an immediate reproduction of the image of God (v.). The question which arises at this point is whether the apostle has consistently argued from his Christian premises—whether the teaching of the OT on the relation of man and wife is the last word of Christianity. Expositors by whom his self-consistency is doubted might find in the teaching one of the Pauline antinomies-an old garment showing around the piece of new cloth; and it is certainly surprising that St. Paul, who elsewhere

\*While summing up the husband's duties in love, St. Paul's reverence for OT leads him also to re-emphasize the particular heads of marital duty which it had specified, e.g. in 1 Co 78-8 where he asserts the law of conjugal rights sensu angustion, and in 1 Ti 58 where stress is laid on the husband's fundamental duty of providing for his household.

trusted to Christian love to fulfil all righteousness, should not have been satisfied with requiring of the wife true and constant conjugal love. His summarizing of wifely duty in obedience, however, had its firm supports, not only in his reverence for the religious tradition, but also in the monitions of his strong practical sense, which made it clear that in marriage, as in every other association of human beings, there must be at least in reserve a supreme

court of appeal.

The incompleteness of the Pauline treatment of marriage is more conspicuous in relation to the ethical dignity of the institution, and the ends which it subserves. There were, it is to be remembered, two conflicting views in relation to which the Christian teaching had to be developed -the traditional Jewish view, according to which marriage was at once a duty and a privilege,\* and the ascetic view maintained in Essene circles, according to which it was to be avoided as polluting and evil. The teaching of our Lord avoided both extremes: against the dominant opinion He affirmed the possibility of a duty arising under certain circumstances to abstain from marriage (Mt 19<sup>12</sup>); against the ascetics He by word and countenance showed His estimate of marriage as a divine institution (Jn 3, Mt 19°). The teaching of St. Paul inclines more to the ascetic side. He allows, as he could not but allow, the lawfulness of marriage (1 Th 44, cf. 1 Ti 42), but declares the celibate condition to be preferable. 'It is good for a man,' he says, 'not to touch a woman' (l'Co 71 and again he would have all men even as himself (v.7). Where he allows it, it is from a point of view which discloses a relatively low view of the ends of marriage—as a preservative from immorality (1 Co matriage—as a preservative from minimizing ( $t > 7^{9.50}$ , t > 1 Th  $4^{9.4}$ ); and to the same purpose he discusses the marriage of virgins ( $t > 7^{30}$ ). In extenuation of these views it is usual to refer, and legitimately enough, to two facts—the first, that in an age of missionary hardship and impending persecution, celibacy was expedient (v.26); and the second, that when the end of all things was believed to be at hand (v. 31), the importance of the family as an ethical sphere could not be taken at the same estimate as by those who look back upon and forward to a long development of Church and civilization. But St. Paul gives another reason in commendation of celibacy which is independent of temporary conditions and unfounded expectations, viz. that the married state brings with it cares and temptations which tend to weaken the heavenly affections and to cripple for Christian service (vv. 32-34). It may therefore be said with justice that his teaching on the subject is not quite on a level with the ethics of Protestantism. But, in taking with the ethics of Protestantism. But, in taking up a more positive and sanguine attitude towards marriage, Protestantism has started from his own principle of 'all things are yours,' and in his spirit has conceived it to be a truer Christian achievement to bring the full circle of human experience into the obedience of Christ than to shun spiritual danger by the evasion of natural responsibilities. It may be added that the ideal view of marriage owes much to the apostle who compared it to the union between Christ and the Church.

ii. THE SPHERE OF LAWFUL MARRIAGE.—1. CONDITIONS AND BARS OF MARRIAGE.—In fixing the limits within which marriage is permissible, custom has varied widely, and it has not even been uniform among peoples occupying the same stage of civilization. In the phase in which the family is the most important social unit, it is common to prohibit a

<sup>\*</sup> According to Weber, Jüd. Theol. 2 p. 234, a youth was expected to marry between 14 and 20. But the zealots of the Law did not deem themselves to be so bound. Rabbi Asal took no wife. 'My soul,' he said, 'cleaves to the Law; let others see to the upbuilding of the world' (p. 30).

man from marrying within his own family group, or at least within that from which his mother sprang (Exogamy). Usually at an earlier but sometimes at a later period of the social history there is found the opposite custom, which forbids marriage outside the group (Endogamy). When the family comes to be superseded in important functions by the State, both obligations are naturally relaxed: a man may marry either within or without his ancestral stock, and only near relationships continue to be recognized as bars to union (Post, Stud. p. 79 ff.).

(a) Racial Bars to Marriage.—When the Hebrews emerge into the light of history, exogamy (if it ever prevailed among them) has disappeared, and endogamous marriage is strongly favoured. That endogamous marriage is strongly favoured. That a lively prejudice of this kind existed in early times is shown in the patriarchal histories, in which great anxiety is shown to procure wives from the original stock—marriages with cousins being most original stock—marriages with cousins being most favoured, while loud protests are heard against marriage with aliens. In the period subsequent to the settlement in Canaan, racial intermixture was inevitable, and the old sentiment was in danger of being crushed out. Not only did the kings contract foreign alliances (David 2 S 3³, Solomon 1 K 3¹ 11¹, Ahab 1 K 16²¹), but there is reason to believe that national distinctions were lightly garded by the common people (Ru 1⁴, 2 Ch 24³²). Israelitish women also married alions (1 K 24<sup>28</sup>). Israelitish women also married aliens (1 K 7<sup>14</sup>), but usually, as it would seem, under the condition that their husbands settled in Israel (2 S 113, 1 Ch 217). In this matter, however, religious interests were at stake, a halt was called, and the reaction gradually carried the people back to the primitive position. In Dt marriage was expressly forbidden with the original inhabitants of Canaan (78, cf. Ex 3416) as the race most likely to debase

the religion and morals of the people; but an exception seems to be intended in the case of Edomites and Egyptians (237). During the Exile and for some time subsequent to it the law had again fallen into abeyance, only to be revived in greater stringency under Ezra (92 103) and Nehemiah (1323). The exclusive spirit was fostered by historical examples of the low type of character that sprang from such

mixed marriages (Lv 24<sup>10</sup>).

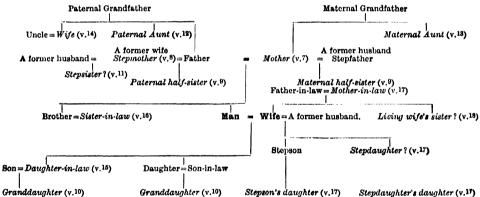

(b) Forbidden Degrees of Kinship. — The older custom, which confined marriage within the limits of the family group, had its natural counterpart in lax views as to the bars arising from consanguinity and affinity. Unions tolerated among other nations were indeed regarded as incestuous, viz. with a daughter, or with a uterine sister, but, at least as regards relatives on the paternal side, the utmost latitude was allowed. Thus, Abraham is represented as marrying a half-sister, the daughter of his father (Gn 20<sup>12</sup>), and the words of Tamar imply that this was recognized as lawful down to the time of the Monarchy (2 S 13<sup>13</sup>). As late as the age of Ezekiel, marriage with a stepmother must still have been common (22<sup>10</sup>). Moses himself seems to have been the offspring of a marriage between a nephew and his paternal aunt (Nu 26<sup>59</sup>, cf. v. <sup>57</sup>). Of these cases the more obnoxious were prohibited in Dt, viz. marriage with a stepmother (2720), a half-sister (v.<sup>22</sup>), and a mother-in-law (v.<sup>22</sup>).

The list of fribidden degrees is extended in Lv

(18<sup>7-17</sup>, cf. 20<sup>116</sup>.), and largely on the basis of the general principle that paternal relationships rank equally with maternal for purposes of marriage. The following table gives a conspectus of the codethe names of the prohibited relatives being printed in italics, while those about whose identification or otherwise some doubt exists are marked with a?

(cf. Selden, Ux. Heb. p. 5).

## TABLE OF FORBIDDEN DEGREES.

Various problems arise out of the table of prohibited degrees.

(1) The prohibitions of marriage with sixters are somewhat obscure. The obvious sense of v.º is that it forbids marriage with a half-sister, whether on the father's or the mother's side, and v.¹¹¹, which prohibits 'the father's wife's daughter, begotten of thy father, simply repeats the prohibition of a half-sister on the father's side. While the prevalence of the custom (sanctioned as it was by Abraham's example) and the gravity of the evil might justify the repetition, the interposition of different matter in v.¹⁰ makes it probable that a fresh case is contemplated. The most plausible interpretation of v.¹¹¹ is that, in addition to the half-sister of v.⁰, it prohibits the daughter of a man's stepmother by a previous husband. This result has been got in two ways—either by regarding the phrase 'begotten of thy father' agan interpolation, or by (filegitimately) treating the participle mɔ¹ɔ¹ɔ as active, with the meaning 'who hath borne children to thy father' (Bohl, Contra Matr. Comprivignorum; cf. Michaelis, ii. 10.¹). Another view is that v.¹¹¹ is to be taken as withholding the half-sister, and that v.⁰ (where read not 'or' but 'and' the daughter of thy mother) would point to the full sister. Kell (Comm. w. loc.) finds in the text as it stands a distinction—that in v.¹¹ the prohibition refers to a son by a first marriage, whereas v.⁰ treats of the son by a second marriage. Various problems arise out of the table of prohibited degrees.

This, however, involves no difference of relationship, though possibly some difference of status on the part of the half-brother. It is unfortunate that the most satisfactory explanation which connects v.11 with the stepmother's daughter by another husband requires alteration of the text.

(2) A second difficulty arises from a group of three ambiguous prohibitions which might be regarded as referring either to polygamous or monogamous marriages. Marriage is prohibited (a) with a stepdaughter (v.17), (b) with the daughter of a stepdaughter (ib.), and (c) with a wife's sister (v.18); but is the decease presupposed in (a) of the wife who is the girl's mother, in (b) of the wife whose sister is mentioned? In case (b) it is possible that the original wife is dead, and the same may fairly be held in case (a); but in case (c) it is certain that the wife is alive, and that what is forbidden is a special type of bigamy. The discussion of this brings us to the more famous problem.

(3) Marriage with a deceased wife's sister is certainly not directly forbidden. The actual words are, 'thou shalt not take a woman to her sister, to be a rival to her, to uncover her suggests translating 'one wife to (i.e. in addition to) another' instead of 'to her sister'—in which case we should have a direct

prohibition of bigamy; but modern scholarship has not been able to sustain this. The Mosaic law was not anciently understood to preclude marriage with the sister of a deceased wife. It was declared lawful by the Talmudists, and it was even encouraged by removing or mitigating in this special case the conditions governing the remarriage of a widower. The opposition to it began among the Jewish sect of the Karaites, whose origin is traced to the 8th cent. of our era, and whose leading principle was the Protestant one of going behind the accumulated traditions and decisions of the Rabbis to the written word, with the accompanying provise that Scripture was to be interwith the accompanying provise that Scripture was to be interpreted by Scripture. In the case before us the plain sense of Scripture is that no objection is raised to marriage with a wife's sister if the former is deceased, and the argument against it is with the accompanying provise that Scripture was to be interpreted by Scripture. In the case before us the plain sense of Scripture is that no objection is raised to marriage with a wife's sister if the former is deceased, and the argument against it is consequently constructive. The argument may be summarized as follows: (1) Marriage is interdicted with those that are near of kin (Lv 189); (2) hear of kin' are shown in the legislation to include, along with mother, daughter, etc., sisters and half-sisters; (3) the wife's 'near of kin' are shown in the legislation to include, along with mother, daughter, etc., sisters and half-sisters; (3) the wife's 'near of kin' are shown in the legislation to include, along with mother, daughter, etc., sisters and half-sisters; (3) the wife's 'near of kin' are shown in the legislation to include, along with mother, daughter, etc., sisters and half-sisters; (3) the wife's 'near of kin' are to be regarded as standing in the same relationship to the husband, and that because (3) it was declared in the primorphial decree that the twain shall be one flesh (Gn 24), and (b) the principle is conceded and exemplified in other instances—e.g. in the prohibition of marriage with a deceased wife's granddaughter (v. 17) (Selden, Ux. Heb. 1. 3ff., where are set forth the various arguments of the different Karaite teachers, who, however, agreed in the conclusion, Ux. oris soror, tam as demortus quam superstite, in vetitis habenda'). But the argument is unsound. If the question be to determine whether the Mosaic law sanctions marriage with a deceased wife's sister, we must adhere as closely as possible to the statute, and, as we have seen, the object of the relevant clause is something quite different—the regulation of bigamy. If we fall back on the principle is underlying the prohibitions we do not settle the matter, for it is not clear that the principle is theoretically adopted of treating the wife's near of kin as if they were the husband's; rather it would seem that this guidance is fol

The penalties for violation of the forbidden degrees were proportioned to the gravity of the case. In Dt those forming the three types of incestuous union there specified (27<sup>20, 22, 23</sup>) have a curse laid upon them. In Lv 20 capital punishment is decreed against the partners in three cases of incestuous intercourse or marriage, viz. with a stepmother (v.11), a daughter-in-law (v.12), and with a woman whose daughter has already been taken by the man as his wife (v. 14). The same may be assumed in the possible cases of still deeper guilt. The mode of death was probably stoning, and in the case of the last group of offenders it is provided that their corpses shall be burned. The penalty for marriage with a half-sister was excommunication (v. 17). In another group of cases, viz. intercourse or marriage with an aunt (v. 19), an

uncle's wife (v.20), and a sister-in-law (v.21), the culprits are left to the vengeance of Heaven, with the added menace in the last two cases that 'they

shall be childless.'

(c) Official Restrictions.—In OT certain restrictions are imposed upon the sacerdotal class. priest was forbidden to marry a harlot, or a fallen woman, or a divorced person (Lv 21'); the high priest was not even allowed to marry a widow (v. 14). It was not, however, held by the Talmudists that the latter enactment required a high priest, on his elevation, to divorce a widow whom he might have previously married or betrothed (Selden, *Ux. Heb.* p. 46).

To this closer fencing of married life in the case of the OT priesthood there is a certain analogy in the NT provision that the bishop shall be the husband of one wife (1 Ti 3<sup>2</sup>), and likewise the deacons (v. 1<sup>2</sup>). The interpretations of this much disputed enactment are as follows: (1) It provides that the bishops and deacons shall be monogamists. But, even if it be assumed that polygyny was still practised among the Jews, it is unlikely that it was represented among the Jewish Christians; and 1 Ti 59 is decisive, as, similarly interpreted, it would mean that no woman living in polyandry was to be enrolled among the widows. (2) It disqualifies for office a man who has been more than once married, and prohibits him after his appointment from contracting a second marriage. This view derives strong support from the fact that it was embodied in the current opinion of the patristic Church, and was reinforced by the decision of Councils (Plunmer, Cath. Epp. in 'Expos. Bible'), and it would doubtless have been more generally adopted but for the prejudice created by existing practice. At the same time it is right to observe that the admission of this interpretation does not involve the permanent condemnation of second marriage on the part of the clergy, as the reason for the apostolic prohibition might be peculiar to the apostolic age. (3) The regulation disqualifies for office those who had availed themselves of the rights of divorce which Christ sought to curtail, or (according to some authorities) who had in another way (concubinage, licentiousness) sinned against the marriage law. The suggestion that it was designed to support our Lord's con-demnation of capricious divorce has lately grown in favour, and must be regarded as at least a possible interpretation.

(d) Natal Disability.—On the score of a taint of birth, a class of person known as map was debarred from marriage with Israelites. 'A bastard shall not enter into the assembly of the Lord, even unto the tenth generation' (Dt 232). By 'bastard' is to be understood, not a person born out of wedlock, illegitimacy did not entail any serious penalties under Jewish law,—but one born of an unlawful marriage (Driver, in loc.). Such at least is the plausible interpretation given in the Mishna in a passage which determines the status of children (Kiddushin iii. 12). In a lawful marriage, it is held, the child follows the father; in an unlawful marriage, e.g. of a high priest with a widow, or of an Israelitish woman with one of the Nethinim, the child follows the party by whom the marriage is vitiated. The offspring of such illegal marriage,

it is added, is מְמָנֵר.

(c) Additional marriage-bars that fall to be noted are (1) the *physical* disqualification of certain mutilated or injured persons (Dt 231); (2) the hereditary disqualification of the heiress who was not allowed to marry into another tribe (Nu 365-9); (3) the retributive disqualification, which disallowed remarriage under certain circumstances with a wife who had previously been divorced (see below, Divorce).

2. The Levirate Marriage of the OT (levir, brother-in-law, ος; husband's brother; τεν to perform the marriage obligation of a husband's brother; Talm. στω the type of marriage; Gr. ἐπιγαμβρεύω, Mt 22<sup>24</sup>), formerly treated as a curious anomaly, has been shown by modern research to be widely prevalent at certain stages of civilization.\* 'The fundamental character of this type of marriage, says Post (Studien, p. 248), 'is that a widow is inherited in accordance with the system of kinship dominant among a people, and is married by the heir—whence there then arises the obligation to provide for her and her children.' In the narrower sense it is defined (as by Starcke, Prim. Fam. p. 141) as 'the custom which enjoins a man to marry the widow of his brother, if he die childless, in order to raise up children to the dead man, to whom the children produced by such a marriage were supposed to belong.' Obviously, the custom is one which is capable of large modification in detail, and it would seem that even within the limits of OT times there was some shifting of view as to the object of the levirate marriage, and the range of the obligation.

What is virtually an enactment of the levirate law, and that the oldest, is given in narrative form in the story of Tamar and Judah (Gn 38). Here the object of the marriage is 'to raise up seed' to the deceased (v.<sup>8</sup>); the person upon whom the obligation rests is the younger brother, failing whom the next in age (v.<sup>26</sup>); the issue of the marriage becomes the head of the family (v.<sup>29</sup>; cf. Mt 1<sup>3</sup>); and the sanction of the law, the binding character of which is generally admitted, is in the last resort a special retributive judgment (v. 10)

last resort a special retributive judgment (v. 10).

In the formal enactment of the Deut. code (255-10) the ancient custom is similarly motived and as earnestly supported, if with some relaxation in detail. The obligation rested on a brother only if he had 'dwelt together' (i.e. 'on the same family estate,' Driver) with the deceased (v. 1), and only the eldest son of the new marriage was to be reckoned as the son of the deceased (v. 1). On the other hand, the obligation was not superseded if the deceased left daughters (v. 1 'no son,' as against the Sadducean interpretation in Mt 2224, Mk 1219, Lk 2028). The duty was not legally enforced, but was supported by the resources of public opinion. A brother evading it publicly forfeited his right—symbolized by drawing off his sandal—and was to be openly insulted by the widow, and condemned to perpetual obloquy (v. 2).

The Book of Ruth, while certainly referring to the custom, is by no means faithful to the Deut. model. As judged by Dt, Boaz was under no obligation to wed Ruth unless it should be argued that as Elimelech's brother (43) he was bound to marry Naomi, and that as the latter was past child-bearing he married instead her widowed daughter-in-law. As a fact, the view taken is that the next of kin, who may be quite remote, is in duty bound to redeem a dead man's estate and marry his childless widow. Further, as Ruth's son by Boaz ranks as the son of the latter (v.21), not of Ruth's former husband, it would seem that the earlier intention of the law is abandoned (Nowack, Arch. i. p. 347, who even argues that in the writer's view the sole object is the welfare of the widow). It is also noticeable that the repudiation, with the ceremony of the drawing off of the shoe, no longer has the ancient stigma attached to it (v.7). On the whole, it must be said that the book reveals a state of things when the strict law had been found impracticable, but when its principle

continued to be in a wider way operative, and was favoured as fostering humane dealing and averting the pathetic event of the extinction of a line.

The attitude of the later legislation towards the custom is matter of dispute. Certainly Lv (18<sup>18</sup> 20<sup>21</sup>) forbids marriage with a deceased brother's wife without any qualification; and it is therefore held by many modern critics that P designed to abolish this type of marriage as incestuous in the minor degree (Nowack, Arch. i. 346; Benzinger, art. 'Ehe,' Real-Encycl.'). In confirmation of this it is pointed out that in this code the estate, falling a son, descends to the daughters (Nu 27<sup>117</sup>). By others the traditional view is still maintained that P lays down the general rule against marriage with a deceased brother's wife, while Dt specifies the exceptional case (Driver, Deut. in loc.). It has also been held that the collision of the codes is only apparent, as Lev prohibits illicit intercourse with a brother's wife, and is not legislating in the passage in question about marriage (Bertholet, Com. on Deut., but erroneously). Whether P intended to ropeal the special law is a question likely to be determined by subjective considerations. The famous disputation with the Sadducees clearly implies that the levirate law was regarded as binding in the time of our Lord, while it was perhaps even acted on (hour de map huir émrà déchool, Mt 22<sup>2567</sup>). In the later period, however, its observance was

In the later period, however, its observance was exceptional: in the language of the Mishna, the dispensation (1817) was preferred to the observance (Bechoroth 13a). Theoretical opposition accompanied, and the opinions of the Rabbis of the first four Christian centuries were divided as to its lawfulness—Rabbi Jose declaring it unpermissible even when desired by both parties concerned. The same division of opinion ran through the Middle Ages, though the preponderance of opinion favoured the dispensation (Mishna, treatise Yebamoth; Surenhusius, ii.; Hamburger, Real-Encykart. 'Schwagerehe').

art. 'Schwagerehe').

Of the origin and primitive purpose of the levirate marriage various explanations have been propounded. (1) The first group of theories accepts the biblical statement that the object was the procreation of a son or sons who were regarded as the children of the deceased. But on this assumption the further question arises, What was the object of the fiction by which the line was continued? To this the principal answers which have been given are (a) that it was regarded as a calamity (where personal immortality was not realized, a calamity tantamount to annihilation) that one's line should become extinct (Dt 25%); (b) that the custom was connected with a system of ancestor-worship, under which failure of offspring entailed deprivation of cherished rites and service. Popular, however, as the latter theory is, it assumes the influence of a form of religion, for the existence of which in Israel the evidence is of the scantiest. (2) A second theory, propounded by M'Lennan and supported by W. R. Smith, pushes the question further back and discovers in it a survival from polyandry. 'It could more easily be feigned,' says the former, 'that the children belonged to the deceased brother if already, at a prior stage, the children of the brotherhood had been accounted the children of the eldest brother' (Prim. Mar. p. 164). And in regard to this view it must be admitted that polyandry may well have left behind such a custom as its legacy. As Starcke observes (Prim. Fam. p. 150), 'the Levir-child was

\* An expression of this idea is quoted from the Mahabharata (Muir's tr.) by Max Müller, Anthrop. Rel. p. 31—

'That stage completed, seek a wife And gain the fruit of wedded life, A race of sons, by rites to seal, When thou art gone, thy spirit's weal.'

<sup>\*</sup>The parallel in the Laws of Manu (ch. ix. 59-64) has been often cited. Instances of the custom among other races have been collected by Post. Einleitung in das Stud. d. ethnolog. Jurisprud. 1866, and Westermarck, Hist. of Hum. Marriage.

ascribed to the dead man in virtue of the same ideas according to which, in Tibet, the eldest brother and ruler of the house was held to be the father of all the children of the household.' This father of all the children of the household.' proves that a system of polyandry may sometimes have had as an offshoot the levirate marriage, but does not preclude the possibility of its development in other quarters from other primitive practices and modes of thought—e.g. the exercise of paternal authority in setting aside in certain cases the direct fatherhood (Starcke, p. 151). (3) Yet again it has been suggested that in conditions where marriage was associated with purchase, and the wife was treated as a chattel, it was natural that she should be claimed by the next of kin as Sociology). Well, however, as this practice is vouched for the inheritance of a wife by a surviving brother is widely removed from the biblical theory, for the essence of the latter is the concession that the younger brother, instead of himself heiring, raises up heirs to the deceased.
(4) Yet again the object of the custom has been found in an agrarian motive, the law being designed to keep together under the levirate husband the property which would otherwise have been divided among all the brothers (Meilziner, quoted by Starcke, p. 150). But, though at a late date (Ru 48) the custom was utilized in connexion with the conservation of lands, the evidence points to its having reached back into the nomadic stage of civilization.

On the whole, the question of origin is, and probably will remain, matter of controversy. Widespread as the custom is, it may well have sprung from various roots-according as in one region an ancestor-cult prevailed, in another a system of polyandry had developed, etc. Where it meets us in Hebrew history it clearly connects itself with the natural desire for survival in pos-terity, later with the endeavour to perpetuate family property; and if in spite of the benediction of early tradition and law it gradually fell into abeyance, the cause is to be sought in the growth of the self-consciousness and of the claims of the

individual with the progress of society.

iii. MARRIAGE PROCEDURE.-1. The System of Betrothal.—The betrothal, as the first stage in the formation of a marriage union, had a prominent position among the Hebrews, as among other peoples at the same stage of social development.

The act of betrothing is described by three Heb. verbs: אָרָשׁ (Pi. of [אָרשׁ] ' pay the price,' Dt 207, Hos 219.20), יער ('desig-בין (Pi. of בין (Pag) 'pay the price,' Dt 207, Hos 203-20), ית,' ('designate') Ex 218.9, [ק] קן ('acquire') Lv 1920; and by one Greek verb—

באסיליניי (Mt 118, Lk 127 29). In AV the Hebrow verbs are usually rendered by 'betroth,' occasionally by 'espouse' (2 S 314): the Greek verb is translated by 'espouse.' In RV 'betroth' is exclusively used where the reference is to the initial stage (2S 314, Mt 118 etc.), while 'espouse' is restricted to the passages which imply completed marriage (Ex 218-9). The ceremony of betrothal has no name in OT. The Talmudists refer to it under the names of 'בוישן' (consecration), אירושין (consecration), Public (coulitions) תנאים (compact) סדובין (conditions).

The custom of allowing the individuals concerned to arrange a marriage according to inclination is a late and exceptional concession. societies in which the family organization is strong and stable the betrothal is treated as a concern of the family group or of the tribe. The powers are vested in the head of the tribe, or they may be devolved upon particular members of a family group—under the patriarchal system upon the father or nearest paternal relative, under the matriarchal upon the maternal uncle or the eldest uterine brother (Post, Studien, pp. 163, 164). From this standpoint the betrothal is viewed in OT. In the exercise of his patriarchal function Abraham through a servant negotiates with Bethuel for the hand of Rebekah, and Laban as her brother is

taken into council (Gn 24); Hamor endeavours in treaty with Jacob and his sons to arrange a marriage on behalf of his son Shechem (Gn 3466.); even the lawless Samson requests his father to procure for him to wife a woman in Timnah (Jg 142). The advances, further, were made by the house of the bridegroom, except in cases where the superior rank of the bride's family justified them in taking the first step (Ex 2<sup>21</sup>, Jos 15<sup>17</sup>, 1 S 18<sup>27</sup>). Resent-ment was expressed when a man repudiated the rights of the natural guardians and took the matter into his own hands (Gn 2634)—a feeling strongly shared by the Arabs, who held it sufficient ground for withholding a bride (Wellhausen, Die Ehe bei den Arabern, p. 432); and the protests were not unreasonable in view of the interest of the family in the alliance that might be formed, and of the women in the bride with whom in a patriarchal society they were to be so closely associated (Gn 27<sup>36</sup>). Yet, while the system required that the machinery of the family should be employed, it might easily happen, as the cases of Shechem and Samson show, that it might be set in motion by a lover, and the more so that in ancient Israel the association of the sexes was comparatively unrestrained, and naturally led to personal attachments which sought satisfaction in marriage (Gn 24<sup>15</sup> 29<sup>10</sup>; cf. 1 S 18<sup>20</sup>). Among the Hebrews, in any case, the tyranny of family rule does not appear to have dispensed with the consent of the parties (Gn 248), which under this regime is often treated as matter of indifference, at least as respects the bride (Post, Studien, p. 166 ff.).

The first important stage in the betrothal procedure was the settlement of the amount of the so-called dowry, and the payment or part

payment of the same.

The dowry of the OT (מהר) Gn 34<sup>12</sup>, Ex 22<sup>17</sup>, 1 S 18<sup>25</sup>; cf. Ex 22<sup>16</sup>, where RV has 'pay a dowry') was not a portion brought by the bride into the husband's family, but a price or ransom paid to the father or brothers of the bride. That this was its original significance is not open to doubt. In primitive conditions it was naturally claimed as compensation for the loss to a family of a valuable member. Recent research has shown that it was so regarded in ancient times in Arabia (Kinship and Marriage, 68, 78 11.; Die Ehe bei den Arabern, 433 ff.); and among the same stock it retains this character. 'An Arab father,' says Fristram, 'regards his daughters much as he would his sheep or cattle, selling them for a greater or less price, according to his rank and fortune and their beauty' (Eastern Customs, p. 92). And so it appears in OT: Hamor offers to pay for Dinah 'never so much dowry' (Gn 34<sup>12</sup>); in Ex 22<sup>17</sup> it is referred to as a settled custom. Dt 22<sup>29</sup> assesses the damages for seduction, which are payable to the father, and thus fixes the amount in one particular case. For the common people the sum to be paid was doubtless settled by custom, while in the case of important alliances it was matter of negotiation (Gn 34<sup>12</sup>). The 'dowry' was not necessarily paid in money or kind, but might take the form of service, as in the case of Jacob (Gn 29) and David (1 S 18<sup>26</sup>; cf. 17<sup>26</sup>).

With the advance of families in dignity and wealth the 'dowry' easily passed into a new stage. It was natural that a portion, if not the whole, should be appropriated to ensure the comfort and security of the bride. A hint of the custom of so diverting a part is given in the com-plaint made by the daughters of Laban, when they declare that he 'hath sold us, and hath quite devoured our money' (Gn 3118). In later times the appropriation of the 'dowry' to the wife became customary; it was conserved as capital; and in the event of the death of the husband, or an

arbitrary divorce, it furnished a useful provision. A parallel development took place to some extent among the Arabs, as the Koran assumes that the 'dowry' falls to the wife (Wellhausen, Die Ehe

bei den Arabern, p. 435).

The dowry in the modern sense was not customary, but was occasionally met with. The daughters of wealthy houses at least received handsome gifts: Rebekah brings female slaves with her to her new home (Gn 24<sup>61</sup>), Laban makes a similar present to Leah (2924). As a special instance of liberality, doubtless also with some reference to proprietary rights, mention is made of Caleb's gift to his daughter of a field of springs (Jg 115). The alliances of the kings with foreign princes furnish examples of the dowry-in one case a princess brings with her a city as her portion (1 K 916).\*

In addition to the mohar, there is mention of other gifts which, naturally prompted by the occasion of a betrothal, might be distributed more or less lavishly as a means of conciliation or a token of goodwill (), Gn 3412). The gift to the cination or a token of goodwin (1920, Gn 321-). The gift to the bride, which came under this category, was significant of the wealth of the woose (2453). The latter had its counterpart in the saddk of the Arabs; and as the bestowal of the saddk came to be treated as part of the marriage ceremony, it is possible that among the Hebrews also it was incorporated in the formal procedure either of the betrothal or of the marriage.

While the settlement and payment (in whole or in part) of the 'dowry' was the decisive act in the betrothal, there was probably also an additional ceremony of a more or less formal kind. Of the procedure various elements appear to be preserved in the narrative of Rebekah's betrothal (Gn 24). In the narrative of Rebekan's betrothal (Gn 24). The terms in which she is asked, and gives her consent, in all likelihood preserve an ancient and familiar formula ('Wilt thou go with this man?' 'I will go,' v. '89); and the same applies to the blessing which is pronounced upon her when she is handed over or 'sent away' (v. '80). The conjecture that a ring was given to the bride has no support in the presence referred to (Fx 2522 Ls 221) wat the in the passages referred to (Ex 3522, Is 321), yet the use of the ring, which plays an important part in the Talmudic formalities, may well have been of considerable antiquity.

In the procedure sanctioned by the Talmudic authorities the bridegroom handed to the bride an article of value, such as a ring, or a written document, adding: 'By this ring, etc., may she be consecrated (or betrothed) to me.' The presence of two male witnesses was required, so that the appropriate benedictions might be pronounced on the union. According to the Mishna (treatise Kādushin), there were three modes of betrothal—by the payment of money, by the conveyance of a contract, and by coition; but the third was prohibited by the later Rabbis under penalties (Hamburger, arts. 'Trauung,' 'Verlöbniss').

After the betrothal the bride was under the same restrictions as a wife. If unfaithful she ranked and was punished as an adulteress (Dt 2228. 24); and on the other hand the bridegroom, if he wished to break the contract, had the same privileges, and had also to observe the same formalities as in the case of divorce. The situation is illustrated in the history of Joseph and Mary, who were on the footing of betrothal (Mt 1<sup>19</sup>).

2. Nuptial Rites and Customs.—Upon the be-

\*Among the Greeks the dowry had a similar origin and a parallel development. In the Homeric age it was customary for the father to receive a purchase-price from his future sonin-law (II. xi. 244)—hence the expression \*aphine àpare/\$\text{circ}\$ is the oxen-bringing virgin; and if it was rare for a father to give his daughter gratultously (&váeðre), it was reckoned an act of the most signal generosity to offer presents (i=\text{pui}he), as was done by Agamemnon (ix. 146) along with the daughter. The ancient custom gradually disappeared, and was referred to by Aristotle as barbarous (Pol. li. 5. 11), but Euripides voices a complaint of the women of a later day that it had become the custom that women had to purchase their husbands at a great price (Med. 232; Derenberg, Dict. des Antiq. Greeq. et Rom., Paris, 1892, art. 'Dot'). In Rome from an early period the wife who did not bring with her a dowry was regarded as a concubine rather than as a wife (Plaut. Trinum. iii. 2, v. 73, 5), and it was a duty of clients to make up a dowry for the daughter of a poor patron (\$\vec{\vec{v}}\$.).

trothal followed, after a longer or shorter period, the marriage proper or wedding, the features of which may be collected partly from incidental allusions in Scripture, partly from survivals of ancient custom in Talmudic literature and in the life of the East.

The Heb. terms translated 'marry' are no? 'to take' (Gn 1914 etc.), in late Heb. אין (2 Ch 1321 al.)-both with a probable reference to ancient marriage by capture, אָלאָי װְּתְּהָה (to be married' (Hos 33 al.), and הַּיְהָה לפֹּל (אִשָּׁה to become a wife' (Nu 863.6.11), by to 'become master of,' expressive of the husband's authority (Dt 2222 etc.); later Ite'in, lit. 'make to dwell,' 'give a dwelling to' (cf. Ps 1132), Ezr 102 10. 14. 17. 18, Neh 1323 27 [al.]. 'To form marriage alliance with' (lit. 'to Neh 1323.27 (al.). 'To form marriage alliance with' (lit. 'to make oneself daughter's husband') is [h̄ŋn̄n̄ (Gn 349 etc.). AV 'given to marriage 'in Pa 7825 is merely a paraphrase; Heb. is lit. 'were not praised.' In NT γωμάν is used of either sex (Mt 523 198.10 etc.); also γ'νισθαί των (Ro 73), used of a woman, means to be married to a man (RV to be 'joined to a man'), γωμάνισμοί γωμάνισμος γωμάνισμος (Lo 782). The word translated 'espousals' (Ca 311) comes nearest to describing the subject here discussed.

It is probable that in the early period the principal if not the only ceremonies were connected with the betrothal, and that when these were completed the consummation of the marriage might follow at the option of the parties concerned (Nowack, Arch. i. p. 162). In the case of Isaac and Rebekah the formalities were over with the betrothal, and on the bride's arrival at her new home she was simply conducted to her tent (Gn 24<sup>cs-cr</sup>). Similarly, whenever David has fulfilled the conditions imposed by Saul, he receives Michal to wife (1 S 18<sup>27</sup>). That this was, however, not universal appears from Gn 29<sup>27</sup>. The later practice was to draw a clear distinction between betrothal and marriage (Dt 207 2830), to magnify the final function, and to invest this increasingly with characters of publicity and pomp. And in the celebration of Hebrew marriage the most noteworthy point is the retreat of the distinctively Hebrew element. We seem to be in the atmosphere of Hellas rather than of the Holy Land. There is no evidence that, in the older period, the proceedings were regulated from the theocratic point of view, or even that they included a religious ceremony: rather is there a temporary abandonment to the cult of mere happiness, with its unconsecrated ritual of feasting and song.

In the biblical references to the marriage celebrations two functions stand out prominently—the wedding procession and the wedding feast or marriage supper. As regards the nature and place of the ceremony by which the woman was transferred to the husband (the counterpart of our marriage service), the biblical notices leave us uninformed.

The wedding procession naturally fell into two parts. First the bridegroom and his friends may be supposed to have marched to the home of the bride, then in a return procession the festal com-pany, reinforced by the bride's friends, conducted the pair to their future home. Of the movement and colour of this picturesque drama graphic touches are preserved in Scripture. We catch a glimpse of the garlanded bridegroom in his splendid attire (Is 61<sup>10</sup>), and of his veiled bride surrounded by the friends of her youth (Ps 45<sup>14, 15</sup>); the attendant throng gives vent to its jubilant feelings in dancing and shouting, and songs are struck up (some per-haps preserved in the Song called Solomon's) which sound the praise of wedded love and of the newlywedded pair.

Wedded pair.

The relation of the wedding procession to the situation presupposed in the parable of the Ten Virgins requires elucidation. 'More rarely it happened,' says Nowack (i. p. 163), 'that a procession conducted the bride to meet the bridegroom as he approached with his friends (1 Mao 9372.); in the evening such a procession sometimes took place by lamp and torchlight.' The explanation here suggested is that the marriage took place late at night, and that the bride's company was preparing to sally forth to meet the bridegroom on his first appearance. It is,

however, plausibly argued by Mackie (Bibl. Manners and Customs) that the parable presupposes that this stage is past. The bride, he infers from existing custom, has already been conducted to her future home, the bridegroom has subsequently withdrawn to the house of a relative, where he is to stay with his companions till a late hour; meanwhile the bride and her companions grow weary, and sleep falls upon them; until at last a clamour in the street heralds the approach of the torchillumined party, and within all are roused to life and excitement. Before he arrives the maidens in waiting come forth with lamps and candles a short distance to light up the entraice and do honour to the bridgroom and the group of relatives and intimate friends around him. These pass in to the final rejoicing and the marriage supper; the others, who have discharged their duty in accompanying him to the door, immediately disperse and the door is shut' (p. 126).

The marriage supper, which took place in the house of the husband, was the great social event in the life of a family, and, where the standing and means allowed it, might be planned on the most lavish scale. In the parable of the Marriage of the King's Son we have an example of boundless hospitality, and also an indication of the resentment felt when the invitation was slighted (Mt  $22^{1-4}$ ). A difficulty in the parable has been met by the conjecture that persons of high rank further showed their magnificence by furnishing the invited guests with festal robes  $(\ell\nu\delta\nu\mu\alpha~\gamma d\mu\nu\nu)$ . The wedding at Cana of Galilee gives us a glimpse of the way in which the spirit of hospitality was exhibited in humbler homes (Jn  $2^{1st}$ ). But, while the same spirit prevailed throughout Hebrew society, it is to be remembered that among the poorer classes the marriage feast must have been very different from the picture which at the name naturally rises before the imagination.\*

The scene at the marriage supper is depicted with some fulness of detail. Now (probably not in the procession) the high-born bride appeared in the full splendour of her bridal array, in a robe embroidered with gold (Ps 45<sup>18, 14</sup>, Jer 2<sup>32</sup>), which was gathered up by a peculiar girdle adorned with jewels (Is 49<sup>18</sup>), and on her head a crown. Prominent in honour, as they had been in service, were the male friends of the bridegroom (ulot τοῦ νυμφῶνος, Mt 9<sup>18</sup>), one of whom was charged with the duties of a master of ceremonies (Jn 2<sup>3</sup>, cf. Jn 3<sup>29</sup>). From descriptions of later times we can fill out other spaces with panegyric and blessing uttered by the company in song and speech. At the close the bride was conducted by her parents to the nuptial chamber (cf. Jg 15<sup>1</sup>). Throughout the whole proceedings it may be noted, as explaining the deception practised upon Jacob, the bride had remained veiled (Gn 29<sup>23</sup>). The duty of preserving evidence of the bride's antenuptial chastity, which was enforced in Dt 22<sup>1367</sup>, was attended to as a safeguard against the slanders of a malicious or inconstant husband.

A marriage ceremony, to which proceedings like those described are mere adjuncts, is naturally assumed by us, but the idea is not to be summarily imported into early Hebrew marriage. We are doubtless nearer the mark in regarding the marriage supper as being in early times itself the marriage ceremony. Among primitive peoples the public meal has a quasi-sacramental character; and it was quite in harmony with this mode of thought to look on the feast of which bridegroom and bride partook in company with their friends as

and bride partook in company with their friends as

\* The following realistic description by a modern traveller is of
use in this connexion: 'He found that the villagers of Schwatel-Blat were engaged in the wedding festivities of one of the
young men of the family. After the reception, etc., a huge
platter, 6 feet in diameter, made of tinned copper, was brought
in, on which was piled a mountain of boiled crushed wheat
mingled with morsels of boiled meat. When this had been set
in place, a dish of melted, clarified butter was poured over the
wheat until it was quite saturated. Loaves of bread in the form
of cakes were placed by the side of the platter, and the guests,
rolling up their sleeves, proceeded to help themselves with their
fingers, and consumed the provisions, as is usual, in silence.
Water and soap were then passed around to the guests, who
washed off the remains of their greasy meal, after which coffee
and pipes were served '(Pal. Expl. Fund Quart. St. 1888, p. 204).

the rite by which they were definitely placed upon the conjugal footing. The view is supported by the fact that at a late period the feast was still treated as so essential a part of the proceedings that  $\gamma d\mu os$  stands equally for the marriage and the supper (Mt 224). Its original significance would thus have been similar to that of the confarreatio —a mode of contracting marriage through a sacria mode of contracting marriage through a sacrificial use of bread anciently practised in Rome. It was, however, inevitable that in course of time a more definite rite should be instituted. The most natural occasion might seem to be the point at which the bridegroom came to fetch the bride from her parents, but the evidence goes to show that the matter was still in suspense so long as her parents, who accompanied her to the feast, were at her side. The act upon which attention would readily fasten as the decisive and uniting act was the leading of the bride to her 'chamber,' which in the old period was a tent specially erected for the wedded pair. The central importance of this act is further attested by the circumstance that the chamber (חַפָּה) supplied a name for marriage-marriage being described, as it were, as 'the tenting' (Wellhausen, op. cit. p. 444). Out of this other acts would as naturally develop to form a kind of ritual. From a hint in Mal 2 it is supposed that the pair entered into a solemn covenant, and it is also probable that the good wishes of the company came to be crystallized into definite benedictions craving prosperity and posterity. After the Exile the 'covenant' was embodied in a written contract (Το 718 συγγραφή, πιτη).

a written contract (To 718 συγγραφή, π; m;).

This somewhat conjectural account of the ancient marriage ceremony would have an important addition could we follow Mackie in interpreting Ps 198 in the light of modern custom. At a Jewish wedding, he says, the most interesting feature is the canopy under which the bridegroom and bride sit or stand during the ceremony. It is erected in the court or large room of the house where the guests are assembled, and it is made of palm branches and embroidered cloth. It is suggestive of the dome sometimes seen above pulpits, and gives to the wedding the appearance of a coronation. . . The sight of the robed bridegroom issuing from the canopy (tabernacle) and receiving the congratulations of his friends suggested the simile of the surrise in Ps 198 (p. 123). But in early times the huppah would seem to have been an actual tent (cf. 31 218), and the canopy classified by Mackie (a picture of which is given in Bodenschatz, Kirch. Verfas. iv. p. 126) is doubtless a late ornamental erection evolved from the old bridal tent.

The wedding festivities which followed were

The wedding festivities which followed were long drawn out. In ancient times, as still among the fellaheen of Syria, the usual period for the rejoicings was a week (Jg 7). Feasting, music, and dancing, such as celebrated the return of the Prodigal Son, were the staple of the festivities of the season, and we hear of the exercise of the wits by riddles and wagers (ib.). The expense must have pressed somewhat heavily on the humbler folk—the more so that a marriage seems to have been treated as a festival for the community, and more than one thrifty saw in Pr may well have been suggested by an extravagance that injured the guest with the host. It is probable that then as now some contribution towards the cost was made in the case of peasant marriages by the guests themselves (Tristram, p. 93).

by the guests themselves (Tristram, p. 93).

One of the most important contributions to this subject is the description of the marriage rejoicings of the Palestinian fellaheen in an article on the Syrian threshing-sledge by Dr. J. G. Wetzstein (Zeitzchrift für Ethnologie, Bd. v. 1873, p. 287 ff.). The following are the principal points. During the seven days following the wedding the young couple are treated by the villagers as king and queen; the threshing-sledge is their throne. March is the favourite month. The most prominent incidents of the wedding-day are the sword-dance of the bride, and the great feast. On the following day they hold a reception, being greeted first by the best-man (weste), then by the friends of the bridegroom (sebdb el-arts). Then the sledge is transported on stalwart shoulders, with singing of martial or erotic songs, to the threshing-floor. Here a stage or scaffolding some two ells high is erected, and on this the sledge is placed and covered over with a gaily-coloured carpet on which two embroidered cushions are planted. On this with all pomp the husband and wife are enthroned. A tribunal is

then set up, whose business is to ascertain that the marriage has been consummated (Dt 22<sup>13-21</sup>). The tribunal being satisfied, there follow dancing and singing, the staple of the song being praise of the graces of the newly wedded pair (cf. Ca 4-7). Games follow, which begin on the first day in the morning, on the succeeding days shortly before noon, and last late into the night. During the whole week their majesties wear their festal clothes, do not work, and merely look on at the games—except that now and again the queen joins in a dance. The expenses are borne by the friends of the bridgeroom eked out by fines. The proceedings end with a supper, and the degradation of the king to his proper rank. 'The festal regulations are annulled, the jokes become rougher, and scarcely is the meal over when a pair of hands smear the king's face from a dung-heap' (p. 293).

'IV. THE MORAL SUBVERSION OF MARRIAGE.—

iv. THE MORAL SUBVERSION OF MARRIAGE .-Adultery falls to be considered here as the practice subversive of the institution of marriage (Old Eng.

subversive of the institution of marriage (old Eng. acw-bryce, Germ. Ehebruch).

Σρκι 'adultery' (Jer 13<sup>27</sup>, Ezk 23<sup>43</sup>), verb ηκι Qal and Pi. (Ex 20<sup>14</sup>, Dt 5<sup>18</sup> etc.); μοιχεία (Jn 8<sup>3</sup>), and of the same group μοιχός (Lk 18<sup>11</sup>), μοιχεύειν (Mt 5<sup>27</sup>), μοιχάσθαι (Mt 5<sup>32</sup>), μοιχαλίς (2 P 2<sup>14</sup>).

The biblical conception of adultery is often ex-

pressed by saying that, as in Roman law, a woman could violate only her own marriage, a man only that of another. In other words, an unchaste bride was guilty of adultery, an unchaste husband was guilty of it only if he sinned along with the bride of another. If in certain cases the law took cognizance of a husband's licentiousness, it was because it involved infringement of property rights, and gave rise to a claim for damages (Ex 2216, Dt 2229).

At a certain stage of social evolution, adultery

is commonly regarded as an injury which a husband is entitled to avenge by slaying the culprits; and when important powers of the family come to be taken over by the nation, it often happens that the death-penalty continues to be attached, at least in theory, to the capital sexual crime (Post, Studien, p. 353 ff.). To this generalization of the sociologist the history of adultery among the Hebrews closely corresponds. According to the tradition the unfaithful wife was in old times put to death (by burning, Gn 38<sup>24</sup>), and, alike from the character of the people and the duties anciently assigned to the Goel, it may be assumed that the wrong was one which was held to invite and justify the extreme of vengeance. The legislation confirmed the estimate of its constitution. lation confirmed the estimate of its enormity -the Decalogue condemns both the overt act and the lawless desire in which it originates (Ex 2014. 17), and the prohibition is solemnly repeated in the later legislation, and supported by the sanction of capital punishment. The mode of sanction of capital punishment. The mode of execution varied with the standing of the woman: a guilty wife was to be put to death, i.e. strangled, along with her paramour (Dt 22<sup>22</sup>; cf. Lv 20<sup>10</sup>), while a betrothed woman who should be seduced was to be stoned (v.24). If, however, the betrothed woman was seduced in circumstances suggesting that she had been violated, the man only was to be executed: she received the benefit of the doubt be executed: she received the benefit of the doubt  $(v.^{26f.})$ ; if she was a bondmaid, the culprit escaped with a guilt-offering (Lv  $19^{20f.})$ ). In the case of a priest's daughter, the punishment of sexual immorality was death by burning (Lv  $21^9$ ). The same high ground is taken by Ezekiel, who threatens the adulterer with death  $(18^{11})$ .

It must be added that there is no evidence that the capital penalty was actually inflicted in historical times. In late Jewish practice the penalties torical times. were merely divorce, with the wife's forfeiture of her dowry (Bodenschatz, Kirch. Verfass. iv. p. 164); and a long tract of earlier practice is disposed of by Lightfoot, who remarks: 'I do not remember that I have anywhere, in the Jewish Pandect, met with an example of a wife punished The NT evidence is to the same effect. In His references to the subject (Mt 5<sup>33</sup> etc.) Jesus implies that it simply entailed divorce. The reason

given for Joseph's purpose to put away his be-trothed wife privily is that he was a just man— a reason which could hardly have been given if a reason which could hardly have been given it he had been frustrating the recognized operation of the law, and saving Mary from the usual death by stoning (Mt 1<sup>19</sup>). The weightiest evidence on the other side is derived from the narrative of the woman taken in adultery (Jn 8<sup>3-11</sup>). From the reference to stoning it might be inferred that her status was that of a betrothed woman, and the implication of the narrative seems to be that there was but a step between her and death. It is, however, to be remembered that Jesus was surrounded by enemies who laboured to entangle Him in His talk—esp. to bring Him into collision with Moses; and the plot in this instance doubtless was to 'put Him in the dilemma of either declaring for the revival of a practice which had already become obsolete, or of giving His sanction to the apparent infraction of the law which the substitution of divorce involved '(art. 'Adultery,' Kitto, Bib. Cycl.). At all events, the reply of Jesus supported the abrogation of the law: until judges were found, themselves innocent as tried by His own heart-searching test, the title was wanting to execute the law of Moses (v.?). Nor do the historical records of the pre-Christian period supply any evidence of the operation of the law in the exaction of the death-penalty. On the contrary, the prophetical writings imply that there was widespread guilt and widespread immnity. If the story of Hosea be accepted, as by most moderns, as a real history, and as implying the post-nuptial fall of the prophet's wife, it would follow that in the 8th cent. the law not only did not inflict capital punishment, but did not even (as later) insist on divorce. In spite of the legal enactments, then, it may be assumed that death was not actually inflicted, and that it was deemed that the husband was sufficiently protected by his right of divorce, the woman sufficiently punished by loss of status and property, while the adulterer might be mulcted in damages.

In OT it is sought to intensify the moral senti-ment on the subject by picturing the miserable disguises and subterfuges of the adulterer, and by dwelling on the risks to which he was exposedas degradation (Pr 218), poverty (626), and the strokes of unbridled vengeance (58-10). In NT (1 Co 69) the sin is declared to be utterly inconsistent with a Christian standing, and to entail exclusion from

the eternal kingdom (1 Co 69).

A charge of adultery was ordinarily substantiated at a formal trial. The reason for this, when the death-penalty was no longer inflicted, was at least partly connected with money. A husband could divorce his wife on suspicion, but if he did not prove his case she retained the 'dowry.' It lay, however, in the character of the crime that it was often impossible to prove guilt according to the ordinary canons of evidence, and to meet this difficulty P provides that a suspected woman shall submit to trial by ordeal (Nu 511-81).

The particulars of the remarkable enactment of the ordeal

The particulars of the remarkable enactment of the ordeal of the waters of bitterness are as follows:—

(1) The trial takes place when a husband forms a suspicion, founded or unfounded, of his wife's chastity (vv. 12-14).

(2) The procedure is that he brings his wife to the priest, along with a sacrificial gift of barley-meal (v. 15); the priest sets her 'before the Lord' (v. 16), loosens her hair (v. 18), places in her hand the meal-offering (v. 18), and stands before her holding an earthen vessel which contains a potion of holy water sprinkled with dust from the floor of the tabernacle (v. 17). He then sets apart the potion to its judicial use—declaring that if she be innocent it will not injure her, if guilty it will cause her belly to swell and her thigh to shrink (v. 22). The woman having acquiesced with an 'Amen,' the priest writes down the curses, washes them off, adds the rinsings as a new ingredient to the potion (v. 23), and after some ritualistic observances gives her the water to drink (v. 25).

(3) The issue is a judgment of condemnation or acquittal. If guilty, she is smitten with the threatened diseases (usually sup-

vol. 111.—18

posed to include dropsy, Jos. Ant. III. xi. 6), and is shunned as accursed  $(v.^{27})$ ; if innocent, she has the compensation of again becoming a mother  $(v.^{23})$ .

In the ordeal of the bitter waters (so called as the instrument of a curse) we have doubtless an ancient custom surviving in a modified form, and amended in the interests of good sense and humanity. Similar practices have been discovered among other peoples, e.g. in Sierra Leone and Upper Guinea, and, according to various authorities, in the African practice it is common to employ a deadly poison, when the accused may hope to escape only by the accident of vomiting, or by the surreptitious use of an antidote. In the OT legislation, on the other hand, the case was not prejudged against the accused; the ingredients of the potion were innocuous, and reliance was placed on exposure through divine intervention. That the ordeal was at least occasionally efficacious in revealing guilt through the workings of fear and an accusing conscience, need not be doubted.

From the long persistence in Christendom of the judicium Dei in various forms (judicium ignis, aquæ, panis adjurati, etc.), the last trace of which only disappeared in the 18th century, it may be surmised that the ordeal appeals strongly to human nature. But among the Jews as among the Christians, experience bred doubts as to its trustworthiness. Sometimes the curse failed to operate, and that although the guilt was morally certain, or was established by later discoveries. Of such miscarriages of justice two explanations were offered. God, it might be said, stayed His hand because adultery had become so common among the accusing husbands that they had lost all claim to justice as against their wives.\* Another reason was discovered in the doctrine of 'merits,' and it was suggested that, on the ground of other good deeds, the woman might, if not altogether escape, at least have the punishment deferred. But at all events it was no longer relied upon, and so naturally fell into disuse.

v. The Legal Dissolution of Marriage.—
Divorce (Old Eng. hive-gedales, forlacton, Germ. Ehescheidung) is expressed in Heb. and Gr. by a number of words embodying the idea of dismissal or separation. The usual Heb. verb is night to send away,' LXX εξαποστέλλειν (Dt 2219, Jer 31), and for the practice of divorce night is once used (Mal 216); in the later books κ; occurs in Hiph. ('make to go forth,' Ezr 103. 19). A divorced woman is πίριη πίγκ (Lv 217, Ezk 4422). The bill of divorce (Old Eng. hive-gedales bok, later 'book of forsaking') is τρρ πρτρ (Dt 241). In classical Greek the legal terms are ἀποπέμπεσθαι, ἀποπομπή (of the man), ἀπόλειψις (usually of the woman). In the Greek of NT their place is taken by three verbs: (1) ἀπολόειν, used throughout the Synopt. (Mt 119 531. 22, Mk 1618); (2) ἀράναι, which with St. Paul describes the action either of husband or wife in promoting divorce (1 Co 711. 12. 18, cf. Rev 24), but in Synopt. has the meaning of 'leaving' a wife at death to another (Mt 2228); (3) χωρίζειν, χωρίζεινα, το separate, depart, then (cf. scheiden) to terminate a marriage union (1 Co 710. 11. 18). In the translation of those terms, both AV and RV are timid about using 'divorce,' and prefer the vaguer phrases of 'putting away' (ἀπολόειν) and 'depart' (χωρίζειν), the explanation of which is to be sought in a desire partly to mark the fact that ancient and modern divorce are on a different legal footing, partly to avoid prejudicing the much disputed question as to the dissolubility of marriage.

\*'After that adulterers multiplied, the bitter waters ceased, and R. Jochanan Saccal abolished their use according to Hos 414 I will not punish your daughters when they commit whoredom, for they themselves go apart,' etc.—Mishna, Sota, cap. 9, Surenhusius. iii. p. 291.

The Jewish law of divorce has a long history, beginning with the early period in which the right of 'putting away' a wife appears as the traditional prerogative of the husband, then passing into the stage in which the exercise of the right was at least impeded by prophetic protest and legislative enactment, and ending with the effective protection of the wife's position, alike by the Talmudic jurisprudence and the ethics of the Gospel.

That the power of divorce should have been anciently regarded as a traditional right was in harmony with the general ideas and practice of the time in regard to woman's status. When compensation was given to the wife's relatives it was natural to regard her under the point of view of property, and the notion of property involves liberty to alienate it. In heathen Arabia the continuance of a marriage depended on the husband's pleasure, and Mohammed was content to leave matters on the old footing (Wellhausen, Gött. Nach. 1893, p. 452 ft.). The old Hebrew practice, perhaps also the very procedure, is exemplified in Abraham's dismissal of Hagar (Gn 214). From the action of Saul (18254) it might be supposed that the wife's father had also power to dissolve a marriage, but the transference of Michal to another husband by paternal authority

evidently has the aspect of an outrage.

The Deut. code acknowledged the husband's right of divorce, but guarded against its abuse. To prevent so important a step being taken in the heat of passion, it required him deliberately to write her 'a bill of divorcement' (241). Another check was imposed upon impulsive action by the provision that, under certain conditions, the separation should be final—if, that is, the divorced woman should marry a second time, and should later on be again free to marry (vv. 3. 4). That this was an innovation may be inferred from the story of Hosea (Nowack, Arch. i. p. 347). The purely arbitrary exercise of the prerogative was discouraged by assuming that there was some solid ground of resentment—'that she finds no favour in his eyes resentment—'that she finds no favour in his eyes because he hath found some unseemly thing in her' (v.', see below). In certain cases, again, the right of divorce was forfeited by misconduct. The husband who falsely charged his wife with ante-nuptial fornication (22<sup>13-19</sup>), and the ravisher of a betrothed virgin (22<sup>28, 29</sup>), were bound in perpetuity by the marriage tie. In the school of the prophets the higher conception of woman's claims, which has some expression in Dt, found more definite utterance. The germ of the Deut. reforms, and of greater than these, was contained in J (Gn 2<sup>19-20</sup>), which in the narrative of the Creation had described the husband as knit to the wife in the most intimate union. It is, however, in Mal that the prophetic spirit definitely breaks with established custom, and declares without qualification that God hateth divorce (216). God's disregard of the sacrifices is due, he teaches, to His wrath at men's treacherous dealing with the wife of their youth (v.14). In the period following the Exile it would seem that divorce had become very common: doubtless the divorce of strange women required by Ezra (9. 10) had reacted upon the general practice, and had retarded and even set back the movement carried forward by the prophets.

In the succeeding period interest centred in the question of the precise nature of the Deut. condition justifying divorce, and the vagueness of the language in which the wife's offence was described gave rise to one of the most famous of rabbinical controversies: What was the 'unseemly thing' (τη αγις, lit. 'nakedness of a thing,' LXX dσχημον πράγμα)? The account of the dispute is given as follows in the Mishna (Giffin ix. 10):—

'The school of Shammai says, "No one shall divorce his wife

unless there shall have been found in her some unchastity (דבר יערות 'a thing or matter of nakedness'), since it is written, Because he hath found the nakedness'), since it is written, Because he hath found the nakedness of a thing ('II' MIND') in her"; the school of Hillel says, "Even if she shall have burned his food in cooking, since it is written, Because he hath found in her the nakedness of a thing" (i.e. anything); R. Akiba says, "Even if he find another fairer than she, as it is written, If she find no favour in his eyes." As indicated in this passage, the latitudinarian view was adopted on the ground that the governing principle is laid down in the opening clause 'if she find no favour in his eyes,' and it was also supported by reference to v.3, where it is implied that a second husband will also divorce the woman if he hate her. The emphasis was also laid on 'matter' rather than on' unseemly,' thereby suggesting that the unseemliness might appear in various matters. The school of Shammal treated the second clause as the significant one, and emphasized 'unseemly,' which they interpreted as meaning immoral or at least indecent conduct. The opinion of Hillel was generally adopted as the true representation of the state of the law ('decisio juxta scholam Hillelis,' Maimon. in loc.), although it is to be remembered that many who endorsed the position as jurists condemned it as moralists. 'Over him who divorces the wife of his youth,' said R. Eleazar, 'even the altar of God sheds tears' (Amram, Jewish Law of Divorce, p. 37). That 'the unseemly thing' was not a euphemism for unchastity may be condiently assumed in view of the fact that Dt prescribes the capital punishment for adultery. But recent scholarship at least agrees with Shammai in confining it to the region of immodest or indecent behaviour (Driver, in loc.). Because he hath found the nakedness of a thing (ערות רבר) in

Upon this vexed question of the schools the judgment of Jesus was eagerly sought (Mt 198-9, Mk 101-12), and in view of the great practical importance of the subject it was even spontaneously given (Mt 5<sup>81, 82</sup>, Lk 16<sup>18</sup>). Our Lord decreed in favour of the rigorous view, and indeed disallowed any ground of divorce, with the probable exception of adultery. He does not, it is true, base this on His interpretation of 'the unseemly thing'; on the contrary, He grants that the Mosaic law gave some latitude in the matter of divorce, and goes on to reform the law so as to bring it into conformity with the older ideal (Gn 224), or the original purpose of God. But did Jesus allow even adultery to be a valid ground of divorce? A negative answer is given from opposite quarters. The Rom. Cath. Church, as is well known, is committed to the position that adultery does not justify the total dissolution of a marriage (quoad vinculum) between two Christians, but only separation from 'bed and board,' \* and some modern German critics have supported this contention as at least corresponding to the teaching and intention of Christ. This view, it must be admitted, is not without foundation, while yet regard for the accepted canons of NT criticism precludes the claim that it has been established. it has been established.

it has been established.

A presumption that Jesus intended to prohibit divorce in all cases is created by the following considerations:—(1) In two passages of the Gospels it is stated without reservation that he who putteth away his wife and marrieth another committeth adultery' (Lk 1018, cf. Mk 1011), and the Pauline report of our Lord's teaching on the subject (1 Co 710.11) is similarly unqualified; (2) it is in harmony with the spirit of Christ's general teaching to suppose that He inculcated towards the erring one utter constancy in love and forgiveness unto seventy times seven. The Book of Hosea, it may be added, shows the possibility of a love which feels that the bond which binds a husband to even a faithless wife is indissoluble. But the force of this seems to be dissipated by the fact that Jesus actually admitted the exception in the proviso, 'saving for the cause of fornication' f (Mt 533 192). The objection is met in two ways. (1) The Bom. Cath. theologians deny that the punishment contemplated was more than a separation, and urge in proof that the woman who is put away commits adultery if she marries another. If the union was really dissolved, it is argued, there could be no allegation of adultery. But these statements rest on erro-

neous exegesis. The verb & \*\*\*e\lambda \text{in} was a recognized Hellenistic term for divorce, and could not convey to the early Christians the modified conception of a separation. Further, it is not certain that according to this passage Christ taught that a man committed adultery by marrying a divorced guilty wife, and consequently it may be held that in her case at least the marriage was regarded as annulled by divorce.\* (2) Instead of explaining away the exception, Bleek, Keim, and others have denied the genuineness of the clause specifying it, and this on the ground that the original unqualified statement of Jesus was felt to be a stumbling-block, and that the exception ('saving for the cause of fornication') crept into the traditional report as a concession to the realities of social life. In support of the genuineness it is pointed out that the MSS indicate no uncertainty as to the reliability of the text in Mt; while the absence of the exception from the parallel passages in Mk and Lk is explained either by saying that it was taken for granted (Meyer), or by recalling that the law already provided for the punishment of adultery (Schegg). Yet another suggestion is that the teaching of Jesus, which was originally comparatively lenient, eventually withdrew the single concession which had been made (Hug, quoted in Weiss-Meyer, in Ioc.). The question at issue must eventually be settled in the light of a general theory as to the trustworthiness of the Synoptic report of our Lord's sayings, and the explanation of the Synoptic divergencies; and it must be added that this particular instance does not materially strengthen the evidence that the oral tradition seriously modified the sayings of our Lord (on this subject of. Bruce, Kingdom of God, Crit. Introd.).

Among Protestant writers the more urgent

Among Protestant writers the more urgent question has been whether, consistently with the teaching of Christ and His apostles, divorce may be sought on other grounds than adultery; and the laxer modern practice has usually been justified as an extended application of the principle embodied in the words ascribed to Jesus.

embodied in the words ascribed to Jesus.

The prima facie sense of the relative passages in the Gospels (Mt 522 192) certainly is that Jesus permitted divorce on one ground only, though the precise bearing of His references to remarriage presents considerable difficulties.† Are we then to describe a system of law which has multiplied grounds of divorce as openly defiant of the mind of Christ? To this it is replied in the first place that the apostolic teaching sanctioned further extension. The reference is to what Roman Catholics call 'the Pauline privilege' (1 Co 716.16), according to which it a Christian husband or wife is deserted by his or her consortbeing an unbeliever, the former is declared to be no longer under bondage, i.e. free to marry again. In the second place, it is contended that in this case Jesus, as in so many other cases, states a principle under the form of a particular instance, and that other instances are to be allowed which can be shown to embody the same principle. And certainly it must be granted in general that the Christian morality does not consist of a cast-iron system of laws, but rather of germinal principles which entail the labour and responsibility of thinking out their inmost significance and judging as to their proper application. In the evangelical precept the spirit counts for more than the letter. If, therefore, we assume that Jesus allowed divorce at all, which is the most doubtful point in the argument, it is quite legitimate to extend the exception to cases involving a

all, which is the most doubtful point in the argument, it is quite legitimate to extend the exception to cases involving a "The weakness of the exceptical argument is obviously felt by a recent Rom. Cath. writer, who, after admitting the reality of the difficulty, and pleading that the passage be interpreted in the light of the clearer Scriptures, remarks that the matter affords a good instance of the impossibility of arriving at any assured interpretation of Scripture except in the light of the traditional teaching of the Catholic Church (Hunter, Dogm. Theology, § 816).

† As regards remarriage, the main exceptical difficulty is to know whether the phrase, 'whosover marrieth her that is put away committeth adultery' (Mt 533), prohibits the remarriage of every divorced woman, or only that of a woman who has been unlawfully divorced. The latter view, supported by Weiss-Meyer and Alford (who translates 'her when put away'), is the natural one, though it has the curious consequence that an innocent wife is, but a guilty wife is not, prohibited from forming a second marriage. The husband of a guilty wife, as is clearly implied in Mt 163, may marry again; and by parity of reasoning, in a case which could not lawfully occur in the Jewish Church, a woman who has divorced her husband on the ground of his immorality should be free to take another husband. On the other hand, it does not follow that a legal dissolution of marriage justifies remarriage. The legal decision gives rise, for the Christian Conscience, to the further question whether the marriage has been broken in the sense intended by Christ.

† This argument is suggestively stated by Newman Smyth (Christian Ethics, p. 410 ff.): 'There is no other legitimate principle for divorce than that presented by the nature of the sin of adultery. If, however, we can say with a good conscience that some other sin (some sin which possibly in Christ's day had not reached its full measure of iniquity—a sin, for instance, like drunkenness, which may utterly destroy the spiri

<sup>\*</sup>If any one saith that the Church has erred in that she hath taught and doth teach, in accordance with the ovangelical and apostolical doctrine, that the bond of matrimony cannot be dissolved on account of the adultery of one of the married parties; and that both, or even the innocent one who gave not occasion to the adultery, can not contract another marriage during the lifetime of the other; and that he is guilty of adultery who, having put away the adulteress, shall take another husband, let him be another wife, as also she who, having put away the adulterer, shall take another husband, let him be another if Canons and Decrees of the Council of Trent, De Sacr. Matri., Can. vii.).
† It has been held by some critics that as the word used is \*seprile\*, the justification of divorce here admitted was antenuptial fornication; but of. Weise-Meyer, in loc. " 'If any one saith that the Church has erred in that she

real moral subversion of marriage under the proviso that the verification of such be taken out of private hands and vested in a public tribunal. Nor can it be said that, at least in Great Britain, the occasions of legal dissolution allowed by law amount to less than a moral subversion.

While Christianity broke down the husband's right of divorce along one line, on another the Talmudic law was developed with the purpose of impeding its exercise.

Impeding its exercise.

The most important provisions making in this direction may be thus distinguished: (1) Inculcation of the doctrine that the right was not absolute by the statement of grounds justifying it—viz. suspicion of adultery, violation of decency and of Jewish customs, obstruction of religious service, refusal of conjugal rights; (2) enforcement of penalty in the restoration of the 'dowry'; (3) complication of procedure in carrying out the 'dowry'; (3) complication of procedure in carrying out the divorce; (4) deprivation of the right in cases where the husband had come under some incapacity, e.g. as insane, or as a deafmute, or where the wife—as insane, or a captive, or a minor—was specially entitled to protection (cf. Amram, Jewish Lan's of Div. c. 4, 'Laws of the Mishna restricting the husband's right to divorce'). On the other hand, circumstances were specified in which the husband was compelled to divorce his wife, viz. cases of adultery, clandestine intercourse, leprosy, childlessness, etc. (Hamburger, art. 'Scheiden'). The abolition of the man's theoretical right to divorce was decreed in 11th cent. by Rabbi Gershom, who enacted that 'as the man does not put away his wife except of his own free will, so shall the woman not be put away except by her own consent' (Amram, op. cit. p. 52). The decree, however, was not universally accepted as law by the Jews, and is ignored by Mainonides (ic).

The right of the wife to divorce her husband, which was conceded at least under later Greek and Roman law, was an idea repugnant to Hebrew custom and enactment. The only trace of such an idea is the legal provision that if a bondwoman become a wife, and if she be denied conjugal rights, she shall go out free without money (Ex 21<sup>7-11</sup>). This, however, was not a concession to the woman of power to divorce; in any such case the theory was that the husband was called upon, in the exercise of his exclusive prerogative, to put away his wife (Amram, op. cit. p. 60). Under the influence of alien customs, and with the support of Roman law, the practice came into vogue in NT times, whereby the wife directly repudiated the husband by sending him a 'bill of divorce.' The innovation was opposed by Jos. (Ant. xv. vii. 11, xvIII. v. 5), and was expressly condemned by our Lord in the words, 'if a woman shall put away her husband and marry another, she committeth adultery' (Mk 10<sup>12</sup>). The Talmudists upheld the old theory, allowing the wife to demand divorce in certain cases—e.g. leprosy, apostasy, cruelty, impotence (Amram, op. cit. c. 5),

The writing or bifl of divorcement (npm) app. Talm. 12, Gr. \$168100 drootaolo), which figures so largely in this subject, was of great antiquity (Dt 24, Is 50), Jer 39). In earlier times no great ceremony was used (Gn 2114), and the form of words would doubtless be similar to those in use among the Arabs.\* While necessary to make a divorce legal, it would appear that in the time of our Lord the 'bill' could be granted without bringing the matter under the cognizance of the authorities (Mt 1149). From the Mishna, a treatise of which takes its name from the 'bill' (Gittin), it appears that most elaborate regulations were enforced in regard to the judiciary, clerk, witnesses, time and place, and also the medium and mode of the delivery of the document. The following is given by Maimonides as an ancient and model form of the get or bill: 'On the — day of the week and — day of the month of — in the year — since the creation of the world (or of the era of the Seleucidæ), the era according to which we are accustomed to reckon in this place, to wit, the town of — do I — the son of — of the town of — do I — the

other name or surname I or my father may be known, and my town and his town), thus determine, being of sound mind and under no constraint; and I do release and send away and put aside thee — daughter of — of the town of — (and by whatever other name or surname thou and thy father are known and thy town and his town), who hast been my wife from time past hitherto, and hereby I do release thee and send thee away and put thee aside that thou mayest have permission and control over thyself to go to be married to any man whom thou desirest, and no man shall hinder thee (in my name) from this day forever. And thou art permitted (to be married) to any man. And these presents shall be unto thee from me a bill of dismissal, a document of release and a letter of freedom, according to the law of Moses and Israel.

— the son of — a witness. — the son of — a witness.

(Amram, pp. 157-158, with which cf. original text and Latin rendering in Surenhusius, *Mishnah*, iii. p. 323, and commentary, ib. p. 325).

vi. MARRIAGE AS A SYMBOL OF SPIRITUAL TRUTHS.—Although modern exegesis has given up the idea that in Canticles divine love is set forth under the image of human love, it is a familiar biblical thought that the marriage relationship is typical of the union and communion of God with His people. After Hosea, whose domestic life is reasonably supposed to have impressed him with the suitableness of the imagery, it became a commonplace of prophecy that God was to Israel as a husband, and Israel to God as a bride (Hos 2<sup>19</sup>, Jer 3<sup>14</sup> 31<sup>32</sup>, Is 54<sup>9</sup>).\* The conception passed over into NT, but with modifications agreeable to the nature of Christianity—the bridegroom being now God in Christ (Mt 9<sup>18</sup>, Jn 3<sup>20</sup>), the bride the spiritual Israel elect out of every nation (2 Co 11<sup>2</sup>, Rev 19<sup>7</sup>).

Now, this conception of God as the husband, though it has been little utilized in theology,

Now, this conception of God as the husband, though it has been little utilized in theology, cannot be said to be less apt or important than the two other conceptions of God which have been made the basis of systems. These are the idea of God as King, which lays the main stress on the divine sovereignty, and the idea of God as Father, which lays the main stress on the divine love. And as the weakness of the system built upon the principle of the divine sovereignty has been widely felt to be that it does less than justice to the ethical being of God; and as, on the other hand, the theology based on the divine fatherhood has been in danger of obscuring the divine might and majesty, there is certainly something to be said for putting in the forefront the thought of Hosea, which, representing God as husband, equally emphasizes to our minds His sovereignty and His goodness.

How large a portion of the body of Christian doctrine may be set forth, and with the sanction of Scripture, under the category of the marriage relation, may be briefly indicated.

(1) Under the doctrine of God this representation, besides embodying as its fundamental principles the divine sovereignty and love, lays special stress on the attributes of elemency and long-suffering, while it safeguards the holiness of God by showing Him grieved and provoked to anger by contumacy and unfaithfulness (Hos passim). As husband God also provides for His people (2\*).

(2) The doctrine of sin is, from this point of view, characterized as adultery (Hos 22, Jer 39 1327;

<sup>\*</sup>Two formulæ are given by W. R. Smith (Kinship, pp. 04, 163: 'Begone, for I will no longer drive thy flocks to the pasture.' 'Thou art to me as the back of my mother'; cf. the Latin formula: 'Tuas res tibi habeto, tuas res tibi agito.'

<sup>\*</sup>The germ of the conception, according to W. R. Smith, was found in Semitic heathenism; and the service of Hosea was to purify the gross physical conception of the god as the husba of the motherland, and to apply it to describe moral relations of Jehovah with His people (*Prophets of Israel*, new ed. p. 170 fl.).

on אָבֵרי ווֹנָה see Driver on Dt 3116)—a designation which, as regards (a) the nature of sin, indicates that its essence consists in indifference or even that its essence consists in indifference of even hatred toward (fod, and the giving of the affections to other objects (Hos 25, Jer 220, Ezk 2020); (b) the heinousness of sin, draws attention to its aggravation as unfaithfulness to solemn obligation and ingratitude for high favours (Jer 57); and (c) the punishment of sin, teaches that persistence in it entails a casting off, of which human divorce is a pale emblem (Hos 2<sup>12ff</sup>, Jer 2<sup>35ff</sup>.).

(3) In the Christological doctrine the points

which are chiefly emphasized by the conception are the love of Christ, His kingly office as exercised in His headship over the Church, and His intimate union with it through the indwelling Spirit (2 Co 11<sup>2</sup>, Eph 5<sup>23-22</sup>).

(4) In close relation to the last the doctrine of the Church is elucidated and enriched by the assertion of its mystical union with and dependence upon Christ (Eph. loc. cit.), and of its essential note of sanctity-the latter, which includes all the graces included in sanctification, being beautifully

portrayed as the bridal adornment (Rev 198).

(5) Finally, as regards eschatology, the figure concentrates attention on the momentous event of the Second Coming, which is sudden as the coming of the bridegroom (Mt 251-13), and places in a clear light the bliss, the security, and unutterable glory of the everlasting kingdom (Rev 197 212.9).

LITERATURE. - Next to the Scriptures the chief source is the division of the Mishna סרר נשים (Liber de re uxoria), containing, with two others, the treatises מום (de levirorum in fratrias with two others, the treatises ND2' (de levirorum in fratrias officio), ND3ND (de dote literisque matrimonialibus), NDD (de sponsalibus)—pt. 3 in the ed. of Surenhusius, Amsterdam, 1700. The best of the above material is collected in Selden, Uxor Hebraica, London, 1546, and Hamburger, Real-Encyclopædie für Bibel und Tahmud, Breslau, 1870. Of the older articles, that in Kitto's Biblical Cyclopædia is distinguished by Talmudic erudition. The recent German manuals which cover the ground are Benzinger, Heb. Arch., Freiburg, 1894, cf. his 'Familie u. Ehe' in Hauck:=Herzog3'; Nowack, Lehrb. der Heb. Arch., Bed. i., Freiburg, 1894, cf. his 'Familie u. Ehe' in Hauck:=Herzog3'; Nowack, Lehrb. der Heb. Arch., Bed. i., Freiburg, 1894, with which may be mentioned Stade, GVI, Berlin, 1887, i. pp. 371-395. On primitive marriage the chief works from the general standpoint are M'Lennan, Primitive Marriage, reprinted in Studies in Ancient History, London, 1876; Starcke, The Primitive Family, London, 1889; Westermarck, History of Human Marriage, London, 1891; Post, Studien zur Entwickelungsgeschichte des Familienrechts, Leipzig, 1880; while the theories are tested in the Semitic field with special knowledge by W. R. Smith, Kinship and Marriage in Early Arabia, Cambridge, 1895, and Wellhausen, 'Dio Ehe id eln Arabern' in the Göttinger Nachrichten, 1893, p. 431 ff., following Wilken, Das Matriarchat bei den alten Arabern, 1884. For the interpretation of the laws there is much to be learned from Michaelis, Mosaisches Recht, Eng. tr. 'Commentaries on the Laws of Moses,' London, 1814. Annam, Jewish Law of Divorce according to Bible and Tahmud, London, 1897; is an important discussion by a legal expert. See also Fenton, Early Hebrew Life, London, 1890; Bible and Tahmud, London, 1894; Mackle, Bible Manners and Customs, London, 1894.
Mackle, Bible Manners and Customs, London, 1898.

MARSENA (NJPP); Maλησεάρ AB, Maλισεάρ, Mapaawá; Marsana).—One of the seven princes of סומה (de dote literisque matrimonialibus), סומה (de

MARSENA (κιρις); Μαλησεάρ AB, Μαλισεάρ, Μαρσανά; Marsana).—One of the seven princes of Media and Persia, who 'sat first in the kingdom,' and had the right of access to the royal presence (Est 114, cf. ADMATHA). The name is doubtless Persian, but the derivation is uncertain.

MARSHAL.—The word does not occur in AV, but in RV it represents two Heb. words. (1) ספר קיים בְּשֶׁבֶּם בְּשֶׁבֶּם בְּבֶּר Apphēr (Jg 514) in the difficult phrase אַטְבֶּים בְּשֶׁבֶּם מְשֶׁבֶּים בְּשֶׁבֶּם (Jut of Zebulun] they that handle the marshal's staff' (RV). The usual meaning of up is 'scribe' or writer, and so AV, agreeing with Syr.\* gives כחבין בקולמום רספר .and Targ

\* We have verified the Syr. from MSS, viz. the Ambrosian, the Buchanan Bible (Jacobite of cent. xii.), and Camb. Univ. Add. 1984 (Nestorian of cent. xiii.) for Jg 5<sup>14</sup>, and from the first two of these MSS together with Camb. Univ. Add. 1965 (Nestorian of cent. xv.) for Jer 51<sup>27</sup> and Nah 3<sup>17</sup>.

'They that handle the pen of the writer.' 'They that handle the pen of the writer.' None of the Greek versions, however, give 'pen,' in A bed a strong in B and Theod. δν βάβδον, in Symm. μετὰ βάβδον. Therefore we may take Greek authority to be on the side of 'marshal' as against 'scribe,' 'writer,' though an abstract noun, acc. to A ἡγήσεως, acc. to B (and Theod.) διηγήσεως (cerror for ἡγήσεως?), seems to be the original Septuagint rendering. B offers γραμματέως as a second rendering, and Symm. has γραμματέως only, the meaning of which is 'marshal' as appears from 1 Mac 542. Εστησεν (sc. Judas) τους γραμματές τοῦ λαοῦ 1 Mac 5<sup>12</sup>, ξοτησεν (sc. Judas) τους γραμματεῖς τοῦ λαοῦ ἐπὶ τοῦ χειμάρρου. The office of a marshal was to help the general to maintain discipline. His wand of office (σκηπτρον or ράβδος) could be used, if neces-

sary, for inflicting chastisement.

(2) ηρφ tiphṣār (Jer 51²) or ηρφ taphṣēr (Nah 3¹¹).

The meaning of this word—a loan-word in Heb.—
is not certainly known, but Lenormant (followed) by most scholars) compares the Bab. - Assyr. dupsarru [dupšarru, Delitzsch], 'tablet-writer'; so RVm to Nah 3<sup>17</sup> 'thy scribes.' The title 'scribe' might very well be given to a provost-marshal; cf. γραμματεύs in 1 Mac 5<sup>42</sup> (cited above). The VSS give no help, and the meaning of the word was evidently lost in early times. LXX has βελοστάσεις ('batteries of warlike engines') in Jer, but leaves the word untranslated in Nah. Symm. has έκλεκτούs in Jer (so Field). Syr. \* has μ. 'destruction' in Jer, but in Nah thy aroused 'thy aroused' ones' or (possibly) 'thy warriors.' Targ. gives עברי ' warriors' in Jer, but leaves the word untranslated in Nah. All these renderings of the VSS are founded on guesses from the context, rather than on real knowledge. W. EMERY BARNES.

## MAR'S HILL .- See AREOPAGUS.

MARTHA (Μάρθα, an Aramaic form [אָרָחָא, fem. of אָרֶהְ 'lord'], not found in Heb., meaning 'mistress' or 'lady.' Compare Kupla in 2 Jn', which some interpret as a proper name, and some identify with the Martha of the Gospels).—The name does not occur in OT. Only one person called Martha appears in NT, mentioned in Lk 10<sup>38, 42</sup>, Jn 11<sup>1, 5, 19, 39</sup> 12<sup>2</sup>. It is not possible to 10<sup>38, 42</sup>, Jn 11<sup>1, 5, 10-39</sup> 12<sup>2</sup>. It is not possible to doubt the identity of the Martha of the Fourth Gospel with the Martha of the Third. In both cases there is a sister Mary, and similar traits in the characters of the two women appear in each of the narratives. But the course of events in Lk would suggest that the village where the sisters lived was situated in Galilee; according to Jn it was Bethany. The harmonistic suggestion, that they may have changed their place of abode previous to the events with which they are connected in the Fourth Gospel, is evidently a device invented to meet a difficulty; it has no probability. St. John is so exact in his topography that it is not reasonable to suppose he was mistaken in this instance. Bethany is one of the centres round which the history in the Fourth Gospel moves. It would seem, therefore, that the order of the narrative is dislocated in Lk, so that a Judgean incident is inserted in the course of events that transpired in the north. Martha here appears actively engaged in serving Jesus and His dis-ciples at a hospitable feast. In this case, and in the Johannine incidents, she takes the lead in a way that implies that she is the elder sister. According to the Synoptic account, it was in the house of Simon the leper that a woman, pouring precious ointment over Jesus, was rebuked by the disciples for her wastefulness (Mt 267, Mk 148); according to Jn, this occurred at the house of Martha and Mary, the latter being the woman who testified her devotion to Jesus by the costly

gift (Jn 121-8). Therefore it has been suggested that Martha may have been Simon's wife or widow. In St. Luke's narrative Martha is gently corrected for her excessive anxiety and the impatience with which she complains of her sister. Thus she is seen to be one who, while truly devoted to Christ, and commendably energetic in the service of hospitality, does not possess her soul in quietness; sets too high a value on the material sumptuousness of the feast for which material sumptiousness of the least for which she is responsible; fails to understand how best to entertain her divine Guest by best pleasing Him; and hastily blames the gentler Mary. According to the oldest MSS and some VSS and Fathers.\* Jesus said to her, 'There is need of but a few things or one'—the 'few' pointing to simplicity in the provisions at table (compare Lk 10<sup>12</sup>), the 'one' perhaps carrying her thought to what alone He supremely cared for, the kingdom of God (see Mt 638), to show profound interest in which was to receive Jesus in the way most acceptable to Him. In the narrative of the death and raising of Lazarus, Martha and Mary are true sisters, echoing one another's thoughts, both trusting in Jesus as their one friend who could help them in the greatest need. In Jn 122, as in the Lk narrative, Martha is found 'serving.' See, further, under MARY, No. iv.

A tradition, which cannot be traced earlier than the Middle Ages, is cherished all over the south of France, to the effect that during a persecution of the Christians by the Jews, Lazarus and his two sisters, having been sent to sea in a boat without rudder, oars, or provisions, drifted to land near Marseilles, founded many churches in Provence, in particular those at Marseilles, Aix, and Avigin particular those at Marselles, Aix, and Avignon, and finally lived in retreat at Tarascon (see
Guettée, Histoire de l'Église de France, i. 402, n. 5;
Guérin, Les Petits Bollandistes, etc. x. 91-105,
where many childish but picturesque legends of
Martha are recorded; cf. also Duchesne, Fastes
épiscopaux de l'ancienne Gaule, i. 325 ff.).

W. F. ADENEY.

MARTYR.—The Gr. word μαρτυς (from a root signifying to 'remember,' connected with 'memory' and μερμνα, 'care,' therefore primarily 'one who testifies to what he remembers'), which in AV is frequently translated 'witness,' is rendered 'martyr' in Ac 2220, Rev 213 176. The Vulg. has MARTYR.—The Gr. word μάρτυς (from a root martyr in the last passage only, in the other two the usual testis, and Wyc. and Rhem. follow. Tind., Cov., Cran. have 'witness' in all; Gen. and Bish. 'witness' in Ac, but 'martyr' in Rev. The Versions, even the earliest, seem to have used 'martyr' in its modern sense, one who scals his testimony with his blood, not merely a witness, but a witness who suffers. But the Gr. word does not appear to have acquired that meaning within the NT, though it is common in early Christian writings. In Ac 22<sup>20</sup> the tr. 'martyr' loses the reference to the preceding 'witness' (μαρτυρία, 22<sup>18</sup>). RV gives 'witness' in Ac 22<sup>20</sup> and Rev 2<sup>18</sup>, but retains 'martyr' in Rev 176, m. 'witness.'

J. HASTINGS. MARYELLOUS is an adverb in Wis 198, 'seeing thy marvellous strange wonders' (θαυμαστά τέρατα, RV 'strange marvels'). Cf. Ps 3123, Pr. Bk. 'Thanks be to the Lord: for he hath showed me marvellous great kindness in a strong city'; and Ps 1453 'Great is the Lord, and marvellous worthy to be praised '(but mod. edd. wrongly print 'Great is the Lord, and marvellous, worthy to be praised'). Cf. also Jer 30° Cov. 'Yee all their faces are marvellous pale.' Tindale uses 'marvellously,' as Mt 210 When they sawe the starre, they were mar-velously glad.' So also often in Shakespeare.

J. HASTINGS.

MARY «(Heb. στια Miriam; LXX and NT Μαριάμ or Mapla: Josephus Μαριάμμη or Μαριάμη or Μαριάμνη).\*—The name, as Stanley says, probably owes its frequent recurrence in the narratives, alike of the Evangelists and of Josephus, not to the memory of Miriam the sister of Moses, but to the sympathy felt for the beautiful Hasmonæan princess, the high-souled and ill-fated wife of Herod (Jewish Church, iii. 429). We find it used as follows in the NT-

i. Mary the mother of James. ii. The other Mary.
iii. Mary of Clopas.
iv. Mary the sister of Martha.
v. Mary Magdaleno.
vi. Mary the mother of Mark.
vii. Mary saluted by St. Paul.

viii. Mary the mother of the Lord.

i. ii. iii. Of the above, the first three are generally identified. The first is mentioned in the three Synoptic Gospels as one of those who were present at the crucifixion. In Mt 2755. 56 we read, 'many women were there beholding from afar, which had followed Jesus from Galilee, ministering unto him: among whom were Mary Magdalene, and Mary the mother of James and Joses, and the mother of the sons of Zebedec.' In v. 61 we are told that the same evening, after Joseph of Arimathæa had buried the body in his own new tomb hewn out of the rock, 'Mary Magdalene, and the other Mary (evidently the before-mentioned mother of James), were sitting over against the sepulchre.' Next day, 'as the sabbath began to dawn towards the first day of the week,' the other Mary again appears with Mary Magdalene (281). It is to them that the angel at the sepulchre speaks words of comfort after rolling away the stone, 'Fear not ye: for I know that ye seek Jesus, which hath been crucified. He is not here; for he is risen, as he said. Come, see the place where the Lord lay.
And go quickly, and tell his disciples.' In fear and joy they ran to carry the message; and as they went, 'Jesus met them, saying, All hail. And they came and took hold of his feet, and worshipped him. Then said Jesus unto them, Fear not: go tell my brethren that they depart into Galilee, and there shall they see me.'

Mark (1540) gives some further details. called the mother of James the Little and Joses, and Salome is mentioned as one of her companions along with Mary Magdalene. In v. 47 she (now called M. η Ἰωσῆτος) is watching where He was laid. In 16<sup>1</sup> 'Mary of James' is joined with Salome and the Magdalene, as buying spices and bringing them to the tomb at sunrise on the first day. As they go they wonder how they shall get the stone rolled away; but this is already done when they arrive. and they find in the tomb a young man in white

and they find in the tomb a young man in white

\* It has been asserted that the form Μαριάμ is used exclusively for the Virgin, and Μαριά for the others; but, though the Hebralo form is in general used of the former (in the nominative), perhaps as being the more dignified, it is by no means confined to her, nor is the Hellenic form confined to the latter. Thus, where the Virgin is spoken of, WH read Μαρία with Codd. BD in Lk 2D, and though they tollow B in calling her Μαριάμ clsewhere, yet it is only in Lk 137 that this form has the support of all the MSS. In Mt 1356 Μαρία is read by O, in Lk 136.35.56 and 25 by D, in Lk 134.38.66 by both. On the other hand, the best text has Μαριάμ for the Magdalene in Mt 2761, Mk 1540, Jn 2016.18, and this reading has the support of C and L in several other passages. Μαριάμ is not used of the mother of James in the best MSS, though O has it in Mt 2756 and Lk 231. Μαριάμ is used of the sister of Martha in the best text of Lk 1039.43, Jn 112.30.32 123.

In the other cases the Hebraic and Hellenic forms are used indiscriminately. Thus the best text has the acc. Μαρίαν of the Virgin in Lk 216.34, of Martha's sister in Jn 1119.38.31.65. The gen. Μαρίαμ is the only form used as well of the Virgin as of Martha's sister and the mother of Mark. The dat. Μαριάμ is used of the Virgin in Lk 216.34, of Martha's sister in Jn 1119.38.31.65. The gen. Μαρίαι is the only form used as well of the Virgin as of Martha's sister and the mother of Mark. The dat. Μαριάμ is used of the Virgin in Lk 26, Ac 114, but Μαρία of the Magdalene in 'Mk' 169.

† Here and in Mk 1540 Syr. Sin. has 'daughter' instead of 'mother.'

raiment, who bids them not be amazed, but carry word to the disciples to meet the Lord in Galilee.

'But they said nothing to any one; for they were afraid' (v. 8).

In Lk 23<sup>19-56</sup> we are told generally that the women which came from Galilee stood afar off at the crucifixion and followed Joseph to the tomb to see how the body was laid, and prepared spices and ointments, which they brought at early dawn on the first day. Entering into the tomb they saw two men in dazzling apparel, who asked them why they sought the living among the dead. 'Remember the words he spake unto you in Galilee, saying that the Son of Man must be crucified, and the third day rise from the dead. And they remembered his words, and told all these things to the eleven and to all the rest.' From 2410 we learn that Mary Magdalene, and Joanna, and Mary of James were among the number of these women.

John (1928) tells us that there were standing by the cross, His mother and His mother's sister (identified with Salome, see article on BRETHREN OF THE LORD), Mary of Clopas, and Mary Magdalene. Comparing this with Mk 15th, we naturally conclude that Mary of Clopas must be the same as Mary of James. All we know of Clopas is derived from Hegesippus (ap. Euseb. HE iii. 11), who tells us that he was brother of the reputed father of our Lord, and that Symeon the second bishop of Jerusalem was his son. Whether ή τοῦ κλωπά means wife or (as Jerome suggests) daughter of Clopas is uncertain. Lightfoot (cited in the above-named article) holds that there is no ground for identifying the name Clopas with Alphæus, and that the l'eshitta version and Jerome may be right in regarding it as another form of Cleopas. Mary was daughter of Clopas, she may have been wife of Alphaeus, and her son James may be the apostle known as the son of Alphœus. Jerome, however, maintains that Mary of Cleophas, the aunt of the Lord, is a different person from the mother of James (see Ep. ad Hedibiam cited by Lightfoot, Gal. p. 260). John of Thessalonica and other Fathers (quoted by Faillon, i. p. 150) strangely identify the mother of James with the mother of the Lord, thinking that her presence at the crucifixion could not have been passed over

without mention by the Synoptists.

iv. Mary, sister of Martha.—It is only in the last two Gospels that her name occurs. Luke (1088-42), after narrating the return of the Seventy, says vaguely that, 'as they went on their way, Jesus entered into a certain village: and a certain woman, named Martha, received him into her house. And she had a sister called Mary, which also sat at Jesus' feet, and heard his word.' When Martha complained that she was left to serve alone, Jesus answered that, whereas she was anxious and troubled about many things, her sister had chosen the good part, which should not be taken from her. In July we find the two sisters living with their brother Lazarus in a village named Bethany; and all three are said to have been beloved by the Lord. Jesus, on His last journey to Jerusalem, receives tidings of the sickness of Lazarus, and, when He reaches Bethany, finds that he had been dead four days. The behaviour of the sisters is Martha goes out to meet Him; but Mary sits still in the house, till she receives a message that the Master called for her. Then rising quickly, she came where He was, and fell down at His feet. Both meet Him, however, with the same words of sorrowful reproach: 'If thou hadst been here, my brother had not died.' It would seem that, though Martha was apparently the elder sister, Mary was for some reason held in greater con-

In v.19 we are told that many of sideration. the Jews had come to comfort Martha and Mary; but, while nothing is said of their accompanying Martha, we read in v.31 that the Jews, who were in the house with Mary, when they saw that she rose up quickly and went out, followed her, thinking that she was going to the grave to weep there; and in v. it is said that many of the Jews that came to Mary believed on Jesus.

In the chapter which follows we have the story of the anointing of the feet of Jesus. Each evangelist tells us of an anointing of the Lord by a woman, whilst He was reclining as a guest at a hospitable entertainment; and there has been much discussion as to how often He was anointed, and (supposing Him to have been anointed more than once) whether Speaking generally, it will be seen from the conspectus given on next page that Matthew and Mark are in agreement, and that Luke's account differs widely from theirs, whilst John's is independent of either, yet presenting points of contact, now with the one, now with the other. We will

consider these différences in order.

(1) As to time and place: if we may judge from the context, the anointing described by Luke took place in Galilee while the Baptist was in prison; that described by the other evangelists took place in Bethany shortly before the crucifixion. (2) As to the host: Luke names Simon the Pharisee, the other Synoptists Simon the leper, while John is indefinite, merely stating that after the raising of Lazarus 'they made him a feast, at which Lazarus sat at meat, and Martha served.' (3) As to the action: whilst the first two Gospels speak of the head being anointed with precious ointment, Luke says that the feet of Christ were first wet with the tears of the woman standing behind Him, and then wiped with her hair and anointed; John says nothing of her tears, but agrees in the statement that it was the feet which she anointed and wiped with her hair. (4) As to who or what the woman was, the first two Gospels tell us nothing beyond the fact of her pouring the ointment on the head of Jesus; Luke says that she was a sinner in the city, and that Jesus said of her, 'her sins which are many are forgiven, for she loved much'; John tells us that she was the beloved and honoured sister of Martha and Lazarus. (5) As to the criticism passed upon the action: Mark speaks vaguely of some who were indignant at the waste of money, saying to themselves, 'this ointment or money, saying to themselves, this continent might have been sold for more than 300 denarii and given to the poor'; Matthew puts this censure in the mouth of the disciples; John ascribes it to Judas, who bore the bag; while Luke reports quite a different criticism made by a different person, Simon the Pharisee, who becomes suspicious of Christ's pretensions as a prophet, on the ground that He had failed to read the character of the woman who touched Him. (6) As to our Lord's justification of the woman: this, of course, is different in the two cases, since it has to meet two distinct charges. The Pharisee is answered by the parable of the Two Debtors; and a contrast is drawn between his neglect of the ordinary forms of hospitality and the humble devotion of the penitent woman, who is bidden to go in peace. In the other Gospels the disciples are reminded that the poor would be always with them, while their Master would shortly leave them; that the woman had done a good work in anointing His body for the impending burial; nay, that this action of hers would be reported in her praise throughout the world, wherever the gospel was preached.

Such being the diversity of the narratives, it is avident that there are many difficulties in the war.

evident that there are many difficulties in the way of any one who would regard them as all speaking

## Conspectus of the Anointings.

[The thick type is used in the Synoptic Gospels to mark their mutual differences: in Jn for the opposite purpose of marking his resemblances to one or other of the Synoptists].

MT 266.

Τοῦ δὲ Ἰησοῦ γενομένου έν Βηθανία έν οίκια Σίμωνος τοῦ λεπροῦ, προσηλθεν αὐτῷ γυνη έχουσα αλάβαστρον μύρου βαρυτίμου, και κατέχεεν έπι της κεφαλής αὐτοῦ άνακειμένου. Ιδόντες δέ οί μαθηταὶ ἡγανάκτησαν, λέγοντες, Είς τί ἡ ἀπώλεια αϋτη; εδύνατο γὰρ τοῦτο πραθῆναι πολλοῦ, καὶ δοθηναι πτωχοίς. γνούς δε δ Ιησούς είπεν αὐτοίς, Τί κόπους παρέχετε τῆ γυναικί; ξργον γὰρ καλὸν ἡργάσατο εἰς ἐμὲ· πάντοτε γὰρ τοὺς πτωχοὺς ἔχετε μεθ' ἐαυτῶν, έμε δε ου πάντοτε έχετε βαλούσα γὰρ αύτη τὸ μύρον τοῦτο έπι τοῦ σώματός μου. πρός το ένταφιάσαι με έποίησεν. άμην λέγω υμίν, δπου εὰν κηρυχθη τὸ εὐαγ-γέλιον τοῦτο εν ὅλφ τῷ κόσμφ, λαληθήσεται καί δ έποιησεν αυτη, εις μνημό-συνον αυτης. τότε πορευ-θεις... 1ούδας.

MK 148.

Καὶ δυτος αὐτοῦ ἐν Βηθανία, εν τη οίκια Σίμωνος τοῦ λεπροῦ, κατακειμένου αὐτοῦ, ἢλθεν γυνὴ ἔχουσα αλάβαστρον μύρου νάρδου πιστικής πολυτελούς συντρίψασα την άλάβαστρον, κατέχεεν αὐτοῦ τῆς κεφαλής. ήσαν δέ τινες αγανακτούντες πρός έαυτούς, Els τι ή άπώλεια αϋτη τοῦ μύρου γέγονεν; ηδύνατο γάρ τοῦτο τὸ μύρον πραθήναι έπάνω δηναρίων τριακοσίων, και δοθ ηναι τοις πτωχοίς και ένεβριμώντο αυτή. Ο δε Ίησοῦς είπεν, "Αφετε αὐτήν τί αὐτῆ κόπους παρέχετε: καλόν έργον ήργάσατο έν έμοι. πάντοτε γὰρ τοὺς πτωχοὺς ἔχετε μεθ' ἐαυτῶν, και όταν θέλητε δύνασθε αὐτοῖς πάντοτε εὖ ποιῆσαι, έμε δε ού πάντοτε έχετε δ έσχεν εποίησεν, προέλαβεν μυρίσαι τὸ σῶμά μου είς τὸν ένταφιασμόν. άμην δε λέγω υμίν, δπου έλν κηρυχθή τὸ εὐαγγέλιον είς όλον τον κόσμον, και δ έποίησεν αϋτη λαληθήσεται είς μνημόσυνον αυτης. Και Ιούδας... άπηλθεν.

LK 786

'Ηρώτα δέ τις αὐτὸν τῶν Φαρισαίων, ΐνα φάγη μετ αὐτοῦ καὶ είσελθών είς τὸν οίκον τοῦ Φαρισαίου κατεκλίθη. Και ίδου, γυνή ήτις ην εν τη πόλει αμαρτωλός, και ἐπιγνοῦσα ὅτι κατάκειται έν τη οίκια του Φαρισαίου, κομίσασα άλάβαστρον μύρου, καὶ στᾶσα ὀπίσω παρά τοὺς πόδας αὐτοῦ κλαίουσα, τοῖς δάκρυσιν ήρξατο βρέχειν τους πόδας αὐτοῦ, καὶ ταῖς θριξὶν της κεφαλής αὐτης έξέμασσεν, καὶ κατεφίλει τοὺς πόδας αὐτοῦ καὶ ήλειφεν τῷ μύρφ. JN 112 121-8.

Ην δέ Μαριάμ ή άλείψασα του Κύριου μύρω, καί έκμάξασα τοὺς πόδας αὐτοῦ ταῖς θριξὶν αὐτῆς....

'Πλθεν els Βηθανίαν . . . ζποίησαν οὖν αὖτῷ δεῖπνον έκει και ή Μάρθα διηκόνει, δ δὲ Λάζαρος είς ην των άνακειμένων σύν αύτω. ή οίν Μαριάμ λαβούσα λίτραν μύρου νάρδου πιστικής πολυτίμου, ήλειψεν τοὺς πόδας Ίησοῦ, καὶ ἐξέμαξεν ταίς θριξίν αὐτης τοὺς πόδας αὐτοῦ ἡ δὲ οἰκὶα έπληρώθη έκ τῆς ὀσμῆς τοῦ μύρου. λέγει 'loύδας ὁ μύρου. λέγει 'Ιούδας ὁ 'Ισκαριώτης είς τῶν μαθητων αύτου, ο μέλλων αύτον παραδιδόναι, Διὰ τί τοῦτο τὸ μύρον οὐκ ἐπράθη τριακοσίων δηναρίων καί έδόθη πτωχοίς; είπεν δέ τοῦτο, οὐχ ὅτι περί τῶν πτωχών έμελεν αὐτῷ άλλ ότι κλέπτης ήν, και τ**ό** γλωσσόκομον έχων τὰ βαλλόμενα εβάσταζεν. είπεν οδν ο Ίησοῦς Αφες αὐτήν, ἴνα εἰς τὴν ἡμέραν τοῦ ένταφιασμού τηρήση αὐτὸ. τοὺς πτωχοὺς γὰρ πάντοτε ἔχετε μεθ' ἐαυ-τῶν, ἐμὲ δὲ οὐ πάντοτε έχετε.

of one person and recording one scene.\* And yet it is almost as difficult to suppose that such an action could have been repeated. Is it likely that our Lord would have uttered such a high encomium upon Mary's act if she were only following the example already set by the sinful woman of Galilee; or (taking the other view) if she herself were only repeating under more favourable cir-cumstances the act of loving devotion for which she had already received His commendation? Is it likely, again, that St. John would have distinguished Mary as 'her who anointed the Lord with ointment and wiped his feet with her hair' if he had known that in this she was only doing what had been done by another before her? Taking a more general view, is it likely that so rare an act, the beauty of which lay in its instinctive spon-taneity and freedom from self-consciousness, could have been imitated or reproduced without losing all its savour?

Perhaps it may be answered that the act was not really unusual, since the context in Luke implies that not to anoint the head of a guest is to be wanting in ordinary courtesy.† It is true we have no other reference to the anointing of the feet in the Bible, but that this was not unprecedented may be seen from Arist. (Vesp. 605, δ δέ γ' ήδιστον τούτων έστιν πάντων . . . όταν οίκαδ' τω τον μισθον έχων . . . και πρώτα μεν ή θυγάτηρ με απονίζη

\*This view is taken by Ephraem Syrus, Paulinus, Victor of Capus in his Diatessaron (see quotations in Faillon, i. 37, 146), Grotius, Strauss, and the rationalistic interpreters generally, and also by Hengstenberg.
†See art. on Anointino, where reference is made to Egyptian monuments, as bearing witness to the practice of anointing the head of the guest at a feast, cf. also Ps 235 457.

και τω πόδ' άλειφη και προσκύψασα φιλήση), where the daughter is represented as washing, anointing, and kissing the feet of her father, when he comes home from his day's work. Still this does not furnish a precedent for the hair being used to wipe the feet; and it must be remembered, on the other side, that in proportion as we diminish the rarity of the act, we find it more difficult to account for the value set upon it by our Lord, and the importance ascribed to it by St. John.

We turn now to consider how it has been attempted to harmonize the different narratives by those who believe that only one event is recorded. The most elaborate attempt is that made by Hengstenberg,\* who replies to (1) the first difficulty above stated, that Luke's context is determined here, not by the order of events, but by the connexion of thought; since the contrast between the Pharisees and the publicans, in vv. 29. 30, and the description of Christ as the Friend of publicans and sinners, in v.84, naturally lead on to the story of the sinful woman at the house of the Pharisee. This, we think, must be conceded. As to (2), if we are to identify Simon the Pharisee with Simon 'the leper,' we must understand the latter title to refer not to his present condition; for in that case he could not himself have entertained guests, as he does in Luke. Some have thought that he may have been previously healed of his leprosy by Jesus. But this is not at all suggested by the words addressed to him in Luke, nor does it seem consistent with his ungracious behaviour. There is less force in the argument that the injurious title 'leper' would not have been re-\* Comm. on St. John, Eng. tr. pp. 1-33, 78-89.

tained in the case of one who had been cured of

his leprosy.

Lastly, is it likely that so pronounced a Pharisee as the Simon of Luke would have entertained Jesus at so late a period in His career, when the Pharisees had already resolved upon His death? or, on the other hand, that one who was so much impressed with the raising of Lazarus as to preside at a banquet given in honour of the occasion, should have shown so little respect for the prophet whom he professed to be honouring?

The other incidents of the supper may be treated together. It is said that the discrepancies in the two accounts are due merely to the different points of view taken by the narrators. The anointing gave rise to both conversations—that with Simon and that with the disciples. Luke seizes the point of her repentance, the other evangelists that of her lavish expenditure. But

surely this is psychologically impossible.

Let us examine a little more closely the story in Luke. A notorious sinner, learning that Jesus is sitting at meat in the house of a certain Pharisee, makes up her mind to follow Him there. She see, makes up her initial to the latest the house, and immediately takes up her stand behind the Lord.\* It is evident that something must have happened to make her loathe the life she had been living, and feel that her only hope of escaping from it was to take refuge with Him whose words, spoken to the scornful Pharisees, may have been brought to her ears: 'I am not come to call the righteous, but sinners to repentance.' As she stands behind Him she wipes away with her hair the penitential tears which fall fast upon His feet. Then, as the agony of shame is gradually conquered by the sense of the Saviour's forgiving love, she kneels and kisses His feet and anoints them with the ointment she had brought with her. She has no thought, no eye, for anything but Him. For a while no notice is taken, but at last words of comfort come, addressed first to another, 'Her sins, her many sins are forgiven, for she loved much'; and then directly to herself, 'Thy faith hath saved thee. Go in peace.' How would it be possible for her after this to have stayed on and listened to the reproaches of Judas and the others, or how could they have ventured to find full there their Lord had already given to find fault where their Lord had already given His blessing? Turn now to the other side of the story, if we are to piece it out from what we read of Mary. Is it possible that she who had long ago made the good choice, who was now living quietly with her brother and sister, all three noted as especially dear to Christ; she whose house had been chosen by Him for His temporary home before the end came, and who had lately been brought into such intimate contact with Him when He raised her brother from the dead,—is it possible that she should be spoken of as a notorious sinner, who was forcing herself into His company? No! If we want to make one consistent story out of the four narratives, our only course is to suppose with Strauss that the underlying fact has been much falsified by tradition, especially in the case of Luke, who has, he thinks, mixed up with it the story of the woman taken in adultery.

Before examining other explanations, we will

Before examining other explanations, we will just mention the attempts which have been made to get over two minor difficulties: (1) the discrepancy as to the anointing of feet or head; (2) the nature of the locality where the sinful woman lived. As to (1), some have compared Ps

133², where the precious ointment is said to have run from Aaron's head down to the skirts of his clothing; but (even if the correct  $tr^n$  is 'collar' instead of 'skirts'), this could only happen in the case of one who was standing and not reclining at table. Others have assumed two anointings, first of the head and then of the feet, the former of which they think may have been omitted by John as being generally known. This does not seem probable. The writer's own view of the matter is given below. As to (2), the  $d\mu a \rho r \omega \lambda \delta s$  is said to have been 'in the city' ( $\pi \delta \lambda \epsilon$ , Lk  $7^{27}$ ), but Bethany is described as a  $\kappa \omega \mu \eta$  (Lk  $10^{38}$ , Jn 11). To this it is replied that there is no reason why Bethany should not be regarded as a suburb of Jerusalem.

We will now examine the view which has been most generally held in the Latin Church, viz. that Luke describes a different scene from that in the other Gospels, but that the woman is the same. This gets rid of some difficulties, but is open to the objections stated above, as to multiplying what appears to be a unique occurrence. According to it. we are to suppose that the sister of Martha had at one time lived a vicious life, but had been conscience-stricken by some word of the Saviour, and, hearing that He was in Simon's house, had felt herself constrained to seek Him there, and received from His lips the word of forgiveness and blessing. If we allow an interval of two years, it is, of course, not such a flagrant impossibility for the sinner to have changed into the saint; and the quiet weeping of the one is not unlike the quiet sitting of the other at the feet of Jesus. Some have thought, too, that the remarkable reticence as regards the family at Bethany, which characterizes the Synoptic Gospels, might be explained by the wish not to call attention to a history which would bring discredit on the early life of a leading member of the Church. But if this danger of scandal still existed when the Gospels were written, how much more strongly must it have been felt some 30 years before, when the memory of the past was still fresh, and the Jews were on the watch for anything which might raise a prejudice against the prophet whom they sought to kill. Is it possible that they could have crowded to Bethany to express their sympathy and esteem for one who had so lately done such dishonour to the name of Israel? The difficulty as to the recurrence of the name Simon is perhaps fairly met by calling to mind its frequency at the time: we find no fewer than 9 different Simons in the NT. This led to its often having some distinctive appellation attached, e.g. Simon 'Zelotes,' Simon 'Peter,' and here Simon

'the Leper.'

The third view is that most generally entertained among Protestant divines, viz. that there were two anointings—one of the feet by the penitent sinner of Galilee, the other of the head and feet by a totally different person, the saintly Mary of Bethany. It has been objected to this that the way in which the latter is described in Jn 112 'Mary was she who anointed the Lord with ointment, and wiped his feet with her hair,' must refer to some previous occurrence; but the object of the evangelist is simply to introduce Mary to his readers by referring to an action which was in itself famous, though it had not been connected with her name in the earlier Gospels. Just in the same way Judas Iscariot is distinguished, in the earliest list of the apostles, by the addition 'which also betrayed him.' There remains the serious objection already stated: Could John have used these words to describe Mary, if he knew that they were equally true of another woman? Could our Lord have promised world-wide fame to her action, if the same thing had been already done by another

in much more trying circumstances?

<sup>\*</sup>The reading of the best MSS, &φ' δς εἰσῆλθον, in Lk 745, seems to contradict the words iσγρεῦς δει κατάκινει in v.37, which imply that it was the knowledge of His being seated at table which led her to seek the house herself. This is an argument in favour of the reading εἰσῆλθον, which is witnessed to by several of the most ancient versions. The reading εἰσῆλθον is perhaps a repetition from v.44.

It appears to the present writer that the easiest way in which we can escape these difficulties is by supposing that the story told by St. Luke cannot, in its original form, have contained any reference to anointing. In that case the final words of v. 38 και ήλειφεν τ $\hat{\psi}$  μύρ $\psi$  and the whole of v.46 must be regarded as later developments. It is easy to understand their being added under the idea that the words recorded by Matthew and Mark, 'wheresoever this gospel is preached in the whole world, there shall also this that she hath done be told for a memorial of her,' required that the act of anointing should appear in each separate Gospel. If we do not feel ourselves at liberty to make such a supposition, we must find some other means of accounting for the high commendation bestowed on Mary. It cannot have been simply for anointon Mary. ing, but for anointing with the precious spikenard in the prospect of the Lord's death. In any case it seems probable that the anointing with the common ointment, of which Luke speaks, was something of an afterthought. It is hardly likely that one in such extreme agitation of mind would have planned such an action beforehand. How could she know that she might not be forestalled by Simon? It will be noticed, too, that the anointing follows, not, as in John, precedes the wiping of the feet with her hair. If the details are correctly given, we may conjecture that she happened to be carrying a flask of myrrh, and, finding that the Lord's feet had been unwashed and left unanointed,

had been seized by a sudden impulse to anoint them.

Prof. W. M. Hamsay \* favours this third view,
but considers that 'the attempts to harmonize John with Mark and Matthew fail completely. John, who says that "they made him a supper there, and Martha served," obviously places the meal in Martha's house: it seems quite absurd to suppose that she would be serving in the house of Simon.' He thinks Mark fell into error from putting together two separate incidents, one of which was connected with the name Bethany, the other with the name Simon; whom he identifies with a 'Simon who lived at Bethany and was or had been a leper.' It does not, however, seem likely that Mark, whose mother was at this time living in Jerusalem, and whose house was a centre of the early disciples, could have been ignorant of the facts connected with the anointing at Bethany. We must therewith the anointing at Bethany. fore accept the fact that it took place in the house of Simon, just as we accept the fact that Martha had the chief ordering of the feast. The two facts are not necessarily opposed. It may be, as Nicephorus says (HE i. 27), that Simon was the factor of Martha though living court from the father of Martha, though living apart from his family. But we need not even suppose any such connexion. John's description, from its vagueness, they made him a feast, rather implies a public entertainment given in His honour by the inhabitants of Bethany, probably in the largest or most convenient house in the village, which might be the property of a leper named Simon. +

The fourth view is that there were three distinct anointings by either two or three distinct persons. This view was first propounded by Origen in order to meet the discrepancies between the account given in John and in the first two Gospels. The latter appear to fix the date of the supper two days (Mt 262, Mk 141), the former six days (Jn 121), before the Passover. The latter represent the ointment as poured upon the head, the former speaks of the feet as anointed and then wiped by Mary with her hair. The latter state that the supper was held in the house of Simon the Leper, the former appears to imply that it was in the

"In the work entitled, Was Christ born at Bethlehem ! p. 91. † Dr. E. A. Abbott suggests that the appellation Λάζαρες may represent laggarda' (לְעְרוּנִץ), 'belonging to the leper.'

house of Martha (this difficulty has been already discussed). Hence it has been supposed that there were two different anointings in the same week; that on each occasion the same objection was made by the bystanders, and the same answer returned by Jesus. Such a repetition, we may at once say, is impossible; but what are we to make of the discrepancies? Shall we say that they are of no importance, and only such as must be expected in different reports made several years after the courrence? We may be quite prepared to allow this; but it appears to be possible to get a little nearer to explaining them, when we observe that the dates given in the different Gospels do not refer directly to the supper. John's 'six days before the passover' is the date on which Jesus parents of Bettern when some the passover is the date on which Jesus came to Bethany, where, as we learn from the other Gospels, He was lodging during the week before the crucifixion.\* On the other hand, the two days of Matthew and Mark refer to the close of His discourses in Jerusalem: 'when he had finished all these words he said to his disciples, Ye know that after two days is the passover.' † Thus both dates may be literally exact, and yet neither may be the precise date of the supper. As to the other discrepancies, it is possible that the narrative in John, which seems to have been edited by the elders of Ephesus (see 21<sup>24</sup>), has been to some extent affected by that in Luke. It is remarkable that the feet are thrice referred to (in 112 123) as if the writer wished to lay stress on this by way of correcting a current misapprehension. Such a correction seems strange to us in the present day, to whom the written Gospels are the ultimate authority; but in the first century the appeal was still to oral tradition, as we may see from the Preface to Luke, and it seems not improbable that the predominant tradition may have laid hold on the anointing of the feet as testifying to a higher degree of humility and reverence than that of the head. If, then, the original narrative of John spoke only in general terms of the anointing of Jesus, we may conceive that the elders might have taken the opportunity to correct what they deemed to be an erroneous report in Mark. Our present feeling would probably be that, where honour is intended by anointing, the head rather than the feet should be anointed. On the other hand, it was natural that the penitent, standing behind the Lord, should wipe away with her hair the tears that fell upon His feet, but less natural that it should be used to wipe away the ointment, which would simply have the effect of anointing her own hair.

her own hair.

It may be interesting to add a brief sketch of the history of opinion on this question. The treatment of Scripture by early Christian writers is, as a rule, uncritical. Difficulties are not felt. They are much more anxious to extract a useful moral from their text by means of some forced allegory, than to ascertain the precise meaning of the words as they were understood by the speaker and hearers, or to get a clear conception of the actual facts referred to. Hence they are often careless of distinctions, and, like children, apt to mistake resemblance for identity. It is only when there is some special call for the attention of the writer, as when he is engaged on a commentary or a harmony of the Gospels, that we can attach much weight to any critical judgment. This is seen in the references to the present question. Clement of Alexandria speaks of the woman who was still a sinner bringing the alabaster box of ointment, which she thought the bost of her possessions, to anoint the feet of the Lord, and then wiping away with her hair the superfluous ointment, whilst she poured on His feet the libation of her tears. These things, he says,

<sup>\*</sup> Mt 217, Mk 11.11, Lk 2137.
† There is no reason to suppose that the date given in Mk 141 extends to the following verses. The phrase καὶ ἐντα κότοῦ of the third verse is well explained by Dr. Abbott as meaning, 'And here let me state something which happened while Jesus was still in Bothany, which should be mentioned here to prepare the reader for the betrayal which follows.' So in Mk 1468 καὶ ἐντας means, 'And here let me say that Peter had been some time ago in the court exposed to temptation, and this must be mentioned here, because now comes his fall.'

symbolize both the preaching of the gospel and the passion of the Lord (Pæd. if. 61, p. 205). Tertullian more distinctly identifies the two anointings in the words, 'Peccatrici femine etiam corporis sui contactum permittit, lavanti lacrimis pedes ejus et crinibus detergenti et unguento sepulturam pisus inauguranti' (Pudic. xi.). On the other hand, Tatian, towards the end of the 2nd cent., in his Diatessaron,\* which was for many years the only form of the Gospel known in Mesopotamia, separates the story in Lk from that in the other evangelists, and shows that he distinguishes the sinner from Mary by placing the visit to Martha and Mary before the anointing. Victor of Capua, who published a Latin revised version of the Diatessaron some 300 years later, mixed up Luke's anointing with that which took place at Bethany, to suit the view which had then become popular in the Western Church.† Origen is the first distinctly to grapple with the difficulties of the question. In his commentary on Mt (§ 77), after stating the points of agreement in the four accounts, he proceeds to argue against the prevailing view that the actor was in every case the same, on the ground (1) that according to Matthew and Mark it was the head of Jesus which was anointed with precious ointment, while, according to the other exampetitat, illis feet were anointed with myrrh(!); (2) that it is incredible that Mary the sister of Martha, who chose the better part and was beloved by Jesus, could be spoken of as a sinner; (3) that the sinner in Luke does not venture to approach the head of Jesus, but waters His feet with penitential tears, whereas there are no tears and no sinner in John. He then goes on to say that some will perhaps argue that the actor in each Gospel is different; but he thinks it enough to distinguish three different actors; and he adds further reasons for holding that the nameless woman in the first two Gospels is not the same as the sister of Martha, the supper being at a different time and a different place. He meets the object strangely enough, he holds that one of these is narrated only by John, the other by the three Synoptists. Accordingly, he considers that the indignation of the disciples and the comforting words of the Lord have reference to the κόρνη μυνή of Luke, who is encouraged to come to Jesus by the thought that he did not disdain to eat in the house of a leper (Comm. in Matt. 80). In his 62nd homily on John he says that the sister of Martha is not ή κόρνη ή is τῶ Μανθωίρ εὐδὶ ἡ is τῷ Λουπῶ. . . intivat μὶν γῶρ κόρνω . . . κολλῶν γίμωσω κακῶν κόνω λωτ εἰκικα μὰν γῶρ κόρνω . . . κολλῶν γίμωσω κακῶν κόνω λωτ εἰκικα μὰν γῶρ κόρνω . . . κολλῶν γίμωσω κακῶν κόνω λωτ εἰκικα μὰν γῶρ κόρνω . . . κολλῶν γίμωσω κακῶν κόνω λωτ εἰκικα μὰν γῶρ κόρνω . . . κολλῶν γίμωσω κακῶν κόνω λωτ εἰκικα μὰν γῶρ κόρνω . . . κολλῶν γίμωσω κακῶν κόνω το medie σε see, ne sibl contrarium evangelistse dixisse videantur: potest etlam quæstio meriti temporis diversitate dissolvi, ut adhuc lila peccatrix sit, Jam ista perfectior. So Augustine, speaking of the anointing in Matthew (de Cons. Ευανης. 2. 164), says, 'Lucas aquamvis simile factum commemoret, nomenque conveniat ejus apud quem convivabatur dominus . . . tamen potius credibile set alium tuisse illum Simonem, non leprosum in cujus domo hoc in Bethania gerebatur. Nam nec Lucas in Bethania rem gestam dicit. . . Nihii itaque aliud intellegendum arbitror nisi non quidem aliam fuisse mulierem que peccatrix tunc accessit ad pedes Jesu et osculata est et lavit lacrimis . . sed eandem Mariam bis hoc fecisse '(so too Tract. in Joh. 49). Jerome, on the other hand, distinguishes between the two women (Comm. in Matt. 203), 'Nemo putet eandem esse quæ super caput effudit unguentum et quæ super pedes. Illa enim et lacrimis lavat et crinibus tergit et manifesto meretrix appellatur. De hac autem nihil tale scriptum est.' Gregory the Great finally decided the question for the Latin Church by identifying the peccatrix first with the sister of Martha, and then with the Magdalene § (Hom. 33 in Evany.), 'hanc, quam L

\* See the translation in vol. of Ante-Nicene Library pub. 1897, and Hemphill's Diatessaron, 1888, also Lightfoot on Supernatural Religion, Essay ix., and articles on Tatian and Victor of Capus in Dict. Christian Biography.

† This version by Victor is wrongly described by Faillon and Migne (Patrologia, vol. 64) as the Diatessaron of Ammonius.

† But John speaks of \*\*ρδσ\* ανετική, and the word μύρεν seems to be used generally of any sort of ointment.

§ On this identification see No. v. below.

unicam Magdalenam in suo officio asserentis,' and that he deprived the Church of her chief type of the penitent sinner; also that there would be no certain truth, if each, at his own caprice, might reject accepted tradition. Later Roman Catholics, however, have not been unanimous: Estius, Tillemont, and others denying the identity, while Maldonatus,' Lamy,' and the Bollandists' have argued with reason and moderation in its favour. Indeed, the reaction against the old view prevailed more in France than in England, going so far that, in a whole series of dioceses with Paris at their head, new editions of the Breviary were issued in the 17th cent. without those portions of the office of St. Mary Magdalene which referred to Lk 7 and to the sister of Lazarus, Dupin, Mabillon, Bossuet, and Fleury are mentioned as favouring the newer view.

Mabilion, Bossuet, and Fleury are mentioned as favouring the newer view.

Meanwhile the Menology of the Greek Church assigns three distinct days for celebrating the memory of the sister of Martha, the Magdalene, and the Δμαρταλέι. And Theophylact, writing in the 11th cent., says in his comment on Mt 26 that some hold that there were three, others that there were two only, who anointed the Lord; that Simon the leper was father of Lazarus, and that he is the man who showed the disciples a room ready furnished for the last supper. In his commentary on Mk 14 and Lk 7 he declares himself in favour of the view that there were three anointings—one by the νέρνη of Lk, one by the sister of Lazarus six days before the passover, one in the house of Simon the leper two days before the passover. It has been already stated that the view most commonly entertained in the Reformed Churches has been that the sinner of Lk is distinct from the sister of Lazarus, and both distinct from the Magdalene. The two former are, however, confused by Grotius and by many of the recent German theologians, as Schleiermacher, Ewald, Bleek, Baur, Hilgenfeld, Weisse, Keim, as well as by the orthodox Hengstenberg. In the Anglican Church the medisval view was followed by Bishop Andrews, who speaks of 'Mary Magdalene anointing Christ three several times one after the other,' and being permitted to see two angels, one at the head the other at the feet where the body of Jesus had lain, because she had herself anointed His feet; by Donne, who identifies the sister of Lazarus with the Magdalene (Sermons, 25 and 80); by Jer. Taylor (iii. 248, Heb.), 'Mary Magdalene having been reproved ontment on His sacred head'; and in late years by Dr. Pusey.||

Having thus examined the general question of

Having thus examined the general question of the anointings of Jesus, it remains for us to consider more particularly the motive ascribed by our Lord Himself for the anointing by the sister of Lazarus. This is given with slight variations: in Mt 26<sup>12</sup> 'In that she poured this ointment on my body, she did it to prepare me for burial' (προς το ένταφιάσαι με), Mk 148 'She hath done what she could: she hath anointed my body aforehand for the burying' (προέλαβεν μυρίσαι το σωμά μου είς τον ένταφιασμόν); Jn 12' 'Suffer her to keep it against the day of my burying, or (marg.) Let her alone: it was that she might keep it (does αὐτὴν ¶ tνα els 1t was that she might keep to layer arrive in the entry ημέραν τοῦ ἐνταφιασμοῦ μου τηρήση αὐτό; several MSS, including A, read τετήρηκεν, omitting tval. The meaning of the word ἐνταφιασμός is explained in Jn 19<sup>59, 40</sup>, where we are told that Nicodemus brought a mixture of myrrh and aloes about 100 and weight and wound the kedy in lines clothed. pound weight, and wound the body in linen cloths with the spices, as the manner of the Jews is to bury' (ἐνταφιάζειν). The general sense seems to be given most simply in Mark's words. 'She hath done what she could' is an answer to the assertion that she ought to have spent her money otherwise, viz. in distributing to the poor. We are wise, viz. in distributing to the poor. We are to understand, apparently, that this was not the work for which she was fitted: she probably did not possess the practical business habits which would enable her to decide as to the best way of helping the poor. But wisdom is justified of all her children. What she had, what the grace of

§ See his sermon on 'Our Risen Lord's Love for Penitents,'
in which he refers to his note at the end of Sermons preached
at St. Saviour's proving the identity of the sister of Martha,
the penitent who anointed the Lord's feet, and St. Mary
Magdalene.
¶ Dr. E. A. Abbott suggests that n may have been lost after
airn, and that the words are a reproach to Judas, 'or is it
your wish that she should keep it for my embalming?' i.s. 'do
you grudge it the living, that she may bestow it on the dead?'

God working in her enabled her to do, was to call forth generous emotion in others by being herself an example of the highest and noblest of all emotions, the impassioned devotion of a pure and loving heart to Him who is absolute Purity and Love. The genuine simplicity of a beautiful soul, however liable to misconception for the moment, yet in the end appeals more strongly to what is best in man, and is at the same time a more acceptable offering to God than any outward manifestation of human activity, however useful or charitable.

Then how are we to understand what follows: 'she hath anointed my body aforetime for the burying'? From the phrase in Jn, 'suffer her to keep it, we gather that the spikenard had not been bought on purpose, but was applied to this use after being some time in her possession. Some have supposed that she had bought it for her personal adornment, but such a supposition is unworthy of Mary; and as our Lord associates it with the thought of death, it seems more probable that it had been purchased for the burial of her brother, and perhaps left unused from some faint hope that the coming of Christ might still render such a use superfluous. Compare Martha's words, 'Even now I know that whatsoever thou shalt ask of God, God will give it thee.' Destined for the tomb, the precious ointment now becomes a thankoffering to Him who called Lazarus from the tomb; but it is only in anticipation—was this Mary's own foreboding, or did she learn it first from the Lord?—of a mightier death to come. The words in Jn must, we think, be taken to mean, 'Allow her to have kept it for my burial,' i.e. 'do not find fault with her for doing so.'

History tells us nothing more of Mary. Her name is not mentioned among the women who were present at the crucifixion, or who brought spices to lay in the grave. This strange silence was, no doubt, one of the reasons for identifying her with the Magdalene. It seemed so natural that she who had been specially honoured and beloved by the Lord, who had been conspicuous beyond all others in doing honour to Him during His life, should have been also the last to watch by His cross and the first to whom He would appear on His resurrection. A late legend reports that Lazarus with his two sisters and Maximin, one of the Seventy, fled from Palestine in the persecution described in Ae 8 and took refuge in Massilia, and that Mary (confounded with the Magdalene) retired to a cave near Arles and died there.

LITERATURE.—In addition to the books mentioned in the course of this article, see Abbé Faillon's Monuments inédits sur l'Apostolat de S. Marie Madeleine en Provence, 2 vols. 4to, 1859.

v. MARY MAGDALENE (ἡ Μαγδαληνή) is probably named from the town of Magdala or Magdala (wh. see), now Medjdel, which is said to mean 'a tower.' It was situated at a short distance from Tiberias, and is mentioned (Mt 15<sup>39</sup>) in connexion with the miracle of the seven loaves. An ancient watchtower still marks the site. According to Jewish authorities it was famous for its wealth, and for the moral corruption of its inhabitants (Edersheim, vol. i. p. 571). Lightfoot (Hor. Heb. on Mt 27<sup>80</sup>), following some of the rabbinical writers, gives a different derivation, according to which the name would mean a plaiter of hair, a phrase sometimes used of a woman of light character.

The first notice we have of the Magdalene is in I.k 82, where we read that certain women which had been healed of evil spirits and infirmities accompanied Jesus and the Twelve in their missionary journeys, and ministered to them of their substance. Among these are mentioned 'Mary that was called Magdalene, from whom seven

demons had gone out (cf. 'Mk' 16°), and Joanna the wife of Chuza, Herod's steward, and Susanna.'

The question has been raised whether this possession implies moral as well as physical dis-Those who affirm this have ease or infirmity. Those who affirm this have found in it a ground for upholding the identity of the Magdalene with the 'sinner' of Luke. Others hold that the phrase implies nothing more than that 'the wretchedness of despair, the divided consciousness, the preternatural frenzy, the longcontinued fits of silence, which we read of in other demoniacs, were exhibited here in their most aggravated form; that such a state is 'all but absolutely incompatible with the life implied in αμαρτωλός, and that to speak of 'seven demons' as equivalent to 'many sins' is 'to identify two things which are separated in the whole tenor of But surely this is going too far. We are told But surely this is going too far. We are told of some who were 'vexed with unclean spirits,' and the parable speaks of an 'unclean spirit' taking with him 'seven other spirits more wicked than himself' and dwelling within a man. It would seem, therefore, that wickedness may be a sign or effect of possession. But this possibility goes a very little way towards proving what is wanted. If St. Luke knew that the Magdalene of ch. 8 was the same as the sinner of ch. 7, would he not have given some hint to this effect? Should we not have been told before, that the sinner had been under a Satanic influence, and had been delivered from this by the Saviour previously to her entrance into Simon's house? Then is it likely that she who had been known as the 'sinner' would have been allowed to accompany the Lord and His disciples in their journeys? Would this have been in accordance with the oftrepeated principle that we have to 'provide things honest, not only in the sight of God, but also of men'? Would it not have been putting an additional stumbling-block in the way of the weak, if one of notorious character were known to be habitually in the company of the new Prophet? There would seem to be at least as much ground for the identification of the Magdalene with the daughter of the Syro-phænician woman, proposed by Nicephorus (HE i. 33).

No further mention of the Magdalene is made till the crucifixion, where she appears with the other women who had accompanied Jesus from Galilee. See above under 'Mary the mother of Galilee. James.' We confine ourselves here to her experience, apart from the others, which is recorded by John alone, excepting for the brief note in 'Mark' 16º 'He appeared first to Mary Magdalene.' we are to reconcile this account with what we read in the other Gospels, it would seem from a comparison of all the accounts that, after setting out for the tomb with the other women, she must have hurried on, found the stone rolled away, and hastened at once to tell Peter and John. returns with them, and waits outside after they have gone (Jn 2011). While weeping there, she stoops and looks into the tomb, and sees two angels sitting, one at the head and the other at the feet, where the body of Jesus had lain. To their question, 'Why weepest thou?' she repeats what she had said to Peter and John, 'They have taken away my Lord, and I know not where they have laid him.' Turning round, she sees behind her one whom she supposes to be the gardener, who also asks, 'Why weepest thou?' Whom seekest thou?' In answer, she begs him, if it is he who has borne Him hence, to tell her where He was laid, that she might take Him away. 'The one thought that fills her mind is still that . . . she has been robbed of that task of reverential love on

\* E. H. Plumptre in Smith's DB.

which she had set her heart. The utter stupor of grief is shown in her want of power to recognize at first either the voice or the form of the Lord. . . . At last her own name uttered by that voice, as she had heard it uttered, it may be, in the hour of her deepest misery, recalls her to consciousness; and then follows the cry of recognition, and the rush forward to cling to His feet. The title *Rabboni*, however, by which she addresses the risen Saviour, falls very far short of the address of Thomas, and shows that she had not yet realized the change which had come over her relation to Him, whom she had known as her earthly master and teacher. And therefore the first lesson which she receives is a warning against supposing that the familiarities of earth are any longer possible. A higher and closer communion will be open to her when He has ascended to the Father, but it will be that of spirit with spirit. She must cease to clasp His feet, must rise and carry to the disciples His message, 'I ascend to my Father and your Father, to my God and your God.'

This is all that the Bible tells us of the Mag-

dalene. Before going on to inquire what has been built up on this foundation by the later legends, it may be well to consider whether the facts as given above lend any probability to the mediæval belief that she was the same as the sinful woman or the sister of Lazarus. It may be granted that something of the same type of character is visible in them all. All show an impassioned devotion, a generosity of feeling, which lifts them far out of the common groove. But may it not be far out of the common groove. But may it not be said that this is partly a national trait, Jewish history abounding in high deeds of female heroism, and is partly due to the overpowering spiritual influences of the time? Anyhow, the similarity was sufficient to suggest to the interested hearer or reader of the three stories, whose imagination was already at work to fill in the picture from the slight outline given in each ease, that this result might be most easily each case, that this result might be most easily obtained by combining them into one. She who had been possessed by seven demons and came from Magdala must have been a sinner: she brought spices to the tomb, she clasped the Lord's feet, she was the most faithful and loving of all the women that followed Him from Galilee: must it not have been she who anointed His feet during His life, and whose faith and love had been specially commended by Him? And the same would apply to Mary of Bethany. She, too, ministered to Jesus of her substance, she fell at His feet, she anointed Him beforehand for His burial, she, too, was loving and beloved—she cannot have deserted her Lord in His last struggle, she cannot have left it to others to pay Him the last token of respect. It is she, and not another, who performed these pious offices under the name of Mary Magdalene. Yet the improbability is even greater on the other side. We have seen this already in the case of the sinful woman, and it is equally impossible that John should either have been ignorant of the identity of Mary of Bethany and the Magdalene, or knowing it should have given no hint of it to the reader. Nor can it be said that the characters are quite the same. The Magdalene could not be selected as a type of contemplation like the sister of Martha; and we can hardly believe that the latter, who had so lately witnessed the triumph over death in the raising of her brother, could have been so slow to believe in the rising again of Him whom she knew to be the Resurrection and the Life.

It may seem strange that while the general tendency was to combine the three of whom we have spoken into one, others were led to make two

\* E. II. Plumptre in Smith's DB.

different Magdalenes, owing to the difficulty of reconciling the narratives of the crucifixion. Eusebius (ad Marinum, ii. 7) says there may have been two Marys, each belonging to Magdala, one of whom is the subject of Matthew's narrative, the other of John's. The first goes to the tomb with the other Mary; they see the angel sitting on the stone; they receive his message for the disciples, and depart quickly in fear and great joy. As they are on their way Jesus meets them, and they come and hold Him by the feet, and worship Him. The second goes alone to the sepulchre, stands weeping outside, is forbidden to touch the feet of Jesus when He appears to her. Some identified the former, the rejoicing Magdalene, with the sister of Martha; the latter, the weeping Magdalene, with the sinner.

Nothing is really known to us of the subsequent history of the Magdalene. The Greek Church believed that she died at Ephesus, whither she had followed St. John, and that her relies were removed from thence to Constantinople by the Emperor Leo vi. The story, however, which took root in the West was very different. It was said that she belonged to a wealthy family possessed of great estates at Magdala and Bethany; that she abused all her admirable gifts to tempt others to sin: that after the Ascension she remained at Bethany till the disciples were scattered by the persecution which followed the martyrdom of Stephen. The two sisters and others were placed in a boat by their persecutors, and were providentially carried without oars or sails to Massilia, where, by their preaching and miracles, they converted the heathen, and Lazarus was made bishop, while Mary retired to the wilderness and lived a life of extreme asceticism for thirty years. Finally, she was carried up to heaven in the arms of

ascending angels.

Apparently the earliest document which gives the legend is the *Life* by Rabanus Maurus, a pupil of Alcuin, who flourished at the beginning of the 9th cent. This was greatly amplified by Vincent of Beauvais in the 13th cent. The story was not known to Gregory the Great, or to Gregory of Tours in the 6th cent., as he mentions the death of the Magdalene at Ephesus (Mirac. i. 30), nor, if we may believe Launoi, t is there any allusion to it in the writings of Bernard or Peter of Cluny or Peter Damianus, all of whom took the Cluny or Peter Damianus, all of whom took the Magdalene as the subject of panegyric. It is treated as unworthy of examination by the Bollandists, and is probably due to misapprehension arising from the great place occupied in the traditions of Provence by Marius, who defeated the Ambrons and Teutons in the battle of Aix, B.C. 102. Marius was accompanied, as we learn from Plutarch, by a Syrian prophetess of the name of Martha and it is suggested by Baring-Could of Martha, and it is suggested by Baring-Gould, after Gilles, that the connexion of these two names may have been the starting-point of the whole legend. At Les Baux, where Marius was encamped, there are some ancient sculptures on a limestone block, one, known as the Trémaié, containing three standing figures, which tradition holds to be the three Marys, but Gilles is of opinion that they represent Marius with his wife Julia and the prophetess Martha. The *Trois Maries* here are said to be Martha with her attendant Marcella and the Magdalene. It is curious that at another Trois Maries in the Camargue, the landing-place, according to the legend, of the whole party from Palestine, the three Marys are said to be the mother of James, Salome, and the attendant Sara. As there is really only one or, at most, two Marys

<sup>\*</sup> Modestus ap. Phot. cod. 275, speaks of her as  $\pi a \rho \theta i m a$  dia  $\beta i m$ , and says she has martyred at Ephesus. † See Faillon, i. 1368.

in either case, we naturally ask how the number three came in, and it may not be irrelevant to remember that the famous Fossæ Marianæ from Arles to Massilia were constructed by Marius in his third consulship, while he was preparing for his campaign against the Ambrons, and would no doubt be commemorated by inscriptions which might run something as follows: C. Marius C. F. cos III. fossas faciendas curavit; and these, as they got defaced with age, might easily be supposed to bear witness to *Trois Maries*. The tradition had pretty well established itself by the 11th cent., though it was a matter of hot dispute whether Aix or Vezelay possessed the true relics of the Magdalene. Fortunately, in 1279 Charles the mephew of Louis IX. (who had himself made a pilgrimage to her cell at St. Baume) discovered her body in St. Maximin's Church at Aix, and since then the cult of the Magdalene has had hardly less vogue than that of the Virgin. The romantic character of her story and the feeling of a common frailty endeared her to all classes, and even reformers were loth to disturb a belief which on the whole worked for good. For an account of her place in art the reader is referred to Mrs. Jameson's Sacred and Legendary Art, vol. ii. p. 343 ff.

LITERATURE.—Acta Sanctorum for July 22; Faillon, Monuments infdits sur l'Apostolat de S. Marie Madeleine, 1859; Gilles, Campagne de Marius dans la Gaule, 1870; Baring-Gould, In Troubadour Land, p. 130 ff.

vi. MARY THE MOTHER OF MARK.—The only place in which she appears in the NT is Ac 1212, where we read that many were gathered together and praying in her house when Peter knocked at the door after his escape from prison. As Mark is called cousin  $(d\nu\epsilon\psi\iota\delta s)$  of Barnabas (Col  $4^{10}$ ), she would be aunt of the latter. Later writers believed that her house was situated on Mt. Zion, and that it was the place of meeting for the disciples from the Ascension to the day of Pentecost. It was said to have escaped the destruction of the city by Titus, and to have been used as a church at a later period (Epiphanius, de Pond. et Mens. c. 14; Cyril Jerus. Catech. 16).

vii. MARY SALUTED BY ST. PAUL.-Nothing is known of her except that her name appears after Priscilla, Aquila, and Epænetus in the list of 24 persons to whom St. Paul sends greetings in the 16th chapter of the Epistle to the Romans. She, like the other women (Tryphæna, Tryphosa, and Persis) mentioned in v. 12, is said to have 'laboured much' for the Church, and may possibly have held the position of deaconess or 'widow' at Rome. viii. See next article. J. B. MAYOR.

MARY (THE VIRGIN). - This subject may be considered under four heads: (A) the story of her life as it is given (1) in the NT, (2) in the Apocryphal Gospels and elsewhere; (B) the history of

opinion respecting her; (C) her place in Liturgiology; (D) her place in Art.

A. 1. What we are told in the Bible about Mary falls naturally into two portions—that which pre-cedes, and that which follows the baptism of our Lord. (a) All that we know of the former is included in the earlier chapters of St. Matthew and St. Luke. These agree in the main facts, that Jesus was 'conceived of the Holy Ghost, born of the Virgin Mary,' that His mother was espoused to Joseph, that the birth took place at Bethlehem towards the end of the reign of Herod the Great, that Nazareth was the subsequent home of the Holy Family, that previous intimation of the supernatural birth had been given through the instrumentality of angels, that Jesus was descended from David, as shown in the appended genealogies.
To these facts St. Matthew adds that the marriage

of Joseph and Mary was carried out after the doubts of the former had been set at rest by an angelic vision; that wise men from the East, under the guidance of a star, came to offer their gifts at the cradle of the infant Saviour; that the children at Bethlehem were massacred owing to Herod's jealousy, Jesus and His parents having previously taken refuge in Egypt, from whence they returned on the death of Herod, and settled at Nazareth in consequence of a divine warning. St. Luke adds the story of the birth of John, the Forerunner; the statement that Mary was already living at Nazareth when the angel Gabriel announced to her that she should be the mother of the Messiah; the visit of Mary to her cousin Elisabeth, and her reception by the latter as the destined mother of the Lord; Mary's song of praise; the journey of Joseph and Mary to Bethlehem to be enrolled there as belonging to the family of David; the birth in the stable; the announcement to the shepherds; the circumcision; the purification in the temple; the blossing of Simeon and Anna; the return to Nazareth; the visit to the temple when Jesus was twelve years old; His questioning of the doctors; His answer to Mary's complaint ('Son, why hast thou thus dealt with us? behold, thy father and I have sought thee sorrowing'), in the words, 'How is it that ye sought me? Wist ye not that I must be in my Father's house?' and lastly, the general statement as to the Son's humility and the thought-

ful pondering of the mother.\*

It is a significant fact that the story of the Infancy is confined to these two Gospels. We may explain its omission in the Fourth Gospel by the consideration that this, being evidently supplementary to the others, often omits details which were assumed to be already familiar to the reader. But in the case of St. Mark we are forced to the conclusion, either that he was unacquainted with the details of our Lord's life previous to the preaching of John, or that, knowing them, he did not regard them as an essential part of the Gospel message. The general impression left by all the Gospels certainly is that during our Lord's life the secret of His miraculous birth had been communicated to very few. read in Mt 13° 'Is not this the carpenter's son?' Lk 4° 'Is not this Joseph's son?' Jn 64° 'Is not this Jesus the son of Joseph, whose father and mother we know?' And so in Jn 146 Philip says to Nathanael, 'We have found him of whom Moses in the law and the prophets did write, Jesus of Nazareth, the son of Joseph'; and both the genealogies of our Lord are traced to David through Joseph 'the son of David.' + Nor have we any evidence that the mysterious truth was generally known during the apostolic age. No allusion is made to it in the Acts or the Epistles, and the 'woman clothed with the sun' in Rev 12, though interpreted by some of the Virgin, is plainly intended to symbolize the Church. St. Paul, St.

intended to symbolize the Church. St. Paul, St.

\* Resch thinks (Kindheitsevangelium, Leipzig, 1895) that both evangelists borrowed from the same source, the Bisham printers I free X pare we may suppose to have been published after the Virgin's death, about A.D. 60. He accounts for the differences between them by supposing that St. Luke purposely omitted those incidents which had been already selected by St. Matthew as showing the fulfillment of Hebrew prophecy, while he preferred himself to dwell on that part of the story which possessed the widest human interest. Prof. W. M. Ramsay, on the other hand, thinks that Luke's account is directly due to Mary herself (Was Christ born at Bethlehem I pp. 73-88).

† Mt 120.

† It is true that Gal 44 'When the fulness of time was come God sent forth his Son, made of a woman, made under the law, to redeem them that were under the law, has been cited as such an allusion; but the phrase there used printings from the promise of Gn 316.

Peter, and St. John are alike emphatic in insisting on the fact of the Incarnation as the central truth of the Christian religion, and alike silent as to the way in which it was brought about.

The ancient Syriac Gospel discovered at Mt. The ancient Syriac Gospel discovered at Mt. Sinai, and published in 1894, of which a translation was published by Mrs. Lewis in 1896, has some remarkable variants in Mt 1<sup>16x</sup>. It runs thus: 'Jacob begat Joseph; Joseph, to whom was betrothed Mary the Virgin, begat Jesus who is called Christ'; again in v.<sup>21</sup> the reading is 'she shall bear to thee a son'; and in v.<sup>22</sup> 'she bore to him a son.' The publication gave rise to much discussion in the Academy\* and elsewhere: among other theories it was suggested that this might be an Ebionite revision of our Gospel: but this seemed an Ebionite revision of our Gospel; but this seemed inconsistent with the word 'Virgin' which appears in v. 16, as well as with vv. 18-20. Others supposed that the Syriac version represents an earlier form of the genealogy, which may have been taken from a Jewish register and incorporated in the Gospel. This view received a certain amount of support from some of the old Latin versions, which have Joseph cui desponsata virgo Maria genuit Jesum, where the use of genuit instead of peperit has been thought to betoken an earlier form, in which desponsata was followed by erat. † See, further, art. JESUS CHRIST in vol. ii. p. 644.

However this may be, there can be no doubt that the miraculous conception was denied by several of the early heretics, who either maintained (with Cerinthus) the naturalistic birth of the Lord. followed by the bestowal of supernatural powers through the descent of the Spirit at His baptism, or held (with Marcion) that He was without earthly parentage, but descended from heaven in the 15th year of Tiberius and showed Himself in the syna-

gogue of Capernaum.

On the other hand, stress is laid on the supernatural birth of the Lord by Ignatius, who in opposing the phantom theory of the Docetæ uses such phrases as και έκ Maplas και έκ θεοῦ, Ερρί. 7; ὁ γὰρ θεὸς ἡμῶν Ἰησοῦς Χριστὸς έκυοφορήθη ὑπὸ Maplas κατ' οἰκονομίαν έκ σπέρματος μέν Δαυείδ πνεύματος δε άγιου, ib. 18; έλαθεν τον άρχοντα τοῦ alŵvos τούτου ή παρθενία Maplas και ο τοκετός αὐτης, ομοίως και ο θάνατος τοῦ Κυρίου, ib. 19: these, he says, are τρία μυστήρια κραυγής, three mysteries wrought in the silence of God,

though destined to be proclaimed aloud. ‡

(b) Proceeding now to the second part of Mary's life, we find her, after the death of her husband (who is introduced for the last time in the visit to the temple), residing, as it would seem, with the Lord and His brethren [see Brethren of the Lord], partly at Nazareth (Mk 6<sup>1st</sup>, Lk 4<sup>16</sup>, Jn 1<sup>45</sup> 19<sup>19</sup>) and partly at Capernaum (Mt 4<sup>18</sup> 9<sup>1</sup>, Mk 2<sup>1</sup>, Jn 2<sup>13</sup>). We are not told that she accompanied our Lord in His missionary journeys, like Mary Magdalene and Susanna (Mk 15<sup>40</sup>, Lk 8<sup>8</sup>). The first mention of her in this period is at the marriage at Cana in Galilee (Jn 2), where her direction to the servants, 'What-soever he saith unto you, do it,' seems to show that her relation to the bridegroom was such as to justify the exercise of authority on her part. Her previous appeal to her Son to provide for the deficiency of wine had drawn forth from Him the same sort of correction as her complaint at His disappearance on the occasion of the visit to the temple, rl euol kal σοl, γύναι; 'Woman, what hast thou to do with me?'
Though there was nothing of harshness in the

others in the Academy for 1894 and 1895; also Blass, Philology of the Gospele, p. 86 f.

† The verse occurs in 'a (recently discovered) fragment of the oldest known MS of any part of the NT, which has just been edited by Messrs. Grenfell and Hunt in the 1st part of the Oxyrhynchus Papiri. It appears there in its ordinary form, 'land's di syrvens' in the 1st part of the Arphiase Kpieris.

1 Rase Libertook Longitus vol ii p. 78.

Atyémeres Xpierés. ‡ See Lightfoot, Ignatius, vol. ii. p. 76.

appellation γύναι, as we may see from its use in the last tender commendation of His mother to the beloved disciple (Jn 1928), yet the choice of a word applying alike to all women is not without its significance, and the clause which follows undoubtedly contains a warning that it was not for her or for any human being to determine His course of action.\* The next mention of Mary is in Mk 3<sup>20-27</sup>, where we are told that the people pressed upon Jesus to such an extent that He had not even time to eat; and that His friends hearing this, 'went out to lay hold on him: for they said, He is beside himself.' Accordingly in the 31st verse we read that 'his mother and brethren came where he was, and, standing without, sent unto him, calling him. . . . And they say unto him, Behold, thy mother and thy brethren without seek And he answereth them, and saith, for thee. Who is my mother and my brethren? And looking round on them which sat round about him (in Mt 12<sup>49</sup> 'stretching forth his hand towards his disciples'), he saith, Behold my mother and my brethren? brethren! For whoseever shall do the will of God, the same is my brother, and sister, and mother.' Here, too, the same lesson is taught, viz. that the knowledge of Christ after the flesh conveys no special privilege, no right of interference or control, not even any exclusive or peculiar blessedness, for in Lk 1127 the exclamation, Blessed is the womb that bare thee, and the paps which thou didst suck,' calls forth the correction that His mother's true blessedness consisted, not in the fact of a physical connexion, but in those moral and spiritual qualifications which were open to all, 'Yea, rather (μενοῦν),† blessed are they that hear the word of God and keep it.' The next occasion on which we meet with Mary is at the foot of the Cross. She had come up with other women from Galilee to be present at the passover. As she stood watching the dying agony of her Son, she received His latest charge, entrusting her to the guardianship of the beloved disciple, who from that hour took her to his own home (Jn 1926). The only remaining notice of her in the NT is contained in Ac 114, where she is mentioned as continuing in prayer and supplication with the apostles and the other women and the brethren of the Lord.

2. The brief but exquisite sketch of our Lord's early years contained in the NT provided a natural stimulant to imagination and curiosity, and the craving for further particulars was supplied by the writers of the Apocryphal Gospels, sometimes with the ulterior aim of magnifying asceticism or incul-cating some special doctrine of their own. Hence in the Apostolic Constitutions (vi. 16) these works are spoken of as 'poisonous apocryphal books in which the wicked heretics reproach the creation, marriage, the providential government of the world, etc. Their popularity, however, was so great, that Catholic writers found it necessary either to imitate or to revise them. We will give here a general sketch of the further story of the Infancy, derived from a comparison of these apocryphal sources, disregarding minor discrepancies.

\* Blass (i.e. p. 238) quotes Nonnus' paraphrase vi iusi, yivai, vivai, v

The first development is concerned with the period preceding the betrothal of Mary. parents are said to have been Joachim of Nazareth and Anna of Bethlehem, both of the family of David. When they had been married twenty years without children, Joachim, going up to make his offering at the temple, was repelled as coming under the curse pronounced in Scripture against those who had not raised up seed to Israel. Being ashamed to return home, he retired to the wilderness and fasted there forty days, and received an assurance that a child should be born to him. Meanwhile his wife was bewailing her barrenness and her husband's descrition, envying even the sparrows which had their nest in her garden. An angel comforted her by the news that Joachim was returning, and that she should bear him a child, whom she at once vowed to dedicate to the service of the temple. At the age of three, the child of promise was accordingly taken by her parents to the temple, where she charmed all the beholders by dancing on the steps of the altar. She remained in the temple, ministered to by angels, till she had completed her twelfth year, when the high priest was directed to summon all the widowers of Israel to bring each his rod to present before the altar, in order that it might be made known by a miraculous sign to whose care the Virgin was to be committed. When Joseph's rod was returned to him, a dove issued from it and hovered over his head: to him therefore Mary was entrusted in spite of his protests. Seven virgins were appointed to be her companions, and to work with her at a new veil for the temple, while Joseph left his home to follow his calling as a shipwright. One day Mary, going out to draw water, heard a voice saying, 'Hail! thou that art highly favoured.' Being alarmed at seeing no one, she left her vessel and returned to work at the veil, when an angel appeared and addressed her in the words, 'fear not, Mary, thou hast found favour with God by thy vow of chastity, and shalt conceive by His word. . . . A virgin thou shalt conceive, a virgin bring forth, a virgin rear thy Son.' Shortly afterwards Mary appeared before the high priest with the veil, and received his blessing. Then come the visit to Elisabeth, the return home, the meeting with Joseph, the quieting of his suspicions by a vision, a summons from the priests, directing both Mary and Joseph to attend at the temple and reply to the charge brought against them; the proof of their innocence by the ordeal of the water of bitterness (Nu 518).

In the apocryphal account of the visit to Bethlehem the following points are noticeable. Mary rides on an ass, and is accompanied by Joseph and two of his sons; as they approach Bethlehem they stop before a cave,\* into which Joseph carried her. As soon as she entered it the darkness was lit up by a glory brighter than the sun, which continued as long as she remained there. Meanwhile Joseph had gone to seek for a midwife. As he went, he looked up and saw all movement brought to a sudden pause, both in heaven and earth. the pause was over, he beheld a woman coming down from the mountain, who told him she was a midwife, and went with him to the cave, on which a bright cloud was resting. Going in they found Mary with her Child at her breast, but no other sign of her delivery. Salome, who had followed them, would not believe in the miraculous birth without further examination,+

\* The tradition of the cave is found in some of the earliest Christian writers, e.g. Justin, Dial. 78; Orig. c. Cels. i. 51. It is supposed to have been derived from Is 8316 ever lawfor is induced by the control of t

and was punished for her impiety by the withering of her hand, which was, however, restored on her repentance. On the third day after the birth, Mary moved from the cave to a stable, and placed the Child in a manger, where the ox and the ass worshipped Him, thus fulfilling the word of the prophet, 'the ox knoweth his owner, and the ass

his master's crib. The adoration of the Magi and the subsequent massacre of the Innocents are taken with little alteration from the Bible. But many fanciful alteration from the Bible. additions are made in narrating the journey to Egypt. Wild beasts play around the infant Saviour; trees bend down their branches to offer their fruit to Mary; springs burst forth at her need; the idols fall from their bases to the earth; the journey is miraculously shortened; lepors and demoniacs and sick people of all sorts are healed by being sprinkled with the water in which Mary had washed her Child, or by handkerchiefs which He had touched. One of the most remarkable stories is that of the healing of a young man who had been turned by enchantment into a mule. His sisters having besought the Virgin's help, she placed her Son on the mule, and at her prayer He restored the youth to his original shape. Another story relates to the two robbers who were after-wards crucified with Jesus. The one, called Titus,\* had with difficulty prevented his fellow from giving the alarm as the Holy Family passed by. Mary thanked him, and prayed that he might receive forgiveness of his sins; whereupon Jesus answered, After thirty years he shall be crucified on my right hand, and shall precede Me to Paradise.'
At the end of the third year they returned from Egypt to Nazareth. It is unnecessary to relate the miracles, trivial or even malicious, said to have been wrought there by the child Jesus. Joseph died when Jesus was eighteen years of age.

No further particulars of interest are added to the life of Mary, as recorded in the Bible, till after the resurrection, when Jesus is said to have appeared to her, first of all, accompanied by the patriarchs and prophets whom He had released from Hades.† Two years later (other versions give 22 or 24 years) she was warned by an angel that her death was approaching, and the apostles were all miraculously conveyed from various parts of the earth to be present at her bedside. Jesus Himself received her soul, and after three days her body was carried up by angels to heaven. St. Thomas, who had come too late for her death, was privileged to behold her ascension, and to

receive her girdle as a sign of blessing.‡
In his note on Jn 19<sup>27</sup> Westcott says, 'Nothing is known with reasonable certainty of the later life of the mother of the Lord. Epiphanius was evidently unacquainted with any accepted tradition on the subject ( $H\alpha r$ . 78). He leaves it in doubt whether she accompanied St. John to Asia Minor or not. But in the course of time surmises

aperuit, que tamen clause jugiter permanserunt'; and, on the other side, Tertuil. de Carne Christi, 23; Orig. Hom. 14 in Luc.; Epiphan. Hær. p. 1051.

\* Evang. Infant. c. 23, elsewhere called Dysmas.
† Pseudo-Ambrose, de Virginitate, 1. 3.
‡ For the story of the death and Assumption, see the apocryphal treatises de Transitu Marice, ascribed to St. John and to Melito. The earliest hint of such a bellef among orthodox writers is to be found in Epiphanius (d. 403), who, while strongly censuring the heretical sect of the Collyridians for their worship of Mary (Panar. p. 1061), believes that some extraordinary mystery about her death is implied in the words of Rev (1214), 'there were given to hor eagle's wings.' Melito's de Transitu was condemned as heretical in the decree de Libris Canonicia, attributed to Pope Gelasius, A.D. 494. The most recent statement of the Roman Catholic belief on this point will be found in Wilhelm and Scannel, vol. ii. p. 220: 'Mary's corporeal assumption into heaven is so thoroughly implied in the notion of her personality as given by Bible and dogma, that the Church can dispense with strict historical evidence of the fact.' Cf. also Livius, Blessed Virgin, pp. 338-378.

were converted into facts; and Nicephorus Callisti (†c. 1350), Hist. Eccl. ii. 3, relates that she lived with St. John at Jerusalem for eleven years after the death of the Lord, and died there in her 59th year. The site of the Tomb of the Virgin, just to the north of the Garden of Gethsemane, is not mentioned by any traveller of the first six centuries, and the later tradition that the church there was built by Helena is certainly false. See Quaresmius, ii. 240 ff.; Williams, Holy City, ii. 434 ff. From a passage in a synodical letter of the Council of Ephesus (A.D. 431, Conc. iii. 573, Labbe) it appears that, according to another tradition, the mother of the Lord accompanied St. John to Ephesus, and was buried there.' See, further, art. 'Le lieu de la dormition de la Très Sainte Vierge,' by Père Séjourné in Revue Biblique, Jan. 1899, p. 141 ff. The traditional site of the Dormitio Maria in Jerusalem was made over to the Emperor of Germany in 1898.

For Jewish and Mohammedan traditions with regard to Mary, see Canon Meyrick's article 'Mary the Virgin,' in Smith's DB. The only point which need be mentioned here is the Jewish slander reported by Celsus,\* to the effect that Jesus was the illegitimate son of Mary and a soldier Pandera.

B. As early as the 2nd cent, we find Eve made a type of Mary, as Adam was of our Lord. As Eve had brought about the curse by listening to the Serpent, so Mary the blessing by listening to the Angel. + Still she shared man's fallen nature, and was guilty of actual sin. So Irenæus (iii. 16. 7), 'Dominus repellens ejus intempestivam festinationem dixit: Quid mihi et tibi est, mulier?' So Origen (Hom. in Luc. 17) interprets the prophecy of Simeon, 'A sword shall pierce through thine own soul also, of the doubts felt by Mary, in common with the apostles, at the crucifixion: 'Si omnes peccaverunt et egent gloria Dei, justificati gratia ejus et redempti, utique et Maria illo tempore scandalizata est'; ‡ and still more strongly Tertullian (de Carne Christi, 7), and Chrysostom, commenting on Mt 12<sup>sta</sup>. (Hom. in Matt. 44), where he says Mary called down her Son's rebuke by her presumption (άπόνοια).§

Augustine | was among the earliest of the Fathers who thought it possible that she might be an exception to the rule that all have committed actual sins; though he allows that she shared the common corruption of humanity, and quotes Lk 11st as showing that even the mother of Jesus was blessed, not because in her the Word was made

flesh, but because she kept the word of God.

It does not appear that we have any direct evidence of prayer being made, or worship offered, to Mary during the first four centuries, \*\* except by the obscure sect of the Collyridians already mentioned, against whom Epiphanius lays down the rule, εν τιμή έστω Μαρία, δ δε Πατήρ και Τίδε και Αγιον ΙΙνευμα προσκυνείσθω την Maplan μηδείς προσκυνείτω. But the

fire.
§ Stephanus cites other instances from Chrysostom.
§ De Nat. et Grat. c. 38, where in answer to Pelagius, who had given a list of sinless saints from the OT, concluding with the names of Elisabeth and Mary, 'quam dicit sine peccato confiteri necesse esse pietati,' Augustine maintains that all had sinned 'excepta sancta virgine Maria de qua propter honorem Domini nullam prorsus, cum de peccatis agitur, haberi volo questionem.' Ephraem Syrus and Ambrose are quoted to the same effect.

™ Smith's DB, s.v. Mary the Virgin, vol. ii. p. 267; Tyler's Roman Worship of the Virgin.

cultus and invocation of the martyrs, and belief in their miraculous power, had been growing up as early as the 3rd cent.,\* and the gradual paganiz-ing of the Church, which followed the establishment of Christianity as the religion of the empire, led, in many places, to the substitution of Christian saints for the old local divinities. Handed the continued use of the old temples and ceremonies and images under new names might seem to be countenanced by St. Paul's words in reference to the Athenian altar 'whom ye ignorantly worship, him declare I unto you.' Then the worship of the Lares, the apotheosis of the dead, the almost blasphemous homage paid to the living emperor in the East, prepared the way for the worship of saints. votaries of Demeter and Persephone and of other female deities found it easier to transfer their allegiance to the Christian Church, when they were permitted to make their vows there to Mary as the Mother of God and the Queen of Heaven; while at the same time these titles were demanded by the more fanatical Christians, who claimed divine honours for the ideal and prototype of virginity, which they held to be the highest of all virtues. The movement in this direction was especially favoured by the reaction against the Nestorian heresy, condemned at the Council of Ephesus in A.D. 431—a reaction shown in the multiplication A.D. 431—a reaction shown in the multiplication of pictures of the Virgin, and in a readiness to accept, as authentic, any supposed tradition or revelation which tended to her glory. On the other hand, the Divinity of Christ tended to obscure his Humanity. The loving sympathy of one who could be touched with the feeling of our infirmities was transferred to Mary, whose media-tion with her Son, the stern and terrible Judge, was every day felt to be more necessary to weak and erring mortals. Add to this the chivalrous sentiments and the respect for woman among the northern nations of Europe, and we shall not be surprised at the subsequent developments of Mariolatry. The language of the Bible, especially in the Vulgate, was strained to support this: the name 'Mariam' itself received various interpretations, of which the most popular was Stella Maris: the promise to the seed of the woman in Gn 316 was transferred to the woman herself in accordance with the Vulgate mistranslation, 'ipsa conteret caput tuum': the greeting in Lk 1<sup>28</sup> χαῖρε κεχαριτωμένη (Vulg. 'ave gratia plena') was a proof that Mary was herself a fountain of grace: her reply to the angel (οδ γινώσκω ἄνδρα) is taken to be a vow: the words by which she was entrusted to the care of the beloved disciple, ίδου δ νίδι σον, describe her relation to all true members of the Church. She is the Bride of the Canticles, the Woman persecuted by the dragon in the Apocalypse, the Wisdom of whom Solomon speaks, whom the Lord possessed in the beginning as His daily delight, rejoicing always before Him. Christian orators, beginning with Proclus, patriarch of Constantinople in the middle of the 5th cent. (who spoke of the Mother of God,  $\dot{\eta}$  θεοτόκος,  $\dot{\xi}$  as 'the only bridge be-

tween man and God'), vied with one another in devising new phrases in her honour; and the glowing hyperboles of an earlier generation were fixed in the dogma or ritual of a later generation, which again quickly gathered to itself a new halo of sentiment, to be followed by a yet further advance both in theory and practice. We may consider this development under three heads: (1) the personal believe of the Virginia (2) have reversed district. holiness of the Virgin; (2) her power and dignity; (3) the nature of the worship due to her.

(1) We have seen that Augustine thought Mary might be exempt from actual sin, though sharing the general corruption of man's nature. Pelagius and his disciple Julian denied this hereditary sinfulness.\* Paschasius Radbertus (c. 830), in his controversy with Ratramnus, maintained that Mary was sanctified in the womb; and this was the doctrine of Bernard (b. 1091), who, however, protested strongly against the institution of the feast of the Conception by the Canons of Lyons, Dec. 8, 1140, as sanctioning the belief in the Immaculate Conception, which he regarded as superstitious and opposed to the tradition of the Church. Bernard was followed by the greatest schoolmen, including Thomas Aquinas (d. 1274); but about the year 1300 Duns Scotus maintained that, since it was as much in the power of God to blot out sin in the moment of conception as at a later period, it was more congruous to attribute to the Virgin the higher perfection. This view was adopted by the Franciscans and supported by the visions of St. Brigitta, while the older view was maintained by the Dominicans and supported by the visions of St. Catharine of Sienna. Pope Sixtus IV. (1476) declared it an open question, but gave his sanction to the festival. Finally, the dogma of the Immaculate Conception was proclaimed by Pius IX., Dec. 1854.

(2) By the end of the 7th cent. the belief in wonderworking pictures, icons, and the honouring of these with osculation, lights, and incense, to-gether with the invocation of the Virgin and other saints, had become so common in the Eastern Church, that Christians were regarded as idolaters by the Mohammedans. Leo the Isaurian, who became emperor in 716, tried to avert this charge by forbidding the use of images altogether; and his prohibition was confirmed by the Synod of Constantinople in 754. The chief opponents of the Iconoclasts were Germanus of Constantinople and John of Damascus, who, in their writings, and John of Damascus, who, in their wittings, assign to Mary the highest place in heaven next to the Blessed Trinity, though they guard themselves against the imputation of deifying her, as the pagans did their Mater Deorum (see Damasc. Hom I. in Dorm. Mariæ, §§ 11, 15). John addresses her as 'the rest of the weary, comfort of the sorrowful, healing to the sick, pardon to the sinful, a ready help to all.' In the 11th cent. Damiani speaks of her as 'non' the 11th cent. Damiani speaks of her as 'non solum rogans sed imperans, domina non ancilla.' In the 12th cent. Bernard, in the 13th Thomas Aquinas and Bonaventura, carry their adoration to a still higher pitch. Thomas is cited as saying that 'in Mary is all our hope of salvation,' and that she has obtained half the kingdom of God, 'ut ipsa sit Regina misericordia, ut Christus est Rex justitia'; Bonaventura speaks of her as the 'porta cæli, quia nullus potest jam cælum intrare nisi per Mariam transeat tanquam per portam,' and to him are ascribed the contemporary adaptation of the Psalter and the contemporary adaptation of the Psalter and Te Deum to the worship of the Virgin, as a speci-

men of which may be quoted the versicles of the

latter—'All the earth doth worship Thee, Spouse of the Eternal Father'; 'Vouchsafe, O sweet Mary, to keep us now and ever without sin.' What is perhaps even more remarkable is that, in an early sermon of Wyclif's \* (d. 1384), we read: 'It seems to me impossible that we should obtain the reward without the help of Mary. There is no sex or age, no rank or position, of any one in the whole human race, which has no need to call for the help of the Holy Virgin.'+

It must not be supposed, however, that there was no protest against the constantly advancing tide of Mariolatry. Beside the Nestorians and the Eastern Iconoclasts, who were to a certain extent supported by the Frankish Church under Charlemagne, there were various sects, Paulicians, ‡ Cathari, and later the Waldenses and Moravians, which condemned the Invocation of Saints: and at least two eminent Churchmen in the 9th cent. wrote against it, viz. Agobard, archbishop of Lyons, and Claudius, bishop of Turin. § Wyclif gradually came to the same conclusion, and some of his followers, e.g. Lord Cobham, were condemned to death for contradicting the teaching of the Church as to the worship of saints. The desire for reform in the practice and teaching of the Church was strongly reinforced by the reaction from the mediæval system, which came in with the Renaissance: and by the end of the 15th cent. there were many signs that the old ideas as to the Virgin were becoming untenable. This may be seen from the reference made to her in Dean Colet's Preceptes of Livinge, 'Byleve and trust in chryst Jesu. Worship hym and his moder Mary,' especially when viewed in the light of his favourite principle, 'Keep to the Bible and the Apostles' Creed, and the divines dispute about the rest'; as well as from the charge brought against him (1512), that he denied the worship of images. The opinion of Erasmus is known from the Encomium Marice and Peregrinatio, in which he ridicules pilgrimages to the shrine of St. Mary of Walsingham, the prayers offered to her, and generally the speculations of the schoolmen as to her virginity and sinlessness. Even Sir Thomas More condemns image-worship in his *Utopia*, and in a letter to Erasmus expresses his disgust at the Mariolatry which he witnessed at Coventry, where a Franciscan was preaching that 'whoever made daily use of the Psalter of the Blessed Virgin could never be damned, while the parish priest, seeing that men became emboldened to crime through trust in their devotions to the Virgin, made a vain protest, which only drew on him the charge of impiety. In another letter to a monk in defence of Erasmus, More mentions that he had himself known of a band of assassins, who used to kneel before the Virgin, and then proceed 'piously to perpetrate their crime.' He adds that he does not say this 'to condemn those who occasionally salute the Holy Virgin, than which nothing is more beneficial. While all the Reformed Churches condemned the doctrine of Rome on this point, the Lutherans were less prominent in opposing it than the Swiss and the French, who often drew upon themselves persecution by their violence in destroying images. Berquin, the first Protestant martyr in France, was charged with asserting that it was wrong to invoke the Virgin Mary in place of the Holy Spirit, and to call her the source of all grace, or assign to her such titles as 'Our hope' and 'Our life.' which belong only to Christ. The doctrine which belong only to Christ.

# See Lupton's Influence of Dean Colet on the Reformation

of the Church of England is given in the 15th Art., Of Christ alone without sin, and in the 22nd, where it is said, 'The Romish doctrine concerning Purgatory, Pardons, Worshipping, and Adoration, as well of Images as of Reliques, and also Invocation of Saints, is a fond thing vainly invented, and grounded upon no warranty of Scripture, but rather repugnant to the word of God.' Both articles are unaltered from the form in which they were originally put forth in 1553, except that the phrase 'Romish doctrine' was substituted in 1562 for 'doctrine of the school-authors' in the earlier form.

Even the Council of Trent (1545-1563) gives evidence of this change of feeling in the guarded language used in Sess. xxv.: De invocatione, veneratione, et reliquiis Sanctorum et sacris imaginibus, where it is enjoined that 'the people be taught that the Saints reigning with Christ offer their prayers for men to God, and that it is good and useful to invoke them as suppliants, and to have recourse to their prayers for the sake of obtaining benefit from God, through Jesus Christ our Lord, who is our only Redeemer and Saviour.' This is followed by a warning against superstition in such worship, and the caution that no innovation should be made except with the approbation of the bishop. The Roman Catechism speaks more particularly of the Virgin: 'Rightly are we taught to pray to the most blessed Mother of God, ut nobis peccatoribus sua intercessione conciliaret Deum, bonaque tum ad hanc tum ad æternam vitam necessaria impetraret.

The check on superstition was, however, only temporary. Mainly owing to the efforts of the Jesuits, Mariolatry is probably now more pre-valent in the Church of Rome than at any former time, if we may judge from the Decree of 8th Dec. 1854, the enormous crowds of pilgrims who flock to Lourdes, and the popularity of such books as the *Glories of Mary*, brought out in 1784 by St. Alphonsus de Liguori, of which the English translation is 'heartily commended to the faithful' by the late Cardinals Wiseman and Manning. Even Cardinal Newman does not shrink from using the phrase 'deification' in reference to the Romish doctrine of the Virgin and the Saints (Essay on

Development, ch. 8).

(3) As early as the 5th cent. Augustine gives a warning against the worship of saints in the words, 'Honorandi sunt propter imitationem, non adorandi propter religionem' (de Vera Religione, 55); Colimus martyres eo cultu dilectionis et societatis quo in hac vita coluntur sancti homines Dei . . . illo cultu qui Græce "Latria" dicitur, cum sit quædam proprie divinitati debita servitus, nec colimus, nec colendum docemus nisi unum Deum (c. Faustum, xx. 21). In the 2nd Council of Nicea (786) it was decreed that the Cross of Christ, the Virgin, Angels, and Saints were entitled to religious reverence, τιμητική προσκύνησις, but not to divine worship, λατρεία. Peter Lombard (Sent. III. Dist. 9. 1) uses the word 'dulia' for the (Sent. 111. Dist. 9. 1) uses the word 'autia' for the former, but he says that there is a special dulia due to the humanity of Christ, 'est quædam dulia soli humanitati Christi exhibenda, non alii creature.' Thomas Aquinas gives this higher dulia the name of hyper-dulia, but transfers it to the worship of Mary, not to that of the humanity of Christ, which he identifies with latria (Summa, Pars. 3, Qu. 25). He cites Augustine for the distinguishing feature of latria: 'aliquid est quod soil Dec exhibetur soiliest accrificium', and quod soli Deo exhibetur, scilicet sacrificium'; and

\*See also W. Palmer, Letter to Dr. Wiseman; Burgon, Letters from Roms. In the latest scientific exposition of Roman doctrine recommended by Card. Manning it is maintained that the Intercession of Mary is an ordinary and necessary means of salvation; and the dictum of certain theologians, that 'God grants no grace except on the intercession of Mary,' is defended (Wilhelm and Scannel, ii. pp. 223, 224).

later writers have maintained that, as the Mass is never offered to the Virgin, her worship never over-steps the limit of dulia. If, however, we understeps the limit of dulu. It, however, we understand sacrificium, as Augustine does (Civ. Dei, x. c. 1, §§ 2, 3; c. 3, 4, 5, 6), in a spiritual sense of fervent love and devotion, it is difficult to see how the worship inculcated in such a book as the Glories of Mary differs from this; and Pusey quotes passages from Corn. a Lapide, Faber, and others, in which it is actually maintained that Mary is present and received in the Eucharist, and feeds the worshippers there with her own flesh.

C. By far the commonest form of devotion to the Virgin is the Ave Maria, consisting of two parts: the salutation—'Hail, Mary, full of grace, the Lord is with thee; blessed art thou among women, and blessed is the fruit of thy womb'; and the prayer—'Holy Mary, Mother of God, pray for us sinners, now, and at the hour of death.'

The former part was first ordered to be used as a church formula by Odo, bishop of Paris, in 1196 the latter part first appears in the 15th cent., and was directed to be used daily at the seven canonical hours by Pius v. in 1568. The 'Angelus' (said to have been introduced in 1287) consists of three recitations of the Ave Maria at the sound of the Angelus bell, at morning, midday, and night, the first recitation on each occasion being introduced by the words, 'The Angel of the Lord announced to Mary, and she conceived of the Holy Ghost.' The 'Rosary' is the string of beads introduced by St. Dominic in 1210 to facilitate the repetition of 150 Ave Marias and 15 Pater Nosters. The name is also used for this particular kind of devotion. +

The oldest festival connected with the name of Mary is the Purification, tobserved on 2nd Feb., thus consecrating, as Bede observes, the old lustral month of the Romans to a higher purpose. It was probably instituted by Justinian in 542. Its name of 'Candlemas' was derived from the custom of consecrating candles and marching in procession with them on that day, in remembrance of the 'light to lighten the Gentiles.' The Annunciation ‡ (Lady Day), of which St. Bernard spoke as the 'radix omnium festorum,' was instituted about the end of the 6th cent. The pagan feast of the Hilaria Matris Deum was held on the same day (25th March). 6th cent. The Assumption (15th Aug.), instituted by the emperor Maurice about the beginning of the 7th cent., was introduced into the West by Charlemagne. The Nativity § (8th Sept.) was probably instituted in Italy in the 10th cent. The Presentation (21st Nov.) commemorates the dedication of Mary by her parents in her 3rd year. This festival was known in the East in 1150, but not till 1375 in the West. We have already spoken of the Conception § (Dec. 8). The Visitation § (2nd July) was instituted in 1389 to commemorate the visit of Mary to Elisabeth. It may be worth while to mention two other festivals: that of Mount Carmel, instituted in 1587 to commemorate the appearance of the Virgin to the general of the Carmelites in the year 1251, when she is said to have presented him with a scapular of the order, telling him that whoever died wearing this would escape the flames of hell. The other is the Translation of the House of Loretto, instituted in 1669 to commemorate the miraculous removal to Italy in 1294 of the house

at Nazareth in which the angel appeared to Mary.

Saturday was appropriated to the worship of
the Virgin in 1096, so far as the clergy were con-

cerned, and this rule was extended to the laity in 1229. The month of May is also dedicated to her honour.

D. Development in opinion is illustrated by development in art. During the first five centuries there is nothing to show that the Virgin was in any way raised above other saints. She appears simply in scenes taken from Scripture, e.g. the Annunciation, the Adoration of the Magi, the Mother and Child (of frequent occurrence after the Nestorian controversy), or possibly as a single figure in the attitude of prayer. In an Adoration dated A.D. 435, Christ is seated alone on a throne with angels above Him, while His mother occupies a subordinate position on one side near two of the Magi. The nimbus is given to Christ, the angels, and king Herod, not to Mary.\* It is not till the 6th cent. that we find evidence of pre-eminent dignity ascribed to her in the painting of an Ascension, contained in a Syriac MS dated 586, where she stands in the centre of the apostles beneath the ascending figure of Christ. In this picture she, as well as our Lord and the angels, has the nimbus, but the apostles are without it. With one remarkable exception, it is not till the With the tentarkable exception, it is not the the oth cent. that we find her enthroned as Queen of Heaven in the centre of the apset—a position formerly reserved for Christ. The exception referred to is 'the mosaic of the apse of the cathedral of Parenzo in Istria, the work of Bishop Euphrasius, A.D. 535-543. She is throned and sinked and superstant the state of the cathedral of Parenzo in Istria, the work of Bishop Euphrasius, A.D. 535-543. She is throned and nimbed and supported by angels, holding her Son in her lap.' The climax is reached in the 12th cent., when we find the Virgin enthroned with Christ, as His equal, in a mosaic of the Church of St. Maria in Trastevère.

Mrs. Jameson, in her Legends of the Madonna, distinguishes between representations of real or supposed historical scenes, and purely ideal or devotional paintings. Among the latter may be noted those which exhibit the Virgin as Virgo Sapientiæ, Sponsa Dei, the Pictà (Madonna with dead Christ), Mater Dolorosa, Regina Cæli, Mater Misericordiæ, in which character she is sometimes represented as endeavouring to shield mankind from the wrath of her Son.

The most famous of the ancient portraits of the Virgin was that attributed to St. Luke, which was sent to Pulcheria from Jerusalem in 438. This was subsequently regarded as a kind of palladium, and accompanied the emperor to the battlefield, till the capture of Constantinople in 1453.

From what has been said, it appears that no kind of justification for the worship of Mary is to be found in the Bible, or in the theory or practice of the Early Church. Indeed the silences no less than the utterances of Scripture might seem providentially ordered so as to forbid any such development in after ages. It may be argued, however, that there is an a posteriori justification in history. The idolatry of the Canaanites, against which the Mosaic law was primarily directed, was the deification of cruelty and vice, a true worship of devils. The idolatry of Greece at its best was the deification of beauty and intellect, sometimes favourable to virtue, as we may see in Herodotus, but more frequently to vice, if we may trust the witness of Plato. The worship of the Virgin is the deification of beauty and goodness. Regarding this from the historical point of view, who can dispute the immense gain to humanity of the substitution of such worship for any pre-existing idolatry? Contrasting it even with some other forms of Christianity, say with the more rigid Calvinistic school, we

\* See Marriott, Testimony of the Catacombs, p. 40. † This is seen in two churches built by Pope Paschal 1. † Dict. of Christian Antiquities, vol. ii. p. 1154.

can see reasons why the continued existence and prevalence of Mariolatry should have been permitted for the hardness of men's hearts' by Divine Providence. Tenderness, gentleness, reverence, sympathy; enthusiastic devotion to high objects; a deepened sense of the gracious dignity of motherhood; joy in all beauty, whether of art or nature, as the outward manifestation of the Supreme Beauty; a kindly natural piety breathing trust and hope; some faint reflexion of the modest meekness, the resigned submission, the pure unruffled calm of the maiden of Nazareth,—such we might anticipate would be some of the effects of the contemplation of so noble an ideal. And such, no doubt, have been its effects in thousands of simple believers to whom Mary has been the authorized representa-tion of the Divine goodness. But even so, there are certain qualities of mind and character, such as veracity, justice, fairness, honesty, an open eye, robust common-sense, large-minded considerateness, which are liable to fall into the background, when the feminine ideal, often coloured by medi-aval modes of thought, bulks so large in the fore-ground. And if the only acceptable worship is that in spirit and in truth, must we not expect that a worship, founded in mere human invention and the capricious movements of an unchastened piety, would give proof of its unsoundness by its fruits? We shall not therefore be surprised to find that, where the sovereignty of Mary has tended to eclipse the sovereignty of God, the idea of goodness has been exchanged for that of mere weak indulgence, while the thought of the All-Holy and All-Just has been first shrunk from and then forgotters. If Chylink has not then and then forgotten. If Christ has entrusted to his mother the whole treasury of grace, what need is there to look beyond her? The repetition of a few prayers, the offering of a few candles, even the presence of a picture of the Virgin, acts as a sort of charm to win her favour, even for the vicious and criminal.\* The sense of personal responsibility, of the inexorable claims of duty, of the heinousness of sin, has been perilously weak-ened by the fatal error which led to the separation of the spheres of mercy and justice, assigning the former to the Madonna, the latter to her Son. The God of love, the meek and lowly Saviour, are robbed of their highest prerogatives, while the Virgin and the Saints, whose perfection on earth consisted in conforming their wills to the Divine will, are too often represented in popular Catholicism as seeking to resist and control that will.

That the above view of the dangers of Mariolatry is no mere delusion of the Protestant mind, but is shared more or less by many Anglicans who claim to adopt the Catholic position, as well as by some of highest authority among Roman Catholics themselves, is shown by Pusey's Eirenicon and Letter to Neuman, and by Newman's reply to the former, in which he says (p. 108), 'Now at length coming to the statements . . . which offend you in works written in her (Mary's) honour, I will frankly say that I read some of them with grief and almost anger. . . And if I hate those perverse sayings so much, how much more must she in proportion to her love of him?' Again he says (p. 119), 'They (these statements) seem to me like a bad dream. I could not have conceived them to be said. I know not to what authority to go for them, to Scripture, or to the Fathers, or to the decrees of Councils, or to the consent of schools, or to the tradition of the faithful, or to the Holy See, or to reason.' And he refers to Gerson, and Petavius, and others, who condemn the 'prurience of innovation,' and the frivolous and sophistical reasonings 'in which so many indulge in order to assign any sort of grace they please, however unusual, to the Blessed Vir-

\* Many instances will be found in Liguori's Glories of Mary.

gin.' The motive of this is, according to Petavius, a 'kind of idolatry, lurking, as Augustine says, nay, implanted in human hearts, which is greatly abhorrent from theology, that is, from the gravity of heavenly wisdom.

of heavenly wisdom.'

J. B. MAYOR.

MASCHIL.—See PSALMS.

MASH ( $\psi p$ ).—A son of Aram, Gn  $10^{23}$ . The parallel passage 1 Ch  $1^{17}$  substitutes **Meshech**; the LXX in both has  $M \delta \sigma \sigma \chi$ . A name corresponding with Mash is found in Assyrian inscriptions, especially the cylinder  $R^m$  of Assurbanipal, who, in describing his Arabian campaign, sayshe marched through the desert of Mash, 'a place of thirst and fainting, whither comes no bird of the heaven, neither do asses nor gazelles feed there' (S. A. Smith's edition, i. pp. 67, 68). Frd. Delitzsch (Paradies, 242, 243) interprets this to mean the Syrian desert; Glaser (Skizze, ii. 419), as 'the interior of Western Arabia'; and the word, according to Delitzsch, is foreign, and means 'wilderness.

D. S. MARGOLIOUTH.

MASHAL (5ψρ, Μαασά).—1 Ch 6<sup>74</sup> [Heb. <sup>59</sup>]. See MISHAL.

MASIAS (A Maolas, B Metoalas), 1 Es 534.—One of Solomon's servants (RVm Misaias). The name The name is absent from the parallel list in Ezra.

MASON.—In Syria masons both hew and build. In hewing they use the different kinds of hammers mentioned under art. HAMMER. In Ezr 37, 1 Ch 222 hewers (מְּנְכִּים) are mentioned ; the word in Arab. VS is nahātin, those who smoothed the stones. Masons use several instruments in building—the plumb line, a line wound on a reel for laying the courses of stone, a long rod of wood about 6 ft. in length, and a very curious kind of trowel. The trowel is of iron, about a foot long, fully an inch broad in the widest part, and tapers to a point; it is about half an inch thick. It is used as a lever for putting the stone exactly into its place, as well as for

spreading the mortar.

The masons of Lebanon seem still to be the skilled builders of Palestine and Syria, as they were in ancient times (as we read in 2 S 5<sup>11</sup> that Hiram, king of Tyre, sent masons [17, 17] to David to build him a house), for they travel all over Syria, Palestine, and the Hauran, building houses for the people, and forts for the government.

W. Carslaw.

MASREKAH (מְשְׁרַהָה, Μασέκκα). — Mentioned in connexion with the list of 'the kings that reigned in the land of Edom before there reigned any king over the children of Israel, Gn 36<sup>31</sup>. When one of these kings, named Hadad, died, Samlah of Masrekah reigned in his stead (v. <sup>36</sup>=1 Ch 1<sup>47</sup>). The locality has not been identified. The Onomasticon defines it thus: Μαρσικά πόλις βασιλείας Έδωμ περί την Γεβαληνήν. The name πρηνο may signify 'place of Sorek (שרק) vines' (Del. on Gn 3686). J. A. Selbie.

MASSA (μψρ).—Name of a son of Ishmael (Gn  $25^{14}$  [A Mασσή]=1 Ch  $1^{30}$  [B Μανασσή, A Μασσή]).— The correct translation of Pr 31, where Lemuel is described as 'king of Massa,' is due to Hitzig (Zeller's *Theol. Jahrb.* 1844, 269-305), and it is probable that the sense of the words following the name 'Agur' in Pr 301 is similar, though they cannot be rendered with certainty. Delitzsch (Paradies, 301) called attention to the occurrence of the name Ma-as-a-ai immediately before Taymeans and Sabeans in a list of States which brought presents to Tiglath-pileser II. (WAI iii. 10. 1, 38), and justly identified these people with the Ishmaelite tribe. He also (ib. 302) thought there might be a reference to them in a tablet published in WAI iv. 56. 1, and further edited by G. Smith (History of Assurbanipal, 296-298), and most recently by S. A. Smith (Keilschrifttexte Asurbanipals, ii. 36-38). In that tablet a certain Nebo-sum-esir, who has been told to send the king anything that he may hear about the Arabs, states that Akamaru, son of Ammē'tā of Mash (Mash-'a-ai), made a raid on the people of Nebaloth, and killed all the troops except one man, who is despatched to the king to give him personal information. It is more probable that a tribe of moderate size is referred to than a vast region like MASH; and the difference in spelling between this tablet and the former may be due to the popular pronunciation which is represented in the letters (S. A. Smith, p. 38). The scene described in the tablet resembles that of Job 1<sup>17</sup> (as Delitzsch observes), and it is probable that we have in these chapters a specimen of the famous wisdom of the 'children of the East.' From none of these passages can any data be got for the localization of Massa, and the conjectures of Hitzig (repeated by him in his comm. on Pr 30) scarcely deserve mention. See, further, art. SIMEON (TRIBE). Such portions of chs. 30 and 31 as really come from Massa are probably translated; but the first verse of ch. 30, which is unintelligible, may be partly in the original dialect. Of the proper names, Lemuel or Lemoel might be Hebrew or Arabic (compare Lishemesh, Lidzbarsky, Handbuch der nordsem. Epig. 304), Yakeh seems to be old Hebrew, while Agur is uncertain. On the other hand, the names given in Nebo-sum-esir's letter are very clearly old Arabic, and he certainly implies that the 'Mash-a-ai' are Arabs.

D. S. MARGOLIOUTH.

MASSAH (πρφ., i.e. 'proving,' 'trial'; (δ) πειρασμός,
in Dt 33<sup>8</sup> πείρα).—The name given to the place, near Rephidim, at which, according to Ex 171-7, the Israelites 'tempted' J" (i.e. in the old sense of the word, tried Him, put Him to the proof), doubting (v.²) His power to save them in their thirst, and saying (v.²) 'Is J" among us, or not?' This incident at Massah is alluded to in Dt 616 'Ye shall not "tempt" J" (put J" to the proof), as ye "tempted" Him (put Him to the proof) at Massah' (cf. Driver), 922, and Ps 958 'Harden not your heart as at Meribah, as in the day of Massah in the wilderness, when your fathers tempted (i.e. tried) me, tested me, but also saw my work (sc. of judgment). In Dt 338 the name is either played upon differently or there is an allusion to a different version of the

incident at Massah: 'Thy Thummim and thy Urim be for the man, thy godly one, whom thou didst prove at Massah, with whom (or, according to others, for whom) thou contendedst at the waters of Meribah.' The words have reference to the tribe of Levi; and the idea expressed by them may be that at Massah J" either 'proved' the tribe in Moses' person, or (Dillm.) 'proved' Moses himself, by observing how he would behave under the provocation of the people's complaints. However, this explanation is not perfectly satisfactory; and it becomes less so when the attempt is made to adjust the Meribah clause to it: so that the opinion cannot be excluded that the allusion is to some different account of what happened at 'Massah,' according to which the fidelity of the tribe was tested directly by J". The Arabs point to a rock called Hesy el-Hattatin, in the arid N.W. part of the Wady Feiran, as the one struck by Moses at 'Massah' (Palmer, Desert of Exodus, 159). See, further, REPHIDIM.

**MASSIAS** (A Massias, B 'Asselas), 1 Es  $9^{22}$  = Masselah, Ezr  $10^{22}$ .

MASSORAH, MASSORETES.—See TEXT OF OLD TESTAMENT.

MASTER.—See LORD. Like the Lat. magister from which it comes, 'master' was formerly used for 'teacher,' as Mal 212 'The Lord will cut off the man that doeth this, the master and the scholar.' Cf. He 512 Rhem. 'For whereas you ought to be maisters for your time, you neede to be taught againe your selves what be the elements of the beginning of the wordes of God.' Especially was it used for the head of a school (as it is still in use in the rural parts of Scotland), as Goldsmith, Des. Village, 196—

'There in his noisy mansion skilled to rule, The village master taught his little school.'

The Village master taught his little school.'
The Gr. διδάσκαλος, teacher, is in AV rendered 'master' in 2 Mac 110, Ja 31, and in all its occurrences in the Gospels, except Lk 246 'doctor' (RVm 'teacher') and Jn 32 'teacher.' But elsewhere it is tr' 'teacher' in both AV and RV (Ac 13¹, Ro 22°, I Co 12²², Eph 4¹¹, 1 Ti 2², 2 Ti 1¹¹ 4³, He 5¹²). So also λαββεί, though it is transliterated 'Rabbi' in Mt 23⁻¹ δ, Jn 18². δ³ 3². 26 6²² and is tr⁴ 'Lord' in Mk 10³¹ (after TR, but edd. mostly λαββουνεί, whence RV 'Rabboni'), is elsewhere rendered 'master' (Mt 26²². 6, Mk 9² 11³¹ 146°, Jn 4³¹ 9² 11²); RV has Rabbi throughout. See RABBI.

Mastery is four times used for mod. 'victory': Ex 32¹² ¹ It is not the voice of them that shout for

Mastery is four times used for mod. 'victory': Ex 32<sup>18</sup> 'It is not the voice of them that shout for mastery'; Dn 6<sup>24</sup> 'the lions had the mastery of them'; 1 Co 9<sup>25</sup> 'Every man that striveth for the mastery is temperate in all things' ( $\delta$   $d\gamma \omega v_i \delta / d\mu e v_o$ ). RV 'that striveth in the games'); 2 Ti 2<sup>5</sup> 'If a man also strive for masteries' ( $d\theta \lambda \hat{\eta}$ ; RV 'contend in the games'). Cf. Milton, PL ii. 899—

'For hot, cold, moist, and dry, four champions fierce Strive here for mast'ry.'

The verb to 'master' in the sense of 'control' occurs in Wis 12<sup>18</sup> 'But thou, mastering thy power, judgest with equity' (δεσπόζων Ισχύος, RV 'being sovereign over thy strength'). RV has the word in the mod. sense of 'overcome' in Ac 19<sup>16</sup> 'the man in whom the evil spirit was leaped on them, and mastered both of them.'

J. HASTINGS.

MASTICK (oxivos,\* lentiscus).—A diœcious tree, Pistacia Lentiscus, L., of the order Anacardiaceæ, of a spreading growth, 10 to 12 ft. high and broad. The leaves are persistent, with 3 to 5 pairs of oblong lanceolate to obovate, leathery, mucronu-

\* Note the word-play in the exicu of the following verse (Sus 55), and of. African. Ep. ad Orig. (Lommatzsch, xvii. p. 18).

late leaflets, 1 to 11 in. long, on a winged rachis. The fruits are dry, globular-obovate, somewhat flattened drupes, ith of an in. in diameter, borne on short stiff panicles. It grows in thickets, in rocky places, along the coast and on hills to a height of 2500 feet, all around the Mediterranean. The gum is obtained from incisions in the bark, made in August. The juice exudes in the form of tears, which harden into spherical, flattened or irregular, pale-yellow masses, covered with a bloom, caused by their mutual attrition. They have a mild terebinthine odour and taste. Mastick is known in Arab. by the name mistaki. It is in universal use by women and girls as a chewinggum, partly because of its pleasant taste and the agreeable odour it gives to the breath, and its reputed virtues as a preservative to the teeth and gums, and partly for the amusement of chewing it. It is also used as a temporary stopping for cavities in the teeth. It is an astringent, used to check discharges from the mucous membranes. A sweetmeat is made of it in Chio, and forms a considerable article of export. The tree is mentioned once only, in Apocrypha (Sus 54).

G. E. Post.

MATHELAS (Α Μαθήλας, Β Μαεήλας, ΑV Matthelas), 1 Es 919 = ΜΛΛ ΕΙΛΗ, Ezr 1018. The LXX forms are due to confusion of c with θ or ε.

MATRED (1795, Ball compares the Arab. mitrad, 'a short spear').—The mother-in-law (?) of Hadar (Gn) or Hadad (Ch), one of the kings of Edom, Gn 36<sup>39</sup> (A Ματραίθ)=1 Ch 1<sup>50</sup> (A Ματράδ). In Gn the LXX and Pesh. make Matred the son not the daughter of Me-zahab, which is accepted by Ball, who reads | instead of MT no. Kittel is not indisposed to accept the same reading in Ch, thus making Matred a masculine name.

MATRITES ('γρου=the Matrite; B Marrapel, A Marrapel and Marrapel').—A family of the tribe of Benjamin to which Saul belonged (1 S 10<sup>21</sup>). The readings of the LXX point rather to a form 'γρο (Mattarite). Klostermann would substitute 'of the family of M.' for 'the son of a Benjamite' in 1 S 9<sup>1</sup>.

J. F. STENNING.

MATTAN (157 'a gift'; more usually, with explicit addition of the divine name, in the form Mattaniah).—1. ( $Ma\tau\theta d\nu$  Luc.,  $Ma\gamma\theta d\nu$  B,  $Ma\chi d\nu$  A; in Ch  $Ma\tau\theta d\nu$  without variation). Priest of the temple of Baal in Jerusalem during the reign of Athaliah. He lost his life with the queen, when she was deposed (2 K 11<sup>18</sup>, 2 Ch 23<sup>17</sup>). Ahab, presumably at the instigation of his Phomician wife Jezebel, built a temple for the worship of Baal in Samaria (1 K 16<sup>32</sup>). Their daughter Athaliah was probably founder of this temple in Jerusalem. Possibly, therefore, Mattan was not a Judæan. The name is known as Phomician (Gesenius,  $HWB^{12}$ ).

2.  $(N\alpha\theta d\nu B, M\alpha\theta d\nu Q^{mg})$ . Named only as the father of Shephatiah, a contemporary of the prophet Jeremiah (Jer 381). W. B. STEVENSON.

MATTANAH (ημφ); LXX Μανθαναείν Β, -νίν Α, -νέν F\*; Eus. Μαθθανέμ).—A station mentioned only Nu 21<sup>15. 19</sup>. It was on the route from the Arnon to the plains of Moab, and would therefore be to the E. of the Dead Sea and N. of the Arnon. No satisfactory identification has been made; but if the position assigned to it by Eusebius (Onom. p. 169 and p. 274, ed. Lagarde), 12 Roman miles to the E. of Medeba, be correct, the course taken by the Israelites must have been farther to the E. than is generally supposed.\*

A. T. CHAPMAN.

"In an article on the 'Song of the Well' in the New World

MATTANIAH (π.μερ).—1. The original name of king Zedekiah, 2 K 24<sup>17</sup> (B Μαθθάν, Α Μεθθανίαs). 2. An Asaphite, 1 Ch 9<sup>16</sup> (B Μανθανίαs, Α Ματθανίαs), leader of the temple choir, Neh 11<sup>17</sup> (B Μαθανία), leader of the temple choir, Neh 11<sup>17</sup> (B Μαθανία), door-keeper 12<sup>25, 26</sup> (B Ναθανία, Α Μαθθανία). 3. Mattaniah, a descendant of Asaph, was, according to 2 Ch 20<sup>14</sup> (B Μανθανίαs, Α Ματθανίαs), contemporary with Jehoshaphat, but this name should probably be identified with the preceding. 4. 5. 6. 7. Four of those who had married foreign wives, Ezr 10<sup>26</sup> (B Μαθανία, Α Μαθθανία, called in 1 Es 9<sup>28</sup> Matthanias), v.<sup>27</sup> (B 'Αλαθανία, A Μαθθανία, called in 1 Es 9<sup>28</sup> Matthanias), v.<sup>27</sup> (B Ματανία, A Μαθθανία, called in 1 Es 9<sup>31</sup> Matthanias), v.<sup>27</sup> (B Ματανία, A Μαθθανία, combined in 1 Es 9<sup>34</sup> with the following Mattenai into Mamnitanemus). 8. A Levite who had charge of the offerings, Neh 13<sup>13</sup> (B Ναθανία, A Μαθθανίαs). 9. (πηρερ) A Hemanite, 1 Ch 25<sup>4, 16</sup> (B Μανθανίαs, Α Ματθανίαs). 10. (πηρερ) An Asaphite, 2 Ch 29<sup>18</sup> (B Μαθανίαs, Α Ματθανίαs).

**MATTATHA** (Marra $\theta$ á). — Son of Nathan and grandson of David, according to the genealogy of Lk  $3^{31}$ .

MATTATHIAS (Marrablas), the equivalent of the Heb. Mattithiah (מַּמְתְיָהוּ מָמְּתְיָהוּ). 1. AV Matthias, a Jew, who had married a foreign wife in the days of Ezra (1 Es 923). In Ezr 1033 the name is given as Mattattah, AV Mattathah (הקסק). See GENEA-2. One of the men who stood at the right hand of Ezra during the reading of the law (1 Es 948); in Neh 84 Mattithiah. See GENEALOGY. The father of the five Maccabean brothers (1 Mac 21. 14. 16f. 19. 24. 27. 39. 45. 49 1429). See MACCABEES. 4. The son of Absalom, a captain in the army of Jonathan the Maccabean, who, together with Judas the son of Chalpi, stood by his commander during the flight of the Jews at the battle of Hazor, and helped to turn the fortunes of the day (1 Mac 1170). 5. A son of Simon the high priest, who was murdered, together with his father and brother Judas, at a banquet at Dok, by Ptolemy the son of Abubus (1 Mac 16<sup>14-18</sup>). 6. One of three envoys sent by Nicanor to treat with Judas Maccabæus when he invaded Palestine in B.C. 161 (2 Mac 14<sup>19</sup>). Negotiations on the part of Nicanor are mentioned also in 1 Mac 7<sup>27-31</sup>, but it is there stated that they were immediately broken off by Judas, who discovered that they were only a treacherous device for getting possession of his person. 7. The son of Amos in the genealogy of Jesus Christ (Lk 326). 8. The son of Semein (AV Semei) in the same genealogy (Lk 326). H. A. WHITE.

**MATTATTAH** (ARRY). — One of the sons of Hashum, who had married a foreign wife, Ezr  $10^{85}$  (B'A $\theta$ 4, A Ma $\theta$ 8 $\theta$ 04), called in 1 Es  $9^{35}$  Mattathias.

MATTENAI (מְשְׁרֵי).—1. 2. Two of those who had married foreign wives, Ezr 10<sup>83</sup> (B)Μαθανιά, Α Μαθθαναί, called in 1 Es 9<sup>33</sup> Maltanneus), v. <sup>37</sup> (B Μαθανάν, Α Μαθθαναί, combined in 1 Es 9<sup>34</sup> with the preceding Mattaniah into Mamnitanemus). 3. Representative of the priestly house of Joiarib in the days of Joiakim, Neh 12<sup>19</sup> (B κ\* A om., κ<sup>α. a mg inf</sup> Μαθθαναί).

MATTER.—In Sir 2810 'matter' is used where we should now use 'material' instead, 'As the

(March 1895, p. 136 ff.) Budde argues that Mattanah is not a proper name at all, but that the song should end—

'With the sceptre, with their staves, Out of the desert a gift';

and then v.10 resume 'and from Beer (LXX ἀπὸ φρίωτος) to Nahaliel.' See also Expos. Times, vi. (1895) p. 481 f.

matter of the fire is, so it burneth' (κατὰ τὴν βλην τοῦ πυρός, RV 'As is the fuel of the fire'). Cf. Chaucer, Persones Tale, § 8, 'But for your sinne ye been woxen thral and foul, and members of the feend, hate of aungels, sclaundre of holy chirche, and fode of the false serpent, perpetuel matere of the fyr of helle'; and Bacon's Essays (Gold. Treas. ed. p. 57), 'The surest way to prevent Seditions, (if the Times doe beare it,) is to take away the Matter of them. For if there be Fuell prepared, it is hard to tell, whence the Spark shall come, that shall set it on fire.' In Ja 35 the same Gr. word (Øλη) is trd 'matter,' 'Behold how great a matter a little fire kindleth,' but it is clear from previous versions that the Eng. word means here 'affair.' Coverdale's tr. is 'Beholde how gret a thinge a lyttell fyre kyndleth'; the Gen. Bible has the same with 'matter' in the marg., and the Bislops place 'matter' in the text. RV renders 'Behold, how much wood is kindled by how small a fire!' marg. 'how great a forest is kindled'; this is very near Wyelif's 'Lo! hou miche fijr kyndlith hou greete a wode,' after Vulg. Ecce quantus ignis quam magnam sylvam incendit.

For the phrase 'Make matter' see under MAKE; and add this illustration from Tindale (Works, i. 169), 'Let this little flock be bold therefore: for if God be on our side, what matter maketh it who be against us?'

J. HASTINGS.

MATTHAN ( $Ma\theta\theta d\nu$ ).—Grandfather of Joseph the husband of Mary, Mt 1<sup>15</sup>, perhaps to be identified with Matthat, who occupies the same place in St. Luke's genealogy of our Lord (Lk 3<sup>24</sup>).

MATTHANIAS.—1. (Α Ματθανίας, Β Ματάν), 1 Es  $9^{27}$  = ΜΑΤΤΑΝΙΑΙΙ, Ezr  $10^{20}$ . 2. (Α Ματθανίας, Β Βεσκασπασμύς, ΑV Mathanias), 1 Es  $9^{31}$  = ΜΑΤΤΑΝΙΑΙΙ, Ezr  $10^{30}$ .

MATTHAT (Μαθθάτ).—1. Grandfather of Joseph the husband of Mary, Lk 3<sup>24</sup>, perhaps to be identified with Matthan, who occupies the same place in St. Matthew's genealogy of our Lord (Mt 1<sup>16</sup>).
2. Another ancestor of Jesus, Lk 3<sup>29</sup>.

MATTHEW, APOSTLE (Μαθθαῖος, Lachm. Tisch. Treg. WH; Ματθαῖος TR).—Matthew's place in the Apostolic list is not quite constant, varying between seventh and eighth, and so affecting the station assigned to Thomas (in the Synoptics; in Ac 1<sup>18</sup> Bartholomew). His position in Mk, Mt, and Lk, viz. seventh, must give his standing in the original apostolic circle, as reflected in St. Peter's mind. He is called in Mt 10<sup>8</sup> 'the customs-officer' (ὁ τελῶνης), and is thus identified with the Matthew of 9<sup>9</sup> (cf. Mk 2<sup>14</sup>, Lk 5<sup>27</sup>), called while sitting 'at the toll-office' near Capernaum, on the Great West Road from Damascus to the Mediterranean. St. Mark styles this servant of the tetrarch Herod, 'Levi the son of Alphæus'; but that does not bar the identification. For there is analogy for even two Hebraic names, both outside (Jos. Ant. XVIII. ii. 2, 'Ιωσὴφ ὁ καί Καϊάφας) and within the apostolic circle. And it is likely that, as with Simon Cephas, Matthew was the later name, given after his call. This fits its probable meaning, 'Jehovah's gift.' Matthew, then, was the name by which this apostle became known in Christian circles; and by it even St. Mark indicates him in his official list, while giving his call with strict historic fidelity. So Thomas is 'Judas Thomas' in Acta Thomae; and Bartholomew was perhaps Nathanael's usual Christian name. On the forms and meaning of the name Matthew see, further, Dalman, p. 142.

the name Matthew see, further, Dalman, p. 142.
Several things seem implied in this call of
Matthew. He must already have been familiar
with Jesus and His gospel as preached in Caper-

naum (for there is no sign that he, like the first six apostles, had been an adherent of the Baptist); and the feast which he gave in honour of Jesus (Mk 2<sup>14f</sup>) probably marked the new relationship. Finally, while we cannot date his call with precision, Pharisaic suspicion was already awake; so that his call and consequent experience of his Master's ministry can hardly go back to the very earliest days (this bears on the next art.).

The only other facts related of Matthew on good Eusebius authority concern him as evangelist. Eusebius (HE iii. 24) says that he, like John, wrote only under the stress of necessity. 'For Matthew, after preaching to Hebrews, when about to go also to others, committed to writing in his native tongue the Gospel that bears his name; and so by his writing supplied, to those whom he was leaving, the loss of his presence.' The value of this tradition can be decided only after considering the Gospel No historical use can be made of the artificial story in Sanhedr. 43°, that Matthew was condemned to death by a Jewish court (see Laible, Christ in the Talmud, ed. Streame, 71 ff.); especially in face of Heracleon's explicit denial of martyrdom in his case (Clem. Alex. Strom. iv. 9). Referin his case (Clem. Alex. Strom. iv. 9). ences to him in apocryphal sources are specially doubtful on account of the easy confusion between Matthew and Matthias, to whom gnostic Paradoseis were attributed (e.g. Clem. Pæd. ii. 16). See, further, the following article.

## J. V. BARTLET. MATTHEW, GOSPEL OF .---

i. External Evidence of Authorship, etc. ii. Internal Data and Characteristics.

(a) OT Quotations.
(b) Chs. 1-2.
(c) The Sources:

(c) The Sources:

III. Conclusions:

(1) Mt used the Petrine memoirs written by Mk.

(2) Mt and Lk probably did not use in common a Logia document.

(3) The Logia as found in our Mt are largely coloured by the life of the Palestinian Church.

(4) Their nucleus is the common Apostolic didactic tradition, but with the special impress of Matthew.

(5) Matthew is only indirectly the author of our Mt.

Matthew.

(5) Matthew is only indirectly the author of our Mt.

(6) Mt was written to establish a true Messianic ideal.

(7) It was probably written in S. Syria, and certainly by a Jew: its standpoint.

(8) Concluding remarks.

Literature.

i. EXTERNAL EVIDENCE OF AUTHORSHIP, ETC. -Referring the reader to the article Gospels for the outlines of the Synoptic problem, we have here to investigate the specific features and origin of the Gospel which bears the name of Matthew. Even were the title in our oldest authorities, 'According to Matthew' (κατά Μαθθαΐον), to be held original, it need not imply more than that this written Gospel contains the substance of the oral Gospel as taught by Matthew. Nor is the matter carried much further by the words of Papias (Eus. HE iii. 39), that 'Matthew, then, in Hebrew speech compiled the Logia; while they were interpreted by each man according to his ability.' For (1) it may be taken as proved that our Mt is not a translation from Hebrew or Aramaic; (2) it is improbable that the *Logia* or 'Oracles' of the Lord, giving all due latitude to the term logion, included anything like as much narrative as does our Mt: (3) tradition is apt to transform indirect into direct authorship. Matthew's connexion, then, even with

the first collection of Christ's sayings (Logia) may have been simply that of their guarantor in the region in which they were reduced to writing, just as Mark's Gospel might have been called 'according to Peter, or 'Peter's memoirs' (άπομνημονεύματα) to use the actual words of Justin. If it was a disciple of Matthew, corresponding to John Mark, who actually redacted the oral instruction in question, it would best fit what we know of the literary habits of the first generation; and the difference would be little more than formal.

The external evidence as to a written Gospel by Matthew resolves itself into the witness of Papias (c. 110-125); \* for upon him later writers depend for all save traditions too vague to be trusted in such a case. Various views, however, are taken of Papias' meaning. The only safe mode of approach is through a careful study of his motive in referring to Matthew at all. Eusebius, to whom we owe our quotations, begins by saying that Papias compiled five books of 'Exposition of Sayings of the Lord' (λογίων Κυριακών έξηγήσεως). He then challenges Irenœus' statement that Papias had been a hearer of John the apostle; and to prove his point quotes Papias' preface to his work. From this we gather that, in order to vouch for the truth of his expositions of the above Sayings (διαβεβαιούμενος υπέρ αυτών άλήθειαν), he subjoined to his own interpretations (ταις έρμηνείαις) a number of primitive traditions, carefully gathered from the Elders, and of which he had taken special note (δσα ποτέ παρά των πρεσβυτέρων [i.e. men of the former, here the first, generation] καλῶς ξμαθον κ. καλῶς ξμνημόνευσα). He was anxious, that is, to show that his views of the Gospel, unlike those of many who were glib in giving their opinions on the subject, were formed under the influence of first-hand traditions, running back, as he believed, to the Lord Himself. These, moreover, were supplemented by the best sort of second-hand inquiry, made of companions of the first witnesses, i.e. certain apostles now dead, but also of two apostolic men, Aristion and John the Elder, personal disciples of the Lord still alive in his youth. From these sources he had got his best understanding of the Lord's deep sayings, namely, from oral tradition continued in living men, and not from books (i.e. probably written gospels, rather than exegetical writings of any kind).

His whole interest, then, is in the true interpretation of certain sayings of the Lord, embodying the genuine Gospel. But he wishes also to make clear to his readers the source whence came the Logia or Sayings themselves on which he commented.† He has found, he seems to say, Matthew's collection of these Logia preferable to any other. For as an ordered body (σὖνταξις) of the Lord's Sayings,—with which alone his comments had to do,—Mark's Gospel was not its equal. But, after all, Matthew had compiled these Sayings in Aramaic before Papias' own day; and at that time each man had had to interpret them as best he could, i.e. for the most part without the rare advantages to which Papias could appeal in his own case. Tin a word, his call to write his 'Expositions' lay in the absence of any written body

\*A later date for Papias' work is too readily assumed. Eusebius (HE iii. 87) reckons him in 'the first line of succession ( $\partial ia\partial a\chi \hat{n}r$ ) from the apostles,' through whose writings the tradition of apostolic teaching lived on. He then names Ignatius and Clement as cases, and proceeds at once to Papias. The next book opens with Trajan's latter years, later than which Eus. does not seem to place Papias' work; while Polycarp he names after Justin

does not seem to place Papias work; while rolycarp he names after Justin.

† Euseb. does not necessarily give us the extracts in the order in which they came in Papias preface. The statement, 'M., then, in Hebrew speech compiled the Logis; but as for their interpretation, each did as best he could,' may well have led up to the reference to his own 'interpretations.'

† Comp. Irenseus, Præf., of men in his own day, jed.oupyeuven the λόγια Κυρίου, ίξηγηταί κακοί τῶν καλῶς εἰρημένων γινίμενα.

of authorized interpretations of the Logia in detail ( $av\tau a$ ). So had it been at first, so was it still; while the need, in an age of wild speculation, was greater than ever.

Zahn and others find Papias' emphasis to lie on the Semitic form of Matthew's work. But then we should expect this to be brought out by a contrast, 'in Greek,' in the antithetical clause. In its absence the quotation seems motived by Papias' main idea of right 'interpretation' (hapanius follows immediately on sursyphilars). Further, for Papias' use of 'interpret,' his reference to his own 'interpretations' (hapanius) outweighs his use of ipunnursh in another context, where he is citing another's words. Finally, according to Zahn's view, Papias should go no to say hove a Greek edition of the Aramaic My interpretation. But, to judge by Eus.'s silence, he did nothing of the kind. He knew a Greek Mt; he knew of Aramaic Loyiz current in Matthew's name; and he assumed the Greek Gospel to be a version of an original Aramaic writing by the apostle.

Thus, according to Papias' own personal belief, Matthew had indeed written down the Logia. But he had left no written interpretation of their meaning. The result was a divergence of views as to the Lord's teachings which Papias deplores, and which he seeks to rectify by aid of traditions which had reached him from Matthew and other disciples of the Lord.

So far, then, external evidence to the connexion of Matthew with our Greek Gospel is slender. Papias implies, no doubt, that the apostle wrote, and that in Aramaic. But what he is asserting is neither the one nor the other, but rather the fact that the Matthean Logia were at first left to chance interpretation. As to Papias' implication that Matthew actually wrote out in Aramaic the Sayings of the Lord, its worth is doubtful. Against it stands the weighty witness of St. Luke (1<sup>1st</sup>.), who seems to know of no narrative of the matters on which Christian faith had assured hold drawn up by an eye-witness. The force of this can hardly be turned by saying that his word διήγησις suggests narrative, rather than a collection of Sayings.\* To say the least, St. Luke would surely have constructed his careful paragraph otherwise had he known of-much more intended to use-a writing by an apostle embodying Christ's own sayings.

The strange divergence of the Logian elements in Mt and Lk respectively seems inconsistent with a common written basis. Thus, if one still suspects positive tradition to lie behind Papias' reference to Matthew as having written the Logia, it must be conceded that Lk at least had not access to it. And even as to our Mt, it seems easier to suppose that it incorporates the composite catechesis of a locality, than that it blends so much pure local tradition with the written Logia of Matthew (see iii. (2) etc. below). The meagreness of the historic setting of the Logia common to Mt and Lk may be gauged from Mt 112-22=Lk 718-28 1012-16.21

Before leaving St. Luke, however, one may remark that he also uses much matter which, as found also in Mt, may well go back to the Apostle found also in Mt, may well go back to the Apostie Matthew in some form; only, he seems to have found it for the most part already in its present historical setting (e.g. in Lk 9<sup>51</sup>-18<sup>14</sup>). This setting differs widely from that in which the like sayings occur in Mt. But no early work, such as Luke's 'special source,' would have departed far from a setting provided in an apostle's work. Hence the Apostle Matthew did not give the Logia such a setting: and it has to be seen whether even the setting: and it has to be seen whether even the Logia themselves as used by our first evangelist owed their exact form to an apostle at all, rather than to oral tradition starting from Matthew's teaching. For that Matthew had some hand in shaping the Logia in question seems certain from the mere fact that to him, quite an obscure apostle, tradition uniformly and in all circles assigns our first Gospel. On the other hand, the variety of Gospels which in the 2nd cent. claimed to represent the Apostle Matthew—our Mt and the two forms of the 'Gospel according to the Heb-

\* In Sir 635 diagress bis is parallel to superpise surious; and in 915 we get süca diag, son irripp Thisron. Of. Eus. HE iii. 89, 12-14.

rews' \*--along with the lack of any trace of a common Matthæan document in Aramaic or Greek, suggests that all that really belonged to the apostle was a type of oral teaching. In that case our Mt would be related to the apostle much as Mk is related to St. Peter; and the difference in their titles may simply mean that Mark was a well-known apostolic disciple, whereas the name of the author of the Matthæan Gospel was early forgotten. Then posterity, fixing instead on the ultimate source of its tradition, would call the work 'κατά Μαθθαΐον.

ii. Internal Data and Characteristics

General ground-plan—

i. Messiah's person, 1-2.

ii. Preparation for Messianic ministry, 3-411.

iii. Ministry in Galliee, 412-1620.

(Introductory, 412-20; typical words, 5-7; typical deeds, 8-94; expansion by delegation, 935-10; Messiah's own estimate of His ministry, 11; attitude of different classes and typical persons, 12-1620.

iv. Moving towards crisis at Jerusalem, 1621-28 (=Mk 831-16).

(a) OT Quotations.—In this inquiry welcome aid would seem to offer itself in the phenomena of biblical quotation. This has two aspects—a formal and a material. The formal relates to the text used, whether Hebrew or Greek (or even that of the vernacular paraphrase or Targum accompanying the reading of the Hebrew OT in the synagogue); and, if Greek, to the local variety of LXX text implied. The material aspect concerns the mode of thought reflected in the formula of citation, and the degree to which the evangelist's purpose shines through his use of the words or even modifies what he remembers and writes.+

Formally, then, the quotations in passages peculiar to Mt diverge from the LXX far more than those in parts common to it with Mk or Lk or both. This is specially the case with quotations introduced by the evangelist himself in comments signalizing 'fulfilment'  $(\pi \lambda \eta \rho \omega \theta \hat{\eta} \nu a \iota)$  of prophecy. These are ten in number  $(1^{23} 2^{16}, 18, 23 4^{105}, 81^7 12^{16-21})$ 1338 216 2794.); and of the words composing the citations nearly half do not occur in the LXX equivalents. The significance of this is indubitable, when we observe that in nineteen quotations common to Mt with at least one Synoptic, less than a sixth of the words diverge from the LXX. In other words, the homogeneity of our Mt, and so any claim to be a simple version of an Aramaic Mt, is at once disproved.

(b) Chapters 1-2.—Zahn maintains that the first verse of Mt is a title for the whole book, arguing that β(βλος γενέσεως cannot linguistically and by LXX usage mean 'genealogy' or even 'nativity,' but only 'history' or 'career.' But as Irenœus evidently thought otherwise (adv. Hær. III. xi. 11, in the state of cf. frag. 27, ap. Harvey, ii. 493, Dial. Tim. et Aq. [see below, p. 303], where γενέσεις=γενεαλογίας, fol. 93 ro et vo), one has only to prove the fitness of an introductory section, to which v. may serve as opening. Thus it might refer to the nativity (cf. Lk 114) and its attendant circumstances, including the antecedents of the seed royal, arranged so as to indicate three great moments in Israel's fortunesclimax in David, anti-climax in the Exile, and the moment of restored Davidic glory in Messiah. This would be paralleled, not only in the three prefatory chapters of Hosea, especially in the LXX (1º ἀρχή λόγου Κυρίου ἐν Πσῆε . . . 4¹ ἀκούσατε λόγον Κυρίου, viol Ἰσραήλ), but also in Mk l¹, taken as the first verse of a prefatory account of the Forerunner's ministry

\* The idea that this in either form was an enlarged edition of the 'Ur-Matthäus' rests only on the assumption that the Apostle Matthew was a Judaizer—an assumption improbable in the case of any of the primitive apostles, who saw the Gospel in its continuity with the prophets.
† In this section, as in some others, the 'Statistics and Observations' collected with scholarly care by Rev. Sir J. C. Hawkins, in his Horæ Symoptics (1899), have been of great service.

(cf. Hosea, above). Further, since 118, 'Now the birth (yévecs) of the Christ' was on this wise,' seems to follow closely on the last clause of 117, seems to follow closely on the last clause of  $1^{17}$ , until the Christ, fourteen generations,' and  $1^{17}$  sums up the gist of  $1^{2-19}$ , the whole of ch. 1 might easily be subsumed under 1. But it is better to take  $\beta(\beta)$  or  $\gamma e^{i\phi} c \omega s$  as 'birth-roll,' and see in  $1^{18}$  a fresh section; so also with ch. 2, which sets forth certain prophesied corollaries of the birth of Messiah (on the genealogy itself see below (h),  $2^{000}$ 

p. 302).

(c) The Sources. — (1) The Logia. — Here two things must be borne in mind. In early days the tradition of Jesus' Sayings 'did not remain merely personal reminiscence and communication, but served the Church as law and doctrine, and was accordingly put into the form of didactic pieces.' 'Again, this was done in a spirit and amid associations that prevented the rise of a binding letter': and hence we must be ready to recognize among the Logia, along with the voice of the Church's Lord, echoes awakened in the Church's experience. These conditions have been stated, and applied to the forms in which the Logia meet us in Mt and Lk respectively, by Weizsäcker in particular, in his Apostolic Age (Eng. tr. ii. 32 ff.); and his views are largely utilized in what follows. The difference in style and standpoint between the Logia groups in Mt and Lk is due to the differing history of the Logian tradition in the apostolic Church. The preoccupation amid which our Mt's type of Logia took proximate shape was 'the secession of the Church from Judaism and its authorities. Thus did Jesus Himself oppose the Pharisaism and the scribes of His time.' So, too, the main lines of our first Gospel reflect the practical wants of the early days—the doctrines of righteousness, the disciples vocation, the kingdom of God, the duties of the society, the false system of the Jews and Pharisees, the future of the kingdom of God.' These answer to chs. 5-7. 10. 13. 18. 23-25, sections in which the unity of the parts is didactic rather than historical, kindred matter having gravitated to each considerable nucleus by the exigencies of memoriter instruction. That our evangelist was already familiar with these sections as more or less connected wholes, is probable from the formula which he appends to each of them: καὶ ἐγένετο ὅτε ἐτέλεσεν ὁ Ἰησοῦς τοὺς λόγους τούτους (7<sup>28</sup> 19¹ 26¹), or τὰς παραβολὰς ταύτας (13<sup>58</sup>), or διατάσσων τοῖς δώδεκα μαθηταῖς αὐτοῦ (11¹). We take, then, these didactic sections of our Mt in order.

(a) The Sermon on the Mount, Mt 5-7.-Weiz-(a) 11.8 Sermon on the Mount, Mt 5-1.—versacker subjects this sermon, 'a kind of catechism' set in the forefront of this Gospel, to an analysis which reveals its true nature as 'a kind of code, such as originated in and was designed for the Church.' This transformation of Christ's teaching into forms adapted to the religious use of disciples was inevitable so long as the evangelic tradition was a matter of catechesis, with a view to edification. Indeed this fact witnesses to its vital hold on Christians at a time when the Spirit was every-thing and the letter little thought of, and so when fresh applications of a principle laid down by the Master could not in oral teaching be kept apart from the germinal saying which had given them birth in the Church's mind. The question, then, is here not so much one of the Lord's ipsissima verba, lying behind the Logia used in our Gospel, as touching the nucleus of a sermon formed out of such

Logia which Mt expands.

Weizsücker makes it consist of three sections originally independent, as is seen from Lk: viz. the new Christian law in

contrast to the existent legal usage of the scribes (521-46); Christ's estimate of the plous usages then in honour (alms, prayers, fustings); and His reformation of them (61-12) and His exposition of the higher life in contrast to division of heart and care for the worldly life (619-34). Secondary to these, even as combined, he regards not only ch. 7—an appendix of seven short sections supplementing and partly repeating the foregoing (715, with its 'false prophets which come to you in sheep's clothing, 'heing clearly a late touch)—but also the twofold introduction in 63-12-13-16. Now, that 513-16 is out of place one may justly infer from Lk 143-14. 313-31-32. But Lk also makes the Sermon open with beatitudes, though less than half Mt's number (which seems filled out with OT phrases), and otherwise contradicts Welzsäcker's analysis. For this among other reasons, the reconstruction of the Logian Sermon favoured by Weiss and Wendt (with some divergences) is to be preferred. Yet even so, one must not assume that the Sermon was known to Mt and Lk in the same recension. Thus, while it is probable that Lk's four beatitudes (apart from the parallel woes, a secondary feature) best represent the original apostolic Logian trudition (not necessarily as Matthew taught it), it is clear that Luke knew the Lord's Prayer in another form from Mt's, and that not as part of the Sermon at all.

Allowing, then, for the different history of the Logian tradition before it reached our Mt or Luke, we may regard the following as 'Matthæan' in substance:—Four beatitudes parallel to Lk (53.46.11.); four revised readings of Mosaic mortification. (53. 4.6.11.); four revised readings of Mosaic morality as understood by the scribes—about murder, adultery, retaliation, hatred of enemies (521. 22. (24). 271. 88-40. 48-48); three corrections of the Jewish ideal of piety—alms, prayer, fasting (61-18); four dangers of the higher life—earthly-mindedness, insincerity, a divided heart, carefulness for things bodily—the remedy being absorption in the l'ather's kingdom (619-34); four more miscellaneous counsels (71-27). These last, most of all, owe their combination to our evengelist, as they repeat their combination to our evangelist, as they repeat a good deal; and in one case (7<sup>12</sup>), the Golden Rule a good deat; and in one case (7\*\*), the Golden Kule of duty towards one's neighbour, a verse comes more naturally in Lk (6<sup>21</sup>), earlier in the Sermon. Yet the words on criticism and self-criticism (7<sup>1-5</sup>, Lk 6<sup>37, 41</sup>), on fruit as the test of goodness (7<sup>1-52</sup>), Lk 6<sup>43-49</sup>), and the similitude which clinches the whole Sermon (7<sup>24-27</sup>, Lk 6<sup>47-49</sup>), come in fitly.‡ Probably even far it reconstruction leaves too much in the Sermon for it really to have been spoken at one time: it expects far more of men's hearing capacity than Jesus ever demanded. But it may stand as representing the Matthæan didactic catechism for the citizen of the Father's kingdom, and as suggesting the processes of further accretion in later use, and of final compilation, which lie

between it and Mt 5-7.

(β) The Disciple Discourse, ch. 10.—The action of local Church usage upon the tradition is also implied in the specific disciple-discourse. This in practical use must early have lost much of its original restrictions, as intended for the guidance of the Twelve in their first preaching by the side of their Master's own ministry (cf. Mk 3<sup>13-15</sup>). Thus in Lk it refers to the conduct of a large circle of disciples who assisted Jesus in a similar way; and in either form it doubtless embodies way; and in either form it doubtless embodies rules taught in the churches for the guidance of all who acted as missionaries ('apostles' in the larger sense, for which 'evangelists' became a synonym). The words in Mt 10<sup>28</sup> cannot have been used of the original temporary mission: 'When they persecute you in the one city, flee to the other: for verily I say to you, ye shall not finish the cities of Israel before the Son of Man come.' This must rather represent an early stage

\*Each of these sections admits of further analysis: note particularly the change from 'ye' to 'thou' (Tof catechesis) in each case. We cannot, of course, by such rough tests distinguish the teaching as original and derivative. But certainly the Lord's Prayer did not come originally in the Sermon (see Lk 111st). The backbone of Mt's form of this section consists of \$0.5 the \$0.5 the section consists of \$0.5 the \$0.

in particular. But Lk's divergent arrangement by no means proves that these subjects were no part of the Matthean Logia. 1 On the other hand, 74 (7-11) 222 are out of place.

<sup>\*</sup>The diverse orders, 'Jesus Christ' (MCEKL al. Pap. Oxyr. [see. iii.) segypt. syr. ur. arm. seth. Or.) and 'Christ Jesus' (B), point to the originality of 'the Christ' (D 71, it. vg. syr. an. cur. Irea); al. 1178.

of the Church's echoed counsels to the Messianic missionaries in general, on the lines laid down by Jesus for His first disciples. Weizsäcker sees in Mt Jesus for His first disciples. Weizsäcker sees in Mt 10<sup>5-18</sup> (10) the original tradition as to the apostolic mission, once current as an independent piece (cf. Mk 6<sup>7-18</sup>, Lk 9<sup>1-8</sup> 10<sup>2-11</sup>), and here given in a form retaining the restricted scope of Christ's own earthly ministry—the form in which the Matthæan Logia were current in our evangelist's region. A secondary formation follows in the section on persecution, which reflects the experience of the Apostolic age at least as late as St. Paul's trials before Roman courts at Cæsarea. Its originally detached character is shown by its appearing in the eschatological discourse in Mk 13°4", Lk 21¹2", where Mt faintly echoes Mk. Here, however, Mt seems independent of Mk's form, having points in common with Lk's 'doublet' (12111.), and being the more original in its basis (apart from the evangelist's own colouring). These two sections Weizsäcker calls 'the fundamental law for the missionary activity of the Church.' He adds that they were naturally extended by analogous sayings, like Mt10<sup>24-42</sup> (many of which are clearly misplaced, see Lk 12<sup>3-9.51-58</sup> 14<sup>25-27</sup>), either by Mt or in the traditional form under which he was wont to teach the Matthæan Logia.

(γ) The Parables of ch. 13.—As to these parables, where Mt's love of the number seven (cf. the double sevens of the genealogy) attracts our attention, it appears that all three evangelists possessed collections of parables, beginning with 'the fundamental parable,' the Sower. To this main parable there were two types of sequel: one as in Mk and Lk, where it is combined with the simile of the Lamp, whereby Jesus explained to the disciples (in the actual course of events) the function of parable as a test of hearers' receptivity; the other, as in Mt, where it is followed didactically by other parables more or less related in thought. These parables more or less related in thought. These appear to come from different sources. The pendent parable (to the Sower) of the Wheat and Tares has a peculiar opening,  $\omega\mu o(\omega\theta\eta \ \dot{\eta} \ \beta a\sigma$ , which recurs in parables in 18<sup>28</sup> 22<sup>2</sup>, and may point to the three having been once a didactic whole, representing a late stage of Logian teaching. the other hand, the remaining five begin with όμοια έστιν ή βασ., probably the usual opening in parabolic collections.\*

Weizacker's 'reflexions' deserve attention. Viewing the Wheat and Tares as a later supplement to the Sower, he says: 'From the very nature of this form of instruction, the discussion of one parable leads naturally to the invention of others: interpretations develop into fresh parabolic material.' Thus this parable reflects 'an experience from the life of the Church,' which may be the case also with the Drag-net and some others. But 'in any case the collection gives us an insight, not only into the way in which the tradition operated, but also into the method of editing passages for definite didactic purposes.' Its object is to set forth not so much distinct commands, as 'the fruits of the teaching received, the perfection and divine nature of the cause.' It is, in any case, characteristic of Mt's standpoint that his first special parables—the Tares and the Leaven-'carry us involuntarily into the primitive Church. They found their most direct use in the relations of that Church to the nation.'

(8) The Discourse in ch. 18.—In the discourse on the 'little ones' and fraternal treatment of all brethren, even the least, Weizsäcker thinks 18<sup>66</sup> is an organic unity. 'The whole refers to the conduct of the disciples to each other: the sayings teach the nature of their communion,' even if some took shape rather later than others. It seems a proof of the general justice of these remarks that

\* Weizsäcker thinks ἄλλην παραβολήν (1324.81.38) and πάλν (45.47) original parts of special collections. But they rather show Mt's compiling hand. He also thinks that the reflexions in 1334c, coming in the middle of things, must be due to a source used. But against this must be set Mt's favourite formula in v,35a. He inserts them from Mk and practically where Mk has them. Then he returns to explain the Wheat and Tares, and adds other parables.

the parable of the Lost Sheep, which Lk gives as an apology for Jesus' own attitude to outcasts, came to Mt as a lesson for believers, in relation apparently to converts from among such 'little ones' of society. It had lost its original application and gained another in the Church's life. Moreover, already in 18<sup>3-6</sup> Mt has made humility the note of the kingdom, in place of the spirit which thinks of 'greater' and 'lesser' among brethren. Each must be ready to sink all 'superiority,' to re-ceive even a young child on the ground of Christ's name, and to avoid wounding the feelings of the humblest believer—one of no more account than a child (cf. Mk 9<sup>41.</sup>). Hence, however much our Mt may be influenced in the wording of 18<sup>1-5, 6, 81.</sup> by Mk 933-97.42-47, yet his mind is already filled with a Logian piece of didactic which asserts itself both in idea and in phrasing, as well as in 1881. as a whole: 'The intention of its original form' shines through; and 'the apostles are thought of as patterns for the Church.

(e) The later Parables.—Similarly the three parables of  $21^{20}$ - $22^{14}$ , centring in that of the Vineyard common to the Synoptics, define the Church's relations to Judaism. In the first two of these parables we get the phrase  $\dot{\eta}$   $\beta a \sigma$ .  $\tau o \hat{v}$   $\theta e o \hat{v}$ , so rare in Mt, and perhaps a mark of the later stratum in its Logia.

In 12<sup>35</sup> the phrase may be due to parallelism with is suiterant field in 2<sup>36</sup>; and in 19<sup>34</sup> it seems to come from Mk 10<sup>34</sup>. In 21<sup>31.43</sup>, however, we can only suppose that this Hellenistic or un-Hebraic expression (so Dalman, Dis Worte Jesu, 156) marks the secondary, rather than Matthaan, element in the tradition reflected in Mt, to whose own usage \$\tilde{\eta} \text{ far. \$\tilde{\text{vir} \text{ supparison}\$}\$ can by no means be exclusively traced.

The parable of the Marriage Feast is partly paralleled by Lk 14<sup>15-24</sup>, and is an old *Logian* element which has undergone change in two lines of tradition. Mt seems to have it in a late form; for it has gained an appendix, on the Weddinggarment and the fewness of those who respond and are elect. And even the part parallel to Lk adds the feature of insult and death visited on the king's messengers, resulting in vengeance on the murderers and their city—surely an echo of the experiences and expectations of the later apostolic age, though not necessarily after, rather than just before A.D. 70 (cf. Mk 12<sup>9, 10</sup>, Lk 20<sup>18-18</sup>, Mt 214 4 for the like as already foretold in prophecy). We shall return to the subject in discussing Mt's Meantime this impression of the absolute rejection of the national religious system is confirmed by the great anti-Pharisaic discourse in ch. 23—an excellent case of didactic compilation, the bulk at least of which our Mt found ready to his hand, though the seven distinct Woes may betray his schematism. We must now turn aside, for the moment, to consider the other chief factor of Mt, the narrative sections parallel to Mk.

(2) Mt's relation to Mk.—To begin with a simple case, namely one which involves no other connected source like the Logia, Christ's walking on the sea may be taken (Mt 14<sup>22ff</sup>, Mk 6<sup>45ff</sup>.). Here we observe slight omissions — αὐτοῦ (followed by addition of αὐτον), τὸ πέραν πρὸς Βηθσαιδάν, αὐτός; insertions κατ' lolar, μαθηταί (to compensate for abrous in a clause omitted), dπὸ τοῦ φόβου ἔκραξαν in place of dνέκραξαν, [δ Ίησοῦς]; use of favourite forms of a word—τοὺς δχλους for τον δχλον, dνέβη for dπῆλθεν; changes in construction—i.e. έως οδ dπολύση for ξως . . . απολύει, ὑπὸ τ. κυμάτων for ἐν τῷ ἔλαύνεικ, τετάρτη φυλακή for περί τετ. φυλακήν, ήλθεν for έρχεται, περιπατών έπι την (cf.  $^{29}$ , only Mt) for έπι της, λέγων for  $\kappa$ . Aéyes—sometimes involving transposition of a word, like έταράχθησαν (λέγοντες,  $\kappa$ .τ.λ.) in  $^{96}$ ; paraphrase— $\hbar \delta \eta$  σταδίους πολλούς άπο γ $\eta s$  άπείχεν for έν μέσω τ. θαλάσσης; omission of a clause—κ. ήθελεν παρελθεῖν αὐτούς, Μκ 6<sup>48b</sup>, πάντες γάρ αὐτὸν εἶδον, <sup>500</sup>. In the general result Mt's Greek is smoother

and better than Mk's, though less vivid; also the

changes appear for the most part involuntary, due to memoriter rewriting of section by section after perusal, rather than to line for line copying. This less mechanical conception of the process by which Mk passes into Mt is not only most likely, but helps to explain much elsewhere. In fact it secures the advantages claimed for the purely oral theory, without sacrificing what gives to the documentary theory its strength. The section affords other lessons. Peter's walking on the water (25-21) is an insertion from tradition,† and points to a factor which must be reckoned with throughout, e.g. in 2762-68 2811-18, as also in relation to the parables peculiar to Mt. And, finally, the description of the effect upon the disciples' minds is put in a different form from Mk—one reflecting less upon their slowness of heart and pointing more directly the moral of this Gospel (v. 25, cf. 1616 2764). The phrase full of adoration, 'Truly thou art Son of God,' is here anachronistic in view of 16151. Mk 829. These various points might be illustrated from the next few sections. But space forbids: and so we turn to apply our principles to the parts where Logia and Mk may be thought to blend.

(d) Setting of the Sermon on the Mount.—Mt 4<sup>28</sup>–5<sup>1</sup> is crucial for the evangelist's methods. Is his relation to Mk here determined by other narrative material, oral or written, or simply by his own plan for the use of his didactic or Logian matter?

Historically arbitrary as the latter hypothesis would argue Mt's eclectic use of Mk to be, it is yet probably correct. For in fact all close study of Mt shows its historic interest to be quite subordinate to the interpretative, the setting forth in orderly fashion of the salient features of Messiah's activity and teaching. Here, then, Mt's prime care is to find a fit point of contact with the traditional narrative—of which Mk is the form before him—for the general Sermon on the kingdom. As it stood in the forefront of the Logian tradition, so should it stand in a full written Gospel as Mt conceived it. Starting from Mk 122 (Mt 728t.), he readapted Mk 313, where Jesus 'ascends the mountain' in order to associate with Himself an inner circle of disciples; assuming that such a call would imply a prior formal exposition of the nature of the new kingdom. And so far he may have followed tradition—a tradition, too, which knew of a discourse on a mountain. But, this identification once adopted, Mt carried out his use of Mk with great freedom.

The whole of Mk 318 influences Mt 51. Not only does Jesus ascend 'the mountain,' though no special locality is in question; but the reference to disciples as coming to Him creates some obscurity touching the persons addressed in the Sermon. Mt has just referred to 'the crowds'; and at the end we hear of its effect, not on disciples, but on these same crowds. Hence, apart from the form in which the Sermon is cast (perhaps mainly that of current Logian catechesis; contrast Lk 620, where the disciples are first addressed, and then hearers in general, 27), we have the blending of Mk's context with that which Mt has just created for himself. For with the hint supplied by Mt 51 in relation to Mk 313, we can hardly fail to see in Mt 4222 a mosaic of Marcan situations and expressions, generalized in order to set forth the earlier activity of Jesus in word and deed—the presupposition of 'the crowds' present at the Sermon. Similarly, the call of disciples had been hinted at by the typical cases

\* That renewed reference was sometimes made, seems proved by Mt's reversion to Mt's πιμπατῶν ἐπὶν τῆς θαλάσσας, in 26a, after writing automatically πιρ. ἐπὶν τὴν θόλωσσαν, his own construction (of. ἐπὶν τὰ βὸλστα in 38th). For a parallel, compare the freer parts of Codex Bezze.

borrowed from Mk in <sup>18-22</sup>. The artificial nature of <sup>24f.</sup> is clear from the fact that no little lapse of time is implied in the going forth of Jesus' fame 'into the whole of Syria' and the gathering of crowds from Decapolis and Judæa and beyond Jordan—features natural in Mk's later context (37, Lk &<sup>17</sup>), but not in Mf, if it were meant to be chronological. Similarly 4<sup>23</sup> is based on Mk 1<sup>29</sup> 69-, with 1<sup>29</sup> for starting-point (just as 1<sup>22</sup> is used at the end of the Sermon in 7<sup>23</sup>); and 9<sup>25</sup> repeats the borrowing when Mt gets really parallel to Mk 6<sup>6</sup>.

The fact that both in 423 and 24 there are echoes of more than one passage in Mk, suggests that our Mt was so familiar with the latter as to combine his phrases in memory without a full sense of their actual position in Mk's narrative. And this is confirmed by the fact that these verses appear quite in Mt's style. But in any case Mt's generalizing use of Mk seems clear (so 816 1580.81), and is illustrated by our next paragraph.

and is illustrated by our next paragraph.

(e) Artificial grouping in 8-9.—In 5-7 Mt has been drawing on his prime Logian source. In 728b he returns to Mk (122) with εξεπλήσσοντο (οι δχλοι) επὶ τῆ διδαχῆ αὐτοῦ τρ γὰρ διδάσκων αὐτοὺς ώς εξουσίαν έχων και οὐχ ώς οι γραμματεῖς (αὐτῶν). He thus draws attention to the authority of Jesus' manner of teaching, and then proceeds to show how this Messianic mien extended to His action and attitude towards men. In fact the series of works and words of power which follow, fulfils the second part of the forecast in 428. Once more we get the broad, vague background of δχλοι πολλοί (cf. 428); and then the cleansing of the leper (Mk 140π.) is introduced with an abrupt και ιδού.

(Mk 1<sup>40.11</sup>.) is introduced with an abrupt κal lδού. Thus he passes over the deliverance of the man with an unclean spirit (Mk 1<sup>22-26</sup>), since he has already used the impression produced by it, ½ κατό (φήμα is Mt's own word 9<sup>20</sup>), in its general description in 4<sup>24</sup>. This omission was the easier that the story has much in common with the fuller Gadarene incident which he is about to use shortly (8<sup>280</sup>. = Mk 5<sup>16.7</sup>.). But why does he take Mk 1<sup>407</sup>. before 2<sup>207</sup>. Partly perhaps because it contains words of respect for Moses in keeping with 6<sup>17</sup>, and partly because in Mk the healing of the leper comes between a reference to a general ministry in Galilee (1<sup>20</sup>), in which Mt sees the continuation of his own 4<sup>20</sup>, and an entry into Capernaum.

Mt is not concerned with temporal sequence, but tries to preserve local conditions. Hence he goes on with something which had come to him connected with Capernaum (8 $^5$ , cf. Lk 7 $^1$ ). In the healing of the centurion's servant  $(\pi \alpha \hat{\imath}_i$ , Lk  $\delta \delta \hat{\imath}_i \partial \lambda \hat{\jmath}_i$  the interest centres in the dialogue: and the story may have come in the Logia just after the Sermon (as in Lk [or his special source, cf.  $9^{51\pi}$ .], who has already used Mk's material right up to the withdrawal with disciples to the mountain).

To Mt it had special value here as introducing the idea of authority (iξουσία), which the centurion implicitly recognizes as on the side of Jesus (89). Vv.11.12 are attached by logical affinity (?already so in Logia tradition in Mt's region, against Lk 13<sup>28c.</sup>), and serve to justify Gentile faith in Mt's day. Then, at last, he returns to the thread of Mt 129-24 (83-28) illustrates nothing that is to his purpose). The healing of Peter's motherin-law becomes a mere typical case, one of a class, like the many referred to in v.18. This verse summarizes Mt 13-24 with some characteristic changes (e.g. demoniacal possession is put first as marking authority), and is followed by the citation of prophecy with Mt's usual formula of 'fulfilment.'

freer parts of Oodex Beze.

† As such it gives a good specimen of Mt's style when free to follow its own literary form. Note ἐνεκρθελε ἀνει [Mk 5 times, generally ἐνεκ. λίγιι; common in Lk, and in Mt 14-28 (34 times), where rewriting Mk, but rare in 3-13 (7 or 8 times), where using Logia: hence not a Logian phrase: In ἐνεκρθεη, ἐνεὶ τοῦ κλοίου (α. 816, Mk prefers is), κατακτοντίζεσθει (Mt 189) ἀλριὰτοῦς (896 168), διεντάζων (2817), and κόρι in later religious sense (cf. Lk). It shows also the easy way in which an insertion may blend with the Marcan context, i.e. ἐνεβάντων αὐτῶν for ἀνίβη (σρέε ἀντάς). Note καλούων (1428, cf. 2.19), never in Mk, once only in Lk (1840).

<sup>\*</sup> This is a crucial case of Mt's use of Mk. For whereas the sing. δχλω is Mk's regular form (33 to 1), Mt prefers δχλω (25 times, δχλω ασλλώ 5, δχλω 19, generally parallel to Mk): and the foregoing context would suggest δχλω (cf. v.1) or at any rate vis

hinder its having stood in local catechesis after the Sermon, as logically akin, viz. as affording a typical case of response to the Master's call to disciple-ship: and that Mt forces it in here suggests that it so stood. It illustrates the authority, even in isolation, that marked the Son of Man (esp. 22). From v.28 to the end of ch. 8 Mt follows Mk 514., the only points calling for note being the softening down of the disciples' alarm and surprise in the storm  $(\delta\lambda\iota\gamma\delta$ πιστοι and ol δὲ ἀνθρωποι), the substitution of the more familiar Gadarene region for the obscure Gerasene (i.e. of Kersa, a village on the lake's edge), and the fresh reading of the demoniac incident by which Mt follows the plurals in the dialogue (e.g. Mk's παρεκάλεσαν αὐτὸν λέγοντες) to the ignoring of the sing. of Mk's narrative. It is possible that this reading had already in oral tradition generated the δύο δαιμονιζόμενοι, and that Mt uses Mk in the light of the story as known to him orally. Yet Mt's general tendency to duality (cf. 20<sup>30</sup>) is to be noted; particularly the clear case in 21<sup>2-7</sup>, where his narrative is warped by words of prophecy which he himself introduces with his own formula. The divergences from Mk seem to be quite in Mt's own style.\* The words with which he returns to Mk 2<sup>16</sup> are still coloured by Mk 5, καὶ εμβάς εἰς πλοῖον (Mk 5<sup>18</sup>) διεπέρασεν † (ib. <sup>21</sup>, the verse after which Mt resumes this section of Mk in 918). Capernaum is called την ιδίαν πόλιν in terms of 418. Once more, in the healing of the paralytic, the note of authority is struck in both Gospels. In 9º Mt seems to show that his aim is to present a series of typical scenes in their logical rather than strict historical connexion; for adopting Mk's παράγων, appropriate to progress along the lake's margin, he uses it as a mere verb of motion by inserting ἐκείθεν, ignoring the teaching on the shore which comes in between. In the incident itself it is interesting that he substitutes 'Matthew' (with λεγόμενον, a favourite phrase), Levi's disciplename, for that by which he was known at the time of his call: i.e. his standpoint is less purely historical than Mk's. If in 914s. Mt were not following Mk, he would hardly have inserted the defence against criticism at this point, but rather reserved it for the later section devoted to the topic (12<sup>1g.</sup>). For the very next paragraph shows that he is still dominated by the idea of the mighty deeds of Jesus. He goes back, that is, to Mk 5<sup>21st</sup>: but having already used the link of circumstance in v.21, he uses one belonging to a later stage of the incident (v. 25 ξτι αὐτοῦ λαλοῦντος) and compresses the whole.

That Mt is here using Mk rather than a shorter source is shown by (1) the mention of the duration of the woman's malady, (2) the coincidence in \*\*\*ve\*\*s\*\*, (3) the rather ctiose \*\*\*s\*\* | \*\*isset\*\*s\*\* |

The last two incidents of the section are compilations of Mt completing the cycle of typical healings. They have distinct echoes of Mk, as also marks of Mt's own style; but possibly they

also marks of Mt's own style; but possibly they

\* Mt's lexists seems due to Mt's lexist, his to Mt 124;
even marks and with may gloss mpis viles. As the case is a
crucial one for the use of narratives assumed to exist in written
Logia, one may refer also to the case of the demoniac boy (1714s,
Mk plan, Lk p31%). What there seems to exclude such Logia so
causing Mt's abbreviation of Mk, is the sudden emergence of vi

dampines (v.18), easily explained by his knowledge of Mk, but not
a natural sequel of the description of the lad's symptoms in v.18.
If this be so, then that section affords cases of pure transposition by Mt (18b, cf. Mk 23); recurrent comment (18e); a favourite
idea (did viv theyenterian, 20e); and a favourite word, theservisis
(18.18),

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

† The other case of this rare word, 1424, is also in Mk's wake.

have also a traditional basis, particularly in the case of the dumb demoniac, 9<sup>321</sup>. For though Lk 11<sup>14</sup> has the same in substance, yet the form differs, especially if we omit v. <sup>34</sup> as a later gloss, as do O.L., Syr-Sin., Tat. (see 1224).

Another view is possible, namely, that Lk 1114f. shows the story of the possessed mute in its right place, so introducing the dialogue with Pharisees as to exorcism originally in the Logia. In that case Mt may use the incident twice: first, among the works of power in 9, where the people's comment comes from Mk 212; and next in 12<sup>22g.</sup>, where the two incidents in 937-38 appear fused into one case as occasion of the people's wonder, which elicits the Pharisees' retort.

The cycle of typical Messianic deeds is now complete: and Mt wishes to present Jesus in the further aspect of authority shown in commissioning others to aid in gathering in the harvest of the Kingdom. In so doing he omits for the present (but see 1355ff.) a few verses in Mk, and takes the first words of his introduction to the Mission of the Twelve from Mk 66b, i.e. καὶ περιηγεν ὁ Ἰησοῦς the I welve from MK 0..., i.e. και περιηγεν ο Ιησους τάς πόλεις πάσας κ. τὰς κώμας, διδάσκων, repeating also the bulk of 4.23 his earlier programme of Messianic ministry. Then he takes part of Mk 6.34 (where Mt omits half the verse) and generalizes the statement of Christ's compassionate perception of the people's shepherdless condition. In 9871. he probably employs the opening words of the Logia at this point (cf. Lk 102), and then follows Mk once more in 101, repeating words used already in 4<sup>22b</sup> 9<sup>33b</sup> (θεραπεύειν πᾶσαν νόσον κ. πᾶσαν μιλακίαν). The names of the Twelve are next given, without any interest in the circumstances of their original call (Mk 318ff.). Indeed it is assumed that they

are already known.\*

(f) Modifications in the Passion and Resurrection narratives.—Most will agree with Dr. Salmon that Mt 27 'copied the narrative as we find it in St. Mark, interpolating in it different passages founded on knowledge derived from some other source.' A word or two on such a source, or rather sources. In the Institution of the Supper it is likely that the slight differences in Mt are due mainly to local Eucharistic use, the cause of Lk's inversion of the Bread and Cup (so the Didaché). In the Crucifixion, on the other hand, the slight divergences are due to the subtle reaction of certain details of OT prophecy—now seen to be Messianic, since suffering was included in Messiah's lot. The influence of Ps 22 (whence came Jesus' great cry) is especially marked (as also in He 2<sup>116</sup>; cf. <sup>6-9</sup>). Thus—

Μκ ἐδίδουν αὐτῷ ἐσμυρνισμένον οἴνον.

Mt 2784 έδωκαν αυτώ πιείν οίνον μετά χολής μεμιγμένον

Ps 69 (68) 21 εδωκαν . . . χολήν, κ. els την δίψαν μου επότισαν με δξος.

Then, after the casting of the lots, Mt adds-

και καθήμενοι έτήρουν αὐτόν έκει. Cf. Ps 22 (21) 18 αὐτοι δέ κατενόησαν και έπειδόν με.+ And once more-

Mt 274 (only) πέποιθεν έπι τον θεόν, ρυσάσθω νθν εί θέλει αυτόν.

Ps 22° ήλπισεν έπι Κύριον, ρυσάσθω αὐτον . . . δτι θέλει αὐτόν.

Such apologetic use of prophecy is yet more obvious in 817 12175, and it may have helped the evangelist to his own faith in Jesus' Messiahship; while the elaborative influence of the OT is seen in Mt's Beatitudes as compared with Lk's.

Probably the modifications of the Passion story

\* Similar analysis of 12-16<sup>20</sup> may be seen in the second of W. C. Allen's 'Critical Studies in Mt's Gospel' (*Expos. Times*, March 1900).

March 1900).

† Following on reference to the sufferer's deadly thirst, and the fact that many 'dogs' or wicked ones encompass him and pierce his hands and feet; while the next words are διμμρίσαντο τὰ ἰμάνιά μου ἰωντοίε. Here Mi's language may already have been coloured by this Ps, as also in the use of κινώντιε νώε περαλές; of. Ps 227 πάντει οι διωροῦντίε με ἰξιμιατόρισάν με, ἰλάλησαν in χείλεση, ἰπίσσαν περαλές.

were already part of Mt's way of telling it, before he sat down to write, and spontaneously reasserted themselves, sometimes more, sometimes less decisively, as he freely reproduced Mk. And this may afford us a fresh analogy for the way in which the general tradition of the Lord's ministry, already living in memory, modified the impressions

left by his perusal of Mk.

A good instance of this is the Resurrection, where Mt's narrative is modified by the story of the Guard in the tradition known to him. the women come, not to anoint the body, but only 'to behold the tomb'; and the influence of Mk, if present at all, is very slight. There is no consciousness that the women entered the sepulchre, as in Mk; the fulfilment of Jesus' word in his resurrection is emphasized ( $\kappa a \theta \dot{\omega} s \epsilon l \pi \epsilon \nu$ , cf. 27<sup>63</sup>); and so the element of fear is overshadowed by joy. The great fear, which is the note of Mk, has been toned down in tradition by later feelings on the subject. The rather indistinct account of the promised Christophany to 'the eleven disciples' is part of the generalizing style of oral tradition, where the original facts are set in the light of their abiding bearing on the Church's life. The 'authority' which was largely veiled in Messiah's earthly ministry is now His chief note, shown in the extension of the Kingdom to the Gentiles, and in His abiding presence with His case described. His abiding presence with His own during the days between the Resurrection and the Parousia (note silence as to Israel and the Law, in contrast to Mt 1054.).

(g) Eschatological Standpoint and Date.-Here the concluding Woes on the scribes and Pharisees lead up to the Last Things.

23<sup>34-36</sup>. The blood of the Prophets will come on

them. This is fuller than Lk of colour from Palestinian experiences, and of presage of the reckoning imminent. The addition of 'son of Barachiah' (not in Lk) quite possibly shows that Mt took certain words in  $v.^{35}$  as referring to events early in A.D. 68 (found in Jos. BJ IV. v. 4). 23<sup>37-39</sup>. Their house is deserted by the Divine

presence till they repent. This implicit reference to the Parousia is here arbitrarily connected (against Lk 11<sup>407</sup> 13<sup>341</sup>) with the judgment on Jerusalem (see Charles, Eschatology, Hebrew,

Jewish, and Christian, p. 328).

24<sup>1. 2</sup>. Destruction of the temple (cf. Mk 13<sup>11</sup>.)

Ac 614).

248. Tokens of this and the Parousia.

The specification of the 'Parousia' (only in this chapter in the Gospels) and the phrase survivance. since, found only in Mt (cf. 1389-40.48 2529), point to this being a special form in which this discourse was quoted in Mt's circle (see note below).

24<sup>4-8</sup>. The preliminary troubles \* (άρχη ώδίνων). Clearly Lk is not entirely dependent on Mk. Nor does Mt seem to be so in all parts of this discourse.

249-18. Trial ( $\theta \lambda l \psi \iota s$ ) for Christians-

Vv. 10-12 are peculiar in form (see below on 23. 24 for affinity with Did. 163. 6); and in their light v. 9 may also be recognized as not altogether dependent on Mk, 25 referring to Jewish hatred, 95 to Gentille. What Mk has here, is partly in different

order, and partly occurs in the Commission to the Twelve in Mt (1017-22); cf. Lk 1211. 12. Vv.9-12 seem very significant for Mt's date in virtue of their special phrasing (cf. the Christian section of Ascensio Isaiæ, c. 65-68, or else 80-90 A.D.).

2414. The witness to the Gentiles.

In Mt's form, preaching 'in all the inhabited world' is, in contrast to Mk's 'unto all the Gentiles,' as 'witness to the Gentiles.' Here we probably get the idea of the Gospel in relation to the Gentiles current among Jews in S. Syria. In 10<sup>23</sup> we had the corresponding idea touching Israel: the two are combined in 10<sup>18</sup>. 'And then shall come the end' (in contrast to v.6), i.e. the evertine or final climax—a unique clause in Mt and one going far to date the first Gospel at a period just before the final catastrophe of 'the holy city,' the crisis of whose fortunes is seen to be approaching, as appears from the nota bene in v.15; cf. 10<sup>23</sup>.

24<sup>15-25</sup>. The final Crisis of Distress (θλίψις).

24<sup>15-28</sup>. The final Crisis of Distress (θλίψις).

The forecast in <sup>15</sup> is still on the vague lines of consummate evil in Daniel (a reference made explicit by Mt), of which Caligula's purpose of setting up his image in the temple must have seemed the foreshadowing (cf. Mt's is τόσφ ἀρίω, again making more explicit what is implied in Mk, ὅσω οὐ ði). Lk's deviation, in terms of the actual events of 70, is instructive as showing that these were not yet in view in Mt and Mk; cf. also Lk 21<sup>22</sup>. (See further the article Abounation of Desolation). Vy.18-26 are in the main in terms of current Apocalyptic notions, including Dn 12¹; Lk 21<sup>235-24</sup> again presents a somewhat more developed form of the tradition. The specifically Christian touches, e.g. <sup>23</sup> <sup>24</sup> parallel features found in two documents of c. 64-68 a.D., viz. Didaché 10, and the Christian section of the Ascensio Isaiæ. The former, which echoes its own local tradition rather than the words of any of our Gospels, has, is γὰρ τῶι ἰσχάτωι ἡμίρωις κληθυνθηταν ται οἱ ψιδοσροφηται καὶ οἱ ἀρομίς, κ. στραφητονται τὰ πρώσλαν εἰτ λύπους, αὶ ἀρόκη στραφητατι εἰς μίσως. αὐξανομίνης γαρ της ἀνεμίας (cf. Mt 12) μεσίνουσι ἀλλίλους κ. διάξουσι κ. παραδάσουσι (Mt 11), καὶ τότη σαν τήστατ ε ποσρωπλάνει όχι οἱς θεῦ π. παίτει στρεί το many subordinate agents, as in Asc. Isaiæ (4), where Nero is expected to develop into or reappear as the incarnation of Berial, and along with Berial's hosts of evil spirits to parody Beloved's (Messiah's) works of power.

2427.28. The Son of Man comes like the lightning.

Mt (Lk elsewhere, 17<sup>28</sup>f.) repeats the warning against being led away by rumours of Messiah's having been seen in various retired places (of. Apoc. Bar 48<sup>24</sup>)—so showing the topic of the hour when he wrote. The comparison of Messiah's Coming to lightning is found in Apoc. Bar 53<sup>26</sup>c, of. 72<sup>16</sup>f. (Apoc. A<sup>2</sup>, not long before 70), being suggested apparently by the imagery of Dn 7<sup>13</sup>c.

2429-81. The Coming of the Son of Man.

2429-81. The Coming of the Son of Man.

Here iddies points to an early date for Mt. i.e. before A.D. 70. The signs of v.29 are the conventional ones derived from prophecies like Is 1310, 344, and appear in varying forms in the three Synoptics. V.302 κωὶ νότι φωνίσται νό σημίον τ. ώνθι is εἰρανῶ, κ. νότι κόμνται κῶσαι αἰ ψιλωὶ νῆς γῆς is peculiar to Mt. The former half is akin to Did. 166 κωὶ νότι φωνίσται τὰ κημείω τῆς ἀλθιῶνεις κρῶτον σημίων εκτικένειο is εὐρανῶ; the latter comes from Zoo 1210π (cf. Rev 17). In v.300, where it is parallel to Mk and Lk, Mt has νοῦ εὐρανῶ after τῶν νεριλῶν, as in Dn 718, whence all derive their language. In 31 Mt, as distinct from Mk, speaks of the angels sent forth, as Messiah's (ωὐνοῦ); of their agency in gathering the elect (ἐντεννεῖρωνη); and of the 'great trumpet' which summons these. This last Jewish trait appears not only in 1 Th 416, 1 Co 1552, Rev 88-914 107 1115, but also in Did. 166 in the same position, κρῶτον σημίον ἰκαντάστων τὰ τρῶν είναν του καινότων (και τὰ του καινότων (και τὰ του καινότων (και τὰ τὸν κινότων του καινότων (και τὸν του καινότων (και τὸν του καινότων (και τὸν του καινότων (και τὸν του κινότων (και τὸν τῶν κινότων τὰ τὸν τῶν κινώτων τῆς τῆς οτ ἀπό τῶν τισσάρον ανίμων (see Zeo 26, Dt 304) into God's Kingdom (94 105), 2429.33. The parable of the Fig-tree.

24<sup>32, 33</sup>. The parable of the Fig-tree. 24<sup>34-42</sup>. The exact time of the Coming unknown.

24<sup>81-42</sup>. The exact time of the Coming unknown.

Mt, like Lk, goes its own way after v.<sup>26</sup>, citing the Noachic Deluge for the way in which the Parousia will surprise men (cf. Lk 17<sup>26f. 20</sup>), and intimating how it will separate neighbours (cf. Lk 17<sup>26f. 20</sup>), and intimating how it will separate neighbours (cf. Lk 17<sup>26f. 20</sup>), and intimating how it will separate neighbours (cf. Lk 17<sup>26f. 20</sup>), and intimating how it will separate neighbours (cf. Lk 17<sup>26f. 20</sup>), and intimating how it will separate neighbours (cf. Lk 17<sup>26f. 20</sup>). But each ends the solemn call to vigilance in its own way, Mt being fullest. Its form seems to reflect the dangers of its day, viz. bad stewardship of the sacred charge of fellow-servants, and hellowship with the worldlings (v. 48), men being thrown off guard hy their Lord's long delay. This is just the state of things in the Christian section of Asc. Isawe 3, where the faithless shepherds are spoken of. Such shall share the lot of the 'hypocrites,' the term by which Pharisale Jews were spoken of the term by which Pharisale Jews were spoken of the circle whose tradition Mt inherited (62. 18 75 157 2218 23187.)—another link with the Didaché (81. 2 'Let not your fasts be ματὰ τῶν ἐντεκριτῶν').

(h) The Genealogue.—This is of importance for

(h) The Genealogy.—This is of importance for our Evangelist's scope and method. As Zahn says (The Apostles' Creed, 126 ff., cf. Einleitung in das NT, ii. 271 ff.), this Gospel is 'a carefully arranged account of events of which a superficial

<sup>\*</sup>These reproduce in general conception the 12 divisions or elements in the Last Times as given in an Apocalyse embedded in Apoc. Bar (27-301), and dating c. 50-65 A.D., i.e. before the Jewish War. They are in this order—(1) The beginning of commotions; (2) slayings of the great ones; (3) the fall of many by death; (4) the sending of desolation (or 'the sword'); (5) famine; (0) earthquakes; (7) terrors]; (8) portents and incursion of the Shedim or demons; (9) the fall of fire; (10) rapine and much oppression; (11) wickedness and unchastity; (12) confusion from the mingling together of all these. There follows a reference to 'the consummation of the times. In our Gospels we find these elements of popular Jewish Messianic expectation, blended with features drawn from the experiences of the Palestinian Church in particular, viz. the appearance of pseudo-Mossiahs, and persecutions. Mt's order keeps close to the above list, including (11) alluded to in v.12 (2\*\*\*pui\*\*al); while Lk's puts (6) before (5), as in another kindred place in Apoc. Bar (70%), and also alludes to (7)—(0). Charles (9p. cit. 325 fl.) thinks that an independent apocalypse (of. Eus. HE III, v. 8) underlies Mt 246-8. 10-22. 29-31. 247.).

knowledge is for the most part assumed.' We find 'not the simple confession that Jesus is the promised Messiah. The point kept strictly in view from the first page to the last is much more apologetic, and, so far as it is unavoidable, polemic.' In spite of all so bitterly urged against Jesus' claim to be the Messiah, that claim is absolutely true. Thus, though the Jews scoff at His obscure origin, He fulfils the prophecy of the Messiah. It is from this point of view that we must read ch. 1 and, as Zahn well shows, much in ch. 2 likewise. Mt lavs before his readers a genealogy artificially constructed in terms of the throne-succession in the Davidic line, and not that of the actual progenitors of Joseph (as in Lk). But why, we ask, should he go out of his way to make certain additions, need-less to a bare genealogy, including four women's names? Above all, why choose 'women whose characters are highly offensive to Jewish, and in three cases out of four to every human, feeling?? Zahn alleges 'the same apologetic purpose which governs his account of the Conception and Birth of Jesus'; and even argues that the well-known Jewish slander that Jesus was a son of shame (cf. Laible, Jesus Christ in the Talmud, p. 7 ff.), is itself presupposed by Mt's genealogy, just as 28<sup>11-18</sup> presupposes the Jewish story that the disciples stole the body of Jesus. This is going too far, even were the direction followed the right one. But this is doubtful. There was another Jewish objection to be met. Granting Joseph's paternity,—which the Jews always assume in the Gospels,—was Joseph of Davidic descent? And further, was God likely to send Messiah as the son of a carpenter, even though of Davidic stock? To this twofold query Mt's genealogy is a reply; and to the latter phase of it the additions already alluded to are an implicit rebuke.\* The God who chose from various brethren the younger son's line, and who overruled unlikely unions to continue the chosen seed, -this God of Israel ever worketh according to His own good pleasure, and His ways of sovereign elective freedom are often marvellous in men's eyes. Thus it is in the home of the humble, yet Davidic, carpenter Joseph, that Messiah Jesus has really been How, it is Mt's next step to show in 11887.

born. How, it is Mt's next step to show in 1 185.

Since the discovery of the Sinattic codex of the Old Syriac version of the Gospels, it has been argued that our text of Mt 116 is not original, but secondary. Not only is this retuted by study of the various forms in which divergence from our oldest Gr. MSS occurs in certain groups of authorities (see, e.g., Zahn's Kinletiung, ii. 291-293); but even the view that Mt used a source in which Joseph's full paternity was assumed, is itself unlikely. For the way in which Mt calls attention to the numerical symmetry of the three divisions in the pedigree, each fourteen ending with a great crisis in Israel's fortunes, suggests that he has himself so constructed it.† Further, the four women cannot have stood in an earlier source, and yet here they seem integral. The pedigree is through and through didactic: and the fact that it was from the first compiled by the aid of 1 Ch 1-3, shows that it was never other than in Greek, the language of our evangelist (cf. W. C. Allen, Kzos. Times, Dec. 1899). Hence it seems best to conclude that Mt did not use a pre-existing genealogy (see Genealogy of Jesus Cluster for another view: yet of, also ii. 6459).

A fresh witness for 116 has just come to light in the ancient hasis of the Dialogue of Timothy and Aquila (taelf of the 5th cent at least). This basis is carried back by its editor, F. C. Conybeare, to the Dial. Jasonis et Papisci, c. 135. The Christian cites Mt's genealogy, and gives 116 first in the form, 'Lawis' δi vie 'Lawis' δi μενικόθη έ X. i viêg σ. θιοῦ. These passages seem to "Similarly the enigmatio, 'He shall be called a Nazarene,'

\*Similarly the enigmatic, 'He shall be called a Nazarene,' seems an implicit reply to criticism. The flinging at Jesus of the epithet 'Nazarene'—a term of contempt on lofty lips—really fulfils the substance of 'the prophets' as a whole, touching Messiah's humble and even despised lot (e.g. as the faithful 'Servant of Jehovah,' Is 5312). 'This will be the more convincing if even some of the other numerical arrangements which Sir J. Hawkins suggests as intended by Mt, hold good (Horas Symopt, 131 ff.). We cannot, however, see that the number of the 'formula' verses, 728 111 1333 191 261, is intentional. They are far apart, and no attention is drawn to their number any more than in the case of the recurring formula in Jg 26-1631.

cast light on the real origin of the readings unsupported by our oldest Gr. MSS (for the evidence in full see art. Jesus Christ, vol. ii. p. 644). They are in fact explanatory glosses, such as the Dialogue presents us with in reply to the hostile gloss of the Jew, Jaxab joinnets t. Jest, to a reply to the hostile gloss of the June, Jaxab joinnets t. Jest, to a reply the majast, if te inversed linear is linear to the Jew. X., sai leave, in inverse is the first linear to the Jews glossed to about M. One way, in the teeth of the narrative; the Christians glossed it another, in harmony with the narrative. And this creating some MSS crept into some MSS.

Supplemental Notes.—This Dialogue quotes the parable of the Husbandmen in extenso; and in so doing shows the way in which materials derived from similar sources tended to blend in the memory of an early Christian. The case is the more instructive that the writer has just quoted Isaiah's parable-germ of Jehovah's vineyard (51π), to which the Gospel parable was probably meant to point back: and we see how Isaiah's language affects the form at the beginning of Christ's parable. It runs y and information to point back: and we see how Isaiah's language affects the form at the beginning of Christ's parable. It runs y and information in the position of ληνών (Mt) or washing affects with a size a suppose x is size a suppose x is a suppose x in the two—which were in fact both integral—to a wine-press. Here the writer quotes freely, but is quite possessed by his sources, of which Mt counts for most. Thus he reproduces almost every syllable and letter of the triple tradition, while the result is a wonderfully eelectic composition, produced not mechanically, but by the subtle tricks of memory. We may be prepared, then, for the recurrence of similar phenomena in Mt.

The Fayyom papyrus fragment parallel to Mt 2(β11. 321, Mt 1327.281, is too scanty and mutilated to justify much inference. But it omits a verse common to Mt and Mk; while it combines features of both (is τωίτη τῆ νικτί with Mk, τὰ πρόβ. Ικκκργκ, καὶ is κάντει εἰν κίνι μις τη τη μικτί with Mk.) It may, then, represent or al tradition; but more likely a free memoriter use of Mt and Mk in some manual of catechesis or edification like the Oxyrhynchus Logia.

אמץ פוז שרמעדשה אמ[ידור פי דמעדין] דין יעאדו האמילמאורלוורסידשו אמדש το γραφεν παταξω τον [ποιμενα και τα] προβατα διασκοραισθησ[ονται εποντος] [το]υ πετ και ει παντες ο[υκ εγω λίγει] [ες] ο αλεκτρυων δις κοκ[κυξει και συ] [ TPWTOV TPIS & ] TOPYN[ ON LLS]

Here wondres is to be noted as pointing to a series of detached sayings rather than a gospel.

iii. Conclusions.—On the whole, then, the following results emerge as the most probable. (1) The order of narration common to the latter parts of Mt and Mk in particular, the closeness of which is made the more striking by the deviation of their earlier parts, points to the use by Mt of the Petrine memoirs written by Mk. (2) Conversely, the notable deviation of Mt and Lk in the order of the Discourses and Sayings (Logia element) common to them, combined with their textual variations, goes strongly against common use of a Logia document, as distinct from an oral Greek tradition which reached them in detached portions and in somewhat different forms.\* (3) The Logia familiar to Mt, who had long taught them cate-chetically,—so that their vocabulary and his own were virtually one and the same,-reflected in epitome the whole experience of church life in certain Palestinian apostolic circles. They were rooted in the memories of the germinal Christian society, the apostles who had companied with their Master. But they contained also echoes of the first missionary commission as repeated for the guidance of others in the early days of Palestinian evangelization; of the persecution that had been their lot all along; of the forms in which the Master's principles of fellowship among brethren took actual shape as the life became more organized; and not least of the terms in which the polemic against their religious environment of Pharisaic Judaism was conducted in ever-growing volume and detail. That is, these Logia, far more than the Lucan, are memorials of the life of the Palestinian Church as well as of its Messiah.
(4) The Matthæan Logia have as their nucleus the common apostolic didactic tradition, which took shape in the early Jerusalem days under the lead of Peter-a tradition which passed into Mk in

"Lk probably had in his 'special source' a mixed gospel embodying the bulk of his *Logian* element as it now stands in our Lk.

its later Petrine form. At some stage which we cannot now trace they took on the special impress of the Apostle Matthew, probably in a ministry of which Galilee, rather than Judea, was the scene. In this form they passed, as Jewish unrest became more acute, to the neighbouring parts of Syria, in the person of our evangelist among others, still receiving fresh elements in the course of oral teaching.† And it was at this stage that they took written shape, as the main constituent in the mixed gospel composed with the aid of the Marcan memoirs of Peter. The freedom with which the writer has accommodated Mk's narrative to massed Logian discourses, suggests that these discourses already existed orally much in this massed form, and were not then first thrown into it by Mt. That Mk should early reach S. Syria is the more probable that St. Peter was evidently held in high honour there, witness the special references to Peter in 1428 1518 1618 1724 1821; cf. 102, 'First, Simon who is called Peter.' Indeed it seems likely that Peter had left a strong oral knew the substance of Mk before it came into his hands. This may help to explain certain phenomena in his use of it. (5) The fact that the Matthean cycle of Logia was taken up into our Mt, gave it its distinctive status and acceptance; and the actual facts of its origin were soon forgotten-probably never known outside a narrow circle. Thus the indirect sense in which Matthew was its author and guarantor dropped out of tradition, and Papias could simply take for granted that the Gospel κατὰ Μαθθαῖον was from the apostle's pen. (6) The actual conditions giving its author the stimulus to compose his artistic and reflective Gospel, must be gauged from the perspective in which he places the central Figure. He is set forth as the full blossoming of Israel's prophetic ideal of the King ruling in righteousness, and in wondrous gentleness too. The picture is the implicit corrective of the false Messianic ideal which had made the nation as a whole reject Jesus, and had already led it yet further astray in the path had already led it yet further astray in the path of earthly force. Thus, as we have seen, the urgency of the warnings against going after false Messiahs on the felt approach of the great national crisis (conceived on the lines of Daniel's prophecy of Jerusalem's last trial and in terms of current apocalyptic based thereon), points to the actual crisis of 68-70 as to the specific occasion which gave it birth. It is an appeal to waverers of all sorts to trust the true King, whose reign is of heaven, and depends on the action of God, not of men; and not to become involved in the current of the false national ideal. It is meant to do the same work as the Epistle to the Hebrews, only in another fashion and at a rather later date. And, like it, it is at once apologetic and polemical: it is a dissuasive in the form of a positive presentation. Jesus is God's Messiah in spite of all superficial appearances, and that by realizing the essence of Moses and the Prophets. It is hard to see which of the alternative dates, shortly before or after A.D. 70, makes the Gospel the more pertinent as a book for the times—and so satisfies the law of all early Christian writings. On the whole, Mt 24 adheres so closely to Mk's standpoint, in contrast to Luke's modifications and omissions, after 70notably in counsels practical before 70, but not after (e.g. 186.186.20, esp.  $\mu\eta\delta\dot{\epsilon}$   $\sigma\alpha\beta\beta\delta d\tau \varphi$ , 22)—that c. 68-69 seems the best date.

\* Similarly, the Epistle of James echoes in its own way not a few of the precepts of the great Sermon, esp. those on Swearing (otherwise peculiar to Mt) and on Censoriousness towards brethren (= towards 'Law,' 41', perhaps that of Mt ?1, Lk 63').

† This kind of expansive and explanatory activity of the Christian 'scribe instructed in the kingdom of heaven' seems taken for granted in 18<sup>52</sup>: cf. 23<sup>24</sup> for the catechist.

In 2415b is véry kylép follows Dn's forecast of Temple-desecration and not the facts of 70. Some, however, doubt whether Mt 2819 can have been written before 70, since it implies use of the triune baptismal name. But, if a similar clause be an original part of Didaché 7, its evidence may be cited. For the work as a whole, and not the 'Two Ways' only, seems to be implied by the Christian interpolation in Ascensio Isatics, which perhaps falls before Nero's death (i.e. a. 65-68). Hence there is nothing decisive against c. 68-69 A.D.; while the statement in 278, 'that field is called the Field of Blood until this day,' and casual references to 'the holy city' and the temple-worship, are more natural at that date than after the utter ruin and change of 70. So with the reference to 'going over the cities of Israel,' 1028. Perhaps, then, 2265. 75 are additions after 70: contrast Lk 1421.

(7) The evangelist writes, however, with a sort of detachment hard to imagine in one living in Palestine about 70. Thus it is best, and most in keeping with the Greek form and with internal evidence, to locate him in S. Syria, say Phœnicia (4<sup>24a</sup> 15<sup>21st</sup> alongside Mk 1<sup>28</sup> 7<sup>24st</sup>, cf. Ac 11<sup>19</sup> 15<sup>3</sup>). That the author was a Jew, is clear from the text and manner of his special OT quotations, which so colour his work. But his was a spiritual Israel, new while old, inclusive not exclusive, conceived on prophetic lines after the manner of Peter and the Apocalypse of John— with the latter of which its affinities are most marked. Jesus of Nazareth is really the Christ, since in His person, teaching, work, and even His tragic end, all has been as prophecy had intimated. While as to the scope of Messiah's *Ecclesia*, the elect Israel, it was but a little thing that God should through Him raise up Jacob: the nations, too, were to be His inheritance, by the incorporation into the Kingdom of all who were of faith [cf. Kübel (as below), Introductory Remarks, trans. in *Bibl. World*, i. 194 ff., 263 ff.].

(8) All theories of Mt must be both problematic and complex. Zahn's theory of an 'apologetic' Aramaic' Gospel by the Apostle Matthew, c. 62 A.D., turned into Greek, c. 85, is too simple for the phenomena. The prevalent 'two document' hypothesis, with the use of special oral traditions, comes far nearer the truth. But it may be doubted whether the second or Logian document is needed to account for Mt's divergences from Mk; and whether the differences as well as similarities of the Logian element in Mt and Lk are not best explained by a common Gr. Logian type of catechesis + behind both. In favour of such a 'one document' hypothesis may be alleged the Logian quotations in the Didaché, per-haps also in the first Ep. of Clement and the Oxyrhynchan fragment, as seeming to reflect local cate-chesis rather than either Mtor Lk. It would be some time before a written gospel superseded traditional local usage as the prime factor in forming the Logian equipment of Christians. It is in Ignatius, then, that we seem first to have good evidence of Mt as an influence at work (e.g. ad Eph. 19<sup>2</sup>). But not even then did oral tradition cease to operate. To its reaction on the written text we owe in large part early secondary readings, such as those mis-named 'Western': and from it, especially in its later stages, come those Logia known as Agrapha.

LITERATURE.—The following aims at indicating only the more representative works of earlier times, with a rather fuller citation of those since 1880.

tion of those since 1880.

Taxr.—In checking the witness of the MSS and VSS, we have, besides the fragments of Tatian's Diatessaron (in Hamlyn Hill, The Earliest Life of Christ, pp. 333-377), which are common to the four Gospels, a special aid in the 3rd cent. papyrus of Mt 11-30 (Grenfell and Hunt, Cayrhynchus Papyri, i. pp. 4-7). This supports not only the usual reading in 115 but also the 'Neutral' type of text resting on RB.

<sup>\*</sup>We can merely note the weighty witness of Dalman (Die Worte Jewu, 1898) against the directly Aramaic antecedents of our Gospel-material. The Hebraisms of our Gospels he traces chiefly to LXX influence on their writers.

† The absence of all historical trace of such a revered writing as an Ur-Matthäus would have been, is rendered doubly inexplicable if it be granted that it was ever current in Greek. Here is the one strong point of Zahn's theory over against the 'two document' theory of Weiss and others.

ORIGINAL LANGUAGE.—There is a special treatise by Gia, Dis Originalsprache des Mt, Paderborn, 1837. But the most authoritative discussion in relation to the whole subject of the Semitic basis of the Synoptics is that in Dalman, Die Worte Jesu, Bd. i., Leipzig, 1898. There, as also in Zahn's Einleitung in A. NT, Bd. ii., will be found the earlier history of the subject. Relation to the Gorpel or the Hebrews (1879); Handmann, Hebraerevangelium (1888), in TUV. 3 (with good Geschichte der Kritik); Resch, Agrapha (1888), in TUV. 3 (with good Geschichte der Kritik); Resch, Agrapha (1888), in TUV. 3 (with good Geschichte der Kritik); Resch, Agrapha (1888), in the original Nazarene Heb. Ev. = the Heb. Matt., i.e. Papias' Logia] is to be sought the Archimedean point of the whole Gospel problem, has met with little support (yet see McGiffert's note on Eusebius, iii. 27). It is largely another case of ignotum per ignotius. Thus Nicholson falls back on the rather effect view that Mt wrote both in Greek and Hebrew (= the Heb. Ev.). Handmann and Resch agree in denying the identity of the Heb. Ev. with the supposed Hebrew Matt. The former makes it escend source of our Synoptics, alongside 'Ur-Markus,' and perhaps even what Papias meant by the Logia; the latter emphasizes its apocryphal features (even in its original form), and makes it dependent on our Matthev. Harnack, here in principle agreeing with Zahn, takes a middle position, making it originally a sort of cousin of our Matt., each being an enlarged edition of the Matthean Logia. Only Harnack differs from Zahn in making both recensions of about the same date (not long after 70). Finally, J. Armitage Robinson, in Expos. 5th Heb. Ev. in such a way as to traverse the main conclusion of these two scholars.

Commentations.

these two scholars.

Commentaries.—Patristic and Mediæval: Origen (in Greek for 133-223, in Latin to 27), Ohrysostom (91 Homities, ed. Field, 3 vols. 1839), Hilary of Poitiers (ed. Oberthür, tom. vii.), Jerome, Augustine (on parts), Bede, Theophylact, Euthymius Zigabenus (ed. O. F. Matthei, 1792, a valuable work), Thomas Aquinas. To these may be added Cramer's Catence gree. patrum in NT, tom. i. 1844.

Reformation and Post-Reformation.— Erasmus, Luther, Oalvin, Beza; the Roman Catholics Maldonatus (1696; Eng. tr. Hodges, 1894), Jansen and Cornelius a Lapide; Grotius,

Reformation and Post Reformation. — Erasmus, Luther, Oalvin, Beza; the Roman Catholics Maldonatus (1692; Eng. tr. Hodges, 1894), Jansen and Cornelius a Lapide; Grotius, Calovius, Hammond, le Clerc, Olearius (1713), J. C. Wolf (Curæ Philoge, et Crit. 1733), Bengel, J. J. Wetstein (NT græc. 1751), H. E. G. Paulus (1800), Campbell (18073), Kulnoel, Fritzsche (1826), Bland (Cambridge, 1823), Oishausen, Baumgarten-Crusius, de Wette, Ewald, Meyer, Alford, Patritius (R.C.), Bleek, Morison, M'Clellan, Keil, Lange, Schaff and Riddle, Schanz (R.C., 1879), Nicholson, Knabenbauer (R.C.), Nösgen (1886, 1897), Broadus (Philad. 1887), Holtzmann (Handkom. 1889, 18924), Kübel (Ezeg. Hom. Handb. 1889), Meyer-Weiss (18908, 18989), Maclaren (1892), A. B. Bruce (Expos. Greek Test. vol. i.).

Broadus (Philad. 1887), Holtzmann (Handkom. 1889, 18922), Kübel (Exeg. Hom. Handb. 1889), Meyer-Weiss (18908, 18989), Maclaren (1892), A. B. Bruce (Expos. Greek Test. vol. i.).

LUUSTRATONS.—Hobrew and Talmudic parallels are collected chiefly in the Horce Heb. et Talm. of Lighthoot and Schöttgen, and in Gerh. Meuschen, NT ex Talmude et antiquit. Ebrecorum illust. 1786; Weber's Jid. Theologic and Dalman's Worte Jesu also contribute thereto. In the enormous accumulation of Greek parallels to word or phrase, the following have done good service: Price, Comm. in Varios NT Libros (1660): Raphel, Annot. Philolog. in NT ex Xenophonte, Polybio, Arriano et Herodoto (1709-31); Elisner, Observ. sacree in NT libros (1725), Falairet (French pastor in London, 1752); Kypke (1755); Krebe(esp. from Josephus, 1758), and Loesner (esp. from Philo. 1777); Campbell, Dissertations, 1783; Grinfield, Scholia Hellenistica in NT (1848); and Fleld, Otium Norvicense, Pars iii. 2 (1899).

DISCUSSIONS ON SPECIAL SECTIONS.—Lutteroth, Essai d'interprétation de quelques parties de l'Evangile selon S. Matt., 1864.—To. Nativity: Resch, Kindheitseuangeium, TU z. 5 (where further references will be found). Sermon on the Mount: Trench (1844), Tholuck (translation, 1839), H. Weiss (Freiburg, 1893). The Lord's Prayer: Chase, Lord's Prayer in the Early Church (Camb. Texts and Studies, i. 3, 1891). Parables: Trench, Arnot, Bruce Parabotic Teaching of Christ (1888), and Jülicher Gleichniereden Jesu (1883, 1890), review in Expos. Times, Sept. 1899, and in JTS, Jan. 1900). Eschadological Discourse: Hoelemann, Bibelstudien (Leipzig, 1800), 129-186; cf. Weiffenbach, Der Wiederkuntsgedanks Jesu (Leipzig, 1873); Schwartzkoff, Die Weissagungen Jesu Christi (1896, Eng. tr. 1897). Origin, Characteristes, Synorico (1890), pp. 1-24; Ft. P. Badham, St. Mark's Indebtedness to St. M

MATTHIAS (Maτθlas [Tisch. Treg. WII Maθθlas], abbreviated from Marraelus, the Gr. form of There 'gift of J"; cf. the name Theodorus).—The disciple selected along with Barsabbas, after the Ascension, from those followers of Christ who were deemed qualified for appointment to the apostleship vacant through the death of Judas (Ac 1 16-26). The procedure was adopted on the initiative of St. Peter, who applied Ps 1098 to the circumstances; and the assembled Christian brotherhood.\* The general qualification required was to have 'companied with us (the apostles) all the time that the Lord Jesus went in and out among us.' Barsabbas and Matthias had also, presumably, special graces of character and gifts of teaching and administration. After prayer, addressed probably to Christ,† and a solemn appeal to the lot,‡ Matthias was elected.

This is the sole instance of the lot being among the lot.

This is the sole instance of the lot being employed in the history of the Apostolic Church, and it occurs significantly between the Ascension and Pentecost, when the disciples were 'orphans' (Jn 1418). Stier (Words of the Apostles, in loc.) regards this election as premature and unwarranted, the outcome of St. Peter's officious impetuosity. 'The lot fell: not the Lord chose.' He holds that St. Paul was the true successor of Judas, chosen, like the other apostles, by the Lord Himself. It may be granted that the appointment of Matthias stands on a somewhat lower level than that of the original Twelve and of St. Paul; but, in the absence of any direction to the contrary, the procedure was a legitimate exercise of human wisdom cedure was a legitimate exercise of numan wisdom in dependence upon divine guidance; and St. Luke, the 'beloved' friend of St. Paul, appears to endorse the election (representing, doubtless, the general opinion of the Apostolic Church); for after speaking of the eleven apostles (Ac 126) he refers (Ac 62) to the 'Twelve.' §

The historical character of Matthias' election has been impugned by Zeller (Acts of Apost., Eng. tr. i. 168) on account of (1) the assumption that the apostles remained in Jerusalem; (2) the close connexion of the narrative with Pentecost. But the departure of the apostles to Galilee after the Resurrection did not preclude their early return to Jerusalem; and the second objection can have

weight only with those who reject entirely the supernatural in primitive Church history.

According to Eus. (HE i. 12, ii. 1) and Epiphan. (Hær. i. 22), Matthias was one of the 'Seventy' (Lk 10<sup>1</sup>). Hilgenfeld identifies him with Natha-

(Ik 10¹). Higenfeld identifies him with Natha
So Beng., Stier, Mey., Alt., Baumg., etc. on the ground that the subj. in v.22 must be the same as in vv.24.26. Some (Mosh. Ham. Jacobson, etc.), assign the selection to the apostles, taking the subj. from v.17.

† So Beng., Ols., Baumg., Alt., Words., Hows., and most commentators, on the ground that the choice of apostles is always referred to Christ (Ik 6½, Jn 670 15½, Ac 1½), the same Greek word being used. Meyer, Holtz., Zok. refer 1½ to God (Ac 422 155).

‡ The lot, presumably, would be taken in the usual way, the names of the two men being written on tablets, and shaken in a vessel, and he whose tablet first leapt out being regarded as divinely designated (Iv 16½, Nu 2665, Pr 1623). So late as 1731 the Moravians decided by lot the question whether they should retain their own organization, or be incorporated with the Lutherans (Gloag, fn loc.). Wesley also had a predilection for sortliege (Southey, Life of Wesley, i. 136, 187). Mosh. (Comm. Sec. 1. 14) and others (Gagneius (doubtfully) Salmeron) maintain, chiefly on the ground of lower, instead of ligate in v.26 is the correct reading, the rendering 'for them' is legitimate.

‡ The objection of Stier, that St. Luke here avoids the expression 'Twelve Apostles,' is hypercritical.

It is noteworthy that the ancient Syriac translation of Eussubstitutes Tolmas and the ancient Syriac translation of Bussubstitutes Tolmas and the ancient Armenian version Hartolmas (Bartholomew) for Matthias (when referring to him as one of the Seventy), embodying probably a very early local tradition that Matthias bore this additional name. See Nestle in Expos. Times, ix. 568 (Sept. 1898). This Tolmai or Bartholomew may have been a brother or other relative of Bartholomew the Apostles, to sovid confusion with whom the other name Matthias would commonly be used. Or perhaps this Syriac

VOL. 111.-20

nael, owing to the two names having nearly the same meaning.\* A tradition preserved by Niceph. Call. (*HE* ii. 40) represents Matthias as labouring in Ethiopin; and in the apocryphal Acts of Andrew and Matthias + (assigned to the 2nd cent.), Matthias evangelizes the Ethiopian man-eaters, from whom he is delivered by St. Andrew. See ANDREW. Another ancient tradition assigns to Matthias Jerusalem as scene of ministry and place of burial (Pseudo-Hipp. in Combesis, Auct. Nov.).

The Gnosticism of Basilides, or of his followers, was professedly based on the παραδόσεις of Matthias, which the Basilidians held to embody instruction secretly received by Matthias from our Lord (Philosophoumena, vii. 20). This work is probably identical with a Gospel of Matthias referred to by Origen (Hom. in Luc. i.) and by Eus. (HE iii. 25), who includes it among spurious works cited by heretics under names of the apostles.‡

LITERATURE. — The commentaries on Acts quoted above; Lipsius, Apocr. Apoc.; Seufert, Zwölfapoct.; Bp. Beveridge, Works, vol. i.; Theolog. Repos. i.; Congreg. Mag. xxvi.; J. Cochrane, Difficult Texts, 1851 (regards Matthias' election as unwarranted).

MATTOCK (הְּיֶּחַתְּהָ, δρέπανον, 1 S 13<sup>20, 21</sup>, הַטְיֶּרָה, ἄροτρον,
Is 7<sup>20</sup>; Arab. ma'wil, a pickaxe).—The pickaxe used

MA'WIL OR PICKAXE.

in Syria is of different shapes, but the most common has a long arm for breaking up the ground, and a

has a long arm for breaking up the ground, and a tradition originated in a confusion occasioned by a possible early anticipation of the double later identification (1) of Bartholomew with Nathanael, and (2) of Nathanael with Matthias—a confusion which might lead to Matthias being identified with a Bartholomew.

"John Lightfoot had previously (Com. on Ac, in los.) regarded this identification as tenable, but preferred on the whole to identify Nathanael with the Aposte Bartholomew.

† So the oldest MS, which Tisch. follows; some later MSS substitute Matthew for Matthias. Lipsius, however (Apoc. Apos. iii. 258), regards these Ethiopian traditions as really referring to Matthew.

† Some fragments of the \*\*capablesis\* are preserved by Clem. Alex., and indicate a high moral tone: 'When the neighbour of an elect person falls into sin, the elect one sins himsel' (Strom. vii. 13). 'We must content with the flesh, and in our treatment of it yield nothing in the way of wantonness to its craving' (ib. iii. 4). The reference in the Philos., however, indicates that the work countenanced Gnostic speculations.

short broad one, like a small axe, for cutting roots. In ploughing, the plough is always followed by one or two men with pickaxes, breaking the large clods of earth turned up by the ploughshare, or digging up the ground which cannot be

MIJRÄFÄT OR 110E.

reached by the plough. The hoe (Arab. mijrafat) is also used both for digging and for filling baskets with earth for removal. The shovel (rufsh or mirfashët) is sometimes used. The RVm of 1 S 13<sup>21</sup> is the same as the Arab. Version.

W. CARSLAW. MAUL. — In Pr 25's the Arab. Version gives mikma'at for maul (۲99). It is a stick for striking a person on the head as a mark of disgrace, but it may also mean a club. Clubs are always carried by the shepherds of Lebanon, slung from the wrist by a thong or cord. The head of the club is round and heavy, and is sometimes studded with iron spikes. The common name for it in Lebanon is spikes. The common name for it in Lebanon is dabás; in Egypt, nabát. In Jer 5120 the Heb. ppp is tr. in RV 'battle-axe,' and in the marg. 'maul.' In the Arab. VS it is fa's, an axe, not very unlike ppp in sound.

W. CARSLAW.

MAUZZIM.—The text of the AV of Dn 1138 contains the title 'the God of forces': the marg. has 'Heb. Mauzzim, or Gods protectors.' The same Heb. word פְּעָנִים occurs in the beginning of the next verse. Our marg. note may be traced to Theodotion's rendering,  $\theta \epsilon \delta \nu$  maw the trace to Induction's rendering,  $\theta \epsilon \delta \nu$  maw then, which, however, he does not repeat in v. s. The Vulg. is more consistent: 'Deum autem Maozim . . . et faciet ut muniat Maozim.' The LXX has no trace of this inclination to find a proper name here: in v.88 the present reading is ξθνη loχυρά, and in v. δ όχυρωμα loχυρόν; but Jerome, in his Commentary on Daniel, toχύρον; but detoine, in his confinencity on Danies, states that its rendering in v. 38 was deum fortissimum [Is έθνη, a corruption of θεόν?]. Aquila has θεόν loχύων. The Rhemish Version follows the θεὸν Ισχύων. The Rhemish Version follows the Vulg.: But he shall worship the god Maozim.... And he shall do this to fortify Maozim,' etc. Luther's Bible is under the same influence, 'seinen Gott Mäuzim . . . stärken Mäuzim,' as is also the Authorized Dutch Version, but not quite to the same extent, 'den god Maüzzim . . . vastigheden der sterkten.' The Pesh. has 'strong god . . . strong fortress.'

It is now universally agreed that Mauzzim is not a proper name. Hitzig proposed to divide the word into two, reading of two (which at Is 234 is the designation of Tyre), and taking property to be Melkart, the god of Tyre. But this seems unnecessary. 'The god of fortresses,' v. s, and 'the strongest fortresses,' v. s, of our RV are an adequate rendering. The only remaining dispute is as to who was meant by 'the god of fortresses.' Livy (xli. 20) states that Antiochus Epiphanes whose deeds Daniel here depicts—began to build a splendid temple at Antioch in honour of Jupiter Capitolinus. Hence it has been inferred that this

is 'the god of fortresses.' Again, 2 Mac 62 informs us that he re-dedicated the temple at Jerusalem to Jupiter Olympius. And this has given rise to the conjecture that the Olympian Jupiter is the one referred to. With equal reason might the same verse induce us to fix on Jupiter Hospitalis. A yet more doubtful conjecture is that Mars was intended. And, on all grounds, Layard's suggestion must be put aside. He was inclined towards the Assyrian Venus, who is repreinclined towards the Assyrian venus, who is represented as 'standing erect on a lion, and crowned with a tower or mural coronet.' Perhaps the choice, if a choice must be made, lies between Jupiter Capitolinus and Zevs Πολιεύς, 'the guardian of the city,' the family god of the Seleucids, to whom there was an altar on the Acropolis at Athens, whose claims are strenuously maintained by G. Hoffmann and Behrmann. In point of fact the evidence is not sufficient to justify a decision.

As curiosities of exegesis may be mentioned the view of Sir Isaac Newton and others, that the Mauzzim of Dn 11<sup>88</sup> are protectors or guardians, the verse being a prediction that the doctrine of guardian angels should be introduced by the Roman Antichrist, and Pfeiffer's view that 'the idol of the Mass' is intended. J. TAYLOR.

MAW (Anglo-Sax. maga, the stomach).—This old name for the stomach is used in Dt 18<sup>3</sup> as the tr. of ητρ in its only occurrence. RV uses the same word in Jer 51<sup>34</sup> for AV 'belly' as tr. of τρ in its only occurrence also. The tr. in Dt 18<sup>3</sup> is from Tindale, who uses the word also in his exposition of Mt 7<sup>18</sup> 'Your prayer is but pattering without all affection; your singing is but roaring to stretch out your maws (as do your other gestures and rising at midnight), to make the meat sink to the bottom of the stomach, that he may have perfect digestion, and be ready to devour afresh against the next refection'; and Coverdale uses it in translating 1 K 2234, 'A certayne man bended his bowe harde, and shott the kynge of Israel betwene the mawe and the longes.' J. HASTINGS.

MAZITIAS (Α Μαζιτίας, Β Ζειτίας), 1 Es 936 = ΜΑΤΤΙΤΗΙΑΗ, Ezr 1043.

MAZZAROTH (מַנְרוֹת).—This word occurs only in Job 3882, and seems early to have been regarded by commentators as being connected with the noise (mazzālôth) of 2 K 23°, as is indicated also by the LXX, which has Maζουρώθ in both passages. In the AVm Mazzārôth is rendered by 'the twelve signs,' and in the RV by 'the signs of the Zodiac,' both of which may be regarded as the true signifi-cations of the word. Ges., who proposes the latter rendering, and suggests its identity with mazzāloth ('lodgings'), compares the Chaldee mazzālayā.

Mazzāloth would therefore be the plural of the Hebrew equivalent of this Chaldee form, given in late Jewish works as אָבֶל (mazzāl), which was used to denote not only the single signs and the planets, but also their influence on the fate of men (Selden, de Dis Syr., Synt. i. c. 1). If the etymology of Mazzaroth (=mazzaloth) be, as Ges. suggests, the the root would be nāzal, one of the meanings of which is 'to descend,' i.e. 'to alight at a place in order to sojourn there.' Another etymology, however, has been revived by Jensen, who compares Mazzārôth (=mazzālôth) with the Assyr. manzalti.\*

\* The original text of the Assyr, inscr. here referred to is as

"The original was "The follows:—
'(if) the planet Jupiter approach,' etc. etc. etc., tiant ina ham ina manzalti-bunu izzazzunt parakke-bunu dahdu inammaru, 'the gods in the heavens in their station remain, their shrines will see plenty.'

(WAI iii. 59, 85-86).

This comparison, however, is not without its difficulties, as the Assyr. word is for manzazti, from nazāzu, 'to stand,' whence also manzazu, 'station,' resting-place.' This, of course, would disconnect mazzāroth and mazzāloth from the late singular form mazzatoth and mazzatoth from the late singular form mazzat.\* Other renderings of mazzatoth that may be noted are the Syriac (Peshitta) agalta, 'the wain,' or 'the great bear'; 'Lucifer, the morning star' (Procopius of Gaza); 'stars' generally, and 'a northern constellation' (Aben Ezra and R. Levi ben Gershon), etc.

The Babylonian names of the twelve signs of the Zediac are given in vol in 192 (footnote)

the Zodiac are given in vol. i. p. 192 (footnote), and the inhabitants of that country were accus-tomed to observe them and to note the dates when the moon and the planets entered them, for the purpose of forecasting events, drawing up horoscopes, etc. These people were therefore wont to see Mazzaroth 'led forth in their season,' and the passage in Job where this word occurs would seem to point to the author of the book being as well acquainted as they with the wonders of the T. G. PINCHES. starry heavens.

MAZZEBAH.—See PILLAR.

MAZZOTH.—See PASSOVER.

MEADOW.—This purely English word (Anglo-Saxon, Mædu, Mædewe) occurs in the AV only in Gn 41<sup>2.18</sup> and Jg 20<sup>38</sup>.

1. In Gn 41<sup>2.18</sup> ans (LXX ἀχει), the word tr<sup>4</sup> 'meadow' is of Egyptian (demotic αχu) origin (cf. Jerome on Is 19'; Wiedemann, Sammlung (cf. Jerome on Is 197; Wiedemann, Sammlung altägyptischer Wörter, p. 16; Ebers, Ægypten und die Bücher Mose's, p. 338), and believed to mean the reed-grass (so RV) which in Lower Egypt borders the Nile and its branches, together with the marsh-lands, during floods.† As ruggested, also, in the art. Meadow in Smith's DB, the word may denote the pasturage afforded by the growing crops during high Nile. But the pasturage of cattle was carried on extensively in Lower Egypt under the Old Empire. In modern Egypt cattle are fed in cultivated clover modern Egypt cattle are fed in cultivated clover fields, for there are but few natural meadows of wild grass; but in ancient Egypt it was otherwise. As we know from numerous Egyptian tablets, cattle were fed on the stretches of marshy land in the Delta, whether beds of old rivers or watercourses, or such extensive shallows as that of Lake Menzaleh, now covered by brackish water, but once forming to a large extent one of the most productive tracts in Egypt. The dream of Pharaoh, therefore, in which the fat cattle were seen to feed in the reed-grass by the river side was the natural suggestion to the mind during sleep of a custom which he may often have witnessed.

2.  $m Jg~20^{33}~(MT$  קטרה נכע ;  $m B~Ma
ho a \gamma a eta e$ ,  $m A~\delta u \sigma \mu \hat{\omega} \nu$ της Γαβαά; Vulg. ab occidentali urbis parte; AV "It is worthy of note that the Assyr, intermediate form mazzarti has not yet been found, and that, if found, it would be singular, like manzalti. On the other hand, the plural, if regular, would be manzalti (I or rohanging back to z before a vowel), and ought to have been borrowed by the Hebrews, not as mazzāroth or mazzāloth, but as mazzāzoth. Both Heb. forms, therefore, if borrowed from Assyr, must have come from the Assyr, singular without regard to the original root of the word.

† ΠΚ occurs also in Job 811 (LXX πάπυρος; AV, RV 'rush,' RVm 'papyrus'), and should be restored in Hos 1815 (הַאָּהִים) for רוֹים (Vaf. Heb. Lew.), or read אווים (Wellh. and Nowack)). 'Meadows' is introduced by RV also in Is 197 (AV 'paper

'Meadows' is introduced by RV also in 1s 19' (AV 'paper reeds'). The Heb. is m'ny, a &w. Atr.; LXX (so also Syr.) has &z. It is just possible that they may have read or misread mink for m'ny. The LXX reads &zu also in Sir 4016 (AV 'weed,' RV 'sedge'). The recently recovered Heb. text has multiply, which is prob. a corruption (see König in Espos. Times, Aug. 1899, p. 518 f.).

1 Adolf Erman, Egypten, translated as Life in Ancient Egypt by H. M. Tirard, pp. 488-444 (1894).

meadows of Gibeah,' RVm 'meadow of Geba,' RV Maarch-geba). Much uncertainty attaches to the correct tra of this passage. By alteration of the vowel-points adopted in MT, the word signifies 'a cave' (האָרָה). So Studer, following the Peshitta. This is a probable enough translation, as the position of Gibeah (which is the correct reading, Palestine, high up amongst the hills of Central Palestine, puts the idea of meadows in connexion therewith out of the question. On the other hand, caves amongst the limestone rocks are not infrequent in Palestine. Of Gibeah (Tuleil el-Ful) Tristram says: 'Dreary and desolate, scarce any ruins, save a confused mass of stones, which form a sort of cairn on the top [of the hill]. As we recall also the hideous deed of the men of Gibeah, the blighting doom seems to have settled over the spot' (Land of Israel<sup>2</sup>, p. 171).

Another probable emendation, in the line of LXX (A) and Vulg., is 'קטְעַרֶב לנ' 'to the west of Gibeah.' See MAAREH-GEBA.

E. HULL.

## **МЕАН.**—See Наммеан.

MEAL.—1. A repast, the portion of food eaten at one time. The word is used only in the compound 'Mealtime' (Ru 2<sup>14</sup>), where it is the tr. of 5749, ng, literally 'the time of eating.' See FOOD in real is

vol. ii. p. 41 f.

2. The substance of grain ground but not sifted. Our English word is from the Anglo-Saxon melu. which is connected with the Gothic malan, 'to grind.' The word is used as the tr. of non kemah, which signifies meal in general, sometimes used with the genitive of the kind of grain from which it is made, as of the 75th ephah presented by the husband for his wife in the Jealousy Offering, Nu 515. In this case, the homely nature of the material is supposed to typify the humiliation of the woman accused. When used to represent fine flour it is combined with no as in Gn 18°. Three seahs of this fine meal (probably about 4 pecks) were used by Sarah to make cakes for the angelic visitors at Mamre. The mention of the same quantity,  $d\lambda \epsilon \nu \rho o \nu \sigma d\tau a \tau \rho l a$ , in the parable of the leaven, Mt 1323, Lk 1321, seems to show that this was the ordinary quantity to prepare at one time. Kemah and soleth are sometimes contrasted, time. Kemah and soleth are sometimes contrasted, as in the account of Solomon's daily provision, which consisted of 60 kors (=622½ bushels) of meal and 30 kors of soleth (1 K 4<sup>22</sup>). Meal was the breadstuff used by the poor. The widow of Zarephath had only a handful of kemah in her meal-tub, 1 K 17<sup>12</sup>. It was with kemah that Elisha healed the poisonous pottage, 2 K 4<sup>41</sup>. Meal was brought as part of the tribute to David on his becoming king in Habron 1 Ch 12<sup>30</sup> in Hebron, 1 Ch 1240.

In the prophetic writings 'meal' is used in several figures. The humbling of the Daughter of Babylon was to be shown by her being reduced to the work of grinding meal as a sign of servitude, Is 472. Hosea represents the unprofitableness of the evil works of Israel as sowing the wind, reaping the whirlwind whose bud (nox) makes no meal (Hos 87). There is a peculiar force here in the assonance en lo zemah bell ya'deeh kemah. For other particulars see BREAD and FOOD.

In the RV the word occurs very much more frequently in connexion with the  $minh\bar{a}h$  or meal offering, Lv  $2^{1\pi}$  and many other passages. This is called 'meat offering' in the AV. See Offering

and SACRIFICE.

The Israelites seem to have employed mills from a very early period, but it is remarkable that they were apparently unknown in Egypt until a comparatively late time. There is no word which unequivocally signifies 'mill' in the language of the Old or Middle Empire, as far as we know.

Their grain seems to have been pounded or brayed. The word kemh occurs in a list of offerings at Denderah as a kind of flour. In Ethiopic kamihi is used for 'pulse.' The word ke-me is used for meal in several cuneiform texts (see Strassmaier, Inschr. v. Nabonidus, Leipzig, 1889).
A. MACALISTER.

MEAL-OFFERING is the rendering substituted by the OT revision for AV 'meat-offering' (מְנָהָה). The American Revisers further record their preference for 'meal-offering' in Jer 1412 1723 3318 419. In these passages our RV reads 'oblation' with 'meal-offering' in the margin. For details see general article SACRIFICE.

MEAN.—The verb to 'mean' (from Anglo-Sax. maenan to intend, tell, and connected with 'mind,' maenan to intend, tell, and connected with 'mind,' the root being man to think) signifies sometimes to intend, purpose: Gn 50<sup>20</sup> 'But as for you, ye thought evil against me; but God meant it unto good'; Is 3<sup>15</sup> 'What mean ye that ye beat my people to pieces, and grind the faces of the poor?'; 10<sup>7</sup> 'Howbeit he meaneth not so, neither doth his heart think so'; Ac 21<sup>18</sup> 'What mean ye to weep and to break mine heart?'; Ac 27<sup>2</sup> 'We launched, meaning to sail by the coasts of Asia': launched, meaning to sail by the coasts of Asia'; 2 Co 813 'For I mean not that other men be eased and ye burdened.' Cf. Shaks. Merry Wives, V. ii. 15, 'No man means evil but the devil, and we shall know him by his horns.'

The subst. meaning, which in Dn 818, 1 Co 1411 signifies 'understanding,' 'sense,' as in its modern use, expresses 'purpose,' 'intention,' in 1 Mac 154 'My meaning also being to go through the country' (βούλομαι δὲ ἐκβῆναι κατὰ τὴν χώραν; RV 'I am minded to land in the country'). Cf. Jer 4426 Cov. 'Purposly have ye set up youre owne good meanynges, and hastely have ye fulfilled youre owne intente'; Hall, Works ii. 103, 'Good mean-

owne intente'; Hall, Works ii. 103, 'Good meanings have oft-times proved injurious.'

The subst. 'mean' (from Old Fr. meien, moien;
Lat. medius) signified originally something that was in the middle. Thus 'Tymme's Calvin's Genesis (1578), p. 678 '[Moses] was a meane betweene the Patriarches and the Apostles'; Elyot, Governour, ii. 334, 'He that punissheth whyle he is angry, shall never kepe that meane which is between to moche and to lyttell'; Barlowe, Dialoge, 103, 'God loved the people so entyerly, that of theym he chose bysshoppes, preistes, and that of theym he chose bysshoppes, preistes, and deacons, to offer speciall sacrifices for the clensynge of theyr synnes, and to be as meanes between hym and them'; and Knox, Works, iii. 98, 'Is he who discendit from heaven and vouchsaffit to be conversant with synneris, commanding all to be conversant with synneris, commanding all soir vexit and seik to cum unto him (who, hanging upon the Cross, prayit first for his enemyis), becum now so untractable, that he will not heir us without a person to be a meane? From this arose easily the sense of instrument, which is often sing., 'a mean,' in the Eng. of that day, though in AV itself it is always plu., 'means.' Thus Lever, Sermons, 79, 'Of God surely thou hast received it by what messenger or means so ever received it, by what messenger or meane so ever thou came unto it, and Knox, Works, iii. 299, 'The instrumente and meane wherwith Christe Jesus used to remove and put awaye the horrible feare and anguysshe of his Disciples, is his only worde'; and in AV, Wis 815 'By the means of her I shall obtain immortality' (RV 'because of her'); 2 Co 111 'the gift bestowed upon us by the means of many persons' (RV 'by means of many'); Rev 1314 'by the means of those miracles' (RV 'by reason of the signs'). This word is sometimes also an adj., of which we have such examples in AV as in the mean while, 1 K 18<sup>48</sup>, Jn 4<sup>51</sup>, Ro 2<sup>15</sup>; in the mean time, 1 Mac 11<sup>41</sup>, Lk 12<sup>1</sup>; and in the mean season, 1 Mac 11<sup>14</sup> 15<sup>15</sup>. Cf. Pr. Bk. 'The

Communion, 'My duty is to exhort you in the mean season'; Jer 322 Cov. 'In the meane season the cite is delyvered in to the power of the Cal-

There is another adi. 'mean,' which is traced to the Anglo-Sax. gemeene, 'common,' 'general,' and is possibly connected with Lat. communis, though Skeat counts that very doubtful. This word was early confused with the distinct Anglo-Sax. word maene, 'false,' 'wicked,' with the sax. word mache, 'false,' whicked, with the result, that from signifying merely peasant-born, of common origin, it came to express 'low-minded,' 'base' (the word 'base' has a parallel history, see BASE), and again 'niggardly,' 'penurious.' In AV the word is used only in the sense of 'low-born,' 'common': Pr 2229 'Seest thou a man diligent in his business? he shall stand before הוא הוא הוא business: he shall not stand before mean men' (אַבּיֹבְּיבְּעָלָּן, lit. 'before obscure persons' as AVm and RVm); Is 2º 'And the mean man is bowed down, and the great man humbleth himself, Heb. της opp. to ψ'κ, so 5<sup>15</sup> 31<sup>8</sup>; Ac 21<sup>89</sup> 'a citizen of no mean city' (οὐκ ἀσήμου πόλεως). Cf. Pref. to AV 1611, 'If any man conceit, that this is the lot and portion of the meaner sort onely, and that Princes bornoin of the meaner soit only, and that I mees are priviledged by their high estate, he is deceived; Elyot, Governour, i. 25, 'It is expedient and also nedefull that under the capitall governour be sondry meane authorities'; Knox, Hist. 392, 'When scarcely could be found ten in a Country that rightly knew God, it had been foolishnesse to have craved, either of the Nobilitie or of the

mean Subjects, the suppressing of Idolatry.'
The adv. meanly is found in 2 Mac 15<sup>38</sup> 'If I have done well and as is fitting the story, it is that which I desired; but if slenderly and meanly, it is that which I could attain unto.' The meaning is 'moderately' (µerplus). Cf. Spenser, Mother Mathematical Tale 2027

Hubberds Tale, 297-

'The Husbandman was meanly well content Triall to make of his endevourment'; and Shaks. Com. of Errors, I. i. 59-

'Thy wife, not meanly proud of two such boys, Made daily motions for our home return.' J. HASTINGS. MEARAH (הקוקה 'cave' [cf. AVm]; LXX seems to follow another reading).—Mentioned amongst the follow another reading).—Mentioned amongs one districts of Palestine that had yet to be possessed, Jos 134. The text is doubtful (see Dillm. ad loc., and Bennett in SBOT, the latter of whom emends part 'from Arvad'); but if we accept the MT, then Mearah, 'which belongeth to the Zidonians,' may be Mogheirîyeh ('small cave'), a village near Zidon; cf. Aquila, καὶ σπήλαιον δ έστι τῶν Σιδωνίων. C. R. CONDER.

MEASURES. - See WEIGHTS AND MEASURES.

MEAT (Anglo-Sax. mete, perhaps from mete to measure, but more probably connected with Lat. mandere to chew) is in AV food in general, not, as now, flesh food only. Thus 2 Es 12<sup>51</sup> 'But I remained still in the field seven days, as the angel commanded me; and did eat only in those days of the flowers of the field, and had my meat (esca) of the herbs.' The 'meat-offering' contained no flesh, but was composed of meal and oil. Fuller, Holy State, 185, says, 'A rich man told a poore man that he walked to get a stomach for his meat: And I, said the poore man, walk to get meat: And I, said the poore man, walk to get meat for my stomach'; cf. Adams on 2 P 14 'He feeds the ravens, and the young lions seek their meat at him.' In their Preface the AV translators say of the Scripture, 'It is not a pot of manna, or a cruse of oyl, which were for memory onely, or for a meals meat or two, but as it were a shower of heavenly bread, sufficient for a whole host, be it never so great.' So Hall, Works, i. 806, 'There was never any meat, except the forbidden

fruit, so deare bought as this broth of Jacob.' As the word signifies whatever is eaten, it may be applied to flesh, as in Fuller, Holy Warre, 212, 'Where he giveth away the meat he selleth the sauce'; so in Gn 27<sup>4, 7, 81</sup> of the venison Esau prepared for Isaac, and 27<sup>9, 14</sup> of the goat's flesh

which Rebekah prepared.

The plu. 'meats' for 'kinds or portions of food' occurs some ten times in the Apocr., also in Pr occurs some ten times in the Apoer., also in Pr 236 'neither desire thou his dainty meats,' where the Heb. is simply 'his dainties,' as RV; Ac 1529 'meats offered to idols,' where the Gr. is 'offerings to idols' (εἰδωλόθυτα, RV 'things sacrificed to idols'); and in Mk 719, 1 Co 613 bts, 1 Ti 43, He 910 139, where the Gr. is always βρώματα, things to eat. Cf. Rhem. N.T. Preface, 'When we are litle ones, let us not covet the meates of the elder sort,' and the Rhem. tr. of Lk 912 'Dimisse the multitudes, that going into townes and villages here about, they may have lodging, and finde meates,' Jn 48 'For his Disciples were gone into the citie to bie meates.' were gone into the citie to bie meates.

J. HASTINGS. MEAT-OFFERING .- See MEAL-OFFERING, MEAT, OFFERING, and SACRIFICE.

**MEBUNNAI** (Άρη,  $\epsilon \kappa$  τῶν νίῶν (i.e. μρη), many MSS Σαβουχαί, Luc. Σαβενί).—According to 2 S  $23^{27}$ a Hushathite (wh. see), one of David's thirty heroes. The name here given, however, is clearly a mistake for Sibbecai, the form which has been preserved in the parallel lists, 1 Ch 11<sup>29</sup> 27<sup>11</sup> (Σοβοχαί), and also 2 S 21<sup>18</sup> (Β 'Οεβοχά, Α Σεβοχαεί) = 1 Ch 20<sup>4</sup>.

J. F. STENNING.

MECHERATHITE.—See MAACAH.

MEDABA  $(M\eta\delta\alpha\beta d)$ .—The form of the name MEDEBA, which appears in 1 Mac  $9^{86}$ .

MEDAD .- See ELDAD.

MEDAN (||p|).—Name of a son of Abraham and Keturah, Gn  $25^{\circ}$  (B  $Ma\delta a l\mu$ , A  $Ma\delta d\nu$ )=1 Ch  $1^{\circ\circ}$  (B  $Ma\delta ld\mu$ , A  $Ma\delta d\nu$ ). The word is probably to be identified with  $Mad\delta n$ , the god of some Arab tribe, best known through the proper name 'Abd-Al-Madān, 'worshipper of Al-Madān'; the tribe or family called  $Ban\bar{u}$  'Abd-Al-Madān was proverbial for various sorts of excellence in the earliest Arabic known to us (Kāmil of Al-Muharad i 56 Arabic known to us (Kāmil of Al-Mubarrad, i. 56, Unlike most of the names of the Arabic deities, the word appears to have an appropriate etymology, and to mean simply 'object of worship'; and with this sense the employment of the article accords, as well as the alternative vocalization, Al-Mudān (Sakt Al-Zand of Abu 'l-Alā, ed. Boulak, i. 47). The occurrence of the name of this god in a context in which we expect the name of a tribe, implies that the word was used as a national name also; and the word Kais is precisely parallel to Madān as being used for both a nation and a god, and as taking the article in the latter application. The seat of the worship of Al-Madān appears to have been Yemen (Tāj Al-Arūs, s.v.), whereas the descendants of Keturah appear to be far away from S. Arabia; but this may be due to the migration of a tribe; and indeed the word occurs as a geographical name in N. Arabia (Yākūt and Al D. S. MARGOLIOUTH. Bekri).

MEDEBA (פירְכָא) 'gently flowing waters,' Nu 21<sup>20</sup>, Jos 13<sup>9.</sup> <sup>16</sup>, 1 Ch 19<sup>7</sup>, Is 15<sup>2</sup>).—A town in the Mishor,\* east of Jordan, about 1½ hour S. of

\* Mishor ('he'r) Dt 310 443, Jos 139.16.17.21 208, Jer 438.21; translated by AV 'plain,' or 'plain country,' by RV 'plain,' m. 'tableland') is the name given to one of the divisions of Eastern Palestine, comprising the country between Heabon and the Arnon, assigned to Reuben. It is a treeless plateau

Heshbon on the Roman road from that place to Kerak. It originally belonged to Moab, but was taken from them by Sihon, who was in his turn dispossessed by the children of Israel (Nu 21<sup>24-28</sup>). It was assigned to Reuben (Jos 139-16, where v.9 should be translated 'all the tableland—Medeba to Dibon,' and v. 16 'all the tableland as far as Medeba'). The Syrians who came to assist the children of Ammon pitched at Medeba, and, from the account of Joab's battle with them, it would seem that the city was then in the hands of the children of Ammon (1 Ch 196-15). Since David's time (2 S 82) Moab must have regained possession of the city and territory around, for, according to the Moabite Stone (line 8), Omri took possession of [the land of] Mehedeba, and Israel dwelt therein during his days and half his son's days, forty years; but Mesha recovered the territory, and rebuilt the cities which had been held by Omri and his son Ahab. Medeba is (perhaps) named in line 30, but the stone is here defaced, and the reading not quite certain. Joram's attempt in company with Jehoshaphat to recover these cities (2 K 3) was but partially successful, and the Moabites remained in them unchallenged until the prosperous reign of Jeroboam II., when they were driven to the south of the Arnon. Medeba is mentioned as belonging to Moab in Is 152, but not in Jer 48an omission which is the more remarkable, as the list of Moabite cities in Jer is more full than that in Isaiah. Where by comparison with Isaiah we might expect to find it, occurs Madmen (Jer 48<sup>2</sup>), a name occurring only in that verse. See MADMEN. The LXX renderings are Jos 13<sup>9</sup> Δαιδαβάν Β\*, Μαιδαβάν Β\*<sup>1</sup>, Μαιδαβά A. The word is omitted in v. 16. 1 Ch 19<sup>7</sup> Μαιδαβά B, Μηδαβά A, Baιδaβά Ν. The text of Nu 21<sup>80</sup> is uncertain; for the last clause LXX has πῦρ ἐπὶ Μωάβ, Pesh.

The ¬ of ¬ωκ, which has been marked with a point by the Massoretes, is not regarded by the LXX, and neither they nor Pesh. read Medeba. In Is 15<sup>2</sup> τῆς Μωαβείτιδος (Β) represents the Medeba of MT.

In Maccabæan times John, the eldest son of Mattathias, was killed by a robber clan which lived at Medeba. The name of this clan was Jambri or Ambri. How Jonathan avenged the death of his brother is related in 1 Mac 9<sup>36-42</sup> and Jos. Ant. XIII. i. 2, 4. John Hyrcanus laid siege to Medeba, and took it with difficulty (Jos. Ant. XIII. ix. 1). Alexander Janneus afterwards took it along with others from the Arabians, and Hyrcanus II. promised to restore them to Aretas (ib. XIII. xv. 4,

The city appears to have been a flourishing Christian centre during the Byzantine period. It was the seat of a bishopric, and was represented at the Council of Chalcedon. After remaining desolate for centuries it was occupied in 1880 by a colony of Christians from Kerak, and some Latin fathers have established a mission there. In digging for foundations of houses many ancient remains have been brought to light. Besides the large pool with solid walls mentioned by several travellers, the remains of gates, towers, and four churches, besides some beautiful mosaics, have been discovered. An interesting account of a visit to these ruins is contained in PEFSt for July 1895, and Père Séjourné has written a full article on Medeba in the Revue Biblique for Oct. 1892. A remarkable mosaic map of Christian Palestine and Egypt has also been discovered, a description of which appears in *PEFSt* for July 1897, being

affording pasture for flocks, and at one time suited for the culture of the vine (Is 16<sup>3</sup>). The number and extent of the ruins in this district show that it was once thickly inhabited. The Heclawin in their black tents are now the chief inhabitants; see G. A. Smith, HGIIL pp. 535, 548.

a translation from Clermont - Ganneau's Recueil d'Archéologie Orientale, tom. xi. p. 161, 1897. Further communications with reference to this Mosaic are to be found on p. 239 of *PEFSt* for July 1897, p. 85 of April 1898, p. 177 of July 1898, p. 251 of Oct. 1898.

A. T. CHAPMAN.

MEDES ('77, M $\hat{\eta}\delta\omega$ ).—In Gn  $10^2$  Madai is a son of Japheth, and is associated with Gomer and Javan. The Assyr. form of the name is Mada, but when we first meet with it in the annals of Shalmaneser II. (c. B.C. 840) it is written Amada. Hadad-nirari III. (c. B.C. 800) overthrew Khana-ziruka, king of the Mata, who inhabited Matiene, S.W. of the Caspian; W. of the Mata was Parsuas (perhaps Parthia), with its 27 kings, on the shores of Lake Urumiyeh. It is doubtful whether we should identify Mata and Mada as variant forms of the same name, or regard the Mata as a division of the Mada; at all events, Hadad nirari III. also employs the name Mada, and it is the only form of the name henceforth found in the cuneiform inscriptions. Tiglath-pileser III. overran the Median states E. of Zagruti or the Zagros, sending one of his generals against 'the Lagros, sond-rising of the sun' (B.C. 743); and Sargon in B.C. 713 subdued a number of Median chieftains, one of whom was the chief of Partakanu. Esarhaddon divides Partakanu into the two provinces of Partakka and Partukka, and describes it as 'remote.' In the early part of his reign Assyria was threatened by a combined attack on the part of the Medes, Kimmerians, Saparda (Sepharad), and 'Kaztarit, king of Karu-Kassi'; but the Assyr. king carried the war into the enemy's country, and the defeat of the Median 'city-lords' in the far east relieved him of all danger from the Median tribes. A portion of the Kimmerians, however, took possession of the old kingdom of Ellipi, north of Elam, where a new power arose, with its capital in Ecbatana (Pers. Hangmatana). In the cuneiform inscriptions the Kimmerians are called Umman Manda or nomad 'Barbarians' (Goiim in OT), and the resemblance of Manda to Mada caused the two words to be confused together by the classical writers.

The Medes, like the Kimmerians, belonged to the Iranian branch of the Aryan race, the Persians being a kindred tribe, which pushed farther south towards the Persian Gulf. According to Herodotus (vii. 62, i. 101), they were called Arians by their neighbours, and were divided into six tribes: the Busæ, Paretakêni (Assyr. Partakanu), Struchates, Arizanti, Budii, and Magi. The Magi, however, seem rather to have been a priestly caste. The Assyr. inscriptions show that the Medes obeyed no central authority, but were divided, like the Greeks, into a number of small states, each under the rule of its own 'city-lord.' Consequently the classical belief in a 'Median empire' was groundless, and was really due to the confusion between the names Mada and Manda.

A recently discovered inscription of Nabonidos has informed us that the destruction of Ninevell (B.C. 606) was brought about by the Manda, not by the Mada or Medes. We have also learned from the cunciform texts that it was the Manda who devastated Mesopotamia, destroying Harran and its temple of the Moon-god; that Astyages (Istuvigu in cuneiform) was king of the Manda; and that the revolt of Cyrus was against the Manda, and not against the Medes. Medes may have been included among the Manda or 'Barbarians,' but the term was primarily applied to the northern hordes who had swarmed across the Caucasus into W. Asia, and were called Kimmerians (see GOMER) and Scythians by the Greeks. The kingdom of Ecbatana was founded by these

A. H. SAYCE.

Manda, who had conquered the ancient kingdom of

The 'Median' kings of Herodotus and Ctesias are alike artificial creations. Herodotus makes the Median monarchy begin with Dêiokes, B.C. 710, at a time when the Assyr. empire was at the height of its power, and Sargon was punishing the 'city-lords' of the Medes. Deiokes is the Daiukku of the Assyr. inscriptions, a vassal-chief under the king of the Manna (Minni), who was carried captive to Hamath by Sargon in B.C. 715. Phraortes, who is said to have succeeded Deiokes, is Frawartish, who carried on wars against the Persians and the Assyrians, and called himself Xathrites (Kaztarit). His successor Cyaxares may be Kaztarit, or he may have been a genuine king of Ecbatana, and the actual predecessor of Astyages. At all events Astyages was a king of the Manda, and his conquest by his rebel vassal Cyrus took place in B.C. 549. On Arphaxad king of the Medes (Jth 11), see ARPHAXAD.

The list of Median kings given by Ctesias probably comes from a Persian source, and the chronological arrangement of it is even more artificial than that of the list of Herodotus. Lenormant seems to have been right in suggesting that two of the kings in it, Arteus and Astibaras, are the kings of Ellipi, Rita (Dalta) and Ispabara, who were contemporaries of Sargon and Sennacherib.

After the capture of Samaria by Sargon in B.C.

722, some of the Israelites were transported to 'the cities of the Medes' (2 K 176 1811). This probably took place after Sargon's campaign against the Medes (B.C. 713), when he penetrated as far as the distant land of Bikni. Isaiah (1317 212) calls on the Medes and Elamites to overthrow Babylon (cf. Jer 2525); and Jeremiah (5111, 28) speaks of the 'kings' of the Medes combining with Ararat, Minni, and Ashkenaz to destroy the Bab. empire. At this time it would seem, therefore, that the Medes were still governed by a number of different chiefs. In Elam we must see Anzan, the ancestral kingdom of Cyrus, which an Assyrtablet states was equivalent to 'Elam'; the invasion of Babylonia, referred to by Jeremiah, may have been one which took place in the reign of Nergal-sharezer, not that of Cyrus. Cyrus, however, united the Medes and Persians under his sway; Gobryas, the governor of Kurdistan, whom he made the first governor of Babylonia after its conquest, was a Mede, according to the classical writers; and Mazares and Harpagos, who conquered Ionia for Cyrus, were both of Medic descent. Hence the Ionian Greeks spoke of 'Medes' rather than of 'Persians.' Gomates, who pretended to be Bardes (Smerdis), the son of Cyrus, and usurped the throne of Cambyses, was a Magian, and therefore also of Median origin; and, in the troubles which followed his murder, Media endeavoured to secure her independence under Frawartish or Phraortes. Frawartish, how-ever, was at length defeated in a pitched battle, and, after being taken prisoner near Rhages, was impaled at Ecbatana. After the destruction of the Persian empire, Media was divided into Media Atropatênê (so named from the satrap Atropates), which corresponded with the modern Azerbijan, and included the Parsuas of the Assyr. monuments, and Media Magna to the south and east of it. Here were Ecbatana (now Hamadan), and Bagistana were Education (now Ramadan), and Ragistana (now Behistun) in the ancient territory of Ellipi. Bagistana is probably the place called Bit-ili or Bethel by Sargon. Media had thus come to extend widely beyond its limits in the Assyr. age, when the Medes inhabited little more than Matiene and the district to the E. of it, and S. of the Caspian, in which Raga or Rhages (now Ra) was situated. They were, in fact, mountaineers, and

hence had the reputation of being brave and warlike, delighting in arms, in brilliant clothing, and in carrying off booty from their more settled neighbours. From the Persian monuments we gather that they let the beard grow, and wore caps, long robes with full sleeves, and shoes. Their religion was a form of Zoroastrian fire-worship, and they left the bodies of the dead to be devoured by wild beasts or birds of prey. (See J. V. Prášek, Medien und das Haus des Kyaxares, 1890).

  INTRODUCTION.—1. Meaning and use of the term

INTRODUCTION .- 1. Meaning and use of the term 'Mediator.'—The word 'mediator' (Gr. μεσίτης) is found only in NT, namely at Gal 3<sup>19, 20</sup>, 1 Ti 2<sup>5</sup>, He 8<sup>6</sup> 9<sup>15</sup> 12<sup>24</sup>.\* The verbal form (μεσίτεύω) occurs once, in He 6<sup>17</sup>. The derivation from the adjective μέσος 'in the middle' merely suggests the idea of one who is found in the midst, or who enters into the middle. But usage gives a more specific meaning to the term. Thus we always find it standing for a person who in some way intervenes between two. This intervention is of two kinds: (1) in order to bring about a reconciliation where there has been division or enmity the thought in Job, and in St. Paul's use of the word; (2) quite apart from any notion of a previous quarrel, with the idea of drawing two together into a compact or covenant—the meaning in Hebrews in each of the three cases where it occurs. Moses was regarded as a mediator in a general sense, as coming between God and Israel, both to shield the people from the Divine severity, and to introduce God's law to their notice and effect their union with Him as a covenant people. The first of these ideas appears in Dt 50, where, while the word 'mediator' is not used, the idea is suggested by a cognate adverbial form (ἀνὰ μέσον, Heb. μ). Philo uses the word 'mediator' (μεσίτης) for Moses in the same connexion (Vit. Moys. iii. 19). Elsewhere Philo refers to speech as a 'mediator and intercessor' (de Somn. i. 22). Josephus writes of Agrippa being a mediator between the people of Ilium (Ant. XVI. ii. 2).

2. The idea of mediation in religion.—While the word 'mediator' is rarely met with, the idea contained in it is one of the most vital and influential thoughts in religion. Nearly every religion bears witness to it. Both priesthood and prophecy rest upon the conception of mediation—priesthood in the selection of certain men for approach to God and the reconciliation of the people with Him by means of sacrifice; prophecy in the sending of Divine messengers who are to deliver to the people the oracles they have received from heaven. The

\*The LXX employs missires in Job 922 as rendering of 5770, which AV and BV tr. 'daysman' (wh. see).

idea emerges in the lowest grades of civilization under the form of the medicine man, the rainmaker, the sorcerer, whose function, however, is rather to coerce than to conciliate inimical powers. While the purification of religion eliminates degraded, distorted, and superstitious forms of mediation, it does not destroy the essential idea, which is found more clearly and forcibly expressed in Christianity than in any other type of religion. So prominent and characteristic is the idea that we might define Christianity in the abstract as Theism plus Mediation—understanding the latter term to include all that is taught concerning the person and mission of Christ, for it is this idea that most distinguishes the religion of the NT from pure Theism. But Butler pointed out that the specially Christian idea of 'the appointment of a Mediator, and the redemption of the world by him, was analogous to many things in the constitution and course of nature' (Analogy, pt. ii.

i. MEDIATION IN PAGANISM. - Space will not permit of more than the briefest notice of this branch of the subject; and yet it is impossible to do justice to the great biblical doctrine of mediation without giving at least some attention to its position in the light of comparative religion.

1. Savage notions of mediation.—It has been pointed out that as in course of time the individual faculties in men were seen to be differentiated, some were held to be specially gifted with occult powers. These men came to be regarded with awe; they were not as other men. To them it was given to penetrate the unseen world, read the secrets of futurity, influence the supernatural powers with which primitive man in a dim way felt himself to be surrounded. In so low a race as the Australian aborigines, the medicine men are credited with the power of controlling all occult influences. This mysterious power is claimed among the Andaman Okopaids and the Peaimen of Guiana. In Melanesia it is known as mana, and is said to be imparted by cannibalism. mana is conveyed by the medicine man to the charms he uses. A similar power was recognized among the N. American Indians. In the lowest condition, while the medicine man uses charms and spells, he does not invoke spirits. A higher stage is attained when he calls in the aid of ghosts, the totem animal belonging to an inter-mediate condition. In some savage communities demoniacal possession is supposed to confer priestly or mediatorial powers. Thus we learn from Tylor (*Prim. Cult.* ii. p. 121) that among the Patagonians persons afflicted with St. Vitus' dance were selected as magicians, and that among the Liberian tribes the Shamans brought up children liable to convulsions for the profession of magic (see King, The Supernatural, bk. ii. ch. iv.). The medium of modern spiritualism may be compared with the medicine man who has dealings with ghosts, the special gift with which the medium is credited leading him to be consulted by others as though he were a kind of mediator between ordinary mortals and the spirit world.

2. Civilized pagan notions of mediation. — All religions that contain a priesthood with functions not shared by the main body of the community predicate some form of mediation in connexion with that office. The priest sacrifices to, or intercedes with, the god to whom he is attached, on behalf of the people. But the two greatest behalf of the people. But the two greatest faiths of the East have peculiar relations to this subject. The distinction between the priesthood and the laity is more pronounced and rigorous in Hinduism than it is in any other religion the world has ever known. This is owing to the institution of caste. Of the four great classes re-

cognized in the Hindu system, Brahmans, soldiers, agriculturists, and servants, the first consists of priests, and an important part of the Veda, the Brāhmanahs, is devoted to the ritual they are required to follow. Inasmuch as the observance of this ritual is regarded with favour by the gods, all classes of society benefit by the Divine complacency thus secured; but the hopeless inferiority of the other castes destroys one important element in the mediatorial idea, the community of nature between the priest and the people which is essential to the NT idea of mediation set out in the Epistle to the Hebrews. On the other hand, the Brahmanahs contain the idea of gods sacrificing, and so bring in the notion of mediation from another point of view. Thus in the Tāndya-brāhmanahs it is stated that 'the Lord of creatures (prajā-pati) offered himself a sacrifice for the gods.'
The same idea emerges in the sacrifice of 'the primeval male.' Thus it is stated in the sātapathu-brāhmanah, 'He who, knowing this, sacrifices with the Purusha-Medha, the sacrifice of the primeval male, becomes everything.' Monier-Williams regarded this as a witness to 'the original institution of sacrifice,' and 'typical of the one great voluntary sacrifice,' etc. (Hinduism, p. 36). On the other hand, it must be observed that the oldest Hindu sacrifices are not piacular, but simply consist of food offered to the gods. The idea of expiation came later, and with it the notion of mediation. But about the time of the rise of Reddling is a 500 Ref. the development of Hindu. Buddhism, i.e. c. 500 B.C., the development of Hindu philosophy removed all belief in vicarious sacrifice Brahman by developing a system of Pantheism. If man is one with God, there can be no room for mediation between man and God. And yet, again, the evolution of gods as forms or manifestations of Brahm introduces another form of mediation. the merits of an inferior god availing with one above him, that god's merits with one still higher, and so on in the ascending scale up to the highest.

When we turn to Buddhism it would seem reasonable to regard the Buddha himself as a mediator, since he is seen sacrificing himself for others, even for animals. In former states of existence, it is said, he often gave himself as a substituted victim in place of doves and other innocent creatures, to satisfy hawks and beasts of prey. Then, having freed himself from the five great passions, he will help others to a like freedom by his teaching. Still, there are two features of Buddhism that render it inherently inconsistent with the idea of mediation. One is its protest against the Hindu caste system. Holding the equality of all men, it teaches that every one must suffer the consequences of his own deeds, either in the present life or in a future condition, and repudiates the possibility of a transference of responsibility or of an atoning sacrifice. The other feature is its virtual denial of God. But in practice the Buddha is deified, and then the Buddhist monk becomes a sort of priest, so that the notion of mediation comes round again from

another quarter.

We may look for antecedents to the biblical doctrine of mediation in the religion of ancient Egypt, which was associated with a richly developed hierarchical system, the priests enjoying high rank above the common people, and occupying themselves with elaborate sacrificial performances; in the religion of Babylon, which, owing to the very early connexion between the Babylonians and Palestine (evidenced by the Tel el-Amarna tablets), must have been known in the latter country in primitive times; and in the Semitic religions of Canaan and Phonicia, where, though, as Robertson Smith showed, the primitive notion

of sacrifice suggested a common feast with the god, a communion, the piacular idea appeared later. Thus the prophets of Baal, in the time of Elijah, act as mediators, performing sacrificial functions

on behalf of king and people.

ii. Mediation in the Old Testament. —

Mediation appears in various forms during the course of the OT history, in the specific regulations of the law, and in the teachings of the

prophets.

1. Mediation in OT history.—In the oldest parts of the patriarchal history (JE) the head of the household officiates as the family priest, sacrificing and entering into covenants on behalf of his people, e.g. Abraham (Gn 12<sup>7.8</sup> 15<sup>9-21</sup>), Isaac (Gn 25<sup>23-25</sup>), Jacob (Gn 33<sup>18-20</sup>). It is to be observed that the later narrative (P) does not describe patriarchal altars and sacrifices. Although the earlier narrative in its written form is assigned to the period of the monarchy, this primitive style of religious observances speaks for its own antiquity, and for the probability that traditions embodying old customs are here preserved. Two incidents in particular, connected with the patriarchal narratives, bear especially on ancient views of mediation. Melchizedek, king of Salem, is introduced as a priest of God Most High (Gn 1418). He blesses Abraham, and receives a tenth of the spoil after the battle of the kings. This kingly priesthood of Melchizedek laid hold of the Jewish imagination, and reappeared in the Messianic ideal of Ps 110, to be recognized and elaborately discussed in its application to Leave Chair the the discussed in its application to Jesus Christ by the author of He (6<sup>20</sup>-7). Then Abraham's pleading for the cities of the plain shows us the patriarch as a typical mediator. In this wonderful picture of earnest prayer we see mediation in the form of intercession. No sacrifice is offered, but the patriarch pleads on behalf of the doomed cities with singular persistence, and yet with profound humility. The promise of deliverance if a sufficient number of righteous men can be found, introduces another element of mediation, what we might call the passive mediation of the goodness of one, on account of which favour is shown to others,—in this case corresponding to our Lord's idea of His disciples as the salt of the earth (Mt 5<sup>13</sup>). Moses appears as a mediator in various relations. First, as the deliverer of his people he comes from Jehovah with a mandate to Pharaoh (Ex 3). This is an instance of the descending mediation, in which the mediator comes from God with a divine message. In the same way Moses appears as the lawgiver, receiving the law from Jehovah and giving it to the people. Kuenen maintains that the tradition about Moses as a lawgiver shows that, even if not a single one of his laws are extant, he was prominent as a revealer of God's will (Religion of Israel, i. 273). Moses appears repeatedly as the prophet through whom God communicates with Israel. Thus it is said (in the JE narrative), 'And the Lord spake unto Moses face to face, as a man speaketh unto his friend' (Ex 33<sup>11</sup>, see also Nu 12<sup>6-8</sup>). Then Moses also appears most conspicuously as the mediator in the other form of mediatorial work, the ascending mediation, representing the people to God in intercession. A striking instance of this mediation occurs in relation to the molten calf, when Moses beseeches God on behalf of the people (Ex 327-14), and even expresses a willingness to be himself and even expresses a willingness to be limised blotted out of God's book if only the people may be forgiven their sin (Ex 32<sup>22</sup>), appealing to the favour he has found with God as a ground for pleading the cause of the people he represents (Ex 33<sup>13</sup>, see Schultz, OT Theol. i. 138). A special form of mediation comes in with the idea of the theocratic king, who is both the representative of

Jehovah to Israel and the representative of the people before God. David officiates in priestly apparel,—'girded with a linen ephod,' offering burnt-offerings and peace-offerings, and blessing the people in the name of Jehovah (2 S 6<sup>14-18</sup>). A mediating position between God and the people appears in the Messianic Psalms, 2, 21, 72, 45 (where perhaps the king is called 'Elohim'), 110. The Chronicler, reflecting on the history from the Greek period, regards David's throne as divine; it is the throne of Jehovah' (1 Ch 29<sup>28</sup>). Thus a preparation is made for regarding the Messiah of the future as a Mediator, standing between God and man, exalted above the common human standpoint, and brought near to God, but with a view to the benefit of the people He represents.

2. Priestly mediation.—The conception of a

priesthood separate from the rest of the community implies mediatorial functions on the part of the priests for the benefit of the laity. In itself the idea of priesthood may be regarded absolutely, the priest being the man who has a right of approach to God, and on whom devolves the duty of proach to God, and on whom devolves the duty of sacrificing, etc., quite apart from any consideration for others. In this sense Israel as a whole nation is 'holy' (Lv 11<sup>45</sup> 19<sup>2</sup>, Nu 15<sup>40</sup>), and is named a 'kingdom of priests' (Ex 19<sup>5.6</sup>). Similarly in late poetry the nation as a whole is said to consist of 'prophets' (Ps 105<sup>5</sup>). But this is exceptional. As a rule, the function of the priest is vicarious and mediatorial. In early times, however, this was not confined to any family or tribe. Gideon (Jg 6<sup>19-24</sup>), Samuel (1 S 16<sup>2</sup>), and Elijah (1 K 18<sup>20π</sup>.) performed the priestly function of offering sacrifices, and, in a mediatorial way, for the benefit of the people. When a priestly order was first recognized this was not necessarily of one tribe or family, as in the later system. Thus David made priests of in the later system. Thus David made priests of his own sons and of the chief men of the kingdom (2 S 8<sup>18</sup> RV).\* Zabud the son of the prophet Nathan is also described as a priest (1 K 4<sup>8</sup>). In the oldest stratum of the law, the 'Book of the Covenant,' it is assumed that the Israelite offers his own sacrifices in primitive patriarchal style. Thus, in the directions Moses is to give to the children of Israel, we read, 'If thou make me an altar of stone, thou shalt not build it of hewn stones, etc., and 'neither shalt thou go up by steps unto mine altar' (Ex 20<sup>25, 26</sup>), where no priestly order is referred to. In the story of Micah (Jg 17. 18, assigned to JE) a certain Levite appears as a priest, but in a most primitive fashion, consecrated or installed by Micah in his own house, and serving as a domestic chaplain. The whole narrative reveals a condition of superstitious faith in the mediatorial efficacy of the mere presence of a priest. In the narrative of Eli and his sons (1 S 1. 211-3, assigned by Budde to E2 and by Kittel to SS, i.e. an Ephraimite history of Samuel and Saul compiled from various sources about the time of Hosea) we have a recognized priesthood at Shiloh, so completely accepted that the priests are resorted to in spite of their tyrannical and immoral behaviour. In Dt the priesthood of the Levites is regulated by law, and a complete system of priestly mediation by means of sacrifices, etc., elaborated. Jeremiah (?) enforces this by dwelling on the importance of the priesthood (Jer 33<sup>18-26</sup>). Ezekiel, in pronouncing the degradation of the Levites who had been the priests of the various high places, and confining the priesthood to the house of Zadok, i.e. the Jerusalem order, concentrated the mediatorial work in this body. Ezra's great reform carried Ezekiel's ideas out in practice, and advanced them still further in the development of the hier-

\*See Driver, Notes on Heb. Text of Samuel, p. 220; H. P. Smith, Comm. ad loo.; and, for a different view, Cheyne in Expositor, June 1899, p. 458 ff.

After the Exile, P and the complete Pentateuch established the mediatorial functions of the sons of Aaron, with the high priest at their head (Nu 3<sup>10, 38</sup> 4<sup>15, 19, 20</sup> 17<sup>3</sup> 18<sup>1</sup>). Now the priest-hood becomes the official representative of the people before God, only the priest being permitted to approach Jehovah. This approach depends on ceremonial purity; and the priest must be free from bodily blemish (Lv 21<sup>186</sup>); but his function, unlike that of the prophet, does not depend on personal worth. As the mediator between Israel and Jehovah, the priest expiates guilt by prayer and sacrifice, and secures blessings for the people. Aaron the high priest is to 'bear the iniquity of the holy things which the children of Israel shall hallow in all their holy gifts' (Ex 2838)—a regula-tion which Schultz interprets as meaning that his surrender to God is a compensation for whatever duties towards God the actual Israel has unwittingly failed to perform. Similarly, the priests eat the ficsh of the sin-offering 'to bear the iniquity of the congregation, and to make atonement for

them' (Lv 1017).

The specific mediatorial functions of the priests and of the high priest are kept quite distinct. While apparently the high priest, being a fortiori a priest, is at liberty to undertake any sacerdotal function if he chooses to do so, he cannot delegate the specific duties of his own office to any members of the ordinary priesthood, nor may any of them usurp his functions. For the purpose of representing the people before God, the priests are permitted a nearer approach than is allowed to the laity, they only being allowed to enter 'the sacred place, i.e. the first and larger portion of the sanctuary, while the high priest, and he only, can enter the inner chamber, 'the most sacred place.' The priests perform a multitude of services for the benefit of the community; but the chief of these appear most conspicuously as mediators between God and man. The old custom of private sacrificing by individuals is now entirely abandoned, and all sacrifices must be presented by the priests. The first act, indeed, still rests with the lay worshipper. It is he who procures the victim, brings it up to the temple, and in some cases kills it. Then it is taken over by the priests and their officers. In the case of the zebah (AV 'peaceofficers. In the case of the zebah (AV 'peace-offering,' RVm 'thank-offering'), the priests lay part, chiefly the fat, on the altar, and the rest is eaten, partly by the offerers, partly by the priests, so that the idea of communion is still preserved. The 'olah (' burnt-offering') being wholly consumed on the altar, and representing complete surrender to God, though not directly aimed at effecting an atonement, points in that way more effectually. The rite would express any intense feeling, as of gratitude, devotion, or the craving for propitiation (Lv 14). The hattath ('sin-offering,' Lv 4. 5. 6<sup>24-30</sup>, Nu 15<sup>22</sup>) and the 'āshām (AV 'trespass-offering,' RV 'guilt-offering,' Lv 5-7. 14. 19) were directly aimed at the removal of uncleanness and atonement for breaches of Divine commands. In the case of the sin-offering, while the offerer brought the victim, the priests were to kill it, sprinkle part of the blood before the veil, and pour out the rest at the base of the altar of burnt-offering. The fat was to be burnt on that altar and the rest burnt 'without the camp, in a clean place, where the ashes were poured out.' There was this difference in the case of the trespass-offering, that the rest of the flesh was to be eaten by the priests in a sacred place (Lv 76).

In the daily service of the temple two lambs were offered as burnt-offerings—one in the morning, the other in the evening. The sin- and trespassofferings were more occasional, as offences called

for them, and of a more private character. in relation to these offerings that the priest stands more especially as a mediator between the offender and Jehovah, whose wrath he has occasioned, in whose eye he is unclean, though perhaps owing to some unintentional or ignorant act. But on the great Day of Atonement the daily sacrifice was supplemented with other burnt-offerings, and also a sin-offering, which in this case was of a public character, for the faults of the people generally. In these matters the priest mediates in the Godward action, presenting the people's sacrifices, and seeking the Divine grace; but at times he also acts as mediator from God to the people, when he pronounces people clean, as in the cure of lepers. See, further, arts. PRIESTS AND LEVITES, and SAC-RIFICE.

The high priest appears still more specifically as the mediator between the whole nation and Jehovah. This is suggested by the fact that when clothed with the ephod he bears the names of the twelve tribes on his heart and shoulders as their representative before God. On the Day of Atonement he enters the most sacred place and sprinkles blood on the mercy-seat, thus bringing the vital part of the sacrifice into the Divine Presence to make atonement for the sins of the nation. Whether the idea embodied in this ceremony was that expressed by the primary meaning of kipper, as a covering over of sin, or a covering of the offender from the wrath of God (Cave, Schultz); or whether, neglecting the primary signification, it was suggestive of a ransom or an atoning payment (Bennett, Smend),—in either case the action that secured pardon was performed by the high priest on behalf of the people. [For details of the laws and processes here referred to, see ATONEMENT (DAY OF)].

3. Prophetic mediation.—Side by side with the differentiation of the priest from the rest of the community grows up the corresponding differentiation of the prophet, who also has assigned to him specific mediatorial functions. While the priest comes between God and man chiefly at the altar, and for the offering of sacrifice, i.e. in ascending mediation, the prophet represents the descending mediation, speaking for God, and revealing the Divine will. This specific prophetic function has Divine will. This specific prophetic function has been acknowledged in other nations besides Israel. Thus among the Greeks from the earliest times prophecy was hereditary in many families—among the Jannidæ, the Clytiadæ, the Telliadæ, etc. In later ages there were two classes of soothsayers, -in one the enlightenment not being acquired by art or study (ἄτεχνον καὶ ἀδίδακτον γένος), the soul being either illuminated awake or thrown into a trance or ecstasy; in the other, the faculty being obtained by study, as an art (τὸ τεχνικὸν γένος). See Schömann, Griechisches Alterthum\*, vol. i. Plato distinguishes between the µáντις, who has direct communication with God, and the προφήτης, who merely interprets (Timæus, 71 fl.). In Israel necmerely interprets (Timœus, 71 ff.). romancy was sharply distinguished from prophecy, and considered wicked, as inconsistent with faith Soothsayers are not to be sought after in God. (Dt 18<sup>95.</sup>), nevertheless they are credited with real power. The witch of Endor summons the shade of Samuel, and thus obtains information for Saul (1 S 28<sup>3st.</sup>—a late narrative, but so lifelike as to point to a historical tradition). Then the true prophets are marked off from lying prophets, who, however, might be inspired by an evil spirit from Jehovah (e.g. 1 K 22<sup>3d</sup>). The prophets who cry, 'Peace, eace,' to flatter the people, are mere tricksters. still, in early times, the higher prophets were not above doing in their Divine power what soothsayers aimed at by sorcery (e.g. 1 S 9<sup>rs.</sup> 10<sup>2s.</sup>). But it is in the loftier functions of prophecy that its media-

torial power is developed. The prophet may have been trained in one of the brotherhoods of the 'sons of the prophets,' in which case he corresponds to the second class of the Greek prophets; but he may have been called without any such preparation, and quite apart from professional associations, as in the case of Amos the herdman (Am 7<sup>14</sup>). Yet in any case he must have a Divine call and commission (e.g. Is 6). Then he comes forth with a Divine message, frequently asserted in the phrase 'Thus saith the Lord.' Such a man mediates in the region of revelation. Prophets also mediate with God on behalf of Israel. Thus Jeremial intercedes in prayer for Jerusalem (Jer 32167.), and Ezekiel for his people (Ezk 13<sup>11st</sup>.). But prophetic mediation of the ascending kind is most explicitly described in the classical passage Is 53. Whoever the 'servant of the Lord' may represent,—whether Israel, the spiritual Israel, the ideal Israel, Jeremiah, Zerubbabel, the Messiah, or some unknown prophet or martyr,—it is equally clear that the passage assigns to him lofty mediatorial functions in giving

his life as an offering for sins.
4. Mediation in the Wisdom Literature. — The famous passage in Job where, according to AV, the sufferer exclaims, 'I know that my Redeemer liveth,' etc. (Job 19<sup>26-27</sup>), formerly appealed to as an OT anticipation of the mediation of Jesus Christ, cannot be so employed on any principle of sound exegesis. The 'redeemer' is the goël (יוֹאל), i.e. the next of kin whose duty it is to serve as the avenger of blood; and the context shows that this can only be God, who is described as the great Deliverer in an earlier passage (5<sup>13-21</sup>); see Davidson, 'Job,' in Camb. Bible, 143ff., 291 ff. We must look for this doctrine of mediation in a totally different quarter. It emerges in the personification of Wisdom. is seen in a purely imaginative and metaphorical form in the Bk. of Proverbs, where Wisdom appears exhorting her son to receive her words (e.g. Pr 1<sup>20π</sup>). Thus Wisdom says what, if it appeared in the Prophets, would assume the form of a message from God. Wisdom is now the prophetic mediator. In the Books of Wisdom and Sirach the personification is carried still further, and yet it must be regarded as wholly ideal. Philo consummates the process in his doctrine of the Logos, repeatedly described in personal language, and even mentioned as τὸν δεύτερον θεόν (in a fragment preserved by Eusebius; see Drummond, *Philo*, ii. p. 197). He is the mediator of creation, of the law, of all the OT theophanies and revelations. And yet it is a mistake to regard Philo's Logos as an actual person. Strong as his language is in this direction, it is only the language of allegory, and in the exact interpretation of it we cannot take the Logos to be other than the Divine Reason, or, when regarded more objectively, God's ideas and plans concerning the universe (see Leg. Allegor. 1. 19). Still less can we admit that Philo identifies the Logos with the Messiah. Any Messianic mediation is entirely foreign to his philosophy. See, further, art. Logos, p. 135.

5. The mediation of angels.—Closely associated with this subject, the Wisdom mediation, is that of angels—the one representing the trend of Alexandrian Jewish thought, and the other the speculations of the Jerusalem Rabbis. In both cases the same cause is behind. Both Alexandrian and Palestinian Judaism were profoundly influenced in their conceptions of the Divine nature by the dread of anthropomorphism, and by the conse-quent tendency to widen the interval between God and man. The result is an immense enlargement of the necessity for mediation. God does not come into direct contact with man and the universe; creation is carried out by means of angels; the

law is given by angels; the OT theophanies are angel appearances. Preparation is made for these ideas in the OT itself, where we have not merely angels communicating between earth and heaven, as on Jacob's ladder (Gn 28<sup>12</sup>), but one—'the angel of Jehovah' (J; e.g. Gn 16<sup>75</sup>), or 'the angel of God' (E; e.g. Gn 21<sup>175</sup>)—in direct dealings with men. But the mediation of angels is all in one direction—the descending. The OT nowhere teaches the -the descending.

—the descending. The OT nowhere teaches the intercessory mediation of angels (see ANGEL).

iii. MEDIATION IN THE NT. —The doctrine of mediation in the NT is wholly centred in Jesus Christ. Intercessory prayer is recognized as a means of securing blessing when offered by Christians on behalf of their brethren (e.g. 1 Th 5<sup>26</sup>, CTI) of the order of the ord 2 Th 3<sup>1</sup>, Ja 5<sup>16</sup>); but this is quite secondary to the mediation of Christ, and may be regarded as dependent on it, since Christian prayer is in the name of Christ (e.g. Jn 15<sup>16</sup>). Similarly, gifts of healing being limited to certain persons, the exercise of them on behalf of others may be regarded as a kind of mediation; but here, too, the power is through Christ and exerted in His name, as that

of the real Mediator (e.g. Ac 3<sup>3</sup> 9<sup>34</sup>).

1. Christ as Mediator. — The very Messianic conception essentially involves the idea of media-From the thought of God coming to deliver Israel and judge the oppressors in His own Person, in a theophany, the later Jews came to look for deliverance and judgment in the advent of the Messiah, who was to execute the Divine will and realize the blessings of Divine grace for Israel. At first regarded as an exalted king of the line of David restoring the throne of his ancestor, the Messiah came in course of time to be invested with superhuman powers. In the Psalms of Solomon the hope is very vivid. Sinless himself, he will come as a king both to purify and to liberate Israel (Ps. Sol 17<sup>80f, 88, 67</sup> 18<sup>6, 18</sup>). As the son of David, he will feed Israel like a shepherd (176. 28). Sibyl hopes for the Holy Ruler who will come to his everlasting kingdom. In the Apocalypse of Enoch the Messiah is the righteous one who reveals all the treasures of that which is hidden  $(38^2 \, 53^6 \, 46^3)$ . He will come to be both Ruler and Judge  $(45^3 \, 46^{66})$ . There is some doubt as to the date of these passages. But Charles has successfully vindicated the pre-Christian origin of the greater part of the Messianic references (see *The Book of Enoch*, Append. B, pp. 312-317). In all this we have only the kingly rank and influence. There is no indication of the priestly sacrifice of mediation.

In the Synoptic Gospels we have accounts of the realization of the essential elements of these expectations, though with a complete conversion of them into spiritual facts and a great elevation of them in character and aim. In Mt's account of the angel's announcement to Joseph, Mary's child is to be called Jesus because 'it is he that shall is to be called Jesus because 'it is he that shall save his people from their sins' (Mt 121), and the prophecy about Immanuel in Isaiah is applied to Him (125). Thus, since in Him God's presence on earth will be realized, He will be the connecting link between God and man, and by being this accomplish salvation. In Lk's account of the Annunciation it is promised that He shall be 'great,' 'called the Son of the Most High,' and receive 'the throne of his father David.' Here the Messiahship is distinctly affirmed of Him, and this is connected with a Divine Sonship. We cannot take the latter attribute in its full Christian import—it is used as a title of the Messiah by Caiaphas (according to Mt 26<sup>cs</sup> and Mk 14<sup>cs</sup>), perhaps traceable ultimately to Ps 2. Still it inti-mates at least a very close connexion with God, and so helps the idea of the mediation of Christ The life of Christ opens out in the Gospels in

accordance with these anticipations, though doubtless not as they would be interpreted by Jews of the first century. In particular, the following facts may be noticed as indicative of our Lord's mediatorial character and work. (a) His teaching.

As a teacher, Jesus Christ realized the idea of prophetic mediation in the highest degree. The originality, the lofty tone, the spiritual force, the self-evidencing truthfulness of His utterances proclaim their Divine origin, and show the speaker to be the medium through which the will of God is revealed on earth.  $(\beta)$  His works. Here also Jesus realizes a form of the descending mediation, bringing down Divine power to effect the cure of disease, etc. Thus He claims to work His miracles by 'the finger of God' (Lk 1129). ( $\gamma$ ) His prayers. Jesus carries on the mediation of intercession (e.g. In 17). ( $\delta$ ) His death. As we are concerned only with the facts of the history at this point, and should not import the subsequent reflexions springing from apostolic teaching and later speculations, we must not yet bring in any doctrine of the atonement. But, merely contemplating the historical situation, we have in it a vivid picture of mediation. Starting with our Lord's self-evidencing Messiahship in His life, teaching, and work, we see Him facing death and enduring the horrors of the Passion and the Cross, when He might easily have avoided them. Had He remained in Galilee, or had He continued in retirement such as for a time He sought at Casarea, in Percea, and at Ephraim, still more had He abandoned Palestine and gone to Alexandria or Athens, where His teaching would have been welcomed, at all events superficially, for its novelty, He might have eluded the pursuit of His enemies. But any such course would have shattered His aims as the Redeemer of Israel and the Founder of the kingdom of heaven. Accordingly, Jesus is seen sacrificing His life for no personal object, but wholly on behalf of His people; and this we may accept as a fact of history quite independent of specific apostolic teaching and later theological speculation.

2. The teaching of Jesus on mediation.—a. The teaching in the Synoptics.—The descending mediation of one who comes from God is not only apparent throughout our Lord's life on earth; it is distinctly claimed by Him in His utterances about His own mission. Thus it is implied in His acceptance of the Messianic title (Mk 829), and His prophetic statements concerning Ilis future action in His second advent (Mk 838). He has come now on behalt of God to establish the kingdom of heaven; He will come in the future with the glory of His Father and the holy angels to judge the world. Then He is the revealer of God, and no one can know the l'ather but he to whom the Son is willing to reveal Him (Mt 1127). In the parable of the Vineyard He is the Son sent by the owner to collect the revenue—a mediator in the form of an agent (Mt 2187). When declaring that He will own before His Father every one who confesses Him on earth, and deny before His Father every one who denies Him on earth, He approaches the other form of mediation in which His words and actions are efficacious with God on our behalf (Mt actions are emcacious with God on our definit (ML 10<sup>38</sup>). There are two passages in the Synoptic narratives that connect this mediation with the death of Christ. The first is the declaration that He came 'to give his life a ransom for many' (Mk 10<sup>48</sup>, Mt 20<sup>28</sup>). The following points should be observed:—(1) This phrase must be approached from the context, where we find our Lord is teaching the duty of humble service by His own example, as coming to minister and not to be ministered unto, so that the primary intention of the passage is not to teach any specific doctrine concerning His mediatorial work, and therefore must

not be pressed as though that were its aim. Still He could not have spoken these words without meaning that some such work was to be accomplished by Him. (2) The expression 'give his life' (δοῦναι τὴν ψυχήν αὐτοῦ) cannot mean spend His life in service, but must signify surrender it in death as all parallels show (e.g. Mk 3<sup>4</sup> 8<sup>35</sup>, Lk 9<sup>55</sup> 12<sup>20</sup>, Jn 10<sup>11</sup> 13<sup>37</sup> 15<sup>13</sup>). (3) This is voluntary ('give'—not 'lose' His life as in Mk 8<sup>35</sup>), and emphatically the surrender of His render of His own life (aυτοῦ) in distinction from the familiar Jewish notion of the giving some payment or the offering some sacrifice distinct from the person performing the act. (4) The life of Christ thus surrendered is given as a ransom (λότρον). The Greek word occurs in LXX as a translation of several Heb. terms (π<sup>1</sup>/<sub>2</sub>μ<sub>2</sub> Lν 25<sup>24. 51</sup>; γγ<sub>2</sub> Ex 21<sup>30</sup>; σγγ Nu 3<sup>46. 51</sup>; γγ<sub>2</sub> Ex 21<sup>30</sup>; σγγ Nu 3<sup>49</sup>) which signify 'ransom, 'a.c. a payment to effect liberation signify fatisons, i.e. a payment to enecution or to release from penalty. It also appears in the LXX as a rendering of the Heb. 75, which means literally a covering, i.e. a propitiatory gift (Ex 21<sup>30</sup> 30<sup>12</sup>, Nu 35<sup>31a</sup>, Pr 6<sup>30</sup> 13<sup>8</sup>), but 'is restricted by usage to a gift offered as an equivalent for a life that is claimed, the wergild' (Driver, Deut. 425 f.). This second sense, though accepted by some here (Ritschl, Lehre v. der Rechtfertigung u. Vers. ii. meaning of the word, since, though the LXX writers give it in place of the Heb. word for 'atonement,' there is no evidence that the meaning 'atonement' was ever given to the Greek word. Its usage follows its derivation, and wherever it can be tested gives the idea of that which effects can be tested gives the idea of that which effects release by being paid for that purpose (so Wendt, Lehre Jesu, p. 512 ff.). (5) This ransom is to effect the liberation of many. It is for (drrl) many. The exact sense of this word will depend on the meaning given to  $\lambda \acute{v}r\rho o \nu$ . If this could mean 'atonement,' the Gr. drrl would='instead of'; but if it records the Gr. drrl would='instead of'; but if it means 'ransom,' durl must='in exchange for'; i.e. Christ pays His life as the price in exchange for which many are given up or set at liberty. Two further points are left undetermined. First, as to what that is from which the many are set free. The close analogy of the ideas of the passage would suggest death, or we may say a state of slavery (see Lk 418 'deliverance to the state of slavery (see LK 4" deriverance to the captives... to set at liberty'), especially that of sin (cf. Jn 8<sup>3,34</sup>). Second, as to the person to whom payment is made. The widest differences of opinion have prevailed on this point, patristic opinion being for the devil (Origen, Gregory of Nyssa), scholastic and later for God (Anselm). Considering that the purpose of the logion is not to expound the doctrine of the atonement but to enforce an example of service, it is probable that both of these points are left out of account, so that the teaching goes no further than the idea of deliverance at the cost of Christ's life voluntarily given up for the purpose.

The other passage in which Jesus Christ ascribes a mediatorial character to His death occurs in the institution of the Lord's Supper. The Eucharist itself reveals Christ as a mediator, the elements representing His body and blood as the media through which His people are nourished with Divine life. Lk reports Christ as saying of the bread, 'This is my body which is given for you' (τὸ ὑπὲρ ὑμῶν διδόμενον, Lk 22¹¹), and St. Paul the shorter phrase, 'which is for you' (τὸ ὑπὲρ ὑμῶν κικὸ ὑμῶν κικὸ ὑμῶν κικὸ ὑμῶν (τὸ ὑπὲρ ὑμῶν being omitted from the best MSS, 1 Co 11²⁴), words which describe the giving of His body on behalf of or for the benefit of His people. And a specific connexion with His death occurs in the words about the cup. (1) In all four accounts the blood of Christ is connected with the New Covenant (Mk 14²⁴, Mt 26²², Lk 22²α, 1 Co 11²²), and in the three accounts of the Gospels it is said to be 'shed'

(ἐκχυννόμενον). This must point to death. The connexion of the blood with a covenant is based on a familiar Jewish idea—that of confirming a cove-nant by a sacrifice, the blood of which is thrown on the parties to it. Thus in the sealing of the covenant of the law victims are sacrificed, and Moses sprinkles (literally 'throws') half the blood on the altar and half on the people (Ex 246-8), as though to express the union of Jehovah and Israel in the covenant by means of the blood, the sacri-field life of the victim shared by both. This rite, being familiar to Jews who knew the law, must have been suggested to their minds by our Lord's words concerning the cup and His blood. He teaches that His blood, i.e. His sacrificed life, conteaches that his blood, i.e. His sacrineed life, confirms the New Covenant (Jer 31<sup>215</sup>.), making it effectual and binding. (2) In one of the four accounts it is added that this shedding of our Lord's blood is 'for remission of sins' (εls άφεσιν ἀμαρτιῶν, Mt 26<sup>28</sup>). Jesus had claimed the right to forgive sins much earlier in His ministry (Mk 25m. Now for the first and only time He connects this with His death. The second evangelist uses just the same phrase of John's baptism of repentance (βάπτισμα μετανοίας els άφεσιν άμαρτιών), where the language does not determine whether it is baptism, or repentance, or the two together that are connected with forgiveness. Further, in neither case does the language declare that the result is certainly attained, the preposition (cls) indicating the end aimed at, not the result reached. But in the case of its association with Christ other teachings and the whole tenor of His work indicate that it is effectual, that the end is reached—a result which the sequel shows was not always the case with John's baptism. The baptism of John pointed towards what Jesus Christ actually effected. the connexion of this forgiveness with the shedding of His blood draws our thoughts again to the Jewish sacrificial system, where animals were slain Thus the blood of the sin-offering was placed on the altar (Lv 4<sup>18</sup>). Jews hearing Christ's words must have understood Him to mean that He was to die as a sacrifice for sin. Wendt considers this phrase to be an addition of the evangelist, but springing out of the consciousness of the Church as a true interpretation of the significance of the Lord's Supper (Lehre Jesu, p. 521). Though a

Pauline thought, it is in Mt, not Lk.

b. The teaching in the Fourth Gospel.—This introduces both aspects of our Lord's mediatorial work more clearly than the Synoptics, but here it is not so easy to discriminate between Christ's original teaching and the form in which it is cast by the writer. Jesus comes claiming Divine Sonship and union with His Father (Jn 10<sup>30</sup>), and dispensing the Water of Life (4<sup>14</sup> 7<sup>87</sup>). He is the Bread of Life (6<sup>48-58</sup>), the Light of the world (8<sup>12</sup>), the Good Shepherd (10<sup>11</sup>), the True Vine (15<sup>1-7</sup>); in all these aspects He is the medium for bringing to us the life and blessedness that God confers. Then, on the other hand, He also appears as the Mediator through whom men attain to God. He is the Door of the sheepfold (10<sup>9</sup>), the only Way to the Father (14<sup>9</sup>), and to see Him is to see the Father (14<sup>9</sup>). Further, He intercedes on behalf of His disciples (17<sup>9</sup>). He teaches that the raising of Lazarus was in answer to His prayer (11<sup>14</sup>). In regard to His death, Jesus does not here use the sacrificial language found in the Synoptics, but He describes it as voluntarily accepted, for He has authority to lay down His life and to take it again (10<sup>18</sup>), and also as being on behalf of His people. He is the Good Shepherd laying down His life for (tπέρ, 'on behalf of'—John never uses δπτ, 'instead of,' in this connexion) His sheep (10<sup>11</sup>). The metaphor in its connexion suggests

the shepherd facing the wolves in defence of his flock; and the first historical application of it may be found in the scene in the garden, where Jesus, instead of escaping,—like the hireling who 'fleeth' when he sees the wolf coming (1012),—came forward and surrendered, with the stipulation that His disciples should not be touched (184-8). But it is not possible to see the full meaning of our Lord's words realized in this incident or in any external event. His solemn reference to His authority to lay down His life, combined with the assertion that He does so for the benefit of His people, points to a deeper purpose, though one that is not here at all explained. Wendt holds that Jesus was pointing to His whole saving work, which would be ruined if He deserted His people and relinquished His task; and also that Jesus thus set His disciples a great example, and in doing that died for their great example, and in doing since a somewhat gratuitous limitation where nothing but the great nurpose is defined. Wendt nothing but the great purpose is defined. Wendt points out that as the author himself is more explicit on the relation of the death of Christ to the forgiveness of sins (1 Jn 2<sup>2</sup> 4<sup>10</sup>), and ascribes to John the Baptist sayings on the subject (Jn 1<sup>29, 36</sup>), the reticence of Christ is an indication that so far our Lord's teaching has been correctly rendered (Lehre Jesu, p. 539).

3. The teaching of the apostles on mediation.—a.

The speeches in Acts. - In St. Peter's speeches redemption is offered through Jesus Christ, who is described as God's servant (o maîs), a title reminding us of Is 53 (e.g. Ac 313. 26), and therefore as bringing His gift of redemption in obedience to the will of God. The name 'Son of God' is not here given to Him; but He is called 'Lord' (κύριος), though in distinction from Jehovah in an OT passage applied to Him (Ac 2<sup>34</sup>). The primary point to be made out is that He is the Messiah. In treating of this, St. Peter has to encounter the fact of our Lord's crucifixion. He does not here connect it with the mediatorial work by introducing any doctrine of the Atonement. He has to face the great objection arising in Jewish minds from the fact that He who is affirmed to be the Christ had been executed in ignominy. This he does (1) by correcting popular conceptions of the Messiahship, in calling attention to other titles than that of the victorious king, viz. that of Prophet (Ac 3<sup>22</sup>), and that of God's servant (3<sup>13</sup> 4<sup>27</sup>); (2) by pointing to predictions of the death of the Christ (e.g. Ac 2<sup>23</sup>), so that this should have been expected; (3) by appearing as a witness of the Resurrection, and appealing to the like testimony of the other apostles. This was the clinching proof that death had not an-nulled the Messianic claims of Jesus, since He had received the greatest mark of God's recognition. Having thus met the reproach of the Cross and also given the positive proof of the Messiah-ship of Jesus afforded by the Resurrection, St. Peter proceeds to urge His claims (2<sup>38</sup>); to lay the charge of their guilt against His murderers (314); and to invite them to repentance with the promise of future 'seasons of refreshing' in the return of Christ (3<sup>19, 20</sup>), but also with the gospel declarations that God had raised up His servant to be a means of blessing to the people in turning them from their sins (3<sup>26</sup>), that in Him and in Him alone is salvation (4<sup>11,12</sup>). He was described earlier as the 'Prince' or 'Author of life' (τὸν δὲ ἀρχηγὸν τῆς ζωῆς, 3<sup>15</sup>), and later as exalted by God to be 'a Prince and a Saviour.' Thus these speeches distinctly not further described as described and a saviour. tinctly set forth the idea of the descending mediation with the presentation of Jesus Christ as the Divinely-appointed intermediary through whom salvation is brought to men. They do not set forth any doctrine on the Godward aspect of mediation, though the choice of the title 'the Servant,' pointing to Is 53, brings in the germ of it for reflecting minds.

b. St. Paul and 1 Peter.-When we come to St. Paul's Epistles we reach a fuller expression of the Christian doctrine of mediation in both its aspects. He is the first NT writer to use the term mediator ( $\mu\epsilon\sigma l\tau\eta s$ ), viz. where he says the law 'was ordained through angels by the hand of a mediator,' and adds, 'now a mediator is not of one; but God is one' (Gal 3<sup>19, 20</sup>). Winer states that the number of interpretations of this passage mount up to 250 or 300. Origen and commentators who have followed him are plainly wrong in understanding Christ to be the mediator St. Paul here mentions. Undoubtedly he means Moses, who received the law, according to the rabbinical doctrine, not directly from God, but through the angels, and communicated it to the people (see Lv 26<sup>46</sup> LXX). Lightfoot's view of the second part of the passage is as follows: 'The very idea of midiations involve two paragraphs of the passage is as follows: mediation implies two persons at least, between whom the mediation is carried on. The law, then, is of the nature of a contract between two parties, God on the one hand, and the Jewish people on the other. It is only valid so long as both parties rulfil the terms.' But it is different with God's promise. God is one, and no other person is concerned with the promise; therefore it is absolute and unconditional (Lightfoot, Gal. in loc.). This interpretation is substantially that of Schleiermacher, Winer, Herrmann; it is supported by Lipsius (Hand-Com. in loc.). Hausrath treats the 'of one' (tots) as neuter (in spite of the els), and takes it not numerically, but quantitatively, as signifying that the mediator is not a unit, but admits two distinctions of will—a diffi-cult and improbable position. If, then, we follow Lightfoot here, we not only see that the passage has no direct reference to Christ's mediation, but that it even excludes this from view for the time being by contrasting God's direct promise in the Gospel with the mediation of Moses in the law. Still it is only one form of mediation that is thus ex-cluded, for the idea of mediation is prominent in the apostle's writings. In 1 Ti 215 Jesus Christ is distinctly called a mediator between God and men. Both aspects of mediation are set forth in St. Paul's writings. (1) Christ is the Mediator in bringing Divine grace to man. St. Paul carefully distinguishes the Son from the Father. The Father sends His Son to effect redemption (e.g. Gal 44, Ro 83). Throughout, St. Paul teaches that this blessing originates in the love of God, who therefore does not require to be rendered gracious therefore does not require to be rendered gracious by the offices of a mediator, but, on the contrary, out of His own grace provides the mediator (e.g. Ro 3<sup>24, 26</sup> 5<sup>8</sup>). To effect the great purpose of redemption, Christ communicates to us the knowledge of God (2 Co 4<sup>8</sup>), the grace of God (Ro 5<sup>15</sup>), remission of sins together with 'the righteousness of God' (Ro 3<sup>22</sup>, Ph 3<sup>8</sup>), God's free gift of eternal life which is 'in Christ Jesus our Lord' (Ro 6<sup>23</sup>), and all the blessings of the Christian gospel. St and all the blessings of the Christian gospel. St. Paul, writing out of his own experience, describes the Christian life as a condition of union with Jesus Christ (e.g. Ph 221). (2) Christ is also the Mediator in bringing about reconciliation with God. There is a point where these two kinds of mediation coincide or work together. Thus St. l'aul writes of 'God reconciling us to Himself through Christ' (2 Co 5<sup>18</sup>), and describes God as thus reconciling the world to Himself, with the addition 'not reckoning unto them their trespasses' This clause suggests that, while the passage as a whole points to the overcoming of man's enmity to God, there was also the removal of God's charge of guilt against man, and therefore a certain Godward aspect of the mediation, although even this originated with God. That!the Greek word for 'reconcile' has this twofold

bearing is suggested by other instances of the use of it, e.g. Ro 510, where the 'reconciled' (καταλλαγέντες) appear as those restored to the Divine favour and not merely turned from their own enmity, and 1 Co 711, where the wife's being reconciled to her husband includes a kindly reception on clied to her husband includes a kindly reception on his part. St. Paul sets out his ideas on this subject very explicitly in Ro 3<sup>24-26</sup>, in which passage the following points may be noted: (a) The redemption originated in God who 'set forth publicly' (προέθετο, proposuit; Vulg., Sanday-Headlam, though RVm follows Pesh. and Origen with the meaning 'purposed'), showed His right-eousness in regard to His previous forbearance, and now acts as 'the Justifier.' (\$\beta\$) It is mediated by Christ. The redemption is 'in Christ Jesus.' God set Him forth to effect this end. It is enjoyed through faith in Him. (γ) This is accomplished by Christ becoming a 'propitiation,' and by means of 'His blood.' The word rendered 'propitiation' (λαστήριον) is literally 'a place or vehicle of propitiation' (Sanday-Headlam), and is used in LXX and He 95 for the lid of the ark, the 'mercy-seat'; but it cannot be so employed here. Either it is a neuter adjective, or a masc. accus. adjective used predicatively of Christ (Sanday-Headlam). As a neuter it is often taken to be equivalent to a 'propitiatory sacrifice' (Luther, Thol., Phil., Delitzsch, Ritschl, Lipsius, etc.), or indefinitely as a forecast of the same as fore indefinitely as a 'means of propitiation' (Hofmann, Weiss, etc.). Whichever interpretation we accept shows that the ordinary pagan thought of propitiating an offended divinity cannot be intended; besides, it is to be observed that the word lλdσκομαι is never used in LXX or NT in the middle form, as with the classics, for propitiating God, but always in the passive, for God's being gracious. Therefore we must understand the propitiation, even if sacrificial, as a means by which God acts graciously to man. Then the statement that this is by means of Christ's blood, points to the death of Christ as a sacrifice; but with the distinctive thought that His life was given, that the value of this life, surrendered in death, might be the propitiation, or means of bringing God's grace to man. Elsewhere St. Paul emphasizes the importance of the death of Christ in this connexion. The message the preaches is 'the word of the cross' (1 Co 1<sup>18</sup>), 'Christ died for  $(i\pi\epsilon\rho)$  our sins' (1 Co 15<sup>3</sup>). This, St. Paul gives as part of what he had 'received from the Lord,' adding that it was 'according to the Scriptures.' Here we have two sources of the apostle's doctrine of the atonement-tradition of apostle's doctrine of the atonement—tradition of Christ's teaching (e.g. 1 Co 11<sup>25</sup>, and such a logion as Mk 10<sup>45</sup>), and inferences from Scripture (e.g. Is 53<sup>3-15</sup>, cf. Lk 24<sup>36-27</sup>; Ac 9<sup>32-35</sup>). St. Paul writes of Christ as dying 'on behalf of'  $(i\pi\epsilon\rho)$  and 'concerning'  $(\pi\epsilon\rho l, \text{ the LXX})$  word for sin-offerings) our sins; but he never uses the expression (interest of l) (the latest and l). offerings) our sins; out he never uses the expression 'instead of' (dvrl), dying in our stead. He says that Christ was 'made to be sin on our behalf' (2 Co 5<sup>21</sup>), a powerful expression for being treated as a sinner, and so 'a curse for us' (Gal 3<sup>18</sup>). He does not explain how it comes about that this suffering and sacrificial death of Christ our redemption. He seems to have the effect our redemption. He seems to have the analogy of the Jewish sacrifices in mind, though he does not directly cite it (as the author of He) in explanation of his doctrine. He also points to the obedience of Christ as a ground of justification (Ro 519). It is impossible to read St. Paul's words on this subject without seeing that he very closely connects the death of Christ with the salvation of souls, that he regards this death as sacrificial-i.e. as an offering to God-while at the same time he never regards it as inducing God's grace, but, on the contrary, treats it as springing from the love of God to mankind. St. Paul does not confine his teaching

on the mediatorial work of Christ to His death. The Resurrection is also for our benefit; our Lord was both 'delivered for our trespasses' and 'raised for our justification' (Ro 429). In His risen life He is 'the first-fruits of them that are asleep' (1 Co 1520). Lastly, His intercession, now carried on in heaven, is an important part of His work as Mediator (Ro 834). In St. Paul's later Epistles the more advanced Christology necessarily affects the doctrine of mediation. In Colossians we seem to have a Christian alternative to the Jewish doctrine of the mediation of angels in the administration of the universe, and perhaps to Philo's specific teaching concerning the Logos as the mediator of creation, for there we read concerning Christ that 'in him were all things created' (Col 116), and the mediator of providential government, for 'in him all things consist' (v.17). Referring to his teaching on the death of Christ who had 'made peace through the blood of his cross,' St. Paul enlarges the application of it to a future 'reconciliation of all things... whether things upon the earth, or things in the heavens' (v.20), thus representing Christ as the great mediator and peacemaker for the whole universe.

1 P closely follows the Pauline teaching. Christ redeems us with His 'blood as of a lamb without blemish' (119), this reference to the lamb making the shedding of the blood evidently sacrificial. Similarly St. Peter writes of His bearing our sins in His body upon the tree (224), and suffering 'for sins once, the righteous for  $(\upsilon \pi \epsilon \rho)$ , on behalf of) the unrighteous, that he might bring us to God' (318). The only addition to the Pauline thought is the greater stress laid on the sufferings of Christ—while St. Paul usually confines our attention to His death. The idea of bringing us to God suggests reconciliation, and Christ, through His sufferings, coming as the Mediator who effects this reconciliation. In one mysterious passage the source of which, or subject alluded to, cannot be traced, St. Peter enlarges the idea of the mediation of Christ in an entirely new direction, assigning part of its operation to the state of the dead; for such is the simplest and most generally accepted interpretation of the statement that 'he went and preached unto the spirits in prison' (3<sup>19, 20</sup>). That this was only a brief episode, confined to the time between the death and the resurrection of Christ, is suggested by other passages in the Epistle indicating that He was raised from the dead (1°), and that He passed into the heavens, there to exercise

exalted powers of government (3<sup>22</sup>).
c. Epistle to the Hebrews.—The main topic of Hebrews is to exhibit the mediatorial status and functions of Jesus Christ in contrast with the various forms of mediation recognized in Judaism. The Epistle opens with a contrast of the unity and exalted character of the new revelation in a Son with the broken and varied nature of the OT revelation by means of prophets. Christ there appears as the agent of creation, the sustainer of all things, who has also made purification for sins (11-8). Then, taking up the contents of this revelation, it proceeds to work out the contrast in several regions. First, we have the mediation of angels in giving the law; the writer contrasts the higher status of the Son, who is honoured with Divine titles, though addressed by God as another person to whom is committed the government of His kingdom (1-21s). Here Jesus is named 'the Apostle and High Priest of our confession,' in contrast with Moses, who was only a servant in God's house, while Christ is both the Builder of the house and the Son set over it (31-6). The idea of our Lord's High-priesthood thus introduced is enlarged. He has passed into the heavens, and therefore we are encouraged to draw near with boldness to the

throne of grace (416). This leads on to specific teaching concerning our Lord's priestly office. Two general considerations arise—the priesthood is of Divine appointment; yet it requires human sympathies on the part of the priest. Both of these conditions are fulfilled in Christ's priesthood. In taking the two together we see that His office is related both to God and to man, so that He stands in the intermediate position of a priestly mediator (51-10). A reference to Melchizedek in Ps 110 leads to a comparison of the Messianic priesthood 'after the order of Melchizedek,' with the priesthood of Aaron to the advantage of the former, since Abraham, the ancestor of Levi, did homage to Melchizedek, and since the priest of the Melchizedek order is declared by the Psalmist to be perpetual. After alluding to the sacrifices—a subject to be developed later—the writer returns to the idea of Sonship as the crowning proof of the superiority of Christ as a priest (ch. 7). Then he passes to a fresh consideration. It must be admitted that Christ is not a priest under the law, and therefore not in accordance with the OT covenant. But a new covenant is introduced—that predicted by Jeremiah, concerning the law written in the heart. It is under this covenant that Christ's priesthood is exercised. It is through Him that the covenant itself is brought into effect. Here we come to another instance of the use of the word 'mediator in the NT: Christ is described as the 'Mediator' of this new and better covenant, 'that is, the Agent by whom it is established (Bruce, Hebreus, p. 296). This use of the word is parallel to St. Paul's in Gal 3<sup>19, 20</sup>, where the apostle applies it to Moses as the agent through whom the covenant of the law was introduced. In both cases we have only the descending mediation, the mediator representing and executing God's will among men. But though the author does not use the title for the other aspect of mediation, he is most explicit in teaching the truth that represents in effect the Godward side of mediation. This is implied in the priestly work of Christ. Like the Levitical priests, Christ approaches God on our behalf; but with these important differences, that He not only effects much more than Aaron effected for Israel, but also brings His people directly into the Divine Presence. Subsequently the argument proceeds to develop the idea of the sacrifice of Christ in contrast with the Jewish sacrifices, and here it directly deals with the Godward aspect of mediation. Christ offers the sacrifice of Himself to God (914). Later, contrasting this sacrifice of Christ's with the Jewish rites, the author quotes Ps 40, where God says He has no pleasure in burnt-offerings and sacrifices for sin, and where the Psalmist promises instead of such oblations the offer of his own service to do the will of God. That surrender of obedience is taken over by the author of Hebrews and applied to Christ as the essence of His sacrifice. By this will, i.e. by Christ thus doing God's will, we are sanctified. But such obedience involves dying, it is carried out to the very early and and convergent dim death (of El. 88). very end and consummated in death (cf. Ph 2<sup>3</sup> becoming obedient unto death'); and thus it is offered as a 'sacrifice for sins.' This is so effectual that it needs to be offered but once, while the Jewish sacrifices were repeated (He 10<sup>1-19</sup>). Here we have most distinctly set forth the Godward aspect of mediation. It is impossible to understand the writer's doctrine of Christ's sacrifice merely as God sacrificing Himself in the person of His Son in the sense of giving Himself to us, for he distinctly says that the sacrifice is offered by Christ unto God'  $(\tau\hat{\varphi} \ \theta\epsilon\hat{\varphi}, \ 9^{14})$ . The efficacy of this is widespread. It is to cleanse the conscience from dead works to serve the living God  $(9^{14})$ , for 'the redemption of transgressions'  $(\mathbf{v}^{18})$ , 'to

put away sin'  $(v.^{26})$ , a 'sacrifice for sins'  $(\dot{v}\pi\dot{\epsilon}\rho$   $\dot{a}\mu a\rho\tau (\dot{w}\nu$ ,  $10^{12})$ , and so leading to 'remission of sins'  $(10^{18})$ . At the same time it is for the confirmation of the new covenant. The author connects the death of Christ with this result in two ways: reading the word for covenant  $(\delta \iota \alpha \theta \eta \kappa \eta)$  in the classical Gr. sense as a will [but see Westcott, ad loc.], he argues that for the will to take effect there must be death (917); then, returning to the idea of covenant, he compares the blood of Christ to that of the sacrifice which confirms a covenant (Ex 243-8).

d. St. John. - (a) The Johannine theology as represented in the Fourth Gospel and the Epistles. -The Prologue to the Gospel introduces the Logos as the mediator of creation and revelation, the us the mediator of creation and revelation, the title probably coming from Philo and Stoic usage, but the idea from Hebrew conceptions of the 'Memra' [see JOHN, vol. ii. p. 685]. God's revelation in nature (Jn 1<sup>1-6</sup>), in prophecy (vv. 6-8), in consciousness (vv. 9-10), and in the incarnation (vy. 1<sup>1-10</sup>) is in every one mediated by the Vocasion of the constitution of the property of the proper (vv.11-16), is in every case mediated by the Logos, who is a Divine Being, in intimate relations with God, and Himself essentially God, yet with a certain personal distinction from God (1<sup>1</sup>). God gives eternal life to the world through Christ (3<sup>16</sup>). To have the Son is to have the life, and not to have the Son is not to have the life (1 Jn 512). It is through Him that we receive the knowledge of truth and God (v.20). Other ideas of the same character are contained in St. John's accounts of the teachings of Christ, referred to above. Then the apostle distinctly sets out the other aspect of mediation, in the atonement for sin offered by our Lord. Christ was 'manifested to take away sins' (or 'bear sins,' RVm; Gr. Γνα τὰς ἀμαρτίας ἄρη, 1 Jn 35). Compare St. John's report of John the Baptist's words about 'the Lamb of God which taketh away (RVm 'beareth,' Gr. αιρων) the sin of the world' (In  $1^{29}$ ). More specifically St. John describes Jesus Christ as 'an advocate' ( $\pi a \rho d - \kappa \lambda \eta \tau o \nu$ ) with the Father (1 Jn  $2^1$ ), i.e. as a pleader who mediates on our behalf, and represents our case to God; and as a 'propitiation for our sins' (Raσμός έστιν περί των άμαρτιών ήμων, 2<sup>3</sup>). It is to be observed that the word rendered 'propitiation' is not the same as that employed by St. Paul in Ro 325 (Ιλαστήριον), and signifies distinctly either an act of propitiation, or, in Alexandrine usage, a means of propitiating (e.g. Nu 58, Lv 259). In 2 Mac 333 ποιείσθαι ιλασμόν is used of a priest making a propitiatory sacrifice (see Thayer-Grimm). Accordingly St. John seems to mean that Christ is the propitiatory sacrifice. He had said earlier that 'the blood of Jesus His Son cleanseth us from all sin' (1 Jn 17); where, as usual, the word blood, written by a Jew with reference to cleansing from sin, must refer to a sacrificial idea. Thus by His death Christ becomes the sacrifice which removes the guilt of sin, and secures forgiveness for the penitent. In common with other NT writers, St. John does not explain the rationale of the process.
(β) The idea of mediation in the Apocalypse.—

Both aspects of mediation are here presented to us. On the one hand, Jesus has come from God with truth and grace, and will come again to execute judgment. He is the Logos, 'The Word of God'  $(\delta \lambda \delta \gamma or \tau o \theta \epsilon o \theta, 19^{18})$ , and so the source of revelation. He is the 'Living One'  $(\delta \zeta \tilde{\omega} \nu, 4^{9,10})$  106), and therefore the source of life. He appears as the mediator of creation, like the Logos in the General for He is 'the hearinging of the greation of the restion of Gospel, for He is 'the beginning of the creation of God' (ἡ ἀρχὴ τῆς κτίσεως τοῦ θεοῦ, 314). Beyschlag understands this to mean the first being created (NT Theol. ii. 381); but most interpreters regard the dρχή as independent of creation, its determining principle (so Weiss, Gebhardt, Lechler, Bousset, Briggs, Stevens, etc.). Further, he holds the keys of Hades and of death (118), i.e. determines who

shall enter and who shall leave the region of the He sits on the throne with God (321 717 125). dead. and will be the assessor of God in the judgment (616.17). In all these respects God acts through Him. On the other hand, we see in Christ the Godward aspect of mediation in which He represents us to God. As in Hebrews, though less explicitly, Christ is both priest and sacrifice. The opening description of Ilim as 'clothed with a garment down to the foot, and girt about at the breasts with a golden girdle' (1<sup>18</sup>), plainly points to priestly robes. But He is also the sacrifice. The most characteristic designation of our Lord in this book is 'the Lamb of God,' a title which occurs 29 book is the family of God, a title which occurs 25 times: He 'loosed (RV λύσαντι, following best MSS, instead of 'washed,' λούσαντι, AV) us from our sins by his blood' (16); the saints 'have washed their robes and made them white in the blood of the Lamb' (714). Such language in a book that has many features of Judaism cannot but contain a sacrificial allusion. At the same time, here and elsewhere in NT, while the explanation of ideas of 'blood' and 'sacrifice' must take account of the OT, the advance of the Christian revelation to higher and more spiritual conceptions of religion The spiritual essence of sacrifice, the surrender of will, is the specially Christian thought.

Conclusion.—All through the Bible the idea of

mediation in both its aspects is continually appearing. In the OT we find it distributed among a number of persons and functions-in the patriarch, the king, the prophet, the priest, the sacrifice, the 'servant of the Lord.' In the NT all these distinctions are merged in the sole mediation of Jesus Christ, both aspects of which are seen in His life and teaching, and in the apostolic writings. Our Lord appears throughout as one sent by God to reveal Divine truth, to execute the Divine will, to bring deliverance to mankind from sin and ruin, to confer the gift of eternal life, and to establish the kingdom of heaven on earth. On the other hand, His action, to some extent His the other hand, his action, to some extent his teaching, more explicitly the apostolic teaching (represented by St. Paul, St. Peter, St. John, and Ep. to Heb.), present Him as the Mediator with God on behalf of mankind, making intercession in His prayers on earth and in His heavenly life after the resurrection, but chiefly giving His life as a ransom, shedding His blood for the remission of sin, acting as a means of propitiation, doing God's will, and dying as the perfecting of obedience to please God for the benefit of mankind, confirming the new covenant by His death. The images of 'blood' and 'sacrifice' are drawn from the OT, and can be understood only when their origin and allusion are recognized. At the same time, since our Lord liberated religion from the external and material limitations of Judaism, this process must be acknowledged with regard to the priestly and sacrificial functions. The revelation of the Fatherhood of God necessarily modifies the idea of inter-cession and priestly mediation. The revelation of His spirituality, and of the spiritual character of religion, carries with it freedom from material conceptions of sacrifice. The OT priest killed animals and sprinkled actual blood. Christ gave His life on the cross; but the reference to His blood has no such material connexion. We must take it metaphorically for His life surrendered in Similarly, since He was not, like the Jewish sacrifices, an oblation laid by a priest on an altar, His sacrifice must be interpreted spiritually, and its reality found in the spiritual act of giving Himself to God in death.

Explanatory theories, as that the ransom was paid to Satan (Origen, Gregory of Nyssa), that the atonement was offered to the rights of God, whose

suzerainty had been outraged (Anselm), that it was for the satisfaction of law and abstract justice (Protestant theologians, especially), that it consisted in our Lord's repenting on our behalf (M'Leod Campbell), etc., do not come within the scope of this inquiry, as they appear only in later speculations; and though all of them appeal to the Bible for the justification of their positions, none of them can claim to be results of pure exegesis, or even contents of strictly biblical theology.

theology.

LITERATURE.—The place of mediation in foreign religious may be gathered from the Introduction to The Sacred Books of the East; the Hibbert Lectures; Monier Williams' works on Hinduism and Buddhism; and Non-Christian Religious Systems (S.P.C.K). For treatment of the OT teaching see works of OT theology by Oehler, Schultz, Smend, Piepenbring, Bennett; Robertson Smith, Religion of the Semities; Trumbull, The Threshold Covenant. For the NT teaching see The Teaching of Jesus by Wendt; do. by Horton; works on NT theology by Beyschlag, Holtzmann, Bovon, Weiss, Stevens, Adeney; Bruce, The Epistle to the Hebrews; Ritschl, Die Lehre v. d. Rechtfertigung u. Versohnung, 3 vols. (Eng. tr. of vol. i.) M'Leod Campbell, On the Nature of the Atonement; R. W. Dale, The Doctrine of the Atonement; H. N. Oxenham, The Catholic Doctrine of the Atonement; Bruce, The Humiliation of Christ; Simon, The Redemption of Man, and Reconciliation by Incarnation; Dorner, System of Christian Doctrine; Cave, Script. Doct. of Sacrifice; Pryce, 'The Atonement,' in Old Faith in New Light.

MEDICINE.—Compared with other countries in the same latitude, Palestine is, and probably was in Bible days, a fairly healthy land. It has few sluggish streams, and most of its valleys are windswept; except in some few localities malarious diseases are not very rife, and owing to its want of harbours, and consequently of maritime commerce, imported epidemics are not as common as they are in Egypt, which in the Old Testament is regarded as very much more unhealthy (cf. Dt 7<sup>15</sup> 28<sup>60</sup>, Am 4<sup>10</sup>). In addition to these natural advantages, if at any time the sanitary legislation of the Priestly Code were strictly observed, this must have been instrumental in preventing and checking the spread of disease. Under the social system set forth in the law, if it could have been carried out, there would not have been any very destitution; and it is probable that until a comparatively late period there was no permanent overcrowding in the larger towns. It is difficult to estimate the density of the population in ancient times, but, considering the frequent checks it received from wars internal and external, it is not probable that even in the most prosperous days it ever exceeded 300 to the square mile. (The numbers in 1 Ch 21<sup>5</sup> or 2 S 24<sup>9</sup> are obviously unreliable). The conditions of life contemplated in the Priestly Code are those of a community of agricultural freeholders; and the social and moral enactments of the law provide for the maintenance of a healthy discipline, and for the repression of excesses injurious to health.

Health, the state in which the bodily functions are perfectly discharged, is, according to Sirach, the greatest of earthly blessings (30<sup>14,16</sup>). The word occurs 15 times in the OT (AV), but in different connotations. It is used twice as the tr. of oby shālôm, referring to material prosperity (Gn 43<sup>28</sup>, 2 S 20<sup>9</sup>), but here it is replaced by 'well' in the RV. Thrice in Ps 'health' in the old sense of welfare is the rendering of naw' yĕshû'āh (42<sup>11</sup> 43<sup>5</sup> 67<sup>2</sup>; in the first two places RVm substitutes 'help'). Four times name 'àrakāh (prop. the new flesh that forms on a wound), is tr. 'health', but 'healing' is better (so RV, as in Is 58<sup>8</sup>, and RVm in Jer 30<sup>17</sup> 33<sup>6</sup>). In Pr 3<sup>8</sup> 'health' in the ordinary sense of the word is the tr. of maga riph'ath; but in Pr 4<sup>22</sup> 12<sup>18</sup> 13<sup>17</sup> 16<sup>24</sup> and Jer 8<sup>15</sup>, in which 'health' is used metaphorically, the Heb. is saya marpê' (in the last ref. RV renders 'healing'). In the NT 'health' occurs

twice: Ac  $27^{34}$ , where it is the tr. of  $\sigma\omega\tau\eta\rho la$ , and is better rendered in RV 'safety'; and  $3~\mathrm{Jn}^2$ , in the sense of bodily welfare, to 'be in health' being the tr. of  $\dot{\nu}\gamma\iota a\dot{\nu}\epsilon\iota\nu$ .

The blessing of health was regarded as a reward of service (1s 58°), or withheld on account of sin (Jer 816.2°). In both OT and NT the popular belief is referred to, that diseases are penal in their origin, inflicted by God on account of sin either personal or parental (Jn 9°); and coming sometimes directly from Him (Ex 41¹, Dt 32³⁰), or from Satan when permitted (Job 2°), or by the agencies of other spirits, as those of dumbness (Mk 9¹°) or foulness (Mk 9³°). Diseases might also be caused by envy on the part of others (Job 5°), and the power of the evil eye is referred to in 1 S 18° as well as in the Talmud (Shabbath 67, Pesachim 112, etc.). They might also come as consequences of gluttony, of drunkenness, of vicious or self-indulgent practices (Sir 37°°.31), but even in these cases they were regarded as coming by God's direct interposition. Therefore healing was a divine token of forgiveness: God was the physician of His people (Ex 15°°), and it was their duty to look to Him for relief; hence Asa's sin in seeking to the physicians (2 Ch 16°°).

Physicians.—The medical knowledge of the biblical peoples was small in amount and crude in character. In Egypt there were schools of medicine in the 15th cent. B.C. (Papyrus Ebers i, ciii); but there are no traces of any system of medical education in Palestine in Bible times, and allusions to physicians are few. Egyptian physicians, who are called Joseph's servants, embalmed Jacob (Gn 50²). These were probably hr-hbu, the class of priests whom the Greeks called paraschistes and taricheuta, whose long misunderstood relations have been cleared up by Revillout (Æg. Zeitschr. 1879, 1880). The existence of physicians in the days of the compilation of the Book of Judgments (Ex 21¹º) has been inferred from the order that the assailant of his neighbour is to cause him to be thoroughly healed. The spirrophe', of Jer 8²², was a healer of wounds, a bandager (cf. Ec 3³). While in Asa's time to seek the physician was to depart from God, Sirach in later days regards him as God's servant, 'for from the Most High cometh healing' (38²). At the same time repentance and a memorial offering on the part of the sick man are to precede the visit of the physician, who is to be priest as well as healer (v.¹¹). In the newly discovered Heb. the passage in v.¹², which, in the Greek, seems to speak slightingly of him, says, 'He that sinneth against God will behave arrogantly before his physician' (sen).

In early Egypt also the physicians were priests, and Papyrus Ebers gives several formulæ to be used as prayers while compounding medicaments (for later Egyptian physicians see Herod. ii. 84). The Hebrew priests had charge of certain branches of public health, e.g. leprosy, but it was to the prophets that those requiring medical aid chiefly applied: Nathan (2 S 12<sup>14</sup>), Ahijah (1 K 14<sup>2</sup>), Elijah (1 K 17<sup>18</sup>), Elisha (2 K 4<sup>22</sup>), and Isaiah (2 K 20<sup>7</sup>) are examples. In post-biblical times Jewish physicians were famous throughout the East, and the sayings of many of these are preserved in the Talmud and other rabbinical writings. According to Sanhedrin 17b there was a physician in every town, and there was also in the temple a physician for the priests (Shckalim 5. 1, 2). At the same time it was not unlawful to employ a Gentile, even to perform circumcision, if no qualified Jew was available (Menahoth 42a); but Gentile medicine was to be taken with caution, as it might contain blood. At first these physicians and surgeons were mostly priests possessed of a certain amount of traditional and empirical knowledge,

VOL. 111.—21

as, for example, in connexion with the diagnosis of leprosy. Doubtless many of them were, like Job's friends, לְּאָנִי אֵלֵל Job 134, that is, having the same relation to real physicians as that which an insignificant idol bears to the true God. Men of this kind probably gave rise to the proverb in Kiddushin 4. 14, that the best of physicians was descring of hell. In the NT we have Luke, 'the beloved physician' (Col 4<sup>14</sup>), in whose writings the influence of a medical training has been recognized by Lagarde (Psalterium juxta Heb. Hieron. 165), Hobart (Medical Language of St. Luke, 1882); see also Blass, Philol. of the Gospels, 1898. The reference to physicians in Mk 5<sup>28</sup> is not very appreciative (cf. with Lk 8<sup>48</sup>).

Until a comparatively late period, the objections to touching the dead, and the ceremonial uncleanness associated with such contact, prevented the Jewish physicians from obtaining any practical acquaintance with the interior of the human body, as dissection was regarded as dishonouring the dead (Chullin 11b). The famous Rabbi Ishmael (A.D. 100), of whose anatomical knowledge many the structure of the st animals must have been known from the priestly experiences in sacrifices, in which the operator had the opportunity of inspecting the viscera of the slain beasts. The method employed in the slaughter of the animals whose carcases were used as food, in order to drain the body of its blood, must also have given to the shehet (butcher) and to the shômër (inspector), whose duty is to certify the meat as kôshër or clean, a certain amount of empirical knowledge of the anatomy and pathology of animals (Chullin 9a). In the Sepher Zabahi of Rabbi Meir Cohen (Leghorn, 1832) the ritual for this examination is given at length, and from it the stringency of the rules for the recognition of clean flesh can be estimated. This code is of considerable antiquity, and must have been of great benefit to the public health (Buxtorf, Syn. Jud.

There are very few biblical references to the facts of anatomy or physiology. 'The blood is the life,' and therefore tabooed as food (Gn 94, Lv 1711). This in itself was an important sanitary precaution, considering the highly metabolic nature of blood, which is of all the materials in the body the most likely to carry the microbes of disease, as well as parasites of larger size. In Job 10<sup>10</sup> and 1's 139<sup>15.16</sup> the current notion of embryology, which I's 139<sup>10-16</sup> the current notion of embryology, which was one of epigenesis, is set forth; but the details were considered as beyond human knowledge (Ec 11<sup>6</sup>); see also Nidda 25. In Aruch the embryo is said to appear at first like a grasshopper. ¬ν, tr. 'navel,' appears in Pr 3<sup>8</sup> as the seat of health, perhaps as being the mid-point of the body, but the word is perhaps a slip for ¬ν, 'flesh,' in contradistinction to bones, as LXX reads it (τω σώματί σω). The heart (who see) was to the Jaws as to σου). The heart (wh. see) was, to the Jews, as to all the peoples of antiquity, the seat of emotion, thought, and wisdom: the reins or kidneys (wh. see) were the seats of feeling, passion, and determination: the bowels (wh. see) were supposed to be the organs of affection and sympathy (see Job 30<sup>27</sup>). In Zohar (Bemidbar 128) there is a remarkable account of the anatomy of the brain.

occurs in Jalkut on Bereshith 38, and in Midrash Rabbah (Beresh. 23). The same idea is expressed in a saying ascribed to R. Levi (Midrash on Lv 5): 'It is a shame on the country whose surgeon is gouty and whose coulist is blind.' See Burckhardt's Arab. Prov. No. 404. A proverb, the parallel of our Lord's parable of the Mote and the Beam, occurs in Baba Bathra 15b, 'Say not, Take the straw out of thine eye, when thou hast a stick in thine own.' Another of His sayings, 'They that are whole have no need of a physician; but they that are sick,' is nearly alike in sense to a sentence in Baba Kamma 46b, 'They who suffer pain should seek the physician.' Other medical proverbs are, 'God determines the healing before the disease' (Megillah 13); 'A wise man will not live in a town where there is no physician' (Sanhedrin 17b); and, on the other hand, 'Do not live in a town of which the chief officer is a physician' (Pesachim 113. 1); 'Honour the physician before thou hast need of him' (Tanhuma, see also Sir 381 Hebrew version).

Visitation of the sick, although not enjoined in the Mosaic books, is urged as a duty in the Talmud (Shabbath 127 B), and several paragraphs in the Shulhan Aruch (Jore De'ah 335 E) are devoted to this subject. Several cases are excepted, such as ophthalmic or abdominal diseases, and headache, as these may be aggravated by disturbance. Rabbi Johanan says, 'He who visits the sick Rabbi Johanan says, 'He who visits the sick lengthens his life, and he who refrains shortens it' (Nedarim 39). Our Lord's enforcement of this duty in Mt 2536. 43 is noteworthy.

Of the general terms referring to disease in the Bible the word in commonest use is sick. This occurs 38 times in OT and 50 in NT. In the former it is usually the tr. of non halah, but in Lv 1533 (cf. 2018) it represents אָדָת davah, in the sense 1533 (cf. 2018) it represents אָדְיִי dāvāh, in the sense of temporary periodic sickness: a cognate word (יוֹדִי) in Is 15 is tr. 'faint,' and another (יוִדִי) in Ps 413 'languishing' (subst.). In 2 S 1215 the word is שׁנָּא 'ānash (in imperf. Niph.). The ptcp. pass. Qal is used in Job 346 of an arrow wound, but tr. 'desperate' in Is 1711, 'incurable' in Jer 3012, and 'desperately wicked' in Jer 1718. 'Sick' in Is 15 is 'לְּחָלֵּי lohöll, the word 'אָדְּ being usually tr. 'disease.' In Jer 1418 ('sick with famine') it is בּיִשְּׁלְּתָּב וֹנֵי diseases' in Ps 1033 and 2 Ch 2119. 'Sickness' in OT is in 12 cases the rendering of höbl. and in OT is in 12 cases the rendering of hbi, and thrice of 7700 mahalah, Ex  $23^{25}$ , 1 K  $8^{37}$ , 2 Ch  $6^{25}$ . Sicknesses in the plural occurs in the OT only in

י Sicknesses' in the plural occurs in the OT only in Dt 2866 (בְּילְיִם) 2922 (בְּילִיְם).

Discase occurs 10 times in OT, 8 times as the rendering of höll; once in Ps 418 in the phrase 'an evil disease' (AV, RV; Heb. אָרָב בְּלִיבֶּל RVm 'some wicked thing'), and once as tr. of mahālāh in 2 Ch 2115, 'Diseased' represents nahlöth (Niph. ptep. of אָרָם in Ezk 344.21, and hālāh (Qal) in 1 K 1523 and 2 Ch 1612. 'Diseases' in the plural is the tr. of tahālā'tm in 2 Ch 2119 and Ps 1038, of mahālāh in Ex 1528. of maha madveh in Dt 715 and 2860, and in Ex 15% of many madveh in Dt 715 and 2860, and of mahaldyim in 2 Ch 2425.

Infirmity is used thrice in the OT, each time in a different sense, and representing a different word, dāvāh in Lv 122 (in infin. con. with suffix লগেন), referring to periodic sickness; hālāh (in infin. Piel) in Ps 7710, in the sense of infirmity from sickness; and mahdleh in Pr 1814, in the sense of weakness in general. Plague is used sometimes as the name of a specific epidemic and sometimes in the sense of sickness in general, and is the tr. of maggēphāh, makkāh, nega'. In other places it refers to other forms of affliction or to the judgments of God (1 K 8<sup>37</sup>, Rv 16<sup>21</sup>). See PLAGUE.

The RV has changed 'sick' in Pr 23<sup>35</sup> into 'hurt,' and in Mic 6<sup>13</sup> 'will I make thee sick in in the change of the control of the

smiting thee' has been altered to 'I have smitten thee with a grievous wound.' 'Loathsome disease' in Ps 387 has been properly altered into 'hurning,' as the reference is to the heat of fever.

sickness' n'y in Hezekiah's prayer, Is 3812, has been also altered into 'from the loom.' Literally it means 'from the thrums' whereby the web is fastened to the weaver's beam, the idea being that as the web is cut off from the loom, so his life was separated from its surroundings. The 'evil disease' of Ps 418 is rendered in RVm 'some wicked

thing' (see above).

The words for 'sickness' are often qualified by The words for 'sickness' are often qualified by some expression or phrase. 'Sickness unto death' of 2 Ch 32<sup>24</sup>, 1 K 14<sup>1</sup>, and Is 38<sup>1</sup> is contrasted with 'sickness and recovery,' Is 39<sup>1</sup>. R. Hanina ben Dosa used to say of his patients, 'This one is sick unto death, this will recover' (*Bcrachoth* 5. 5). 'Sore [sickness]' is the tr. of hāzāk, 'violent,' in 1 K 17<sup>17</sup>. The prefix in 'sore diseases' of 2 Ch 21<sup>19</sup> is the tr. of ra. An 'evil disease' in l's 41<sup>8</sup> is literally a 'thing (רבר) of Belial.' The diseases of Egypt are referred to as especially severe in Ex 15<sup>26</sup>, Dt 7<sup>15</sup> 28<sup>27</sup> 28<sup>26</sup>. 'Incurable disease' used literally in 2 Ch 21<sup>18</sup> is a phrase used disease' used literally in 2 Ch 21<sup>18</sup> is a phrase used figuratively in Job 34<sup>6</sup>, Jer 15<sup>18</sup>, Mic 1<sup>9</sup>. 'Sickness of long continuance' is mentioned in Dt 28<sup>59</sup>.

Figurative expressions referring to disease are not uncommon. It is a 'scourge' in Job 923; a 'pestilence walking in darkness,' Ps 916. The pestilence walking in darkness, Ps 91°. The Jewish idea of disease and death being inflicted by a special angel is referred to in 2 S 2416, 1 Ch 2112-18.27, 2 K 1925, Rev 68. In the second of these passages he appears with a sword in his hand. Diseases are also spoken of as God's arrows, Dt 3223-42, Job 64, Ps 647 915 1446, La 31², Zec 914 etc.

The Arabian proverb says that the pestilence is God's arrow which always hits its mark.

In the NT 'sick' and 'sickness' occur 58 times, 'diseases' and 'diseased' 15 times, and 'infirmities' 19 times. These are tr. of various words:  $d\sigma\theta\ell\nu\epsilon\iota\alpha$ , meaning primarily weakness and usually tr. 'infirmities,' sometimes 'sick' as in Ac 28<sup>9</sup> (ξχοντες aσθενείας); μαλακία, meaning softness or effeminacy, as well as sickness, is used in Mt 4<sup>23</sup> 9<sup>35</sup> 10<sup>1</sup>, probably referring to wasting chronic diseases, and contrasted in some passages with poor, which indicates more acute violent seizures. Homer (Od. xv. 408) compares the hateful sickness (νούσος) falling on wretched mortals with the visitation of the gentle shafts of Artemis and Apollo, whereby the old are slain; and Hesiod assigns the origin of diseases of this kind to the box of Pandora (Op. et Di. i. 101). νόσημα occurs in Jn 54. The unfaithful use of ordinances is said to cause those who Jerome on this passage says, 'There are three causes from which infirmities arise, either from temptation as Job and Tobiah, from sin as Asaph the king and those referred to here by the apostle, or from some intemperance as Timothy, etc. Chrysostom interprets this as referring to bodily allments, great diseases, and premature deaths. The reference is, however, possibly to mental and spiritual weakness, as in Xenophon (Œconom. iv. 17: καὶ αὶ ψυχαὶ πολύ ἀρρωστότεραι γίγνονται). Hippocrates uses the word for disease either of mind or body. In Mt  $14^{35}$  7005 κακῶς έχοντας is used for 'those that were sick'; and in Ro  $15^1$   $d\sigma\theta$ ενήματα means weaknesses or infirmities of conscience, as in Aristotle (de Gener. Animal. i. 18, where it is used as the parallel of αρρωστήμα).

Some sicknesses, such as leprosy, rendered the patients unclean, and caused their exclusion from treated at home. In later times hospitals were established, generally near the city gates. These were called במי תפשים, and were like the Kaati of

the present day.

In the earlier days of Jewish medicine it is probable that bleeding, the universal panacea in the dominant classical medical schools, was not

used, on account of the tribal belief concerning the blood. In this the Jews were in accord with Pythagoras and Erasistratus. It has been thought that they were acquainted with the use of leeches from the words of Agur (Pr 301°); but if 'horseleech' is the correct rendering (cf. HORSELEECH, ad fin.), this only implies their knowledge of the bloodthirsty habits of the leech, and does not refer to its medicinal use. Targ. on Ps 12 paraphrases not any as the 'leeches which suck blood.' See on this point Aboda Zara 13b. In later days, however, the Jewish physicians conformed to the

323

universal practice.

Biblical references to specific diseases are of two kinds, either so very general that they are indefinite, or concrete in connexion with individual cases. The former class for the most part consists cases. The former class for the most part consists of names alone which are as vague as the folknames of disease usually are. Several of these disease-names are grouped together in Dt 28<sup>22</sup> as forming a class, which, on account of being sudden, severe, epidemic, and often fatal, appear as if judgments directly from God. Most of these are febrile diseases, and although it is not possible precisely to identify the disease expressed by each name, yet, from the experience which residents in the East have acquired of the most prevalent forms of disease, it is most probable that the diseases referred to are malarial fevers of different kinds with, perhaps, tropical typhoid, and Mediterranean fever.

The first name on the list is name shakepheth, from a root signifying 'leanness or wasting,' hence it is rendered 'consumption' both in RV and AV (LXX  $d\pi o \rho l a$ ). This may be phthisis, but, from the connexion in which it occurs, is more likely a febrile disease of long duration and attended with wasting, something of the type of Mediterranean or Malta fever, which may last for months, and or Malta fever, which may last for months, and whose most prominent characteristics are the weakness, anaemia, and wasting with which it is accompanied. The same word occurs in Lv 2616. In both RV and AV the word 'consumption' is used in Is 1022 as the tr. of proposition' is used in Is 1022 as the tr. of proposition' meaning a wasting or destruction in general. meaning a wasting or destruction in general. The RV, however, distinguishes in Is 10<sup>23</sup> and 28<sup>22</sup> between this and kālāh, translating the latter as 'consummation,' whereas the two are confounded in the AV. In neither case, however, does it seem to be a specific disease. Phthiasis is not a characteristic disease. teristic disease either in Syria or in Egypt, although it does occasionally occur in the former country. See Tobler, Med. Topographie von Jerus. 42, and Wittman, p. 92.

The three names that follow in Dt are none kaddahath, 'fever' (RV and AV; LXX πυρετός); ngp dalleketh, 'inflammation' (LXX ριγος, 'ague'); and στηπ harhar (AV 'extreme burning'; RV 'fiery heat'; LXX ερεθισμός, 'irritation'). That these three describe different kinds of fever is plain, as all three words imply burning or heat. The kaddahath is called in AV of Lv 2616 'burning ague,' and is said to 'consume the eyes and make the soul to pine away' (LXX calls this disease tkrepos, 'jaundice'). It may be the malarial fever which occurs in the Jordan Valley and the Lebanon valleys, in Jerusalem and in the Shephēlah, as well as around the Sea of Galilee. This disease is occasionally accompanied by jaundice. myeros was the disease of the nobleman's son at Capernaum (Jn 428) and of Simon's mother-in-law (Lk 488 a great fever') at the same place (see Hippocr. *Epidem*. iii.). The word in Mt 814 and Mk 130 is πυρέσσουσα.

Dalleketh was considered by some Jewish writers as a burning fever, but by the LXX as an intermittent fever. It may possibly have been some form of ague, which often occurs in the same localities as the other forms of malarial fever, perhaps indeed typhoid, which is now, and probably was in former times, one of the commonest fevers in Palestine. Typhus was probably rare, and is so still except in crowded places. Burckhardt mentions its occurrence under the name of putrid fever at Djiddah (Arabia, i. 495), but says that most of the fevers elsewhere are intermitting in type, ii. 290. For typhus in Palestine see Rafalowitsch in Ausland, 1847, p. 1084.

324

Harhûr must be something characterized by irritation and heat, such as erysipelas, only that this is not at all common as an epidemic, indeed is not very common in Palestine. It might be one of the exanthemata. The Hebrew name refers to its heat, the Greek to the local irritation caused by it. Of all these fevers the Rabbinio physicians recognized four stages: incubation, beginning, augmentation, and decline or convalescence. For erysipelas in Egypt see Pruner, p. 118; see also

Brayer, Neuf années à Constantinople, p. 46.

Following these in the Dt passage MT has and hereb, 'sword'; but probably we should read and (as in margin of AV, RV) = 'drought,' either a disease attended with dryness, or else simply drought of the earth. The latter is more probable, as it is followed by the words shiddaphon and yeralon, tr. here as in Am 4º and Hag 2' by 'blasting and mildew,' penal destruction of the fruits of the earth. For and as a disease see Zec 11". It is tr. 'a sword' both in AV and RV; but from the effects given in the passage, wasting of the arm and shrivelling of the eye, it is plainly such a condition as the wasting paralysis described below under diseases of the nervous system (but see Nowack, Comm. ad loc.).

The word n ( $k\bar{a}l\bar{a}h$ , 'to come to an end,' 'to vanish away') is used in Ps 71° of strength failing in old age, and in Job 19<sup>37</sup> 33°1 of flesh becoming emaciated through illness (see *Comm. ad loc.*).

Pestilence or plague is also used as descriptive of a violent disease, extremely fatal, and sent as a punishment on large masses of people. Pestilence

is the tr. of אָדְּין deber. 'Plague,' as far as it refers to these epidemics, is the rendering of several words: אָדְּיִי אָדְיִי אָדְיִי אַדְיִי אַדְיי אָדְיי אָדְיי אַדְיי אַדְיי אָדְיי אַדְיי אָדְיי אַדְיי אַדְיי אַדְיי אַדְיי אַדְיי אַדְיי אַדְיי אַדְיי אַדְי אַדְיי אַבְיי אַדְיי אַבְיי אָדְיי אַבְיי אָדְיי אַבְיי אַבְיי אָדְיי אַבְיי אָדְי אָדְיי אַבְיי אַבְיי אָדְיי אָבְיי אָבְיי אָדְיי אַבְיי אָבְיי אָביי אָבְיי אָבְיי אָבְיי אָבְיי אָבְיי אָבְיי אָבְיי אָבְיי

(see Rocher, Chinese Imp. Cust. Guz. Med. Rep. 15).

There was a second outbreak after the rebellion of Korah (Nu 1648), stayed by the intercession of Aaron; and a third to punish the discontent consequent on the evil report of the spies (Nu 1437). Here it is called maggēphāh. The fourth epidemic followed the iniquity of Baal-peor, and probably the infection was communicated by the Moabites (Nu 253-3-18). The judgment which followed David's sin of numbering the people was of the same nature (2 S 2413, 1 Ch 2112; Jos. Ant. VII. xiii. 3). Plague was threatened on account of the sin of Jehoram (2 Ch 2114). It is called 'noisome' in Ps 913 (777 NW), and characterized as walking in darkness (v. 6), as its attacks often begin at night. It was often threatened by the prophets, especially Jeremiah, Ezzekiel, Amos, and Habakkuk, and appears to have broken out in Jerusalem during the siege (Jer 219), and also among the fugitives from Jerusalem to Egypt (Jer 4221). The destruction of the army of Sennacherib was most probably effected by a sudden outburst of this disease (2 K 1935), and it is noteworthy that presumably about the same time, or at least shortly after it, Hezekiah was seized with an illness, supposed to be mortal, in the course of which a 'boil' developed which may well have been the bubo of the plague (18 381). The destroying angel is mentioned as inflicting the plague in 2 S 2417, 1 Ch 2115-16, and 2 K 1936, 2 Ch 3221 (cf. Jos. Ant. X. i. 5).

The bubonic plague has been from time immemorial the periodic scourge of Bible lands. It is mentioned in the oldest medical literature (Hippoc. Aph. iv. 52, Epid. iii. 55). Ruffus mentions a visitation of plague in Syria about B.C. 300; and the dreadful epidemic in the reign of Justinian, about A.D. 544, is graphically recorded by the historians as leaving whole districts depopulated. Its outbreaks are sudden, it spreads rapidly, and simultaneously affects large bodies of people. At its onset it is remarkably fatal: in the last visitation in this country (1664-1669) 4000 died in London within the first week, and during the period of the epidemic 70,000 died in that city, about 1 in 5 of the population. It has a short incubation period; 'in highly malignant epidemics the disease may show itself within three or four hours of exposure to infection' (Manson, Trop. Diseases, 156; see also cases cited by Pruner, p. 396). The bubo or glandular swelling in the groin or axilla often develops within a few hours. Death generally ensues (in more than 60 per cent. of those attacked) within the first three days (Colvill). In the type called pestis siderans, death often occurs within twelve to twenty-four hours. In one village, out of 534 inhabitants 311 died within three days (see Hirsch, op. cit. i. 495, and Allbutt's Syst. of Med. i. 917).

There are in the Levitical code no sanitary precautions given to prevent its spreading. This is probably due to the belief that it was a divine judgment supernaturally inflicted, and to be stayed only by prayer and repentance. Had the Israelites kept themselves, as they were bidden, from intercourse with their neighbours, it is probable that they would have remained tolerably free from it, as it is not endemic anywhere in Palestine, and is aslways propagated along trade routes. In this respect it was really a punishment for breaches of their law. In Taanith 3. 4, the inhabitants of a district visited by a plague are directed to fast, and to blow trumpets, while their neighbours are to fast without blowing trumpets. Baba Kamma recommends staying at home and fleeing the society of others in time of plague (60. 2).

Emerods.—In the account of the Philistine plague, after the capture of the ark (1 S 56-12) it is said that the people of Ashdod and the other cities were smitten with emerods (AV). The word is בירים 'ophālim, for which Kerl substitutes upon thorim (the latter is used in the text in  $1 \times 6^{11.17}$ ). These words mean 'swellings or rounded eminences.' Aquila renders φαγεδαίνης έλκος; LXX B has in 1 S 5° εξεζεσεν αὐτοις είς τας ναῦς [A έδρας; cf. BA in v.º και ἐπάταξεν . . . εἰς τὰς ἔδρας αὐτῶν, and Vulg. in secretiori parte natium, v.º]. From comparison with Ps 78<sup>66</sup>, where God is said to have smitten His enemies on the hinder part (RV 'backwards'), it was supposed that the tumours were on the buttocks, and they were therefore identified with hæmorrhoids. There is, however, nothing in the narrative to bear out this exegesis, and RV translates 'tumours.' The disease was epidemic, infectious often fotel was attended with translations. fectious, often fatal; was attended with tumours somewhere about the lower part of the abdomen, and these were so definite that they could be represented by models. It is certain, therefore, that it was no kind of hæmorrhoid, and the probability is great that this also was the plague whose buboes were the tumours. This view is advocated by Hitzig (Urgesch. d. Philist. 2011) and Wellhausen (Samuel, 64), and it satisfies all the conditions, this being of all the diseases of the East the most likely to have set in with the fatal suddenness described in the text. The same word occurs in Dt 2827, and from the analogy of the Syriac word used in the passage, فحدوة, which is akin to مدعل, meaning tenesmus, Driver suggests that the reference may be to dysenteric tumours (Comm. on Deut. 1895, xx and 310); but there are very seldom any tumours in dysentery, while tenesmus and evacuations of blood are common in the plague. The images of the emerods are called in Vulg. quinque anos aureos.

Disorders involving the digestive organs mentioned in the Bible are either due to malaria or are the results of intemperance. The case of the father of Publius was one of acute dysentery. The disease is called in AV Ac 288 bloody flux; in Gr. πυρετὸς καὶ δυσεντερία. Sir W. Aitken gives Malta as one of the six districts in which this disease is most prevalent and most fatal (ii. 841). The presence of hæmorrhage shows that the disease in this instance was of the ulcerative or gangrenous type, either of which is a most dangerous form. The either of which is a most dangerous form. either of which is a most dangerous form. The germs of this disease are water-borne, so it is common in swampy, moist localities, as by riversides. In Egypt its mortality is said by Griesinger to be about 36 per cent.

The description of the disease of which Jehoram died (2 Ch 21°), which began at a period of a general enidemic leated two years and was incurable as

epidemic, lasted two years, and was incurable, as in its course the bowels were shed or fell out, tallies with the condition met with in some forms of chronic dysentery with sloughing of the intestine,

one of the most hopeless and intractable forms of disease which the physician has to treat' (Aitken, ii. 859). Dutrouleau records an example of this kind in which about 13 inches of the mucous and submucous coats of the colon were evacuated. In certain forms, also, there is a diphtheritic exudation on the mucous membrane, which may be detached in larger or smaller masses. In Papyrus Ebers xlii there is an account of a disease of this kind, with swelling of the abdomen, and pain, pale face, aching head, the abdomen hot to the touch, and with a discharge of a black or white material. This was called the shn disease.

325

Digestive and other disorders from intemperance are graphically enumerated in Pr 2329; interjecstrange visions, bitings as sharp as those of the serpent. In Is 1914 the drunkard is represented as staggering or falling in his vomit; in Is 28<sup>8</sup> they defile all that they touch (see Jer 25<sup>27</sup>), being ultimately drugged to sleep (Jer 51<sup>39, 57</sup>). Disease is also associated with riotous eaters of flesh (Pr 23<sup>20</sup>).

Disorders of the Liver. The Heb. physicians regarded many diseases as due to an alteration in the bile, and in this respect they agreed with the dogmatic school of Humoralists, such as Plato and Praxagoras. This is expressed in Baba Kamma Praxagoras. This is expressed in Baba Kamma 92, Baba mezia 107, Chaqigah 26. There is an allusion to this belief in Job 16<sup>18</sup>, where the patriarch complains that the disease, God's arrow, had compassed him about, and poured out his gall upon the ground. The gall in La 3<sup>5</sup> and Dt 29<sup>18</sup> is, however, not the bile, but a poisonous plant. Celsius regards rōsh here as perhaps a poppy. See, further, art. GALL. In La 2<sup>11</sup> the same expression is used of the 2-3 or liver the pouring out of which is used of the פּבֶר or liver, the pouring out of which is regarded as a fatal condition. Hence the dissolute fool is punished by a dart striking through his liver, Pr 7<sup>23</sup>. Of the true functions of the liver the Jewish physicians were as ignorant as were the Egyptians. In Papyrus Ebers xxxvi, c, ciii, it is said that the vessels brought air as well as blood to the organ.

The πυκναι ἀσθένειαι of Timothy (1 Ti 523) were probably digestive troubles, flatulent atonic dyspepsia, whose most urgent symptoms are temporarily relieved by alcohol. This disease seemed arily relieved by alcohol. This disease seemed to have produced in him a disposition to slackness, concerning which St. Paul repeatedly warns him (1 Ti 4<sup>13-16</sup>). In such cases, however, while alcohol allays the morbid functional sensibility, it does not really remove the cause of the disease.

Mental emotions of a lowering nature, such as grief or anxiety, produce important physical effects on the alimentary canal, checking certain secretions; hence in Ps 69<sup>3</sup> the dryness of the throat in such cases is mentioned. In Is 16<sup>11</sup> and Jer 4<sup>19</sup> 31<sup>20</sup> there are references to the suddenly arising flatulent distension of the colon, which is often to be noticed under the same conditions. These borborygmi are referred to the heart in Jer

The effects of the water in the jealousy ordeal (Nu 5<sup>17</sup>) may here be referred to. The 'bitter water which causeth the curse' consisted of holy water, consecrated by the priest, into which dust from the floor of the sanctuary was put, and with which the curses pronounced against unfaithfulness written out by the priest were washed off the parchment on which they had been written. This is a kind of ordeal of which examples are not un-common in primitive religions. The meaning of common in primitive religions. The meaning of the dust is given by R. Menahem in Siphre x., that as the dust is regarded as defiling the holy place, so the suspicion of unfaithfulness defiles the person suspected. In the same place the priest is recommended to write the curses out on tablets, not on paper, but on prepared skins, and not with gum or copperas, but with black ink. The ordeal was a direct appeal to God, and the water was supposed, in cases of guilt, to cause wasting of the buttock (dislocation of the right thigh, Jos. Ant.

ovarian dropsy; see Dillmann, in loc.

The effects of eating that on which prophetic writings were inscribed as a preparation for discharging the prophetic office are referred to in Ezk 3<sup>1</sup>, Rev 10<sup>8</sup>. This is also an action of which examples are known in several folk-religions (see examples are known in several folk-religions (see Lane, Modern Egyptians, i. 347), and even in British folk-lore. Our Lord promised His disciples protection if they were subjected to the ordeal of poisonous drinks (Mk 16<sup>18</sup>).

The heart, mentioned more frequently (716 times in OT and 105 in NT) in Scripture than any

other of the bodily organs, on account of its sup-posed connexion with the intellectual as well as the moral and spiritual life, was, as far as its physiological action is concerned, so little known that there are few references to physical disease affecting it (see HEART, vol. ii. 317). The pericardium or caul over the heart is mentioned in Hos 138. 'A sound heart is the life of the flesh' (Pr 1480), which is parallel to Juvenal's mens sana in corpore sano (x. 356), may have a physical as well as a psychological reference. The curious proverb, 'A wise man's heart is at his right hand, but a fool's heart at his left' (Ec 10<sup>2</sup>), has its parallel in the ancient Egyptian aphorism, 'The breath of life passes to the right side, the breath of death to the left' (Pap. Ebers c).

Syncope, or failure of the heart's action, causing

fainting, is described in several instances. Jacob's heart fainted at the news of Joseph's exaltation in Egypt (Gn 4526). Eli had a sudden attack of syncope, leading to a fatal fall, from the shock of the news that the Philistines had taken the ark (1 S 413ff.). Saul fainted with hunger and fear on the reception of Samuel's message through the witch of Endor (1 S 28<sup>20</sup>). Daniel also fainted and was sick for several days on receiving Gabriel's message (8<sup>27</sup>). See FAINT, vol. i. 826. Heart palpitation is given in *Pap. Ebers* xlv as a symptom of the 'i' disease or chlorosis.

'A broken heart' is mentioned 11 times in Scripture, but always in its metaphorical sense of repentance and sorrow for sin. The condition literally expressed by the term has acquired a special interest on account of Dr. Stroud's hypothesis that rupture of the heart was the condition to which our Lord's death was due (see Stroud, Physical Causes of the Death of Christ, 1847, also Bennett's Diseases of the Bible, p. 117).

Although it is only in Daniel that the functions

of the nervous centres are recognized (see 1<sup>10</sup> 2<sup>28</sup> 4<sup>9-7.10</sup> 7<sup>1-18</sup>), yet diseases affecting this system are often mentioned:—

Paralysis or Palsy.—These words are used to express loss of the power of motion, a common symptom in diseases of the central nervous system.

This condition is usually serious, often intractable, and is generally fairly rapid in its onset, but slow in disappearing. In the NT there are several accounts of the miraculous cures of paralysis by our Lord, as in Mt 424; here as in Ac 87 these are at Capernaum, borne of four, whose friends let him down through the tiling into the presence of Christ, Matthew (9°) uses the word παραλυτικός, as also does Mark (2°). Luke (5¹8) uses the term παραλελυμένος. The man seems to have suffered from paraplegia, i.e. complete loss of power in his lower limbs. The prognosis in this disease, due as it generally is to an organic change in the spinal cord from myelitis, is generally unfavourable, and even in the best cases progress is slow.

Our Lord calls this man 'son,' which may be intended as a mark of age; but both this and the conjecture that the paralysis was a judgment on him for immorality, on account of our Lord's having prefaced his cure by declaring the forgiveness of his sins, are deductions not warranted by the very slender data from which they are drawn.

The example of Ameas, healed by St. Peter (Ac 933), that of a man eight years bedridden, was

probably one of the same kind.

The centurion's servant (Mt 8<sup>6</sup>) was 'grievously remented' (δεινώς βασανιζόμενος). This is descriptormented' (δεινῶς βασανιζόμενος). This is descriptive of the pain which he suffered, as the phrase is used in classical Greek of torture to extort confession (see the case of Gylippus in Thucyd. vii. 86, and the Argive in viii. 29). It was probably an acute case, possibly of spinal meningitis. Bennett conjectures 'progressive paralysis with muscular spasms involving the respiratory movements' (p. 92), but the former seems to fit the description better, as in it the 'torment' is the more grievous.

The man with the withered hand (Mt 129-13, Mk 31-5, Lk 66-10) was probably a sufferer in his early years from anterior poliomyelitis, causing infantile paralysis. In such a case the bones as well as the nuscles atrophy, and the limb becomes reduced to a mere stick. To the same category probably be-longed the lame man healed by l'eter and John at the Beautiful Gate of the Temple (Ac 32), although this may have been congenital want of development of the lower limbs; but from the narrative it would appear that the limbs were well formed, although for forty years deprived of strength.

Cases like these were probably included in the general term 'withered'  $(\xi\eta\rho\sigma l)$ , applied to a group of the expectant waiters at the l'ool of Bethesda (Jn 53). The word is used of shrivelled parts (as in (Electra, 239). The man who is called ὁ ἀσθενῶν (Jn 57) was probably thus affected. The thirty-eight years' duration of the case is against its having been an example of locomotor ataxia. Moreover, the diseased condition to which locomotor ataxia is generally due was probably unknown at that time. He was able to move himself, although slowly, for he says, 'while I am coming,' meaning by his unaided exertion (ib.). There appears to be an OT reference to this condition under the name horeb, elsewhere translated 'drought,' and in this passage (Zec 1117) tr. 'the sword' (i.e. hereb); but the context shows that it is really the diseased condition of hemiplegic shrivelling in this wasting condition of hemiplegic shrivering in this wasting disease that is referred to—'his arm shall be clean dried up, and his right eye shall be utterly darkened.' See above, p. 324.

The sudden paralysis of Jeroboam's hand (1 K 134) was a case of the condition technically known as

brachial monoplegia, probably due to a sudden hemorrhage affecting a certain area of the posterior central convolution of the brain or of the part of the corona radiata or genu of the internal capsule connected with that area. Decaise has collected and analyzed a large number of cases of this kind. When the sudden supervention of the paralysis depends on a clot plugging the vessels which nourish this area, it may prove only a temporary paralysis, as in the case of Jeroboam

(v.).

The word 'palsy' is a corruption of the French about the year 1500, for it is used in the English tr. of Mandeville's Travels.

The case of Nabal (1 S 2538) seems to have been a typical example of an apoplectic seizure, a condition closely allied to paralysis, in that it is usually produced by hamorrhage or effusion of serum on or into the brain. When in the disturbed condition of brain which followed his drunken bout the churl was excited to passion by the story of his wife's generosity, some vessel probably gave way in his brain, and he became comatose (v. " as a stone'), lingering in that state for ten days until he died. The death of Alcimus (1 Mac 95) was a typical case of apoplexy (see Jos. Ant. XII. x. 6).

The arteries of the brain in a man addicted to

The arteries of the brain in a man addicted to drink, and in other conditions of weakness or senile decay, are liable to atheromatous disease, which diminishes their resisting power; and if in this condition the heart's action be increased in force, as by a fit of passion, rupture of one of these vessels is not unlikely to occur. It has even been conjectured that the sudden deaths of Uzzah (2 S 67) and of Ananias and Sapphira (Ac 55-10) may have been apoplectic in their nature also. The great surgeon John Hunter died suddenly of an apoplectic attack, the result of severe mental emotion.

There are several terms used to describe varying forms of abnormal psychical conditions, of insanity and allied mental diseases. The state of trance or deep profound sleep is described in connexion with the tradition of the making of Eve (Gn 2<sup>21</sup>). A similar sleep fell on Abraham (15<sup>12</sup>), and Saul in the cave (1 S 2612). In this last case it was the profound sleep of exhaustion; the phrase 'deep sleep from the Lord' is merely a Hebrew superlative. Sisera's deep sleep of fatigue was of the same nature  $(Jg\ 4^{21})$ , and other examples are those of Jonah (1<sup>8</sup>), and our Lord in the boat during the storm (Mt 8<sup>24</sup>, Mk 4<sup>28</sup>). The ecstatic condition of the prophet described by Balaam (Nu 24<sup>3-4</sup>) was a condition of mental exaltation believed to be due to possession by the Divine Spirit, a state in which individual will becomes paralyzed, and the person becomes subject to more or less violent emotion by suggestion. Hence prophets were called [not necessarily disrespectfully, see vol. ii. p. 564b note \*] 'mad fellows' (2 K 911), and Isaiah speaks of the false prophets as those that peep and mutter (819). See also the use of the word ymp meshugga or 'raving,' for the utterances of prophets (Jer 2928, Hos 97). Saul is a singular study in mental pathology; naturally a shy, self-conscious man (1 S 9<sup>5-8</sup> 10<sup>22</sup>), easily exalted into the condition of ecstasy (10<sup>10</sup>), and by his exaltation puffed up to tyrannical self-satisfaction (15<sup>12, 13</sup>), then filled with an irresistible impulse towards homicide (1811), turning even against his own son (20<sup>30-38)</sup>; but liable, under conditions suggesting it, to return to the ecstatic state (19<sup>24</sup>), then falling into despondency (2820), and dying by suicide (31b). To such a one of weak judgment, violent passions, and great susceptibility, the influence of music is a powerful agency to calm and soothe. The cause of his medians to the control of the medians of the such as the control of the medians of the medians of the medians. of his madness is ascribed to an evil spirit from God (18<sup>10</sup>), and the raving consequent on it is called 'prophesying' in AV and RV (אַבְּאָרָה, imperf. Hithpael of nābā'). His case is a typical one of recurrent paroxysmal mania rather than of melancholia. Perhaps it was the object-lesson of Saul's insanity which prompted David to feign madness before Achish (1 S 21<sup>13</sup>), the lunatic being a sacred person in the eyes of the Oriental (Stanley's Lect. ii. 52). The symptoms he imitated were change 11. 32). The symptoms he imitated were change of behaviour, raging to and fro, as they tried to hold him with their hands, like a man in acute mania. He scratched or made marks on the doors (τη: but the LXX and Vulgate have ἐτνμπάνιζεν and impingebat, as if the Heb. were τη: 'and he beat on'), and he defiled his beard by letting his saliva fall upon it. This in itself showed loss of all self-acute the transit all self-respect, as to spit on the beard of an enemy would be a deadly insult (see Dt  $25^{8}$ , Job  $30^{10}$ ). The malingering was so successful that the

king regarded him as genuinely affected with pupi or 'frenzy.' Madness was one of the plagues threatened for disobedience to the law (Dt 2828).

327

Another striking instance of insanity is presented by the (? Haggadic) story of Nebuchadnezzar (Dn 4). Puffed up by an overweening self-conceit, he was smitten with mania, cherishing the delusion that he was a beast, and so was driven from his throne until his recovery at the end of seven years. Instances of a monomania in which the chief delusion is that one is an animal have been often recorded, and most alienist physicians of experience have met with such cases. Virgil (Ecl. vi. 48) describes the daughters of Proctus as believing themselves to be cattle, and while each of them collo timuisset aratrum, et sape in levi quassisset cornua fronte, they filled the fields with counterfeit lowings. From monomaniacs of this kind have probably arisen the legends of lycanthropy or were-wolves (see Hertz, Der Werwolf, 1862). There is no need to invoke totemism to account for them, nor to believe with some of the Rabbins that Nebuchadnezzar was miraculously transformed into an ox. According to Ader (p. 32) the Gadarene demoniacs were of this kind.

Epilepsy is mentioned in Mt 17<sup>15</sup> (RV) as the cause of the convulsive seizures of the boy described there and in Lk 9<sup>28</sup>. The account of the fit, beginning with a cry, followed by his falling down and becoming convulsed, foaming at the mouth, grinding his teeth, bruising himself sorely, sometimes falling into the fire and sometimes into the water, is exactly in accord with a typical epileptic fit. He had been subject to these from childhood; about one-fourth of epileptics have their first fit within the first decade of life, 12 per cent. within the first three years. The 'pining away' mentioned in Mk 9<sup>18</sup> is characteristic of one form of the disease, in which the fits are frequently recurring. The record of the last attack, in which he 'wallowed foaming,' is very graphic. The verb used to describe the attack in Mt is σεληνιάζομαι, literally 'to be moon-struck,' but thereby is meant epilepsy, not lunacy as in AV. The connexion between epilepsy and the phases of the moon was believed in down to a comparatively late period. Vicary, the surgeon to Henry VIII., writing in

1577, says of the brain that 'it moueth and followeth the mouing of the Moone: for in the waxing of the Moone, the Brayne followeth upwardes: and in the wane of the Moone the brayne discendeth downwardes, and vanishes in substance of vertue: for the Brayne shrinketh together in itselfe and is not so fully obedient to the spirit of feeling. And this is proved in menne that be lunatike or madde, and also in men that be epulentike [=epileptic] or having the falling sickness, that be moste greeved in the beginning of the new moone, etc. The moon-struck are distinguished in Mt 424 from the paralytic and from those possessed by devils. Moonstroke is also mentioned in Ps 1216. Among the later Jews epilepsy was treated by means of amulets called קביעה עקרין, and by the application of certain insects named שרץ. See Shabbath 61,

and Tosefta Shabbath, in loc.
Sunstroke in Ps 1216, coupled with moonstroke, is also mentioned in Is 4910. It was the cause of the death of the Shunammite's son, stricken in the harvest field (2 K 4<sup>19</sup>), and of Manasseh, Judith's husband, as he stood overseeing the binders of sheaves in the field (Jth 8<sup>3</sup>). In the former case the child was suddenly affected with sharp pain in his head, and, on being carried to his mother, lay on her knees till noon, and then died. There are several diseases which are confounded under the name of heat-stroke or sun-stroke.under the name of heat-stroke or sun-stroke,—sun-syncope, sun-traumatism, sometimes meningitis; but this seems to have been a genuine example of siriasis. This disease has been described by Sambon (Brit. Med. Journ. 1898, March 19, p. 744) as a rapidly fatal, febrile condition, beginning with high temperature, violent pains in the head, and passing rapidly into coma, death taking place 'within a few hours or even minutes of the onset of insensibility' (Morson 210). The of the onset of insensibility' (Manson, 210). The Shunanumite's child was laid, after his death, on the prophet's bed until his mother had brought Elisha back from Mount Carmel. By the time Gehazi arrived the body had become cold; and the subsequent restoration to life was plainly

occurs. The case of Jonah, on the other hand, was one of heat syncope; he fainted from the heat, and suffered the severe headache which always supervenes in such cases after the recovery of consciousvenes in such cases after the recovery of consciousness. In these cases, unlike true siriasis, the temperature of the body falls, and the surface feels cold and appears pale; 'usually after a short time the patient gradually recovers, very likely with a splitting headache and a feeling of intense prostration' (Manson, 202). It was in this condition that the prophet said 'it is better for me to disa then to live' (Lan 48)

miraculous, as the mere stretching of the prophet

on the body could not have brought back the life. Syria is one of the countries in which this disease

die than to live (Jon 4°).

Dropsy.—In Lk 14° the cure of a case of dropsy is recorded. The patient had been able to enter into the house of one of the rulers of the Pharisees into the house of one of the random at Jerusalem, where Jesus was being entertained. The man is called δδρωπικός, the word used by the Greek physicians for dropsy in general. The Greek physicians for dropsy in general. The disease may have been a universal anasarca, due to disease of the kidneys or heart, or else abdominal dropsy, usually dependent on disease of the liver. In all cases this is a dangerous symptom, and it usually indicates a comparatively large amount of organic disease. In Shabbath 33. 1, dropsy is said to be the punishment of transgression. common in Jerusalem; see Macgowan in Jewish Intelligence, 1842, p. 319.

Pulmonary disease, as such, is not referred to in Scripture. It is said of the widow's son at Zarephath that his sickness was so sore there was no breath left in him (I'K 17); but this simply

means that he died. The modern Jewish authorities, in their directions for the slaughter of animals for purposes of food, regard the state of the lungs as of the utmost importance, and minute instructions are given for the recognition of pathological conditions which rendered the carcase unfit for food.

The nature of the disease from which Asa suffered in his *feet* is not mentioned (1 K 15<sup>23</sup>, 2 Ch 16<sup>11</sup>). The former writer says that it affected him in his old age, the latter in the 39th year of his reign; and adds that he sought not to the Lord, but to the physicians. This may have been suggested by the king's name (NON), which probably means 'healer.' Josephus apparently knows nothing of the disease, and describes Asa as dying happily after he had attained a long and blessed old age (Ant. VIII. xii. 6). The Rabbinical belief was that the malady was gout (Sota 10a, Sanhedrin). Rashi has conjectured from the wording of v.12 that the disease mounted to his head. Others have supposed that this infliction was a punishment because he had not exempted the children of the wise from the labour of carrying away the stones of Ramah (1 K 15<sup>22</sup>). There is no clue in the passage to the nature of the disease. Hippocrates says truly that gout, although it may be long and laborious, yet is seldom mortal (peri Pathon, ed. Kuhn, 407). As Asa's disease began in old age, it may have been a case of senile gangrene. Gout is very rare among natives of Palestine. Kamphausen suggests that it may have been articular leprosy (see Riehm's HWB, art. 'Krankheiten').

A few references to surgical disease and accident occur in the Bible. Among primitive peoples, as a rule, surgery preceded medicine, as the conditions of their life expose the body to violence. The following are cases of surgical disease:—

The woman bound by the spirit of infirmity, and unable to lift herself (Lk 13<sup>11-17</sup>), was yet able to attend the synagogue. This was probably a case of senile kyphosis, due to chronic osteitis of the vertebræ, a condition not infrequent among aged women whose lives have been spent in agricultural labour: in these the vertebræ become gradually distorted and modified to the new posispine be straightened without violence. Why this deformity was regarded as of specially Satanic origin is not apparent, but some Rabbinic authorities regard every disease which produces distortion as due to demons.

Crook-backedness rendered a man unfit for the priesthood. This condition, called 124 in Lv 2120 (LXX kupros), differs from the last in that it occurs in the young, and is due to caries of the vertebræ. It must have been fairly common in Egypt, as the present writer has found a considerable number of spinal curvatures of this kind in collections of Egyptian bones. The Jerus. Targ. renders gibben, 'very dark coloured,' but this meaning is improbable.

In a metonymic or metaphorical sense the bones in many poetical passages stand for the whole human frame as affected by mental emotion. Numan frame as affected by mental emotion. Rottenness or caries  $(\exists \vec{r}, \tau \vec{a}k\vec{a}b)$  of the bones is compared with envy (Pr  $14^{50}$ ), with a wife that causes shame (Pr  $12^{4}$ ), and with the emotion of terror (Hab  $3^{16}$ ): LXX, however, puts  $\sigma \dot{\eta} \dot{\imath}$ ,  $\sigma \kappa \dot{\omega} \lambda \eta \dot{\xi}$ , and  $\tau \rho \dot{\rho} \mu \sigma$  respectively for caries in these three places, but there is no suggestion of worms in the Hebrew. The bones are said to shake with fear (Job 4<sup>14</sup>) or with grief (Jer 23<sup>9</sup>). The bones are burnt with heat in Job's disease (30°0), with grief (Ps 102°, La 11°), with the fire of suppressed emotion (Jer 20°). They are said to wax old (Ps 32°), to be pierced (Job 30¹¹), vexed (Ps 6²), out of joint (Ps 22¹⁴), consumed (Ps 31¹°), or broken (La 3⁴). A bandage (אָאָהוֹ) for broken bones is mentioned in Ezk 3021; cf. use in same verse of verb הבש cf. use in same verse of verb פֿבָּשׁ 'bind up.

Fracture of the skull without immediate insensibility, showing the absence of compression of the brain, was produced by the fall of the millstone on the head of Abimelech (Jg 958). In the case of Eutychus the fall produced fatal comthe case of Eutychus the fall produced fatal compression and most probably a broken neck (Ac 20°). Goliath is said to have fallen on his face when struck by the slingstone, as if his fall was due to flexor spasm (1 S 17°°). Ahaziah died ultimately of the injuries sustained from his fall through the lattice (2 K 1°). It is difficult to understand the parenthetic account of Judas' suicide in Ac 116; see art. Judas Iscariot.

Mephibosheth's lameness in both his feet (2 S 44 918), due to a fall from his nurse's arms, seems to have been some kind of injury which produced bone disease, for when he hastened to meet David on his return he did not delay to 'dress' his feet on his rectain he did not delay to dress his feet (19<sup>24</sup>). LXX tr. nψy by εθεράπευσεν. Both these words, however, may simply mean to wash, parallel to the trimming of his beard in the context. In spite of his friendship for Mephibosheth, it was proverbial that the lame were among the hated of David's soul (2 S 5<sup>6</sup>). This curious passage appears to be corrupt (see Driver, *Heb. Text* of Sam. 199; Smith, Comm. on Sam. [1899], 288). Lameness incapacitated a descendant of Aaron from the priesthood (Lv 2118), but did not prevent the access of such into the temple, for many lame persons were healed by Christ there (Mt 21<sup>14</sup>; for other lame men healed see Mt 11<sup>5</sup> 15<sup>31</sup>, Lk 7<sup>22</sup>; they are called 'halt' in Mt 18<sup>8</sup>, Mk 9<sup>45</sup>, Lk 14<sup>21</sup>, Jn 53. See HALT in vol. ii. p. 288). Jacob's lameness has been referred to in connexion with the sinew that shrank (see FOOD, vol. ii. p. 39). The Jewish butchers now extract the great sciatic nerve as the gld. See Meir's Sepher Zabahi, 63.

Of congenital malformations the giant with six fingers and six toes on each side is the most remarkable (2 S 2120, 1 Ch 206). Persons with such markable (2 S 21<sup>20</sup>, 1 Ch 20<sup>6</sup>). Persons with such superfluous parts were disqualified for the priesthood, Lv 21<sup>18</sup>, where grip may mean 'having members of unequal length' (LXX renders it ωτότμητος, 'crop-eared'). 10 της in Lv 21<sup>18</sup>, tr. 'flatnosed' (LXX κολοβόριν, 'snub-nosed'), may refer to the deformity in hare-lip (RVm 'slit-nose'). Dwarfishness also disqualified a son of Aaron from the priesthood (Lv 21<sup>20</sup>): this, however, has by some been supposed to refer to emeriation from some been supposed to refer to emaciation from

wasting disease. See art. DWARF.

Skin diseases, using the term in the widest sense, were and still are common in the East. They are frequently referred to in their relation to leprosy and the allied conditions, which are carefully described on account of their causing the uncleanness of the sufferers from it. See LEPROSY. The words referring to these diseases are baldness (treated of in vol. i. p. 234 f.), itch, scab, scurvy, blemishes, wen, blains, boils, botch,

scall, and spot :-

Itch (on heres, LXX  $\kappa\nu\eta\phi\eta$ ), Dt 2827, is probably the parasitic disease of this name now known to be due to a small mite, Sarcoptes scabiei, which burrows in the skin. In some cases, when neglected, it spreads over the whole body, which becomes covered with a rough crust adhering to the surface. It is very easily communicated from person to person, and cannot be healed unless the parasite be destroyed. It disqualified its victims from the priesthood (Lv 21°). The Heb. word is derived from a root which means to scratch, hence the Vulgate uses prurigo. It is not at all

uncommon in Syria at the present day.

Scurry (RV), scab (AV) (Dt 282 and garab) is the ways dypla of LXX, scabies of the Vulgate.

In Lv 2120 it is called 'scurvy' in AV. disease has nothing to do with the true scurvy, but is also an itchy disease in which a thick crust forms on the skin; it is most rebellious to treatment, and technically known as favus. It is commonest on the head, where it is called 'scald head, and is due to a fungus, the Achorion Schon-leinii. This is the garabu of WAI ii. 44. 13. It sometimes spreads over the entire body, and, in neglected, exaggerated cases, covers the entire face as with a mask. Sometimes it causes ulceration of the subjacent skin, and Alibert describes it as, in some cases, affecting even the cranial bones. It also is not uncommon in Syria.

329

Scab in Lv 2120 is the tr. of np: yallepheth, meaning 'an itching,' 'scab' (LXX λειχήν). It is probably another form of the disease just described. The infliction of this scab on the head is described in Is 317 by the verb new sippah (LXX ταπεινώσει);

see Gittin 70a.

The scall or scurf of the head and beard of Lv 1330 is pop nethek, probably tinea tonsurans or mentagra, another parasitic disease of somewhat similar character; prb, the freckled spot of Lv 1389, may be psoriasis, a non-contagious scaly eruption.

See LEPROSY, p. 96.

The botch of Egypt of Dt 28<sup>27, 85</sup> is called proving the same work. The botch of Egypt of Dt 22<sup>27,28</sup> is called prop, an inflamed or ulcerated spot. The same word is used to describe Job's malady (Job 2<sup>7</sup>), the boils of the Egyptian plague (Ex 9<sup>20</sup>), and Hezekiah's boil (2 K 20<sup>7</sup>=Is 38<sup>21</sup>). It is probably a general term for a sore swelling of the skin. Those in Ex 9<sup>10</sup> are distinguished from the others because they were accompanied with πυρυμα or 'blains,' explained by the Talm. as πιπ or γκυμα, pustules containing fluid (LXX ξλκη, φλυκτίδες ἀναξέουσαι). If, as already surmised, this disease was smallpox, this character would distinguish it from the others this character would distinguish it from the others; and if the last example was a plague spot, it would account for its reputedly fatal character. The botch of Dt 2825 especially affected the knees and legs (see Pruner's Krankheiten des Orients, 167). Job's disease, however, was not a fatal one, and instead of a single tumour he was covered with sore spots from head to foot, and these verse attended with an intelevable itching. The were attended with an intolerable itching. The Egyptian word shn means an abscess, and is used in Pap. Ebers xxxviii. It was common in that country, and is therefore called the botch of Egypt (Dt 28th). It is called in Coptic shash, and possibly the 'aba'bū'oth may be connected with a Coptic root meaning to be rounded or to boil up. In Papyrus Ebers cv it is said, 'If thou findest a swelling that is connected with the beginning of uhetu it is as a bean, a sore boil on his skin, not very large, containing pus; say thou, He has hunhunt which suppurates. I shall treat this disease; make thou a remedy that shall remove the swelling and set free the matter.' A poultice is recommended of wax, suet, bean-flour, and certain plants. For the peculiare Ægypti malum see Lucretius, vi. 1113, and Pliny, xxvi. 5.

Job's body was covered with irritating ulcers (ξλκει πονηρφ), whose itching he endeavoured to allay by scraping himself with the rough but soft edge of a piece of unglazed earthenware. The edge of a piece of unglazed earthenware. The disease disfigured his face (27), so that he could not easily be recognized by his friends; his pains not easily be recognized by his friends; his pains led him to groan continually without relief (3<sup>24</sup>), and he felt as though burnt by a fiery poison (6<sup>4</sup>), shattering his nervous system (3<sup>25</sup>); the loathsome sores made his breath fœtid (19<sup>17</sup>), and were infested with maggots (7<sup>8</sup>). He was so helpless that he required aid to rise, and he sat among the ashes (2<sup>9</sup>; LXX ἐπὶ τῆς κοπρίας, 'on a dunghill') to mitigate the itching. See Carey, 178; Magnus, 311. 161; Keil, Archäol. ii. 94. The malady is called (18<sup>18</sup>) ng της 'the firstborn of death,' and it has been supposed to have been elephantiasis (Kimchi), leprosy (Origen), smallpox (Shapter, 169), guinea-worm, which is credited, but falsely, by one writer with being called Job's disease in Bokhara (but see Burnes, Travels into Bokhara, ii. 181, where no mention is made of Job), malignant pustule, or frambæsia (see Pruner, 174), etc. The characters given, however, agree better with those of the Biskra button or Oriental sore, endemic along the southern shore of the Mediterranean and in Mesopotamia. This begins in the form of papular spots, which ulcerate and become covered with crusts, under which are itchy, burning sores, slow in granulation and often multiple: as many as forty have been found on one patient. It is forty have been found on one patient. probably due to a parasite, is communicable by inoculation, and very intractable even under modern treatment. It is sometimes called 'Aleppo sore' or 'Bagdad sore.'

Lazarus in Lk 1620 was probably afflicted, like many of his class, with old varicose ulcers of the Burckhardt says that sores on the legs are

leg. Burckhardt says that sores on the legs are very common at Djiddah (i. 448).

Spot in Job 11<sup>16</sup>, Ca 4<sup>7</sup>, Dt 32<sup>5</sup>, blemish in Lv 21<sup>17</sup>, Dn 1<sup>4</sup>, are apparently general terms for any skin disease. Wen in Lv 22<sup>22</sup>, used as the name of a disease of cattle, means a gall or sup-

purating sore.

330

Among affections of the skin may be considered the bloody sweat of our Lord in the garden (Lk 22<sup>44</sup>). The passage (on the question of whose genuineness see Westcott-Hort) says that His sweat was ωσει θρόμβοι αίματος καταβαίνοντες ἐπὶ τὴν γῆν. Theophylact, Michaelis, Olshausen, and others take this to mean that His sweat dropped, as clots of blood drop from a wound. The word woel is frequently used to express a mere comparison, as in Mt 28<sup>3</sup> λευκόν ώσει χιών. There are no modern trustworthy cases of genuine bloody sweat; and although in some older writings comparable instances are quoted, none of them are properly authenticated. Tissot (Traité des Nerfs, 279) records one such, and others are given in connexion with legends of stigmatization, etc., as in the cases of Catharine of Raconizio (1446), and Stephano Quinzani in Soncino (1467). took place from the stigmatic wounds in the case of Louise Lateau in 1870 (see also Schenck, Obs. Med. iii. 458, for ancient examples, and refs. in art. 'Stigmatization,' Encyc. Brit. xxii. 550). is significant that the word used is θρόμβοι, 'clots,' not υταγών used of blood-drops by Æschylus (Agam. 1122), or σταλαγμός used both of blood (Eurip. Ion. 351, 1003) and sweat (Hippoc. Aph. 1961) 1261). Bourrut and Burot have described a redcoloured sweat in a hystero-epileptic, but the conditions were equivocal.

Poisonous serpents are mentioned in Nu 216, Dt 3239, Job 2014. 16, Is 118 1429 595, Jer 817, Mt 37 1284 2339, Mk 1618, Lk 37 1019, Ac 288-6. The fiery serpents of the plague in the wilderness are not called *flying*: that word is imported into their description from Is 14<sup>29</sup> and 30<sup>6</sup>. There are several poisonous serpents in the Desert of the Exodus, the sand-viper Echis carinata, and the horned viper Cerastes Ægyptiacus and Hasselquistii, which are sometimes found in great numbers in favourable localities, and whose bites are burning and often fatal (see Strabo, xvi. 2. 30). Naia Haje, the asp, has also been found there. One or other of these was most likely the fiery serpent, the brazen model of which miraculously healed the bitten people. Küchenmeister (Sydenham Soc. Tr. i. 391) suggested that these fiery serpents were guinea-worms, Filaria Medinensis, parasitic worms which burrow under the skin and set up local inflammation: these are not uncommon in this region, and he supposes that they are the same as the δρακόντια

μικρά of Plutarch (Symposiakon viii., Question 9), which are said by Agatharchides of Unidus to eat away the flesh of the peoples near the Red Sea (see for other refs. Bennett, Discases of Bible, 134). The story of Moses and the serpents given by Josephus (Ant. II. x. 2) is interesting in this connexion. Scorpion bites are not very common and rarely fatal in Palestine, but are common and often fatal

to children in Egypt; see Pruner, p. 430.

The disease of Herod Agrippa I., recorded in Ac 1221st, was a sudden and fatal seizure of some abdominal complaint, accompanied with intense agony, and in some way connected with worms. Sir J. R. Bennett has surmised that it was acute peritonitis set up by the perforation of the bowel by an intestinal worm. This is a rare but not an impossible condition. The term employed is σκωληκόβρωτος, used here, as also in Theophrastus (de Causis Plantarum, v. 10), to signify 'eaten of worms.' Vulg. has a vermibus crosus. The mistaken idea that it was a case of phthiriasis has no support in the passage, and still less from the narrative in Josephus, which does not mention worms, but says that Herod was seized with a violent abdominal pain which lasted for five days (Eusebius says four) and proved fatal (XIX. viii. 2). The death of Pheretime (Herod. iv. 205) took place not from this disease, but from some exhausting disorder with superficial ulceration; the εὐλαί or maggots which were fatal to her were probably blow-fly larvæ. Antiochus Epiphanes, fatally injured by a fall, had probably compound fractures in which blow-flies laid their eggs and maggots were hatched. In former times cases of this sort were not rare when the injuries were neglected (2 Mac 99). See also Jos. Ant. XVII. vi. 5.

The third Egyp. plague was one of insects which are called kinnām (LXX σκνίφες); and as the root probably means 'to pierce or cut into,' it is likely that they were mosquitoes or sand-fleas, or some pest of that nature, which would be a much more serious plague in the East than one of lice. It was only the priests, Herodotus tells us, that were defiled by these (ii. 37). RVm renders 'sandflies or fleas.' The argument that they must have been lice, because coming from the dust, is not of much force, for sand-fleas live in the same material, and lice are not generated in dust any more than gnats. It is therefore improbable that this plague was phthiriusis.

Among the causes of ceremonial impurity were certain discharges (Lv 15<sup>2-20</sup>), some natural (Dt 2310), others probably the result of evil practices. How far the diseases consequent on vice were known among the ancients is a doubtful point. The passages in Ps 107<sup>17, 18</sup>, Pr 2<sup>18</sup> 5<sup>11-22</sup> 7<sup>28, 26</sup> (see tract *Zebaim*, and Maimonides' commentary thereon) seem to refer to such, but this group of diseases was not known in Europe until A.D. 1495.

Blindness was, and is, one of the commonest afflictions of the natives of Palestine; the bleareyes, often crusted round with dried secretion, and fly-infested, make some of the most sickening sights in a Syrian village crowd. The words 'blindness' or 'blind' occur 87 times in the Bible; 'blindness' or 'blind' occur 87 times in the Bible; 41 times in a metaphorical sense, and 39 in reference to literal want of sight. The OT uses the words 'blind' or 'blindness' 35 times: in 28 the word is τιν (Pi. 'to blind') or 'iννēr (adj.), 19 times literal, 9 figurative; in 3 it is 'iννārôn or 'aννετελ, 'blindness,' always literal; in 2 it is τη τρανετελ, 'blindness,' always literal; in 2 it is τη τρανετελ, 'a dazzling,' Gn 1911, 2 K 618; once it is τη τη το hide' (sc. my eyes, 1 S 123, but the text here is probably corrupt, cf. the LXX). In Is 29° RV has 'be blind,' where AV has 'cry' as tr. of την. In the NT, in which 'blind' or 'blindness' is used 52 times, 36 literally and 16 metaphorically, the word is τνφλός or (verbal) τνφλόω. In four the word is τυφλός or (verbal) τυφλόω.

places where the word is  $\pi\omega\rho\omega\sigma$ s or  $\pi\omega\rho\delta\omega$  RV has replaced 'blindness' or 'blinded' by 'hardening' or 'hardened' (Ro 11<sup>7, 25</sup>, 2 Co 3<sup>14</sup>, Eph 4<sup>18</sup>); cf. confusion in MSS between  $\pi\eta\rho\sigma\nu$  and  $\pi\omega\rho\sigma\nu$  in Job 17.

Apparently but two forms of blindness were recognized: (1) that due to the prevalent ophthalmia. It is a highly infectious disease, and is aggravated by sand, sun-glare, and dirt, so that it almost always leaves the organs damaged, and often renders them useless, causing opacity of the often renders them useless, causing opacity of the cornea or closure of the pupil; (2) that due to age: Eli at the age of 98 was blind, his eyes waxed dim (1 S 3<sup>2</sup>). David's eyes were 'set' at an earlier age (1 K 4<sup>15</sup>). Ahijah was blind from age (1 K 14<sup>3</sup>). Isaac was also blind (Gn 27<sup>1</sup>); and it is noted of Moses that in spite of his age his eye was not dim. Like other plagues, blindness was believed to be a visitation from God, and curable only by Him (Ex 4<sup>11</sup>). It incapacitated for the priesthood (Lv 21<sup>18</sup>); but by law compassion for the blind was enacted (Lv 19<sup>14</sup>), and offences against them were accursed (Dt 27<sup>18</sup>). The minor form of ophthalmia caused redness of the lids and loss of the eyelashes. Leah was thus 'tender' or weak-eyed (Gn 2917). Blindness from birth arises from ophthalmia neonatorum, which is often severe enough to cause permanent opacity of the cornea. Sometimes ophthalmia accompanies malarial fever (Lv 26<sup>18</sup>). Smiting with blindness as a punishment occurred in the case of Elymas (Ac 13<sup>11</sup>). This was only temporary, and may have been hypnotic. The Syrian soldiers seeking Elisha were also affected, probably in the same way (2 K 618). It was also probably subjugation to His overmastering power that caused the inhibition of the angry manifestations of the Nazarenes towards our Lord (Lk 430)

Of the blind men cured by our Lord the cases of interest were (1) the man congenitally blind (Jn 9<sup>1</sup>), and (2) the man whose progress in vision was gradual (Mk 8<sup>22</sup>). Probably the latter also was blind from birth, and the intermediate stage was that before he had learned to interpret the new sensation, although, on the other hand, the use of the word ἀποκατεστάθη would seem to imply that he had at one time possessed sight which was restored to him. Cases are on record of men to whom sight was suddenly given by operation, being unable to understand visual appearances until verified by touch (see discussion of this in Locke's Essay, ii. 9. 8). Our Lord in His miracles used different methods to restore sight, all of them inadequate without His divine power, but doubt-less suited to the condition of faith on the person healed; a word, a touch, anointing with saliva, with clay, or testing his faith by sending him to wash his eyes. Maimonides refers to the use of fasting spittle as an application to sore eyes, but

expressly forbids its use on the Sabbath. The blindness of St. Paul (Ac 9st.) was doubtless a temporary amaurosis, such as that which has been caused by injudiciously looking at the sun. The 'scales' which fell from his eyes were probably not material, but vision was restored as if

scales had fallen; the word used is woel, for which see p. 330°. It is not improbable that this left a weakness of eye, which may have been the 'thorn in the flesh' which rendered his bodily presence weak (see Gal 4<sup>16</sup>). Tobit's blindness from the irritation of the sparrow's dung (To 2<sup>10</sup>) was cured

by the gall of the fish caught by his son (11<sup>4x</sup>). Pliny recommends the bile of Callionymus Lyra as a cure for blindness (xxxii, 24). There is a reference to eye-salve in Rev 3<sup>18</sup>. Magical means for curing eye diseases are referred to in Rawlinson, WAI ii. 47. Many eye-washes are mentioned in Papyrus Ebers lvff.

powers of nature in old age, in Ec 12, has been commented upon by many authors, and the details are carefully reviewed by Sir J. R. Bennett (op. cit. p. 106). The Rabbins recognized 903 modes of death; and, commenting on Ps 90, said that death at 70 is old age, at 80 is strength (Moed Katan 28. 1). On account of the impurity of a dead body, the older Jewish physicians did not make post-mortem examinations (Aboda Zara 29; Baba Buthra 155a), but at a later date these were permitted (see Willstüdler in Allg. Zeitung des Judenthums, viii. 568). Burial with or without the external application of antiseptics was the common method.

The process of child-birth is mentioned in Scripture: (a) in individual cases,  $(\beta)$  in legislative enactments, and  $(\gamma)$  in metaphor. Leaving on one side the narrative of the birth of Eve (see Midrash Rabbah on Nu 14, where Adam is described as androgynous), there are details of a number of births, most of which are illustrations of the primal curse of Gn 3<sup>16</sup>. Two of these are cases of twins (Gn 25<sup>216</sup> and 38<sup>28</sup>). The latter was a case of spontaneous evolution with perincal laceration, probably fatal to the mother (although a Rabbinic tradition in Zohar hadash says that she lived long after); Rachel's was a case of fatal dystocia, probably on account of some delicacy or unhealthiness of long standing (3185); and Phinehas' wife was an example of premature labour (Jos. Ant. v. xi. 4),

brought on by shock, and proving fatal (1 S 419).

The cases of Sarah, Manoah's wife, Hannah, the Shunammite, and Elisabeth, are instances of uniparce at a late period. Barrenness was regarded as a divine judgment (Gn 20<sup>18</sup> 30<sup>2</sup>), and was a cause of much unhappiness (Gn 30<sup>1</sup>, Pr 30<sup>18</sup>), for the removal of which the forked root of the mandrake was used as a charm (Gn 3016). A multitude of was used as a charm (Gn 30°). A multitude of children was believed to be a signal proof of the favour of God (1 S 25, Ps 1139 1273 1283). Hence miscarrying was regarded also as a sign of God's displeasure (Hos  $9^{14}$ ). The attendants on childbed were women, hipp (Gn  $35^{17}$ , Ex  $1^{18}$ ), of whom two were enough for the Israelitish women in Egypt, indicating a small number in a circum-scribed locality. *Midrash Rabbah* credits Puah with being the inventor of artificial respiration by insufflation. The mother was placed in a kneeling posture, leaning on some one's knees (Gn 30<sup>3</sup>) or on a labour-stool. There is some obscurity as to the nature of the purple of Ex 1<sup>16</sup>. Sa'adya and the Targ. believe it to have been a seat on which the midwife made the patient to kneel,\* others a bathing-tub. Ibn Ganach considers it a name for the uterus, others believe that the dual refers to the two sexes of the children which they were to see and note (see Dillmann-Ryssel on this passage, pp. 14, 15). Difficult labour from weakness of the mother is mentioned metaphorically in 2 K 19<sup>3</sup>. According to the law of Lv 12<sup>2n</sup> the mother was

regarded as unclean or taboo for 7 days, until the date of circumcision in case of a male, or for 14 days if the child was a female. After this there was a second period of separation, during which she was not permitted to appear in the temple. This period for the mother of a boy was 33 days, of a girl 66 days, after which the offering for purification was made. The difference of period in the case of the two sexes was due to the belief that the lochia lasted longer after the birth of a female child. Nursing was continued for 2 or 3 years (2 Mac 7<sup>27</sup>), and the child was taken by a relative to wean (1 K 11<sup>20</sup>).

The legislation for the catamenia and for menorrhagia was characterized by a rigid system of purification, and the cleansing of everything that was

#For particulars of this סשבר labour stool see Rashi on The poetical description of the failure of the 2 K 198, Kelim 28. 4.

defiled thereby (Lv 15<sup>196</sup>). The sufferer from this disease in Mt 9<sup>20</sup>, Mk 5<sup>20</sup>, and Lk 8<sup>43</sup> had suffered many things of many physicians and only grew worse; so much was this condition considered as beyond treatment that it was recommended to treat it magically and by amulet (Baba Shab. 110, Gittin 69). According to the early legend, the votive figure at Banias, supposed to be that of Christ, was put up by her (v. Dobschütz, Christusbilder, p. 197). Amulets of the lapis resurrectionis were used to prevent miscarriage (Shabb. 66). To this day, charms, usually in the form of verses or incantations from the Bible, are used in the interval between birth and circumcision to keep away Lilith: these are called mypp (Shebuoth 15, Chullin 77, Shabbath 57, Sanhedrin 90). Cresarean section (implied in the expression [pm Nar) is mentioned in Sanhedrin 45. There is a description of a newborn infant given in Ezk 16<sup>4</sup> with undivided umbilical cord, unwashed and undressed. Salt was rubbed on the skin of infants to make it firm, and to remove the vernix caseosa.

In the prophetic writings labour pains, pangs, and travail are frequent images, representing (1) the affrighting of God's enemics, Ps 48°, Is 13° etc.; (2) God's declaration of judgment, Is 42¹¹; (3) the sorrows of God's people under chastisement, Is 26¹¹; (4) claim of spiritual parentage, Gal 4¹¹⁰ etc.

(4) claim of spiritual parentage, Gai 4" etc.

Infantile diseases seem to have been exceptionally severe in Palestine, and at the present day mortality in the early years of life is exceptionally high. The Rabbinical writers speak of the wearly year, or pain of bringing up children, and in Bereshith Rabbah it is written that it is easier to rear a forest of young olive-trees than one child. Biblical references to sick children are not a few: Bathsheba's infant (2 S 12<sup>15</sup>), the Shunammite's son (2 K 4), the widow's son at Zarephath (1 K 17). Christ healed many children, among whom were the fever-stricken son of the nobleman of Capernaum (Jn 4<sup>15</sup>), and Jairus' daughter (Mt 9<sup>18</sup>, Mk 5<sup>22</sup>, Ik 8<sup>24</sup>), who was 12 years old. No particulars are given of their diseases.

Several general references to sicknesses whose characters are not specified occur. We do not know the maladies of Abijah (1 K 14<sup>1</sup>); Benhadad (2 K 8<sup>7</sup>), whose disease was not mortal, but who was too weak to struggle with Hazael; Elisha (2 K 13<sup>14</sup>), Joash ('afflicted with great diseases,' 2 Ch 24<sup>20</sup>), Lazarus of Bethany (Jn 11<sup>1</sup>), Dorcas (Ac 9<sup>27</sup>), Epaphroditus (Ph 2<sup>27</sup>), or Trophimus (2 Ti 4<sup>-6</sup>).

Similarly, the metaphorical allusions to sickness are numerous, as typical of the weakness brought on by sin and neglect of God's commandments. This moral sickness is especially compared to the severe pains in the back from fever and exposure: anguish in loins (Is 21<sup>8</sup>), pains in loins (Nah 2<sup>10</sup>), smitten in loins (Dt 33<sup>11</sup>), disease in loins (Ps 38<sup>7</sup>), affliction laid on loins (Ps 66<sup>11</sup>), breaking of loins (Ezk 23<sup>10</sup>); see for other images Is 1<sup>8</sup>, Ps 55<sup>4</sup>, Jer 4<sup>19</sup>.

There are very few references to methods of treatment in the Bible. External applications, such as bathing or washing (2 K 5<sup>10</sup>); diet (Lk 8<sup>05</sup>); the application of saliva (Jn 9<sup>5</sup>; see Maimon. on Shabb. 21); anointing with oil (Ja 5<sup>14</sup>); binding of sores and mollifying them with ointment (Is 1<sup>6</sup>); pouring in oil and wine (Lk 10<sup>84</sup>); Hezekiah's plaster of figs prescribed by Isaiah (Is 38<sup>21</sup>); animal heat by contact (1 K 17<sup>19</sup>, 2 K 4<sup>24</sup>), especially with those failing from old age (1 K 1<sup>2</sup>). Claudius Hermippus is said to have prolonged his life to 115 years by breathing the breath of young girls.

mippus is said to have prolonged his life to 115 years by breathing the breath of young girls.

Of actual medicines few are mentioned; possibly the balm of Gilead was one, Gn 372, 431, Jer 82, 461 518 (from this last passage it appears to have been used as a local sedative, Ezk 2717). This material was probably the resin of Pistacia lentis.

cus, the mastic tree; as the plant now called Balm of Gilead (Balsamodendron Gileadense) is a native of Somali-land and S. Arabia, and it is doubtful if it ever extended as far north as Palestine. The צרי may, however, have been the resin of Balanites Egyptiaca, still used as an application to sores. See, further, art. BALM. Mandrakes (dúdā'im) were used as a stimulant to conception, the forked root as a charm, and the sweetish fruit as a medi-The plant is Mandragora officinalis (for ancient views on this see Deusing, de Mandragora, Groningen, 1659; Celsius, Hierobot. s.v. 'Dudaim'). Of other plants, mint, anise, and cummin, mentioned under FOOD (vol. ii. p. 38b), are used as carminatives. The last was used for the wound in circumcision, Shabbath 133b. Myrrh, lign-aloes, onycha, stacte, frankincense, spikenard, are odorous materials, but scarcely remedial; salt was used for hardening the skin and as a preservative; nitre, native sodic carbonate, not saltpetre (Pr 25<sup>20</sup>, Jer 2<sup>22</sup>), was used as a cleansing agent to remove the fatty secretions of the skin. The caper-berry the fatty secretions of the skin. (Capparis spinosa) had a considerable reputation as an aphrodisiac (Ec 12<sup>5</sup>). Narcotics were used to abate pain (Baba mezia 83b). The wine given to our Lord at His crucifixion was probably for this purpose.

As in Egypt, the most of the remedics in common use were dietary: meal, milk, vinegar, wine, water, almonds, figs, raisins, pomegranates, honey, dibs, and butter, made up a large part of the Egyptian as of the Jewish pharmacopeia. Some few remedies were of a less agreeable nature, such as the heart, liver, and gall of Tobiah's fish (To 67). The Talmud adds to this list radishes, mustard, ginger, dog's dung, wormwood, calamus, cinnamon, ladanum, galbanum, storax; and of poisons, hemah (supposed to be some hemlock-like plant), rosh (probably poppy), and bushah or aconite. Many of the medicines given in the Egyptian medical writings, and almost all in the Babylonian and Assyrian plant lists, cannot be identified.

The art of the apothecary is mentioned in Ex 30<sup>25-35</sup> 37<sup>29</sup>, as well as in Ec 10<sup>1</sup>. The ppin was, however, rather a maker of perfumes (2 Ch 16<sup>14</sup>) than a compounder of medicines. They seem to have formed a kind of guild (see Neh 3<sup>8</sup>). RV has replaced the word by 'perfumer' except in Neh, 1 Ch, and Sir 38<sup>8</sup> and 49<sup>1</sup>. Probably, as in Egypt, the physician compounded his own medicines. In Pap. Ebers there is an invocation given to be used by the physician when thus engaged: 'May Isis heal me as she healed Horus from all pain which his brother Set hath inflicted on him when he slew his father Osiris. Oh Isis! great wonder-worker, heal me and set me free from all evil, destructive, and demoniacal inflictions, from fatal diseases and uncleanness of every kind which befall me,' etc.

It is probable that charms of this kind were in

It is probable that charms of this kind were in use among the later Jews. Neck-chains like serpents, such as those mentioned in Is 320, protected against diseases produced by envy and the evil eye (see Berachoth 55, Shabbath 57, Chullin 77, Shebuoth 17, and Elworthy's Evil Eye, 1898). The reply of Is 320 and the reply or ear-rings of Gn 354 are supposed to have been charms.

The Levitical code contains a large number of Hyglenic enactments with regard to food, sanitation, and the recognition of infectious diseases. It prescribes as sources of food, animals of the herbivorous and ruminant group, excludes all birds which live upon animal food, and permits the use of all true fishes; and, among invertebrates, permits only the use of locusts. Of food-animals, the fat and the blood are prohibited; and special rules were laid down for the slaughter and inspection of the animals, that the meat may be clean from the taint of infectious disease. Among fruits,

those produced by trees in the first three years of their life are 'uncircumcised' and not to be eaten; that of the fourth year is 'devoted'; and that of the fifth and later years may be used as food (Lv 1926). The provision of the periodic cleaning out and destruction of leaven, that even the breadstuffs may be kept wholesome, is also an important law for the maintenance of a pure food (Ex 1219 137.

The agricultural sanitary laws forbid the mixture of seeds in a field at the same time, the sowing of crops in a vineyard, the cross grafting of fruit-trees, the cross-breeding and even the yoking together of dissimilar cattle, and enforces the complete rest of man and beast on the Sabbath days, as well as on the great religious and national festivals (Ex 2312). To ensure the perfect purification of garments, no mixture of linen and woollen materials was permitted (Lv 1919, Dt 2211), as they cannot be so thoroughly or easily cleansed as pure garments of one material (see Kilayim). Such compound fabrics, however, might, according to Nidda, be used as shrouds.

In domestic sanitation the covering with earth of excreta and of blood are prescribed, and the expansion of these rules in the Mishna (Baba Kamma) forbids dung-heaps, and gardens requiring manure within the city, and intramural interments. The fires of the valley of Hinnom perhaps consumed the city offal (but see Robinson, BRP i. 274). Houses were built with parapets to prevent accidents (Dt 228), and persons suspected of having infectious diseases in the stage of incubation were isolated (Lv 134). Those who had to touch corpses or things unclean were themselves rendered unclean, and had to wash their clothes (Nu 1911).

In the Talmudic code of uncleanness there were five or, according to some, six grades recognized. Decomposition, death, or leprosy, or certain other diseases, were the central causes of all impurity, and hence were called 'fathers of fathers of un-cleanness.' That which was affected by these became the 'father of uncleanness,' and could not be purified: for example, a corpse, or carcase except such as was killed in the proper way, certain issues, a leprous man, an idol, the water of purification (Nu 19), the propitiatory parts of sacrificed animals. Whatever was defiled by contact with these was the first son of uncleanness, to be cleansed by sacrifice, by a period of isolation and a process of purification by water or fire; what-ever was defiled by contact with a first son of uncleanness was a second son of uncleanness, to be purified by seven days' isolation and washing; and whatever was rendered impure by one of these was a third son, to be purified by a day's isolation and washing of the clothes and person. By these lustrations and by the careful isolation of cases of suspected contagious disease, the chances of the propagation of infection were much diminished.

Of surgical instruments a flint knife called is was used for circumcision (see vol. i. p. 443), but later, steel knives, מַקְּלְּהָלוֹת, called also מָבֶין, were used (Chullin). An awl or מרצע was used for boring the servant's ear (Ex 216). Other knives called pigion 'izmel, kesilta' are mentioned in different Talmudic tracts-Kelim 13. 1; Shabbath 130; Moed Katan

and Aboda Zara 276.

Of surgical operations, circumcision has been already dealt with. The exclusion of eunuchs from the service of God under the theocracy was probably a protest against either of these opera-tions referred to in Dt 23 as performed among heathen nations in the service of their gods (see Driver, *Deut.* p. 259). Under the kingdom, however, they became important officials as Samuel predicted, 1 S 8<sup>15</sup> (AV and RVm), 1 K 22<sup>9</sup>, 2 K 8<sup>6</sup> 9<sup>32</sup> 24<sup>12-15</sup>, Jer 29<sup>2</sup> 34<sup>19</sup> 38<sup>7</sup> 41<sup>16</sup>, and no spiritual dis-

ability attached to their state, Is  $56^4$ ; see our Lord's words in Mt  $19^{12}$ , and also Ac  $8^{27\pi}$ .

Lord's words in Mt 19<sup>12</sup>, and also, As 2<sup>218</sup>.

Literature.—Few of the books on the subject written before this century (which number at least 150) are of any value. The only works worth consulting are: Ader, de Ægrotis in Evangelio, Toulouse, 1626; Bartholinus, de Morbis biblicis Miscellanea Medica, Ifafnia, 1671; Lundt, Die alten Jüdischen Heylightiner, Hannburg, 1995; Cremont, Dissert. de Ebræorum veterum Arte Medica, Viteborg, 1688; Moles, Pathologia morborum quarum in Sac. Scrip. mentio fit, Madrid, 1642; Calmet, der Medica Hebræi, Paris, 1714; Colmar, über die Arzneigelehrheit der Juden, Gera, 1729; Mead, Medica Sacra, London, 1749; Iteinhard, Bibelkrankheiten, 1767; Sprengel, de Medic. Ebræorum, Italle, 1780, and his Geschichte d. Arztnejkunde, vol. i. Of later works: Pruner, Krankheiten des Orients, Erlangen, 1847; Macgowan in Jewish Intelligence, and Journal of Missionary Labours in Jerusalem, London, 1840; Röser, Krankheiten des Orients, Augsburg, 1837; Wittman, Einem Artite Reisen nach Syrien, etc., Weinnar, 1805; Töbler, Beitrag zur medizinischen Topographie von Jerusalem, 1855; Nowack, Heb. Archiol., Freiburg, 1804, i. p. 52 ff.; Bennett, Diæases of the Bible, London, 1837. For Jewish Physicians, see Carmoly, Histoire des médecins Juifs, Brussels, 1844. For Talmudic Medicine, Joseph Salomo's BDB DB DB Chris de Med. Talmudica; Wunderbar, Biblisch-Talmudische Medicin, Riga and Leipzig, 1850-60.

MEEDDA (A Mee $\delta\delta d$ , B  $\Delta\epsilon\delta d$ , AV MEEDA), 1 Es  $5^{32}$  = MeHIDA, Ezr  $2^{62}$ , Neh  $7^{64}$ .

MEEKNESS must not be considered alone, but in connexion with the group of virtues of which it is one, and which are especially characteristic of the Christian temper. Meekness goes along It is one, and which are especially characteristics of the Christian temper. Meekness goes along with poverty of spirit, humility, mercy, etc., Mt  $5^{36}$  ( $\pi\rho\hat{a}os$ ,  $\pi\rho\hat{a}o\tau\eta s$ ; but in the best uncials both in LXX and NT,  $\pi\rho\hat{a}bs$ ,  $\pi\rho\hat{a}b\tau\eta s$ ). The grace is found in similar company in the Epistles, 'With all lowliness and meekness, with long-suffering, forbearing one another in love' (Eph 4<sup>2</sup>, Col 3<sup>12</sup>, Gal 5<sup>23</sup>). This association best illustrates the meaning of the word; it connotes gentleness, kindness, forbearance, and is the direct opposite of a proud, harsh, unforgiving spirit The high place given to this virtue in the beatitudes (Mt 5<sup>3-12</sup>), which represent the higher Christian law, its special prominence in the character as well as in the teaching of the Lord Jesus ('I am meek and lowly in heart,' Mt 1129), its frequent mention in the Epistles (Gal 6<sup>1</sup>, Tit 3<sup>2</sup>, 1 Ti 6<sup>11</sup>, 2 Ti 2<sup>25</sup>, Ja 1<sup>21</sup> 3<sup>13, 175</sup>, 1 P 3<sup>4, 15</sup>), all indicate the determining influence assigned to this class of virtues in the NT ideal of character. The insistence upon the duty of forgiveness (Mt 6<sup>14t</sup> 18<sup>35</sup>, Eph 4<sup>32</sup>) is another striking illustration. Our Lord prayed for His murderers (Lk 23<sup>34</sup>). His meekness deeply impressed His followers (2 Co 10<sup>1</sup>, 1 P 2<sup>28</sup>). The Lord's servant' must possess the same spirit (2 Ti 2246; cf. what is said of Moses in Nu 123, that he was meek [133] above all men upon earth). Row justly calls attention to the fact that Christianity transfers supremacy from the stronger to the milder virtues (Bampton Lect. p. 154). The result in the growth of the spirit of sympathy and love in the world amply justifies the change. The improvement would have been still greater if Christians had better understood and followed the Christian ideal as set forth in passages like Mt 589., Ro 12<sup>191.</sup> Too often they have preferred the heathen worship of the stronger virtues to the Christian ideal. Hence the slow fulfilment

the Christian ideal. Hence the slow fulfilment of prophecies like the one in Is 24.

The NT teaching on this subject, while going beyond the OT teaching, is rooted in it (see Ps 9<sup>12</sup> 10<sup>12</sup> 22<sup>26</sup> 72<sup>4</sup> 76<sup>9</sup> 82<sup>3</sup> 147<sup>4</sup>, Is 11<sup>4</sup> 61<sup>1</sup>). The Heb. word (12, 12) and the denotes, first of all, a distressed, helpless state in the literal sense, and then acquires a moral meaning, just as there is a close connexion between literal and spiritual poverty (cf. Mt 5<sup>5</sup> and Lk 6<sup>20</sup>). The Christian beatitude (Mt 5<sup>5</sup>) almost literally translates Ps 37<sup>11</sup>. It is (Mt 55) almost literally translates Ps 3711. It is

\* See Rahlfs, '19 und '19 in den Psalmen; and cf. Driver, Par. Psalt. 445f. (s.v. 'humble'), 451 f. (s.v. (1) 'poor').

no less striking a fact that the possession of the earth is promised to the meek in both passages.
J. S. BANKS.

MEET (Anglo-Sax. gemet 'suitable,' from metan to measure, whence Eng. 'mete,' thus 'according to the proper measure or standard'). The Heb. and Gr. words rendered 'meet' in AV are numerous, but the meaning is either 'fit' or 'fitting.' 1.

Fit, suitable, 2 K 103 'Look even out the best and meetest of your master's sons, and set him on his father's throne'; Wis 13<sup>11</sup> 'He hath sawn down a tree meet for the purpose'; Mt 3<sup>8</sup> 'Bring forth therefore fruits meet for repentance' (ΤΕ καρπούς άξιους τῆς μετανοίας, edd. καρπού άξιου, RV 'fruit worthy of repentance'); 1 Co 15° 'I am the least of the apostles, that am not meet to be called an apostle' (lkarós); Col 112 'Giving thanks unto the Father, which hath made us meet to be partakers of the inheritance of the saints in light  $(\tau \hat{\psi} \pi \alpha \tau \rho) \tau \hat{\psi} k \kappa a \nu \omega \sigma a \nu \tau i \dot{\eta} \mu a s)$ . Cf. Erasmus, Commune Crede, fol. 79, 'It is not in the mete place.' So Tindale's tr. of Nu 1<sup>22</sup> 'whatsoever was mete for the warre' (so 180. 42, but 126 'all that were able to warre,' and 128 'what soever was apte for warre'), and of Mt 1037.38 'He that lovith hys father or mother more then me, is not mete for me.' Also 1 S 1452 Cov., 'And where Saul sawe a man that was stronge and mete for warre, he toke him to him'; Hall, Works, ii. 30, 'Piety and diligence must keepe meet changes with each other; neither doth God lesse accept of our returne to Nazareth, then our going up to Jerusalem'; and Shaks. Lear, I. ii. **200-**

'Let me, if not by birth, have lands by wit, All with me's meet that I can fashion fit.'

2. Fitting, proper, as 2 Mac 9<sup>12</sup> 'It is meet to be subject unto God' (δίκαιον, RV 'It is right'); Mt 15<sup>26</sup> 'It is not meet to take the children's bread, and to east it to dogs' (οὐκ ξστιν καλόν). Cf. Shaks. Rich. II. v. iii. 118-

'No word like "pardon," for kings' mouths so meet.

J. Hastings.

MEGIDDO (1717, )1717 Megiddon in Zec 1211; Μαγεδδώ or Μαγεδδών, Μαγδώ in 1 K 915 A [om. in B]) was an old Canannite capital (Jos 1221, B om.) situated in Issachar but assigned to Manasseh (Jos 17<sup>11</sup>, 1 Ch 7<sup>29</sup>). The Can inhabitants were, however, 'put to tribute' and not driven out (Jos 17<sup>12, 13</sup>, Jg 1<sup>27, 29</sup>). The town was in the district from which Baana, one of Solomon's twelve commissariat officers, drew supplies for the royal household (1 K 412), and Solomon restored the fortifications (1 K 918), which were of very sencient date (Inser. of Thothmes III.). According to 2 K 9<sup>37</sup> Ahaziah died at M.; but elsewhere (2 Ch 22<sup>9</sup>) it is said that he was found in Samaria, taken to Johu, and slain. Barak fought Sisera 'in Taanach by the waters of M.,' and the Canaanites were swept away by the suddenly swollen Kishon (Jg 5<sup>19-21</sup>). Pharaoh-necho, whilst on the march from Egypt to Carchemish and the Euphrates, defeated and slew Josiah 'in the valley' or 'plain' of M. (2 K 23<sup>20. 30</sup>, 2 Ch 35<sup>22</sup>, 1 Es 1<sup>20</sup>); and the 'mourning of Hadadrimmon in the valley (LXX plain) of Megiddon' may refer to the same event (Zec 1211). Possibly this was the battle at Magdolum mentioned by Herodotus (ii. 159). frequently mentioned in close connexion with Taanach (Jos 12<sup>21</sup> 17<sup>11</sup>, Jg 5<sup>19</sup>, 1 K 4<sup>12</sup>, 1 Ch 7<sup>29</sup>), which was certainly at Ta'annuk—a small village, on a large isolated mound, or Tell, near the edge of the plain of Esdraelon, and about 6½ m. N.W. of Jenin. M. was taken by Thothmes III. after a great battle, in which he defeated the confederated kings and princes of Palestine. Leaving his camp at Aruna (a place identified by Maspero with Umm el-Fahm, but which is more probably Ararah), he marched through a defile (Wady Arah) in which he expected to be attacked, and in seven hours

reached the south side of M. (RP, 1st ser. ii. 35-47). The town is noticed in the 'Travels of an Egyptian, apparently in connexion with the Jordan (ib. ii. 112); but Max Müller has shown (Asien u. Europa, 195) that Jordan is probably an error for Kishon. M. is also mentioned in the cuneiform inscriptions. At Armageddon (RV Har-magedon), that is, 'the fortified city or mountain of M.,' according to Rev 16<sup>18</sup>, the final conflict between the hosts of good and evil will take place; see ii. 304f.

About 41 m. N.W. of Thomash are the conformal inscription.

About 41 m. N.W. of Taanach are two ancient sites. One, Tell el-Mutasellim, is at the end of a spur that runs out from the ridge of Carmel into the plain, and is a conspicuous feature in the land-scape. This is Megiddo. The other, close to it, is Lejun, the Roman Legio, which took the place of 45, 47), G. A. Smith (HGHL 386 f.), Buhl (GAP 209). Moore (p. 47) thinks Tell el-Mutasellim may have been the citadel of Megiddo. The ruins of Legio cover a wide area on both sides of a perennial stream, which is one of the principal feeders of the Kishon, and sometimes called its head (PEF Mem. ii. 39). This stream is apparently 'the waters of Megiddo.' Legio was a centre from which Eusebius and Jerome measured the distances of other places, and probably a military station. It occupied an important position on the road from Bethshean and Jezreel to the coast, and guarded the northern end of the pass over the ridge of Carmel, which forms the easiest line of communication between the plain of Sharon and that of Esdraelon. Through this pass ran the great road from Egypt to the north, along which invading armies have marched from the time of Thothmes III. to that of Napoleon. It was apparently during the passage of the defile that Josiah's hillmen attacked the army of Necho, hoping to obtain an easy victory over soldiers trained on the plains of the Middle Ages, commerce followed the same route. There would seem to be a trace of the name Megiddo in the Arab name of the Kishon, Nahr el Mukutta. (See Smith, HGHL 386, 387. whose view, however, is strongly opposed by Moore, Judges, 158). Conder (PEF Mom. ii. 90-99) identifies Megiddo with Mujeddu in the Jordan Valley near Bethshean. This site has in its favour similarity of name, and a doubtful reference in the description of the journey of an Egyptian traveller in the 14th cent. B.C. It is, however, far removed from the Kishon; is a long way from any road by which an army would march from Egypt to Car-chemish and the Euphrates; the flight of Ahaziah would not have been towards Bethshean, whence Jehu had come; and the expression 'Tanach by the waters of M.' cannot apply to any site beyond the limits of Esdraelon. (See the criticism of G. A. C. W. WILSON. Smith, p. 387f.).

MEGILLOTH.—See TEXT OF OT.

שמימיקאל = סימיקאל (מימיקאל God benefits').—1. The grandfather or ancestor of Shemaiah, the son of Delaiah, the false prophet, who was hired by Tobiah and Sanballat against Nehemiah (Neh 6<sup>10</sup>). 2. The wife of Hadar or Hadad, king of Edom (Gn 36<sup>39</sup>, 1 Ch 1<sup>50</sup>).

**MEHIDA** (κρινς).—The eponym of a family of Nethinim who returned with Zerubbabel, Ezr  $2^{52}$  (Μαουδά) = Neh  $7^{54}$  (Μεειδά), called in 1 Es  $5^{32}$  **Meeda.** 

MEHIR (τηφ). —A Judahite, 1 Ch 411 (LXX Maxelp).

MEHOLATHITE (τήπησ; in 1 S B omits, 2 S B δ Μωουλαθεί, A δ Μοουλαθείτης).—Probably an inhabitant of Abel-meholah, the birthplace of Elisha, which is usually placed in the Jordan Valley, 10 miles S. of Beth-shean (G. A. Smith, MCM, p. 581 p.) in accordance with the identity HGHL p. 581 n.), in accordance with the identification of Eusebius and Jerome (Onom. 2227, 35). Conder (SWP Memoirs, p. 221) identifies it with Ain Helweh in the same neighbourhood; but Moore (Judges, p. 212) rejects both these conjectures (cf. Buhl, Geogr. p. 206 n.). Possibly we should look for Abel-meholah or Meholah on the east of Jordan, in which case Barzillai, the father of Adriel, who is described as an inhabitant of this place (1 S 18<sup>19</sup>, 2 S 21<sup>8</sup>), is to be identified with the wealthy Gileadite of that name (2 S 1727). favour of this view is the close connexion which existed between the house of Saul and the inhabitants of the trans-Jordanic country.

J. F. Stenning.

MEHUJAEL (πρική ο τημική Γκενέ της); Α

Μαιήλ).—A Cainite, Gn 418 (J), corresponding to

Mahalalel of P's genealogy (Gn 512π). Dillmann

remarks that the name more respected. remarks that the name may mean 'destroyed of God,' or (Jewish-Aramaic) 'smitten of God' (so Holzinger), or 'God gives (to me) life' (so Budde [*Urgeschichte*, 128], who points קתייאל or דְּקָייָאל; cf.

Philo's interpretation, ἀπὸ ζωῆς θεοῦ).

Ball (in SBOT) agrees with Hommel (PSBA, March 1893) in holding not only that the two lists of the antediluvian patriarchs are identical, but that the Heb. names are either adaptations or translations of the Babylonian as found in Berosus and cuneiform sources. Ball considers that the form אַלְאָקְאָסְ of Gn בּיִּאָל is more original than either or מחנאָל [the Kere he calls 'a triumph of absurdity'], as is shown by Berosus' Μεγάλαρος, a phonetic improvement of Μελάλαρος = Amel-A phonetic improvement of Mexalapos Amer-Aruru, 'Aruru's man' (Hommel), 'and 'b being sometimes confused. See, further, Nestle, Mar-ginalien, 7, and Sayce, Expos. Times, May 1899, p. 353.

J. A. Selbie.

MEHUMAN (קהוקן).—One of the seven eunuclis in attendance upon king Ahasuerus (Est 110, LXX 'Aμάν). The name has been explained from the Persian Mehhum-van, 'belonging to the great Hum' (cf. Berth.-Ryss.); the former has perhaps been

assimilated to the Aram. = faithful.

H. A. WHITE. ME-JARKON (פְל תִּינְקוֹן).—An unknown place in the neighbourhood of Joppa, Jos 1946. The text is doubtful, the following Rakkon (יִבּין) being in any case almost certainly due to dittography from the second part of *Me-jarkon*, while the latter name itself is not beyond suspicion. The LXX reads και against Joppa. J. A. SELBIE.

MEKONAH (πμτρ; BA om.,  $κ^{c.a \, mg \, int} \, Ma\chi \nu d)$ .— A town noticed, with Ziklag, as inhabited after the Captivity, Neh 1128. The site has not been identified.

MELATIAH (πτοιρο 'J" hath delivered, Μαλτίας, but κA om.), a Gibeonite, who, with the men of Gibeon and of Mizpah, repaired a portion of the walls of Jerus. in the days of Nehemiah (Neh 37).

**MELCHI** (Me $\lambda \chi i$  TR, but Me $\lambda \chi e i$  Tisch. Treg. WH).—1. 2. Two ancestors of our Lord bear this name in St Luke's genealogy (3<sup>24.28</sup>).

MELCHIAS (B Meλχelas, A -χlas).—1. 1 Es 926=

MALCHIJAH, Ezr 1025. 2. 1 Es 932 = MALCHIJAH. Ezr 1081. 3. 1 Es 944 = MALCHIJAH, Neh 84.

MELCHIEL (Β Μελχειήλ, Α Μελχιήλ; Vulg. om.).-The father of Charmis, one of the three governors of Bethulia, Jth 615 (cf. the name סְלְכִּיאַכ, Malchiel).

MELCHIZEDEK (ρηγυήρ, Μελχισεδέκ).—King of Salem and priest of the Most High God, who, after Abram's defeat of Chedorlaomer and his Bab. Allies, me the patriarch on his return, offered him bread and wine, blessed him, and received tithes from him of the spoil (Gn 14<sup>17-20</sup>). Salem is Jerusalem, which appears already in the Tel el-Amarna tablets (B.C. 1400) as one of the most important cities of Canaan, and is called Uru-salim. An Assyr, lexical tablet (WAI II. ii. 393) states that uru is the equivalent of the Assyr. alu, 'city'; and in the hieroglyphic inscriptions of the Egyp. kings Ramses II. and Ramses III. (19th and 20th dyn-Ramses II. and Ramses III. (19th and 20th dynasties) Jerus. is called simply Shalam or Salem. Several of the Tel el-Amarna tablets are letters written to the Pharaoh by Ebed-tob (or, as read by Hommel, Abdi-khiba), the king of Uru-Salim, who begs for help against his enemies. He tells the Pharaoh that he was not like the other Egyptian governors in Palestine, nor had he received his crown by inheritance from his father or mother; it had been conferred on him by 'the Mighty King.'\* In another letter he speaks of 'the city of the mountain of Uru-Salim, by name Bit-Ninip,' becoming disaffected; and we may perhaps infer from this that the 'Most High God' of Jeru-salem was identified with Ninip, the warrior Sungod of Babylonia. In a letter from Phænicia we hear of a second Bit-Ninip in the N. of Palestine. 'The Mighty King' is distinguished from the 'great king' of Egypt; and in one passage Ebedtob declares that, although the Pharaoh sends no troops, 'the arm of the Mighty King shall reach the lands of Naharaim and Babylonia.' Ebed-tob would therefore appear to have been a governors in Palestine, nor had he received his Ebed-tob would therefore appear to have been a priest-king, and thus to offer a striking parallel to Melchizedek. Moreover, Ebed-tob's words, that Melchizedek. Moreover, Ebed-tob's words, that he had received his royal dignity neither from his 'father' nor from his 'mother,' are a curious commentary on He 7<sup>3</sup>. As Uru-Salim probably (but see Jerusalem, vol. ii. p. 584<sup>a</sup>; ZA, 1891, p. 263; JBL xi. (1892) p. 105) signifies 'the city of the god Salim,' the god of peace and safety (Heb. shâlôm) (though the Babylonians seem to have interpreted the name the 'city of alliance,' culim having that meaning in their own language). salim having that meaning in their own language), the action of M. in welcoming the peaceful return of Abram is easily explained. The offering of the esrá or tithe to the priests and temples was a longestablished Bab. custom, and the formula used by M. in blessing the patriarch is met with in Aram. inscriptions found in Egypt. (See a series of papers on 'Melchizedek' by Sayce, Driver, Hommel, and others in the Expos. Times, vols. vii. and viii., and cf. art. EL ELYON).
For NT references see art. HEBREWS, vol. ii.

331 f., and MEDIATION, pp. 3134, 319b.

A. H. SAYCE. MELEA (Melea TR, but Melea Tisch. Treg. WH).—An ancestor of Jesus, Lk 381.

MELECH (170 'king'; cf. Nabatæan 1350, the name of several kings in 1st cent. B.C.-1st cent. A.D. [Gray, Heb. Proper Names, 116]).—The name of a grandson of Merib-baal (Mephibosheth), 1 Ch 826 (B  $Me\lambda\chi\eta\lambda$ , A  $Ma\lambda\omega\theta$ ) 94 (B  $Ma\lambda\omega\chi$ , A  $Ma\lambda\omega\chi$ ).

\*Acc. to Hommel (Expos. Times, viii. 95), the 'Mighty King' is in Abdi-khiba's letter the king of the Hitties, but he considers it probable that this was an applied reference, the original sense of sarru dannu ('mighty king') having been a religious one, parallel to the אל עליון ('Most High God') of Gn 1418.

Siegfried-Stade compare, further, the names Μάλχος (Jn 1810) and Μάλιχος (Jos. Ant. XIV. v. 2).

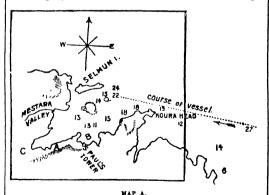

J. A. SELBIE. MELITA (Μελίτη; but B\*, the Arm. VS, a Greek corrector of the Philoxenian Syr., the Bohairie, some good MSS of Vulg., and other authorities read Μελιτήνη, a natural and probably very early error in transcription).—The island upon which St. Paul was shipwreeked (Ac 281). The ship had drifted thither from Cauda, a small island off the coast of Crete (Ac 27<sup>16</sup>). The violent wind Euraquilo (which see), the 'Gregalia' or 'Levanter,' blowing from E.N.E., would have drifted the vessel to the Syrtis (which see) had not its course been changed. St. Luke gives a partial account of the steps taken with this object; but, writing as a landsman, he omits the one essential point, viz. the setting of storm-sails, without which 'way' could not have been kept on the ship, and she would have drifted straight on the Syrtis. It has been shown that a ship of the kind in question, close-hauled on the starboard tack, before an E.N.E. gale, would make a course about W. by N. This would bring her to Malta within about the time stated (v. 27) to have elapsed. It could not possibly have carried her to the Dalmatian coast. This fact, as well as the fact that the party proceeded from Melita to Rome by Syracuse and Rhegium, is conclusive against the claim of Melita in the Adriatic, in spite of the identification of our Melita with the latter island by Constantine Porphyrogenitus (de Admin. Imper. 36, apparently the only express allusion to the question in early literature; he gives no reasons). The mention of Adria (which see) proves nothing. Malta was recognized as marking the point where the Tyrrhenian Sea ceases and the Adriatic (in the wider sense) begins (Procop. 1. 372).

To Malta, then, the apostle and his fellowvoyagers quite indisputably came. At night the watch were convinced that 'land was getting near'  $(\pi\rho\sigma\sigma d\gamma\epsilon\iota\nu - \pi\rho\sigma\sigma\alpha\chi\epsilon\hat{\iota}\nu)$  is an attempt to replace a curious phrase by an explanatory one, Ac  $27^{27}$ ). As the soundings confirmed this, they threw anchors out from the stern (to avoid the risk of 'swinging' on to a lee shore), and 'prayed for day.' The dawn revealed a bay, with a shelving bit of beach. Upon this they decide to run the vessel. Simultaneously they cut the cables, let the 'rudders' down (they had been braced up for safety), hoist the foresail, thus getting way on to enable them to steer, and head for the beach. What happened next is in dispute. The beach is not coextensive with the bay. There is a beach at the head of it, and apparently at one or two other points at the foot of the cliffs. But before they reach the beach they meet unexpectedly a τόπος διθάλασσος, and the ship grounds in water too deep for wading. Accordingly swimmers were bidden to save themselves, the rest make use of boards, spars, etc., and all are saved. The natives \* receive the party kindly, and light a fire. As St. Paul warms himself, a snake, roused by the heat, darts at him from a faggot he has piled on the fire, and hangs by its teeth on to his hand. The apostle shakes of the animal into the fire, and, to the amazement of the natives, suffers no injury. Escorted to the house of Publius (which see), the  $\pi\rho\hat{\omega}\tau$ os † or Princeps of the island, St. Paul heals his father of dysentery. This miracle is followed by others. The party are honourably treated, and after three months proceed to Italy by a ship which has wintered at the island.

\* Βάρβαρα. The language was probably Punic (Bilingual Punic and Gr. insc. CIG 5753). The modern Maltese is a corrupt Arabic with words from Italian, etc.
† The title is confirmed by Boeckh, CIG 5754, Λούπιος Κλαυδίου υδο: . . . προύδηνε Ισπόν ' Ροικαίου πρώτος Μιλεταίου και πατρών, and by an earlier inscr. published by Caruana.

Malta lies 60 miles from Pachynum (Cape Passaro), the southern headland of Sicily, and nearly 200 from Cape Bon, the nearest point of Africa, in lat. 35° 53′ N., long. 14° 30′ E. It is separated by a channel of geologically recent formation, 4½ miles wide, from the Isle of Gozo on the west. The length of Malta is 17 miles, its greatest breadth 9, its circumference 60, its area 95 square miles. Its population is very dense, 2000 per (productive) square mile. The Greeks seem to have colonized it at an early date. It is said (Diod. v. xii.) that the older inhabitants were Phonician. It was long held by Carthage; in B.C. 218 it was taken by the Romans, under whom it became part of the province of Sicily (Cicero, in Verr. II. iv. 18, 46). In A.D. 399 it became part of the Eastern Empire; Belisarius recovered it in 533 from the Vandals; but in 870 it passed under the power of the Abbasside Caliphs. In 1090 it was reunited by the Normans to Sicily. In 1530 Charles v. gave it to the Knights of St. John, who had just lost Rhodes. The Turks attempted to seize it in 1551, 1563, and 1565, but were gallantly repulsed. On the last occasion, one of the great sieges of history, the Turks lost 30,000 men out of 40,000, and the 9000 defenders were reduced to 600. In 1798 the island was seized by Bonaparte; but the harsh rule of the French led the inhabitants to revolt, and in 1800 the island was taken by the English, to whom it was confirmed by the Treaty of Paris in 1814.

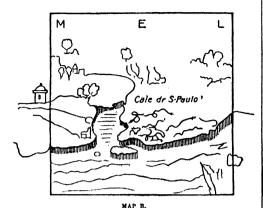

The narrative of the Acts, summarized above, fits well with the topography of 'St. Paul's Bay,' some 8 miles in a direct line from Valetta, and hardly 5 from the old capital, Melita, now Medina, Notabile, or Città-Vecchia. The tradition identifying the bay is of great antiquity (see below), and its correctness is practically certain. In 1530 tradition coupled the events with the cast side of the bay, where stood the old church of S. Paulo ad mare, and the Ayin tal Razzul (fons Apostoli), and where Quintinus (1533) identifies the 'locus bimaris' with the 'Chersonesus' of Ptolemy (Koura Head) projecting into the sea. This can hardly

(After Con. and Howson). A, 'Ayin tal Razzul; B, St. Paul ad mare; C, the Wied tal Puales. Valetta is about 8 miles E.S.E.

be correct, as the ship would more probably, as Smith and all modern investigators assume, be stranded on the west side of the bay; it may be noticed, moreover, that the oldest map (reproduced below) shows the serpents, etc., on the west side, opposite the islet of Selmun, though the church of St. Paul is shown on the E. side. If the modern view is correct, the 'locus bimaris' will be a spit of mud projecting under the sea with deep water on either side-possibly, as Ramsay

etc., suggest, between the islet of Selmun and the mainland.

Venetlan map soon after 1530. The church on the left of the hay is St. Paul ad mare. Città-Vecchia is beyond the letter M at the corner.

Three points require final consideration: (1) The title and position of 'Publius.' If Malta was by this time enfranchized, the πρῶτοι, may have been a semi-official position corresponding to that of the princeps coloniæ at Pisse (see Woolsey, quoted by Hackett, in loc.). Otherwise he might be the legate of the proprætor of Sicily (Cicero, in Verr. IV. xviii.). Tradition, supported by excavations, puts the Rom. governor's house at Citth-Vecchia. But Playfair mentions the ruins of an important house, now covered up for protection, apparently near the Church of St. Paul ad mare, certainly on the east side of St. Paul's Bay.

(2) Malta has now no venomous snakes; but the increase of population and cultivation may well have killed them out. Venomous snakes, again, do not hang on after biting. The smooth snake (Coronella lævis) is said to do so (Tristram), but it is not venomous. But to peasant-folk all

reptiles, even lizards, are venomous.

(3) A question of more far-reaching interest is the history of the local tradition, which modern research so remarkably confirms, of the site of St. Paul's shipwreck. Apart from the variation above mentioned as to the side of the bay, the general accuracy of the tradition is remarkable. How did it originate? Have we here a unique instance of local tradition remounting to the actual landing of St. Paul, or the happy conjecture of a later date, which fixed upon a likely spot near at hand to the capital? The matter cannot be settled with our present knowledge. All one can say is, that the tradition was clearly old when the first maps of Malta were made (after 1530). Before that time no writer appears to allude to the place; but Quintinus (see above) and Fazelli (about 1555) both take its identity for granted. The Church of St. Paul ad mare was rebuilt in 1610 by the Grand Master Vignacourt, who also built the neighbouring Torre di S. Paulo. The statue of St. Paul which crowns the isle of Selmun is modern (1845).

The first known bishop of Malta (the Episcopate of Publius is assumed in the Roman Martyrology with no known evidence) is Acacius, at the Council of Chalcedon in 451. But Caruana claims the existence of Christian monograms and inscriptions as early as the 2nd cent. This makes it just credible that there may have been a continuous Christian tradition in Malta since St. Paul's days. But if the gospel were reintroduced at a later date, the mention of Melita (Ac 281) would lead to

the establishment of some local tradition. Città-Vecchia abounds with sites traditionally associated with St. Paul, including the cave where he lodged during his sojourn. And the foundation of a Church of St. Paul ad mare in the neighbourhood of the capital, the original centre of tradition, would be natural.

of the capital, the original centre of tradition, would be natural.

Literature.—The ancient commentaries on the Acts contain nothing bearing on the question. Occumenius in his summary of St. Paul's journeys (Migne, Pat. Gr. cxviii. 312 D) does not mention Melita by name. The ancient map reproduced above was published at Venice by 'D. B.' Another by Battista Agnese (Ven. 1554) is similar in treatment, but marks 'Cala do S. Paulo' at Koura Head. A similar map was published at Rome in 1651. Other maps published (at Rome and Nurnberg) in 1565 have also been consulted. Quintinus 'Descriptio Melita (1633) is printed in P. Burmann's Thesaurus, xv. 110. Fazelli, de rebus Siculis, ed. by D. Vito e Statella (Catan. 1749), 1, 16, 27 (sensible refutation of Dalmatian theory. Refers to virtue of stone from St. Paul's cave against snake-bite, immunity of persons born in any country on Conversion of St. Paul, Jan. 25, etc.); Descripção da Fanoza Ilha de Malla (Lishon, 1761), Part I. based on Fazelli; Historisch-Geographische Beschreibuny M.'s (Frankt. 1782), unimportant; [O. Bres' Recherches Ilistoriques, etc., sur Malle (Paris, An. vii., i.e. 1708), anonymously; Onorato Bres, Malta Antica Illustrata (Rome, 1816, dedicated to the Prince Regent) refutes Const. Porphyr. (supra) and Don Ignazio Georgi, the Benedictine of Ragusa, the chief modern advocate of the Dalmatian theory (1730). Bres is worth consulting. Milge, Histoire de Malte (Paris, 1840), 2, 15 ff., formerly French consul at Malta, no topographical references, but argues against continuous Christian Church in M. from time of St. Paul. Neweste Gemahlde von Malta (Ronneburg and Leipzig, 13(0)); Playfair (Sir R. L.) (Murray's), Mediterranean (Lond. 1890), very useful; Porter, Hist. of the Knights of M. (Lond. 1853), for the later history. See also Sicilia Sacra, ii. 900-928; Ferres, Descriz, storica delle Chiese di M. e Gozzo, Saint Pres, M. par un Voyageur Français; W. M. Ramsay, Expositor (5th Ser.), vi. 154, St. Paul the Traveller, p. 314 ff.; Caruana, Reports on P

MELONS (proces) 'dbattihlm, πέπονες, pepones).—
The cognate name bottikh in Arab. = melon, with the testimony of the ancient VSS, leaves no reason to doubt the identity of the fruit mentioned (Nu 115) along with cucumbers, leeks, onions, and garlic. The term in Arab. is generic. It includes all the varieties of cucurbitaceous fruits known as water-melons, bottikh akhdar='green melon,' and cantelopes or muskmelons, bottikh asfar='yellow melon.' Melons of excellent quality (under the name of battikh or bit(ikh) are still produced in Egypt, and their succulent pulp was remembered with great regret by the Israelites in the burning sands of the Desert of the Wandering. Had their faith or their knowledge been greater, they needed not to sin by their impatient expressions of longing, for Palestine and Syria produce melons no less renowned for their excellence than those of Egypt. The water-melons of Jaffa are specially prized for their luscious pulp. Those of Hems and Lattakia, where the fruit is called jabas, are also of very fine quality. Melon patches are to be seen everywhere, often on the driest of hillsides. The vine has the power of extracting moisture from a soil which appears entirely parched and barren. The fruit is very cheap, and forms an important part of the diet of the poorer classes, but is equally enjoyed by the rich in Bible lands. During the season long trains of camels and donkeys transport melons from place to place, and boat-loads are constantly entering the seaports.

G. E. Post.

MELZAR (τς 'μρη Dn 1<sup>11, 18</sup>).—The LXX ('Αβιεσδρί), Theodotion ('Αμελσάδ or 'Αμερσάρ), the Vulg. (Malasar), all regard it as a proper name, and have been followed in this by our AV and other modern versions. This is now universally admitted to be a mistake. The article precedes the noun, and the two together must be rendered 'the steward' (RV), or 'the cupbearer' (Kautzsch's AT), or 'the

overseer' (Nowack's Handkommentar). The last is best. It expresses fairly well the functions with which the man in question was charged. The prince of the eunuchs bade him superintend the diet, training, and conduct of Daniel and his three faithful companions, until the time when they should be fit to enter on the king's service. It has been well said that he thus combined the duties of the παιδαγωγός and τροφεύς, and attention has been called to the inscription on the Bellino cylinder which mentions the son of one 'who was governor over the young men educated in my [the king of Assyria's] palace.' This was hardly the cupbearer's work. And the title steward lends our thought to the superintendence of property rather than of persons.

The derivation of the word melzar has been very variously given. Hitzig, in his Commentary, compared with it Μολοσοίς, Laconian Μολοσοίρ, and connected this with κολοσοίς. Halévy compares μνλωθρός, 'miller': Grätz, coming a little nearer the meaning, μελέτωρ. The Pers. mul-ser, 'keeper of the cellar,' has met with much favour, but the duties of that official do not square with those assigned to hum-melzar. Lenormant thought of the Assyr. amil ussur, 'treasurer.' Other suggested Assyr. origins are mul, 'a star,' and Mulul-Assur. But the most probable is that of Frd. Delitzsch and Schrader, who point out the frequent interchange of 5 and 1 in Semitic, and hold that our word may be the same as the Assyr. massaru, 'guardian,' from the root wid. Schrader compares massar babi, 'gatekeeper.' As to the l, Delitzsch points to βάλσαμον, from chy. In the Pesh. and Arab. of the two Daniel passages we find the n,

MEM (12).—The thirteenth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 13th part, each verse of which begins with this letter. It is transliterated in this Dictionary by m.

**MEMEROTH** (A Μαρερώθ, B om., AV Moremoth), 1 Es  $8^2$ = MERAIOTH, an ancestor of Ezra (Ezr  $7^3$ ). Also called MARIMOTH, 2 Es  $1^2$ .

MEMMIUS, QUINTUS (Κόιντος Μέμμιος), a Roman legate (2 Mac 11<sup>34</sup>), but no Memmius with this prænomen is mentioned elsewhere. The Memmii were members of a plebeian gens which first appears in history in B.C. 173, and more frequently from the time of the Jugurthine war (B.C. 111). In 170 T. Memmius was sent by the Senate to Macedonia and Achaia (Livy, xliii. 5). See Manius.

MEMORIAL, MEMORY.—A memorial is that which preserves alive the memory of some person or event; but in earlier English the words were not carefully distinguished, so that in AV we find 'memorial' where we should now use 'memory,' and 'memory' where we should use 'memorial.'

and 'memory' where we should use 'memorial.'

Memorial: Est 928 'The Jews ordained...
that these days of Purim should not fail among the Jews, nor the memorial of them perish from their seed'; Ps 96 'Thou hast destroyed cities; their memorial is perished with them'; 13513; Wis 41 'Better it is to have no children, and to have virtue; for the memorial thereof is immortal' (dθανασία γάρ θστιν εν μυνήμη αὐτῆς, RV 'in the memory of virtue is immortality'); 419 'their memorial shall perish' (μνήμη, RV 'memory'); Sir 451 'Moses, beloved of God and men, whose memorial is blessed' (μνημόσυνου; so 4910, 1 Mac 37 1253; elsewhere μ. is rendered 'remembrance,' 'renown,' etc., RV prefers 'memorial'). Cf. Pr 107 Cov.

'The memorial of the just shall have a good reporte, but the name of the ungodly shall stynke'; Ps 1457, Pr. Bk. 'The memorial of thyne aboundant kyndnes shal be shewed, and men shall synge of thy rightcoursness.'

synge of thy righteousness.'

MEMORY: 1 Mac 13<sup>29</sup> 'Upon the pillars he made all their armour for a perpetual memory' (els δνομα alώνιον). Cf. Mt 26<sup>13</sup>, Rhem. 'Wheresoever this Gospel shal be preached in the whole world, that also which she hath done, shal be reported for a memorie of her'; Shaks. Jul. Cæs. III. ii. 139—

'And they would go and kiss dead Cæsar's wounds, And dip their napkins in his sacred blood, Yea, beg a hair of him for memory.'

But 'memory' is also used for remembrance, the retaining of the past in memory, 2 Mac 7<sup>20</sup> 'But the mother was marvellous above all, and worthy of honourable memory.' Cf. the Rhem. tr. of Ac 10<sup>81</sup> 'thy almesdeedes are in memorie in the sight of God'; Ito 1<sup>8</sup> 'I make a memorie of you alwaies in my praiers.'

MEMPHIS, the capital of Egypt, is, in the Heb. text, only once (Hos 98) written correctly γ2 Moph. In the other passages (Is 1913, Jer 216 441 4614.19, Ezk 3013.16) it is corrupted to γ1 Noph. EV is correct and in agreement with the ancient versions in rendering Moph, 'Memphis'; Noph, which likewise all ancient versions render 'Memphis,' is merely transliterated. The name Memphis was in ancient Egyp. Men-nofer (=later Men-nufe), i.e. 'the good (or fine) abode.' Plutarch's translations (de Iside et Osiride, 20), δρμος άγαθῶν, 'landing-place of the good,' and 'tomb of the good god' (i.e. Osiris), are erroneous, betraying little knowledge of Egyptian. The vernacular shortening was Mennefe, Menfe, in the Coptic period Menbe, Membe, Memfi, but more frequently Mefe (Arab. Māfe, more commonly Menf). These shortened forms passed over into many languages: Assyrian, Mempi, Mimpi; Greek-Latin, Memphis (hence Targunic Mēphis), etc. The Heb. renders the most abridged form Meph(e). The corruption Noph is, perhaps, due to an attempt at taking γ2 for γ3, and, subsequently, shortening this.—The sacred name of Memphis, preferred especially in the religious texts of the Egyptians, was Ila(t)-ka-ptah, 'the abode (or temple) of the likeness of god Ptah,' whence the designation of all Egypt as At-γυ-πτοs, E-gy-pt, seems to have arisen.

Memphis was one of the most ancient cities of Egypt, at least near it was the earliest residence of those Pharaohs who ruled over both Upper and Lower Egypt. Herodotus (ii. 99) reports that the earliest historical king Menes (before 3000 B.C., an accurate determination of the date will never be found) built M. after winning the ground from the Nile by an immense dyke, still existing in Herodotus' time, 100 stadia (i.e. almost 12 miles) south of M., and completely changing the course of the river (?). Menes, Herodotus says, built the temple of Hephæstus (i.e. Ptah). This tradition is now supported by hieroglyphic inscriptions as old as the 14th cent. B.C., claiming indeed king Mena, Meni, as founder of that most ancient and most important temple, the Ha(t)-ka-ptah or 'sanctuary of Ptah.' Diodorus attributes the foundation of M. to a king Uchoreus, a name admitting of no certain identification. The name Memphis originated from a new suburb which grew up to the west of the original city, around the pyramid of king Pepi (Apopi) I. of Dynasty 6 (c. 2700 B.C.?), that pyramid being called Mennofer, 'good abode' (see above).

We can observe that before this time the city, or at least a large part of it, was shifted repeatedly over a space of several miles. Most kings liked to build a new palace, and around it their 'own city.'

Consequently it might be disputed if this changing series of cities and suburbs can properly be called Memphis. But if the name is not old, and the situation was as unstable as that of many Oriental cities, the religious centre, the temple of Ptah,

always remained the same.

The city extended on the western bank of the Nile over an area of 150 stadia (more than 17 miles) from N. to S., according to Diodorus. From E. to W. the diameter cannot have been more than 3 miles. The names of several quarters are known: the quarter of Sokari(s) (now Sakkara), near the desert in the west, touching the necro-polis, a part of which was called *Ko-kome* ('of the black bull'). The 'White wall' was the chief part of the city, with the citadel, always occupied by a strong garrison. Another quarter was Makhatoni, 'the balance of both countries.' Ankh-toni, 'the life of both countries,' in the E. was on the bank of the Nile, a quarter rich in temples, but also in pleasure-places, a temple of the Syrian goddess Astarte combining both functions. This part was inhabited by a mixed population. The part was inhabited by a mixed population. Inclassical writers (above all Herodotus, about 450 R.C., and Strabo, 24 R.C.) give very impressive descriptions of the several large temples, especially of the old 'sanctuary of Ptah-Hephæstus,' remarkable for immense statues (75 feet) standing before it. Almost every king had built here; the largest part of the various constructions seems to have been due to the greatest builder of ancient Egypt, Ramses II., the Sesostris of the Greeks. Canals crossed the city; an artificial lake was in the western part.

The chief local god of Memphis was Ptah, the former of the world, whose high priest had therefore the name 'the great workman.' Other divinities were, e.g., the lion-headed goddess Sokhmet, the Egyp. Asclepius Imouthes (I-m-hotep), Nefer-Atum, etc. The western suburb had its own local god Sokari, a hawk sitting in a kind of skedge, later assimilated to Osiris, the god of the dead. The Serapeum, described by Strabo (p. 807), was in this quarter. The worship of Apis (Hap), the sacred animal of Osiris-Sokaris—according to popular belief the incarnation of this god himself—had its own temple opposite the great temple of Ptah. The Apis was a black bull with certain white spots and other marks-the description of which, by the classical writers, e.g. Herod. ii. 153, does not agree with the monumental evidence. Also the cow, which had been mother of an Apis, was adored in a special temple. Sometimes all Egypt was searched for a new Apis for a long time. The discovery, the bringing to Memphis, and the solemn enthronization were public festivals of the highest rank, immense sums being frequently contributed by the kings for the celebration. Likewise the death of the Apis was followed by public mourning and a splendid burial in the large crypt at Sakkara. Mariette found there, in 1859, sixty-four embalmed bodies of sacred bulls and cows. The goddess Isis had a remarkable temple, finished by king Amasis (c. 550 B.C.)

Memphis owed its importance chiefly to its situation near the southern angle of the Delta, where the Libyan mountain-ridge in the W. almost meets with the Arabian mountains in the E. It

thus commanded all Egypt, just as Cairo does at present. Dynasties 3, 4, 6, 7, 8 are reported to have been Memphitic. The city continued to be the unrivalled metropolis down to Dynasty 18 (beginning about 1650 B.C.) Dynasties from Upper Egypt, as, e.g., 11 and 12 (from Thebes), could not disregard it; also the foreign invaders, called Hyksos or 'shepherd kings,' seem to have resided here. Only during Dyn. 18 to 20 (to c. 1100 B.C.)

Thebes, as residence of the kings, rivalled success-

fully Memphis for splendid buildings. Yet M. continued to be the most populous city, and became again the residence of the Pharaohs until the end of Egypt's independence (525 B.C.), although it was frequently ravaged by war, e.g. when the Ethiopian conqueror P(i) ankhi (about 750) took it by storm. It experienced the woes threatened by the prophets of Israel repeatedly at the hands of the Assyrians under Esarhaddon and Assurbanipal, last and worst in 525 B.C. at the hands of the Persian king Cambyses. Under the Persian rule it was the stronghold of a powerful Persian garrison, and proved to be the key of Egypt in the various rebellions against the Persians, suffering especi-ally from the Persian king Ochus after the last revolution. The foundation of Alexandria made M. the second city of Egypt, but the Ptolemies and the governors of the Roman and Byzantine lords used it as a second capital. The deathblow was dealt to it by the Arab conquest and the foundation of Old Cairo (Fostat) in 638 A.D. The Arabs employed the stones of the ruins (which are described by Abulfeda in the 14th cent. as still being very extensive) for building up the new city, and, later, Cairo. Therefore the present site does not indicate the former size (marked by Kum el-Azizyeh in the N., Bedrashen in the S.) and splendour. That the poor modern village of Mitrahineh occupies the centre of M. and the site of the celebrated temple of Hephæstus, is indicated only by the fallen stone colossus of Ramses II. (originally 43 feet high). Mariette's excavations produced only insignificant fragments of this temple, and showed that the destruction of the whole city has been very complete. But the immense necropolis at the west of M., on the borders of the Libyan desert, still extends from Abu-Rosh in the Libyan Dashur in the S. The gigantic royal tombs, the pyramids, attract numerous visitors from the whole world. Usually, only the most remarkable group of pyramids (those of Khufu, Khafrē, and Menkarē of Dyn. 4 [in Herodotus, Cheops, Chepharar and Menaroll et Girch are residently to the content of the conte ren, and Mycerinus]) at Gizeh are visited; about 50 other pyramids of smaller size or still more dilapidated are less known (those at Sakkara, belonging to Dyn. 6, and of Dashur of Dyn. 4, being most remarkable). The immense sphinx at Gizeh (prob. a work of *Khafrē*-Chephren, although recently some scholars place it in Dyn. 12), and many private tombs, the latter much destroyed, contribute to make the site of ancient M. still remarkable.

W. MAX MULLER. MEMPHITIC YERSION. - See EGYPTIAN VER-

MEMUCAN (Est  $1^{14.16.21}$  אָסמוּסָ, ן סוסט  $v.^{16}$  Kethibh ; in vv. 16. 21 BA have Moυχαΐος; in v. 18 80. Maμουχαΐος; in v. <sup>21</sup> κ\* has εὐνοῦχος, κ° · δ Μούχεος, κ° · δ Μαμούχεος; in v. <sup>14</sup> LXX om.; Mamuchan).—One of the seven princes of Persia who held the highest rank in the kingdom, and had access to the royal presence (see ADMATHA). These men, who formed the king's council, are represented both as astrologers ('wise men, who knew the times') and as authorities on all questions of law and custom. When Ahasuerus consulted his counsellors with regard to the conduct of Vashti in refusing to come to the banquet at his bidding, Memucan was the first to speak. He represented that the queen's example was likely to be followed by all the princesses of Media and Persia, and recommended that she should be deposed from her royal dignity, and that a decree should forthwith be published enjoining upon all wives to give due honour to their own husbands. This advice pleased the king, and was at once carried into effect (Est 1<sup>18-29</sup>).

H. A. WHITE.

MENAHEM (Doppe 'consoler': Μαναήμ, Α Μαναήν,

the latter form being the same as is found Ac 131). The history of Menahem is recorded 2 K 15<sup>13-23</sup>. He is there called 'son of Gadi' (Heb. '71, LXX Gadi is most likely the name of his father, but it is possible that 'son of Gadi' may mean that he was a member of the tribe of Gad, many of whom had become regular soldiers in consequence of the harrying of the East Jordan land in the long course of the Syrian wars (see 2 K 152, and cf. Stade, Gesch. des V. Isr. i. 576). During the six months' reign of Zechariah, the last king of the house of Jehu, Menahem seems to have been one of the foremost generals; and when Shallum conspired against and murdered Zechariah, Menahem was in command at Tirzah, once the capital of the northern kingdom and still an important military post. Menalem did not acquiesce in Shallum's usurpation. He marched from Tirzah to Samaria, defeated and slew his rival, and mounted the throne. According to the MT of v. 16 his next move was against Tiphsah, which refused to admit him. He took it by storm, slaughtered the inhabit-ants, and treated the unhappy women with the atrocious cruelty too common in those days. In several particulars the text of this sixteenth verse is corrupt, and there can be little doubt that it is so in respect of the town-name. The only city of Thapsacus, on the Euphrates (I K 424 [Heb 54]). Rawlinson's suggestion (Speaker's Comm. in loc.) that an expedition thither by Menahem would be the natural sequel to Jeroboam II.'s occupation of Hamath, is condemned by the fact that Menahem's position at home was too insecure for him to venture far afield. On the other hand, we need not assume the existence of a Tiphsah in the land of Israel, unmentioned in any other passage. The LXX, which has Θαρσειλά in v.<sup>14</sup>, here reads Θερσά (Α Θαιρά). It is not difficult to believe that in those disturbed times, when no one knew who would ulti-mately come ont at the top, Tirzah closed its gates behind Menahem as soon as he marched out against Shallum, and was therefore visited with bloody vengeance when he forced them open again. On this view we should read arra instead of noon, and omit מַּקְּרְנָה as a clerical error. The other alternative is to adopt Thenius' conjecture, and, with the minimum of alteration, read men for morn; the town thus named, Tappuah, being on the boundary between Ephraim and Manasseli, Jos 168 177.8 (cf. Benzinger, Könige, in Marti's Handkomm.). keen sense of the evil and misery of these days of internal strife is best gained from such writings as Hos 77 84, Is 919-21.

It was in the short and troubled reign of Menahem that the Assyrian invader first set foot in the Holy Land. 'There came against the land Pul the king of Assyria' (2 K 15<sup>19</sup>). Schrader (COT'') i. 222, 230) has shown that this Pul, the H\$\tilde{\text{H}}\$ops of the Ptolemaic Canon, and Tiglath-pileser III. of the cuneiform records, are identical, that probably 'when he became ruler he exchanged the name Palu, which belonged to him as a subject, for the other name Tuklat-abal-íšarra. Yet the earlier and original name was perhaps the most popular one. It was that under which he first hecame known to the Israelites.' The books of Hosea and Isaiah exhibit a deep and abiding division between an Egyptian and an Assyrian party in Israel. It is possible that at this crisis the king and his faction actually solicited the interposition of Assyria. Tiglath-pileser's own account would look as though he came unsolicited, sweeping Israel, along with the other states of Western Syria, into his net. In III R 9, No. 3, lines 50-57, he enumerates 'the tribute of Kushtashpi of Kummuch, Rezin of Damascus, Menahem

of Tyre,' and many other petty kings (see Winckler, Keilinsch. Textbuch, pp. 17, 18; cf. Schrader, COT<sup>2</sup> i. 284). In any case, Menahem succeeded in inducing Tiglath-pileser to accept him as a vassal, and it may well have been his policy on this occasion that evoked the prophet's reproaches, Hos 5<sup>18</sup> (cf. 7<sup>11</sup>) 8<sup>8</sup> 10<sup>6</sup> (cf. 12<sup>4</sup>) 14<sup>8</sup>.

The retard we which Members met his suggestive.

The method by which Menahem met his suzerain's demand for money has thrown light on the economic condition of the kingdom. 'Menahem gave Pul a thousand talents of silver that his hand might be with him. . . . And Menahem exacted the money of Israel, even of all the mighty men of wealth, of each man fifty shekels of silver' (2 K 15<sup>19.20</sup>). That is to say, there were 60,000 'men of means'

in the land.

The mention of Menahem on Tiglath-pileser's list of tributaries enables us to fix his date with a the number of years assigned to him in v.17. The Assyrian list is of the year B.C. 738. Pekah, who succeeded Menahem's son, Pekahiah, after the latter had reigned two years, occupied the throne in 734. The Assyrian invasion must have occurred not very long after Menahem had seized the reins; otherwise he would not have been so eager to utilize it for the confirmation of his authority. Hence the dates given for Menahem in the art. Chronology, vol. i. p. 401 of this Dictionary, are more probable than Wellhausen's (IJG<sup>2</sup> p. 80) view that Menahem seized the kingdom in 745, or even than that of Kautzsch (Hist. of OT Lit., Eng. trans., p. 185), who gives 743-737. Three or four years, not ten years, must have been the extent of his reign. And that was quite long enough. was a military adventurer, who reigned for him-self, not for his people, and did nothing to heal the sores of the land. The prophecies of Hosea present us with an all too vivid picture of the drunkenness, debauchery, injustice, oppression, superstition, as well as of the confused and fluctuating politics of And if it is unsafe to fix on individual the time. traits as belonging specifically to Menahem's reign, we are at all events quite justified in forming our general idea of the character of the reign from the dark picture which the prophet paints. Menahem seems to have died a natural death. He was the last king of Israel who was succeeded on the throne by his son.

One of the best sketches of Menahem and his rule is that given by Kittel (Hist. of the Hebrews, ii. 332-337), although it is difficult to understand the reason for the assertion (p. 332), 'Of the few kings of the kingdom of Ephraim who died a natural death, Jeroboum II. is the last.' Benzinger (Könige, 167, 168) is excellent; and Stade (Gesch. des V. Isr. i. 576) is still worth reading. See also his discussion of the text of v. 16, ZAW, 1886, p. 160.

J. TAYLOR. this chapter is similar to that in ch. 2: by performing one part of it Daniel certifies the correctness of his performance of the other part. Here, by deciphering what no one else can read, he gains credit for his explanation and application of the The author does not state wherein lay the words. difficulty of reading the words on the wall, none of the many guesses on this subject made in ancient and modern times is worthy of attention. Clearly, however, the writing must have been, in the author's intention, of a kind with which the king and his wise men were familiar, though in tashpi of Kummuch, Rezin of Damascus, Menahem this particular case they were unable to read it. of Samaria (Mi-ni-hi-im-mi Sa-mi-ri-na-ai), Hiram It requires no flight of the imagination to conceive

such a case. The CIS contains numerous specimens of Phonician and Neo-Punic texts, which, owing to careless writing or ignorant transcription, still baffle the ingonuity of decipherers; and the same is the case sometimes with Greek cursive. Yet these alphabets are not more liable to become unintelligible than that Aramaic cursive which was probably in 'Daniel's' mind, and of which we have specimens in the Blacassian papyri. When such texts are read, those who are familiar with both script and language can easily see whether the readings are right or wrong. The test of Daniel's ability, though not equal to that given in ch. 2, was therefore still considerable.

Daniel's interpretation and application of the words occupy vv. 26-28, where it is noticeable that the readings differ slightly from those given in v. 25. Meno appears only once, and the singular  $per\bar{e}_i$  is substituted for the plural  $par_in$ . The texts of Theodotion and Jerome bring  $v.^{2\delta}$  into agreement with  $vv.^{2\delta-2\delta}$ , in the opinion of many critics (cf. Peters in JBL xv. 116) rightly. The general principle of Daniel's interpretation is to render principle of Daniel's interpretation is to render each word twice (as Hitzig observes). This appears most clearly in the case of the last word, which is made to mean 'thy kingdom is broken up and given to Media and Persia,' a rendering which suits parsin if interpreted (1) as 'fragments' (Ewald and others) or 'they break' (Hitzig and others); (2) as 'the Persias.' The Persias, according to the writer, stands for Media and Persia, just as with the Arabs 'the Euphrateses' [dual] means the Tigris and the Euphratese, 'the Basras' [dual] means Basra and Kufa (Vennier, Grammaire Arabe, § 288). The second word means 'weighed' (from tkl) and 'thou art light' (from kll). The first word is apparently made to mean 'counted' first word is apparently made to mean 'counted' and 'handed over' (השלכה), the second sense being perhaps given it on the authority of Is 65<sup>12</sup> (where for אשלם) the Targ. has אמסר, a synonym of hitzig suggests that the second sense of měnē, 'completed,' is got from the similar mělê, 'full.' The grammar of the second word suffers somewhat in this interpretation, since ppn should be not in may be in the first sense.

It might seem that this explanation of the words must be certainly right, since either the whole harst be certainly light, since etiate the whole narrative is the author's invention, or, if it be historical, Daniel's explanation was found satisfactory by those likely to know. There is, however, a third possibility, viz. that an actual inscription found on the walls of the palace at Babylon, or at any rate found somewhere, was worked by the author of Daniel into this dramatic scene, and arbitrarily explained. Somewhat similarly Epiphanius (adv. Hær. xix. 4) produces the saying of the Arabic prophet Elxai and interprets it quite wrongly; it was left to M. A. Levy to interpret the words correctly in 1858 (ZDMG xii. 712). In the case of the words in Daniel there is something in favour of such a supposition. Besides the grammatical difficulty in the case of the second word, the uncertainty as to signification in the case of the first, and its actual repetition, make the principle of rendering each word twice resemble the artifice of an interpreter rather than what was actually intended by the author of the inscription. But if that principle be abandoned, the words 'counted, weighed, and fragments' are not sufficient to justify the gloss; for the word 'weighed' by no means implies that the weight is deficient, any more than 'counted' implies that the weight is deficient, any more than 'counted' implies that the number is complete. Moreover, if the author was composing a suitable death-warrant for Babylon, it is probable that he would have given a sentence which would be clear, or a quotation which would be appropriate. But if he is not the author of the inscription, these difficulties may

conceivably be got rid of by a better interpreta-

A suggestion for a fresh rendering of the words A suggestion for a fresh rendering of the words in Dn was made by Clermont Ganneau in the Journal Asiatique for 1886 (Sér. viii. vol. i. 36; translated in Hebraica, 1887), which was followed up by T. Nöldeke (ZA i. 414-418), G. Hoffmann (tb. ii. 45-48), P. Haupt (John Hopkins Univ. Circ. No. 58, p. 104), Bevan (Dan. 106 f.), and J. D. Prince (Lower of the American Oriental Society vi (Journ. of the American Oriental Society, xv. clxxxii-clxxxix). He regarded the words in the text as the names of weights, 'a Mina, a Mina, a Shekel, and [two] Peras.' The word peras is used in Jewish writings for 'a half,' especially 'a half mina.' This discovery seemed to shed some light on the difficulty of reading the words, which could all be represented by ideographs; though it is not clear why the wise men of Babylon should have been puzzled by such common signs. It also seemed to give an explanation of těkět which did not violate grammar (though this is not certain). Otherwise this discovery seems to give little help. For, besides the improbable character of the sum (which would be like £1, 1s., some £3), how came it to be connected with the fall of Babylon? Clermont-Ganneau therefore practically abandoned his discovery as soon as made, and offered a variety of renderings, of which 'Mina by Mina weigh the Peras' may be given as an example. Haupt, who adopted the rendering 'there have thought these weights stood symbolically for Nebuchadnezzar, Belshazzar, and the Medes and Persians. But it is incredible that this, if correct, could have escaped the author of Dn 2; and for a

death-warrant it is by no means dramatic.

We are driven back therefore to Daniel's explanation of the first two words as verbs, which, if we had the inscription on stone, we should probably render 'he has counted, counted, weighed.' It is curious that the third word ord has in the Targum a sense which is very similar to that of the preceding two, i.e. 'to assess' (for the Heb. דעריך in Lv). The reading of vv. 26-28 would therefore be naturally rendered 'he has counted, weighed, assessed,' and that of v. 26 'he has counted, counted, weighed, and they assess.' The first of these reads like a commercial formula with which goods might be labelled, implying that they were ready for immediate delivery; while the second might be a description in technical language of a sale in which the salesman gives an accurate description of the goods, for which the buyers offer a price. The interpretation given in vv. 28-28 would in either case the words of a formula which as a whole was a symbolical description of the occasion.

If the inscription given in Dn 5 be historical, it is probable that some euhemeristic explanation of its appearance, such as Prince suggests, should be adopted. The historical character of the name Belshazzar leads us to seek for more elements of fact in this chapter than in the rest of the Aramaic portion of the book; and if it could be made out that the inscription had been misunderstood by the writer, there would be some probability in favour of its authenticity. It must be confessed, how-ever, that the assumption that the inscription is by a different hand from that of the rest of the book opens a wide field for conjecture.

D. S. MARGOLIOUTH. MENELAUS (Μενέλασς).—A usurping high priest in the time of Antiochus Epiphanes. According to Josephus (Ant. XII. v. 1) he was originally named Onias, and was a brother of Onias III. and Jason; but the account in 2 Mac, which is probably more trustworthy, states that he was a Benjamite, a brother of Simon, the guardian of the temple, who

had instigated the attempt of Heliodorus to plunder the treasury (2 Mac 423, cf. 34). In B.C. 171 Menelaus was sent by Jason to convey his promised tribute to Antiochus, and by offering the king a still larger bribe secured the high priesthood for himself. When Menelaus was established in Jerusalem this money still remained unpaid, and, a dispute on this matter having arisen between him and Sostratus, the Syrian commandant, they were both summoned to appear before Antiochus (2 Mac 4<sup>23, 24</sup>). When they arrived in Antioch, the king was absent in Cilicia. Menclaus therefore took the opportunity to secure the support of the vicegerent Andronicus by means of rich presents, which were commonly supposed to have been stolen from the temples. He also persuaded Andronicus to murder treacherously the ex-high priest Onias III., who had taken refuge in the sanctuary at Daphne (vv. 81-88). Meanwhile the misconduct of Lysimachus (wh. see), the deputy left by Menelaus, had led to a serious riot at Jerusalem, and the Jews sent a deputation to meet the king at Tyre, and to make formal complaints against the high priest. Menelaus, who seems to have remained in Syria, again had recourse to bribery, and having won over an influential courtier, Ptolemy the son of Dorymenes, he secured both his own acquittal and the execution of his accusers (vv. 89-50). During the Egyptian expedition of Antiochus (B.C. 170), Jason attempted to regain his former position, and, suddenly attacking Jerusalem, forced his rival to take refuge in the citadel. Antiochus treated this take refuge in the citadel. Antiochus treated this attack as an act of open rebellion. He marched on Jerusalem, gave orders for a terrible massacre, and plundered the temple of its most sacred treasures, receiving (it is said) in this sacrilege the assistance of Menelaus himself (ib. 5<sup>5-16.221</sup>, ef. 1 Mac 1<sup>20-24</sup>). Menelaus was confirmed in power, but often the second attack of the Springer of the second attack of the second a 1 Mac 1<sup>20-24</sup>). Menelaus was contirmed in power, but after the second attack of the Syrians on Jerusalem (1 Mac 1<sup>20-24</sup>, 2 Mac 5<sup>23-26</sup>) we hear no more of him till the next reign. We do not know who exercised the office of high priest after the victories of Judas. But in B.C. 162, either before (2 Mac 13<sup>3-6</sup>) or after (Jos. Ant. XII. ix. 7) the campaign of Lysias and Eupator, Menelaus met his death. He had incurred the anger of the Syrian chancellar, who represented him as the Syrian chancellor, who represented him as the cause of all the troubles in Judea. He was accordingly sent by the king to Berga, a town between Hierapolis and Antioch, and there executed. According to 2 Mac l.c. he was carried to a certain tower, and thrown down into the ashes with which it was filled -a fitting retribution for one who had so grievously descrated the holy altar at Jerusalem (cf. Rawlinson on 2 Mac in Speaker's Comm.; Schürer, HJP I. i. 204 f., 225 f.).

H. A. WHITE.

MENESTHEUS (Mereσθεύs B and prob. A; Mnestheus).—The father of Apollonius, a general of Antiochus Epiphanes and chief collector of tribute (2 Mac 4<sup>21</sup>, cf. 5<sup>24</sup>, 1 Mac 1<sup>29</sup>). In the RV of 2 Mac 4<sup>4</sup>, on the strength of a conjecture of Hort's in a difficult passage, mention is again made of Apollonius the son of Menestheus (reading Mereσθέως for μαίνεσθαι ξως), but the person there intended seems rather to be Apollonius the son of Thrasæus (cf. 3<sup>5</sup>). See, further, under APOLLONIUS.

H. A. WHITE.

MENI (12); ἡ τύχη [but in some MSS, the renderings of 120 and 13 being interchanged, ὁ δαίμων οτ τὸ δαίμων ο]; Aq. Theod. μεινει; Vulg. omits; Targ. μπάνη their object of fear [i.e. their false god]; Syr. combining both clauses, κ¹1 fortunes).—In Is 6511 the name of a divinity, worshipped by the Israelites, 'But ye . . . that prepare a table for Gad (Fortune), and that fill up mingled wine unto Mění (Destiny); 13 I will destine ("מִינִייִן") you to the sword, 'etc. The root πμρ means in Heb. to number,

in Arab. to assign, apportion (cf. Heb. np a portion); and there is little doubt that Měnī (properly, that which is apportioned or destined) was a personification of destiny, and was a male deity corresponding to Manât, one of the 'daughters of Allah,' a great stone worshipped by the old heathen Arabians (see particulars from Ibn Kalbi and others in Wellh. Reste Arab. Heid. 22-25 [2, 25-29]), and mentioned in Koran 532, and also to maniyya (plur. manâya, manâ), an expression for fate (fates) used by Arabic poets. Manât—or rather (Nöld. ZDMG, 1887, p. 709) its plural Manawât, 'the fates'—occurs also in the Nabatæan inscriptions of Higr, at about the period of the Christian era, as the name of one of the gods worshipped by the Nabatæans (Euting, Nab. Inschr. 28 34 8 98 208 2712 [= CIS II. i. 1972, 1984 8 etc.; add also 320 F, and 2711 the n. pr. nddly]: 'mdd). The name Meni itself has been supposed to occur in the pr. n. 'dound on some of the coins of the Achæmenidæ (Rödiger, in the app. to Ges. Thes. p. 97); and also in the inscription on an altar at Vaison in Provence (Orelli Henzen, 5862), 'Belus Fortunæ rector, Menisque magister' (where Belus, as the parallel Greek inscription shows, is the Bel of Apamea in Syria), quoted by Mordtmann, ZDMG xxxix. (1885) p. 44.\* As Jewish tradition identified Gad with the planet Jupiter, and Arab. astrology called Jupiter the greater fortune, and Venus the lesser fortune, it has been conjectured (Ges., Del., Cheyne) that Meni denoted Venus.

S. R. DRIVER.

MENNA (Merrá, Tisch. Treg. WH; Maïrár TR,
hence AV Menan).—An ancestor of Jesus, Lk 3<sup>31</sup>.

MENUHAH (בְּנִינְהָה).—In Jg 20. 'They enclosed the Benjamites . . . (בְּנִינְהָה) menuhah hidrikhuha)'; AV 'trode them down with ease' (AVm 'from Menuchah'), RV 'trode them down (RVm 'overtook them') at their resting-place' (RVm 'at Menuhah'); B ἀπὸ Νουὰ κατὰ πόδα; Vulg. nec erat ulla requies morientium. We should perhaps read מַנְיִּנְהָּיִנְ, Manahath (which see), or better מַנְיִּנְנָהְ (from Nohah.' In 1 Ch 8' Nohah (which see) is a clan of Benjamin. Cf. Moore, 'Judges' in Internat. Crit. Comm.; Kittel in SBOT; Budde, Kurzer Hund-Comm. zum AT. W. H. BENNETT.

## MENUHOTH.—See MANAHETHITES.

MEONENIM, OAK OF (RVm 'The augurs' oak or terebinth,' AV [wrongly] Plain of M., AVm '(Plain of) the regarders of times' [cf. Dt 18<sup>14</sup>]; Heb. Γιμήν κ, Α δρινός ἀποβλεπόντων, Β 'Ηλωνμαωνεμείν; Vulg. quæ respicit quercum.—Only in Jy 9<sup>27</sup>, where Gaal tells Zebul that he sees troops approaching, 'and one company cometh by the way of the oak of Meonenim.' Με' οπέπι is masc. pl. participle Polel (possibly a denominative from 'απαπ, 'cloud'), which occurs as a common noun, Dt 18<sup>10, 14</sup>, Mic 5<sup>12</sup> (Heb. 11), AV 'diviners,' 'soothsayers,' RV 'them that practise augury,' 'soothsayers.' Other forms of the verb occur Lv 19<sup>26</sup>, 2 K 21<sup>3</sup>, 2 Ch 33<sup>3</sup>, Is 2<sup>5</sup> 57<sup>3</sup>, Jer 27<sup>3</sup>. Με' οπέπι were a class of diviners, whose character is uncertain, the connexion with 'απαπ being perhaps only an accidental resemblance (see SOOTHSAYER).

Sacred trees at or near Shechem are mentioned: Gn 126 JE 'Abram passed through the land unto the place of Shechem, unto the oak (n'x) of Morch' (see MOREH); Gn 356 E, Jacob buries the family images under the oak (n'x) which was by (cy) Shechem; Jos 2426 E, 'the oak (n'x) that was in

\*On the possible occurrence of the name in Assyrian, see Johns in the Exp. Times, June 1899, p. 423 (the Egyptian-looking proper name Puti-mani), and Aug. p. 526 f. (a deity, 'Manu the great,' worshipped in the city of Asshur, III R. 66 2, 3), and Hommel, & Sept. p. 566 f. (Manacott also Minman).

the sanctuary of J",' under which Joshua set up a stone, i.e. a mazzēbhāh; Jg 96' the oak of the pillar (RVm 'garrison,' באָרָן הַאָּלוּן בְּאָנָי (RVm 'garrison,' באָרָן הַאָּלוּן) that was in Shechem.' Instead of אָרָן read הַאָּרֶר, so that this oak is the same as the preceding. Generally, some or all of these five references may be to the same tree; the use of different terms is no objection, as אלון and קֹאָם are used loosely for trees of the same kind, and אָלָה is mistaken pointing for אָלָה; the trees in Gn 354, Jg 937 seem to stand outside Shechem; and if so, the references are not to the tree 'in Shechem' in the other passages. But (Moore, Internat. Crit. Comm., ad loc.) 'there is no reason why there may not have been three, or a halfdozen, well-known sacred trees in the vicinity of Shechem.' There is nothing to indicate the exact position of the Oak of the Me'onenim.

W. II. BENNETT. **MEONOTHAI** (τηλης : Β Μαναθεί, Α Μαναθί).—Son of Othniel, 1 Ch 4<sup>14</sup>. See GENEALOGY, IV. 48.

MEPHAATH.—A city of Reuben, Jos 1318 (הַנֶּטֶה ; MEPHAATH.—A city of Kethen, Jos 13" (πυρς); Β Μαιφάαθ, Α Μηφάαθ); assigned to the Levites, Jos 21<sup>37</sup> (πυρς); Β Μαφά, Α Μασφά), 1 Ch 6<sup>79</sup> (Heb. <sup>64</sup>, πυρς); Β Μαέφλα, Α φαάθ); a Moabite city in Jer 48<sup>21</sup> (Κετhίδh πυρς), Κέτθ πυρςς; LXX [31<sup>29</sup>] Β Μωφάς, Α Μωφάθ). On the name see D. H. Müller, ZDMG, 1876, p. 679; 1883, p. 362. Μερhanth is noticed with Kedemoth and Jahaz, and lay experently to the south of Reuben. In and lay apparently to the south of Reuben. In the 4th cent. A.D. (Onomast. s.v.) it is said to have been the station of a Roman garrison near the desert. C. R. Conder.

of Ishbosheth was Eshbaal (man of Baal), so Mephibosheth is a transformation of the original name Meri-Baal or Merib-Baal, which has been variously rendered 'Baal's man,' 'Baal contends,' or 'Baal's warrior.'\* As in the case of Ishbosheth, it is the Chronicler who has preserved the true name (1 Ch  $8^{34}$  [B Μεριβάαλ, A Μεφριβάαλ] and  $9^{40}$  [B Μαρειβάαλ]. A Μεχριβάαλ]. The reason why Baal was thus transformed into Bosheth has been already ex-

plained. See ISHBOSHETH.

Upon David's accession to the throne, it would have been quite in accordance with Oriental custom if he had exterminated the family of Saul. (Compare the conduct of Athaliah in 2 K 111). His friendship for Jonathan led him, however, to follow a different course. With Ishbosheth had perished the last of Saul's sons by wives of the first rank, and with the exception of Jonathan none of them seem to have left any issue, although we read in 2 S 218 of sons of Saul by his concubine Rizpah, and also of grandsons, the children of his daughter Merab. Once David was firmly established upon the throne, he ascertained by inquiry of Ziba, who had been the steward of Saul, that a son of Jonathan named Merib-baal (Mephibosheth) still survived (2 S 9<sup>nr</sup>). This son of his most intimate friend could all the more safely be spared by David, as his bodily condition made him of little account in a warlike age, and precluded the possibility of his proving a dangerous rival. From 2S 4 we learn that in the hurried flight of Saul's household, when tidings came of the defeat at Gilboa, M., who was then five years old, sustained

\* See Gray, Heb. Proper Names, p. 200, n. 3, and Kittel (in SBOT) on 1 Ch 3\$4, who both hold that כָּוִל ('man or hero of Baal') is the original form, Kittel offering as an alternative rendering 'my lord is Baal' (cf. CIS i. 111). On the other hand, Nestle (Eigennamen, p. 120f.) adopts the form קרים בעל. The change of '''' into 'pp (hesides that of 'yp into ng'n) was probably intended still further to disguise the original form of the name, תְּלְיבְיְהָה being probably taken to mean 'one who scatters or disperses shame' (Driver, Heb. Text of Sam. p. 195).

such injuries through a fall, that he became permanently lame. Since his uncle Ishbosheth's death, he had been living in concealment at Lo-debar to the E. of the Jordan. It was probably not without trepidation that he obeyed the summons to court, and, in answer to David's promises of protection and favour, he could only reply with true Oriental self-depreciation, What is thy servant that thou shouldest look upon such a dead dog as I am?' (2 S 98). As a pledge of the sincerity of his promises, the king restored to Jonathan's son all the personal estates of Saul, Ziba being appointed to administer these for the benefit of M., who was himself maintained as a permanent guest at the king's table (2 S 913). This latter arrangement commended itself from the point of view both of

friendship and of policy.

The next mention of M. is during the troublous period when, in consequence of Absalom's rebellion, David had to abandon Jerusalem. At the Mount of Olives the king was met by Ziba, who brought a couple of asses laden with bread, bunches of raisins, cakes of dried fruit, and wine, which he offered for the use of the royal household. In answer to the question, 'Where is thy master?' Ziba declared that M. had preferred to remain in Jerus. in the hope that the kingdom of Saul would be restored to him. It was an unlikely story, for M. had surely less to expect from Absalom than from David; yet it served its purpose, and the crafty Ziba had the satisfaction of hearing David say, 'Behold, thine is all that pertaineth to M.' (2 S 164). When David returned to Jerus. after the defeat and death of Absalom, M. came to congratulate him; and being met with the stern question, 'Wherefore wentest thou not with me, M.?' proceeded to exculpate himself and to accuse Ziba of fraud. David's flight, he alleged, had occasioned him the acutest grief, and in token of mourning he had not trimmed his beard nor washed his feet or his clothes from the time the king left his capital till he returned to it. Nay, he had intended to accompany his benefactor, but Ziba had taken advantage of his helplessness, and, instead of saddling an ass for him to ride after David, had bavid's answer seems a strange one, 'Why speakest thou any more of thy matters? I say, thou and Ziba divide the land.' It would seem as if he only that believed M., or at least despaired of reaching the truth. Ziba might have been faithful to David, simply because he felt sure of being on faithful, and the king felt in no mood to reproach him. The easiest way was to compromise the matter, leaving the steward and the master each in possession of half the profits of Saul's estates. A strange way of doing justice from a European but not from an Oriental point of view! M., who always makes a favourable impression upon us, and who seems to have inherited the warm heart and generous disposition of his father Jonathan, replied, 'Yea, let him take all, forasmuch as my lord the king is come in peace unto his own house

According to 2 S 912 Mephibosheth had a son named Mica (אִיכָּא), from whom seems to have sprung a family afterwards well known in Israel (1 Ch 838

9<sup>41</sup> [πρ., Micah]).

2. One of the sons of Rizpah handed over by David to the Gibeonites for execution (2 S 218).

J. A. SELBIE. MERAB (33%; 1 S  $14^{49}$  B  $Me\rho\delta\beta$ , A omits; 1 S  $18^{17-19}$  B omits, A  $Me\rho\delta\beta$ ).—The elder daughter of Saul. According to the later of the two documents in 1 S, Saul promised his daughter to the slayer of Goliath (1 S  $17^{26}$ ). This promise, however, was afterwards ignored, and Saul is represented as trying to bring about David's destruction by offering him Merab's hand as a reward for his military services against the Philistines (1 S 18<sup>17</sup>). But, though David successfully carried out the task which the king had set him, Saul failed to keep his promise, and Merab became the wife of Adriel the Meholathite. In the earlier document nothing is known of this incident in connexion with Merab, but only of the affection of Michal, Saul's second daughter, for David. In 2S 21<sup>18</sup> Michal is clearly a mistake for Merab, whose five sons were delivered by David into the hands of the Gibeonites, by whom they were slain and 'hanged before the Lord.' See, further, art. MICHAL.

J. F. STENNING.

**MERAIAH** (ητης; Β Μαρεά, Α Μαριά).—The representative of the priestly house of Seraiah in the days of Joiakim, Neh 12<sup>12</sup>.

MERAIOTH (Μρη).—1. Son of Ahitub and father of Zudok, 1 Ch 911 (Β Μαρμώθ, Α Μαριώθ), Neh 1111 (AB Μαριώθ). 2. A Levite, or a Levitical family name, 1 Ch  $0^{6t}$ . [Heb.  $5^{32t}$ .]  $^{52}$  [Heb.  $^{87}$ ], Ezr  $7^{8}$ . In the first two of these passages B has Μαρειώλ, Α Μαραιώθ and Μεραώθ, in the third B has Μαρερώθ, Α Μαραιώθ. This Meraioth is called in 1 Es  $8^{2}$  Memeroth and in 2 Es  $1^{2}$  Marimoth. 3. A priestly house which was represented by Helkai in the days of Joiakim, Neh  $12^{16}$  (B  $\aleph^*$  A om.;  $\aleph^{c\cdot 3}$  Μαριώθ) = Meremoth (which see) of  $\mathbf{v}$ .

MERARI (ງງງς, Μεραρ(ε)l) 1. is known to us only from P and the Chronicler. According to these writers he was the third of the three sons of Levi (Ex 616, Nu 317, 1 Ch 61-18 236), and accompanied Jacob into Egypt (Gn 4611). He had two sons, Mahli and Mushi (Ex 619, Nu 320, 1 Ch 610-20). Nothing further is related of Merari personally, but of the fortunes of his descendants we have fuller particulars. Their history falls into three periods—(1) the wilderness wanderings, and the settlement in Canaan; (2) the monarchy; (3) after the Exile.

(1) At the time of the census taken by Moses in the wilderness of Sinai the Merarites were divided into two families, the Mahlites and the Mushites (Nu 3<sup>38</sup>). The whole number of males from a month old was 6200 (3<sup>34</sup>), and between 30 and 50 years of age 3200 (4<sup>42-45</sup>). Their position in the camp was on the side of the tabernacle northward, and their chief at this time was Zuriel the son of Abihail The office assigned to them was the carrying of the less important parts of the tabernacle—boards, pins, cords, etc. (3<sup>36, 87</sup> 4<sup>81, 82</sup> 10<sup>17</sup>). In this they were to be superintended by Ithamar the son of Aaron (4<sup>35</sup>), and four waggons and eight oxen were given to them for transit purposes (7 The two families of Merarites are mentioned in the account of the second census taken by Moses and Eleazar in the plains of Moab by the Jordan, when the whole number of the Levites was 23,000 (26<sup>67, 58</sup>). After the settlement in Pal., 12 cities out of the territories of Reuben, Gad, and Zebulun were assigned to them (Jos  $21^{7.84-40}$  [P] = 1 Ch  $6^{63.77-81}$ ).

(2) In the reign of David, as narrated by the Chronicler, we have several references to the Merarites. The Merarite family of Jeduthun (= Ethan, 1 Ch 64 1517), together with the Kohathite family of Heman and the Gershonite family of Asaph, were, according to this writer, specially set apart to administer the temple music (cf. 1 Ch 63 47 164 42 25 7; and see ETHAN, JEDUTHUN). Consequently at the bringing up of the ark from the house of Obed-edom into Jerus, we find that, of the 220 Merarites who are said to have been present under the leadership of Asaiah (1 Ch 156),

Ethan and certain others took part in the music (18<sup>17,19</sup>). Descendants of the two families of Mahli and Mushi are mentioned as 'heads of the fathers' houses' when David divided the Levites into courses, 1 Ch 23<sup>20,80</sup>, and in 1 Ch 26<sup>10-19</sup> certain Merarites are specified as doorkeepers (cf. 9<sup>14-22</sup> 23<sup>5</sup>). Further, in the reign of Hezekiah, Merarites are mentioned as taking part in the cleansing of the temple (2 Ch 29<sup>12, 14</sup>).

(3) For the period after the Exile we have a few scattered notices of members of the family of Merarites. 1 Ch 9=Neh 11 seems to contain a list of those who were known to be dwelling in Judæa during the period immediately after the return from captivity. In these lists occur the names of 'Shemaiah... of the sons of Merari' (1 Ch 9<sup>14</sup>=Neh 11<sup>16</sup>), and 'Obadiah or Abda... son of Jeduthun' (1 Ch 9<sup>16</sup>=Neh 11<sup>17</sup>). Lastly, when Ezra went up to Jerus. in B.C. 454 it is expressly stated that certain Merarites accompanied him (Ezr 8<sup>18, 19</sup>).

The Merarites (מְקְרָהְ) occur Nu 20<sup>57</sup>, elsewhere called 'the sons of Merari,' Ex 6<sup>19</sup>, Nu 3<sup>20</sup> 4<sup>29, 33, 42, 46</sup> 7<sup>8</sup> 10<sup>17</sup>, 1 Ch 6<sup>19, 29, 44, 63, 77</sup> 9<sup>14</sup> 15<sup>5, 17</sup> 23<sup>21</sup> 24<sup>27</sup> 26<sup>19</sup>, 2 Ch 29<sup>12</sup>, Ezr 8<sup>19</sup>; or 'the children of Merari,' Jos 21<sup>7, 34, 40</sup>. For their history see above.

2. The father of Judith (Jth 8<sup>1</sup> 16<sup>7</sup>).

W. C. ALLEN.

MERATHAIM (מַיְּמִיְם) is given as a proper name by both AV and RV in Jer 50<sup>21</sup> 'Go up against the land of Merathaim' (AVm 'or of the rebels,' RVm 'i.e. double rebellion'). The term is an enigmatical one, possibly suggested (Del. Parad. 182) by Bab. Marrâtim, the land by the nar Marrâtu, or 'bitter river' (Persian Gulf) = S. Babylonia, and adapted so as to recall to a Heb. ear either 'double rebellion' (מַיְמִיְם) or 'double bitterness' (מַיִּמְיִם). The LXX (B) πικρῶς ἐπίβηθι ἐπ' αὐτῆρ (27²) connects מֵּיִמִים) with the root meaning 'bitter.'

MERCHANDISE, MERCHANTMAN.—The word merchandise (from Old Fr. marchandise, a merchant's wares), somewhat archaic now, is used in AV in two senses, one of which is quite obsolete.

1. The first meaning is goods, wares, any object of commerce, as Rev 18<sup>11</sup> 'The merchants of the earth shall weep and mourn over her; for no man buyeth their merchandise any more' (τον γόμον αὐτῶν, RVm 'their cargo'). Defoe, Crusoc, p. 535 'He confess'd, he said, it was not a Place for Merchants, except that at some certain Times they had a kind of a Fair there, when the merchants from Japan came over to buy the Chinese Merchandizes.' 2. But the word was also used for 'traffic' in goods, and even for 'gain' from such traffic: so Pr 3<sup>14</sup> 'The merchandise of it [wisdom] is better than the merchandise of silver, and the gain thereof than fine gold' (חַבָּיִ בְּחַבָּיִבְּ בַּיִנְּ בַּיִנְּ בַּיִנְּ בַּינִרְ בַּינִרְ בַּינִר בַּינְר בַּינְר בַּינִר בַּינִר בַּינִר בַּינִר בַּינְר בַּינִר בַּינְר בַּינְר בַּינִר בַּינִר בַּינְר בַּינִר בַּינְר בַּינְר בַּינְר בַּינְר בַּינְר בַּינִר בַּינְר בַּיְר

Merchantman is in AV simply 'merchant,' Gn 37<sup>28</sup>, 1 K 10<sup>18</sup>, Mt 13<sup>48</sup>. Latimer, Sermons, p. 500, says, 'The craftsman or merchantman teacheth his prentice to lie, and to utter his wares with lying and forswearing.'

J. HASTINGS.

MERGURY.—The tra of  $E\rho\mu\eta_{5}$ , Ac 1412, for which the rendering 'Hermes' of RVm is preferable. The Romans in many cases transferred the attributes and functions of the Greek deities to their own. Thus Mercury (from merx = merchandise), the god of commerce and profit, was identified with the Greek Hermes, the patron of good luck. One of the many functions of the latter was that of messenger and spokesman of the gods. Hence the word  $i\rho\mu\eta\nu e\dot{\nu}s = an$  interpreter ('interpres Divom,' Verg. En. iv. 356). He was also regarded as the

345

inventor of speech and the god of eloquence. When Paul and Barnabas had healed the cripple at Lystra, the inhabitants in their gratitude wished to sacrifice to them as gods, and they called the former Hermes because he took the lead in speak-C. H. PRICHARD.

MERCY, MERCIFUL.—These words have somewhat changed in meaning since 1611. As the next article will show, they do not in AV express pardon, they denote compassion. Thus He 2<sup>17</sup> Wherefore in all things it behoved him to be made like unto his brethren, that he might be a merciful and faithful high priest in things per-taining to God, to make reconciliation for the sins of the people'  $(\epsilon \lambda \epsilon \eta \mu \omega \nu = \text{pitiful}, \text{Vulg. } misericors)$ ; Mt 57 'Blessed are the merciful, for they shall obtain mercy' (of  $\epsilon \lambda \epsilon \eta \mu \omega \nu \epsilon \ldots \epsilon \lambda \epsilon \eta \theta \eta \sigma \sigma \tau \alpha \iota$ , Vulg.  $misericordes \ldots misericordiam consequentur)$ ; Lk  $10^{37}$  'which now of these three, thinkest thou, was neighbour unto him that felle among the thieves? And he said, He that shewed mercy on him' ('Ο ποιήσας τὸ έλεος μετ' αὐτοῦ); Sir 29¹ 'He that is merciful will lend unto his neighbour' (ὁ ποιῶν ἔλεος). Cf. Shaks. Othello, v. ii. 86-

'Not dead? not yet quite dead? I that am cruel am yet merciful; I would not have thee linger in thy pain.

Merch. of Venice, IV. i. 6-

' Uncapable of pity, void and empty, From any dram of mercy.'

Pity is the oldest meaning of the word, which, it is now generally allowed, comes from Lat. mercedem, 'pay,' 'reward.' In Low Latin mercedem meant 'pity'; in French it expressed the 'thanks' of one who receives reward or consideration; taken into English, it seems to have been associated with 'amerce' and to have denoted the pay or penalty due for transgression, as' to be in grievous mercie of the king' (Statute of Henry v.), t.e. 'to be in hazard of a great penalte,' as Minshew explains. Then to 'cry mercy' is to beg off a penalty, and, that being granted, the sense of pardon and of the grace that pardons successively developed. Thus 'pity,' found in the word as it came from Low Latin, was obscured through the association with 'amerce,' and restored by the natural use of the word. the word.

In Ps 117<sup>2</sup> 119<sup>76</sup> page is translated 'merciful kindness.' The translation comes from Coverdale. RV gives 'mercy' in the first passage, 'loving-kindness' in the second; Amer. RV prefers

'lovingkindness' in both.
'Tender mercies' is a frequent tr., esp. in the Psalter, of opp. 'bowels' (as the seat of compassion), 'pity.' This tr. is from the Gen. Bible, and is retained in RV. In Ph 18 21 RV turns 'bowels' of AV into 'tender mercies' (Gr.  $\sigma\pi\lambda\dot{\alpha}\gamma\chi\nu\alpha$ , which is the LXX tr. of ριστι in Pr  $12^{10}$ ). See BOWELS.

The form mercifulness occurs in Sir 4017 'Mercifulness endureth for ever' (Αλεημοσύνη, RV 'almsgiving'). Cf. Matt. Bible, Notes to Dt 22 'This law wyll no more but that in dealyng mercifullye with beastes we shoulde lerne mercifulnesse unto oure neighboures.' J. HASTINGS.

MERCY.—I. OLD TESTAMENT.—' Mercy' is used in AV to translate the following:—1. The besedh, LXX usually theor (see below on NT), Vulg. usually miscricordia; the translation 'mercy' is sometimes retained by RV, sometimes replaced by 'loving-kindness'; also AV 'merciful-kindness' (Ps 1172), and often 'loving-kindness.' The Hithpael of the cognete verb is replaced by LXY deceler. Vulg. and often 'loving-kindness.' The Hithpael of the cognate verb is rendered by LXX δοιωθήση, Vulg. sanctus eris, EV 'show thyself merciful'; the adj. ron hāstāh, by LXX usually δοιος, Vulg. sanctus, EV 'saint,' 'holy (one),' 'godly,' and RV of Ps 14517 'gracious.' There are no English words to which heardh and hāstāh are executly equive. which hesedh and hastah are exactly equivalent. Oxf. Heb. Lex. renders hesedh by 'goodness,' 'kindness'; and hastah, 'as denoting active practice of non,' by 'kind,' 'pious.' G. A. Smith renders non by 'leal love,' and explains that it

means always not merely an affection, "lovingkindness"... but a relation loyally observed (Book of the Twelve Prophets, i. 243 n.). That hesedh includes these two qualities of kindly affection and of loyalty is shown by the fact that it is coupled with and used as a parallel to rahamim (see below), Ps 77 1034, on the one hand, and to 'meth, 'fidelity,' Ps 25<sup>10</sup> 26<sup>3</sup>, and bërith, 'covenant,' Dt 7<sup>9</sup>, on the other. Hesedh is used of man towards man, e.g. between David and Jonathan and his house, 1 S 20<sup>14t.</sup>: of Israel towards Jehovah, Hos 6<sup>4.6</sup>: but 20141.; of Israel towards Jehovah, Hos 64.6; chiefly of Jehovah towards His people. Hāṣidh is almost always—only two exceptions, Jer 3<sup>12</sup>, Ps 145<sup>17</sup>, of God—used of men, probably as exercising heṣedh (so Oxf. Heb. Lex.). Its application to God is in favour of this view rather than that of 'object of God's hesedh.' Häsidh became specialized in the sense of pious towards God, hence the versions.

2. בְּחָכִים rahamim, lit. 'bowels,' so fig. 'tender affection,' 'compassion'; LXX ελεος, οἰκτιρμοί, etc.; wile misericordia(w), miseratio, etc.; also translated in EV 'compassion.' The adj. pmp rahûm is rendered: LXX οικτιρμών, etc.; Vulg. misericors, etc.; EV 'merciful,' 'full of compassion.' Corresponding translation are given of the Piel of the sponding translations are given of the Piel of the verb on. These are used of man towards man, and of God towards man.

3. The verb nn hnn, 'to show favour,' 'do kindness, of man towards man, and of God towards man, and the adj. 137 hannûn, only of God towards man, are rendered by EV 'be merciful or gracious,' 'show mercy,' 'have pity,' 'merciful'; by LXX ελεέω, οἰκτείρω, etc.; ελεήμων, οἰκτίρμων; by Vulg.

misercor, etc.; clemens, misericors, etc.
4. In Gn 19<sup>16</sup> the Lord being merciful unto 4. In Gn 19<sup>16</sup> 'the Lord being merciful unto him' is EV tra of γ/γ της γρηφ. Στη here rendered 'be merciful' is 'spare,' 'have compassion' (Oxf. Heb. Lex.); LXX usually ελεέω, φείδομα; Vulg. misereor, parco; elsewhere in EV 'have pity.' It is often parallel to της 'pity,' 'look upon with compassion,' e.g. Ezk 7<sup>4.9</sup>.

5. In Dt 21<sup>8</sup> 32<sup>43</sup> 'be merciful' is the translation of της here = 'clear.' 'treat as forgiven, and

of here = 'clear,' 'treat as forgiven, and therefore as enjoying full favour.' In these two passages LXX has here γενοῦ (cf. below), ἐκκαθαριεῖ, 'purge'; Vulg. propitius esto, erit; RV 'forgive,' make expiation.'

II. New Testament.—'Mercy, merciful, to be merciful, to show mercy,' etc., are used in EV to translate the following:—1. έλεος, έλεθμων, έλεέω, 'to be pitiful, compassionate.' These terms are used both of God and man, and are not applied with any special frequency to God; so that in NT flees is a divine attribute, but no special emphasis is laid upon it. Its most common use with reference to God is in the salutation xdps, theos, elphyn in the Pastoral Epistles (1 Ti 12, 2 Ti 12, Tit 14) and in 2 Jn<sup>3</sup>; cf. Jude<sup>2</sup>.

2. οἰκτιρμοί, οἰκτίρμων, 'compassion, -ate,' not common, but chiefly applied to God, Ro 12¹, 2 Co 1³,

ascribe to God the following attributes: (a) tender compassion, rahamim, etc., for man's misery and helplessness; (b) a disposition to deal kindly and generously with man, hanan, etc.; (c) the divine affection and fidelity to man, on which man may confidently rely, as he would on the loyalty of his tribe or family, *heşedh*. Though these terms may include the ordinary sense of 'mercy,' the 'sparing of a wrongdoer, and the context sometimes shows that they do include this meaning, the terms themselves do not suggest it. Hence the use of the word 'mercy' to translate them, represents

God in the OT as occupied with the position of man as a criminal, a rebel, and an enemy, to an extent entirely unwarranted by the original. Cf. Driver, Sermons on OT, 220 ff., also Par. Psalt.

1911 of 1912 o cognates, are mostly expressed in N1 by other terms than ελεος, οικτιρμοί, etc. One might almost say that heseth covers the whole ground of χάρις, ελεος, είρηνη (but see Hort on 1 P 1²), and implies the NT doctrine of the Divine Fatherhood.

The subject of 'mercy,' in its usual sense of

'That benevolence, mildness, or tenderness of heart which disposes a person to overlook injuries or to treat an offender better than he deserves,' is treated under ATONEMENT and FORGIVENESS. The qualities dealt with here are those which moved God to provide an atonement, but they describe God's attitude to man, as man, and do not, except OT, 5, of themselves call attention to man's sin. W. H. BENNETT.

MERCY-SEAT.—See TABERNACLE.

W.; 'do k 1 Ch 417. See BITHIAH.

If God towa.

If Fracion Marry, Mares, LXX om.).—One of the seven

Mor gracious, by LXX insellors of Ahasuerus (Est 114) :/ cf. ith this name and with Marsena, es. Thes.) compares Sansk. mansha,  $t_{C_{\bullet}}$ merciful .unto here rendered Eg (no. 'writing.'

Dassion (Oxy) strife').—The word occurs by upon with the εκιρασμός, Vulg. Tentatio, in bo 7, is Merinassation (leribah of Ps 95° by LXX παρ.πικρασμφ, hese εκιλείου, 'A V' in the provocation as in the day also mentioned. Massah is rendered or . At tation' [these are the only two places where Massan and Meribah occur. Massah occurs with 'waters of Meribah' Dt 33°, and by itself twice Dt 616 92°]. The expression 'waters of Meribah' is more common, occurring Nu 2018. 24, 1)t 338, Ps 817 [Heb. 8] 10682. Meribah is in LXX αντιλογίας in all these places except Nu 2024, which has hotooplas; Vulg. has Contradictionis in all; RV has in these passages uniformly 'waters of Meribah,' while AV has 'waters of strife' in Ps 106<sup>32</sup>.

A fuller expression is מי סְריכת הָרשׁ in Nu 2714, Dt 32<sup>51</sup>. LXX and Vulg. render as in Nu 20<sup>13</sup>, RV has 'waters of Meribah of Kadesh,' while AV has 'Meribah in Kadesh' in Nu and 'Meribah kadesh' in Dt. Besides these passages in which reference is made by name to the waters which flowed from the rock when smitten by Moses, many others mention the providing water from the stony rock without detail of name or place, e.g. Dt 8<sup>15</sup>, Ps 78<sup>15, 20</sup> 105<sup>41</sup> 114<sup>8</sup>, Is 48<sup>21</sup>.

According to Nu 20<sup>2-13</sup> the children of Israel,

finding no water at Kadesh, in the desert of Zin, strove with Moses (both in v. and v. 18 RV has strove, while AV by putting 'chode' in v. obscures the double reference to strife which exists in the original). The LORD commands Moses, 'Take the rod ... and speak ye unto the rock before their eyes, that it give forth its water'; but Moses struck the rock with his rod, and water came forth abundantly. Then follows the sentence of prohibition: 'ye shall not bring this assembly into the land which I have given them.' The carrying out of this sentence in the case of Aaron is related in Nu 20<sup>22-29</sup>, in the case of Moses in Nu 27<sup>19-14</sup>, Dt 32<sup>29-29</sup> (see above for the words employed in these passages).

Another account is also given (Ex 171-7) of water flowing from the rock when smitten by Moses. The language is very similar to that of Nu 20, and in points of detail there is a marked resemblance between the two narratives. In this account stress is laid (v.2) on 'tempting' (i.e., in the old sense of the word, proving) as well as 'striving,' and in v.7 two names are given to the place, MASSAH ('temptation,' i.e. proving) because the children of Israel 'tempted'the Lord, and Meribah ('chiding or strife') because of the 'striving' of the children of Israel (in both verses AV has 'chide' for 'strive' as in Nu 203). Other passages referring to these events are given at the beginning of this article, from which it appears that Massah by itself is mentioned twice, Massah with Meribah twice, and in Dt 338 mention is made of Massah and the waters of Meribah in connexion with Levi, and the verse apparently refers to an incident not recorded in Ex 17 or Nu 20. A comparison of these two narratives (those in Ex 17 and Nu 20) suggests many difficult questions.

Kuenen was not prepared with an answer, and abstained from expressing a decisive opinion (Hexateuch, § 6 n. 42, p. 101, Wicksteed's translation). Cornill (in ZATW, 1891, p. 20 ff.) discusses these narratives at length, and submits them to a searching analysis, arriving at results which are in the main adopted by Bacon (Triple Tradition) in

his notes on these passages.

There appear to be two alternatives: (a) the narratives in question are different versions of the same occurrence which has been assigned to different periods in the journeyings of the children of Israel; or (b) an account of occurrences at a place to which the name of Massah was given (mainly preserved in Ex 171-7 and there called Rephidim), and another account of occurrences at Meribah (preserved but with considerable modifi-cations in Nu 201-13, and these connected with Kadesh) existed at one time as independent narratives; but details have been transferred from the one account to the other in the process of compilation, perhaps the addition of Meribah and the idea of strife to the narrative of Ex 17.

From Nu 20 it is difficult to understand clearly wherein the sin of Moses and Aaron is supposed to have consisted. According to 2024 2714 it is described as rebelling against the word of the LORD. The waters of Meribah receive their name because the children of Israel strove with the LORD, and on this occasion the words assigned to Moses are 'Hear now, ye rebels.' May Moses and Aaron on this occasion have shown themselves unworthy of their position as leaders, and in some way joined in the strife? Then a reason for their heavy punishment would be apparent, while reverence for the great leader may suggest a further reason

why the narrative appears in its present form.

In art. Exodus, Route of (§ iv.), some reasons have been given for ascribing to the events recorded in Nu 20<sup>1-21</sup> an earlier date than that usually given to them. They may be noted here, as (whatever weight they may have) they reduce the interval between Massah and Meribah.

A note on Dt 332 should find a place here. According to RV, 'He shined forth from Paran, and came from the ten thousands of holy ones [m. holiness]. AV has 'with' for 'from,' which is not defensible. The rendering in italics arouses suspicion. After mention of Seir, Paran, we might expect the name of some place; and as the words which follow ('At his right hand was a fiery law') are certainly corrupt, it is probable that emendation is needed here also. A slight modification of the text would give 'and came to Meribath-kadesh,' an emendation which has found much favour. found much favour.

The manner in which the words 'strife' and 'temptation' and the corresponding verbs are used in the passages already quoted, invites comment. In Ex 17<sup>2</sup>, Nu 20<sup>3</sup> the people strove with Moses, but in Nu 20<sup>15</sup> they strove with the Lord, in Ex 17<sup>2</sup>-7 they 'tempt' the Lord. But in Dt 33<sup>5</sup> another view of the relation between God and His people is represented: 'whom thou didst prove at Massah, and with whom thou didst strive at the waters of Meribah.' The word prove is the same word as that rendered tempt, and occurs in Gn 22¹ ('God did tempt [RV prove] Abraham'). The same thought is found in Ex 15² ('there he made for them a statute and an ordinance, and there he proved them'). Whether in the first part of this passage there is any connexion between mishpat and Meribah-Kadesh may be questioned (but note that a cause in judgment is ¬¬, and Kadesh is En-mishpat), but that the latter clause contains the idea underlying Massah is clear.

This double view of the wilderness history is found also in the Psalms. Ps 81<sup>7</sup> has 'I tried thee at the waters of Meribah,' Ps 95<sup>9</sup> has 'when your fathers proved me, tried me'... In these two places the Heb. for try is \( \text{ID}\). The above may serve to illustrate the fulness of the religious teaching which may be derived from the Pentateuchal narrative.

may be derived from the Pentateuchal narrative.

Meriboth-kadesh.—'The waters of Meriboth-kadesh' are given in Ezk 4719, and 'the waters of Meribath-kadesh' in 4828, as a southern limit to the land. The difference between the singular and plural in the two passages seems strange, and the LXX renderings Maριμωθ Καδήμ (4719), Βαριμωθ Καδής (4828), which suggest the plural in both verses, are to be preferred. Note the interchange of β and μ. In 4828 QΓ have Maριμωθ. AV has 'the waters of strife in Kadesh' in both places.

Here is a clear reference to the events recorded in the Pentateuch, but it is doubtful whether the inference may be drawn that a place bearing the name of Meriboth-kadesh was known to the prophet or his contemporaries. A. T. CHAPMAN.

MERIBBAAL.-See MEPHIBOSHETH.

## MERIBOTH-KADESH .- See MERIBAH.

MERODACH (קיֹרִייִ).—A Bab.-Assyr. deity mentioned as a separate name but once in OT (Jer 50 [Gr. 27]²), B Μαιωδάχ, κΑQ Μεωδάχ. The Bab. pronunciation of the name was Mar-u-duk. Its signification is still uncertain, though its Bab. origin is strongly maintained (cf. Delitzsch, Paradies, 228; Jensen, Kosmologie der Babylonier, 242 ff.). On the side of astronomy M. is identified with Jupiter, of the Romans. In the earlier Bab. history he occupied a seat on the same platform with Anu, Bel, Ea, Nergal, etc. But in later times he occupied a position of pre-eminence, particularly as the patron deity of the city of Babylon. In Jeremiah's reference he seems to be one of the two chief gods of Babylon. In his inscriptions, Nebuchadrezzar speaks of Merodach (Mar-duk) as 'the great lord,' the exalted governor,' 'king of the heavens and the earth,' 'the supreme god'; Assurbanipal speaks of him as 'king of gods'; Nabonidus (Cyl.) calls him 'Lord of the gods'; and (Stele) speaks of the king of Assyria as having wrought the ruin of the land by M.'s wrath. The many hints in later Bab. literature of his importance show that he was held to be the supreme god, the source of power, and of all the blessings which showered upon mankind. At the fall of Babylon, Merodach receives the profoundest reverence from Cyrus, the victor. For his relation to Nebo see the art. NEBO. Under the name Bêl he was worshipped among the Mandæans. His name forms an important element in many late proper names of Babylonia, e.g. Merodach-baladan and Evil-Merodach, as well as in some of an earlier date, e.g. Marduk-adin-ahi of 17th cent. B.C. For his possible connexion with the story of Esther see art. Mordecal.

LITERATURE (additional).—Schrader, COT ii. 116ff., Assyr.-Bab. Keilinschrif. p. 120; Hommel, Gesch. Bab. Assyr. p. 778,

n. 1; Tiele, Bab. Assyr. Geschichte, p. 531 f.; Jensen, Kosmologie, p. 88; Winckler, Geschichte Bab. Assyr. p. 34 f.; Baudissin, PRE ii. 35 ft.; Jeremiss, All., art. 'Marduk' in Roscher's Ausfuhr. Lez. der Gr. u. Röm. Myth.; Jastrow, Religion of Bab. and Assyria.

MERODACH - BALADAN (אָרָהְ בּלְאָרָן), Μαρωδάχ Βαλαδάν), Is 39¹; misspelt (in MT, but not in LXX, BA having Μαρωδάχ [Βαλαδάν]) Berodach-b. in 2 K 20¹².—In Assyr. the name is written Marduk-bal-iddina, and means 'Merodach has given a son.' Merodach-baladan was the hereditary prince of the Kalda or Chaldeans, who inhabited the marshes at the mouths of the Tigris and Euphrates. The inscriptions call him the son of Yagina; but this may signify that Yagina was a more remote ancestor. In 2 K he is made the son of Baladan: this would be the abbreviated form of some name, the first ele-ment of which was the name of a deity. In the troublous period which followed the death of Shalmaneser IV. before Samaria, B.C. 722, M. possessed himself of Babylonia, and was crowned king at Babylon (B.C. 721). After a few years, however, Sargon of Assyria found himself sufficiently strong to think of reconquering Babylonia, which had been annexed to Assyria by Tiglath-pileser III. M. accordingly looked for allies, and in B.C. 711 sent an embassy to the West, where the vassal-princes were disposed to throw off their allegiance to the Assyrian king. Judah with the Philistine cities, and Edom and Moab, entered into the alliance, and Egypt promised help. It was on this occasion and Egypt promised help. It was on this occasion that Hezekiah boastfully showed the Bab. envoys the material resources which he could bring to the alliance (2 K 20<sup>12-19</sup>, Is 39).\* Before the allies were ready to move, however, the army of Sargon had descended on Palestine, and severely punished Ashdod, which had been the centre of disaffection. Judah, Edom, and Moab thereupon submitted, and the Assyr. king was free to turn to Babylonia. We wantly sought aid from the Elamites, who were M. vainly sought aid from the Elamites, who were defeated by the Assyrians before they could come to his help, and he accordingly fled from Babylon, which was entered by Sargon, B.C. 709. After being proclaimed king there, Sargon pursued M. to Bit-Yakin, the capital of the Kalda in the marshes, which he captured along with its prince.

M. afterwards recovered his freedom, and in n.C. 702, after the death of Sargon, he returned to Babylon, and reigned there a second time for about six months; though the Annalistic Tablet seems to imply that this M. was not identical with the Kalda prince (as it calls him 'an Assyrian soldier'). At any rate, the usurper was overthrown by Sennacherib at Kish, and Bel-ibni was made king of Babylon by the Assyrians. For some time M. defended himself in the marshes; but after a time, growing weary of the struggle, he embarked for the eastern shore of the Persian Gulf, with his followers and gods, and settled in the Elamite city of Nagitu. To this retreat, in B.C. 695, he was pursued by Sennacherib, who stormed the Chaldæan colony. M. himself seems to have been already dead, but at a subsequent date we hear of his son Nebo-sum-iskun assisting the Elamites in a war against the Assyrians.

MEROM, THE WATERS OF (2012), το εδωρ Μαρρών or Μερρών), where Joshua overthrew the confederation of the northern kings, are commonly identified with the highest of the three lakes in the Jordan Valley, now called Baheiret el-Huleh, 'the

\* So Driver, Isaiah<sup>2</sup>, 14, 45, 49; Skinner, Isaiah, vol. i. p. 283; Tiele, Bab.-Assyr. Gesch. (1888), p. 349; et al. On the other hand, Schrader, KAT<sup>2</sup>p. 344 [COT ii. 28], prefers to date the visit of Merodach-baladan's envoys a. 704 B.C.; so also W. R. Smith, Proph. of Isr. p. 318—at a time, however, when he was not king of Babylonia.

348

little lake of el-Huleh.' The height of the waters here relatively to those of the Sea of Galilee and the Dead Sea possibly accounts for the name מיפור used by the ancient historian (Jos 11<sup>5, 7</sup>). Several of the places mentioned in the chapter have been identified with tolerable certainty, e.g. Hazor and Achshaph; while Mizpah, from the position assigned to it, must have lain immediately to the north of el-Huleh. The open land in the neighbourhood of 'Ain el-Mellaha would therefore afford an excellent rallying-ground for the hosts assembling for one supreme effort to stay the progress of the victorious invaders.

No absolute proof of this identification can be offered, and certain objections have been raised. none of which, however, is insuperable. (1) The word me [constr. of mayim, 'waters'] is nowhere else applied to such a large body of standing water; in such cases the term  $y\bar{a}m$  ('sea') is commonly employed. Too much may easily be made of this objection, which, being only of a negative character, must give way to more positive considerations. (2) Josephus places the camp of the kings at Beroth in Upper Galilee, and makes no mention of waters. Here, therefore, we are told the scene of the battle must be sought, and not in the Jordan lowlands (Socin's note in Schumacher's Jaulan, 102). Josephus says (Ant. v. i. 18) that Beroth was 'not far from Kadesh': this fixes the locality, Kadesh lying on the heights west of the valley. But the battle was not necessarily fought at the spot where the camp stood. Long afterwards, in this same district, Demetrius pitched his camp at Kadesh, and fought Jonathan in the plain below (Jos. Ant. XIII. v. 7). Why should not the kings have followed a similar course? (3) By giving battle in this plain the kings would have exposed themselves to grave peril in the event of defeat, since it is so hemmed in by hills and marshes as to make escape extremely difficult; immense natural barriers lying especially between it and great Zidon, towards which a great part of the routed army fled (Jos 11<sup>a</sup>). In reply to this, it may be pointed out that for the evolutions of the chariots on which the Canaanites so much relied, there was no ground anywhere near so suitable as the comparatively easy downs south of Ain el-Mellaha. To secure this advantage, they were doubtless willing to take some risk. It should also be remembered that the Canaanites were at home amid the intricacies of mountain and marsh, of which their pursuers were largely ignorant. In their flight to great Zidon, the fugitives would probably follow the course of the ordinary route from Banias to the sea, and familiarity with these wild uplands would greatly facilitate their efforts to escape.

Baheiret el-Huleh is a pear-shaped basin, pointing southward, and having a distinct bulge to the north-west. It lies 7 ft. above the level of the Mediterranean, and is from 10 ft. to 16 ft. in depth. Its greatest breadth is about 3 miles, and its length from the edge of the marshes to the exit of the Jordan is 31 to 4 miles. Measurements vary somewhat with the amount of rainfall and the condition of the muddy banks. The N. limit is especially ill defined, as the waters of the upper Jordan, forcing their way in different channels through the swamp, are constantly changing the Owing to the formation at the southern end, the lake might be drained or enlarged with almost equal ease. Probably it was once much larger than it is now (HGHL p. 481, note). To the means taken for this extension, possibly Mukaddasi (A.D. 985) refers in the following sentence: In order to form the lake they have built a wonderful embankment of masonry along |

the river, confining its waters to its bed' (Le Strange, Pal. under the Moslems, 68). The floor of the valley northward is one vast morass, varying in breadth from 2 to 3 miles. From the chief source of the Jordan at Tell el-Kadi to the lake, a distance of 11 miles, there is a fall of 498 ft. Towards the lower end the marshes are covered with papyrus-reeds (Arab. babir), and through them in dark sluggish lanes the waters from the north make their way into the waters from the north make their way into the lake. The whole place is literally alive with wild fowl, ranging in size from the pelican to the tiny but gay-plumaged kingfisher; and the water is plentifully stocked with fish (see JORDAN). All the waters from the S.W. of Hermon, and as far north as Hasbeiyeh, from Merj A'yûn, and from the western slopes south of the Litany, are carried down into el-Huleh. A few miles above the lake on the west side of the valley there is a copious spring, 'Ain el-Balāṭa. Almost due west is the much larger 'Ain el-Mellaha, which turns a mill and sends a broad stream\_across the plain. Possibly misled by this name, Burckhardt gave currency to the statement that the S.W. shore of the lake was covered by a saline (Arab. mallahah) crust (Travels, 316). There is no trace of salt here or elsewhere in the valley.

The uplands of Naphtali drop almost precipi-

MEROM, THE WATERS OF

tously on the west edge of the plain. On the east the mountains descend from a greater height, but much more gradually, approaching almost to the water's edge. From the lake northward the land is called Ard el-Huleh; southward it is known as

Ard el-Khait.

The Waters of Merom appear no more in history under that name; but of the lake and the district under different appellations we have frequent notices. It figures as the lake of Semechonitis in Jos. Ant. v. v. 1 (cf. Jg 4\*). Here, in the 'plain of Hazor,' or 'Asor,' Jonathan defeated Demetrius (Ant. XIII. v. 7; 1 Mac 1167). When Zenodorus died, Cæsar bestowed his country, lying between Trachon and Galilee, upon Herod. It contained Ulathe tained Ulatha and Paneas, and the country round about (Ant. xv. x. 3; BJ 1. xx. 4). Οὐλάθα here is evidently equivalent to Huleh, and to ארחים אם of the Talmud (Neubauer, Géog. du Talmud, 24, 27ff.; HGHL 48l<sup>1</sup>, note), and it is applied in accordance with subsequent usage to the district as well as the lake. Josephus gives a brief description of the place in BJ III. x. 7, IV. i. 1. Seleucia, which he mentions, is Selaktyeh, about 9 miles S.E. of the lake, while Daphne corresponds with Difneh, near Tell el-Kadi. The Arab geographers speak of the lake now as Bahairah Kadas and anon as Bahairah Baniyas, from its proximity to each of these strong-holds; but the name el-Huleh constantly asserts itself as applying to both lake and district (Le Strange, Pal. under the Moslems, 52, 68, 32, etc.). To the district also Bohâ ed-Dîn refers (Life of Saladîn, PEF tr., p. 155).

The highway from the south and from the west by way of Safed keeps close to the hills on the western edge of the plain, to escape the marshes. It crosses the vale in the north past Tell el-Kadi

to Banids, and thence to Damascus.

The land is occupied to-day by the Ghawarineh Arabs, 'the dwellers in the Ghôr.' The herds of buffaloes that find congenial haunts in the marshes are their chief care. They also till the soil, which (Mukaddasi, A.D. 985; Yakût, A.D. 1225). Their other occupations are hunting and fishing, and making mats, etc., of the reeds from the marshes. Of these also many of their fragile houses are built. The women, however, do the most of this work.

Macgregor, Rob Roy on the Jordan; Guy Le Strange, Pal. under the Moslems, 32, 34, 39, 52, 68, 455; Robinson, BRP ii. 435, iii. 392-395; SWP Mem. i. 205, Map Sheet iv.; Buhl, GAP 113, 234 (doubts the identification with el-Huleh); Dillm. on Jos 115. W. EWING.

MERONOTHITE.—1. Jehdeiah 'the Meronothite' (τητήση) was over the asses of king David, 1 Ch 27<sup>20</sup> (Β ὁ ἐκ Μεραθών, Α —Μαραθών). 2. Jadon 'the Meronothite' assisted in repairing the wall of Jerusalem, Neh 37. No place of the name of Meronoth is mentioned in OT, but from the context of Neh 37 it would appear to have been in the neighbourhood of Gibeon and Mizpah.

**MEROZ** (ἀτὰς ; Β Μηρώζ, Α Μαζώρ, Luc. Μαρώρ ; Vulg. *Meroz*) is nowhere mentioned in Scripture except in the Song of Deborah (Jg 523), whose curse, like that of the Saviour on Chorazin, has alone pre-served it from oblivion. The bitterness of the curso against Meroz can be accounted for only by some special aggravation of its offence. Of Reuben, Dan, and Asher, who also played an ignoble part, the lan-guage of the song, although satirical, is restrained. But with what impetuous fury it bursts forth-

'Curse ye Meroz, said the angel of the Lord, Curse ye bitterly the inhabitants thereof; Because they came not to the help of the Lord, To the help of the Lord against the mighty.'

This may have been because of their nearness to the field of battle, while the others were far away. If the surrounding country were in a fever of excitement because of the presence of the hostile forces, and the grave issues depending on the coming conflict, the appeal to their patriotism was strengthened unspeakably. If, within sound of the strife when their heroic kinsmen of Zebulun and Naphtali closed in deadly struggle with the oppressor, the men of Meroz skulked, sullen and craven, behind their walls, we can understand why the hot heart of the prophetess overflowed upon them in a flood of corrosive rhetoric.

There is but one site in the neighbourhood with any reminiscence of the ancient name to which these conditions could apply. This is el-Murussus, about 5 miles N.W. of Beisan, and 9 miles E. of Jezreel, on the northern slopes of the vale which runs down from Esdraelon to the Jordan, between Little Hermon and Gilboa. Built entirely of mud, the modern village stands on rising ground, in the midst of plough land. For water it is dependent on the stream below, in Wady Yebla.

Another suggestion (Moore, Judges, pp. 135, 163) is that Meroz was a hamlet in the line of 163) is that Meroz was a namet in the line of Sisera's flight, 'whose Israelitish inhabitants suffered him to escape,' thus proving traitors to their country's cause, and earning the fierce reproaches of Deborah. Sisera fled 'to the tent of Jael the wife of Heber the Kenite' (Jg 417), who had pitched his tent by the terebinth of Betsa'anim by Kedesh. Identifying Kedesh with the ruined Kadish W. of the Sea of Galilee, and Betsa'anim with Khirbet Bessam (Conder, Tent-Work in Pal. 69; Smith,  $HGHL^1$  396), the direct road from the battlefield would have been round the base of Tabor, and across the head of Wady esh-Sherrar. But as this way was probably barred by the Israelites, whose army descended from Tabor, Sisera would most likely rush down the valley of Jezreel, skirting the southern terraces of Little Hermon. In his endeavours to elude pursuit he may easily have approached *cl-Murussus* before turning northward. This site, therefore, meets the requirements of either case; and Moore is not justified in saying that all proposed identifications 'may safely be dismissed' (Judges, p. 162).

356; SWP Mem. il. 85; Moore, Judges, pp. 135, 162; Henderson, Palestine, p. 107; Douglas, Judges, p. 38.

W. EWING.

**MERRAN** (Mespár, Syr. מורה, Vet. Lat. b. Myrrhx).—Found only in Bar  $3^{23}$  the merchants of Merran and Teman.' Grotius identified it with of Merran and Teman.' Grotius identified it with nouve, a town of Sidonia, Jos 134; Hävernick, with Moarrah, a Syrian city; Fritzsche, with the sterile Arabian desert Mahrah; and Keil, with Marane, a city placed by Pliny near the Red Sea, in the country of the Sabæans. It is decidedly preferable with Kneucker and Ball to suppose that there has been a misreading of  $\neg$  for  $\neg$  in the Semitic original from which our Greek text was taken, and that we should read 'the merchants of *Medan* (or *Midian*) and Teman.' The doubled  $\rho$  is no obstacle to this, since we have Σαρρά for στο. In favour of it we may cite Gn 37<sup>28</sup>, where Midianites are called 'merchants,' and Hab 3<sup>3,7</sup>, where Teman and Midian are named in connexion.

J. T. MARSHALL.

**MESALOTH** (Μεσσαλώθ, Μαισαλώθ), 1 Mac 9<sup>2</sup>.— Probably representing n'ppp 'steps' or 'ascents' (?), referring to the plateau near Arbela, W. of the Sea of Galilee.

C. R. CONDER.

MESHA.--1. (מֶשְׁשׁ) Son of Shaharaim, a Benjaminite, whom his wife Hodesh bare in the land of Moab (1 Ch 8°). LXX reads, A Μωσά, B Μισά; Vulg. Mosa. The two latter readings seem to have been based on an original κυίω. 2. (νυίω) Firstborn of Caleb (1 Ch 2<sup>43</sup>). He became the father of Ziph, possibly the founder of the Ziphites. LXX reads Mapod, and the Vulg. Mesa; Kittel (in Haupt's OT) follows the LXX, reading יָּרָשֶׁר אַר

which he thinks is to be expected from the context. 3. Mesha (μψη, Μωσά), a king of Moab, who was a sheep-master, and was tributary to Ahab, king of Israel. Upon the death of the latter and the accession of his son Ahaziah, Mesha rebelled and refused to pay his annual tax of 'an hundred thousand lambs and an hundred thousand rams with the wool' (2 K 3<sup>4.5</sup>). The people of Mesha had fallen before the arms of David (2 S 8<sup>2</sup>), and in all probability remained subjects of Solomon till the division of the kingdom. The infection of re-bellion at that period probably seized the Moabites, and they, in common with other extra-Israelitish subjects of the united kingdom, struck for independence and secured it. The tenor of the record on the Moabite Stone (wh. see) favours this supposition. It also informs us that the subjection of Moab, which Mesha threw off, was due to the or most, which mesha threw off, was due to the provess and power of Omri, the founder of the 4th Dynasty of Israel. After forty years of yoke-bearing, Mesha's god, Chemosh, delivered him from Israel, in the middle of the reign of Omri's son. This appears to imply that the secession (2 K 1') occurred, not at the death of Ahab, but in the middle of his reign (see 'Moabite Stone' in art. MOAB). At any rate this rebellion cut off valuable revenues At any rate this rebellion cut off valuable revenues from Israel's exchequer, and Jehoram, Ahab's son, who came to the throne after the two years' reign of his brother Ahaziah (1 K 22<sup>51</sup>, 2 K 1<sup>17</sup>), aspired to re-conquer the rebels. With Jehoshaphat of Judah and his army, and the Edomites of Mt. Seir, Jehoram and Israel marched against the seceders. Upon the counsel of the prophet Elisha, the encamped armies dug trenches to catch the water necessary to slake thirst. Led on by an illusion (2 K 3<sup>22-24</sup>), the Moabite army recklessly rushed into the enemies' camp, only to be routed, cut to pieces, trodden down, and dismayed. The few escaped ones entered Kir-hareseth, and the combined armies destroyed the land with stones, stopped cisterns and fountains, felled the forests, and beleaguered the fortress. With 700 warriors and beleaguered the fortress. LITERATURE.—Guérin, Galilée, l. 127; Smith, HGHL1 pp. 395, and beleaguered the fortress. With 700 warriors 396; Conder, Tent-Work in Pal. pp. 58, 59; Robinson, BRP ii. the king of Moab attempted to break through

the ranks of the besiegers. But utterly failing in this he went to the top of the wall, and, in full view of the armies of Judah, Israel, and Edom, he propitiated the wrath of Chemosh by offering up as a burnt-offering his firstborn, the heir-apparent to the throne. Thereupon the three armies withdrew, leaving Mesha master of the situation, though routed, and his land greatly damaged (2 K 3").

4. Mesha (w#p) was the name of one of the limit-points of the territory ascribed to the descendants of Joktan in Gn 10<sup>30</sup>. 'And their dwelling was from NYD as thou goest toward Sephar, the mountain of the East. It is plain that it must be sought for in the Arabian peninsula. The earlier views are amply presented by Gesenius (Thesaurus, E. boundary of Mesene, not far from the mouth of the Tigris river. Pliny, Ptolemy, Arrian, and others mention a seaport Moθσα or Moθζα, a celebrated place in classic times, which is now in celebrated place in classic times, which is now in ruins. Pullen, in his surveys in the Admiralty chart of the Red Sea, cites, at 13° 40′ N. lat., 43° 20′ E. long., a mountain called Jebel Mousa. Delitzsch (Paradies, p. 242 f.) identifies wip with the Bab.-Assyr. term Mas, which is the name attached to the district of the Syrian-Arabian. desert touching the Lower Euphrates on the S.W. (LXX reads, Α Μασσηε, Ε Μανασσή). The territory of the Joktanites is fairly well determined, from the language and monuments of S. Arabia, to be in the S.W. portion of that peninsula, extending from modern Yemen on the W. to Hadramaut on The latest and perhaps the most authoritative statements on the location of this hard-tofind locality are made by that successful explorer of Arabia, Eduard Glaser. In vol. ii. of his recent work Berlin, 1890, pp. 336 ff., 420 f., 437) we find his results presented. In W. Central Arabia he found a Maciya near Jebel Samar, which he identifies with the biblical Massa. He even goes further and asserts (p. 420) that the biblical Mash, \$\psi\_1 (\text{Cr}\_1 10^{20}) \text{ Mesha with } (\text{Cr}\_1 10^{20}) \text{ Mesha (Gn 10<sup>23</sup>), Mesha אָשֶׁה (Gn 10<sup>30</sup>), and Massa אָשֶה (Gn 25<sup>14</sup>) are found in one and the same territory, the difference in spelling being due merely to the different sources or times from which the names reach us. Sephar he locates only in the S. part of Arabia, hence he looks for Mesha at the other limit (Gn 10<sup>30</sup>) in the north. The most northern Joktanide group (Ophir, Hawilah, Jobab, Uzal, and Diklah) is bounded by a line drawn obliquely from the northern end of the Persian Gulf across Arabia to Medina. Such a line would touch the territory of *Djebel Samar* (p. 437), and in particular the district of Massa. Thus, in a word, Glaser concludes that Jebel Samar and its Westland, already identified with Mas, and inclusive of Massa, also encloses within it the biblical Mesha of Gn 1080. IRA M. PRICE.

**MESHACH** (who; LXX and Theod.  $M(\epsilon)\iota\sigma\acute{a}\chi$ ; Vulg. Missach).—The name Mishael, by which one of Daniel's three companions, of the children of Judah, was originally called, was changed by the prince of the eunuchs into Meshach (Dn 1' and ch. 3). Such changes of name were not uncommon: they marked the fact that a new state of life had now begun. In the present instance there is no idea of dishonour or humiliation.

Many conjectures have been put forward with respect to the origin of the word. Fuerst dragged in the Sansk. meshah='a ram,' and afterwards the name of the sun-god of the Chaldeans. Ges. was favourably inclined towards the Pers. miz shah='friend of the king.' Another suggestion connected it with the Accadian mas, a protecting genius, who stood at the head of the demi-gods, and is described in the old magical books as having

his abode on the top of the mountains, and protecting all who seek refuge with him. Frd. Delitzsch's proposal to consider it identical with Mi-sha-Aku is rightly rejected by Schrader (COT ii. 126), who points out that the correct form would have been Mannu-ki-Aku. The fact is that no name such as this has been found in the inscriptions; and when we look at the word itself, it gives us the impression that it was formed partly by imitation of the first part of Mishael, and partly out of the companion name Shadrach.

**MESHECH** (אָשֶׁה, Sam. מִשֹּׁה, Moσόχλ.—Son of Japheth, Gn 10<sup>2</sup>=1 Ch 1<sup>5</sup>. This nation is regularly mentioned in company with Tubal (Ps 1205 is the only exception), and in the two names the Moschi and Tibareni 'are scarcely to be mistaken' (Lagarde, Ges. Abh. 254). The vocalization of the LXX agrees with that of the Assyrian inscriptions, in which a country called Muski or Mushki is of frequent occurrence. The passages in those inscriptions which treat of the inhabitants of that country are collected by Frd. Delitzsch (Wo lag das Paradies? p. 250), and these, with the other notices of them to be found in ancient writers, are discussed by Lenomant (Les Origines de l'Histoire, II. ii. pp. 181-249). An individual named Meshak is known only to Moses of Khorene (Venice, 1865, p. 32), according to whom such a person was left by Aram as governor of the region called Armenia I., who built there a city called by his own name, but mispronounced *Mazhuk* by the people of the country. The first mention of the nation is in an instantial of the country. inscription of Tiglath-pileser I. (c. 1100 B.C.; WAI i. pl. 9, 60 ff., translated by Lotz, Die Inschriften Tiglath-pilesers, p. 16, and Winckler, KIB i. p. 19), where it is stated that in the first year of that monarch's reign 20,000 Moschians with their five kings, after having occupied the lands of Alzi and Purukuzzu for 50 years, came down and took possession of Kummukhu. The last place has been identified with Commagene; and Alzi with Anzitene, mentioned by Ptolemy (v. 13. 18) as a district between the sources of the Tigris and Euphrates. Tiglath-pileser went out to meet them, traversed a region called Kashuyara, and defeated them with great slaughter. They are next mentioned in an inscription of king Asshurnasir-abal (WAI i. 18; translated in KIB i. 65) about 220 years later, who professes to have received tribute of the Moschi and Commagenians, consisting of 'bowls of brass, sheep, and wine,' in which the first item agrees curiously with the 'vessels of brass' which, according to Ezk 27<sup>18</sup>, were supplied by 'Tubal and Meshech' to Tyre. Their power had become formidable by the time of Sargon (B.C. 722-705), in whose annals the Moschian king Mita plays an important part (Winckler, Die Keilschriftexte Sargons, pp. xxiv-xxxix); from 715 this king appears as a formidable enemy of Assyria, who makes common cause with Rusa of Urartu, seizes cities in Cilicia, and otherwise supports Sargon's enemies. The fortresses of Usi, Usilu, and Uargin are built in 712 to protect the new province of Kammanu against him (ib. p. 33, 1. 192). Not till 709 is Mita forced to make peace with the Assyrian king, owing to an invasion of his territory by one of the latter's lieutenants (ib. p. 128, ll. 151-153). The Moschi do not, however, appear in the lists of tributaries of the later Assyrian kings, though in Persian times they figure in the 19th Satrapy of Darius (Herod. iii. 94). In chs. 37 and 38 Ezekiel mentions them among the allies of Gog, king of Magog, but in 3226. 27 he reckons them among the great departed. It is probable, therefore, that the laraelites knew of their fame only at second-hand, and hence Ezekiel would not be clear as to whether the

nation still existed or not. It is not, however, known at whose hands they lost their independence.

Their geographical position probably varied somewhat with the vicissitudes of their fortune, but can be generally fixed by the historical references in the inscriptions, where it is approached through Kummukh, and has for its neighbours Tubal to the south and Kammanu to the west, and where it is reduced by the governor of Kui (Cilicia). In Græco-Roman times the nation that bore their name is represented as much farther north, between the Cyrus and the Phasis (cf. Strabo, xi. 2. §§ 14, 16); Hecatæus placed them next to the Matieni (Steph. Byz. s.v.). Too little is known of their language and customs to make it possible to locate them ethnographically.

ΜΕSHELEMIAH (η:Φ)ψφ and νη:Φ)ψφ). — The eponym of a family of Korahite doorkeepers, 1 Ch 9<sup>21</sup> (Β Μασαλαμί, Α Μοσολλάμ), 26<sup>1</sup> (Β Μοσολαμί, Α Μοσολλάμ), 9 (Β Μοσολράμ, Α Μασελλαμιά), 9 (Β Μοσολραμιά) = Shelemiah of 26<sup>14</sup>, Shallum of 9<sup>17, 19, 31</sup>, and Meshullam of Neh 12<sup>25</sup>,

MESHEZABEL (פְּאַקְוּשְׂקְסְ).—1. One of those who assisted to repair the wall, Neh 3⁴ (B om.; κ Μασ-εζεβηλ, A Μασεζειήλ). 2. One of those who sealed the covenant, Neh  $10^{21}$  (B Μεσωζεβηλ). 3. The father of Pethahiah, who was at the king's hand in all matters concerning the people, Neh  $11^{24}$  (B Βασηζα, κοι α Βασηζαβεήλ). It is quite probable that all three references are to the same individual or family.

**MESHILLEMITH** (πρόψρ).—A priest, 1 Ch  $9^{12}$  (Β Μασελμώθ, Α Μοσολλαμώθ), called in Neh  $11^{13}$  **Meshillemoth** (wh. see).

MESHILLEMOTH (מְשִׁלְּשִׁר).—1. An Ephraimite, 2 Ch  $28^{12}$  (Μοσολαμώθ). 2. A priest, Neh  $11^{18}$  (AB om.;  $\aleph^{c-a}$  Μασαλαμίθ), called in 1 Ch  $9^{12}$  Meshillemith (wh. see).

MESHULLAM (ρ<sup>\*</sup>/<sup>\*</sup>/<sup>\*</sup>) perh. 'the devoted one,' cognate with Arab. Muslim, cf. Del. and G. A. Smith on Is 42<sup>19</sup>, LXX Moσολλάμ, Mοσολλάμος, Meσονλάμ, etc.).— A common OT pr. name. 1.2.3. Three Benjamites (1 Ch 8<sup>17</sup> 9<sup>7.8</sup>). 4. A Gadite (1 Ch 5<sup>18</sup>). 5. The grandfather of Shaphan the scribe (2 K 22<sup>8</sup>). 6. The father of Hilkiah the priest (1 Ch 9<sup>11</sup>). 7. Another priest of the same family as the preceding (1 Ch 9<sup>12</sup>). 8. A Kohathite, one of the superintendents appointed by Josiah to direct the repairs on the temple (2 Ch 34<sup>12</sup>). 9. A son of Zerubbabel (1 Ch 3<sup>19</sup>). 10. One of the 'chief men' whose services were enlisted by Ezra to procure Levites to accompany him to Jerusalem (Ezr 8<sup>18</sup>). 11. A Levite who opposed Ezra's proceedings in connexion with the foreign marriages (Ezr 10<sup>18</sup>). 12. One of those who had married foreign wives (Ezr 10<sup>28</sup>). 13. Son of Berechiah, one of those who helped to repair the walls of Jerusalem (Netl 3<sup>1,8</sup>). His daughter was married to Tobiah (6<sup>18</sup>). 14. Son of Besodeiah. He helped to repair the old gate (Neh 3<sup>8</sup>). 15. One of the company that stood at Ezra's left hand during the reading of the law (Neh 8<sup>4</sup>). 16. 17. A priest and a chief of the people who sealed the covenant (Neh 10<sup>7,20</sup>). 18. One of the princes of Judah who marched in procession at the dedication of the walls of Jerusalem (Neh 12<sup>28</sup>). 19. 20. 21. Two heads of priestly houses and a porter in the time of the high priest Joiakim (Neh 12<sup>18, 16, 28</sup>).

MESHULLEMETH (πρόψιρ, Luc. and B Μεσολλάμ, A Μασσαλαμείθ, Vulg. Messalemeth, Jer. de interpr. Messalem).—Wife of king Manasseh and

mother of Amon (2 K 21<sup>19</sup>). Her father's name (Haruz) and her birthplace (Jotbah) are both given. Similarly in the case of all the queenmothers who follow, but of none who precede, Meshullemeth. If the formula 'daughter of X from (the locality) Z' is due to a preference of the compiler, it may be an indication of the farthest point of time to which he was independent of his main source, in virtue of oral tradition, etc. But the change of style may have occurred in the main source itself. The name is a feminine form of the frequent masculine Meshullam (cf. LXX B and Luc). It is a passive in MT, but Jerome (Lag. Onom. Sac.<sup>2</sup> p. 77) gives the active meaning reddens as an alternative to the passive reddita (cf. the spellings of LXX A and Vulg.).

W. B. STEVENSON.

MESOPOTAMIA.—See ARAM.

MESS.—A mess is a viand, a dish, properly a dish of food sent to the table. It comes from Old Fr. mes (of which the mod. form mets is due, says Skeat, to a wish to show the connexion with mettre), which is formed from Lat. missum 'sent.' Cf. More, Richard III. p. 46, 'My Lord you have very good strawberries at your gardayne in Holberne, I require you let us have a messe of them.' Shaks. uses the word often, thus Lear, I. i. 119—

'He that makes his generation messes To gorge his appetite.'

Fuller, Holy State, p. 283, says, 'How often did reverend Whitgift (knowing he had the farre better cheere) send a messe of meat from his own table to the Ministers of Geneva?'

The word next and an array mas cell (from set to 'lift up') is translated 'mess' in (fn 43°46′4, 2 S 11°. Mess occurs also in Sir 30′18 'Delicates poured upon a mouth shut up are as messes of meat set upon a grave' (Gr. θέματα [from τίθημι to place] βρωμάτων). And RV introduces the word into He 12′18 'Esau, who for one mess of meat sold his own birthright' (ἀντί βρώσεως μιᾶς, lit. 'for one eating,' i.e. one meal: 'mease of meat' is the tr. of the Great [Crapmer's] Bible; it is echoed by Shaks. in Merry Wir', III. i. 63—'I had as lief you would tell me '. mess of porridge.' The tr. of the Rhem. NT 'a dish of meate'; the AV 'morsel of meat' comes from the Bishops' Bible).

J. HASTINGS.

means a messenger, and is so translated about 100 times in AV. It is used of messengers both public and private, both Satanic and Divine. But so frequently does the word designate a messenger from God that it assumes the special meaning of 'angel.' In LXX it is nearly always translated by αγγελος (exceptions are, e.g., Nu 21<sup>21</sup> 22<sup>5</sup>, Dt 22<sup>8</sup>, all in plu. πρέσβεις; Jos 6<sup>25</sup> ol κατασκοπεύσαντες; 1 S 25<sup>42</sup> παίδες); but this word άγγελος is rendered 'messenger' in AV in Mt 11<sup>10</sup>, Mk 1<sup>2</sup>, Lk 7<sup>24.27</sup> 9<sup>22</sup>, 2 Co 12<sup>7</sup>, Ja 2<sup>25</sup>, where it is evident that human messengers are spoken of; in 2 Co 12<sup>7</sup> St. Paul calls his thorn in the flesh 'a messenger of Satan to buffet me' (άγγελος σατανᾶ Ινα με κολαφίζη). It is rarely doubtful whether the meaning is 'messenger' in the original sense, or 'angel' in the derived or restricted sense. Only once does RV change 'messenger' into 'angel,' Job 33<sup>23</sup>, and Oxf. Heb. Lex. says that there the 'angel' of RV is too specific; the reference is to 'a messenger from God acting as an interpreter and declaring what is right' (RVm has 'messenger'). Only once \* is a prophet directly called a messenger of God (πης), άγγελος), Haggai (1<sup>13</sup>), but the name MALACHI (wh. see) is 'my messenger,' and Malachi uses the title not only of himself, of the priest as God's messenger carrying

\* Unless Nu  $20^{16}$  refers to Moses, which is not probable ; RV keeps  $\Delta V$  tr. 'angel.'

the law of the LORD to the people (2'), of the Forerunner of the Messiah (3'), but even of the Messiah Himself (3', AV and RV 'messenger,'

RVm 'angel'). See art. ANGEL. Other words trd 'messenger' are self-evident, but it may be pointed out that in NT dπόστολος 'apostle,' lit. 'one sent out,' is twice rendered 'messenger,' 2 Co 8<sup>23</sup>, Ph 2<sup>25</sup>. See APOSTLE. J. HASTINGS.

#### MESSIAH.

Introduction.

Introduction.

i. Jewish Messianic helief.

1. Outlines of its history.

(a) 'Messianic' expectations prior to or independent of the notion of a unique personal Deliverer.

(b) Hopes attached to the House of David.

(c) Early Evidence of Expectation of Messiah,

(d) Jewish beliefs as reflected in the Gospels.

(e) Evidence of Apocalyntic literature.

(a) Jewish beliefs as reflected in the Gospels.
(a) Evidence of Apocalyptic literature.
2. Discussion of special points.
(a) The Messiah as Prophet.
(b) The Suffering Messiah.
(c) The 'Son of Man'—Dn '7—Messiah's presented existence.

ii. The Christian transformation.

Jesus the true Prophet—the Servant of Jehovah—
suffering and death the way to triumph—the kingly
office of Jesus—His heavenly priesthood—His relationship to God.
The argument from prophecy still valid.

Literature.

In approaching this subject, it seems important to distinguish between the historical and the theological points of view from which it may be regarded, and to vindicate the rights of both. There is a danger that a sense, derived from Christian faith, of the purpose and the fulfilment of the hope of the Messiah may somewhat interfere with the accuracy of our view of the course of its The Messianic expectation was formed under the influence of the fundamental beliefs and the national experiences of the Israelite people, interpreted first by the prophets and subsequently by more ordinary religious reflexion and speculation. In a historical study we must be careful not to attribute greater distinctness or scope to the expectation at any epoch than had then been attained. The actual genesis and connexion of ideas must, so far as possible, be observed; and elements of the final conception, which existed first as separate thoughts and did not affect the process of development during its earlier stages, must be treated as separate till the time when they were in reality combined with the main body of doctrine. On the other hand, in the

relation to one another. It will be our aim in this art. (i.) to trace the origin and growth of the Messianic beliefs of the Jews, and then more briefly (ii.) to mark the character and extent of the change which these beliefs underwent in the Christian Church, and

endeavour to appreciate the true lessons of the history, to understand aright the meaning of the

facts, considerations are in place and are necessary, which are, properly speaking, theological—such, namely, as furnish the ground for, or are connected with, our belief in the Moral Government of the world and the Divine plan for man's Redemption,

and determine our estimate both of the Christian Faith and of the OT dispensation, and of their

its results as to the interpretation of OT prophecy.
i. JEWISH MESSIANIC BELIEF.—1. Outlines of its history.—(a) We shall be mainly concerned with the expectation of a personal deliverer. But it is impossible to place this in a right light, if we do not view it in connexion with the belief, as a whole, which the Jews had in the future blessings assured to them. From the conviction that they were the chosen people of Jehovah, and that He would be faithful to His covenant made with them, there arose in times of common distress and of exile the

confidence taught by the prophets, and which sustained the most pious and best part of the nation, that their national life, after it had been purified by the punishment of sinners and the discipline of the godly, would be restored, that they would obtain complete victory over their enemies, and that God would bestow upon them such glory and peace and well-being as would surpass all that had been realized in the happiest preceding times, and would satisfy perfectly all the longings of their hearts. These hopes existed before the expectation of a unique person who was to come—the Messiah—had been formed. This is exemplified by the Book of Zephaniah, the whole of which is occupied with a vision of the great day of the Lord's vengeance on the sinners in Israel and destruction of the surrounding nations, and the subsequent happiness of Zion, while yet the figure of Messiah does not appear at all. Again, there were periods in which, or portions of the Jewish world where, the expectation of a coming King seems to have fallen into abeyance, though the more comprehensive hope for Israel and Zion was still vigorous. This is exemplified by the Apocrypha and the writings of Philo. Nevertheless, these different forms of expectation had their roots in beliefs which were closely connected. This whole body of expectation may therefore not unlitly be, as it often is, called 'Messianic.' The importance of those originally simple anticipations, to which we have referred, will further appear when it is observed that out of them, and out of the imagery in which they were expressed, grew in time the elaborate and mysterious doctrines concerning the millennium, the final judgment, the world to come, and other last things (cf. ESCHATOLOGY in vol. i.).

(b) We come now more definitely to the history of the idea of the Messiah. God had not only made a special covenant with Israel, but with David and his descendants as its royal house (2 S 7<sup>8-17</sup>, Ps 89<sup>19-87</sup>). To the days of David and Solomon, especially, after-generations looked back as furnishing a pledge for the future. It is the renewed glory of the house of David, and the reunion of all the tribes under it, that Amos, for instance (9<sup>111</sup>.), and Hosea (3<sup>5</sup>) foretell, not the coming of the Messiah. Again, it is on the restoration of a succession of kings, not on one pre-eminent king, of David's line, that Jeremiah dwells (17<sup>26</sup> 22<sup>14</sup> 33<sup>16, 17</sup>). In some prophecies, however (Is 7<sup>14-16</sup> 9<sup>6, 7</sup> 11, Mic 4. 5), attention is concentrated upon a single descendant of David; and the language used respecting him, taken by itself, would seem clearly to imply the concentrate of the Mossieh, strigtly so called. Any remaining doubt whether it did so is suggested by the absence of confirmatory language, and even the contrary representations, in other nearly contemporary, or later, prophets. Unquestionably, however, the image of the king who, in accordance with God's covenant with David, stood in a peculiar relation to Jehovah ('I will be his father, and he shall be my son'), who reigned by His appointment, in His name, and by His power, who would do all God's will, whose rule should be one of absolute righteousness, who would compel all men to honour the God of Israel and bestow on His people perfect peace and happiness for ever, contained the essential characteristics of the idea of the Messiah, as that name came to be commonly understood among Jews. At most it was only necessary besides that the conception should be firmly apprehended, that it should be fixed in language, and become clearly recognizable.

(c) We proceed to examine the early evidence of the expectation of the Messiah as a unique personality, and in particular of the use of the title

'the Messiah' ('the Christ') as the distinctive name for such a one.

In order to understand the significance of the application of the name Messiah in the special manner which has become so familiar, we must glance at the use of the word in OT. The ceregrance at the use of the word in Or. The ceremony of anointing was used in making priests and prophets, as well as kings, and  $\pi \psi \tau (LXX \chi \rho \iota \sigma \tau \delta)$ , 'anointed,' is a few times applied to the first of these as an adjective (Lv  $4^{5.16}$   $6^{22}$ , 2 Mac  $1^{10}$ ). But as a substantive, 'the Lord's anointed,' 'Mine anointed,' 'Thine anointed,' it is used only of as a substantial and the s even in these passages the reference may be to the king. It is employed of the king, in contrast with the priest, even at 1 S 2<sup>35</sup>. The title is repeatedly given to Saul (1 S 12<sup>3</sup> etc.); but it acquired a far fuller meaning when used of David and his descendants, by reason of God's covenant with him (Ps 2<sup>2</sup> 18<sup>50</sup> etc.). Its transference to Cyrus (Is 45<sup>1</sup>) does but illustrate its primary force. See, further, art. Anointing. At 1) n 9<sup>2+25</sup> we possibly have the word used in that which have goes to be its distinction covers.

that which has come to be its distinctive sense.

If so, it is the earliest instance of this.

In the next oldest works which have to be noticed, as probably giving indications of the expectation of the Messiah, the title is not used; but this is explicable from the oracular, apocalyptic character of the writings in question, which favours an allusive or symbolical mode of speech. In the most ancient portion of the Sibylline Oracles (iii. 1. 97 to 1. 807, or according to some critics a little more), composed about B.C. 140, we have (l. 652 ff.) a description of a king whom God should send, who can hardly be other than the Messiah. Again, in one of the older sections of the Book of Enoch, the Vision of Seventy Shepherds, which probably belongs to the reign of John Hyrcanus (B.C. 135-106) [in art. ENOCH, vol. i. p. 707, it is placed somewhat earlier], and in which the history and destiny of the Chosen People are symbolically represented, the white bullock, it is generally allowed, denotes the Messiah. Another portion of the Book of Enoch, the so-called Book of Parables, should be considered at this point, if the period assigned for its composition in art. ENOCH, ib., is adopted, which is the strategies of the subsequence of the su and if the chronological order ought to be strictly adhered to. But critics differ widely in respect to its date. The supposed historical allusions in it are of very uncertain import. Even on this ground it would be well to reserve it for separate treatment, when the course of the history of the Messianic Hope, so far as it may be determined by means of evidence of more unquestionable character, has been reviewed as a whole. But there is still stronger reason for doing this. The Messianic doctrine of this book is, by common admission, unlike in important particulars to that found in any other Jewish document. Whatever, therefore, the time and circumstances of its origin may have been, it seems certain that it did not exercise any general influence.

We pass to the Psalms of Solomon, which contain full and clear evidence of the idea of the Messiah and also (Ps-Sol 17<sup>36</sup> 18<sup>6.8</sup>) of the use of the title. These psalms were most probably written by one author, and within no very wide limits of time. They contain allusions which can best be explained if the taking of Jerusalem by Pompey (B.C. 63) was still recent when some of Pompey (B.C. 63) was still recent when some of them were composed. Though we possess them only in Greek, they were evidently written origin-ally in Hebrew, and there is every reason to regard them as Palestinian. Pss 17 and 18 are some of the most important passages in all Jewish litera-

ture in connexion with the history of the Messianic Hope. Their thought and language are moulded on the portions of OT which celebrate God's covenant with David. Another fragment of the Sibylline Oracles, which is probably of a little later date than the Psalms of Solomon, contains an allusion to the Messiah (Or. Sib. iii. 46-50).

The comparative scantiness of the indications which we possess of the expectation of the Messiah in the last two or three centuries B.C. cannot be wholly explained by our want of knowledge of the period. The silence of the Apocrypha has already been referred to. The truth would seem to be that, in part owing to changed political circumstances, in part also to a deeper cause, a move-ment of religious feeling, the hope of the restoration of the Davidic monarchy, after it had slumbered for a while, re-awoke gradually, and in some parts of the Jewish world more decidedly than in others, and especially so in Palestine, during the last cent. and a half B.C., and that as it did so, a unique and ideal character was attributed to the person and mission of the expected king, such as had not before been, commonly at least, associated with any looked for occupant of the throne. The fact itself that he would be separated by so long an interval of time from all his predecessors contributed to this, and in addition a deepened sense of the magnitude of the events in connexion with which he would appear, and in which he would bear a part, had begun to enhance the idea of his greatness.

The chief elements in this early conception of the Messiah have become apparent in tracing its history, but it will be well to mark them carefully before proceeding further. He will be a descendant of David; Son of David comes to be used of him as a special appellation (first in Ps-Sol 17<sup>23</sup>, in the Gospels Mt 9<sup>27</sup> etc., and commonly in Rabbinic literature). He will be the ideal king, whose mind and action shall be in entire accord with the will of God, who will be God's true representa-tive upon earth, in whose days and through whom God will make good all His promises, and who will lead all men to honour the God of Israel and to respect Israel as God's people. The relation of the Messiah to the actual inauguration of this happy state of things cannot be precisely determined. It is clearly an exaggeration to say with Castelli (Il Messia secondo gli Ebrei, p. 164) and Dalman (Worte Jesu, p. 242) that the Messiah is never according to the original conception himself the deliverer, but only the king of the people after God has wrought deliverance. The writer of Ps 2, and those who took their ideas from it (e.g. Ps-Sol 1724), manifestly attributed the subjugation of the enemies of God to the agency of the Messiah. It was also evidently possible for writers who contemplated this to use language implying that the deliverance was God's work. The part taken by supernatural and by human agency would be, no doubt, somewhat variously conceived by different minds; but the language of the documents is not full enough to justify us in defining the views of the several writers with exactness. At the period we are considering, thought upon this subject would be vague. Only through a process of reflexion, and when it came to be a question of harmonizing diverse representations in the pro-phets, would the place in the succession of events at which the Messiah would appear be determined.

(d) The evidence so far considered brings us (a) The evidence so far considered brings us down approximately to the middle of the last cent. R.C. The Gospels are our next important source of information. They supply us with a lifelike picture of Jewish beliefs in Palestine at the time of our Lord's ministry. We gather that the expectation of One who should come—the Messiah—was an article of faith with the masses of the Jewish people, and with the Pharisees there. the main, their conception of him is that which has already been before us. But one or two additional truits appear. The Jews, whose discussions are reported in Jn 727, assumed that the coming of the Messiah would be unexpected and mysterious. The same idea is met with in the Talmud and Targum of the prophets, and in the mouth of Trypho in Justin (Dial. chs. 8 and 110). Again, we have a feature in the rôle of the Messiah corresponding rather to what is recorded of some of the greatest prophets than of the kings of old, when it is expected that he will work mighty miracles. That this was the common anticipation is implied in the answer of Jesus to John (Mt 11<sup>2π</sup>), and in the questionings of the Jews (Jn 7<sup>81</sup>). In Rabbinic literature we find evidence to the same effect.

(e) The development of eschatological doctrine, which may be traced especially in the Apocalyptic literature (see ESCHATOLOGY in vol. i. p. 741 ff.), necessarily affected the conception of the Messiah and his office. As the order of events at the end of the world came to be more clearly defined, his work was marked out with greater precision. work was marked out with greater precision. A more unearthly character was also imparted to him. The Apocalypse of Baruch and Fourth Ezra (see ESDRAS, SECOND BOOK OF) are important for illustrating the change. They may with confidence be pronounced to be Jewish, and there is their composition should be placed between A.D.

70 and the beginning of the 2nd cent. A.D. The described in dark colours. In the midst of them the Messiah appears. He is said to be preserved by the Most High to the end of the days. In 4 Ezr 13<sup>15</sup> he is seen as a man coming from the sea, flying with the clouds of heaven. Nevertheless just before, at 12<sup>32</sup> he is referred to as 'the Anointed One of the seed of David.' We must suppose, therefore, that the author had the notion which is met with in the Rabbinic literature, that one born of David's line had been caught away from the earth and was being kept in heaven, or in Paradise, till the time should have arrived for When he has executed vengeance on his Advent. all the enemies of God, and the dispersed of Israel have been gathered together, he will reign for a long period (400 years according to 4 Ezr) in a state of peace and plenty, such as that imagined in what Christians came to call the Millennium. Then the Messiah himself and all flesh would die. After this there would be a general resurrection and judgment by the Most High, and a new world. The Messianic doctrine of the Talmud and Targum agrees as to its main outlines and character with that attained at the time we have now reached. The additional point of most interest to be considered in connexion with them is the extent to which they bear testimony to the belief that the Messiah would participate for a time in the sufferings of men. Further reference will be made to this presently.

It has sometimes been held that there existed even in pre-Christian times various types of Messianic expectation. Gfrörer (in Jahrh. d. Messianic expectation. Girorer (in Janra. a. Heils, 1838) formulated this theory, distinguishing them as 'the common-prophetic,' 'the Danielic,' 'the Mosaic,' and 'the Mystical-Mosaic'; and Westcott (Introd. to Study of Gospels, ch. ii.) countenances this idea. But it does not fairly represent the evidence of our documents. In the Enochic Book of Parables, indeed, to which reference has already been made, and to the doctrine of which we shall recur under the next head, we do find a different type. But, putting this on one

side, the evidence, when arranged according to the times that the different portions of it most probably illustrate, sets before us a single line of orderly development. There is one root-conception which in process of time is elaborated, and in some respects changed, yet so that its original features remain recognizable throughout.

2. Discussion of Special Points.—There are some questions which need to be more particularly considered on account of their intrinsic importance, or the diversity of views held in regard to them, or their connexion with Christian doctrine. The first relates to an ideal other than the kingly one which was combined with it in Christian faith, but which seems in Jewish belief, at least before the Christian era, and in the main throughout, to

have been kept separate.

(a) The Prophet.—In Dt 18<sup>15</sup> the promise is given of 'a prophet like unto Moses'; yet if the whole context be taken into account the meaning seems to be, not so much that one supereminent prophet should be sent, but that God's people should not be left destitute of prophetic guidance. When prophecy had for a time ceased, and at a period when the expectation of a king of David's line does not seem to have flourished, religious hope was fixed upon the rise of a true prophet (1 Mac 14<sup>41</sup>; cf. 4<sup>46</sup> and 9<sup>27</sup>). Among the Jews of the time of our Lord's ministry the return of one of the famous prophets of old (Mk 8<sup>276</sup> and parallels, Mk 6<sup>15</sup>), or the coming of one who was defined as 'the prophet' (Jn 1<sup>21, 25</sup> 6<sup>14</sup>), was awaited. But in all these passages, except Jn 6<sup>14n</sup>, it is evident that 'the prophet' is distinct from the Messiah; and in that place, also, there is no need to suppose an identification of, or confusion between, the two ideas. Nevertheless, some traits taken from the prophetic character seem to have found a place in the conception of the Messiah's work and office. One, the working of miracles, has been referred to already. Again, the Messiah, according to the woman of Samaria, is to be the revealer of all truth that men need to know (Jn 4<sup>25</sup>). This view of the Messiah agrees with the special complexion of Messianic doctrine among the Samaritans at a later time.

(b) The doctrine of a suffering Messiah.—There are passages in the OT which teach deep lessons as to the Divine purposes that are accomplished through the sufferings of the righteous, and fore-shadowings even of one pre-eminent vicarious sufferer. But, so far as we can trace the connexion of ideas in these passages and their contexts, there does not seem to have been any clear reference to the Messiah and his atoning work in the thought of the writers. The suggestion for their pro-phecies seems to have come either through individual experience, or (as notably in the latter half of Isaiah) from the belief that, through the afflictions which the better part of the Israelite nation was undergoing, its purification and restoration were being effected.

We desire, however, to know what the influence of these prophecies was upon Jewish Messianic belief. The true answer appears to be that for a long time they did not affect it at all, and that they never did so to any considerable degree. There is no trace of the idea that the Messiah would undergo suffering, in the extra-canonical pre-Christian literature which we have been reviewing. And the evidence supplied by the Gospels seems to show conclusively that no such belief existed among the Jews at the time of our Lord's ministry. His own disciples were totally unprepared for His announcements on the subject. And yet, if such a belief was to be found anywhere, it might be expected to be among those who were attracted by the character and teaching of

There were differences in the spirit in Jesus. which the Messiah and his times were thought of and desired. The mass of men thought chiefly of victory over their enemies and the bringing in of great material prosperity, while the truly pious dwelt on the remission of sins (Lk 177). But there is no sign of this remission being connected with the vicarious sufferings of the Messiah except in the Baptist's words (Jn 129. 25); and plainly this inspired utterance cannot be taken as evidence of Jewish belief: those who heard it do not seem to have understood it at the time. Some have held that in our Lord's time there had, through devotion to earthly ideals, been a decline, esp. in regard to the point under consideration, from a conception of the Messiah prevalent in an earlier age which had been more truly in accord with prophetic teaching (cf. Liddon, Divinity of our Lord, II. ii.). It would be strange if this fuller and higher doctrine had been so completely lost, as it must in that case have been. Moreover, as we have seen, this theory has no documentary support.

We pass to writings subsequent to the Christian era. The view of 4 Ezr that Messiah would die after a long and prosperous reign, at the end of this world, has evidently nothing to do with atoning Christian controversialists appear to have been equally mistaken in the meaning they have often attributed to the doctrine of two Messiahs—Ben-Joseph and Ben-David. The former is the Messiah of the ten tribes, a warlike deliverer and king. He was, it is true, to die, but only in order to make way for the union of the whole nation under Messiah Ben-David.

In the Targum of Jonathan much of Is 52<sup>13</sup>–53<sup>12</sup>

is applied to the Messiah, but those verses which speak of the sufferings of the Servant of Jehovah are referred to the Israelite nation. And the general current of Jewish interpretation is to the same effect. There are some traces in the Talmud of the belief that the Messiah would suffer with the sufferings of his people, and that he is the subject of the whole of this prophecy; but they are rare, and are not found in the earlier portions.

A good deal of stress has been laid on the fact that Justin Martyr in his Dialogue with Trypho represents his Jewish interlocutor as forced to allow that the Scriptures foretell a Messiah destined to suffer (chs. 68. 89. 90). But this cannot rightly be pressed, since Justin may attribute this admission to his, perhaps partly imaginary, opponent, as a literary device for setting forth his own argument. If accepted as evidence of Jewish opinion, it could only show that some Jews a little before A.D. 150 did not feel able to resist this interpretation of prophecy when it was urged upon them by Christians.

We may observe, in taking leave of this subject, that before the historical realization in Jesus Christ, and apart from belief in Him, it must have been extremely difficult to combine the idea of suffering with the conception of the promised king derived from the representations of OT prophecy generally. It can have been possible at all only for men of unusual depth of spiritual insight and

men of unusual depth of spiritual insight and sympathy with the sorrows of their people.

(c) The use of the name 'the Son of Man,' the Messianic interpretation of the vision in Dn 7, and the doctrine of the Messiah's pre-existence.—The Messiah was certainly not called 'the Son of Man' by Jews with that fulness of signification which Jesus gave to the name. The use of this title for the Messiah among Jews, if it was used by them at all, is closely associated with the interpretation at all, is closely associated with the interpretation of Dn 7, and the discussion of the two points may

conveniently be connected.

From Jn 12<sup>34</sup> it appears that the Jews were puzzled by the designation 'the Son of Man,' and

that it was not with them a recognized title for the Messiah. Indeed, if it had been, the use of it by Jesus could hardly be reconciled with His course of action as a whole. We gather from the records generally, that He refrained till the very end of His ministry from claiming before the multitude to be the Messiah, and till within a few months of the close from making this claim before even the innermost circle of His disciples. Yet He repeatedly and openly designated Himself from an early period by the name 'the Son of Man.' It is true that, in connexion with this early and public use of it, He does not introduce imagery taken from, or similar to, that of the vision in Dn 7, as He does in later sayings addressed to His disciples which contain this title. From the first, however, His use of it was marked and emphatic, and such as would not have been consistent with the rest of His conduct, if it already commonly denoted the Messiah.

With respect to the vision in Dn 7 it has to be observed that he who is brought to the Ancient of Days is described not as 'the Son of Man,' but as 'one like unto a son of man.' Further, the vision is accompanied by an interpretation, from which it appears that this human form represents 'the saints of the Most High' (vv. 18. 22. 27) in contrast with the earthly kingdoms represented by forms of beasts. Nevertheless, from the relation between the form of the vision in 4 Ezr, to which allusion has already been made, and that in Dn 7, we may clearly infer that the writer of the later Apocalypse saw a reference to the Messiah in the language of his prototype. But it should be noted that he described the Messiah not as 'the Son of Man' or as 'like unto a son of man,' but as 'like unto a man.' In Rabbinic literature, from the 2nd cent. onwards, indications of the Messianic interpretation of the vision in Dn 7 are rot wanting, but they are not prominent. There is nothing in this literature to lead us to suppose that 'the Son of Man' was ever in common use as a name for the Messiah.

The employment of imagery such as that of Daniel's vision in describing the advent of the Messiah implies his existence before his appearing, in some extra-terrestrial region. But this view could, as we have seen, be harmonized with the belief that he would be of David's line, by supposing that a descendant of David had been first caught up from the earth, or that David himself or one of the kings of his house would reappear. And as the Davidic lineage of the Messiah was a thoroughly established dogma, and there is no reason to suppose that any doubt on the point was entertained, or would have been tolerated, in the Rabbinic schools, we must conclude that any pre-existence of the Messiah before his manifestation to men which they thought of, was only such as was consistent with a previous human birth.

Harnack indeed (Dogmengesch. i. 755) asserts that, as a way of representing to themselves the Divine foreknowledge, the Jews were in the habit of supposing that every important person or thing which has successively appeared or is to appear on earth has first existed in heaven, and that such a heavenly pre-existence was assumed in the case of the Messiah in accordance with this mode of thought. But G. Dalman, the chief expert in Jewish literature among recent writers, emphatically denies that this was a Jewish, or at all events a Palestinian, principle. He does not allow that the familiar instances of the heavenly prototypes of the holy city and the temple establish it (Worte Jesu, p. 245). We may at least say that it must be difficult for us to understand exactly and fully what such a notion imported, even where we seem to find it, and that consequently it must be

rash for us to imagine it in the case of persons and objects with which it was not plainly associated. The older Rabbinism at least seems to have contented itself with the idea of the pre-existence of the Name of Messiah (Ps 72<sup>17</sup>). (See Dalman, ib. p. 247).

One work there is, apparently Jewish, which is an exception in Jewish literature in regard to more than one of the points which we have been discussing -the Enochic Book of Parables, to which reference has been made, but the consideration of which was deferred. The present is a suitable opportunity for making a few remarks upon it. In this document the Messiah is repeatedly called 'the Son of Man,' and described as surrounded with majesty in the presence of the Lord of Spirits, and reserved for a future manifestation. Furthermore, he is to be the Judge in the Universal Judgment-a function never assigned to the Messiah, but always ascribed to the Most High in other Jewish writings. in spite of the various points of contact with Christian ideas and language, there is nothing (save one phrase, which is probably to be otherwise explained) to connect this Son of Man with the Christ of Christian faith, who has been crucified and has since ascended to His throne, and is waiting to return in glory. It is very unlikely that a Chrisreturn in glory. It is very unlikely that a Christian writer would have so concealed his own belief, or that a Christian interpolator, while introducing those passages and expressions which correspond with Christian rather than with Jewish ideas, would have done his work with so much reserve. The traits in question may however, for all that, be due to Christian influence. To any one who considers how Christian teaching affected the thought of many pagans in the early centuries, even sometimes of such as remained most hostile to Christianity, or who is at all familiar with the many instances of the same kind which there are among educated Hindus at the present day, this will seem a not improbable hypothesis. And in the relations which existed during the 1st cent. A.D. between Jewish Christianity and Judaism there were the conditions which would make such effects natural. It is to be added, that even if it is a mistake to trace the peculiarities of the Enochic Book of Three Parables to Christian influence, it may still be post-Christian. It is true that 'the figure of the Messiah is here drawn specially in dependence upon the Bk. of Daniel.' But it would not be justifiable to regard this as making an early date more cred-For between the original vision and this rendering of its imagery there lies a difference in the definiteness and fulness of the Messianic ideas implied, which was only by degrees approached and never elsewhere attained among Jews.

ii. THE CHRISTIAN TRANSFORMATION .- The fact that Jesus claimed to be the Christ, and the significance of this fact, the manner in which and the time when He did so, and the part which the tem-per of the prevalent Jewish expectation had in determining His course of action, need not here be considered. It must suffice to note that He gave a new character to the conception of the Christ when to His acceptance of His disciples' faith in Him, as such, He linked the distinct announcement of His approaching sufferings (Mk 8270. and parallels, Mk 10<sup>35-45</sup> = Mt 20<sup>20-28</sup>). In the minds of the first members of the Christian Church, the experiences of the Cross, the Resurrection, and Pentecost, together with the impression which the character and work, the life and teaching of Jesus had made upon them. led to a rapid transformation, pregnant with important consequences, of the idea of the Messiah which they had held as Jews. They turned again, as Jesus had taught them to do (Mk 12<sup>10, 24</sup> = Mt 21<sup>42</sup> 22<sup>29</sup>, Mk 14<sup>40</sup> = Mt 26<sup>54</sup>, Lk 4<sup>17</sup>, Jn 5<sup>79</sup> etc.), to their ancient Scriptures, and read them with new

eyes. They found scattered there the elements of a relatively complete ideal, which had been perfectly fulfilled in Jesus. The process by which they combined them was uncritical, and was to a large extent performed unconsciously, but the result was in harmony with essential truth.

By the very character which Jesus had assumed in His mode of life and ministry, attention was directed to the promise of a true prophet, and we are not surprised to find that special stress is laid on it in the early prophing in the  $\Delta vic (\Delta a.2787)$ 

it in the early preaching in the Acts (Ac 3<sup>22</sup> 7<sup>37</sup>).

The references in the same part of NT to 'the servant of Jehovah,' though they have not perhaps been commonly noticed, can hardly be questioned when they have been pointed out (Ac 4<sup>27, 20</sup>, where \pi a\text{is} should, in view of the manifest allusions to Is, and the use of this term in the LXX, be rendered—not with AV 'child'—but with RV 'servant,' as also at Ac 3<sup>13, 26</sup>). His 'anointing' (Ac 4<sup>27</sup>, cf. Is 61<sup>1</sup>) with the Spirit served as a link to connect Him with the king of David's line. It may be permissible to see an allusion to the same figure of prophecy in the parable Lk 14<sup>161</sup>, though δούλοs is the word there employed.

But the question upon which the whole controversy between believers in Jesus as the Christ and the Jews necessarily turned was as to the Divine intention, foreshown in the prophets, that He should pass through suffering and death to His triumph (Ac 3<sup>18</sup> 8<sup>32t.</sup> 17<sup>3</sup> 26<sup>23</sup>). Stress was also laid upon those spiritual blessings, the expectation of which had already been associated with the Messianic times—the call to repentance, the remission of sins, peace, the outpouring of the Spirit (Ac 2<sup>17-21</sup> 5<sup>31</sup> 10<sup>36</sup>).

Two comings of the Messiah, first in humiliation, then in glory, were now distinguished, and this distinction became a characteristic article of the Christian faith; for the withdrawal from the earth of one who had not in any way discharged the office of Messiah, though destined to do so hereafter, according to the Jewish notion referred to above, can hardly be regarded as equivalent. Further, even from the very necessities of the case, the kingship of the Messiah could no longer be conceived as primarily an earthly one. He had been exalted to a throne in heaven at God's right hand, whence He was expected to return in glory. Some, and for a time many, Christians supposed that He would then reign upon earth for a certain period. But to thoughtful believers this must always have seemed a very subordinate part of His discharge of His kingly office. It scarcely appears in the NT (Rev 20° is the only passage that can be regarded as a distinct indication of it). The predominant thought was that of a heavenly king. Moreover, He was to be the Judge in the final universal judgment (Ac 10° 17° 30° 31°, Ro 2° 16°, 2° Co 5° 10°, Mt 25° 31°).

Meanwhile He exercises a heavenly priesthood. This aspect, too, of Messiahship was first clearly brought out in Christian teaching. That this was so, appears from the fact that Christian believers did not at once perceive it. The title of 'priest' is in NT given to Jesus Christ only in Ep. to Heb.; and His right to it is founded primarily upon a pussage in which a psalmist had once recognized the priestly character belonging to Israel's king (Ps 1104, He 56 7. 84). Lastly, a meaning so much loftier than before was given to His relationship to God, that the title 'the Son of God' lost, or almost so, the associations with specifically Messianic ideas which it once might have had.

ideas which it once might have had.

To some the view of OT prophecy suggested in this article may be disappointing. For the purpose of the argument from prophecy in support of the Christian faith as it has been ordinarily used, the strictly miraculous character of the prophecies should be as plain as possible. Predictions are

therefore demanded, the reference of which is guaranteed by their circumstantial accuracy, and by their having been more or less clearly intelli-gible before the time of fulfilment came. Modern inquiry has rendered it doubtful how far the predictions satisfied these requirements. But, on the other hand, the history which we have been tracing is full of the signs of Divine Providence. The whole religious history of Israel down to the time of Him whom Christians believe in as the Christ, and in a special manner the teaching of the prophets, formed a most remarkable preparation for His coming. It remains true as ever, and criticism and historical investigation only confirm it, that the Scriptures were in reality full of Him, and that, in proportion as men had entered into their spirit, they must have been able to receive Him (Jn 5<sup>38</sup> · <sup>39</sup>). It is still legitimate as ever to regard types and ideals which were first fully realized in Him as divinely intended to foreshadow Him. And if the method in which Israel was trained in its great hope, even while in many respects unique, was more analogous to that in which truth has ordinarily been unfolded to mankind, permitting a larger amount of illusion and error on their part than has sometimes been supposed, it may for this very reason be the more instructive.

LITERATURE.—Drummond, The Jewish Messiah: A critical history of the Messianic idea among the Jews from the rise of the Maccabees to the closing of the Talmud; Castelli, It Messia second of it Brei; Schurer, GJV 3 ii. 496 ff. [HJP 11. ii. 120 ff.]; Dalman, Der leidende und der sterbende Messias, and Die Worte Jesu; Driver and Neubauer, The Jewish Interpreters of Isaiah liii.; Stanton, The Jewish and the Christian Messiah. For the literature connected with the Jewish documents referred to, see the arts. upon those works.

V. H. STANTON.

METE, METEYARD.—To 'mete' (from Anglo-Sax. metan, and radically connected with Gr. μέτρον, Lat. metiri, Eng. 'measure'; and even with Gr. μέτων to rule, Lat. modus, measure, moderation, Eng. 'mode,' 'modest,' etc.) is to measure. Thus Ex 16<sup>18</sup> 'And when they did mete it with an omer, he that gathered much had nothing over, and he that gathered little had no lack'; Mt 7² 'With what measure ye mete, it shall be measured to you again.' Cf. Knox, Hist. 97, 'But bee yee assured, my Lord, with such measure as ye mete to others, with the same measure it shall be met to you againe.' Tind. uses the word in Dt 21² 'Then let thine elders and thi judges come forth and meet unto the cities that are rounde aboute the slayne,' and Cov. in Itu 3<sup>16</sup> 'And he meet her sixe measures of barlye.' Sir John Cheke, in his determination to use Anglo-Saxon at all hazards, turns Tindale's 'cubite' in Mt 6² into 'half yard mete.' Chapman uses the verb in Iliads, iii. 327—

'Then Hector, Priam's martial son, stepp'd forth, and met the ground.'

Meteyard is used by Tindale in Lv 19<sup>35</sup> as the tr. of nata and a measure, and it is retained in AV and RV. The word occurs also in Pref. to AV, 'neither is it the plain-dealing Merchant that is unwilling to have the weights or the meteyard brought in place, but he that useth deceit.' Coverdale has the similar forms 'meteline' (Jos 17<sup>5, 14</sup>) and 'meterod' (Ezk 40<sup>5, 5</sup> 41<sup>8</sup>).

J. HASTINGS.

METHEG-AMMAH.—AV and RVm in 2 S 8¹
'David took Metheg-ammah (מְצְתִּי מִרְיִ) out of the hand of the Philistines.' AVm has 'the bridle of Ammah,' RV text 'the bridle of the mother city.' This last rendering is pronounced to be 'probable' by Driver (Text of Sam.), who points out (see his references) that is has the sense of mother city or capital in Phenician. 'The bridle of the mother city' would mean the authority of the metropolis or capital of the Philistines, namely Gath (so Ges.,

Keil, Stade). Budde [in SBOT] makes various objections to this, and leaves the expression blank in his Heb. text as irrecoverably corrupt. The LXX reads τὴν ἀφωρισμένην, which may, according to Wellhausen, imply a reading πρης το Wellh. himself (Sam. 174) emends to πρης πι 'Gath the mother city,' comparing 1 Ch 181 πρης πι 'Gath and her daughter towns'), which he argues may have arisen from the text he postulates in Samuel. Klostermann attempts to obtain from the two texts (of S and Ch) πρικρίτηκη πιστικ 'Gath and her border to the west.' Thenius emends to προς 'bridle of tribute,' i.e. 'David laid the Philistines under tribute.' Löhr despairs of recovering either the meaning or the text. Cheyne (Expos. Times, Oct. 1899, p. 48) emends to προς πίπος, 'Ashdod, the city of the sea.' Sayco (EHH 414 n.) suggests that προκρίτης is the Heb. transcription of the Bab. métég ammati (for métêg ammati): "the highroad of the mainland' of Palestine. The reference would thus be to the command of the highroad of trade which passed through Canaan from Asia to Egypt and Arabia; but the appearance of such distinctively Babylonian words in Hebrew of this date is extremely improbable.

J. A. Selbie.

METHUSELAH (π'μγιτρ).—A Sethite, the father of Lamech, Gn 5<sup>21π</sup>, P (A Μαθουσάλα), 1 Ch 1³ (B Μαθθουσάλα, A Μαθουσάλα), Lk 3³ (Μαθουσάλα) = ΜΕΤΗUSHAEL (which see) in J's genealogy, 4¹8. The name π'μγιτρ is interpreted by Holzinger as 'man of the javelin' (Mann des Geschosses), a fitting name for a time when the earth was full of violence. Ball (in SBOT), following Hommel (PSBA, March 1893), makes the name='man of Selah,' where Selah may be a modification of Bab. Sarrahu, a title of Sin, the god of Ur Casdim. Methuselah would thus answer to Berosus' 'Αμέμψινος = Amel-Sin, 'Sin's man.' While Ball remarks that the form Methushael, 'man of El,' is less original than Methuselah 'man of Selah,' Sayce (in Expos. Times, May 1896, p. 367) suggests that Methushael, an exact transcription of the Bab. Mutu-ša-ili, has been in 'the Sethite genealogy corrupted into Methuselah (perhaps for Mutu-ša-ilati, 'man or husband of the goddess'), which does not admit of an etymology.'

J. A. Selbie.

J. A. SELBIE.

METHUSHAEL (ὑκψιπ).—A Cainite, the father of Lamech, Gn 4<sup>18</sup> (J); LXX (A) Μαθουσαλά, which is read also for Methuselah (πὰψιπ) in P's genealogy, 5<sup>21π</sup>. The interpretations of the name are various. Dillm. remarks that ὑκψιπο may have meant 'suppliant or man of God' (Ges. Thes.; = Mutu-ša-ili according to Lenormant, Origines de l'histoire², 262 f., cf. Sayce in Expos. Times, May 1896, p. 367, May 1899, p. 353; Hommel, ZDMG xxxii. 714), or 'one who has been obtained by asking' (Budde), but not 'man of Sheol' (Redslob). See, further, Spurrell, Notes on Genesis, ad loc.; Gray, Heb. Proper Names, 164 f.; Budde, Urgeschichte, 129.

METRE.—See POETRY.

MEUNIM .- See MAON.

MEUZAL.—Ezk 2719 AVm. See UZAL.

ME-ZAHAB (בְּחֵי מֵבְ 'waters of gold').—Father of Matred and grandfather of Mehetabel the wife of Hadar (Hadad), one of the kings of Edom, Gn 36<sup>59</sup> (A Μεζοδβ)=1 Ch 1<sup>50</sup> (LXX om.). The name Μεzahab (cf. Με-deba) is certainly, as Hommel (AHT 264 n.) remarks, much more like that of a place than of a person. Holzinger (Gen. ad loc.) suggests that it is the same name which appears in a corrupted form in Dt 1¹ as בקו יו Dε-zahat. Hommel

(l.c.) makes the radical suggestion that 'it is a question whether we ought not to restore Gn 3639 Ass follows: "and his (Hadur's) cities were Pa'ish (in MT Pa'a, var. Pa'i, LXX Φογώρ), Me'eshet, Mehêtab-el, Bath-Matred, and Mê-zahab."

MEZOBAITE.—One of David's heroes is called in 1 Ch 114 'Jassiel the Mczolaite' (הקיניקוי). As Kittel (in SBOI) remarks, the MT is 'certainly incorrect, but totally obscure.' B has Μειναβειά, Α Μεσωβιά, Luc. Μασαβιά.

MIBHAR.—In 1 Ch 1188 one of David's heroes appears as 'Mibhar the son of Hagri' (קדָר בָּּרָ) The parallel passage 2 S 23% reads, of instead of στις] vids Γαλααδδεί (Β; A . . . Γαδδί). See Driver (Text of Sam. 284) and Kittel (SBOT on 1 Ch 1138).

MIBSAM (οψης).—1. A son of Ishmael, Gn 25<sup>18</sup> (A Μασσάμ) = 1 Ch 1<sup>29</sup> (Β Μασσά, Α Μαβσάν). 2. Α Simeonite, 1 Ch 425 (Β Μαβασάμ, Α Μαβασάν).

MIBZAR (אַבֶּבֶּי 'fortification'). — A 'duke' of Edom, Gn  $36^{42}$  (Ma $\xi d\rho$ )=1 Ch  $1^{58}$  (B Ma $\xi d\rho$ , A Ma $\beta \sigma d\rho$ ). If we take Mibzar as a place-name, Dillm. rejects decidedly Knobel's identification and  $\xi = 0$ . with Sela or Petra, and, while pronouncing Hitzig's view 'more possible' that Midzar is the same as Bozrah of v.<sup>10</sup>, he thinks it 'most probable,' in view of the words of the Onomasticon (ξτι καὶ νῦν κώμη μεγίστη Μαβσαρά έπι της Γαβαληνης, υπακούουσα τη Πέτρα), that this identification must also be given

MICA (κρτρ). — 1. Son of Merib-baal (Mephibosheth),  $2 \times 9^{12}$  (B Μειχά, A Μιχά), called in 1 Ch  $8^{34}$ .  $9^{40}$ . Micah (πρτρ). See MICAH, No. 2. 2. Son of Ziehri,  $1 \text{ Ch } 9^{15}$  (B Μειχά, A Μιχά), Neh  $11^{17}$  (B Μειχά, A Μιχά), Neh  $2^{17}$  (B Merica)  $2^{17}$  (B Merica) Maχά, A Mιχά), where he is called son of Zabdi, v.<sup>22</sup> (B Μειχά, A Μιχά) = Micaiah (ק:יָבָיִדֶּ) of Neh 12<sup>35</sup>. See MICAIAH, No. 7. 3. One of those who sealed the covenant, Neh 1011 (A Max4, B om.).

MICAH.—1. (סִיכָה, but מִיכְיהוּ in Jg 17¹. ⁴; see Gray, HPN 157, B Meixalas, A Mixl). A resident in the highlands of Ephraim, whose story is related in a supplement (chs. 17, 18) to the Bk. of Judges, with a view to explain the origin of the sanctuary of Dan. There is no need to doubt the historicity of the narrative, though it contains signs of revision, if not of composite authorship. That two accounts were woven into one, is the conjecture of some critics, whilst others try to explain the phenomena of the text on the supposition of redaction by a reviser who was indignant at the pretensions of the Danite priests. For a full and fair statement of the different opinions, see Moore, Judges, xxix. xxx. 366-369. The nucleus of the story is evidently of great age, and the events it describes may be assigned with some confidence to the generation after the invasion by Joshua.

Micah stole 1100 shekels of silver from his

mother, but restored the money on hearing the curses with which she threatened the unknown thief. His mother thereupon had part of the silver made into 'a graven image and a molten image'; but as the context speaks of but a single image, and the former term is sometimes used (Is 4019 4410) generically for an idol though cast, the latter term is probably an editorial explanatory addition of subsequent date to that of the earliest form of the story. This image of J" was given to Micah, who placed it in his private chapel, together with an

'ephod,' which was some portable object used in divining (Jg 8<sup>27</sup>, 1 S 23<sup>6</sup> · 9 30<sup>7</sup>) and not necessarily a part of a priestly dress, and 'teraphim' or idols, possibly household gods. There is no evidence that these were the bust or insert of a procedure. that these were the busts or images of ancestors: but they were used at least in later times in some unknown way for the purposes of divination (2 K 23<sup>24</sup>, Ezk 21<sup>21</sup>, Zec 10<sup>2</sup>). See EPHOD. One of Micah's sons was formally invested with the office

In the course of time a Levite in search of a

of priest.

livelihood migrated from Bethlehem to Mount Ephraim, and settled there. He is described as of the family of Judah (177), and as a grandson of Moses (1830, where MT has Manasseh, written, however, with a suspensum). The most likely explanations of the former phrase are that Levite here means merely a descendant of Leah, or that, the tribe having been broken up, the man in question had attached himself to that of Judah (Gn 49<sup>5, 7</sup>), or that the word Levite is not used here technically of a clan but of a profession, and denotes that the man was an expert in religious lore and in the art of divination; but no explanation is entirely free from difficulty. In the latter phrase the change of Moses to Manasseh in some of the texts was possibly due to an attempt to detract from the dignity of the priesthoods of the early northern sanctuaries, for whose officials a Mosaic lineage seems to have been justly claimed; see JONATHAN, No. 1. This young Levite was welcomed by Micah, who attached him to his household (1711), and transferred to him the duties at first assigned to his own son. But soon afterwards the Danites, finding their quiet establishment in the district allotted them by Joshua impossible on account of the resistance of the Philistines and the Amorites (Jg 1<sup>34</sup>, Jos 19<sup>41</sup>), sent five of their tribe to find a suitable place for settlement elsewhere; and these, while passing through the highlands of Ephraim, stayed for a night at the house of Micah. There they recognized the Levite by his voice, as, if he were actually a descendant from Moses and a recent resident in their own neighbourhood, they may well have done; though, according to a less natural explanation, the southern dialect that he used was the cause of the recognition. At their request he consulted the oracle for them, and promised them success in their expedition. At Laish (or Leshem, Jos 1947), the northern limit of the settlement of Israel, identified by name and ancient authority with Tell el-Kadi (less probably with Banfas; see G. A. Smith, HGHL, 473-481), they found an attractive locality and an unwarlike people, and returned with the tidings to the temporary centre of their tribe in the district made famous by Samson's exploits. Six hundred of the Danites, with their families and cattle (1821), determined to migrate to Laish. On approaching the village in which Micah lived, the main body halted at its entrance, whilst the five were detailed to secure the idols. They profive were detailed to secure the idols. ceeded to the house of Micah, and, after greeting the Levite, seized the idols; and when the Levite expostulated, they persuaded him to keep quiet and even to accompany them as the priest of their tribe. Hastily rejoining their comrades, they sent forward their families and flocks, placed the Levite and his apparatus in their midst, and marched with the majority of the 600 in the rear to guard against attack by pursuers. Micah collected a few of his neighbours, and overtook the column at some distance from the village; but his remonstrances were received with contemptuous menace, and, as the employment of force by his little band was out of the question, he was obliged to return home and leave his idols in the hands of the Danites. They continued their march to the Danites.

359

Laish, which they took without difficulty; and in a new town built on the site of the old they set up a temple of their own in charge of Micah's Levite, who thus became the ancestor of the Danite

MICAH

priesthood.

How long this priesthood lasted is not known. The note of time (183) is of little help. If 'the day of the captivity of the land' (1830) is not a late editorial addition, it will probably denote the times of the Philistine wars under Eli; but if it is, the conquest of Galileo (2 K 1529) by Tiglath-pileser in B.C. 734. See art. JUDGES (BOOK OF), in vol. ii.

p. 818 f.
2. (מִיקָה) in 1 Ch 8<sup>34, 36</sup> [B Μεχιά, Α Μιχά] 9<sup>40, 41</sup>
[B Μειχά, Α Μιχά], מִיקָה, RV Mica, in 2 S 9<sup>12</sup>) A son of Merib-baal (or Mephibosheth), and grandson of Jonathan. The name occurs alike in the general Benjamite genealogy (1 Ch 8<sup>84, 35</sup>), and in the specific one of the house of Saul (1 Ch 9<sup>40, 41</sup>). The allusion in 2 S 912 (B Meixá, A Mixá) is probably a late genealogical gloss to remind the reader of the line of descent notwithstanding such passages as 2 S 215-9. 3. The name and head of the chief family of the Uzziel branch of the Kohathite Levites, according to the arrangement for public service attributed to David in 1 Ch 23<sup>20</sup> (B Μειχάs, A Μιχά). The name is repeated in 1 Ch 24<sup>24</sup>. <sup>25</sup> (B Μειχά, A Μιχά) in the classification of the Levites according to their duties. 4. A name occurring in the genealogy of Reuben (1 Ch 55) as that of an ancestor of Beerah, the chief of the Reubenites carried into captivity by Tiglath-pileser. 8. A contemporary of Josiah and the father of Abdon, 2 Ch 34<sup>20</sup> (B Μειχαίας, A Μιχαίας), who is called Achbor son of Micaiah in 2 K 22<sup>12</sup>. 6. A Simeonite, father of Ozias, one of the three rulers of Bethulia in the story of Judith To the same tribe belonged Judith herself (92) (B Μειχά, A Μιχά), and probably the other rulers, with the majority of the population of the district; and warrant for confidence in the antiquarian accuracy of the author of Jth, and for the assumption of a Simeonite settlement in the north, may be found in Gn 497, 2 Ch 159 346. 7. See next article. R. W. Moss. article.

MICAH (מְּכְּהָה Jg 17¹.4; in pause מִּכְּהְ 2 Ch 17¹; shortened מְּכָּה Jer 26¹³ and מִיכָּה Mic 1¹;='who is like J'?' [cf. Ex 15¹¹, and מִיכָּא in Nu 13¹³]).—A proper name of very frequent occurrence in the OT (see preceding article). The best-known men who bore this name are—1. Micah of Mt. Ephraim, who appointed a Levite to minister as priest before who appointed a Leville to minister as priest before the image (nix) which his mother had caused to be made from 1100 shekels of silver. See the pre-ceding article, No. 1. 2. Mica(ia)h ben-Imlah, a man of kindred spirit with Elijah, who, at the moment when Ahab of Israel desired to secure the alliance of Jehoshaphat of Judah against the Syrians, predicted, in opposition to the prophet Zedekiah, the unfortunate issue of the campaign and the death of Ahab, and ranged himself as a true prophet of J" over against the lying prophets (1 K 22). One will hardly be wrong in tracing the attitude of Mica(ia)h ben-Imlah to the grounstance that Abab faroused the to the circumstance that Ahab favoured the worship of the Tyrian Baal in Israel—a practice which appeared to Mica(ia)h irreconcilable with Israel's belonging to J". On the reference with larael's belonging to J". On the reference probably intended in 1 K 22.22 τρο τους υτρέ to the opening words of Mic, see König, Einleit. in d. AT, p. 330. See, further, MICAIAH, No. 3.

3. MICAH (B Μειχαίας, A Μιχαιάς) ΤΗΕ PROPHET,

of Moresheth (wh. see), the younger contemporary of Isaiah, after whom one of the writings in the Dodekapropheton is named, the 6th in the Heb. order but the 3rd in the Greek.

i. The Contents and Unity of the Book.—There can be no doubt that the prophecies collected in

the book which bears his name proceed only in part from Micah, for alike in contents and style they are totally diverse in character.

(a) The first three chapters, apart from 2<sup>12t</sup>, present no difficulty. The prophet begins with announcing the Divine judgment, which accomplishes itself in two acts, namely, upon Samaria and upon Judah, although, of course, the judgment upon Judah forms the central point of his message. Then chs. 2 and 3 state the reasons for the judgment denounced upon Judah in 1917, and it is especially against the ruling classes in Jerusalem that Micah utters his reproaches. The verses 2<sup>12t</sup> are quite foreign to this line of thought, for they presuppose the Exile, and occupy themselves with the restoration of the people.\*

(b) To these denunciations of judgment in chs. 1-3 we have the counterpart in chs. 4-5, which open a glimpse into the Messianic time. Against their composition by Micah there are the following objections: (1) The strange conjunction of the Messianic hopes of 4<sup>10</sup> with the threatenings of 312; (2) the circumstance that mutually exclusive views present themselves (cf. 4<sup>6-8</sup> with v. <sup>9f.</sup>, 4<sup>11-13</sup> with v. <sup>14</sup>, 5<sup>1-8</sup> with v. <sup>4\*</sup>), and that frequently a connexion can be established only by very artificial methods (cf. 4<sup>4</sup> with v. <sup>5</sup>, 4<sup>8</sup> with v. <sup>9f.</sup>, 4<sup>11-13</sup> with v. <sup>14</sup> 5<sup>1-8</sup>); (3) the dependence upon trains of ideas which did not become current till after the time of Micah (cf. 411-18 with Ezk 38 f.), as well as the presupposing of relations which were strange to Micah's era (cf. 46-8 [2]<sup>21</sup>.] 5<sup>1</sup>. If there are any words of Micah at all in chs. 4-5, these can include no more than 4<sup>2</sup>. <sup>14</sup> 5<sup>9-18</sup>.

(c) 6'-76, which consist of three short addresses (6'-6 6'-16' 7'-6), whose original context, however, is doubtful, might, so far as their contents are concerned, proceed from Micah. They present J''s controversy with His ungrateful people, the prophet's denunciation of the people for the unrighteousness which marked their whole manner of life, and finally Zion's lament over the decay of her children. This lament is intelligible in the time of Manasseh, when the sacrifice of children (Mic 6') was a flourishing custom; but not only the tenderness of feeling exhibited in 6th, but also the dramatic and exceedingly animated descriptions, make the composition of this section by Micah

wary improbable.

(d) 7<sup>7R</sup> cannot possibly be attributed to Micah, t for what in 6<sup>1</sup>-7<sup>8</sup> is yet in prospect is in 7<sup>7R</sup> actually come to pass—Zion suffers for her sins, and the prophet looks to a better time, when J'' will again interest Himself on behalf of His people, and build the walls of Jerusalem.

ii. The Activity of the Prophet.-It follows from the above investigation, that if we are to form an idea of the characteristics of Micah and the method of his activity, we must base our conclusions only upon 1<sup>2</sup>-2<sup>11</sup> 3 (4<sup>9f. 14</sup> 5<sup>9-18</sup>). It results from these data that the title in 1<sup>1</sup> rightly represents the prophetic activity of Micah as having begun as early as the reign of Ahaz, for according to 1<sup>2ff</sup> he predicted the fall of Samaria. Since of the two contradictory dates given in 2 K 18<sup>1</sup> (of. 17<sup>6</sup>) and in 18<sup>18</sup> the latter is clearly the better entitled to credit—i.e. Hezekiah probably ascended the throne R.C. 715—it follows that at the time of the latter. B.C. 715—it follows that at the time of the destruction of Samaria the occupant of the throne of the Southern kingdom was not Hezekiah (as in 2 K 181, cf. 176) but Ahaz, who would have begun to

reign c. 734. Whether Micah had entered upon his prophetic activity before 734, i.e. in the time of Jotham, as the title asserts, we have no certain data to enable us to decide, for the threatening of 312 was, according to the express testimony of Jer 26<sup>18th</sup>, uttered under Hezekiah, and probably after the accession of Sennacherib in 705—an event which appears to have determined Hezekiah to a change of policy towards the Assyrians. Since ch. 3 stands in close connexion with ch. 2, and the latter as the foundation for the threatenings of 1917. is not to be separated from ch. 1, we can only assume that the threatenings once uttered and meanwhile realized against Samaria were taken by Micah into a written discourse against the Southern kingdom (cf. Is 28 fl.)—a happy thought whereby this denunciation, calculated to strike terror into all, acquired special weight against Jerusalem.

iii. Style and Message of Micah.—It has rightly been remarked that in his rhetoric Micah is sharply distinguished from the simplicity of Amos and the originality of Hosea. He begins with the violent hiatus of 12 and the imposing description of Jahweh's descent in storm from heaven to earth (v.8.), to which the denunciation of judgment upon Samaria attaches itself, in order finally to introduce the burden of his discourse—the judgment upon Judah,—a discourse, however, which runs off into mere puns attached to local and personal names. It is possible that this, as Wellhausen suggests, was the ancient scholastic model of prophetic style, which elsewhere has maintained itself especially in prophecies regarding foreign nations. Apart from this peculiarity, Micah has close points of contact with Amos. Like the latter, he displays a deep moral earnestness which does not shrink from drawing the last conclusions, and which, in opposition to his great contemporary Isaiah, who looked with confidence to J" the holy God to preserve Jerusalem, leads him to predict the destruction of the city as a punishment for the treading under foot of righteousness. Whether we are justified in concluding from 312 that Micah anticipated the destruction of the whole kingdom, has been rightly called in question and denied by W. R. Smith (Prophets of Israel, 287 ff.), for Micah in assigning the ground for judgment—and in this likewise he agrees with Amos—has specially to do with the aristocracy of Jerusalem, against whom his whole anger is turned on account of the injustice perpetrated by them ('Jerusalem is Judah's sin,' cf. 1° LXX). What a powerful impression this message of judgment produced upon Micah's contemporaries we may infer from Jer 2618ff, where we find that 100 years after its utterance this denunciation of judgment, which stood in such glaring contradiction to the preach-

ing of Isaiah, is not yet forgotten.
Whether Micah had a glimpse of better days and committed his anticipations to writing, must, in view of what has been said above, remain uncertain; the verses which alone could come into consideration as from his pen, contain scarcely anything more than a reference to a future deliverance and a removal by J" of things displeasing (cf. 49f. 59-18). In any case, our prophet, even if he never gave expression to such hopes, would in this respect also have a prodecessor in Amos, for the Messianic hopes expressed in Am 98st. are a later addition to that book.

A brief reference may further be made to Mic 67th, which are not only marked by a depth and a moral earnestness, but also interpenetrated by an intensity of genuine feeling such as are scarcely paralleled elsewhere. These verses likewise have a point of contact with Amos, in so far as in them the thought is emphasized that moral goodness

coincides with humanity ('Das Sittlich-Gute ist auch das Natürlich-Menschliche'); but in another point they go far beyond Amos-in fact, scarcely anywhere in the OT is the essence of true worship expressed so briefly and appropriately as in 6<sup>3</sup> It is said to thee, U man, what is good and what J" requires of thee: to do justice, to love kind ness, and to walk humbly before thy God.'

ness, and to walk humbly before thy God.'

Propheten, pp. 22 ff., 131 ff.; G. A. Smith, Book of the Tucke Prophets, vol. i. (1896), 856 ff.; Nowack (in the Handkommentar), 1898, p. 185 ff.

MICAIAH.—The Heb. name מִּכְּנָהוּ ('who is like ש"?') and its abbreviations מיכָה, הָיכָה, הָיכָה, מיכָיה are variously rendered in AV; but, with the exception of one instance, the first three words appear in RV as Micaiah. The exception is in Jg 171.4. Here the name אָשְים, which occurs frequently in Jg 17. 18, is found in the longer form ישנים, and is rendered *Micah* for the sake of the unity of the narrative. The LXX equivalents of Micaiah have in every case the alternative spellings Mix. and Meix., the latter being found uniformly in B.

1. Michaiah (מִינְיִם, Maaχá, AV Michaiah) is the name given in 2 Ch 13<sup>2</sup> to the mother of Abijah. It is evident from 1 K 15<sup>2</sup>, 2 Ch 11<sup>20</sup>, and from LXX, that this is a corruption of Maacah (wh. see). 2. One of the princes of Judah (2 Ch 177) appointed by Jehoshaphat to superintend religious instruc-tion throughout the kingdom, was called Micaiah

tion throughout the kingdom, was called allowing, Mixadas, AV Michaiah).

3. Michiah (τητρο, Μ(ε)ιχαίαs) the son of Imlah was a prophet of J" in Israel in the days of Ahab. His name is once (2 Ch 1814) spelt τρτρο (RVm). Micah). In Scripture history he appears only on the great occasion described in the almost identical narratives of 1 K 224-28, 2 Ch 183-27. It is evident, however, from 1 K 228 that this was not the beginning of his prophetic activity, and that his former messages had not been favourable to the king. Josephus (Ant. VIII. xiv. 5) identilies Micaiah with the prophet who disguised himself after the victory over the Syrians at Aphek, and reproved Ahab for allowing the king of Syria to escape (1 K 20<sup>35-43</sup>); and adds that Ahab, in his displeasure at this, put Micaiah in prison. These statements at least harmonize with the Scripture account, and the identification is not in itself unlikely.

In LXX 1 K 22 follows 20, and both chapters are derived from a special source (see Kines I. and II., vol. ii. pp. 807, 808) in which Elijah is not mentioned, but which has several references to unnamed prophets. In so far as any prophet is mentioned by name, Micalah may be said in this section to take Elijah's place (Kittel, *Hist. Heb.*, Eng. tr. ii. 275).

On the occasion recorded in Scripture, Jehoshaphat, king of Judah, was on a visit to Samaria, when Ahab asked his co-operation in recovering when Ahab asked his co-operation in recovering Ramoth-gilead, which the Syrians had formerly captured, and which they were now retaining, contrary to the conditions of the latest peace (1 K 20<sup>34</sup> 22<sup>3</sup>). Jehoshaphat declared his willingness to join in the expedition, but suggested that at the outset they should 'inquire at the word of J"'. The prophets of Israel, to the number of 400,

were accordingly assembled where the two kings sat in royal state at the gate of Samaria. They prophesied unanimously that the undertaking would be successful, and one of them, Zedekiah the son of Chenanah, emphasized the prophecy by producing horns of iron as symbols of the conquering might of Ahab and Jehoshaphat. These Israelite prophets posed as prophets of J", and spoke in His name (2 Ch 18<sup>5</sup> has 'God' instead of 'J"); but Jehoshaphat was doubtful of their or 'J'; but Jenosaphat was doubth of their true character, and asked anxiously if there was not besides a prophet of J" whom they might consult (cf. 2 K 3<sup>11</sup>). Ahab then mentioned Micaiah for the first time, but added that he hated him, as he was always a prophet of evil-a remark which Jehoshaphat courteously deprecated. A eunuch was sent to fetch Micaiah (who, according to Josephus, was already in prison), and this officer told him of the favourable reply which the 400 prophets had given to the inquiry of the kings, counselling him in a friendly way to answer in the same strain. Micaiah, however, replied boldly that he would speak only what J" should say to him. When he appeared before the kings, and when Ahab asked his counsel, he at first achoed ironically the advice of the 400. But Ahab detected the irony; and Micaiah, when pressed for his true opinion, answered in words of solemn imagery, which boded nothing but disaster. He had seen all Israel scattered upon the mountains as sheep that had no shepherd: and J' had said, 'These have no master, let them return every man to his house in peace.' Besides replying thus to Ahab's immediate question, he went on to pronounce a verdict on the whole situation and on the prophets who were opposed to him. This he did in an account of a remarkable vision. J" sat on a throne, attended by all the host of heaven. He asked who would entice Ahab that he might go and fall at Ramothgilead. A spirit volunteered to do so by being a 'lying spirit' (אָכֶל מָיה) in the mouth of Ahab's prophets. J" accepted the offer, and sent the spirit forth with a promise of success. Micaiah's concluding message to Ahab, therefore, was that his prophets were false prophets, and that J" had spoken evil concerning him. Zedekiah the son of Chenaanah replied to Micaiah by an insulting blow and a mocking question. The account of Jos. (Ant. VIII. xv. 4) adds that Zedekiah sought to refute Micaiah's prophecy by appealing to the prediction of Elijah (1 K 21<sup>19</sup>), who had foretold that the dogs should lick Ahab's blood in Jezreel; and that Zedekiah also challenged Micaiah to wither the hand that smote him, as had been done in the case of Jeroboam (1 K 134). Micaiah warned Zedekiah of the future perils that awaited him, and, when he was carried off by Ahab's orders to suffer rigorous imprisonment, he contented himself by appealing confidently to the issue of events for proof that his prophecy had been true. At this point his history, which may have been continued in the source (Ewald, HI, Eng. tr. iv. 76), breaks off abruptly, and is not resumed. The exordium, 'Hear, ye peoples, all of you,' is apparently an interpolation, taken from Mic 1<sup>2</sup>, and due to a confusion of Micaiah the son of Imlah with the canonical Micah.

Much interest attaches to Micaiah's vision. It is not to be taken, of course, as a literal description of an objective scene, but a question may be raised as to how far it shows us the form in which the truths proclaimed by the prophet were first presented to his own mind, and how far he consciously cast those truths into this dramatic shape in order to convey them to others. In regard to such visions it seems best, while allowing for a possible element of literary embellishment, to hold with Davidson (Ezekiel xxix.), that they are 'not mere literary invention,' but that the spontaneous working of a prophet's inspired imagination threw truths 'into a physical form, making them stand out before the eye of his phantasy

as if presented to him from without.' The vision, with its picture of a scene in heaven, is strikingly similar to the Prologue of Job (16-12-21-6). Another parallel may be found in Zec 3, and the idea of a heavenly assembly is present also in Ps 819-7. The account of Micaiah's vision embodies theological conceptions which are strange and even perplexing to the Christian mind. In opposing the 400 prophets Micaiah did not question their claim to have J''s inspiration, but simply asserted that this was in their case an inspiration of falsehood. The explanation of this (to us) apparently self-contradictory conception is to be found in the strength of the OT idea that J' is supreme, and that nothing happens independently of Him. The problems raised by the varied moral quality of events in relation to the holiness of J'' were as yet in the background. A 'spirit from J',' such as the 'lying spirit' of Micaiah's vision, signified simply a real Divine influence directing actual events. In this OT view, to use the words of Schultz, 'the Spirit of God is in itself only a wonderful power by which the life of man is regulated . . . but in itself there is no direct moral element '(Theology of OT, Eng. tr., ii, 200-208. See also Dillmann, All.-Test. Theol. 304-5; Stanley, Jewish Church, ii. 270). Schultz goes so far as to say (i. 257) that Micaiah's first reply had been anything but ironical, it would have been inconsistent with his position as a true prophet of J'', as well as with his declaration to the ennuch. In connexion with Micaiah's own inspiration was of the same kind. Had Micaiah been under any compulsion even temporarily to speak what was untrue, there would have been a measure of truth in Zedekiah ide not deny the charge of false inspiration, but insinuated that which is the charge of talse inspiration, but insinuated that which is the charge of talse inspiration, but insinuated that which is the context of the charge of talse inspiration, but insinuated that which we would be the context of the current of the lut been under any compulsion even temporarily to speak what was untrue, there would have been a measure of truth in Zedekiah's taunt. We can only reconcile Micaiah's conception of the 'lying spirit from J'' with the reality of his own inspiration, by regarding him as a messenger sent to declare the unqualified truth upon the situation. Stripped of all figurative dress, the facts which Micaiah proclaimed were these: that Ahab's prophets were false prophets, that in spite of warning Ahab would believe them, and would go to Ramoth-gilead to meet his doom

The whole history of Micaiah presents impressively the contrast between true and false prophecy which became so marked afterwards in Jeremiah's time. We see in it already some of the features by which, apart from the decisive test of the event, the false could be distinguished from the true. The false prophets relied on the consent of numbers; their message fell in with the royal wishes; and, whatever truth there may be in Josephus' account of Zedekiah's argument from Elijah, it at least illustrates the method of mechanical and mistaken inference from predictions already accredited which Jeremiah denounced in the false prophets who were his contemporaries (Jer 7<sup>4</sup> 23<sup>30</sup>). Micaiah, on the other hand, was independent, conscious of J''s inspiration, resolute to speak only what J'' said to him, indifferent to the anger which his message might excite, and to the personal hardships and dangers he might incur by delivering it. He stands out in this single scene which has been recorded of his life as a solitary and heroic figure, in whom are embodied many of the noblest characteristics of the true prophet, the instrument of God's genuine revelation to men.

4. Micaiah (προ [Keth.], Μ(ε) καίας or Μιχέας; AV, RVm Micah) the Morashtite in Jer 2618 is the same as the canonical prophet MICAH (wh. see).

**5.** Micaiah (της το, M(ε)ιχαίας or Mιχέας, AV Michaiah) the son of Gemariah (Jer  $36^{11}$  .  $^{18}$ ) was one of the nobles of Judah in the days of Jeremiah. In the fifth year of Jehoiakim he heard Barneh reading the roll of Jeremiah's prophecies in the ears of the people from the chamber of his father Gemariah in the Temple. He then told what he had heard to the other nobles who were gathered in the 'scribe's chamber' in the royal palace, and it was his report which led to the subsequent reading of the roll first to the nobles and then to the king.

6. In 2 K 2212 mention is made of Achbor the son of Micaiah (סִיכְיָה M(e), xalas, AV Michaiah, AVm Micah) among the messengers whom Josiah sent to consult Huldah after the discovery of the book of the Law (see ACHBOR). This Micaiah may very possibly have been the same as the son of Gemariah referred to in 5 above. In 2 Ch 3420 'Achbor the son of Micaiah' appears as 'Abdon the son of Micah.'

7. Micaiah (מִינְים, Μ(ε)εχαιά, AV Michaiah) the son of Zaccur is named (Neh 1235) in the Asaphite genealogy of Zechariah the son of Jonathan, one of the priests of Nehemiah's time, who took part in the dedication of the wall of Jerusalem. In the parallel genealogy of 1 Ch 9<sup>18</sup> this Micaiah is called 'Mica (AV Micah) the son of Zichri,' and in those of Neh 11<sup>17-22</sup> he appears as 'Mica (AV Micha) the son of Zabdi.' All the lists mention

that he had a son called Mattaniah.

8. There was a Micaiah (תְּיֶבֶה AV Michaiah) among Nehemiah's priests themselves (Neh 12"). He took part in the dedication of the wall, and is not to be confounded with the ancestor of Zechariah (7 above) mentioned in the same chapter. Neh 1241 is omitted in the chief MSS of LXX. Those that have it give this name as Mixalas.

JAMES PATRICK.

#### MICE.—See Mouse.

MICHAEL (ὑκρῦς 'who is like God?'; on the name see Gray, Heb. Prop. Names, 157, 165, 181, 210, 221; LXX Μειχαήλ, Μιχαήλ).—1. Father of the Asherite spy, Nu 13<sup>13</sup>. 2. 3. Two Gadites, 1 Ch 5<sup>18t</sup>. 4. The eponym of a Levitical guild of singers, 1 Ch 6<sup>40</sup> [Heb.<sup>20</sup>]. 5. Name of a family in Issachar, 1 Ch 7<sup>3</sup> 27<sup>18</sup> (B Μεισαήλ, Α Μιχαήλ). 6. Eponym of a family of Benjamites, 1 Ch 8<sup>16</sup>. 7. A Manassite chief who joined David at Ziklag. 7. A Manassite chief who joined David at Ziklag, 1 Ch 1220. 8. A son of king Jehoshaphat, 2 Ch 212 (B Μεισαήλ, Α Μισαήλ). 9. The father of Zebadiah, an exile who returned, Ezr 88, 1 Es 834 (in the latter M(ε)ιχάηλος). 10. The archangel. See next

MICHAEL (מְּמֶשְׁל who is like unto God?'; in the LXX and NT M(e) (מָמֶשְׁל) holds a very lofty rôle in Judaism from B.C. 200 onwards. He is one of the seven archangels who execute the commands of seven archangels who execute the commands of God at the final judgment (Eth. Enoch 90<sup>20-21</sup>), or present the prayers of the saints before God (To 12<sup>18</sup>), or who stand in the immediate presence (Rev 1<sup>1</sup> 4<sup>8</sup> 8<sup>3</sup>). Michael appears as fourth in the oldest list of the seven: Uriel, Raphael, Raguel, Michael, Suriel, Gabriel, and Remiel (Eth. En. 20). In this list the order is no key to the relative dignity of the angels mentioned; for according to other authorities Michael stands at the head of the four great archangels, who apparently form a close great archangels, who apparently form a class apart, though three of them are members of the sacred seven. These four angels are Michael, Raphael, Gabriel, and Phanuel (Eth. En. 40971), or Michael, Uriel, Raphael, and Gabriel (Eth. En. 91 Gizeh and Syncellus Greek).

We must now consider the various functions assigned to Michael in Judaism and the NT. Thus he appears variously as Israel's angelic patron and warrior, their mediator and likewise lawgiver. With these and other functions of

Michael we shall now deal.

i. Michael is first mentioned as the angelic patron of Israel. Thus he is called 'your prince,' t.e. the prince of Israel, Dn 10<sup>21</sup>. In 10<sup>13</sup> he is described as 'one of the chief princes.' All nations have their angelic patrons or guardians (see art. ANGEL, vol. i. p. 96), and the destinies of the former are determined by the relations of the latter in heaven. As the end draws nigh the strife grows fiercer, and Michael, Israel's angelic guardian, becomes the great hero of the last days. 'And at that time shall Michael the last days. 'And at that time shall Michael stand up, the great prince which protecteth the last days. 'Beta prince which protecteth the stand up, the great prince which protecteth the standard up, the great prince which protectes the great prince which protectes the standard up, the great prince which protectes the

children of thy people, Dn 121. According to Eth. En. 205 he 'is set over the best part of mankind, over the people, i.e. Israel. As Israel's champion, he is appointed to avenge Israel on their enemies at the close of the world (Assumption of Moses 102). It is not improbable also that he is referred to in Dn 811 LXX and Theod.] under the phrase 'prince of the host' (apxiarpárnyos). The same idea reappears in the Slav. Enoch 22°, where he is termed 'the chief captain,' and in 33¹° the great captain.'

ii. Another hardly less ancient conception is that which regards Michael as the heavenly scribe who entered in the heavenly books the deeds of the angelic patrons of the nations. That the angel who discharges this function is Michael in Eth. En. 90 we infer from two facts: first, this angel is one of the seven archangels (90<sup>22</sup>); and, secondly, he is the archangel who helps Israel (90<sup>14</sup>). No further record of this function is found till the 1st cent. A.D. According to the Ascension of Isaiah 9<sup>22, 23</sup> (Latin), Michael records the deeds of all men in

the heavenly books.

iii. Michael seems also to have been regarded as the medium through whom the Law was given. This is clearly stated in the late Apocalypse of Moses I: Διήγησις . . . ἀποκαλυφθείσα . . . Μωυσή . . . . ὅτε τὰς πλάκας τοῦ νόμου τῆς διαθήκης εκ χειρός Kuplov ἐδέξατο, διδαχθείς ὑπὸ τοῦ ἀρχαγγέλου Μιχαήλ. Most probably, therefore, the angel of the presence, who in Jubilees 1<sup>27</sup> 2 instructs Moses on Mount Sinai, and delivers to him the tables of the Law, is to be taken as Michael, and the same identification should no doubt be made in the case of the angel in Ac 788.1

iv. A very notable extension of the attributes and offices of Michael is attested in the Similitudes and the Testaments of the XII Patriarchs. Thus he is described as 'the merciful and the longsuffering,' Eth. Enoch 40° (cf. 682.8), and as 'the angel who intercedeth for the race of Israel and of all the just' ( $\tau \partial \nu$   $d\gamma \gamma \epsilon \lambda \partial \nu$   $\tau \partial \nu$   $\pi \rho a_1 \tau \alpha \delta \mu e \nu \alpha$ ,  $\kappa.\tau.\lambda.$ ), Levi 5, and 'the mediator of God and man for the peace of Israel' ( $\mu\epsilon\sigma l\tau\eta s$   $\theta\epsilon\sigma \hat{\nu}$  kal  $d\nu\theta\rho\omega\pi\omega\nu$  k.t.l.), Dan 6. The same view of Michael appears in the Ascension of Isaiah 92 (Latin) 'Magnus angelus Michael deprecans semper pro humanitate.

In the NT Michael is mentioned twice by name, Jude 8 Rev 127. In both these passages the con-Jude Rev 12'. In both these passages the conception of Michael belongs to division i. above. Thus what is more fitting than that the angelic patron of Israel should protect the body of Israel's great lawgiver against Satan? Jude, as we are aware, is derived from the Assumption of Moses (see Charles' Assumption of Moses, pp. 105-110). We find elsewhere the burial of Moses attributed to the agency of angels, particularly of Michael, in the Targum of Jonathan on Dt 34.

In the second NT passage (Rev 127-9) Michael and his hosts go forth to war against the dragon, 'the old serpent' that is called the Devil and Satan. Here the figure of Michael thrusts aside that of the Messiah; for it is Michael and not the Child that overthrows Satan when storming the heavens—a fact which speaks strongly for the Jewish origin of most of Rev 12.

Under division iii. above we have already noticed a possible reference to Michael in Ac 788.

With the Talmudic conceptions of Michael we with the lamidate conceptions of Michael we have not here to deal. For these the following books may be consulted: Lueken's monograph, Michael, 1898; Weber, Jüdische Theologie 1, 167-172, 205, 253; Schoettgen, Hor. Heb. i. 1079, 1119, ii. 8, 15 (ed. Dresden, 1742); Hamburger, Real-Encyclopædie für Bibel und Talmud, 1892, pp. 753,

754. On later Christian conceptions see Bousset, The Antichrist Legend, 227-231.

MICHAL (575 contracted from 5κ75 'who is like unto God?').—The younger of Saul's two daughters (1814°, Meλχόλ). Saul, who was wavering between desire to destroy David and reluctance to promote him to be the king's son-in-law, suddenly gave Merab his eldest daughter to Adriel (1818¹). It now transpired that Michal had fallen in love with David. For a woman to take the initiative in such matters is without a parallel in the Bible, but it suited Saul's designs, and David, on his part, lost no time in providing double (not LXX) the dowry demanded. It should be noted that the LXX (B), followed by Josephus (Ant. VI. x. 2), simplifies the story by omitting the incident about Merab (1818¹¹¹¹-¹². 26°); and Josephus here, and again in Ant. VII. i. 4, misses the point of Saul's savage mockery of 'the uncircumcised Philistines' by representing the conditions imposed on David as six hundred heads of Philistines. David was soon to owe his life to the wife whom Saul had designed to 'be a snare to him.' When the emissaries of Saul 'watched the house to kill him' (1819¹¹¹¹, Ps 59 title), Michal baffled them by letting David down by the window, and delayed pursuit by a clever ruse. Placing the household god in the bed, she covered the supposed sick man's head with a mosquito net (RVm), and finally disarmed Saul's jealous anger by a plausible lie. In this passage the rare word in v.¹¹² 'pillow' ¬¬¬¬
(on which see Driver's note) was read ¬¬¬¬ (constr. of ¬¬¬¬) 'liver' by the LXX. Josephus (Ant. VI. xi. 4) seems not to have understood the LXX translation of 'teraphim,' ¬¬¬ kevordφia, for he says that Michal placed in the bed a goat's liver, which, as it palpitated and shook the bedelothes, might suggest that David was gasping for breath.

The last scene in which Michal figures (286¹²-²²)

presents a startling contrast to the time when, for love of David, she had flung aside conventionalities and braved her father's fury. That love was now all changed into coldness and dislike. When from a window in the palace on Mt. Zion Michal looked down on David leaping and dancing before the ark, it was not merely her woman's impatience of the absurd that made her 'despise him in her heart,' or that prompted the sarcasm in which that contempt found utterance later on. To appreciate her daring mockery, and the cold anger of David's rejoinder, we must read them in the light of the years that had passed. It is probable that Michal had been happy with Palti, or Paltiel, to whom she had been married on David's banishment (1 S 25<sup>44</sup>). From that home she had been torn (2 S 3<sup>15</sup>) merely that David might be enabled to claim a sort of hereditary right to the throne, and have by him a living memorial of his early prowess. Now she was but one of many wives, equalled with mere 'handmaids,' probably neglected. What wonder if the bitter reflexion that she had indirectly facilitated the humiliation of her own family was coupled with a suspicion that David had from the first regarded her merely as a means of self-aggrandisement? It is difficult not to feel some sympathy with Michal; though the historian characteristically sees in her childlessness a punishment for that illomened outburst of spleen on the most glorious day of David's life. The Chronicler omits, as

usual, the painful incident, except 2 S 6<sup>18</sup>.

It remains to add that in 2 S 21<sup>8</sup> 'Michal' is an ancient but obvious mistake for 'Merab' (which is read by Luc. and Pesh.). Josephus (Ant. VII. iv. 3) says that Michal returned to her former husband (Palti), whom he does not name, and bore five children. The AV explanation 'brought up' for 'bare' is that of the Targum and Jerome (Qu.

Heb.); and the Targ. on Ru 38 mentions 'the pious Paltiel, who placed a sword between himself and Michal... because he had refused to go in unto her.' Similarly Jerome (Qu. Heb. on 1 S 2549) explains that Paltiel wept for joy because the Lord had kept him from knowing her. He also (Qu. Heb. on 2 S 35 629) mentions a Jewish tradition that Michal is the same as Eglah, who is emphatically styled 'David's wife' because she was his first wife, and that she died when giving birth to a child.

MICHEAS (Micheas), 2 Es 189. — The prophet Micah.

MICHMAS (σρρρ).—The form in  $Ezr\ 2^{27}$  (B  $Ma\chi\mu ds$ , A  $Xa\mu\mu ds$ ) = Neh  $7^{81}$  (A B  $Ma\chi\epsilon\mu ds$ ) of the name which appears elsewhere (1 S 13<sup>2. 5. 11. 16. 23</sup> 14<sup>5. 31</sup>, Is  $10^{28}$ , Neh  $11^{31}$ ) as Michmash (Ερρρ). See next article.

MICHMASH (ἐφρφ; in Ezr 2²7, Neh 7³¹ τρρφ; LXX Μαχ(ε)μάς; Josephus Μαχμά; Vulg. Machmas).

—A town in the tribe of Benjamin east of Bethel and Beth-aven (1 S 13⁵, cf. Jos 7²). In OT it is called nine times Michmash (1 S 13²π. 14⁵. ³¹, Is 10²⁵, Neh 11³¹) and twice Michmas (Ezr 2²′, Neh 7³¹). In 1 Mac 9³⁵ AV has Machmas, RV Michmash. Michmash is mentioned only in connexion with the war of Saul and Jonathan with the Philistines, the (ideal) invasion of Judah by the Assyrians described by Isaiah, and as the seat of government of Jonathan Maccabæus.

It still bears the name Mukhmas, and stands in the mountains of Judah about 7 miles north of Jerusalem on the eastern slopes at an altitude of 2000 ft. above the Mediterranean Sea, about 900 ft. below Bethel, which is situated on the backbone of the country. Though located in the midst of the tribe of Benjamin, it is not mentioned in the list of the towns of that tribe.

Michmash is first mentioned as the headquarters of Saul, who, on being made king over Israel, came up from Gilgal, and with two thousand men occupied the mountains of Bethel, while Jonathan with a thousand men occupied Gibeah of Benjamin, a stronghold about 4 to 5 miles north of Jerusalem; between them lay a strong mountain fortress, Geba, occupied as an outpost by the Philistines. Jonathan, with his characteristic intrepidity and impulsiveness, smote the Philistine garrison (?¬¬¬) at Geba. On hearing of this, the Philistines of the Shephēlah got ready for battle, and, coming up with great multitudes of chariots and horsemen and swarms of footmen, drove the badly armed Hebrews out of the hill-country about Bethel, and pitched their camp at Michmash, east of Beth-aven, opposite to Geba, which was occupied by Jonathan.

The Hebrows were greatly perturbed at this invasion of their lands, and some fled beyond Jordan, while others hid in caves and cisterns, and many assembled at Gilgal with Saul in fear and trembling. Saul, fearing that the Philistines would pursue him even to Gilgal, disobeyed the directions given to him by Samuel, and, after a very unsatisfactory interview with the prophet, abode with Jonathan at Geba (13<sup>16</sup> RV, not Gibeal as AV; but see vol. ii. 116<sup>16</sup>, 169<sup>26</sup>) of Benjamin with only six hundred badly armed men.

The Philistines sent out three companies east, west, and north to spoil the lands of the Hebrews, much to the distress of Saul and Jonathan, who were not strong enough to prevent it. Jonathan now secretly devised a scheme (14<sup>1st</sup>.) for dividing the Philistines against themselves and securing their arms for the defenceless Hebrews, and with this intent he left the camp at Gibeah (v.2) during

the night, unknown to Saul and the garrison, at on in company with only his armour-bearer set ou' a very perilous and heroic enterprise.

a very perilous and heroic enterprise.

They descended the rocky crag called Sg at the protecting Geba to the north, and, arrivintous cliff protecting Geba to the north, and, analyzatous can bottom of a deep valley, found the precing them to of Bozez terminating Michmash, facig ascertained the north. Here Jonathan, havild be faithful to that the young man with him wo'panded account of death, disclosed his plans, an exact. vi. vi. 2). The which is given by Josephus on the spur of a hill, camp of the Philistines wing down, one below the with three plateaus shelvides and terminating in other, with precipitous, and at this point the outthe rocky crag of Bozeere neglectful of their watch, posts of the enemy ight it impossible that any one because they thous crag. Jonathan therefore diswould ascend the just after daybreak to some other covered himse posts, who called out to the Hebrews Philistine out and receive the chastisement due to to come Phis invitation Jonathan considered to be them. arable omen, and retiring out of their sight, a fave the aid of his comrade, by great labour and withiculty, scaled the heights of Bozez and fell upon Ats outpost (while they slept !), slaying about twenty of them. The Philistines, waking up in the dim light of dawn, could not imagine that there were only two Hebrews at work; but supposing they were surprised by a strong force, and being of different tribes, and suspecting each other to be the enemy, fought against one another, as so often happened on other occasions, and some of them died in battle, while others threw away their armour and fled, many of them being thrown down the rocks headlong. When the watchmen of Geba saw that the multitude of the Philistines melted away from Michmash they reported it to Saul, who went out to battle with his six hundred. The Hebrews that were in hiding in the rocks came out, and those who were with the Philistines also turned from them, so that Saul found himself suddenly in command of a large force (Josephus says ten thousand men), all fully equipped with the arms of the slaughtered or fleeing Philistines; and they smote the Philistines that day from Michmash to Aijalon.

Benjamin was now in peaceful possession of Michmash, and there is no further record of it until the time of the Assyrians' threatened march on Jerusalem in the reign of king Hezekiah, spoken of by Isaiah (10<sup>28</sup>). Sennacherib is depicted as coming along the northern road from Samaria against Jerusalem, along the backbone of the mountain chain; but instead of passing south from Bethel to Beeroth he turns aside to the eastern slopes towards Ai, and passing Migron (the precipice) lays up his baggage (AV carriages) at Michmash, because they could go no farther in a southerly direction. See, further, MIGRON. The Philistines, when they brought their chariots to Michmash, came from the west. The host of Sennacherib then go on foot to Geba, where they make a lodgment. They arrive here over the passage or pass of Michmash, mentioned as the place where the Philistine garrison was encamped before Geba when Jonathan scaled the crag Bozez (1 S 13<sup>28</sup> 14<sup>4</sup>). The town Makaz (1 K 4<sup>9</sup>) is given by the LXX as Max(s)µ4s. See MAKAZ.

Ezra relates (2<sup>27</sup>, Neh 7<sup>31</sup>) that one hundred and twenty-two men of Michmas came with Zerubbabel out of the Captivity unto Jerusalem and Judah.

When Bacchides returned to Antioch with his army from Judea, after having been so rudely repulsed by Jonathan Maccabaeus, Michmash was made the seat of government, and Jonathan dwelt there, 1 Mac 978.

Eusebius and Jerome describe Machmas as a large village 9 miles distant from Jerusalem and not far from Ramah (Onomast. s. 'Machmas'). In the Middle Ages the site of Michmash was removed to el-Birch (Beeroth). Cf. Brocardus, c. 7; Quaresmius, ii. p. 786; Maundrell.

The Mishna describes Michmash as famous for

The Mishna describes Michmash as famous for its barley, giving rise to the Talmudic proverb 'to bring barley to Michmash' (Reland, Pal. 897).

The great valley west of Ai, which runs to Jericho as the Wady Kelt, becomes a narrow gorge, On the a great crack or fissure in the country. south side of this great chasm stands Jeba (Geba of Benjamin) on a rocky knoll, with caverns be-neath the town and arable land to the east. Looking across the valley, the stony hills and white chalky slopes present a desolate appearance; and on the opposite side, considerably lower than Jeba, is the little village of Mukhmas (Michmash), on a sort of saddle backed by an open and fertile corn valley (Conder, Tent-Work in Palestine, ii. 112). With regard to the description of Michmash by Josephus, Conder states, 'Exactly such a natural fortress exists immediately east of the village of Michmash, and it is still called the fort by the peasantry. It is a ridge rising in thin rounded knolls above a perpendicular crag, ending in a narrow tongue to the east with cliffs below, and having an open valley behind it, and a saddle towards the west on which Michmash itself is situated. Opposite this fortress to the south there is a crag of equal height, and seemingly impassable: thus the description of the Old Testament is fully borne out' (1 S 144). 'The picture is unchanged since the days when Jonathan looked over the white camping ground of the Philistines, and Bozez must then have shone as brightly as it does now, in the full light of an Eastern sun. To any one looking over the valley it seems a most difficult feat to cross it, and, in the words of Josephus, "it was considered impossible not only to ascend to the camp on that quarter, but even to come near it" (Tent-Work in Pal. ii. 113). Mukhmās is a small stone village. The water supply is from cisterns, with a well to each. On the north are rock-cut tombs. There are foundations and remains of former buildings in the village, and the masonry of what appears to have been a church (SWP vol. iii.).

LITERATURE.—Josephus, Ant. vi. vi. 2; Robinson,  $BRP^2$ , i. 440 ft.; Tristram,  $Land\ of\ Israel\ (Index)$ ; Conder, Tent.Work in  $Palestine\ (Index)$ ; Buhl,  $GAP\ 176$ ; Guérin, Judée, iii. 63 ff.; G. A. Smith,  $IIGIL\ 178$  n. 1, 250, 291. C. WARREN.

MICHMETHAH (προφορ with art.).—The name of a place on the north border of Ephraim, to the east of Shechem, Jos 16° (B΄ Ικασμών, Α Μαχθώθ, Luc. εἰς 'Αχθώθ) 17° (where 'τρ τόμος of MT is represented in B by Δηλανάθ, A and Luc. ἀπδ' λσήρ Μαχθώθ). From the circumstance that the art. is prefixed, Siegfried-Stade suggest that 'τρ may not be a proper name, but an appellative. If so, its meaning must remain obscure, as the meaning of the root [ndo] is quite unknown. The name may perhaps exist in a corrupt form as Mukhnah, applying to the plain east of Shechem. The change may be compared with that which has certainly taken place in the case of Michmash (mod. Mukhmás), and the change of n for m is not infrequent in Aramaic as compared with Hebrew. But Mukhnah may also stand for mahaneh 'camp,' a term applied in two cases (Mahanaim and Mahaneh-dan) to plains. Buhl (GAP 202) conjectures that Michmethah may be Khirbet kefr beita, between Sichem and Ta'na.

C. R. CONDER.

MICHRI (מְבְּרֶי).—Eponym of a Benjamite family, 1 Ch 9<sup>a</sup> (Β Μαχείρ, Α Μοχορέ, Luc. Μαχειρί).

MICHTAM .- See PSALMS.

MIDDIN (פְּרֵים; B apparently Alνών, A Μαδών, Luc. Μαδδείν).—A town in the wilderness (midbar) of Judah, Jos 15<sup>61</sup>. The site has not been recovered. If we might suppose pro to be an early clerical error for TD, the site of Mird on the plateau S.W. of Jericho would be a likely one. This was at one time occupied by a monastery. See SWP vol. iii. sheet xviii. C. R. CONDER.

middlemost, midland.—The Heb. word חיכון tikhon, usually translated 'middle,' is rendered 'middlemost' in Ezk 425.6. The tr. comes from Cov., and RV retains it. Cf. Jer. Taylor, Works, ii. 65, 'Truth hath a mysterious name, . . . it consists of three letters [i.e. now], the first and the last and the middlemost of the Hebrew letters.'

Midland is still in use as an adj., and as a subst. in the pl. 'the Midlands.' As a sing. subst. it occurs in 2 Mac 825 'he came like a fugitive servant through the midland (1611 'mid land') unto Antioch' (διά τῆς μεσογείου). RV retains the word, but mod. Eng. is 'interior.'

The form middent for 'widst' often occurs in

The form middest for 'midst' often occurs in the early editions of AV. Mod. editions spell 'midst.' Cf. Fuller, Holy State, 260, 'Two eyes see more then one, though it be never so big, and set (as in Polyphemus) in the middest of the fore-head.' Other forms are, besides 'midst' itself, 'midest' (Jth 611), 'middes' (Ps 11619, Ac 2721, Ph 215), and 'mids' (Jer 3712, Three 27.69, Sus 34.48). J. HASTINGS.

MIDIAN, MIDIANITES (מָרֶים).—A son of Abraham by Keturah (Gn 25<sup>1-4</sup>, 1 Ch 1<sup>32, 83</sup>), and the name of by Keturah (Gn 25<sup>1-8</sup>, I Ch 1<sup>32, 38</sup>), and the name of the nation of which he is reckoned the progenitor. The plural συγρο occurs Gn 37<sup>38</sup>, Nu 25<sup>17</sup> 31<sup>2</sup> only. In Gn 37<sup>36</sup> συγρο is probably a variant of συγγρο, and refers to the same people as in v.<sup>28</sup>. The LXX have the same rendering in both verses. Ψγρο occurs Nu 10<sup>29</sup> but elsewhere the nation or the country is called when LXX. occurs Nu 10<sup>28</sup>, but elsewhere the nation of the country is called μης, LXX Μαδιάμ (but B has Μαδιάν in Nu), Vulg. Madian, and in Jth 2<sup>26</sup>, Ac 7<sup>29</sup>, AV has Madian. Other renderings of LXX are Μαδιηναΐοι Gn 37<sup>28, 36</sup>, Nu 25<sup>17</sup> Μαδιανείται, Nu 10<sup>29</sup> 31<sup>2</sup>. Both AV and RV have Midian or Midianites in OT.

or Midiantes in O1.

In connexion with the genealogies of Gn 25, three points may be noted.

(a) The name Keturah. The meaning of the word is either incense or the perfumed one (cf. Ca 38 perfumed with myrth or frankineense), and may imply that the tribes descended from her were occupied in the production of incense and spices, or were traders in these articles. It will be remembered that the merchantmen (described as Midianites in Gn 37) who carried Joseph into Egypt are represented as bearing 'spicery and balm and myrrh' (v.<sup>25</sup>), and that the dromedaries of Midian and Ephah are mentioned as bringing

gold and incense (1s 60<sup>6</sup>).

(b) The relationship between Midian and the Israelites. The genealogy, by tracing the descent of both nations from Abraham, acknowledges kinship, but assigns separate territory to each (Gn 25°). But among the descendants of Midian (Gn 25°). But among the descendants of Midian are Ephah, Epher, and Hanoch. Ephah is mentioned twice in genealogies connected with Judah 1 Ch 246. 67, Epher in connexion with Judah 1 Ch 417, and with the half-tribe of Manasseh on E. of Jordan 1 Ch 526. Hanoch is the name of Benher's eldest see. This civilerity the name of Reuben's eldest son. This similarity of names (note that they belong to frontier tribes) may point to further alliances between the Midianites and Israel. The marriage of Moses with a Midianite woman is recorded without disapproval, and it may be but one of many similar unions of which no record has been preserved.

(c) The distinction between the Midianites and the descendants of Ishmael. This distinction, clearly indicated in the genealogy of Gn 25 (cf. v. 6 with v. 9), is not so marked elsewhere, for in Gn 37 the merchantmen who carried Joseph into Egypt are described both as Ishmaelites and Midjanites (cf. v. 25 with v. 28 and v. 36), and in Jg 824 the

same interchange of names occurs.

The Midianites appear in Gn as traders moving about in companies with camels. In the earlier chapters of Ex they are described as a pastoral people tending their flocks. Moses flees from the face of Pharaoh to Midian, is hospitably received by Jethro the priest, and marries his daughter Zipporah. While Israel is at Sinai, Jethro visits his son-in-law, and at their departure from Sinai Moses begs him to accompany them, but he declines. The descendants of Jethro continued their friendly relations with the children of Israel, for in the time of the Judges they are found dwelling in the land (Jg 1<sup>16</sup> 4<sup>11.17</sup>), and Saul shows favour to them because of the services which they rendered to the Israelites in the wilderness (1 S 15<sup>6</sup>). In these passages they are called Kenites. Towards the end of the journeyings, when Israel is on the E. side of the Jordan, Midianites are acting in concert with Moab in procuring the services of Balaam; they tempt Israel to idolatry and lewdness, and are defeated with great slaughter [Nu 22, 25<sup>6-18</sup> 31, with ref. in Jos 13<sup>21, 22</sup>].

The character of the Midianites as here portrayed is very different from that presented in the earlier chapters of Exodus. Instead of a friendly people, with Jethro their priest acknowledging and praising the God of Abraham (Ex 18<sup>9-12</sup>), the children of Israel are now confronted with a nation of idolaters, on whom they are bidden to take vengeance. These varied aspects under which Midian is presented to us may be accounted for by supposing that the name of Midian was applied to a number of clans spreading over a large area, some of whom settled down peacefully, tending their flocks, while others were of a roving

and warlike character.

Due regard must also be had to the fact that the accounts of the Midianites are derived from different sources. The chapters which refer to Jethro are assigned to JE, and Nu 25<sup>6-18</sup> and 31 to P. Nu 31<sup>18</sup> states that the action of the Midianites described in 25<sup>6-18</sup> was prompted by the counsel of Balaam. In the account of Balaam (Nu 22-24) the elders of Midian are mentioned twice at the commencement (Nu 224.7), but throughout the rest of the section Balak and the princes of Moab are represented as treating with Balaam, and there is no further reference to Midian. Some commentators are of opinion that this cursory mention of Midian implies the existence of a document which gave further details about the conduct of Midian on this occasion, some of which are preserved in Nu 25 and 31 (cf. Jos. Ant. IV. vi. 6-13). Another view is that Midian is inserted in Nu 22 on harmonistic grounds.

The account of Gideon is also a composite one, and it is generally allowed that Jg 61-83 and Jg 84-21 are from different sources, though the contrast between the two sections has been exaggerated (see Moore, Judges, in loc., and art. GIDEON). As the Midianites disappear from history after their defeat by Gideon, it is possible that later writers may have employed the name of Midian in a less exact manner, as a general designation of ancient foes of Israel. The peculiar character of Nu 31 will not escape the notice of the thoughtful reader. The ideal picture of a holy war there portrayed may remind him of that symbolical treatment of Midian as the spiritual enemy which is to be found both in Jewish and Christian writers.

Yet another characteristic of Midian, which distinguishes nomad tribes even to the present day, appears prominently in the Book of Judges: they made raids upon their neighbours at harvest time and stripped the land bare, coming as grasshoppers for multitude with their tents and camels as far as Gaza. The story of their defeat by Gideon is told in Jg 6-8. He not only drives them out of Western Palestine, but pursues them on the east side of the Jordan, captures their

on the east side of the Jordan, captures their two chiefs Zebah and Zalmunna, and takes vengeance on them for their slaughter of his brethren by putting them to death (Jg 8<sup>18-21</sup>) (see GIDEON).

The memory of this great deliverance was cherished by the people. Isaiah uses the phrase 'day of Midian' to describe the joy of Israel when the rod of his oppressor is broken (Is 9<sup>4</sup> 10<sup>28</sup>), and the Pealphit press that the remaining of his and the Psalmist prays that the enemies of his nation may be put to shame and perish, as were the Midianites and their chiefs Zebah and Zalmunna (Ps 83<sup>9,11</sup>). A victory over Midian by Edom in the field of Moab is recorded (Gn 36<sup>30</sup>, 1 Ch 1<sup>40</sup>), but its date cannot be determined. The only other references to Midian are 1 K 11<sup>18</sup>, and in the 'prayer

of Habakkuk,' Hab 37.

Extent and position of territory.—The accounts given in Nu and Jg imply that the Midianites occupied country to the E. and S.E. of Palestine. In the genealogy (Gn 25°) Midian and the sons of Abraham other than Isaac are sent away into the east country, and in Jg 6° Midian is associated with the children of the East. This is the only direct evidence of position afforded in the OT, and it indicates a territory E. of the Jordan and of the Arabah. Moab and Edom occupied the country on the E. and S.E. of Palestine from the river Arnon to the head of the Gulf of Akabah. There would remain, therefore, for Midian a tract of country to the N. of Arabia, and on the E. shore of the Gulf of Akabah, with freedom to roam northwards along the E. boundary of Edom and Moab. In this region Ptolemy mentions (vi. 7) a city Mostara on the E. shore of the Red Sea (i.e. the Gulf of Akabah), and are the N. Year (i.e. the Gulf of Akabah), and another Maslaµa situated inland. The former of these corresponds in position with the Madian of Onom. Sac. (136. 31, p. 168, ed. Lagarde) and with the Medyen of Arab writers, who locate there the well of Moses from which he watered the flocks of his father-in law. Classical writers give no information about Midian. Josephus says that Moses in his flight came to a city of Midian, lying on the Red Sea, so called from one of Abraham's sons by Keturah (Ant. II. i. 1). Philo considers Midianites to be an ancient name of the Arabians (de Fortitudine, ii. ancient name of the Arabians (ac rorituaine, ii. 381. 7, ed. Mangey). In recent times the country on the E. shore of the Gulf of Akabah has been explored by Sir R. Burton. The account of his first journey is given in The Gold Mines of Midian, 1878, and of his second in The Land of Midian Revisited, 1879. In the first book he gives a resume of Jewish tradition with reference to Midian (c. vii.), and, in the second, extracts from Egyptian papyri and Arabic writers are collected

No reference has been made in the geographical part of this article to passages in Exodus. The only geographical detail which these passages supply is relative, viz. that Mt. Sinai or Horeh was in or in close proximity to Midian. If from other considerations the position of Sinai be determined, then an additional fact is known concerning the territory of Midian. If the traditional situation of Sinai be accepted, then Midianites must have moved westwards into the peninsula between the Gulf of Suez and the Gulf of Akabah. Remembering the wide area over which the Midianites roved, such a migration is not improbable. But this proximity of Sinai to Midian may be urged in favour of assigning to Sinai a position E. of the Arabah, thereby assigning a uniform geographical position to Midian and rendering the hypothesis of migration unnecessary. Other considerations in support of this view may be briefly indicated:—

indicated :-

(1) The poetical references to Sinai, Dt 332, Jg 54.5, Hab 83, imply that the writers regarded Sinai and Seir as contiguous.

(2) The geographical note (Dt 12) and the account of Elijah's visit to Horeb (1 K 19—the only visit recorded in the OT outside the Pentateuch) supply no definite data for assigning a position to Sinai. The same may be said of Josephus' account of Elijah (Ant. viii. xiii. 7) and of his other references to Sinai (ii. xii. 1, 11, 12, 13).

111. v. 1).

(3) The peninsula at the time of the Exodus was part of Egypt, or inhabited by Egyptian settlers. A journey due east (in the direction of the modern haji route) would lead the Israelites most quickly to safety, whereas that to the traditional Sinal would bring them again into contact with their Egyptian angular. enemies.

would bring them again into contact with their Egyptian enemies.

(4) Elim may be a variant of Elath or Eloth, and a place of this name is on the Gulf of Akabah. The encampment by the sea following suits this position very well.

(5) The absence of satisfactory identification of any of the stations on the road to or from Sinai. Cf. Exodus and Journey to Caraan, §5 ii. iii., and separate articles.

The question as to the position of Sinai is discussed by Sayce, HCM p. 204 ff. St. Paul's reference, Gal 425 to Sinai in Arabia is not conclusive as to the position of Sinai, for the boundary of Arabia towards the W., according to Herodotus, reaches to the canal dug by Necho and Darius, and includes part of the coastline of the Mediterranean to the S. of Gaza (Herod. iii. 5, iv. 39). The LXX speak of Goshen as Yiesus Arabia may then include territory as far west as the modern canal. See Arabia, Goshen, Sinai.

A. T. Chapman.

MIDIANITISH WOMAN (מְּעָרָאָרָה), Nu 25<sup>8-18</sup>, by name Cozbi, the daughter of Zur, was brought into the camp of Israel by Zimri the son of Salu. The parents of both were persons in high station.

The people were weeping before the door of the tent of meeting (v. 6, and from vv. 8. 9 it appears that a plague was raging among Israel at the time); and Phinehas, enraged at this profanation of the camp, thrust both of them through with a spear ('javelin AV). His zeal was rewarded by the promise of an everlasting priesthood to him and to his seed after him (vv. 10-13). The plague was stayed after 24,000 had been slain.

This account (vv.6-15) belongs to P. to Wellhausen (Comp. d. Hex. p. 114), it is placed here after the Balaam section because it was originally connected with an account of Balaam, in which he appears as the counsellor of Midian, advising them to tempt Israel by means of their daughters. This part of the narrative has been replaced by the account in vv. s of Israel's connexion with Moab, and joining themselves to Baal-peor (JE). Here the daughters of Moab make Israel to sin, stress is laid on sacrifice and worship to strange gods, and the 'judges' carry out the sentence. But Kuenen doubts whether, in joining the two accounts together, so interesting a detail would have been entirely suppressed, and is disposed to think that Baham's name did not occur in the original introduction to the story of the Midianitish woman. This is certain, that the two accounts in Nu 25 are from different sources, that they are incomplete, and that emendation must be conjectural. It is probable that vv. 16-18 have been added by way of introduction to the account of Nu 31. For further details the writers above mentioned may be consulted, and Dillmann's commentary on the chapter. A. T. CHAPMAN.

## MIDRASH.—See COMMENTARY.

MIDWIFE ( $\eta_{\gamma}^{+}$ ;  $\rho_{\gamma}$ ,  $\mu a \hat{a}a$ , obstetrix. — Midwives must have been employed among the Hebrews from a comparatively early period (Gn  $35^{17}$   $38^{28}$ , Ex  $1^{166}$ .); but it would appear that Hebrew women usually had little difficulty in childbirth, and that such assistance was not always required (Ex 1<sup>19</sup>). In some cases the necessary service was rendered by friends or relatives (1 S  $4^{20}$ ), as is still the custom in many parts of the East. From the fact that in Ex 1 only two Hebiew midwives are spoken of, it may perhaps be inferred that they were not a numerous class.

A word used in the narrative of Exodus has

given rise to some difficulty. Diff. 'obnayim—a dual form meaning apparently 'the double stone'—occurs again only in Jer 188, where it is applied to the 'potter's wheel.' In Ex 116 it can hardly denote anything but a special kind of stool used by women in labour. Gesenius (Thesaurus, p. 17) doubted the early invention of such a contrivance, and interpreted the word of a stone bath in which the child was washed; but the study of medicine had made considerable progress in Egypt in very early times; birth-stools of various patterns have been employed in many parts of the world (Ploss, Das Weit) ii. 35, 179 ff.); and at the present day in Egypt a chair of peculiar form, called the Kursee elwilddeh, is still in common use (Lane, Modern Egyptians (1871), ii. 241).

The meaning of the names Shiphrah and Puah is quite uncertain; also whether they are of Hebrew or of Egyptian origin. The statement that 'God made for these women houses' (Ex 121) must refer to their numerous or prosperous families, which were regarded as a reward for their upright and courageous conduct towards their Hebrew patients.

H. A. WHITE.

## MIGDAL-EDER .- See EDER, No. 1.

MIGDAL-EL (פְּנְרְיֹאֵלֵי; B Meyaλaapelu, A May-δaλημοράμ, the following name Horem being incorporated).—'The Tower of God,' a town of Naphtali (Jos 19<sup>38</sup>) between Iron and Horem. The exact site is uncertain, though Eusebius (Onom. s.v.) places it between Dora (Tantūra) and Ptolemais (Acre), and 9 miles from the first. In this case it would correspond with Athlit. But the territory of Naphtali did not extend so far, and the site must rather be looked for in one of the numerous Mejdels of N. Palestine. See, further, Dillm. Jos. ad loc.

A. H. SAYCE.

MIGDAL-GAD (૧૩ τους 'tower of Gad'; B Μαγαδά Γάδ, A Μαγδάλ Γ.; Vulg. Magdal-Gad).—Mentioned only (Jos 15³) in the list of the cities of the lot of Judah, together with Zenan and Hadashah, neither of which has been identified. It is one of the group of sixteen cities which are found in various parts of the Shephēlah, so that there is no clue as to the position. Of the same group, Makkedah, Gederoth, Beth-dagon, and Naamah have been found to the north, Lachish and Eglon to the south, and Socoh, Adullam, Azekah, and Jarmuth to the east of the Shephēlah. The name, the 'Tower of Gad' ('Fortune'), may refer to the ancient worship of Gad (good luck or fortune) among the Canaanites. Gesenius conjectures that Gad was the planet Jupiter. In the north of Palestine the modern representation of Baal-gad is conjectured (BRP iii. 409) to be Banias, which is known to have been the sanctuary of Pan; but there is nothing whatever at present known of the remains in the Shephēlah to allow of any conjectures concerning Migdal-gad.

There is a town named Mejdet about 21 miles north-east of Ashkelon ('Askalân) which is suggested as possibly the site of Migdal-gad, solely from the resemblance of the first portion of the name. It is the most important modern town of the district (Nahiet el-Mejdel), has a good weekly market, and a population of about 1500 inhabitants. There is a bazaar in the town; rope-making is carried on outside; the inhabitants are traders, rich and prosperous, and there is a bustle and activity about the place contrasting with most towns in Palestine. There is a mosque with a very conspicuous minaret, seen for a long distance inland. The houses are of mud, the water supply from wells and a pond to the east, where there is also a grove of palms. To the north are olive groves

with large trees, and it is a rich corn country. The sandy dunes are encroaching on the west close on to the town.

Eusebius and Jerome (Onom.) mention Magdala, but give no information. This town may be the Magdolon (Μάγδολον) mentioned by Herodotus (ii. 159) where Pharaoh-necho conquered the Syrians (B.C. 608). As the conquest of Cadytis (Jerusalem?) follows, it is usually conjectured that the Magdolon of Herodotus is the Migdol of the Old Testament (Ex 14², Nu 33²), situated in Lower Egypt (Eusebius, Prap. Evang. ix. 15).

LITERATURE.—Dillmann, Jos. ad loc.; Guérin, Judée, ii. 181; Buhl, GAP 189; Baedeker-Socin, Pal. 2210.

C. WARREN.

MIGDOL (γιρς, γιρς, Μαγδωλον), the name of one or more places on the frontier of Egypt. The word is Semitic, and means 'tower'; it is commonly found in composition, as in the names Migdal-el, Migdal-eder, Migdal-gad. Similarly in Egyp. inscriptions of the 19th and 20th Dynasties, at a time when many Semitic words were adopted into the hieroglyphic vocabulary, the word occurs compounded with the names of different Pharaohs, etc., to designate what appear to have been fortresses on the eastern frontier. In OT, however, the simple form Migdol is always found whenever the place in question is in Egypt.

Egypt.

In Ex 14<sup>2</sup>, Nu 33<sup>7</sup> 'Migdol' refers to a place situated between Goshen and the Red Sea, and near the spot where the Israelites crossed the latter. According to a papyrus, there was in this region, near Succoth, a Migdol of the Pharaoh Seti I.

In Jer 44¹ and 46¹ Migdol, Noph (Memphis), and Tahpanhes (Daphnae) are named as the cities in which the Jews dwelt in Egypt, together with the country of Pathros (the south country, or Upper Egypt). Ezekiel twice mentions Migdol as the N.E. extremity of the country, the other extremity being Syene ('from Migdol to Syene,' the marginal rendering in Ezk 29¹ 30⁴, preferable to AV and RV). One of the principal routes from Palestine passed along the Wady Tumlat; it is possible that the Migdol of Ex was the first station in Egypt on this route from Syria, and was thus considered as marking the N.E. frontier. But a Roman Itinerary|mentions a Magdolo nearer the coast, only 12 miles south of Pelusium, and this situation (perhaps at the modern Tell el-Her) agrees still better with the biblical indications. Mashtul, the present form in which the name Migdol occurs in Egypt, is derived through the Contic; it is found as a village-name three times—twice in the eastern Delta, and once in Middle Egypt. But none of these Mashtuls can be identified with a biblical Migdol.

MIGRON (μτρς; B Μαγών, Luc. Μαγεδδώ).—1. A place in Benjamin, in the neighbourhood of Gibeah (1 S 14²). There are reasons for suspecting that the vocalization of the MT is incorrect, and that a proper name should not be read here at all. The Syr. read μτρς 'by the threshing-floor,' and Wellh. (Sam. ad loc.) proposes μτρς, with the same meaning. This is accepted by Budde (in SBOT), who objects to Klostermann's emendation έμτρς 'in the common-land,' that this is hardly an old enough word to be used here. If μτρ be taken as a proper name, it is a question whether it is to be identified with—2. Migron of Is 10²8 (B Μαγεδώ, i.e. Megiddo, which of course is out of the question). The prophet, in his (ideal) description of the Assyrian invasion, mentions Migron as one of the stages in the march of the enemy, and appears to place it north of Michmash, and thus at a considerable distance from Gibeah (cf. v.²). W. R. Smith, indeed, proposes (Journ. of

Philol. 13, 62 ff.) to identify with the Migron of 1 S 142, south of the Wady Suweinit, by supposing that the Assyrian, before marching through the pass, is pictured as seizing by a coup-de-main this position at its southern end. This is accepted by Driver (Isaiah<sup>2</sup>, p. 72), but Dillmann and Buhl both object to it as too artificial, and agree in locating Isaiah's Migron at the modern Makrun, about ½ mile S.E. of the village of Burka (cf. Baedeker-Socin, Pal. 2121).

J. A. Selbie.

MIJAMIN (με, and με, L. 10 one of those who had married a foreign wife, Ezr 10<sup>25</sup> (B 'Αμαμείν, A Μεαμίμ, called in 1 Es 9<sup>25</sup> Maclus). 2. Eponym of the 6th of the priestly courses, 1 Ch 24° (B Βενιαμείν, Α Μειαμείν). This family returned with Zerubbabel, Neh 12<sup>5</sup> (κοι \* Μειμίν), and was represented at the sulling of the coursest 107 (28). sented at the scaling of the covenant 107 (B Mianelu, A Meamely) = Miniamin of Neh 1217.

MIKLOTH (מקלוח).—1. A son of Jeiel, 1 Ch 832= 9<sup>371</sup>. The words 'and Mikloth' (niɔpɔ) have probably been dropped at the end of 8<sup>31</sup> (Β και Μακαλώθ). in 9<sup>87</sup> they are found both in MT and LXX (B Μακελλώθ, A Μακεδώθ). 2. An officer of David, 1 Ch 274. There is a strong suspicion that the MT is The name is wanting in LXX (BA).

MIKNEIAH (יסקניהו).—A gate-keeper of the ark, 1 Ch 1518 (Β Μακελλειά, Α Μακενιά, Ν Μακκελλά) 21 (Β Makeviá, A Makevias).

MILALAI ('\\'2\\22, LXX om.).—The eponym of a priestly family, Neh 1236.

MILCAH (πρ/π, Μελχά).—1. Daughter of Haran, and wife of Nahor who was her uncle,\* Gn 11<sup>29</sup>. The names of her children are given in 22<sup>20π</sup>. Rebekah was her granddaughter, 24<sup>15, 24, 47</sup>. All these passages proceed from J. Nöldeke (ZDMG xlii, 484) conjectures that Milcah may be the same name as  $n_2 \nmid p$ , the goddess worshipped by the Phenicians. Ball (SBOT) thinks it possible that  $n_2 \nmid p$  and  $n_3 p$ ; (also Gn  $11^{20}$ ) may be phonetic or dialectic variants of the same (tribal or local) name; cf. The weakening and discrete that  $n_3 \mid p$  and  $n_3 \mid p$  and appearance of m is a well-known feature of Babylonian.' This, however, appears somewhat precarious. See, further, art. ISCAH.

2. Daughter of Zelophehad, Nu 2633 271 3611, Jos 178 (all P). There can be little doubt that Kuenen is right in pronouncing Zelophehad's 'daughters' to be really towns, and, if the above conjecture of Nöldeke be correct. Milcah may be an abbreviated form of Beth-milcah (see Gray, Heb. Prop. Names, p. 116).

J. A. SELBIE.

# MILCOM. - See MOLECH.

MILDEW (γρη yērākön, ωχρα, rubigo). — This word occurs with γρηψ shiddāphön, ἀνεμοφθορία, αἔτε corruptus (Dt 28<sup>22</sup>, 1 K 8<sup>37</sup>, 2 Ch 6<sup>23</sup>, Am 4<sup>9</sup>, Hag 2<sup>17</sup>). Yērākön signifies 'yellowness' or 'pallor' (cf. Arab. yerakân='jaundice'). It is in contrast with shiddāphān, which signifies the drying up or scorching of the grain or fruit by heat, during the siroccos or khamsin winds. Mildew consists of various species of parasitic fungi, which grow at the expense of their host, and suck out the juices of the grain or fruit and so destroy them. of the grain or fruit, and so destroy them. shiddaphon is due to excessive drought, yerakon is due to excessive moisture. They are both peculiarly liable to occur in a climate marked by

long periods of uninterrupted heat, followed by a winter season, during which most of the rainfall of the year takes place within two or three G. E. Post. months.

MILE .- See WEIGHTS AND MEASURES.

**MILETUS** (M $l\lambda\eta\tau$ os) was in very early times the most famous and important of the Ionian cities, an ancient Greek colony on the coast of Caria. It was situated at the southern end of the sea entrance to the gulf into which the river Mæander formerly emptied itself. But the silt which the river carries with it has entirely filled up the gulf, and forced the coastline far out to sea. Hence the modern Palatia, which marks the site of Miletus, is about 5 or 6 miles from the sea, and Lade, which in the time of Strabo (A.D. 19) was an island in front of the harbour of Miletus, is now a small hill in the low alluvial plain. Once the greatest Greek city in Asia, Miletus was a second-rate town under the Romans, and now is, and is likely always to continue, an obscure village or a ruin. Our ignorance of the exact truth as to the situation of Miletus in relation to the coastline about the middle of the 1st cent. makes the circumstances narrated in Ac 20<sup>15</sup>-21<sup>1</sup> rather obscure. The present coastline extends nearly direct northwards on the west side of the site of Miletus. But in A.D. 19 Miletus was situated on the south coast of a gulf of irregular shape (Λατμικός  $K\delta\lambda\pi\sigma\sigma$ ), which extended far into the country eastwards. The south-eastern extremity of this gulf is now a lake. The rest of the gulf is now land, often swampy, through which the Macander flows in two arms-one keeping near the north side of the low alluvial plain, and one near the south side. The southern arm in its upper part seems to be the channel of the ancient river. The two arms unite close on the north-west side of the site of Miletus, and flow into the sea by one mouth. We do not know the exact line of the coast about A.D. 50; but Strabo gives a rough idea of its situation 30 years earlier.

Thus, in modern times, a messenger could easily be sent by land straight north from Miletus to Ephesus. But in ancient times a foot-messenger would have to make an immense circuit: for example, he would have to traverse about 110 stadia from Miletus to Heracleia, and 100 from Heracleia to Pyrrha, whereas the sea-crossing from Miletus to Pyrrha was only 30 stadia. Pyrrha was 50 stadia south of the mouth of the Meander, which joined the sea between Pyrrha and Priene. At the present day Priene is 12 miles from the coast. coastline on to Prienc is not stated by Strabo, but it must have been more than 100 stadia. Hence the foot-messenger would have a journey of over 360 stadia from Miletus to Priene (45 miles), whereas the straight line across the gulf is barely 100 stadia (12½ miles). From Priene to Ephesus, the land road across the mountains cannot be less than 25 miles, though the air line is under 20. Paul's messenger, then, probably sailed to Priene and walked or rode thence to Ephesus. The vague statement often made, that Ephesus was by land only about 20 or 30 miles distant from Miletus, is,

as we now see, very misleading.

If we accept as true \* the Bezan and Western addition to Ac 20<sup>16</sup> μείναντες έν Τρωγυλλίψ, we see that the ship on which were St. Paul and the delegates, bearing the contributions of the Churches of the four provinces, Achaia, Macedonia, Asia, and Galatia, after sailing from Assos on a Monday

<sup>\*</sup> For other instances of marriages of relatives in the family of Terah, Dillmann cites Gn 20<sup>12</sup> 24<sup>30</sup>. 20<sup>19</sup>, pointing out at the same time that 'such marriages are only a short way of expressing the amalgamation of fair-sized communities into one whole.'

<sup>\*</sup>True, whether as a correct tradition added by a reviser, or as a part of the original text written by St. Luke, which dropped out either in the transmission of the text, or through the act of the author (according to Prof. Blass's theory).

morning,\* must have spent Wednesday night at Trogyllion, the extreme promontory of Mount Mykale on the north side of the Mwander valley, projecting far out towards the west and towards Samos. On Thursday a voyage of only about 23 miles with the morning breeze from the north would bring them to Miletus. A messenger was then found, and sent to Ephesus. He would probably reach Ephesus during the course of Thursday night, and the assembling of the elders and their journey (some being doubtless comparatively elderly men) would take time. The morning of Saturday, then, is the earliest possible date for the arrival of the elders in Miletus; and we must suppose that St. Paul spent the day with them; and probably the early morning of Sunday t was the time when the ship proceeded on its voyage to Jerusalem, reaching Cos that day.

According to 2 Ti 420 St. Paul visited Miletus

(AV Miletum) on some later occasion, and there left Trophimus sick. This visit is quite inconsistent with the narrative of Ac, and must be referred to a later period, after St. Paul was released from his Roman imprisonment, and returned to the Ægean

lands and churches.

The famous temple of Apollo Didymeus at Branchidæ was about 20 miles south of Miletus, in the territory subject to that city. It stood about 2 miles back from the coast, overlooking the harbour Panormus. The best account of Miletus and Branchide is given in Sir C. T. Newton's works, and in Radet's Milet et le Golfe Latonique.

Miletus is mentioned as a bishopric in all the Notitive Episcoputuum; but, although it is given first in the list of Hierocles' Synckdemos, the common statement that its bishop occupied the first rank among the bishops of Caria is wrong: that rank belonged to Aphrodisias, for the coast cities of Caria lost and the inner cities gained importance in the late Roman and Byzantine times. But during the 5th cent. Miletus became an archbishopric independent of the control of Aphrodisias (auroké-

φαλος), but without subject bishoprics.

Few traces of the influence of Christianity in Miletus have been discovered. It is apparent that in the coast towns of Asia, which were less thoroughly Christianized and also more closely under the eye of the imperial officials than those of Phrygia, hardly any public memorials of the new religion can have been erected before the time of Constantine. official inscription of the time of Justinian is published in Byzant. Zeitschrift, 1894, p. 21. Another late inscription mentions the saint and martyr Onesippos (CIG 8847). A strange example of popular superstition and angelolatry, invoking the seven archangels to guard the city, was found in the theatre (CIG 2895); it perhaps belongs to the 4th cent.: on the kind of practices connected with this class of superstition see Wünsch, Sethianische Verfluchungstafeln, 1898.

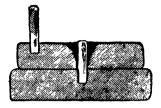

Miletus is mentioned in LXX of Ezk 2718 (see Field, Hexapla). W. M. RAMSAY.

MILK.—See FOOD in vol. ii. p. 36a.

MILL, MILLSTONE (הַהָּיִם, Arab. raha).—The hand-mill is in constant use in many parts of Syria at the present time. It consists of two circular stones, one of which is placed on the top of the other, and the upper and lower surfaces of each of them are flat. From the centre of the lower stone a strong pin of wood passes through a funnel-shaped hole in the upper stone. Into

VOL. III.-24

this hole the grain to be ground is thrown, and it escapes as flour between the two stones at the circumference, and falls on a smooth sheepskin which is placed under the lower stone. On the surface of the upper stone, near its circumference,

SECTION OF HAND-MILL

the handle is inserted, which may be of any length, according to the number of hands used in turning it. Small stones are generally turned by one woman, but larger ones may be turned by two,

three, or four women.

In ancient times, turning the mill was a work the modern times, turning the mill was a work deemed fit only for women and slaves. In Jg 16<sup>21</sup> Samson was set to grind in the prison. In La 5<sup>13</sup>, rendered in RV 'the young men bare the mill, and the children stumbled under the wood,' it should probably be, as in the Arab., 'They caused the young men to grind, and the boys stumbled under the wood.' The poet laments that the young men should be put to so degrading an employment. should be put to so degrading an employment, and that the boys should be put to a work for which they were not able, such as carrying the wood to the oven for firing the bread which was made from the flour ground by the young men. Hand-mills have no wood about them except the handle and the central pin, which are fixed so that they cannot be taken out. In Lebanon and those parts of Syria where a fall of water can be obtained, large millstones are turned by a horizontal water-wheel. The water falls through a pipe formed of large stones perforated, and at the lower end of this pipe a wooden channel directs the stream against the floats of the wheel. The water-wheel is enclosed in a vault, the roof of which forms the floor of the room in which the millstones are placed. The wooden axle of the wheel passes through the roof of the vault, through the lower millstone, and is fixed to the upper millstone, which it turns round. When the wheat is ground into flour it is gathered in the same way as when the hand-mill is used. This kind of mill is called tahoon. Cf. the Heb. tehon. There is another kind of mill turned by animals, which is called tahanet. In Mt 185, Mk  $9^{42}$  we have  $\mu \dot{\omega} \lambda \sigma s$ δνικός, a millstone turned by an ass. Usually the stones of the mill are of a dark-brown sandstone, and when the stone is soft the flour is full of sand. The upper stone has frequently to be taken off to have its under surface roughened; but when the porous Hauran stone is used, that is not necessary, as the stone in wearing presents new holes, and, consequently, new cutting edges.

The hand-mill being an implement absolutely necessary in a household, it was forbidden to take the upper millstone (קרב, Arab. mirdat) as security for debt, as that would render the mill useless (Dt 24°).

Mills are used not only for grinding wheat into Mills are used not only for grinding wheat into flour, they are used also for making crushed wheat (burghal). The wheat is first boiled and then dried in the sun, and when put into the mill water is sprinkled upon it to prevent its being ground into flour. The mill is turned slowly. Crushed wheat is used to make a kind of food which is a great favourite with the mountaineers of Lebanon; it is called kibby. It is a mixture of crushed wheat (RV 'bruised corn,' Pr 272) and

<sup>\*</sup> In the year A.D. 57 it would be Monday 25th April.
† Sunday 1st May, A.D. 57.

Ramsay, Historical Geography of Asia Minor, p. 428. Gelzer
fixes the date between 459 and 536, but it may be earlier.

raw mutton beaten together in a mortar for hours, and is generally eaten cooked, but often raw. The grinding of the burghal, or bruised wheat, was a season of rejoicing in Lebanon some years ago. The young men gathered together, and, while the grinding was going on, songs were sung to the accompaniment of musical instruments and a kind of small drum.

W. CARSLAW.

MILLENNIUM.—A name suggested by the period of 1000 years described in Rev 20<sup>2. 4-7</sup> during which Satan is confined in the abyss, and the martyr saints reign with Christ. Hence variously understood, according to the interpretation put upon the passage, either as (1) the period, present or future, definite or indefinite, 'during which the kingdom of Christ will be established upon earth, and will dominate over all other authority' (Cent. Dict.); or more specially (2) as the period in which 'Christ will reign in bodily presence on earth for a thousand years' (Oxf. Eng. Dict. s. 'Chiliasm'). In this latter sense it is associated with pre-millenarian views of Christ's Second Coming, the word Chiliast or Millenarian being usually applied in the pre-millenarian sense (Oxf. Eng. Dict. l.c.; Cent. Dict. 'Millenarian').

That which is characteristic of the doctrine in all its forms is the belief in a period of triumph and blessedness for the saints on earth, preceding and distinct from the final blessedness of the world to come. Such a belief meets us not only in the early Christian eschatology, but also in that of the later Jews, where it was probably due to a combination of the simpler eschatology whose horizon is bounded by this world and the hope of earthly triumph, and a more developed eschatology which distinguishes two worlds or zons, and places the true salvation in the latter (Schürer, HJP). It. ii. 178). While the term is often used loosely to describe carnal ideals of the future, whether limited in duration or not (as when reference is made to the chiliastic views of the Jews in Christ's time), it should properly be restricted to those opinions which, making the above distinction between the two zons, hold to a preliminary period of blessedness in the former. Hence those modern millenarians (like Seiss, The Last Times, 211) who identify the Millennium with the world to come, use the term in a sense altogether different from that which we are now discussing.

As thus defined, the doctrine of the Millennium is not found in OT. The prophets look forward to a state of blessedness and glory for Israel, to be introduced, either by the advent of J" Himself (Is 40<sup>9-11</sup> 52<sup>7-12</sup>), or of the Messiah (Is 9<sup>8</sup>, Zec 9<sup>9-10</sup>). This state is variously described—sometimes in language which requires no more than the establishment of the redeemed Israel in the first place among the nations; at others, in words which imply a change of nature itself, and the creation of a new heavens and a new earth (Is 65<sup>176</sup>. Yet note that even this picture does not represent the individual members of the redeemed Israel as immortal. Cf. Enoch 5<sup>9</sup> 10<sup>17</sup> 25<sup>6</sup>, Apoc. Bar 73<sup>3</sup>). But, however conceived, this blessed state bounds the horizon of prophecy (cf. Jer 33<sup>17-22</sup>, Ezk 37<sup>22</sup>, J1 4<sup>20</sup>). Especially in Daniel is the eternity of the Messianic kingdom emphasized. 'And in the days of those kings shall the God of heaven set up a kingdom which shall never be destroyed' (2<sup>44</sup>). 'And the kingdom and the dominion, and the greatness of the kingdom under the whole heaven, shall be given to the people of the saints of the Most High. His kingdom is an everlasting kingdom' (7<sup>26</sup>, cf. 7<sup>14</sup>).

In much of the Pseudepigraphical literature we find the same point of view. So Sibyll 348-50, Jub 32 (quoted by Drummond, 314), Ps-Sol 174, Sibyll 3766

'And then will he raise up a kingdom for all time for all men'; Enoch 6214 'And the Lord of spirits will abide over them, and with that Son of Man will they eat and lie down and rise up for ever and ever.' Doubtless it is true, as Drunmond remarks (314), that these expressions do not necessarily imply strict eternity (cf. Bar 731 with 403; and see Enoch 1019), although, in the case of Enoch 6214 as of Daniel, this seems required by the context. But in any case the ideal which is set forth in these passages is final. The same view appears (Jn 1234) in the objection to Christ's prophecy concerning His lifting up. 'We have heard out of the law that the Christ abideth for ever.' So in the Targ. Jon. (on 1 K 433) the Messianic time and the world to come are identified. (Cf. Mishna, Berachoth i. 5, and the literature cited by Schürer, HJP II. ii. 177).

Side by side with this view, we find in the

Pseudepigraphical books another, which distinguishes between the Messianic kingdom, which it regards as belonging to this present age, and the final consummation of all things in the world to come. Perhaps the first trace of this doctrine is in Enoch 9112-17, a fragment assigned by Charles to B.C. 104-95, and by Dillmann to the time of John Hyrcanus. The seer has described the seven weeks into which he conceives the past history of the world to be divided (93<sup>3-10</sup>). 'And after that there will be another week, the eighth, that of righteousness, and a sword will be given to it that judgment and righteousness may be executed on those who commit oppression, and sinners will be delivered into the hands of the righteous. And at its close they will acquire houses through their righteousness. And the house of the Great King will be built in glory for ever more. And after that, in the ninth week, the righteous judgment will be revealed to the whole world, and all the works of the godless will vanish from the whole earth, and the world will be written down for destruction, and all mankind will look to the path of uprightness. And after this, in the tenth week, in the seventh part, there will be the great eternal judgment, in which he will execute vengeance amongst the angels. And the first heaven will depart and pass away, and a new heaven will appear, and all the powers of the heavens will shine sevenfold for ever. And after that there will be many weeks without number for ever, in goodness and righteousness, and sin will no more be mentioned for ever' (Charles' tr. p. 268 fl.). Here we have a period of righteousness, in which the temple is to be rebuilt, and a missionary week resulting in the conversion of the world, preceding the final judgment, which introduces the new heaven. There is, however, no mention of a personal Messiah. Briggs (Mess. Gosp. 15, 16; cf. Mess. Apost. 9), calls attention to the parallel between this passage and the later Persian eschatology, which regards the final resurrection and judgment as preceded by two preparatory millenniums, in which the prophets Ukhshyat-ereta, or Aūshētar, and Ukhshyatnemah, or Aūshētar-māh, of the Avesta and the Pehlevi literature of Zoroastrianism, prepare the way for the coming of the final redeemer Saoshyant or Sāshāns. It is, of course possible that in this or Soshans. It is, of course, possible that in this, as in the allied doctrine of the resurrection, Jewish thought may have been affected by Persian ideas. But our sources for the Persian eschatology are so late (the Bundahis, in their present form, dating not earlier than the 7th cent. A.D.; cf. West in Sac. Books of East, v. p. xli, cf. also vols. xxiv. xxxvii. and xlvii.) that we must use great caution in drawing conclusions.\*

\* On Persian eschatology, cf. Hübschmann, 'Die parsische Lehre von Jenseits, 'Jahrb. Prot. Theol. 1879, ii.; Fr. Spiegel, art. 'Parsismus,' in Hersog, RE'; Jackson, 'The AncientPersian Doctrine of a Future Life,' in Biblical World, 1896, pp. 149-163. For

In the later Jewish Apocalypses, as in Talm., we find the limitation of Messiah's kingdom clearly set forth: thus Apoc. Bar distinctly limits its duration to this present world. Et erit principatus ejus stans in seculum, donec finiatur mundus corruptionis et donec impleantur tempora prædicta (403). The character of this kingdom is set forth in extravagant language (women bearing children without pain, the vine yielding 1000 branches, each branch 1000 clusters, each cluster 1000 grapes, each oranen 1000 clusters, each cluster 1000 grapes, each grape a cor of wine, etc., ec. 29. 73), which occurs also in Papias, and is applied to the Christian Millennium. Still more striking is 2 Es 7<sup>28, 29</sup> For my Son the Messiah (so Syr. Æth. Arab. over ag. Lat. 'Iesus') shall be revealed with those that are with him, and shall rejoice with those that remain 400 years. And it shall come to pass after these years that my Son the Christ and all men who have breath shall die. And the world (sæculum) shall be changed into the ancient silence seven days as in the first beginnings, so that no one shall be left. And it shall come to pass after the seven days that the world which does not now wake shall be aroused, and the corruptible shall dic. And the earth shall give up them that sleep in her, and the dust them that dwell in that silence, and the store-houses (promptuaria) shall give up the souls entrusted to them. And the Most High shall be revealed upon the seat of judgment, etc. (cf. 12<sup>34</sup>). Here, unlike Baruch, where the Messianic age forms a transition between this world and that which is to come (74<sup>2,3</sup>, cf. Schürer, 11. ii. 178), the contrast between the Messianic age and the world to come is emphasized in the sharpest way. The Messiah and all flesh die, and sharpest way. The Messiah and all flesh die, and remain dead for seven days. The length of the Messianic kingdom is expressly limited to 400 years—a number explained in the Talmud as due to the combination of Gn 16<sup>18</sup> (the sojourn in Egypt) with Ps 90<sup>15</sup> 'Make us glad according to the days wherein thou hast afflicted us' (Sanh. 99a). Another passage cites Mic 7<sup>15</sup> 'As in the days of thy coming forth out of the land of Egypt will I show unto him marvellous things' (Tanchuma, E'leb 7, quoted Weber 2, 372). In the later Jewish theology the view of the Messiah's kingdom as limited became the provailing one (Schürer, as above; cf. Weber, 373). Its duration was a favourite subject of speculation. The classical passages are Sanh. 97, 99a, where the following reckonings are given: three generations, 40 years (corresponding to the 40 years in the wilderness), (corresponding to the 40 years in the winderness), 70 years, 100 years, 365 years, 400 years, 600 years, 1000 years, 2000 years, 7000 years (see the passages quoted at length in Gfrörer, ii. 252 ff.; also Weber, 371 ff.; Drummond, 315 ff.). The determining principle seems to have been either 'the analogy beciple seems to have been either 'the analogy between the first and the last redemption, therefore 40 or 400 years,' or 'the symmetry of the final period with those which precede,' hence 2000 years, corresponding to the 2000 before and the 2000 under the law; or finally, 'the thought that the Messianic time is a time of joy, Israel's marriage—hence 1000 or 7000 years' (Weber, 373). Still another reckoning is based upon the idea of a Sabbatical week, in which six millenniums of work are followed by one of rest. This view, perhaps first found in Secrets of Enoch 33<sup>1, 2</sup> (see Charles' note at the passage, and Index ii., s. 'Mil-Charles' note at the passage, and Index ii., s. 'Millennium'; also art. ENOCH in vol. i. p. 711a), rests upon Ps 904 (cf. Jub 4, Sanh. 97a) and meets us in the Christian Epist. of Barnabas (c. 15).

In early Christian eschatology we find a like

a discussion of Persian influence on OT eschatology, Cheyne in Expos. Times, ii. (1890) pp. 202, 224, 248, and Bampton Lectures for 1880, p. 381 fl.; Moulton in Expos. Times, ix. 352 fl.; Stave, Einflues Parsiamus auf das Judentum, 1888, p. 145 fl.; on the eschatology of the Talmud, Kohut, ZDMG, 1867, p. 552 fl.

difference of view. On the one hand, we find passages in which the horizon of prophecy is bounded by the second advent of Christ, which, like the day of J" of OT, is regarded as closing the present age, and introducing the world to come. In many passages it is expressly associated with the general resurrection and the judgment (Mt 13<sup>20</sup>), parable of the Tares; Mt 25<sup>31-45</sup>, the great judgment scene; Jn 5<sup>20</sup> 6<sup>44</sup>, Ac 17<sup>81</sup>, cf. 10<sup>42</sup>). It results, for the wicked, in 'eternal destruction from the face of the Lord and from the glory of his might' (2 Th 16-10), while it introduces the saints into 'an inheritance incorruptible and undefiled, and that fadeth not away (1 P 14-8, cf. 2 P 111). On the other hand, we find a view which distinguishes between the Coming of Christ and the end of the world, and inserts between the two a period of millennial reign, in which Christ will dwell with the saints upon the renewed earth, and in which the OT prophecies concerning the glory of Jerus, and the victory of Israel over the nations will find their the victory of israei over the nations will find their fulfilment. This period is variously described in language more or less gross or spiritual. But its essential features are those; a preliminary victory of Christ over the forces of evil at the advent (the destruction of Antichrist); a double resurrection, first of the saints at the beginning of the millennial period, then of all men at the last day; an earthly kingdom, in which the saints reign with Christ on the renewed earth, and the OT prophecies find literal fulfilment; a last brief outbreak of the forces of evil, followed by the universal resurrection and final judgment.

The doctrine of the Millennium is set forth in NT in clear terms only in Rev, where it constitutes 'the most easily recognizable dogmatic peculiarity' (Holtzmann, Hdcom. iv. 319). It is here taught that after the victory of the Messiah and His army over the beast and his army, and the destruction of the latter with the false prophet and all his followers (ch. 19), Satan himself will be cast into the abyss, and confined there for 1000 years, 'that he should deceive the nations no more until the 1000 years should be finished' (203). This triumph is followed by the resurrection of martyr saints, who reign with Christ as kings and priests 1000 years reign with Christ as kings and priests 1000 years (20<sup>3</sup>, cf. 5<sup>10</sup>). This is expressly called the first resurrection, it being stated that 'the rest of the dead lived not until the 1000 years should be finished' (v.\*). At the close of the 1000 years Satan is loosed for a little while. Then follows a last world-conflict of the powers of evil, at the close of which takes place the final resurrection and judgment, ending in the destruction of all evil, Death and Hades themselves being cast into the lake of fire. This is the second death (2014, cf. 211). This passage is most naturally understood as teaching a pre-millennial advent of Christ, and an earthly reign (so most recently by Salmond, Christian Doctrine of Immortality, 2nd ed. p. 442). It is to be noted, however, that the reference is only to a reign of the martyrs, not, as the later theory represented, of all Christians. Those who reject this interpretation are obliged either to break the connexion between chs. 19 and 20 (so Briggs, who regards the two chs. as belonging to two different Apocalypses, Mess. Apost. 305), or else to deny to ch. 19 any reference to the second advent, seeing in it only such a preliminary advent for judgment as is referred to in 25.16 33.10 (so Moses Stuart, who sees in it no more than a reference to the approaching destruction of heathenism, ii. 352). The most serious difficulty in the way of this interpretation is the reference to the resurrection of the martyrs. In NT the resurrection of the saints is always associated with the advent of Christ. The older interpretations of a symbolic resurrection (as that of Israel in Ezk), or of a spiritual resurrection (as in regeneration), are rendered untenable by the explicit reference to the martyrs (cf. 6<sup>9-11</sup> 19<sup>9</sup>). Those who reject the idea of a physical resurrection are obliged, therefore, to think of a resurrection from Hades to heaven, taking place at the close of the martyr age, and introducing those who are thus specially honoured into a state of heavenly blessedness which continues till the close of human history. (So Briggs, Mess. Apost. 357, who quotes Mt 27<sup>52, 53</sup>, Eph 4<sup>8</sup>, 1 P 3<sup>19</sup> 4<sup>8</sup>, Jn 5<sup>26</sup>; Moses Stuart, ii. 478. The case of Moses and Elijah might also be cited. Cf. Schürer, II. ii. 180, for similar ideas among the Jews). From this point of view, the significance of the Millennium, while introduced indeed in time by the martyr age, and corresponding in general 'with the duration of the Church as the triumphing institution of the world in the last complete period of human history'

in the last complete period of human history' (Briggs, 357), is not earthly but heavenly.

Outside of Rev many interpreters find reference to a millennial kingdom in 1 Co 15<sup>23, 24</sup>, where St. l'aul seems to distinguish between the Parousia of Christ with the resurrection of the saints, and the end when He shall deliver up the kingdom to the Father. Between these two events they conthe Father. Between these two events they conceive to lie that reign referred to in v.2, which they identify with the period of 1000 years described in Rev 20 (so Olshausen, de Wette, Moses Stuart; Godet, Com. 1 Cor. Eng. tr. ii. 377 ff. et al.). Meyer distinguishes the two events in time, but rejects the identification of the intervening period with the Millennium of Rev 20. So Schmiedel, *Hdcomm*. ii. 161. On the other side, Heinrici, 1 Kor. 503 ff.; Weiss, Bib. Theol. 401; Harnack (art. Millennium, Enc. Brit. xvi. 315); Briggs, Mess. Apost. 114, and the majority of modern interpreters. Those who find a pre-millenarian meaning in 1 Co 15<sup>23\pi</sup> interpret in like sense 1th 3<sup>11</sup> (St. 1taul's hope of attaining the resurrection), 1 Th 4<sup>14-17</sup> (which clearly refers, however, not to two resurrections, but to a resurrection of the faithful dead, to be followed immediately by the transformation of the 'quick'), l.k 14<sup>14</sup> (the resurrection of the just), 20<sup>35</sup> ('they that are accounted worthy to attain to that world, and the resurrection from the dead'), and Mt 1928 (the regeneration, when the apostles shall sit on thrones judging the twelve tribes of Israel). millenarian interpreters also refer to the period between the advent and the end, the promises in Mt5° (the meek shall inherit the earth), Mt 20° (the ceward of the labourers), and Mk 10° Lk 18° (the ceward of the labourers). (the reward given to the disciples in this world, which is distinguished from that in the world to come; yet cf. Lk 2035, where the resurrection introduces the world to come). For a temperate statement of the exceptical argument for premillenarianism, cf. H. Schultz in JDTh, 1867, pp. 120-127. On the other side, Salmond, op. cit. pp. 520, 561 ff., and the authorities cited above.

Millenarian views were common, though by no means universal, in the early Church. They meet us in gross form in Papias, who quotes as a genuine word of Christ a prediction, generally agreeing with Apoc. Bar, concerning the remarkable fertility of the vine in the millennial kingdom (Iren. adv. Hær. v. 33; cf. Euseb. iii. 39); in more spiritual form in Barnabas, who, combining Gn 2² with Ps 90°, looks for a Millennium of Sabbath rest, following the present six millenniums of work, and introduced by the coming of the Messiah 'to put an end to the time of the wicked one, and to judge the ungodly, and to change sun, moon, and stars' (15°). This he declares to be the true Sabbath rest for which Christians look—a time when, having been themselves justified, and having received the promise, lawlessnoss no longer existing, but all things having been made new by the Lord,

further, under PAROUSIA.

they will be able to keep holy the Sabbath, having first been sanctified themselves (v.7). At the close of this millennial period follows the beginning of the eighth day, which is the beginning of another world (v.8). Hermas and 2nd Ep. Clement are also claimed as pre-millenarian, but without sufficient reason. There is no trace of the doctrine in either I Clement, Ignatius, Polycarp, or the Epistle to Diognetus. The Didaché, indeed, restricts the resurrection at the Advent to those who are Christ's, but is silent as to what follows thereafter. 'And then shall appear the signs of the truth: first the sign of the voice of the trumpet, thirdly the resurrection of the dead, yet not of all; but as it was said, The Lord shall come, and all his saints with him. Then the world shall see the Lord coming upon the clouds of heaven.'

coming upon the clouds of heaven.'

The prevalence of millenarian views in the later

The prevalence of millenarian views in the later Church was due partly to the Jewish Apocalypses, which were read and highly esteemed in the Christian Church (Papias, cf. Harnack, art. 'Millennium,' 315), partly to the explicit statement of the Apoc. of St. John (Justin, Trypho, 81). Hence we find later opponents of Chiliasm denying the authenticity of Rev (Dionysius ap. Euseb. vii. 25). While most common among the Jewish Christians, to whom their origin was attributed by leter to whom their origin was attributed by later opponents (Cerinthus ap. Euseb. iii. 28; cf. Test. XII. Pat. [Jud. c. 25; Benj. c. 10]; Ebionites ap. Jerome, Com. on Is. lx. 1, lxvi. 20), such views early meet us among the Gentile Christians. Justin, while in ceramong the Gentue Christians. Justin, which a cartain passages apparently ignoring them (Apol. 52, Trypho, 45, 49, 113; cf. Briggs in Luth. Quar. 1879), elsewhere explicitly recognizes them. When asked by Trypho whether he really admits that Jerus. will be rebuilt, and expects that his people will be gathered together and made joyful 'with Christ together with the patriarchs and the prophets, and the men of our nation and proselytes who joined them before your Christ came, Justin answers in the affirmative. While admitting that 'many who belong to the pure and pious faith, and are true Christians, think otherwise,' he declares that he and others 'who are right-minded Christians on all points, are assured that there will be a resurrection of the dead, and 1000 years in Jerus, which will then be built, adorned and enlarged as the prophets Ezekiel, Isaiah, and others declare' (80). For this view he cites Rev as follows: 'There was a certain man with us whose name was John, one of the apostles of Christ, who prophesied by a revelation which was made to him that those who believed in our Christ would dwell 1000 years in Jerus., and that thereafter the general and in short the eternal resurrection and judgment for all men would likewise take place' (81). With the exception of Justin, the Apologists show no trace of Chiliasm. The anti-Gnostic Fathers of the close of the 2nd cent., on the other hand, were pronounced Millenarians. Ireneus (adv. Hær. v. 32-35), Tertullian (adv. Marc. iii. 25), and later Hippolytus (Com. in Dan. 1772, p. 99) give us in their writings full descriptions of the millennial kingdom. Tertullian wrote an entire work on the subject (de Spe Fidelium), which has unfortunately perished. Doubtless the views of these Fathers were influenced by their opposition to the Gnostics, who with Chiliasm rejected also the entire Christian eschatology. But the adoption of chiliastic views by the Montanists, who looked for the speedy setting up of the millennial kingdom at Pepuza in Phrygia, soon brought them into disrepute. were opposed in Rome by the Presbyter Caius, who attributed their origin to the arch-heretic Cerinthus (Euseb. iii. 28). In the East they were attacked by the Alexandrines, who, following the example set by the Gnostics, interpreted the pas-

sages cited by the Chiliasts allegorically (cf. Origen, de Prin. ii. 11). The attempt of the Egyptian bishop Nepos to enforce a literal interpretation was unsuccessful. Especially effective was the opposition of Dionysius of Alexandria, who wrote a book 'On the Promises,' in which he advocated the allegorical exegesis, and denied the Johannine authorship of the Apocalypse. Later Chiliasts, like Methodius of Olympus (Banquets of the Ten Virgins, ix. 5) and Apollinaris of Laodicea (Basil,

Ep. 263), were unable to stem the tide.
In the West, Chiliasm was longer lived. Here the doubts as to the authenticity of the Apoc. found little hearing. Commodian (Inst. adv. Gent. deos, 43, 44) and Lactantius (Inst. vii. 24) were pronounced Chiliasts. Victorinus of Petau is so claimed by Jerome, although his commentary on the Apocalypse shows no trace of such views (yet cf. Briggs, Luth. Quart. p. 234). Jerome himself, while often speaking contemptuously of the Chiliasts as 'our half-Jews (semi-Judæi), who look for a Jerus. of gold and precious stones from heaven, and a future kingdom of 1000 years, in which all nations shall serve Israel' (Com. on Is. lx. 1, lxvi. 20), elsewhere (Com. on Jer. xix. 10) speaks of them with more respect, as holding views 'which, although we may not hold, we cannot condemn, because many ecclesiastical men and martyrs have taught the same.' Even Augustine, the strongest of all opponents of Chiliasm in the West, distinguishes between a gross and a more spiritual form, and admits that in his early days he himself had been an advocate of the latter (de Civ. Dei, xx. 7).

The final defeat of Chiliasm in the West was due to Augustine, who, in his City of God, identified the Millennium with the history of the Church on earth, and declared that, for those who belonged to the true Church, the first resurrection was passed already (de Civ. Dei, xx. 7-9). With the acceptance of this identification by the Roman Church, the power of Chiliasm was permanently broken.

Pre-millenarian views have, indeed, been revived from time to time, now in grosser, now in more spiritual form, and have never been without their advocates in the Church; but they have failed to win general acceptance. The Church as a whole, Protestant as well as Catholic, has either adopted Augustine's identification of the Millennium with the Church militant, or else looks for a future period of prosperity, preceding the second advent of Christ. The history of later Millenarianism lies beyond the scope of the present article.

LITERATURE.—The article 'Chiliasmus' by Semisch-Bratke, in Herzog, RE's; Harnack, 'Millennium,' in Enc. Brit.; Fisher, 'Millennium,' in M'Clintock and Strong; Kellogg, 'Pre-millenarianism,' in Schaff-Herzog, in which last the later literature is given; Corrodi, Krit. Gesch. d. Chiliasmus (1781); Münscher; Entwickelung der Lehre vom Tausendjähr. Reich, in d. drei erst. Jahrhund.,' in Henke's Magazin, iv. 233. Specially for the Jewish Chiliasm, Schürer, HJP' 11. ii. 178ff.; Drummond, The Jewish Messiah; Girörer, Das Jahrhundert des Heits; Weber, System der altsyn. Theol. [2nd ed., under title Jüdische Theologie auf Grund des Talm., etc. 1897]. Much information concerning Jewish eschatology may also be obtained from Charles' ed. of Enoch (Oxford, 1893). For the biblical doctrine, cf. the Comm. on Rev, esp. Moses Stuart, ii. p. 355 ff., Exc. vi. p. 474 ff., on the Millennium; Dusterdieck in Meyer's, 545 ff. Inew edition by Bousset, 1896]; D. Brown, Christis Scond. Advent, 1846-53; Schultz, JDTh (1887) pp. 121-127; Briggs, The Messiah of the Apostles, 341-858, where much information is given as to the history of interpretation; Salmond, Christian Doctrine of Immortality, 437 ff. For the early history of Milenarianism in the Christian Dourne, etc. Dorner, Person Christia, 240 ff.; Nitzsch, Dogmengesch, 1. 400 ff.; Harnack, Hist. of Dogma, 1. 167 note, ii. 294 ff.; Briggs in Luth. Quart. (1870), an answer to Seiss, The Last Times (Phil. 78), which latter gives a full statement of the literature from a pre-millenarian point of view; Terry, Bibl. Apocalyptic (N.Y., 1898).

MILLET (197 döhan, Keyyoos, milium). — The

MILLET (10 dōhan, κέγχρος, milium). — The testimony of the ancient VSS, and the identity of the cognate Arab. dukhn = Panicum miliaceum, L., leave no reasonable room for doubt as to the grain | חלילה the mound raised against a city by the besieging force.

mentioned once as an ingredient of the very complex bread made by Ezekiel (4°). It has a seed not much larger than mustard, much used for feeding the smaller kinds of birds. It is also sometimes used, mixed with wheat and barley, to make bread. Setaria Italica, Kth., is also cultivated in the East, under the name of dukhn. Its seed closely resembles that of Panicum miliaceum. In addition to the above, Sorghum vulgare, L., has been proposed as the equivalent of  $d\delta han$ . This is a tall Gramen, with broad leaves, and a compact paniele, often a foot long, and 6 to 8 in. broad. The seeds are white, and larger than hemp seeds. They are extensively raised in the East as a cheap bread-stuff for the poorer classes. The Arab. name of this, dhurah, usually given in Eng. books dourra, seems to be ancient, and is never confounded with dukhn. The Arabs call the sorghum dhurah beida = 'white dhurah,' and dh. saif's or dh. kaizi = 'summer dh.,' in distinction the staff of the kitches and the staff of the great central plains of Syria, and ripens in midsummer, having had no water since the cessa-G. E. Post. tion of the spring rains.

MILLO. — 1. (πρτί, always with the definite article, probably [but see below] 'the fill' [of earth]:  $2 \, S$  and  $1 \, K \, 11^{27} \, \eta \, d\kappa \rho a$ ;  $1 \, K \, 9^{16} \, [Aq. ?] \, \tau \eta \nu \, Me \lambda \dot{\alpha} \, \kappa a \lambda \, Me \lambda \, M$ την ἀκραν,  $\mathbf{v}$ ,  $\mathbf{v}$  την Μελώ;  $\mathbf{2}$  Ch τὸ ἀνάλημμα). According to the brief notice in  $\mathbf{2}$  S  $\mathbf{5}^9$  (=1 Ch  $\mathbf{1}\mathbf{1}^9$ ) 'and David built round about from (the) Millo and inward, the Millo formed part of the original defences of the old Jebusite city, situated on the easternmost of the two hills on which Jerusalem stands: most probably it was an outwork or rampart of earth, which protected the northern entrance of the Jebusite fort. After the capture of the city and its subsequent extension by David, it became necessary to fill up that part of the Tyropœon valley, which separated the new from the old city at this point, in order to connect the two. To this end David built a new and larger Willo, of which traces remain to the present day (Schick, ZDPV, 1894, p. 68). With this agrees the statement of Josephus (Ant. VII. iii. 1, 2), that David, having crossed the ravine and seized the citadel (την Ακραν), rebuilt the city and called it by his own name. He further states that David, 'having also surrounded the lower city (την κάτω πόλιν), and joined the citadel to it, made them one It would seem, however, that this important work was only planned or, at most, only begun by David; for we learn from 1 K 9<sup>15</sup>. <sup>24</sup> (and especially 11<sup>27</sup> 'Solomon built [the] Millo and shut in the ravine [RV 'repaired the breach'] of the city of David'), that the actual building was carried out by his successor. The Millo is mentioned again as forming an important part of the defences of Jerusalem in 701 B.C., when Hezekiah prepared to resist the attack of Sennacherib (2 Ch 325).

The above explanation is quite consistent with

the old derivation of the word given by the Targums (my " 'a filling up'), and adopted by Gesenius (Thes. 787 f.), Schick, and others. The Millo would, on this view, be connected with the Hebrew root איָס, but, as Grove (Smith, DB<sup>2</sup> ii. p. 367) and Moore (Jg 9<sup>8</sup>) have pointed out, its occurrence in connexion with the old Canaanite town Shechem (see below) makes it probable that it is an archaic, possibly Jebusite, form borrowed by the Israelites. See Jebus and Jerusalem. 2. The House of Millo (אוֹשְׁם הַיִּבּ Beth-millo;

<sup>\*</sup> Elsewhere in the Targums מליתא corresponds to the Hebrew

B οΐκος Bηθμααλών [Bηθμααλλών]; A οΐκος Μααλλών). (a) Most probably the name of a place (Beth-millo) in the neighbourhood of Shechem (Jg 9<sup>6, 20</sup>). Some identify it with the tower of Shechem (vv. 4<sup>6-40</sup>), but this view lacks support, as apparently the latter verses do not belong to the same narrative as the rest of the chapter. (See Moore, ad loc.). If we accept the rendering of the RV, we must take 'the house of Millo' as the name of a family or clan.

(b) (οίκος Μαλώ; domus Mello), the place where Joash was slain by his servants (2 K 1220), apparently in Jerusalem. See above, under 1, and art. SILLA.

J. F. STENNING.

#### MILLSTONE.—See MILL.

MINCE (derived by Skeat from Anglo-Sax. minsion to grow small, fail, but clearly connected with Old Fr. mincer to shred) is found in AV only in Is 316 Because the daughters of Zion are haughty, and walk with stretched forth necks and wanton eyes, walking and mincing as they go, where the meaning is 'taking short steps.' Cf. Shaks. Merch. of Venice, III. iv. 67—

'And turn two mincing steps Into a manly stride.'

J. HASTINGS.

MIND .- This aspect of the human soul, or of man's inner life, is not distinguished in the OT by any radical term, but only by derivatives such as  $\eta \gamma$ , which has the meaning of 'prudence' or 'good sense' rather than 'knowledge' or 'understanding.' The term  $\exists \gamma \rangle$  or  $\exists \gamma$ , and its equivalent  $\kappa \alpha \rho \delta i \alpha$  in the NT, include the intellectual as well as all other inward movements. (See HEART). The greater analytic precision of Greek thought and its closer attention to the intellectual element in our nature brought into the language of the NT such words as νοῦς with its congeners διάνοια, έννοια, νόημα; also σύνεσις, διαλογισμός, etc. But even there, they are not used with any psychological refinement or exactitude. It is quite impossible, for example, to follow Olshausen (Opuscula Theologica, p. 156) when he attempts to show that vous and σύνεσις, with their corresponding verbs, as used in the NT, represent the Kantian distinction between Vernunft and Verstand, familiarized to us in English by Coleridge as that between Reason and Understanding-the former, the higher intuitive perception; the latter, the lower or dialectic judgment. It is plain that the terms are really interchangeable (Mk 8", Mt 13<sup>14, 15</sup>, 2 Ti 2"). Some more abstract terms, such as 'thought,' 'minding,' 'thinking,' are used in the NT, almost indiscriminately, to represent the contents or products of the inward life, or what the OT calls 'the imagination of the thoughts of

the heart' (Gn 6°).

Of the two Greek words most frequently representing the notion, vous may be held to denote the faculty of reflective consciousness, the organ of moral thinking and knowing; our a peculiar force or acuteness in the exercise of that faculty. The leading word (roos) occurs very seldom in the Septuagint. In the few places where it does, it represents 22 or 22. In Is 40<sup>12</sup> voûv Kuplov stands for may 131, and the rendering is retained in 1 Co 2<sup>16</sup>. The OT Apocryphal writers have used it a few times and in a sense more distinctively Greek. the NT its almost entire absence from the Gospels and from the writings of the older apostles (it occurs there only in Lk 24th, Rev 13<sup>18</sup> 17<sup>9</sup>) shows how closely they adhered to OT phraseology from which the special notion represented by voos was absent. To note its frequent use by St. Paul and that almost delicate antithesis in which he contrasts it with σάρξ in one connexion and with wreθμα in another, completes its history.

St. Paul uses πνεθμα for the divine or spiritual power coming to the renewed man: for man's own highest sense of right or faculty of knowledge he uses vovs, as do the best classical writers. Accordingly, in sharp contrast with the 'flesh,' in which evil dwells, he calls the divine commandment 'the law of his mind' (Ro 7<sup>28</sup>), and declares that 'with the mind' (v.<sup>29</sup>) he serves it. This same faculty, when perverted or enthralled by inherent evil, becomes 'the fleshly mind' (Col 2<sup>18</sup>), 'a reprobate mind' (Ro 1<sup>28</sup>), 'corrupted mind' (Ti 6<sup>5</sup>, 2 Ti 3<sup>8</sup>).

The other antithesis is when the apostle takes vovs for deliberate, reflective consciousness-its proper sense—and contrasts it with  $\pi\nu\epsilon0\mu\alpha$  in the sense of afflatus or unconscious impulse coming from without or above (1 Co  $14^{14.15.19}$ ). See,

further, next art. and Psychology.

J. LAIDLAW. MIND .- The verb to 'mind' is both trans. and MIND.—The verb to 'mind' is both trans. and intrans. As a trans, verb it means to 'give attention to,' Ro 85 'They that are after the flesh do mind the things of the flesh' (φρονοῦσιν); 1218 'Mind not high things' (μὴ τὰ ὑψηλὰ φρονοῦντες, RV 'Set not your mind on high things'); Ph 316 'Let us mind the same thing' (τὸ αὐτὸ φρονεῦν); 319 'Who mind earthly things' (οἱ τὰ ἐπίγεια φρονοῦντες). Intransitively it means to purpose, intend, Ac 2013 'for so had he appointed, minding himself to go afoot' (μέλλων). Cf. Pr. Bk. 'Ye that mind to come to the holy Communion'; Golding's Calvin's Job. 562. 'Althoughe they protest that they minde Job, 562, 'Althoughe they protest that they minde to justifie him . . . yet neverthelesse they condemne him'; and Lk 1428 Rhem. 'For, which of you minding to build a toure, doth not first sit downe and recken the charges that are necessarie?'
The phrase 'to be minded' has the same meaning

as the intrans. verb 'to mind,' as Ru 1<sup>18</sup> 'When she saw that she was stedfastly minded to go with her'; 2 Ch 24' 'And it came to pass after this that Joash was minded to repair the house of the LORD'; Ac 2739 'They discovered a certain creek with a shore, into the which they were minded, if it were possible, to thrust in the ship' (TR εβουλεύσαντο, edd. εβουλεύοντο, RV 'they took counsel'); Ph 3<sup>15</sup> 'Let us therefore, as many as be perfect, be thus minded: and if in anything ye be otherwise minded, God shall reveal even this unto you' (φρονωμέν, καί εί τι ἐτέρως φρονεῖτε).

εἴ τι ἐτέρως φρονεῖτε).

There are many phrases of which the ptcp. 'minded' forms a part: 'carnally minded' (τὸ φρόνημα τῆς σαρκός, RV 'the mind of the flesh') Ro 8°, and in the same verse 'spiritually minded' (τὸ φρόνημα τοῦ πνεύματος, RV 'the mind of the spirit'); 'double minded' (δίψυχος) Ja 18 48; 'feeble minded' (διγόψυχος, RV 'fainthearted') 1 Th 514; 'highminded' (ὑψηλοφρονεῖν, edd. ὑψηλὸ φρονεῖν, 'be highminded') Ro 1120, 1 Ti 617 (τετνφωμένος, RV 'puffed up'), 2 Ti 34; 'light minded' (κοῦφος καρδία) Sir 194; 'likeminded' (τὸ αὐτὸ φρονεῖν, RV 'to be of the same mind') Ro 15°, Ph 2² (Ισόψυχος), Ph 2²0; 'sober minded' (σωφορνεῖν) Tit 2°. 'sober minded' (σωφρονείν) Tit 26.

J. HASTINGS. MINES, MINING .- We are here concerned with this subject only so far as it relates to Bible history and Bible lands. Mines are but once referred to in OT, and for the reason that in Palestine proper they are unknown. In the Sinaitic peninsula it is otherwise. The remarkable passage in the Bk of Job (281-11), in which the process of mining and the miner's life are graphically described, must have been written by one who had a personal knowledge of the subject. Egypt and Arabia Petræa probably furnished to the writer the details on which the poem is founded. We shall take the passage as given in RV, with some notes from the Speaker's Commentary-

1. 'Surely there is a mine (vein AV) for the silver, and a place

for gold which they refine.' Two processes were known to the ancients—one by washing, described by Diodorus (iv. 2), as practised in Egypt; the other by smelting. The word here denotes the former.

2. 'Iron is taken out of the earth, and brass (copper) is molten out of the stone.'

3. 'Man setteth an end to darkness, and searcheth out to the furthest bound the stones of thick darkness and of the shadow of death.' The miner lets in light to the very abode of darkness (in the mine or shaft) by means of the lantern.

4. 'He breaketh open a shaft away from where men sojourn; they are forgotten of the foot that passeth by: they hang afar; they swing (or fift) to and fro.' This passage is also rendered in the margin, 'the flood breaketh out from where men sojourn,' suggestive of the sudden outburst of pent-up waters in the mine when a fissure is broken open: and after the waters are escaped 'they are minished, and gone away from man.'...

7. 'That path no bird of prey knoweth, neither hath the falcon's eye seen it; the proud beasts have not trodden it, nor hath the flerce lion passed thereby.' The mine is a path which none but man can discern. The ingenuity of man is contrasted with the instinctive sagacity of animals.

9. 'He putteth forth his hand upon the flinty rock: he overturneth the mountains by the roots'; apparently referring to blasting. Pliny describes various processes (NII xxxiii. 21).

10. 'He cutteth out channels' (corrugi, Pliny) 'among the rocks; and his eye seeth every precious thing.' Channels to drain the mine, while he carefully scans the mineral vein for traces of ore.

11. 'Ile bindeth the streams that they trickle not, and the

traces of ore.

11. 'He bindeth the streams that they trickle not, and the thing that is hid bringeth he forth to light.' Descriptive of the alternative process to that in v.10 of damming up the waters in the river while the miner digs out the auriferous alluvial gravel—a process described by Pliny (NH xxxiii, 21).

The whole passage, though couched in poetic language, shows us that the processes of mining nearly 2500 years ago were not dissimilar to those practised in the time of Pliny, and even down to the present day, except in the use of machinery and of powerful explosives.

We shall now describe some localities where mining operations were carried on, and consider them under the head of the minerals pro-

duced.

Gold (בְּקָב).—This was one of the earliest metals discovered by man, as may be gathered from its occurrence in the sepulchres of the most ancient races, worked into ornaments. Mining for gold was carried on in many countries in ancient times by the Egyptians, Phenicians, and Babylonians. In Upper Egypt it was worked in the country of the Bisharcell Arabs, and between Coptos and Kossayr (Wilkinson, Anc. Egyptians, i. 232, iii. The gold occurs in quartz-veins amongst the Archæan rocks, from which it was extracted by breaking, grinding, and washing; criminals being employed and compelled to work under overseers taken from tribes speaking a different tongue. Gold was also worked by Ramses II. at Akita (Wady Ollagi) by means of shafts, but the mines had to be abandoned owing to want of water (Brugsch, Egypt under the Pharaohs, 287). The gold which was so abundant in Palestine in the reign of Solomon (1 K 10<sup>14st</sup>) came from various countries—Spain, India, Arabia, and probably South Africa. The Phoenicians, according to Herodotus (vi. 47), worked mines for gold in the island of Thasos, but Spain was the country which yielded to these navigators the most abundant wealth in metals. Gold, according to Pliny, was found in the bed of the Tagus, and there were mines of it in Galicia, Asturias, and elsewhere (NH xxxiii. 4). The produce of Asturias formed the major part. The process of mining gold from shafts and galleries, as well as by washing the alluvia from the bed of streams, is described in what must be considered highly exaggerated language by Pliny (NH xxxiii. ch. 21); but in the auri sacra fames (Verg. Aen. iii. 57) human life was little accounted of, and both in Egypt and elsewhere the hardships and cruelties endured by those employed in mining must have been great indeed. The gold of Ophir may have come from India; but it is not improbable that some of the ancient workings visited by the late Mr. Theodore Bent in S. Africa may date I

back to the time of Solomon (J. Th. Bent, 'Ruins of Mashonaland,' Rep. Brit. Assoc. 1892, p. 543). See, also, art. GOLD.

Silver (1921), which Pliny calls 'the next folly of mankind' (after gold), was mined by means of shafts 'sunk deep in the ground,' and smelted in combination with lead ore or galena (Pliny, NII xxxiii. 31). Most of our silver comes from argentiferous galena. The finest ores were worked in Spain. In Upper Egypt silver mines were worked in the mountains bordering the Red Sea (Wilkinson, Anc. Egypt. i. 235). See, further, art. SILVER.

Copper (ngm, brass [which see], which in Old Eng. means copper).—Copper mines were worked in very ancient times in Arabia Petræa. The earliest mining operations of which we have any record were those carried on by the Egyptian kings of the 4th, 5th, and 12th Dynasties in the Sinaitic mountains. In the Wady Magharah and at Sarabit el-Khadim copper ore was extracted from veins in the ancient rocks by means of shafts, under the auspices of the early Pharaohs (Brugsch, Ancient Egypt, i. 65; Birch, Ancient Egypt, 64). It must have been this part of the Promised Land that is referred to in Dt 87.9, for in Palestine proper copper is unknown. The ore also occurs in the Wadis Nasb and Khalig (in the latter somewhat extensively) in company with those of iron and manganese; while the smelting of the ores was carried on in the Wady Nash near to the springs, where extensive slag-heaps may still be seen (Bauerman, Quart. Journ. Geol. Soc. xxv. 27). Similar mines and slag-heaps occur in Wadis el-Marka and Sened, where a dyke rich in copper ore traverses syenite for a distance of nearly 2 miles (Holland, in *Ord. Survey of Sinai*, 224). The ore was extensively worked by the Phenicians in Cyprus, where, according to Pliny, it was first discovered, and from which the island derives its name.

Tin.—This metal, which, when used as an alloy of copper, produces bronze, was wrought in very being times in Egypt, as bronze implements have been discovered in Thebes. Tin  $(\gamma\gamma)$  is mentioned in Nu 31<sup>22</sup> P, and also in Is 1<sup>25</sup>; in the latter in a sense indicating its use as an alloy (cf. also Ezk 22<sup>18.20</sup> 27<sup>12</sup>, Zec 4<sup>10</sup>). The word used by Homer (*Il.* xviii. 474 and 613), kassing is the same as the Arabic kasdeer, probably derived from ancient Phomician. Certain it is that these mariners brought tin from the Cassiterides, which embraced the Scilly Isles and the coast of Cornwall (Wilkinson, Ancient Egyptians, vol. iii.). One of the most remarkable facts connected with the early races in Europe and Asia was the extensive use of weapons and implements of bronze; and Sir John Evans shows that the use of bronze preceded that of iron in Egypt (Ancient Bronze Implements, pp. 7, 8). See, further, under TIN.

Iron (בְּרָלְם).—Though iron ore is more extensively

diffused in the rocks than any other, it seems to have come into general use later than copper, bronze, and tin. Iron ores are unknown in Palestine, except at the southern base of the Lebanon (Porter in Smith's DB ii. 87) and near Beirût; perhaps it was from these deposits that the celeperhaps it was from these deposits that the celebrated Damascus steel was manufactured. The ore is scarce in Egypt, but one mine of rich hematite, discovered by Burton in 1822, was worked in ancient times in the eastern desert at Hammami (Wilkinson, Anc. Egyptians, iii. 246). Iron ores were mined, also, in the Wadis Nasb and Khalig, and in the mountain of Sarabit el-Khadim, associated with manganese and copper; also in Jebel Hadíd, all in the Sinaitic region (Holland, Ord. Surv. Sinai, p. 230). It is probable that these mining operations were carried on at the same time as those in search of turquoise stones during the early Pharaonic occupation—about B.C. 2500. Cf. also art. IRON.

Turquoise Mines.—Of all the ancient mines of which we have any knowledge in the countries we are dealing with, the most remarkable are those of Jebel Sarabit el-Khadim, and Wadis Sidreh and Magharah in the Sinaitic peninsula, from which turquoises were extracted by the early Egyptians. Amongst the lofty and precipitous cliffs of the Nubian sandstone, extensive galleries were opened out by colonies of slaves presided over by taskmasters, in the time of Sneferu of the 4th Dynasty of Manetho, and of Amenemhat II. of the 12th Dynasty, and his successor. The numerous inscriptions and cartouches on the walls of the mines, the steles and ruined buildings scattered over a considerable area of this mountainous region, indicate extensive mining operations at this early period, c. B.C. 2500. From recent examinations of these galleries, it appears that the turquoise stone ('mafka') occurs in thin threads and pockets in an ochreous matrix. But, notwithstanding the extent of these ancient works, the turquoise is a gem almost unknown amongst the l'haraonic ornaments in the tombs of Egypt, from which it is inferred that the stones have decomposed and crumbled away to powder. These old mines were reopened a few years ago by Major Macdonald, who employed Arab labour. The ruins of a church indicate inhabitants in early Christian times.\*

MINIAMIN (γυρφ).—1. A Levite, 2 Ch  $31^{16}$  (Βενιαμείν).—2. Neh  $12^{17}$  (Β  $\aleph^{\bullet}$  A om.;  $\aleph^{\circ \bullet}$  Βενιαμείν)= Mijamin of 1 Ch  $24^{\circ}$ , Neh  $10^7$   $12^{\circ}$ . 3. A priest who took part in the ceremony of the dedication of the walls, Neh  $12^{41}$  (Β  $\aleph^{\bullet}$  A om.;  $\aleph^{\circ \bullet}$  Βενιαμείν).

MINISH (from Low Lat. minutiare and Lat. minutia smallness, through Fr. ménuiser to make small, extenuate) has been displaced in mod. English by its derivative 'diminish.' It occurs twice in AV: Ex 519 'Ye shall not minish ought from your bricks of your daily task' (איזיידאלי), and Ps 10739 'They are minished and brought low through oppression, affliction, and sorrow' (צפברי). Further examples from the older versions are: Wyclif, 1K 1714 'The stene of mele shal noght fayle, ne the vessel of oyle shal not be mynushid, unto the day in the which the Lord is to gyue reyn upon the face of the erthe' (1388 'schal not be abatid'); Tindale, Ex 58 'the nombre of bricke which they were wont to make in tyme passed, laye unto their charges also, and minysh nothinge therof'; Cov., Ezk 516 'I will encrease hunger, and mynish all the provysion off bred amonge you'; Great Bible, Ps 121 'For the faythfull are mynisshed from amonge the children of men'; Rhem., He 27 'Thou didst minish him little lesse then Angels.' As the same Heb. verbs are frequently translated 'diminish,' it does not seem that the Revisers were justified in retaining this obsolete form in the two passages quoted. The Amer. Revisers prefer 'diminish' in both passages. But RV further introduces 'minish' into Is 194 Hos 819.

MINISTER.—In modern English this word is applied either ecclesiastically to the servant of God, or else politically to the servant of the crown or state. The eccles use has come from the practice in the early Church of translating  $\delta\iota d\kappa$  kovos by Lat. minister, and then making the title

\* For a description of these mines, see Ordnance Survey of Sinai by Wilson and Palmer (1869), with notes by S. Birch and F. W. Holland; Lepsius, Briefe aus Ægypten, p. 336 (1852); Bauerman, Quart. Journ. Geol. Soc. xxv. 31, 32; Maspero, Dawn of Civiliz. 354 fl., 473 fl. Bauerman believes that flint implements were used in cutting the rock.

apply to all under the order of the presbyter. See Smith and Cheetham's Dict. of Ant. s.v. But in AV, though the translation of διάκονοι as well as of other words, 'minister' has always the primitive sense of 'servant,' 'attendant,' or 'officer,' as in classical Lat. minister had.

Thus Joshua is called Moses' minister (Ex 2418, Jos 14), being first of all his personal attendant; and John Mark is called (Ac 135) the minister of Barnabas and Paul. The ministers of Solomon, at whose 'attendance' the queen of Sheba marvelled (1 K 105, 2 Ch 94), were not officers of state, but household servants; and the minister to whom Jesus handed the book (Lk 420) was the hazzan or attendant in the synagogue. St. Paul speaks of Christ as 'a minister of the circumcision' (Ro 153), in conformity with the Lord's own words that He was sent to be a servant to the lost sheep of the house of Israel; he also asks if Christ can be the minister of sin (Gal 217), by which he means its agent; and when he speaks of being himself a minister of Christ (Ro 1516, 2 Co 1128, Eph 37) or of the gospel (1 Col 123-20), he does not use the word in any other sense than the absolute sense of servant. The word 'servant' in AV means commonly modern 'slave,' and so 'minister' is modern 'servant.' The minister in biblical language is always a 'waiter on,' as Sir John Cheke translates the word in Mt 2026 'Whosoever will be great among you, let him be your minister.'

Elyot (Governour, i. 13) says that 'in the message to kynge Pharo, Aaron rather as a ministre than a companyon wente with Moses.' Tindale's tr. of Mt 520 is 'Agre with thyne adversary quicklye...lest...the judge delivre the to the minister.' Wyclif, who has 'minister' very often for 'officer,' as Jn 25. 9 782 1818, has 'domesman' here; the Geneva Bible has 'sargeant'; the 'officer' of AV is from the Rhemish. Cf. Udall, Erasmus' Paraphrase, i. fol. c., 'Finally entring in he satte emong the ministers warming him at the coles.' See next article.

J. HASTINGS.

MINISTER, MINISTRY.—1. IN OLD TESTAMENT.—These words are still employed by RV as
the tr<sup>n</sup> almost exclusively of shērēth and its correlates, which again are translated in the LXX almost
exclusively by λειτουργεῖν and its correlates. The
exceptions in the LXX are so rare as to be almost
negligible; and yet the exclusiveness and some of
the exceptions, when examined, are striking and
suggestive. Shērēth is the word chosen to express
ministration towards a higher being for the common weal; hence it expresses the ministration of
the priests and Levites as a high function, for the
common weal, in relation to God (e.g. Ex 29<sup>20</sup>;
and, ironically, the ministration to gods of wood
and stone, Ezk 20<sup>32</sup>): it stands also for the ministration Godward of the elemental angels as the
forces of nature (Ps 103<sup>21</sup> 104<sup>4</sup>); and likewise of
one human being to another of higher rank, again
most frequently for some public good, as of Joshua
to Moses (Jos 1<sup>1</sup>).

The respective the resident of the labeled of

To represent ministration looked at in this light—a high function for the common weal—the LXX most fitly chose λειτουργεῖν (-ία, -ημα, -ός, -ικός, -ήσιμος), derived, as it was, from ἔργον and the Attic

\*For the practice in the Scotch Reformed Church, ct. Calderwood, The True History of the Church of Scotland, 105—'Pastors, Bishops, or Ministers are they who are appointed to particular congregations, which they rule by the word of God, and over the which they watch. In respect whereof, sometime they are called Pastors, because they feed their Congregation; sometime Epicopi, or Bishops, because they watch over their Flock; sometimes Ministers, by reason of their service and office; and sometimes also Prosbyters or Seniors, for the gravity in manners, which they ought to have, in taking care of the spiritual government, which ought to be most deare unto them.'

λεῖτος (Ionic λήῦτος, Doric λάῦτος, 'pertaining to the λαός,' the people), and carrying with it, as it did, the remembrance of public duty discharged for the state by richer citizens at their own expense. That the idea of priestly ministration, though strange to the word in classical literature, was not strange to it in Alexandrian Greek, is proved by Egyptian papyri of the 2nd cent. B.C. (see Deissmann, Beitrage aus den Papyri, p. 137 f.); and it Diodorus Siculus, Dionysius of Halicarnassus, and Plutarch (see Deissmann, ibid., and Cremer, Lexicon, Eng. tr. p. 764). Λατρεύειν (only twice for shērēth, Nu 16°, Ezk 20°, and each time of the priestly function) is mostly in LXX the representative of 'abhad, and differs from λειτουργείν in being not so much priestly service as the religious service of the entire congregation (Ex 3<sup>12</sup>) or of the individual worshipper (2 S 15<sup>8</sup>; cf. Ph 3<sup>8</sup>, Ro 1<sup>9</sup>). (It is true, on the other hand, that, almost in every case where the subst. Actroupyla appears, the original is 'abhādāh'; but this may be because no abstract subst. had been formed from shērēth). When  $\theta \epsilon \rho \dot{\alpha} \pi \omega \nu$  stands for shërëth (ptcp.), as it once does, Ex 3311 'his minister (RV) Joshua,' the idea present is non-servile attendance, like that of a squire in the Middle Ages. (Cf. Hom. Il. xvi. 244, the relation of Patroclus to Achilles; and Nu 127 He 35, the relation of Moses to God). Twice only does λειτουργεῖν represent the rare Aramaic pelah, Ezr 7<sup>24</sup> (-os), 7<sup>19</sup> (-(a), and in both cases in regard to the service of the sanctuary. Here the idea in the Aram. appears to be that of labour, as though it were the labour of ploughing. Διακονεῖν (-ία, -ος) as the rendering of shērēth is entirely confined to Esther, and occurs but two or three times even The idea in this word will be dealt with below. Not one of the instances in Esther touches the priestly function.

These remarks on the variations in the Heb. and LXX will suffice to show how shērēth and λειτουργείν have practically the monopoly of expression when the subject is priestly ministration, whether narrowly or widely interpreted.

whether narrowly or widely interpreted.

2. In NT.—While λειτουργεῦν is the word for ministration in the LXX, the word in NT is διακονεῦν. The exception in the OT is the rule in the NT. The NT And this is a suggestive fact. ministry is not one of the priest as distinct from the people: the exclusive class becomes a universal priesthood. Λειτουργεῖν and its correlates occur (in St. Paul, St. Luke, and He, and nowhere else) only about fifteen times in all, and not in any single case can they be made to apply to a literal priestly function on the part of the Christian ministry. Sometimes there is a literal reference to the Jewish ritual (Lk 123, He 921 1011). Once Christ is spoken of in the same region in the light of fulfilment as 'minister, λειτουργός, of the sanctuary (in the heavens) and of the true tabernacle.' (in the heavens) and of the true tabernacle.' Once the word is used of prophets and teachers at Antioch, Ac 13<sup>2</sup>, with reference, perhaps, to the offering of prayer in the face of the congregation. Twice there is, in connexion with St. Paul, the thought of sacrifice; but in Ph 21<sup>2</sup> 'the Philippians are the priests, their faith is the sacrifice, St. Paul's life-blood is the accompanying libation' (Lightfoot, in loco); and in Ro 15<sup>10</sup>, though St. Paul is the sacrificing priest, he is so only figure. Paul is the sacrificing priest, he is so only figuratively: his priestly function is preaching the gospel, and the sacrifice is the believing Gentiles. Its uses elsewhere concern the ministration to the wants of the poor saints, 2 Co 9<sup>12</sup>, or of St. Paul himself, Ph 2<sup>25, 30</sup>—the sacrifice of charity; or the service rendered to God by state officials, Ro 13°, or by the angels of wind and fire, He 17.14. The fact seems clear that the NT writers prefer διακονείν (-la, -os) because it connotes two things:

the first, which λειτουργείν also connotes, ministration Godward in the service of others; the second, which λειτουργείν does not connote, lowliness in that ministration. In both these senses it is in the line of succession from classical usage. To the Greek the practically dominant connotation was a service relatively low and even menial. That διάκονος and δούλος breathed in classical Greek the same air is obvious from Plato's junction of διακονικάς with δουλοπρεπείς and άνελευθέρους (Gorg. 518 A), and from his identification of διακονεῖν and the work of δοῦλοι in tending cattle and tilling the soil (Laws, vii. 805 E). In NT the use is in no wise different. St. Paul employs both δοῦλοι and διάκονοι to define his relation to his Master (Ph 1¹, 2 Co 11²³) and to his converts  $\delta i'$  'In $\sigma \circ \partial \nu$  (2 Co 4⁵, 1 Co 3⁵); and he tells how Christ Himself both took the form of a δούλος (Ph 27) and became a διάκονος of the circumcision (Ro 15<sup>8</sup>), as though his Lord's own description of His position had impressed him with the parallel (Mt 2026-28). And though, in the parable of the Wedding Garment, it is δοῦλοι that invite and διάκονοι that cast out, Mt 228. 8. 10. 18, the latter word appears to be preferred in v.18 because attendants at table are there spoken of, such attendants being either bond or free, Lk 12<sup>37t</sup>, Mt 8<sup>18</sup>. This menial service of waiting at table (διακονεῖν) is cited by Christ, Lk 17<sup>8</sup> 22<sup>27</sup>, as the characteristic sign of the contrast between the relative positions of master and servant, and furnishes Him with a parabolic picture both of His own position among His disciples, Lk 22", and of the striking way in which the Great Master shall reward his servants' continued watchfulness, Lk 12<sup>m</sup>. Even in secular Greek there was an inkling of the dignity of this menial humbleness in relation to the gods. Aristeides (Orat. 46, p. 198 f., quoted by Hort, Christian Ecclesia, p. 203 f.) 'refuses to call [Athenian] statesmen who had saved their country] διάκονοι of the state, but will gladly call them διάκονοι of the Saviour Gods who had used their instrumentality' and Epictetus (Hort, p. 204) in several remarkable passages (Diss. iii. 22. 69; 24. 65; iv. 7. 20; cf. iii. 26. 28) makes it the dignity of a man to be a διάκονος of God. The Gospel gave the word a still higher consecration of the same kind... For [a Lord who had taken on Himself the form of a servant] every grade and pattern of service was lifted into a higher sphere. . . . Ministration (διακονία) thus became one of the primary aims of all Christian actions' (e.g. Eph 4<sup>12</sup>, where 'the work of διακονία' is parallel with 'the edification of the hodge of Christ') whether the control of the hodge of Christ's whether the control of the hodge of the hodg of the body of Christ'), whether for apostles, 2 Co 4<sup>1</sup>, or for evangelists, 2 Ti 4<sup>5</sup>, or for the presbyter or episcopus, Col 4<sup>17</sup>, or for the 'deacon' himself: whether the emphasis was (Ph 11) on government (ἐπισκοπή) or on service (διακονία), διακονία was 'the badge of all the tribe'; whether the service was to God, 2 Co 64, or to Christ, Col 17, 1 Ti 46, or to the gospel, Eph 37, or to the Church, Ro 127, or to the material wants of the poor saints, Ac 61-3, 2 Co 9, He 610, or to St. Paul himself, officially Ac 19<sup>22</sup>, Col 17, 2 Ti 4<sup>11</sup>, or materially Philem <sup>18</sup>, 2 Ti 1<sup>18</sup> (cf. Lk 8<sup>3</sup>, women διηκόνουν to Christ and His disciples of their substance). In all cases there was diakovia to the Master for the benefit of others, Col 17. And so also in the technical sense of the word, the definite office, διάκονος (see DEACON). This office did not exclude teaching: such exclusion, in the presence of capacity, 'would have been contrary to the spirit of the Apostolic age' (Hort, p. 202). Stephen, one of the Seven, was a powerful preacher (Ac 6. 7); and whether the Seven (cf. Ac 6² διακονεῖν τραπέζαις) were technically deacons or not, they must surely have suggested the office in the several churches later on: 'analogous wants might well lead to analogous

institutions' (Hort, p. 209). That teaching, however, was 'no part of the official duty' of a deacon, is suggested by a comparison of the qualifications required for a deacon at Ephesus and those required for a presbyter or episcopus (1 Ti 3<sup>2nr. 8nr.</sup>); while the injunction against talebearing in the men-deacons and backbiting in the women suggest a frequent contact with individual Christians and Christian families, a going in and out among them, a visitation from house to house. Thus they appear to have been 'the main instruments for giving practical effect to the mutual sympathy of the members of the body'; and the efficiency of the office was sensibly increased by being divided between the sexes (1 Ti 3<sup>11</sup> compared with

Ro 161) Besides λειτουργός and διάκονος there is in NT a third word still (RV) occasionally translated 'minister,' viz.  $\nu\pi\rho\rho\ell\tau\eta$ s (- $\epsilon\nu$ ), lit. an 'underrower' in a galley, but used simply as 'servant,' and retaining no special connotation from its derivation, unless it be that of subordination. The verb is used of David's service of God, Ac 1386, and Moses is called by Josephus God's ὑπηρέτης (Ant. III. i. 4). The subst. is found only twice in the canonical LXX, and -εν and -εσία once each, and all in the various senses of ordinary service. But in Wis the words occur eight times, and once (64) in a lofty sense,—kings the υπηρέται of God's kingdom. In this word the subordination comes out more distinctly than in the other two (cf. Xenoph. Cyr. vi. 2. 13=the orderly of a commander), but διάκονος and ὑπηρέτης are continually mander), but διάκουσε and ὑπηρέτης are continually running into one another (1 Co 4¹, 2 Co 11²²). Of the five places where AV translated the subst. by 'minister,' three remain in RV: Lk 1² ('m. of the word': cf. Ac 6⁴ 'διακουία of the word'), Ac 26¹6 ('m. and eye-witness' for Christ), 1 Co 4¹ ('m. of Christ': cf. 2 Co 11²² 'διάκουα of Christ'). RV appropriately gives 'attendant' or 'servant' elsewhere: so John Mark (Ac 13²) is now the 'attendant' on Paul and Barnabas; possibly, as Rlass suggests for the secondary work of har Blass suggests, for the secondary work of bap-tizing; and, as Ramsay suggests (St. Paul the Traveller, p. 71), 'the curiously incidental way' in which he is brought before the reader's notice (and, we may add, the word of subordination, chosen to describe his position) may serve to emphasize the secondary character of John Mark, in view of what was to happen in Pamphylia: he was not essential to the expedition: he had not been formally delegated by the Church of Antioch: he was an extra hand, taken by Paul and Barnabas on their own responsibility.' So also the 'minister' in Lk 420 is now the 'attendant': he was the hazzān of the temple,—'a kind of verger,' see DEACON in vol. i. p. 575,—'whose office it was (Schürer, HJP II. ii. 66 f.) to bring out the Holy Scrintures at nublic worship and to put them by in view of what was to happen in Pamphylia: Scriptures at public worship and to put them by again.' He was no Jewish anticipation of deacon, but was in every respect the servant of the con-gregation, having, e.g., to execute upon those con-demned to it the punishment of scourging (Makkoth iii. 12), and also to instruct the children in reading (Shabbath i. 3; but see EDUCATION in vol. i. p. 650\*). A similar use of the word occurs in Mt 5<sup>20</sup> 'deliver thee to the officer,' i.e. one of the attendants or officials of the Sanhedrin, like lictors or sergeantsat-arms (Schürer, HJP II. 1. 187), the temple police, a special feature in the Fourth Gospel (Jn 18<sup>18</sup> e.g.), from whom Jesus doubtless takes His parallel when in Jn 1836 He says, 'my ὑπηρέται would now be striving.' For Mt's ὑπηρέτης (5<sup>26</sup>) Lk (12<sup>38</sup>) gives πράκτωρ, the avenger of the tragedians (Æsch. Eum. 319), the taxgatherer of Demosthenes (778. 18), the public accountant of the papyri (3rd cent. B.C., see Deissmann, Beiträge, p. 152), who has now become an under-officer of justice.

J. MASSIE. J. Massie.

MINNI (15, LXX παρ' έμου, Αq. Symm. Mevel).— Name of a country mentioned in Jer 51<sup>27</sup> between Ararat and Ash-kenaz, and summoned to make war on Babylon. It is evidently equivalent to Mann, which figures frequently in Assyrian inscriptions in close connexion with Urartu (Ararat); and which the authors of the maps appended to KIB i. and ii. place somewhere between Lake Van and the Araxes, while Sayce (JRAS, 1882, p. 389) infers from the line of march of the Assyrian kings that this people must have lived on the S.W. shores of this people must have lived on the S.W. shores of Lake Urmia. The Assyrian texts supply us with several names, both local and personal, connected with Mann. Their chief city was called Zirtu or Izirtu, and their chief fortress ishtat (Assurbanipal, ed. S. A. Smith, i. 21); other cities were Izibia, Armed, Shuandakhul, and Zurzukka (Sargon, ed. Winckler, pp. 105, 107); tribes included in Mann were Umildish, Zikirtu, and Misianda (ib.). Shalmaneser II. in the year 830 A.D. attacked king Udaki of Mann (KIB i. 147), and his successor Shamsi-Ramman received tribute from this country (ib. 179). In Sargon's history the kings of Mann play an important part. He relates how, after the death of their king Iranzu, he put on the throne Iranzu's son Aza. Aza was shortly afterwards murdered by insurgents, who at the instiga-tion of king Ursa of Urartu put Aza's brother Ullusunu on the throne. Sargon marched against the insurgents and defeated them, but on Ullusunu's submission received him into favour. Presently, however, Ullusunu again revolted, but the inscription is defective at the point where it originally recorded his fate (Winckler, l.c. and 89). Assurbanipal in his fourth campaign attacked Akhsheri king of Mann, seized his capital Izirtu, and laid waste 15 days' extent of country. After Akhsheri had been betrayed by his subjects, the Assyrian king set Akhsheri's son Ualli on the throne, but increased the tribute of Mann by 15 horses, and took Ualli's son Erishinni and his daughter to Nineveh (S. A. Smith, l.c. 23).—In the Vanic inscription of the kings Minuas and Argistis, whose dates can be approximately fixed for the last decade of the 9th and the first decade of the 8th cent. B.C., there are repeatedly allusions to the country Ma-na-a, and even to a king named Haza, probably a namesake of, though not identical with, Sargon's contemporary (Sayce, l.c. 607). These inscriptions imply with certainty that the country of Mann was raided by the kings of Van (= Urartu), but the language in which they are composed is perhaps still too obscure to give us much more information. Both sets of documents lead us to suppose that Mann was a province of considerable extent, and thickly populated; that it was alternately under Assyrian and Vanic domination, and suffered severely from the rivalry of these powers. The words that have been quoted have no obvious linguistic affinities, and it does not appear that any of the local names have been maintained. D. S. MARGOLIOUTH.

MINNITH (n'10).—1. Jephthah smote the Ammonites 'from Aroer until thou come to Minnith,' Jg 11<sup>23</sup> (Β άχρις 'Αρνών, Α είς Σεμωείθ, Luc. Σεμωείθ). According to the Onomasticon (s.v. 'Mennith') it was shown 4 Roman miles from Heshbon on the road to Philadelphia, but the name has not been recovered in this direction, which, as Moore points out, does not suit the requirement of the text that Minnith should be in Ammonite territory beyond Aroer, not in the immediate vicinity of Heshbon. A site called Minyeh is found south of Nebo, but this may be derived from another root, and in any case is much too far south. Tristram (Land of Moab, p. 140) could find no trace of Buckingham's Menjah,

which was alleged to exist 7 miles east of Heshbon. 2. In Ezk 27<sup>17</sup> 'wheat of Minnith' is specified amongst the merchandise of Tyre which she traded in with Israel and Judah. Davidson (Comm. ad loc.) thinks there is something unnatural in the latter bringing an Ammonitish product to Tyre (but see Bertholet, ad loc., who appositely refers to (but see Derinoist, an too., who appositely letters to 2 Ch 275). Cornill emends much up to πλομ υπη wheat, tragacanth' (cf. Gn 3722 4311). This corresponds with the LXX σίτου . . καὶ μύρων.

C. R. CONDER.

MINT (ἡδύοσμον, mentha). — Mint is not mentioned in the OT, and only once in NT (Mt 2323 || Lk 1142) along with dill, rue, and cummin, as a tithable product. The ancient Greeks employed in medicine a plant called  $\mu l \nu \theta o s$  or  $\mu l \nu \theta \eta$ , which likewise bore the name  $\dot{\eta} \delta \dot{\nu} o \sigma \mu o \nu =$  'the sweet-smelling,' on account of its pleasant odour. It is believed by some to have been the peppermint, Mentha piperita, L. It is more probable that it was generic, and included M. sativa, L., the garden mint; M. viridis, L., the spear mint; M. sylvestris, L., the horse mint; and M. aquatica, L., the water mint; and perhaps M. Pulcqium, L., the pennyroyal. A patch of garden mint is cultivated near almost every house in Bible lands, and the fragrant leaves enter into many of their salads and cooked dishes. It is known in Arab, as mina. It is the only species now cultivated and eaten. M. sylvestris grows wild everywhere by ditches and banks. aquatica grows in water. It is less common than the other. M. Pulegium is not uncommon in wet places. For illustrations from Rabbinical sources places. For illustrations from Rabbinical sources of the tithing of mint, see Wünsche, Neue Beiträge, 291, 443. G. E. Post.

MIPHKAD, THE GATE (שער הַמְּבָּקָר; RV Hammiphkad; πύλη τοῦ Μαφεκάδ; porta judicialis).—A gate near the east wall of Jerusalem during the rebuilding of the city walls on the return from the Captivity (Neh 3<sup>31</sup>). Its position was somewhere between the northern portion of the Ophel wall and the Sheep Gate, i.e. somewhere east of the temple buildings and adjoining palaces. It can be deduced as follows :-

On the dedication of the city walls on their completion (Neh 12<sup>31f.</sup>), two great companies issued from the temple to the centre of the western wall of the city, and, separating near the Valley Gate, proceeded along the walls to the temple-one by the northern defences, and the other by the southern defences. The principal gates and towers they passed during their progress are enumerated. By the north they traversed the whole way along the wall, and, passing the towers of Hananel and Meah, and the sheep-gate, stood still in the prison-gate, i.e. to the north of the temple. The other company traversed the southern wall, and, passing the dung-gate and the fountain-gate (near Siloam), came down from the wall, and went up by the stairs of the city of David, even unto the water-gate eastward, i.e. to the south of the temple.

In the account of the rebuilding of the walls (Neh 3) the same gates and towers are enumerated, and, in addition, all that portion of the wall to the east of Jerusalem, from the fountain gate, the pool of Siloam, the armoury, to the court of the prison; and another portion along the Ophel wall to the place over against the water-gate (of the temple) towards the east, and thence by the horsegate and the east to the place over against the gate Miphkad, to the going up of the corner, unto the sheep-gate. This apparently indicates that the gate Miphkad, if not actually in the eastern city wall, was very near it, to the north-east of the temple.

The following passage seems to indicate that it was the place where the sin-offering was burnt !

outside the sanctuary, but inside the city walls: Ezk 4321 Thou shalt take the bullock also of the sinoffering, and he shall burn it in the appointed place (miphkad) of the house, without the sanctuary.

Miphkad has three meanings (Ges. Lex.): (1) A number, or numbers; (2) a commandment or mandate; (3) an appointed place. It is used in connexion with the chambers of the house of the Lord, and the oblations and tithes: e.g. by the commandment (miphkad) of Hezekiah the king and Azariah the ruler of God's house, certain men are appointed overseers (2 Ch 3113). It is used in connexion with David's numbering of the people of Israel (2 S 249, 1 Ch 215).

Lightfoot (ii. 27) points out that the Vulgate renders the gate Miphkad as the gate of judgment: this may perhaps refer to the hall of judgment in the Prætorium, situated in later days in the Antonia, to the north of the temple, or it may refer to the east gate of the temple (Ezk 35-39, Jl 2, Mic 4<sup>3</sup>) overlooking the Valley of Jehoshaphat: both Moslems and Jews believe that the fast judgment is to take place there. Brocardus speaks of a Porta Judiciaria over against the Church of the Holy Sepulchre.

The general opinion is that Miphkad was situated to the north-east of the temple (PEFSt, 1879, 176; 1883, 215; 1885, 61; 1889, 90; 1890, 47).

## MIRACLE.-

i. The objective possibility of miracles.
ii. Their subjective credibility.
iii. Their evidential value.
iv. The miracles of the Gospels, their characteristics and their attestation.

v. Other Bible miracles:

(a) In the Acts of the Apostles.

(b) In the Old Testament.

vi. Christian miracles after the apostolic age.

i. THE OBJECTIVE POSSIBILITY OF MIRACLES.-1. It is a remarkable circumstance that the great stumbling-block at the present day to many persons who are anxious to accept the Christian creeds should be the statement of the very fact which was put forward in the apostolic age as the one convincing proof of their truth, viz. the fact of the Resurrection of Christ. The Christian miracles were once an 'aid to faith'; they are now regarded by many as a grave hindrance to the acceptance of Christianity. It is not hard to account for this. Christianity. With the development of physical science, and with the largely increased knowledge of what we are accustomed to call the laws of nature, and still more with the growth of the conviction which is at the root of all science that nothing happens abnormally, but that in the physical world every effect has its cause, and that the same causes under the same circumstances will always produce the same effects, men have come to think that there is something about a 'miracle' which no scientifically educated person can believe. So it has come to pass that the argument based on the miracles with which Christianity was ushered into the world, has been more vehemently attacked than any other of the 'ovidences' which are usually marshalled: so strenuous, indeed, has been the attack, that not a few theologians, in deference to the spirit of the age, while not conceding in so many words the impossibility of miracles, have relegated the miraculous to some obscure corner of the religious system which they profess and teach. And the impossibility of miracles is avowedly the foundation of much of the negative criticism to which the Christian documents have been subjected. The spirit in which Goethe said to Lavater, 'A voice from heaven would not convince me that water burned or a dead man rose again, often finds expression in literature. Renan prefaces his Vie de Jésus by saying of the Gospels, 'C'est parce

qu'ils racontent des miracles que je dis, Les Evangiles sont des légendes; ils penvent contenir de l'histoire, mais certainement tout n'y est pas historique.' And Strauss is careful to distinguish the 'supernatural' element in the Gospels from 'the natural element which alone is historically available,' criticism of the documents being thus prejudiced at the outset by the assumption that no account which involves the miraculous can possibly

be historical.

2. What then is a 'miracle,' and wherein consists the difficulty of believing that it has taken place? It is evident that precise definition is necessary, if we are to arrive at any conclusion of value in respect of a question like this. start with the definition given by J. S. Mill: 'To constitute a miracle, a phenomenon must take place without having been preceded by any antecedent phenomenal conditions sufficient again to reproduce it. . . . The test of a miracle is, Were there present in the case such external conditions, such second causes we may call them, that whenever these conditions or causes reappear the event will be reproduced? If there were, it is not a miracle; if there were not, it is.'\* Now from this definition it is apparent that to one who holds that there is nothing to be known save the sequences and coexistences of phenomena, that 'nature' is only a name for the sum-total of the mechanical and chemical forces of the universe (see NATURE), that there is, in short, no other mode of existence than that which can be perceived by the bodily senses, the occurrence of a miracle would be a violation of the law of causation, which demands a cause for each observed effect. No causes other a cause for each observed effect. No causes other than material can come within the cognizance of man, and therefore, since a 'miracle' has no material cause, it cannot be considered as within the field of possibility. To consistent and thoroughgoing materialism miracles are impossible. If, by any chance, some anomalous and extraordinary phenomenon were attested on unimpeachable testimony, which satisfied the definition that has been quoted from Mill of a 'miracle,' the conclusion that the materialist would be forced to adopt would be that the phenomenon in question was due to some hitherto unobserved combination of physical forces. It could not be a miracle, for a miracle, ex hypothesi, is a perturbation of the normal sequence of physical causation, and the materialist does not admit the existence or the possibility of any force adequate to produce such perturbation.

3. Materialism, however, is not the last word of philosophy. It is inconsistent with any form of religion, and need not be elaborately discussed here. All Theists recognize that the operation of spiritual forces is just as real, just as familiar, an experience as the operation of material forces. An obvious illustration of the intervention of spiritual force in the phenomenal world is afforded by the consequences which ensue in the visible order every time we exert our free will. Mind is not a mere function of the bodily organism, and thought is something distinct from those movements of the grey matter of the brain which seem to accompany it perpetually in our present experience. But mind, voos, reason, is a vera causa—a cause which produces effects in the physical order, effects which are often far-reaching and important. The action of man's free will, of which the outward effect is the motion of his limbs, is not a violation of the law of causation: that law is true only of physical causes, and the physical sequence is perfectly observed, so far as we know. But the originating impulse comes from a region other than physical, even from the domain of spirit, where man lives

\* Essays, p. 224.

his highest life and from which he catches his highest inspirations. We shall see presently that there is no complete analogy between such intervention of human will in the physical order, and that intervention of the Divine volition which we shall find to be the characteristic of a 'miracle'; but, although the analogy is incomplete, it is important to recognize that we have experience of an intrusion into the physical by the moral order every time that we exert our wills to move our bodies. There are forces other than physical to be reckoned with.

4. Thus among the agents which can produce effects in the physical order spiritual agents must be counted; and of these the highest is God. Our conception of the universe is partial and inadequate unless we realize that a great Spiritual Being is the ultimate source of all the manifold activities which it daily and hourly presents to our view. (See NATURE). And if, with this in our minds, we approach an anomalous phenomenon which seems to us to interrupt the continuity of physical sequence, we shall have to enumerate among possible explanations this other, that it is due to the direct volition of the Deity. If we are satisfied that this is its explanation, we call it a miracle, and Mill's definition of a miracle may be replaced by words of a thinker of a very different school. 'Miraculum,' said St. Thomas Aquinas, 'est præter ordinem totius nature creatæ; Deus igitur cum solus sit non creatura, solus etiam virtute propria miracula facere potest.'\* It would not be easy to express oneself more succinctly than this. And it is important to observe that the very idea of a miracle, in this view, presupposes the existence of a supreme spiritual agent. To attempt to prove the existence of 'miracle' is idle, because we have not any conception of the possibility of miracle apart from His existence and providence.

5. The possibility of miracle involves the existence of God; it does not at once follow that the converse is true, and that the existence of God implies the possibility of miracle. And we have now to consider whether, granting the existence of a Supreme Being who stands to nature in the relation of Author and Governor, its Creator and its Life, at once immanent in it and transcending it, there are any grounds in reason for denying the possibility of His miraculous intervention in the universe which He has made. The argument by which Spinoza attempted to subvert this possibility has become famous, and, inasmuch as almost all  $a\ priori$  arguments on the negative side are but variations of it, a summary of it is essential to the present discussion. In the article NATURE, Spinoza's view of the relation of God to the world is briefly explained. It was a kind of Pantheism, according to which the processes of the universe were the manifestations of its Spiritual Life, the exhibition, as it were, of the natura naturans unfolding itself in the natura naturata. Thus no Thus no place is left for free acts of the Divine volition. And Spinoza lays down as a thesis that 'nothing happens in nature which is in contradiction with its universal laws.' Proceeding, then, to define a miracle as an event in contradiction with the universal laws of nature, he has no difficulty in establishing the impossibility of any event of the miraculous order. The whole force of the argument, and at the same time its whole fallacy, is found in the ambiguity of the word nature. Spinoza's thesis that 'nothing happens in nature which is in contradiction with its universal laws' is true only if nature includes all that is, if it is understood as embracing the sum of all existence and of all force, material and spiritual, as including

not only physical movements but the energy of man and of God. But if nature be taken in this large sense, it is quite unjustifiable to assert without proof that 'miracles are in contradiction with the universal laws of nature.' They are only, as Aquinas has it, 'præter ordinem totius naturæ creatæ'; miracles are contrary to the order of nature, only if nature be regarded as exclusive and independent of God.\* The distinction is as old as Augustine, and must be carefully borne in mind: 'Portentum fit, non contra naturam, sed contra quam est nota natura' (de Civ. Dci. xxi. 8). Nature as we know it is not to be identified with nature as God knows it, with the 'nature' of which He is a part; and it is only of the latter that we can say that its laws are universally valid.

6. There is, however, a form of Spinoza's argument which has more plausibility than that just considered, based as the latter is on a palpable logical fallacy. For it may be argued that miracles are contrary to the very conception of God as the All-Wise. A miracle would be an introduction of disorder into that creation of which the only idea worthy of God is that of an unchangeable order. It would be a contradiction of God by Himself, for the law which is at variance with the miracle is as much the reflexion of the Divine will and purpose as the miracle itself.† God 'is not a man that he should repent' (1 S 15<sup>29</sup>). His eternal decrees are unchangeable, and they are dictated by perfect wisdom. But a miracle is an *intervention* which can only be demanded by an imperfection in the existing order; and thus we have to suppose that the creation is, after all, but an imperfect ex-pression of the Divine will. Here, it is urged, is something inconsistent with the infinite wisdom and power of Him who pronounced all, at the beginning, to be 'very good.' In a perfect system, any interference with the normal course of things could only be for the worse.

The answer is not far to seek, when we express our difficulty in such words as these last. For this our difficulty in such words as these last. For this world is not, however much we may desire it, the best of all possible, or even of all imaginable, worlds. At some remote epoch in man's history his progress was violently interrupted; his career was checked in its progress 'from strength to strength.' The free will, which was his greatest gift, became the source of his greatest misery. And his fall has left permanent traces on the fair universe of God. How wil could ever have entered universe of God. How evil could ever have entered into the world we do not know (see FALL); but as things are, man has not fulfilled the Divine intention for him. From the consequences of his sin he cannot be saved by the mere normal operations of natural law, by the orderly development of his own nature. That redemption can be brought about only by an act of Divine mercy, which may involve—which perhaps necessitates—a perturbation of the established order. But the real marvel is not the intervention of grace, but the sin which demanded it. For sin is droula, law-lessness (1 Jn 34); it is a violation of moral law, which may be—and we can see reasons which suggest that it is—a far greater anomaly than any apparent violation of physical law could possibly be. There is an incongruity which we cannot re-concile (see FALL) between our conceptions of an All-Wise and All-Good God and the existence of sin; but that incongruity being frankly recognized, there is no further difficulty in conceiving of God as intervening, in an exceptional way, at an exceptional moment, to save man from the consequences of his own rash acts.

\* See Spinoza, Tractatus Theologico-Politicus, c. 6, and Mozley, Miracles, p. 215 fl.
† See Tranch, Miracles, p. 78.

7. There is, indeed, a point of view from which it would be impossible to conceive of such intervention taking place, without doing violence to our best notions of the Supreme. We are not to conceive of the relation between God and nature as that merely which subsists between an architect and his work (see NATURE), between a mechanic and the machine which he has made, and which, once made, is left to its own devices, unless it gets out of order.

'The reason why, among men, an artificer is justly esteemed so much the more skilful as the machine of his composing will continue to move regularly without any further interposition of the workman, is, because the skill of all human artificers consists only in composing, adjusting, or putting together certain movements, the principles of whose motion are altogether dependent upon the artificer. . . But with regard to God, the case is quite different; because He not only composes or putsthings together, but is Himself the Author and continual Preserver of their original forces or moving powers. And consequently it is not a diminution, but the true glory of His workmanship, that nothing is done without His continual government and inspection.'\*

On the mechanical theory of nature, the word On the mechanical theory of nature, the word 'intervention' might seem to suggest imperfect workmanship or foresight on the part of the Creator; but that is not a theory with which, as Christians, we are concerned. One who upholds 'all things by the word of His power' (He 18) cannot be spoken of as intruding, either in nature or in grace. And thus, despite the associations which cling to the word 'intervention,' it is hard to get a butter word to express a special and express a s to get a better word to express a special and ex-traordinary manifestation of purpose on the part of Him who is ever immanent in nature. We do not imply by its use that God stands aloof from the affairs of the world, save on those few occasions which we call miraculous, but we mean that, at certain critical moments in the history of the human race, the uniformity of His rule has been departed from, 'lest one good custom should corrupt the world.' 'When,' says Augustine,†' things happen in a continuous kind of river of ever-flowing succession, passing from the hidden to the visible, and from the visible to the hidden, by a regular and beaten track, they are called natural; when, for the admonition of men, they are thrust in by an unusual changeableness, then they are called miracles.

8. There prevails, however, at the present day a widespread dislike to any conception which involves a break in the continuity of the physical order, and thus various hypotheses have been proposed, according to which miracles may be made to appear more or less 'natural.' Indeed, 'natural law in the spiritual world' has been accepted by some as the principle of the much desired eirenicon between science and religion. It will be instructive to consider in detail some of these hypotheses.

(a) In the discussion of the miraculous, stress has at times been laid on the principle that God works by means. 'Miracles,' says the Duke of Argyll, 'may be wrought by the selection and use of laws of which man knows and can know nothing, and which, if he did know, he could not employ. ‡ And he suggests that much of the difficulty attendant on belief in supernatural agency is due to neglect of this truth. Most people seem to understand by supernatural power, power independent of the use of means, and the scientific mind cannot bring itself to believe in this. It is doubtful if this helps us much. The difficulty of accepting an alleged miracle as real would not be much lessened, if it were shown that natural means had been used for its accomplishment. For example, in several of the 'miracles' of the OT, it is distinctly asserted that natural forces were employed as means. Thus

<sup>\*</sup> Clarke, First Reply to Leibnitz, p. 15. † De Trin. iii. 6. † Reign of Law, p. 16.

the dividing of the Red Sea and the supply of quails are asserted to have been brought about through the agency of a wind blowing in a particular direction (Ex 14<sup>21</sup>, Nu 11<sup>21</sup>). Now, if any incredibility attach to these events, it does not seem that the introduction of machinery renders them any more credible. For the introduction of this machinery does not remove the direct intervention of God; it merely shifts it back to an earlier stage. The wind brought the quails, but what brought the wind?

'It is 48 real a miracle that the wind should come at the direct command of God, as that the quails should come without the wind. And so in every case. The immediate consequent of the special exertion of the Divine will is a miracle. Botween the immediate consequent and the final result any number of "means" may be interposed; but this does not alter the miraculous character of the event—it only disquises it. A miracle is not the less a miracle because in the series of phenomena which we call an event there are present in addition to the one miraculous element a hundred elements which are not miraculous.'\*

(b) Such events, however, as the dividing of the Red Sea and the supply of quails are not in themselves extraordinary; they can be classed as 'miracles' only because of the circumstances under which they happened, and should perhaps be rather described as 'special providences,' to use a common phrase whose meaning is discussed below. But can we conceive any way in which events which seem to be an interruption of the physical order may be brought under law? An ingenious illustration was put forward in this connexion by Babbage in his Ninth Bridgewater Treatise. He supposed the case of a complicated machine, so constructed that by turning the handle the first 100,000 natural numbers appear consecutively at regular intervals on a dial plate, but such that the next number is 100,100 instead of 100,001; after which apparent miracle the series goes on as before in arithmetical pro-gression. Now, the exceptional numbers are not miracles or even anomalies; they were all provided for in the original construction of the machine; they are examples of law, unknown to the unscientific public, but known to the wise artificer. Peabody gave a similar illustration. He told a story of a church clock, so contrived that at the close of a century it strikes the years as it ordinarily strikes the hours. 'As 100 years come to a close, suddenly in the immense mass of complicated mechanism a little wheel turns, a pin slides into the appointed place, and in the shadows of the night the bell tolls prace, and in the shadows of the night the belt tolls a requiem over the generations which during a century have lived and laboured and been buried around it. One of these generations might live and die and witness nothing peculiar.' The anomalous striking of the clock at the close of the century would seem a miracle to the uninstructed public; and yet it was not abnormal in any true sense. Such analogies are obviously not apt in certain particulars. Not to speak of the comparison of nature to a machine, which, as we have already seen, is misleading, it is plain that the exceptional phenomena described above would react at regular intervals, however long. We cannot suppose that there is any such periodic law in the case of miracles, which, as signs, are in their very nature unique. And so the only service which such analogies render is to remind us of our unfathomable ignorance of the inner constitution of nature, and so to guard us from hasty dogmatic negations of the possibility of this or that alleged event.

(c) A better illustration, perhaps, than either of the above is the following, which was (like that of the numerical machine) suggested by Babbage. The science of mathematics teaches us that there are many curves made up of isolated points, in addition to a continuous curved line. To a non-mathematical mind it seems an absurd paradox

\* Jellett, Efficacy of Prayer, p. 166.

to maintain that a single outlying point can be treated as lying on a continuous curve in its neighbourhood. But, in spite of the apparent absurdity, nothing is more certain than that it can be so treated. A curve, which to the eye appears to be discontinuous and broken, is known by the mathematician to follow an unvarying law. Now, it is not extravagant to suppose that our knowledge is at least as inferior to that of the Divine mind as the knowledge of geometry possessed by the beginner is inferior to the knowledge of the skilled mathematician. In short. apparent discontinuity may not involve any real breach of law, the whole progress of science tending as it does to bring what were formerly anomalous facts under the protection of general principles. And thus a 'miracle' may really be explicable by Supreme Intelligence as an illustration of law. These considerations do not prove that miracles are reducible to law, but show that there is nothing incongruous with daily experience in supposing that they may be so reduced.

9. The law of continuity, which is often appealed to as putting out of court the possibility of miracles, is-it must ever be remembered-nothing more than a convenient principle for the direction of scientific investigation. It may often deceive us; we may imagine that phenomena exhibit discontinuity, when a larger experience shows us that continuity has been most strictly observed. But it is even more important to recognize that it has no claim at all to be regarded as a constitutive principle of nature; it is not a fetish before which we must bow down, and which we must worship. The gap between the inorganic and the organic, between death and living matter, between animal life and human thought,—all these are chasms which cannot be bridged, so far as we know. In each case there is a μετάβασις els άλλο γένος. The most evident breach of continuity that can be imagined is the Creation itself: to conceive an Infinite Creator calling into existence a finite world, is to conceive discontinuous action. And other points of singularity on the curve of development of life are to be found at the points where man became conscious of his powers and of himself, and, lastly, when, in the fulness of time, God became Man. Stupendous miracles, indeed! 'Tria mirabilia,' said Descartes, 'fecit Dominus; res ex nihilo, liberum arbitrium, et hominem Denm'. Deum.

10. We may put the case in another way. Conceive for the moment the existence of beings confined to two dimensions of space. Length and breadth they understand; of height they can have no conception whatever. They live their lives in a plane; that space has other possibilities in store would be to them the maddest of dreams. To move northward or southward, eastward or westward, would be within their power; but the terms 'upward' or 'downward' could have no meaning at all. To such beings the advent of a visitor from the third dimension of space would be a true 'miracle'; it would be a violation of all the laws by which their universe has been ordered in the past. For such visitation could be reduced by them to no law; the appearance or disappearance of the vision (which would be simply brought about by descending upon or rising from the plane of their being) would be inexplicable. The movements of a visitor who could thus intrude into their universe would remain for ever anomalous and extraordinary, inasmuch as the third dimension of space is for them inconceivable. Mutato nomine, de te fabula narratur. By what right do we, the inhabitants of this solid earth, assume that space is necessarily limited to three dimensions, and three only? Why not four or five? Indeed

mathematical research does not get very far before it begins to suggest that the possibilities of space are infinite, though inconceivable. We cannot, in short, assert the impossibility of miracle unless we are prepared to assume that the laws of space which fetter and confine us in every region of outward experience are laws for the whole universe. It does not need a study of the Kantian philosophy to perceive that such an assumption is entirely unwarranted. But—it is only a possibility, yet one worth pondering—if the existence of a world where space has four dimensions be credible (though not imaginable), it may well be that what we call miracles are to the inhabitants of that world the ordinary manifestations of 'natural' forces.

11. Such considerations as these lead to a conclusion of considerable importance. They teach that the wonderful or anomalous or extraordinary character of any phenomenon is quite insufficient, by itself, to justify us in asserting that it must be due to the intervention of supreme spiritual powers. For there is always the possibility, not to be ignored, that it is due to unknown combinations of known natural forces, or to a natural force hitherto undetected. A remarkable verse in the Bk. of Wis (1918) illustrates the anomalous combination of natural forces in a miracle, by likening it to the transposing of the melody played on a musical instrument to a different key: 'As the notes of a psaltery vary the character of the rhythm, even so did the elements, changing their order one with another, continuing always the same, each in its several sound.' And (as is pointed out in art. NATURAL) it is inevitable that what seems extraordinary to one man will not seem so to another. Cortes soemed a superhuman person to the Mexicans when he predicted an eclipse. To a dog, the actions of his master must repeatedly seem 'extraordinary,' i.e. anomalous and inexplicable to his faculties. Thus Locket defines a miracle as 'a sensible operation, which, being above the compressions. hension of the spectator and in his opinion contrary to the established course of nature, is taken by him to be divine. The definition is not entirely satisfactory, for it loses sight of the important consideration which has been under discussion, viz. that the anomalous character of the alleged occurrence does not by itself establish the operation of spiritual force; but it is valuable as bringing out clearly the inadequacy of any such criterion to serve as an objective or universal test of 'miracle.' To class all 'extraordinary' or 'abnormal' occurences as 'miracles,' is to make an unwarrantable assumption. In short, to use the technical language of scholastic theology, we must not include among miracles 'ea que natura facit nobis tamen vel alicui occulta,' viz. the effects of physical forces as yet unknown.

12. Further, the wholesome consciousness of the limitations of our knowledge will prevent us from describing miracles as 'violations of law,' a phrase too commonly used, without any clear conception of the meaning of the words employed. If law here means 'law of the universe,' of that sum of existence which includes God Himself, it is plain that such a phrase is self-contradictory; the laws of the Cosmos, in this view, are the general principles of wisdom according to which the world is ruled, and these are, strictly, inviolable. Thus, when Butler suggests that 'God's miraculous interpositions may have been all along by general laws of wisdom,' and that we shall be able to see

this in a future state of wider knowledge, he means by 'laws of wisdom,' not physical sequences which have been observed to be invariable in our experience, but the reasons by which the Divine Being is guided in the action of His Providence. And his observation amounts to this, that although And his observation amounts to this, that although miracles, produced as they are by the direct intervention of the Divine volition, do not obey the ordinary rule that every physical effect may be accounted for by an antecedent physical cause, yet they are not, on that account, lawless. They are wrought for a worthy end, and in accordance with a wise plan. And Butler explains elsewhere that there may be an inherent limit in the nature that there may be an inherent limit in the nature of things to the utility of miracles, beyond which they would produce injury and disadvantage; the general bad result of the interposition being greater than the particular benefit produced by it. Thus one of the 'general laws' which might be supposed to govern miraculous interposition would be a Law of Economy, that it should take place only at exceptional crises in the history of man or of the universe.

13. But, no doubt, when miracles are described as 'violations of law,' what is generally meant by law is *physical* law, the kind of law which is ascertained in the laboratory, and whose operation comes within the sphere of the bodily senses to observe. Such a law might be conceived as violated without any violence being done to our reason, for the sum of physical forces is not the entire Cosmos. or its most essential factor. But, as a matter of fact, observation could never demonstrate a violation of law in this sense, save to a being who was omniscient. For (see NATURAL) we have no title to assert that we know and can infallibly predict the outcome of a hitherto unobserved combination of physical forces; we cannot tell what is above nature, unless we know all that is within it. As Huxley tersely wrote: 'If a dead man did come to life, the fact would be evidence, not that any law of nature had been violated, but that those laws, even when they express the results of a very long and uniform experience, are necessarily based on incomplete knowledge, and are to be held only on grounds of more or less justifiable expecta-tion.' With our imperfect knowledge of the condition.' Twith our imperfect knowledge of the conditions of life, we are not justified in saying with confidence that the dead could not be restored to life by some, to us, unknown combination of physical forces. And thus the mere marvellousness of our Lord's miracles by no means justifies us in ascribing them to supernatural agency. All that the evidence in respect of their extraordinary character would justify would be that they were what He Himself justify would be that they were what he minister called them, 'the works which none other did' (Jn 15<sup>24</sup>). In this regard, suggestions have often been made to the effect that those phenomena which we now call miraculous may be all scientifically accounted for in the future, and shown to be the action of obscure natural causes, with whose action we are only partially acquainted. Archbishop Temple hints that 'the miraculous healing of the sick may be no miracle in the strictest sense at all. It may be but an instance of the power of mind over body—a power which is undeniably not yet brought within the range of science, and which, nevertheless, may be really within its domain. In other words, what seems to be miraculous, may be simply unusual.'§ And so all that the anomalous character of these recorded events would prove would be, that Christ's healing acts

<sup>\*</sup> The argument suggested in this paragraph was developed in an ingenious essay, published anonymously in 1884, under the title Flatland.
† Discourse on Miracles.
‡ Analogy, ii. 4.

<sup>\*</sup> Analogy, i. 7.
† Augustine suggested that the miracle at Cana of Galilee is only the acceleration of a natural process: 'Ipse fecit vinum in nuptils qui omni modo hoc facit in vitibus.' It is the rate of the process which is extraordinary.

† Hume, p. 185.
§ The Relation between Religion and Science, p. 195.

were at least relative miracles, in Schleiermacher's well-known phrase, miracles if not for the purpose of science, at least for the purpose of revelation, arresting attention on the Agent, accrediting Him as God's messenger, singling Him out from other men and proving Him to be in possession of credentials deserving serious consideration; miracles for Christ's own time if not for ours, and having for that time the function and value of genuine

miraculous deeds.

14. We are thus led round again to the conclusion that the true miracle, which shall enable us to see the finger of God in the matter, must be more than a wonder. The word  $\tau\epsilon_{pas}$  is never used in than a wonder. The word répas is never used in the NT of a miracle, save in connexion with another word, viz. σημείον. \* The miracles of Christ are not only wonders; that would not guarantee their quality: they are signs (see Sign). They must not be separated from their context and viewed as the prodigies of a thaumaturgist; for they are capable of being interpreted as the manifestations of supreme spiritual force, only when the attendant circumstances are considered. when the attendant circumstances are considered. Mozley puts the case thus:

'To say that the material fact which takes place in a miracle admits of being referred to an unknown natural cause, is not to say that the miracle itself does. A miracle is the material fact as coinciding with an express announcement, or with express supernatural pretensions in the agent. It is this correspondence of two facts which constitutes a miracle. If a person says to a blind man, 'see,' and he sees, it is not the sudden return of sight alone that we have to account for, but its return at that particular moment. For it is morally impossible that this exact agreement of an event with a command or notification could have been by a mere chance, or, as we should say, been an extraordinary coincidence, especially if it is repeated in other cases.'

Thus, then, in the case of an alleged event which would seem to satisfy the definition of a miracle given above by Mill, we have two possible explanations. One is that it is the result of unknown natural law; the other is that it is due to the intervention of supreme spiritual power. And the latter explanation is the one which we feel compelled to adopt, when the extraordinary event compelled to adopt, when the extraordinary event presents distinct evidence of purpose. A miracle, then, may be described as an event manifesting purpose, occurring in the physical world, which cannot be accounted for by any of its known forces, and which, therefore, we ascribe to a spiritual cause. It is an interference with the ordinary action of the forces of nature on the part of the Author of Nature, an event brought about of the Author of Nature - an event brought about, not by any observed combination of physical forces, but by a direct Divine volition. It is thus at once

a τέραs and a σημεῖον.
15. These two characteristics enable us to distinguish miracles, so called, from other phenomena which resemble them in certain respects. instance, as has been already said, an interference with the physical order on the part of the spiritual takes place every time we exert our free will. On every occasion of such exertion we demonstrate the possibility of material phenomena being influenced by a personal, conscious, free agent. resulting action is a σημείον of the Intelligent Will which started the series of physical movements with a view to the fulfilment of foreseen purpose. We do not, however, call this a τέρας, a wonder, although it is truly a very wonderful thing. But there is no sensible interruption of the physical sequence; the continuity seems to be unbroken; and, so far as the powers of observation reach, it is unbroken. Once the initial impulse has been given, the power of the muscles is subject to physical laws, like any other physical force. An act of free will is not, strictly, comparable to a miracle, but to the action of Divine Providence in relation to mankind. All 'special providences,' or \* Ac 219, an apparent exception, is a quotation from J1 230.

-to use a better phrase—all answers to prayer, are strictly due to the intervention of the spiritual in the physical order. We do not call these miracles, because there is no apparent interruption of the ordinary course of nature; but yet at some point in the physical series there has been the intervention of the Divine will. Our conception of God (see NATURE) is not that He stands aloof from the world save on those rare occasions where we speak of miraculous interposition, but that He perpetually directs and controls the forces of nature in accordance with His purposes. But these forces are not His masters; they are His servants. And we have no ground for assuming that He cannot, for a special purpose, combine, counteract, paralyze their energy as He wills. Here we have reached the point beyond which the analogy of man's free will does not carry us. For man's free will is subject to strict limitations in its exercise. One obvious limitation is that man's influence over foreign bodies is possible only through the instrumentality of his own body. Despite some recorded phenomena, it seems to be true that man's will can enter the physical series only through the medium of the grey matter of his own brain. We have no warrant whatever for extending a series of the series of ing any such limiting law to the action of the Divine will, nor indeed would it be consistent with the conception of a Supreme Agent who is immanent in nature, while transcending it. This is a fundamental difference, indicating, as it does, that the Divine volition is related to the forces of nature in a fashion very diverse from that in which the human volition is related to those forces. result of the exercise of human will is a σημείον;

it is not a τέρας.

16. It may be asked at this point (and the question demands an answer), If miracles are not impossible, can it be said that anything is impossible? Has the word impossibility any meaning, if the possibility of interruptions of the ordinary course of nature, of breaches of the law of physical continuity, be admitted? It has a meaning. There are certain permanent impossibilities which can neither be conceived nor believed, of which we cannot assert in any intelligible sense that they could become possible by the act of Omnipotence, viz. logical impossibilities, violations of the laws described by logicians as the laws of thought, the laws of identity, contradiction, and excluded middle. That A should be the same as not-A, that a thing should possess two directly contradictory attributes at the same time, -these are permanent impossibilities; their truth is inconceivable for any rational being. Such axioms are not like the axioms of mathematics, which depend for their validity upon the constitution of depend for their variatry upon the constitution of space, and which therefore may not be true in regions where the conditions of space are not the same as they are with us. We cannot impose the laws of space upon Him 'whose kingdom is where space and time are not.' But it is quite otherwise with the laws of thought, of that reason in virtue of which it is written that man was made 'in the image of God.' These laws we must consider to be of universal and permanent validity, unless we are prepared to surrender ourselves to intellectual chaos; and a violation of them must be counted by us as strictly impossible. It is evident that such violation is not ejusdem generis with those anomalies in the ordinary course of nature which we call miracles. There is no miracle recorded in the Bible or anywhere else which is in the least like a violation of the laws of thought: if there were, we could not believe it, no matter what the authority on which it were presented to us, for we should be prevented from doing so by the constitu-tion of our own minds. Far from being violations

of the laws of thought, miracles cannot (as has been shown) be accurately and with confidence described as violations of the laws of nature; they are not violations, for instance, of the law of causation, that every effect must have an adequate cause, because in each case, ex hypothesi, the cause that is assigned is the direct action of the Divine will. It is doubtful, even, if any of the Gospel miracles could be described as violations of the laws of space and time. But however that may be, the point necessary to emphasize is, that in asserting the possibility of miracles on the hypo-thesis of Theism, we are far from denying the impossibility of any such contradiction as a violation of the fundamental laws of thought would involve. Such a violation would be contradictory to reason; it is a misuse of language to say that

the miracles of the Gospel are so.

17. The problem of the abstract possibility of miracles cannot be considered further here. Nothing has yet been said as to their probability, or credibility, or utility; but, before this section of the subject is closed, it may be worth while to remark that representative thinkers of many schools of thought have expressed their conviction. that thus far the argument is impregnable. Thus Kant, the apostle of criticism, while allowing no value to miracles as credentials of a moral religion, distinctly concedes their possibility, and indeed their utility, under certain circumstances.\* So, in like manner, Rousseau declared: 'This question, whether God can work miracles, seriously treated, would be impious, if it were not absurd; and it would be doing too much honour to him who would answer it in the negative to punish him; it would be sufficient to keep him in custody.' † And, once more, Huxley wrote: 'Denying the possibility of miracles seems to me quite as unjustifiable as speculative Atheism.' There is, indeed, a growing conviction among Christians and non-Christians alike that a priori speculation in theology, as in science, is worth very little; that the one hope of arriving at truth is to keep an open mind, and to welcome evidence from any and every quarter, without previous decision as to its value or worthlessness. It is in this spirit that an investigation into the evidence of the Christian miracles must be approached.

ii. THE SUBJECTIVE CREDIBILITY MIRACLES. -1. It would seem, from the preceding discussion, that the question whether miracles have ever happened or not is a mere question of fact. This question, like all similar ones, must be determined by evidence—the evidence of the senses if the 'miracle' is within the range of our own personal experience, the evidence of credible and sufficient testimony if it belongs to an age other than our own. In the case of the miracles which accom-panied the dawn of Christianity, the former kind of evidence is not now to be had; we must have recourse to the testimony of others. And so it might be thought that the only problem for the scientific inquirer is to investigate the nature of the evidence which is forthcoming, its amount, its date, and its consistency, and to determine, if it may be, the character and veracity of the witnesses. A preliminary difficulty, however, was raised by the ingenuity of David Hume, which still remains

to be dealt with.

In his famous essay on Miracles, Hume took up the remarkable position, that even if miracles happened, their occurrence could not be established by testimony; for, without troubling ourselves with any metaphysical discussion about their objective

possibility, they may be seen to be subjectively Hume's case has often been argued since his day, but it is doubtful if any writer has ever presented it in a more plausible form than its original advocate; and it will therefore be best to take it in his own words:

take it in his own words:

'A miracle,' he says, 'is a violation of the laws of nature; and as a firm and unsiterable experience has established these laws, the proof against a miracle, from the very nature of the fact, is as entire as any argument from experience can possibly in good health, should die on a sudden; because such a kind of death, though more unusual than any other, has yet been frequently observed to happen. But it is a miracle that a dead man should come to life; because that has never been observed in any age or country. . . . The consequence is that no testimony is sufficient to establish a miracle, unless the testimony be of such a kind that its falsehood would be more miraculous than the fact which it endeavours to establish. Or, briefly, it is contrary to experience that a miracle should be true, but not contrary to experience that testimony should be false.'

2. In this argument a careful observer will not

2. In this argument a careful observer will not fail to observe that the point to be proved is assumed at the outset. 'A firm and unalterable experience has established these laws . . . that has never been observed in any age or country.'
Why, this is the very question at issue. (i.) The
very thing that the believers in miracle assert is that experience has not always given negative testimony on the point. All the evidence (what-ever it be worth) that has ever been produced to guarantee the occurrence of miracles must be reckoned as counter evidence in refutation of the ground on which it is asserted that miracles must be disbelieved. It is in the highest degree unscientific to sweep away all the positive evidence for any alleged fact in such a fashion. In matters of science a new trial must always be granted whenever there is any reasonable ground to suppose that new evidence has turned up, or that any fault can be found with the processes by which, from ascertained facts, inferences have been drawn. The question can only be stated fairly as depending on a balance of evidence; a certain amount of positive evidence in favour of miracles, and a negative presumption from the general course of human experience against them'\*; it being always borne in mind that negative evidence is never so conclusive as positive, since facts of which there had been no previous experience are often discovered and proved by positive experience to be true. (ii.) Next, Paley's familiar criticism must not be forgotten. Paley points out † that Hume's argument turns on an ambiguity in the phrase 'contrary to experience.' The miracles of the Gospel are not contrary to experience in the sense that they contradict our own present exsense that they contradict our own present experience, the witness of our own senses; they can only be said to be contrary to experience in the sense that we have never experienced anything like them. This unusualness is, of course, a distinguishing feature of miracles, a mark of their signal character (see SIGN); if they were ordinary occurrences, they would cease to be miracles, but the fact that they are thus unusual or extraordinary does not in itself make them inor extraordinary does not in itself make them incredible. These two considerations may be thus summarized. Hume says that miracles are contrary to experience. Now, if by experience he means all experience, his maxim is a plain petitio principii; and if he only means general experience, it sinks

into the platitude that miracles are uncommon.

3. We refuse, therefore, to allow that Hume's argument is complete in logic. Viewed as an attempt to eliminate the credibility of miracles

\* Mill, Essays on Religion, p. 221, where the illogical character of Hume's argument is plainly exhibited.
† Paley, Evidences, Introduction.
† An ingenious practical illustration of the fallibility of Hume's principles as to the value of human testimony will be found in Whately's once famous pamphlet, Historic Doubts concerning Napoleon Buonaparte.

<sup>\*</sup> Religion innerhalb der Grenzen der blossen Vernunft, p. 99, ed. Rosenkranz.
† Lettres de la Montagne, iii.
‡ Spectator, Feb. 10, 1866.

VOL. III.-25

on the ground of the fallibility of human testimony, it is a failure. But we cannot fail to recognize the element of truth which has given the argument its plausibility. It is this. The course of nature is, as a rule, uniform. What is disturbed by the assertion that a miracle has taken place is the mechanical expectation of a recurrence, and we find it hard to get out of our scientific groove, in which everything does recur mechanically, because we so often regard nature as a mere machine - self-acting, whether selfcreated or no.\* If nature were such a machine, the improbability (we are not justified in speaking of incredibility) of a miracle would be enormous, although even then there would be no reason why that improbability should not be overcome by adequate testimony. But the question as to the probability or improbability of miracle assumes quite a different aspect when we recognize that nature is the exhibition of the Divine will and purpose.

'Hume's argument is far from being conclusive when the existence of a Being who created the present order of nature, and therefore may well be thought to have power to modify it, is accepted as a fact, or even as a probability resting on independent evidence. Once admit a God, and the production by His direct volition of an effect which in any case owed its origin to His creative will is no longer a purely arbitrary hypothesis to account for the fact, but must be reckoned with as a serious possibility.' †

The question is one of balancing improbabilities, as Hume said, but we must now take into consideration, on the positive side, not only the mere evidence of the witnesses, but also whatever there is of a priori probability that the Supreme would intervene in such fashion. Such a priori probability undoubtedly exists in the case of a miracle like the Incarnation. There is, on the one hand, if you will, the improbability that an event thus anomalous and out of the established order should take place. There is, on the other hand, not only the witness of the Gospels and of the Church to the claims of the Christ, not only the striking fact that thus all the hopes and expectations of ages found their realization, but this other serious consideration as well. If God made man in His own image, and intended him at the first for holiness, there is an a priori improbability in the supposition that such Divine purpose would be for ever frustrate and in vain. The Fall demands the frustrate and in vain. The Fall demands the Incarnation and the Atonement; it demands a fresh act of Divine grace, which shall raise man out of the slough in which he is struggling. so we can perceive a reason why, in the interests of morality and goodness, some such miracle as that of the Word who became flesh should appear in 'the fulness of time.' In other words, if we adopt Hume's way of looking at the question, though our belief in a miraculous occurrence depend ultimately on our regarding the testimony to it as so strong that its falsity would be more miraculous than the truth of the miracle in question, yet when thus balancing probabilities we must not forget to give due weight to the moral probability that the Author of Creation may desire at certain epochs to give a special manifesta-tion of Himself, of His will, of His grace, to the creatures whom He has made.

4. It must be frankly conceded that such considerations have been at times made too much of. A priori speculation in theology, as we said above, is often misleading; and if we committed ourselves altogether to its guidance we might be led to conclusions which should forbid us to regard as reconcilable the benevolence of God and the misery and sin and sorrow with which this earth is afflicted. If it be regarded as a priori probable that a remedy should be provided for sin, why, it has

\* See Temple, Bampton Lectures, p. 216. † Mill, l.c. p. 232.

been asked, is it not also a priori probable that a remedy should be provided for disease? Why should not sin be just as permanent an inheritance of man as death? And to that the only answer is that we do not rely solely on a priori probabilities in religion; if they were contradicted at every turn by experience, we could not trust them. But when, as in the case of the miracle of the Incarnation, the a posteriori witness falls in with the a priori suggestion of reason, then the two kinds of evidence, derived respectively from abstract and concrete considerations, mutually corroborate and support each other. A priori reasoning may lead us astray, but that is no reason for believing that it never points to the truth. Indeed, to profess that there is no scope for moral and rational probabilities in God's government of the world, is to accept a creed more gloomy and more irrational than any which

has yet been proposed to man.

5. It is not too much to say that the occurrence of miracle can hardly be certified to the intellect in a quiet hour of after-reflection, unless there be a convergence of both lines of evidence—the a posteriori of testimony, the a priori of antecedent probability. This is to say, that more and higher evidence is required to substantiate a miracle than is required to substantiate ordinary matters of fact. As the course of nature is generally uniform, we must grant that there is some special improbability attaching to the allegation that an event of the miraculous order has been witnessed. To overcome this special improbability it is needful, first, to adduce some seemingly adequate reason why the Creator should deviate from that observed course of action which (save in the specific cases of alleged miracles) prior experience proves to have been His rule; and secondly, that we should have stronger and more unimpeachable direct evidence than that which is required for an ordinary event. Certainly 'le vrai never reject any statement merely because it sounds improbable. We must try to discover if its falsity would be more or less improbable than its truth. But, granting the force of this proviso, we must also admit that more evidence is required for a miracle than for ordinary matters of fact.

Butler takes a different view, and his position His words are as folis worthy of scrutiny.

lows †:—
'There is a very strong presumption against common speculative truths and against the most ordinary facts, before the proof of them, which yet is overcome by almost any proof. There is a presumption of millions to one, against the story of Casar, or of any other man. For suppose a number of common facts so and so circumstanced, of which one had no kind of proof, should happen to come into one's thoughts, every one would, without any possible doubt, conclude them to be false. And the like may be said of a single common fact. And from hence it appears, that the question of importance, as to the matter before us, is, concerning the degree of the peculiar presumption st all against them. For, if there be any peculiar presumption at all against them. For, if there be the presumption or millions to one against the most common facts, what can a small presumption, additional to this, amount to, though it be peculiar? It cannot be estimated, and is as nothing. The only material question is, whether there be any such presumption against miracles as to render them in any sort incredible.'

Now, Mill pointed out very clearly the confusion of which Butler is here guilty: it is that Butler does not distinguish between two different kinds of improbability, which may be called respectively improbability before the fact and improbability after the fact. The antecedent presumption against any ordinary occurrence taking place, which it comes into my head to imagine taking place, is immense; but if a credible witness asserts

<sup>\*</sup> e.g. by Mill, l.c. p. 285 ff. † Analogy, ii. 2. ‡ System of Logic, ii. 178.

that it has taken place, that improbability becomes as nothing. This is the improbability comes as nothing. This is the improbability before the fact. In fact, that any ordinary event should take place is improbable before testimony has been given, but not a whit improbable after testimony. But the case of miracles is quite different: the presumption against a miracle is not merely a presumption against a specific event, but merely a presumption against a specine event, but against that kind of event taking place. And this presumption remains, and must be allowed for even after testimony has been given. Butler really compares the improbability of miracles (which remains after testimony to their occurrence has been given) with the improbability of the truth of a random guess (which vanishes after testimony to its accuracy has been brought for testimony to its accuracy has been brought forward); and this is to compare two things not fairly comparable at all.

6. The truth is, that when estimating the difference between miracles and ordinary facts as matters of credit, we must not lose sight of our fundamental assumption of the existence and

activity of supreme spiritual powers.

'A miracle,' says Mozley, 'is on one side of it not a fact of this world, but of the invisible world; the Divine interposition in it being a supernatural and mysterious act: and so the evi-dence for a miracle does not stand exactly on the same ground as the evidence of the witness-box, which only appeals to our common-sense as men of the world and actors in ordinary life, but it requires a great religious assumption in our minds to begin with, without which no testimony in the case can avail; and consequently the acceptance of a miracle exercises more than the ordinary qualities of candour and fairness used in estimating historical evidence generally, having, in the previous admission of a Supernatural Power, first tried our faith.

As we conceive the case, then, there must be, to certify the miracle—(a) a posteriori evidence greater in degree than would be required for ordinary matters of fact; (b) an a priori conviction of the Divine power, and an a priori faith in the Divine will to intervene. And this conclusion (to which we have been led on grounds of reason alone) receives remarkable confirmation from the circumstances of our Lord's miracles as recorded in the Gospels. The great miracle of the Resurrection was only witnessed by believers; there was no manifestation of the Risen Christ to the soldiers, to the priests, to Pilate (cf. Ac 10<sup>41</sup>). It is a question, indeed, which may fairly be raised, whether the recognition of the Risen Lord would have been possible for the faithless, and whether unbelievers would have perceived any exceptional appearance at all in the Garden, in the Upper Room, or on the Galilean mountain. It is a question whether we have not here the supreme illustration of that strange limitation to the powers of the Incarnate Word described in the words, 'He could do there no mighty work' (Mk 6<sup>5</sup>): 'He did there no mighty works because of their unbelief' (Mt 13<sup>58</sup>). But, without entering into so difficult and sacred a field of inquiry, it is at least certain that miracles are not regarded in the Gospels as sufficient objectively in themselves to generate faith. 'If they hear not Moses and the prophets, neither will they be persuaded if one rise from the dead' (Lk 1631), is the general teaching of the Synoptics.

i. The evidential Value of Miracles. 1. We pass to the consideration of the evidential value of miracles. It is an 'acknowledged historical fact,' as Butler says, 'that Christianity offered itself to the world and demanded to be received upon the allegation . . . of miracles publicly wrought to attest the truth of it in such an age.' The Christian Church was founded on the basis

\* Miracles, p. 102. It is especially the fault of the apologetic writers of the 18th cent. that they neglected this consideration. It is a fault from which Paley is not entirely free, but it appears most plainly in books like Sherlock's Trial of the Witnesses, which once had a wide vogue.

† See Westcott, Gospel of the Resurrection, p. 155.

of belief in a stupendous miracle, the resurrection or pener in a stupendous miracle, the resurrection of Christ: this was continually put forward by the early Christian apologists as chief among the credentials of the Gospel. Whether the reasoning of Nicodemus was logically valid or not, it unquestionably was accepted by thousands. 'We know that thou art a teacher come from God; for no man can do these signs that thou doest except God be with him, 'Jn 3<sup>2</sup>. (See SIGN). And it was largely due to the miracles which (it was alleged) accompanied the advent of Christianity, that Christian missionaries were able in the early ages to get a hearing for their message. But it has been urged that, granting the historical fact that this line of argument was once very attractive, it ought now to be set aside, for it is quite fallacious and inadequate. Miracles as credentials seem now to be at a discount, and the reaction against the exclusive attention to this aspect of their purpose which prevailed in the last century in English theology has perhaps gone too far. We have already said above that we do not claim for miracles that testimony to their occurrence is by itself sufficient to prove the existence of Divine power. The possibility of a miracle implies the existence of God, and no testimony would be sufficient to convince one who did not recognize the Divine existence that a miracle had ever occurred (see ii. § 6).\*
But a difficulty emerges, even in the case of a believer in spiritual force, which must now be considered.

2. A miracle, i.e. an anomalous intervention of spiritual force indicating purpose, supposed to be established by testimony, would merely prove the energy of superhuman power; it bears no necessary witness to superhuman goodness. It might be of Satanic origin, not of Divine, and it is not a credential which ought, by itself, to inspire belief, for it may be a delusion of the Prince of lies, rather than a manifestation of Him who is the Truth. Indeed the advent of antichrist is to be ushered in 'with signs and lying wonders' (2 Th 29). It is here that the context, so to speak, of the miracle is all-important. Miracula sine doctrina nihil valent is the principle which will resolve our difficulty. Certainly iniracles, regarded merely as tokens of power, do not establish the goodness of the agent who works them; but if we are able to recognize this latter characteristic from the doctrines which he teaches, then the miracle will pronounce that those doctrines proceed directly from the Author of goodness. If the doctrine commends itself to the conscience as good, then the miracle seals it as Divine. As Pascal has it, 'Les miracles discernent la doctrine, et la doctrine discerne les miracles.'+ And Pascal points out that this twofold test of power and of goodness, which must be applied to a miracle, is like the twofold test by which a prophet was to be tried according to the Pentateuchal Law. A prophet was not to be regarded as speaking in the name of Jehovah if (a) his prophecy was falsified by the event (Dt 18<sup>22</sup>), or (b) if his teaching led the people into the ways of idolatry (Dt 133). He was to be tried by his doctrine no less than by the superhuman prescience which he exhibited. And so a miracle is not only to be regarded in the light of a wonder; it is also a sign—a sign of the character of the agent from whom it proceeds, not only in itself but in all the circumstances which lead up to and result from it. So the reply to the frequent query, 'Do the miracles prove the doctrine, or does the doctrine

\*This is the contention of Spinoza: 'Porro quamvis e miraculis aliquid concludere possumus, nullo tamen modo Dei existentia inde possit concludi.' As we agree with his conclusion here, it is unnecessary to quarrel with the argument by which he reaches it, but we do not regard it as convincing.

† Penses 'Des Miracles,' a tew pages in which there is perhaps more wisdom than in anything else ever written on the subject.

prove the miracles?' is strictly this: Miracles are a proof of the Divine origin of a doctrine, provided the doctrine be in itself worthy of a Divine author. No miracle could justify us in acting or teaching contradictory to conscience, or in referring such teaching to God. But if the moral teaching of one who professes himself to be a messenger from God be of surpassing excellence, then His possession of superhuman power corroborates His authority and justifies His claim. If it be historically true, e.g. that Jesus Christ rose from the dead, then this fact 'identifies the Lord of physical life and death with the legislator of the Sermon on the Mount. Miracle is the certificate of identity between the Lord of Nature and the Lord of Conscience—the proof that He is really a moral being who subordinates physical to moral interests."\*

3. A miracle is not only a display of thau-maturgic power. This enables us to answer an objection raised by Matthew Arnold, who asked what possible evidence of authority would be shown by a man's turning a pen into a penwiper before our eyes.† And truly the answer is, None whatever! But then this applies only to miracles which are τέρατα, without being σημεία; whereas, in the view we have adopted, the true miracle is a vehicle of revelation, as well as an evidential

adjunct.

'This guarantees the standing of miracles, gives them a secure position in connexion with revelation; and also it guarantees their quality; it requires them to possess characteristics congruous to the nature of the revelation with which they are associated. If it be a revelation of grace, the miracles also must be gracious. Any kind of miracle will not do; a definite ethical character is indispensable. They must tend directly to advance the interests of the Divine kingdom.';

When miracles are regarded as credentials, their inward meaning no less than their outward form must receive attention. Thus Augustine likens the man who sees the outward side of the miracle to one who, being unable to read, admires the fair writing of a manuscript which the student values rather for the message it brings him: 'est oculis laudator, mente non cognitor. § No amount of evidence to the occurrence of a miracle, in short, is sufficient to justify us in inferring the intervention of Divine power, unless the miracle be one which our conscience assures us is not unworthy of God.

4. It hardly needs illustrations to explain that this is a test, which, though necessary to apply with all care and reverence, may yet be applied with some confidence. Many of the miracles recorded in the Apocryphal Gospels and in the Acta Sanctorum when submitted to this moral test are found at once to be lacking in the qualities which alone would justify their claim to be cre-dentials. They are grotesque and absurd; they teach no definite lesson; they are associated with no word of wisdom; they are signs of nothing, save the poverty of imagination possessed by the romancers who invented them.

The alleged miracles of the infancy of Christ are purposeless and wanton, even when they are not purposeless and wanton, even when they are not deliberately cruel. There is an absence of dignity about them, for they are worked without any great or worthy object. And, speaking generally, if a recorded miracle does not serve any moral purpose, if it be unfruitful in any good result, if the teaching by which it is accompanied be not spiritually elevating, then it stands self-condemned, 'the story,' as Butler would say, 'being rightly proved false from internal evidence.' On the other hand, the miracles of the Gospel are not

\* Liddon, Elements of Religion, p. 78; see Trench, Miracles,

p. 20 ff.

† Serm. xeviii. 8.

mere freaks of power; they have a definite moral mere freaks of power; they have a definite moral purpose. They are examples and acted parables of the love of Christ; they are the works of Him 'who declares His almighty power most chiefly by showing mercy and pity.' 'As nature is an image of grace, so,' says Pascal, 'the visible miracles are but the images of those invisible which God wills to accomplish'; they are, as it were, sacraments of the Divine operation. Thus, then, if a miracle be looked upon merely as an act of power beyond the power of man, it would not prove that the revelation which it accompanies is from God: but if it bear marks of wisdom in regard to the time and circumstances of its introduction, and of goodness as regards its moral character and its fruits, there can be no further doubt about the matter. And when we so look at the Christian miracles, we see that the supposed alternative that they might be due to superhuman malevolence rather than to benevolence is only ingenious but not serious. For Christianity so completely opposes evil and is so identified with God's providential working both before and since its promulgation, that to say that its miracles might have been worked by Satanic agency is simply absurd.

It is not contended that the Gospel miracles are all alike the evident work of supreme wisdom and goodness. The blasting of the fig-tree (Mt 2119f. || Mk 1120f.) has often been described as being rather like a freak of power than a sign of love. But, not to speak of the many explanations of the purpose of such an act at such a moment which have been suggested, and passing by the lesson which it surely conveyed to the observers, that the Divine judgment on unfruitfulness is stern and final, it may be said at once that this miracle must not be detached from the others which were wrought by Ohrist. Noscitur a sociis is a maxim of prudence; and a miracle like this of the fig-tree is guaranteed, so to speak, by the company in which it is found, and by the character, otherwise known, of Him who worked it. Viewed as an isolated marvel, it would not serve as a sufficient credential of the claims of the Christ; viewed as one of the incidents of His Passion, as one of His ippe, it has a meaning full of instruction. And the same may be said of any other cases in which a similar objection might be raised. It is not contended that the Gospel miracles are all alike the cases in which a similar objection might be raised.

5. It has been already pointed out (ii. § 6) that miracles are not represented in the Gospels as sufficient of themselves in all cases to generate conviction. 'Though he had done so many signs before them, yet they believed not on him' (Jn 1237). All the spectators at the Raising of Lazarus were not persuaded of the claims of Christ (Jn 1146). Yet the miracles of Jesus are repeatedly said to have arrested the attention and quickened the faith of those who witnessed them (Mt 827, Lk 56, Jn 2<sup>11</sup>). Not only the disciples, but the populace were impressed (Jn 6<sup>14</sup>, Lk 7<sup>16</sup>). 'Many believed on his name, beholding his signs which he did' (Jn 228), is a typical statement. And this aspect of His miracles, their witness to the truth of His claims, is emphatically asserted by Christ Himself.
'The very works that I do bear witness of me'
(Jn 5<sup>26</sup>). 'That ye may know that the Son of man hath power on earth to forgive sins, I say unto thee, Arise, take up thy bed, and go unto thy house' (Mk 210): the cure of the paralytic was a credential of His claim to be the pardoner of sin. When the tidings reached the disciples that Lazarus was dead, He said that it was well, for the miracle was dead, He said that it was well, for the miracle of his recovery would be the greater 'sign' (Jn 11<sup>18</sup>). He rebuked the greedy multitudes, because they followed Him for what they might get, and not because of His signs (Jn 6<sup>26</sup>). He upbraided Chorazin and Bethsaida because His mighty works had not drawn them to repentance (Mt 1120). St. John expressly states that the signs of Jesus were recorded 'that ye may believe' (Jn 20<sup>31</sup>): the evidential function of miracles was not merely an accidental result, due to the credulity of the contemporaries of Jesus; it was a function, according to the Fourth Gospel, which miracles and the record of them were in some measure to fulfil throughout the Christian centuries (see, however, iv. § 7).

But it is also to be observed that Christ more than once refused to work 'signs,' and that He often kept secret those which had been wrought. 'Tell no man,' He said to the leprous, the blind, the deaf, who had been healed (Mt 8 930, Mk Herod 'hoped to see some sign done by him' (Lk 238), but no sign was forthcoming. The scribes and Pharisees who sought a sign were sternly refused (Mt 12<sup>38</sup>). The faith which would be enkindled by signs, though it may be true faith, is not the highest. To believe Him 'for the very works' sake' is the lower stage of discipleship (Jn 1411); though it, too, may find its reward (Jn 448). The highest faith is not that of Thomas, who be-lieved when he saw the wound-prints, but that which can believe without seeing any sign (Jn 2029).

In brief, miracles are represented in the Gospels as of considerable evidential importance, although they will not convince an unwilling heart (Lk 16<sup>31</sup>), nor is the faith which they enkindle the purest

form of spiritual allegiance.

iv. THE MIRACLES OF THE GOSPELS. — Their Characteristics.—1. A somewhat closer examination of the miraculous element in the Gospels must now be made. We have seen that miracles are possible objectively and in the abstract; that it is unreasonable to declare that no testimony can make them credible, albeit testimony of a high order may fairly be demanded; and that, when put forward as credentials, a scrutiny of their internal character is necessary as well as a scrutiny of the evidence by which they are substantiated. miracles of the Gospel come well out of this last test; and we go on to ask, Are there any other leading characteristics which they present to our view besides this, that they are morally sublime?

2. A second characteristic is probably that they are certain, not tentative or doubtful. Many alleged cases of thaumaturgic power profess to be no more than this. Out of many trials there are a few successes. Such, doubtless, were the supposed cures wrought by the relics and at the tombs of martyrs. Nothing is alleged concerning them which in the collection of the co them which is not alleged of various quack medicines, namely, that out of the thousands who use them a few will be found to assert that they have derived benefit. But the phenomenon presented by Christ's miracles as recorded by the evangelists is quite different. There is nothing in the narratives which in any way suggests that the Lord attempted cures in many instances and succeeded only in a few; we seem to be told of a 'standing miraculous power lodged in a person.'\*

miraculous power lodged in a person.' \*

Here, however, we must speak with great caution. To assert that the miracles of the Lord were wrought without effort, as it were, and that they are to be ascribed to the exercise of His Divine nature rather than to the operation of His human nature enriched and glorified by His indissoluble union with the Father, is perhaps to go beyond the evidence. The power, the bivacus which Hie put forth as He 'went about doing good,' is not spoken of as always present in the same fulness or as bearing no relation to the faith of those for whose sakes it was exercised. He said once that power had 'gone forth' from Him (Lis 249); He 'sighed' as He restored hearing to the deaf (Mk 734); and a mysterious limitation to His power to heal seems to be hinted at in passages such as Mt 129. Mk 69, of which something has been said above.† The truth is, that we so little understand the conditions of the Incarnation that we find ourselves at fault when we attempt to define closely the laws (if we may so speak) of Christ's miraculous activity. Considerations such as have been suggested hardly touch the miracles which He wrought upon nature, as distinct from those which He wrought upon nature, as distinct from those which He wrought upon nature, as distinct from those which He wrought upon nature and all that can be gathered on this subject with confidence from the Gospels resolves itself into this, that while there was a 'standing miraculous power' in Him, there was also a remarkable economy in its exercise, the reasons for which we cannot fully comprehend. cannot fully comprehend.

3. There is, indeed, an intimate connexion

between the several miracles of Christ, arising from the fact that the greatest miracle of all is the Person of Christ Himself. Sin is the true droula, the true violation of law; and this finds its remedy in a corresponding miracle of grace, even the Incarnation. It is quite misleading to compare the evidence, say, for the raising of Lazarus with that for a miracle in the life of a mediæval saint; for the heart of the Christian position is that the circumstances were quite dissimilar. Christians assert, at the outset, that the Person of Christ is supernatural, or rather that the perfectly 'natural' humanity which He took upon Him was associated with the unearthly spiritual powers of the Godhead; and, that being so, it is natural, i.e. congruous, that His advent and ministry should be attended with works 'such as none other man did.' All through the Fourth Gospel, Christ's miracles are described as His έργα; they did not stand, as it were, in a class by themselves, but they constituted a part of that Divine manifestation which dwelt in Him. We say that His life being greater and larger than that of a mere man like ourselves, was irradiated by the awful light of His superhuman origin, and that therefore (as might have been expected) that superhuman origin betrayed itself by a superhuman energy of action, that, after a public life of superhuman works of mercy, He suffered, died, was buried, but rose again, appeared on several occasions to His followers, and finally in their presence ascended into heaven. This is not like the allegation of a single isolated miracle. The whole advent of Jesus Christ was miraculous, and therefore we refuse to isolate any one of His works from His life. 'Isolated events,' it has been profoundly said, 'are often incredible,' but the crowning miracle of Christianity is the Incarnation. If Christ were altogether an exceptional personage, there is nothing to stumble at in the miracles recorded of Him, which indeed then are seen at once in their true character as σημεία, or έργα,—His signs or His works, -but which refuse to rank themselves as θαύματα or prodigies which amaze and perplex. They are not specimens of His power, but manifestations of His Person.\*

4. Another consequence of importance follows from these considerations. The miracles, the σημεῖα of Jesus Christ, are essential to the Gospel history. And this does not mean merely that Christianity is a 'supernatural religion,' and that it is impossible to retain its consoling and strengthening power over mankind if we reject the supernatural element, true and deeply important as this is. But it means that we cannot construct a consistent picture of the life of Jesus Christ from the Gospels, if we do not take account of His miraculous powers, how-ever those 'miraculous' powers are to be explained. His miracles are not like the miracles in Livy or in the history of many of the mediæval saints, detached pieces that do not disturb the history, which goes on very well without them; but the whole history is grounded in them and presupposes them. Without making any assumption as to the date and manner of composition of the Synoptic Gospels, this fact stands out. We cannot contrive any theory by which we may entirely eliminate the miraculous, and yet save the historicity, in any intelligible sense, of those wonderful narratives. It is vain to say, as some have done, that possibly the original nucleus of the Gospels contained no miraculous stories. For what is the fact? Even if we attempt to reconstruct the original document which the Synoptic evangelists had before them when compiling their

<sup>\*</sup>Cf. Mosley, i.o. p. 168.
† This train of thought is carefully worked out in Mason's Conditions of our Lord's Life on Earth, pp. 95 ff., 108 ff.; cf. Gore, Dissertations, pp. 80, 140, 165; and Westcott, Hebrews, p. 66.

<sup>\*</sup>So Augustine: 'Mirum non esse debet a Deo factum mir-aculum... magis gaudere quam mirari debemus' (in Jose. Tract. xvii. 1).

Gospels, by the simple (though unscientific) process of rejecting everything as added which is not common to all three, and so arrive at the 'triple tradition,' we shall find that it still teems with miracle. The Feeding of the Five Thousand, the Raising of Jairus' daughter, the Stilling of the Storm, besides half a dozen miracles of healing, are still left.\* We cannot, in short, by any artifice reach a primitive gospel which is not to as greater or less extent a miracle gospel, and so we cannot treat off-hand the Gospel history in the matter of rejecting miracles as we would treat the Acta Sanctorum. But if we admit one miracle, there is little intellectual hindrance to admitting There is no aid to faith in the mere twenty. reduction of the number of miracles. Matthew Arnold compared this modern tendency to saying that while it is extravagant to suppose Cinderella's fairy godmother to have actually changed the pumpkin into a coach and six, we may believe that she did change it into a one-horse cab. + The illustration is flippant, but it is just. There is nothing to be gained by the attempt to minimize the supernatural in the Gospel history. It is there, do what we will. 'Miracles play so important a part in Christ's scheme, that any theory which would represent them as due entirely to the imagination of His followers or of a later age, destroys the credibility of the documents not partially but wholly, and leaves Christ a personage as mythical as Hercules.' We have, indeed, no warrant for insisting that any particular explanation or theory of the miraculous shall be accepted by a believer in the Gospels; but the fact of the miraculous, however we define it, remains. And a miracle reduced to its lowest terms, remains a miracle still.

8. Classifications, more or less instructive, of the miracles of Christ, have often been drawn up. §
We can here only briefly indicate their general character in respect of their claim to be regarded as due to power other than that of the ordinary forces of nature, as known or as conceivable to us. (a) There are, first, the miracles worked upon man, the miracles of healing. Some of these present no peculiar difficulty of credence to any one who is familiar with the remarkable phenomena of hypnotism, or more generally with the influence of a strong will over a weak one, though it would be rash to assert, and (in view of all the facts) is in it-elf improbable, that this is the whole secret in any case. Such, for instance, are the cures of the demoniacs (Mt 828 1521 1714, Mk 123), of the impotent demonacs (Mt 8so 15st 17th, Mk 1ss), of the impotent man at the Pool of Bethesda (Jn 5s), of the man with the withered hand (Mt 12th), of the woman with the spirit of infirmity (Lk 13th), of the dumb man with a devil (Mt 9ss), and of the man 'possessed with a devil, blind and dumb' (Mt 12ss). We find it increasingly difficult to accept any such explanations in the cases of the healing of the paralytics (Mt 8<sup>5</sup> 9<sup>2</sup>), of the deaf man (Mk 7<sup>82</sup>), of the blind (Mt 9<sup>27</sup> 20<sup>30</sup>, Mk 8<sup>22</sup>, Jn 9<sup>1</sup>, the last of which is specially remarkable, and was so regarded at the time), of the dropsical man (Lk 142), of the fever patient healed with a touch (Mt 814), of the woman with the issue (Mt 920), of the lepers (Mt 82, Lk 1711, the healing in the former case being brought about by a touch, in the latter case by a mere word of power), of Malchus' servant (Lk 2250). And more wonderful (to our eyes) than any of these was the raising of the dead, the daughter of Jairus (Mt 928, though here it is noteworthy that the statement that the child was really dead was not

made by Christ Himself), the widow of Nain's son (Lk 711), and Lazarus (Jn 1148), in the last of which cases, at least, all doubt as to the fact of death is excluded by the attendant circumstances.

(b) We have, secondly, the cosmic miracles, as they have been called—those which were wrought upon nature. The Blasting of the Fig-tree (Mt 21<sup>18</sup>), the Stilling of the Storm (Mt 8<sup>28</sup>), and the Walking on the Sea (Mt 142), betray the energy of One who had power not only over man, but over the unintelligent forces of the universe. Certainly these cannot be explained, or explained away, by any hypothesis such as that which has been resorted to in the case of the healing of demoniacs or the like. And a controlling force of a quite extraordinary character seems to have manifested itself in the Feeding of the Four Thousand (Mt 1532) and of the Five Thousand (Mt 1419), as well as in that first 'sign' of all, the Transformation of water into wine at the marriage feast (Jn 21).

(c) Four cases have been left out of consideration, inasmuch as if they stood alone they might be explained as coincidences, the like of which happens in every one's experience. The great draughts of fish (Lk 5<sup>1</sup> and Jn 21<sup>8</sup>) and the finding of the stater in the fish's mouth (Mt 1724, although here it is noteworthy that we are not told that the coin was actually found), as well as the recovery of the nobleman's son at Capernaum (Jn 446), are not in themselves prater naturam; but they receive their significance from their connexion with prophetic words of the Christ. They are (to take the lowest view) σημεία of His superhuman wisdom.

6. Thus, on a review of all the miracles of the Ministry of Jesus as recorded in the Gospels, although no doubt this or that isolated event might be plausibly referred to natural causes, yet undoubtedly there are some among the number which cannot be reasonably thus explained; and all, taken together, if they have been correctly reported to us, present a phenomenon for which we are driven to seek a cause other than the physical

forces of the universe can provide.
7. The Evidence.—What is the value of the evidence for these phenomena? The Gospels received their present form, let us assume, tween the years 60 and 90 A.D. That is to say, we have written testimony to the facts set down within half a century of their alleged occurrence. Is this testimony strong enough to outweigh the admitted improbability, a posteriori, of such anomalous and extraordinary events? The question about the Gospel miracles is often put in this form, but it is not the form in which it will be put by any one who appreciates what is the real problem at issue. For nothing has been said in the foregoing summary of the alleged resurrection of Christ Himself. It was this upon which the controversy as to His claims hinged in the early days of Christianity, and it was a true instinct which led the first preachers of the gospel to place it in the foreground. If He really rose from the dead, then it is plain that He cannot be judged by the standards which we rightly apply to the alleged doings of men like ourselves. The miracles of the ministry, with rare exceptions, were not worked under circumstances which should fit them to be absolutely convincing credentials to the world of the Divine mission of Jesus. They were, speaking in general terms and with reserva-tions which have been already explained (see iii. § 5),

<sup>\*</sup> This question has been carefully examined by Bruce, I.c.

p. 101.

† God and the Bibls, p. 23.

† Ecos Homo, p. 41.

§ See specially Westcott, Introduction to the Study of the Gospels, p. 480 ff.

<sup>\*</sup> All through, however, we must bear in mind that it is not the anomalousness of the resurrection of Christ which is the significant matter. 'It is quite possible that our Lord's resur-rection may be found hereafter to be no miracle at all in the scientific sense. It foreshadows and begins the general resur-rection; and when that general resurrection comes we may find that it was, after all, the natural issue of physical laws always at work' (Temple, Bampton Lectures, p. 196).

rather sacramental signs of His grace than proofs that He had the power to bestow it. But it was otherwise with the resurrection on the first Easter Day. This was a credential to which the Church continually appealed (Ro 14 424, 1 P 120), although it, too, was a σημεΐου of spiritual truth. And the evidence for this is not confined to the Gospels. It is presupposed in all the apostolic Epistles, as it is the burden of the apostolic sermons recorded in the Acts (cf. Ac 2<sup>82</sup> 3<sup>15</sup> 10<sup>40</sup> 13<sup>34</sup> 17<sup>3.81</sup> 26<sup>23</sup>); and not only is this the case, but the whole history shows that belief in the resurrection was the one source of the continued faith of believers after their hopes had been shattered by the crucifixion, and was, as a matter of fact, the foundation on which the edifice of the Christian Church was raised. Examine the evidence of the four 'undisputed' Epistles of St. Paul. These were all written before the year 58, i.e. about a quarter of a century after the crucifixion. St. Paul bears direct testimony to the fact of the resurrection, as believed in by all Christians of the day. 'To this end Christ died and lived again, that he might be Lord of both the dead and the living' (Ro 149); 'I delivered unto you . . . that which also I received . . . how that he hath been raised on the third day, according to the Scriptures; and that he appeared to Cephas; then to the Twelve; then he appeared to above five hundred brethren at once, of whom the greater part remain until now..; then he appeared to James; then to all the apostles' (1 Co 15<sup>3-7</sup>). For circumstantiality, it would be difficult to surpass this last statement (cf. also Ro 1<sup>4</sup> 8<sup>34</sup>, 2 Co 5<sup>15</sup>, 1 Th 4<sup>14</sup>). Again, St. Paul is so confident of the fact of the resurrection of Christ that he uses it as a proof that we too shall live after death: 'if there is no resurrection of the dead, neither hath Christ been raised' (1 Co 1513); he does not consider it necessary to add anything to this reductio ad absurdum. And, finally, the fact is so familiar that it is repeatedly appealed to in its symbolic and spiritual significance: 'that like as Christ was raised from the dead through the glory of the Father, so we also might walk in newness of life' (Ro 64; cf. Ph 310, Col 31).

8. This was the confident belief of St. Paul and of his correspondents years before the Gospels assumed their present forms, and (although we cannot here enter fully into the question) all attempted 'naturalistic' explanations of that belief are entirely inadequate. This is good evidence; it is quite different in degree from the evidence which might be brought for any of the Lord's miracles of healing, taken singly; indeed it is not too much to say that had not the evidence been entirely satisfactory to those who had the best means of judging, the Christian Church would not have lived for a year after the crucifixion. Thus it is the Church itself that is the abiding witness to the resurrection; otherwise we should have to believe a more 'incredible' thing than any 'miracle,' viz. that the greatest and most blessed institution in this world is based on the delusions of a few credulous and superstitious fanatics. The question to be answered is, not, Is the evidence of the Gospels for the miracles of the ministry sufficient by itself to inspire belief—not, Is the documentary evidence for the resurrection of Jesus provided in the Gospels and Epistles sufficient by itself to command our acceptance of it—but, How are we to account for the origin of the Christian Church on the basis of belief in the resurrection of Jesus Christ, supposing that belief to have had no foundation in fact? And to that question there is no satisfactory answer. We are driven back on the hypothesis that the belief grew out of the fact, and with that hypothesis all the existing evidence is in entire agreement.

Leslie in his once famous tract, A Short Method with the Deists, may have laid too much stress on the evidence viewed in a purely juristic aspect, but there is real force in his argument that the four tests which may be applied to the testimony to the fact of the resurrection of Christ are tests which would satisfy a reasonable court of inquiry. The alleged fact was (1) one which could be judged of by men's senses; (2) it was public; (3) it was verified by a monument set up in observance of it, i.e. the Christian Church; and (4) this was set up in modified to after the curt

immediately after the event.

9. We may now turn back to the miracles of the Gospel. They fall into line at once, if the miracle of the resurrection is a fact; they become  $\sigma\eta\mu\epsilon\hat{a}$  and  $\tilde{\epsilon}\rho\gamma a$  (as they are represented by St. John to be) of the Christ. The evidence for it is, prima facie, evidence for them. True it is that St. Paul does not mention them at all in his letters, but it did not come within his purpose to do so. It was the permanent results, not the temporary incidents, as it were, of the Divine life on earth with which he and his correspondents were concerned. And yet it is worth observing that, so far is St. Paul from thinking that miracles are foreign to the Christian dispensation, that he claims the power of working them himself, and that in letters addressed both to strangers who did not know him and to friends who did. wrought by him, he says, 'in the power of signs and wonders' (Ro 15<sup>18</sup>); 'truly,' he writes to the Corinthians, 'the signs of an apostle were wrought among you in all patience, by signs and wonders and mighty works' (2 Co 12<sup>12</sup>); among the Divine gifts of the Church are 'miracles (δυνάμεις), gifts of healings, divers kinds of tongues' (1 Co 12<sup>24</sup>); and he asks the Galatians, 'he therefore that worketh miracles (δωσμεις) among you doeth he it by the works of the law? (Gal 3<sup>3</sup>). If it had not been a matter of acknowledged fact that some such Divine powers had attended his apostolic ministry, it would have been truly extraordinary that he should have claimed them. And, further, it is plain that he would never have claimed powers for himself of which he believed his Master to have been destitute, so that his omission of any mention of the Lord's miracles of healing cannot have any significance as regards St. Paul's belief in the supernatural character of Christianity.

10. To this mass of evidence, a priori and a posteriori, in favour of the miracles of the NT, the answer that is usually returned in our time is not that of Spinoza (though his presuppositions are more widely accepted than is always recognized), nor of Hume, but of Matthew Arnold, who, while declining metaphysical disquisitions as to their possibility or credibility, attempted to settle the controversy by declaring that at any rate 'miracles do not happen,'\* and that the vast number of admittedly fabulous miracles recorded in ecclesiastical literature dispenses us from formal inquiry into the excellence of the evidence for those of one particular period. It is plain that the mere dictum, 'miracles do not happen,' has no application whatever in logic, unless the propounder of it is prepared to accept the principles either of Spinoza or of Hume; and these we have already examined. The force of the statement resides in this, that the modern world is very chary in receiving the report of any alleged miracle, because we know of so many cases in which like reports have proved untrue. But that 'miracles do not happen' within a certain area of experience, does not prove that they have never happened outside that area. The rule 'all or none' is a very unsafe rule for common life. Every case that arises ought to be judged on its own

\* God and the Bible, p. 232.

merits. And the first question to be asked about the evidence for the NT miracles is, Were the witnesses predisposed to believe such things of Jesus Christ? In particular, was there any pre-conception in favour of His resurrection? Were it so, there might be considerable room for hesitation in accepting report of it, and the rapid dis-semination of belief in it might be set down to a widespread credulity. Now (a) it is true that belief in the supernatural was quite common in the first century of our era, nor could men and women then have had the same intellectual difficulty in trusting the evidence for an alleged miracle that we, with our larger knowledge of the laws of nature, now experience. In particular, the lower classes of Roman society, though not ready to accept miraculous stories which interfered with their traditional beliefs, were steeped in an atmosphere of magic and superstition. But it was not so with the higher classes. The first century could not be called an 'age of faith.' Stoics and Epicureans alike were disinclined to believe in any irruption of the spiritual into the established physical order. (b) And when we turn from Gentile to Jew, when we consider the national Gentile to Jew, when we consider the national prejudices alike of the first preachers as of the first hearers of the gospel, we see that nothing could have been more opposed to preconceived ideas than the doctrine of the Incarnation, with the resurrection as its appropriate and (so to speak) inevitable sequel (Mt 27%, Lk 24%, Jn 518 888 1033 etc.). This once recognized, there would, no doubt, have been no difficulty in believing that the 'works' of One like Christ should be superhuman, but this was not recognized at the first even by the faithful apostles. Prejudice in first even by the faithful apostles. Prejudice in favour of the Incarnation, of the Resurrection, of the Ascension, there was none. The evidence cannot be set aside on the score that it grew up in the course of years as the outcome of presupposi-

tions as to what the Messiah should be and do.

11. This was the theory of Strauss; but it is not tenable, for this reason, among others, that the interval of time which elapsed between the death of Christ and the composition of the records which described Him as a superhuman personage is not long enough to account for such legendary developments. The evidence is not like that for the miracles attributed to St. Anthony or to Ignatius Loyola, which are found only in the later and not in the earlier biographics. It is as nearly contemporary as we could expect. It does not grow as we advance from decade to decade in the history of the Church. The belief in a superhuman Christ is as deep-rooted in the letters of St. Paul written before the year 58 as it is in the Gospel according to St. John written at least thirty years later, although it is not expressed in the same way. The evidence is as good in degree and in kind as we could expect it to be, without the intervention of a special miracle by which scientific testings, not in the least necessary for the faith of the first century, should have been provided to satisfy the cravings for certitude of the nineteenth. It is fully detailed, delivered in transparent good faith, and under circumstances which would forbid a careless assent.\*

v. OTHER BIBLE MIRACLES.—1. The Acts of the Apostles.—The miracles ascribed to the apostles in Acts stand on a somewhat different platform. Standing alone, the evidence for them would hardly be sufficient to compel their reception. But they must be considered in their relation to the advent of Christianity, and to the superhuman powers of the Founder of the Christian Church. The commission to the apostles (Mt 10°) included the direction: 'Heal the sick, raise the

" This is all worked out by Paley, Evidences, pt. i. ch. 2.

dead, cleanse the lepers, cast out devils.' This does not suggest, it will be observed, that what we have called *cosmic* miracles came within the powers with which they were entrusted by the Lord, and we find no trace of such miracles in Acts. In the appendix to St. Mark (Mk 1617) the remarkable promise is recorded: 'These signs shall follow them that believe: In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick and they shall recover.' With the exception of immunity from poison, instances are given in Ac of all these powers being enjoyed, not only by the original eleven and by St. Paul, but by many other disciples. Thus the gift of tongues found its fulfilment at Pentecost, and is alluded to by St. Paul in his Epistles. Prophecy, which was akin to this is his Epistles. Prophecy, which was akin to this, is frequently spoken of as a 'sign' of an apostle. Agabus not only predicted a famine (Ac 11<sup>28</sup>), but also warned St. Paul of what would happen to him at Jerusalem (Ac 21<sup>10</sup>). Twelve unnamed Ephesian disciples on whom St. Paul laid his hands were endued with this gift (Ac 19°), as were also the four daughters of Philip the Evangelist (Ac 21°). And that 'wonders and signs' were wrought by the apostles is repeatedly asserted (Ac 24 512 68 818), and it is in entire harmony with St. Paul's own claims (see iv. § 9). Among these were the expulsion of demons (Ac 5<sup>16</sup> 16<sup>18</sup>), the healing of the lame (Ac 3<sup>7</sup> 14<sup>8</sup>), of a paralytic (Ac 9<sup>84</sup>), and of the sick (Ac 5<sup>16</sup> 28<sup>9</sup> 19<sup>12</sup>, the cures in the last case being described as δυνάμεις ού τὰς τυχούσας, which operated through the medium of St. Paul's clothing). Two cases of raising the dead are recorded (Dorcas, Ac 927, and Eutychus, Ac 209). Visions (Doreas, Ac 9<sup>37</sup>, and Eutychus, Ac 20<sup>4</sup>). Visions and voices from heaven are spoken of (Ac 9<sup>8.10</sup> 10<sup>8.11</sup> 12<sup>6</sup>), and the intervention of angels is mentioned (Ac 5<sup>19</sup> 8<sup>26</sup>). Two visitations of judgment, upon Elymas (Ac 13<sup>11</sup>) and upon Ananias and Sapphira (Ac 5<sup>8.10</sup>), are brought about by St. Paul and St. Peter respectively. It is not necessary to discuss the healing virtue ascribed to St. Peter's shadow (Ac 5<sup>10</sup>), or the deliverance of St. Paul from the viper (Ac 28<sup>3</sup>); for in the former case pothing is said as to the species of the attenuated nothing is said as to the success of the attempted remedy, and in the latter case no miracle is necessarily involved (but cf. Mk 16<sup>18</sup>). But, on the whole, it is impossible to evade the consequence that the ministry of the apostles, according to the only records which we have got, was sustained by powers which are beyond the power of man or of nature as known to us. They fall into their place immediately if Christ was what He claimed to be, and the Church which He founded the minister of His grace; but on any other hypothesis they cannot be explained.

2. The Miracles of the OT.—Similar observations may be made about the miracles of the OT. It is evident that we cannot speak with the same confidence about these that we can feel when describing the miracles of Him who showed in His own person His superiority to death, of Him who is the Prince of Life. For they are narrated in ancient books, the origin of which in many instances is wrapped in obscurity. We cannot claim to have contemporary evidence for the miracles of the OT as we have for those of the NT. And so to one approaching the OT literature without any appreciation of its fulfilment in the Christ, some of the miracles therein recorded, while always possible to a believer in God, may perhaps seem to be guaranteed by no sufficient testimony to compel belief in occurrences so improbable in themselves. But for us 'Vetus Testamentum in Novo patet.' The obscurities of the older revelation find their explanation in the fuller light of the later. And

if it be a fact that the law was a παιδαγωγός els Χριστόν, and that Israel was chosen by the Almighty as His instrument for the teaching of the world, then it ceases to be a priori improbable that, at exceptional crises in the history of the Hebrews, special manifestations of Divine power might be vouchsafed, which should enable men to say with boldness, 'This is the finger of God.' And, again, it is not to be forgotten that the use of the OT by Christ and His apostles sufficiently proves to Christians that the literature therein contained was a unique literature, and was produced under quite unique conditions of inspiration. Thus the records must, at the least, be treated with respect greater than that which we bestow upon books like the Acta Sanctorum, and we are entitled to place fuller reliance on the accuracy of the writers than would be justifiable in a history which came to us without any such lofty guarantee and claim. It is in such a spirit that we approach their accounts of miracles.

The OT miracles are chiefly grouped round two epochs—the Deliverance from Egypt, and the Reformation of Elijah and Elisha. It is true that these periods are described in greater detail than any other periods in the history, but nevertheless it can hardly be without significance that it is at these two great crises in the fortunes of Israel that the tokens of God's providence were most apparent to pious observers. Of the former cycle it should be observed that very few of the socalled miracles are difficult of credence, inasmuch as the majority of them are not (seemingly) in as the majority of them are not (seemingly) in themselves out of the order of nature. The Ten Plagues (Ex 8-12), the Parting of the Red Sea (Ex 14<sup>21-31</sup>), and of the Jordan (Jos 3<sup>14</sup>, cf. 2 K 2<sup>7-14</sup>), the Water from the Rock at Rephidim (Ex 17<sup>5</sup>), and at Kadesh (Nu 20<sup>7</sup>), the Curing of the Waters of Marah (Ex 15<sup>23</sup>, cf. 2 K 2<sup>21</sup>), the Budding of Aaron's rod (Nu 17<sup>8</sup>), the deaths of Nadab and Abihu (Lv 10<sup>1</sup>), as of Korah and his company (Nu 16<sup>31</sup>), did not involve any apparent breach in the continuity of the physical order. We can readily conceive how similar occurrences might be brought conceive how similar occurrences might be brought about through the operation of the ordinary forces of nature. None of these events, considered singly, would seem a prodigy to an impartial observer. It is the concurrence of so many circumstances of the kind which forbids us to deny their signal character, and conveys to us the conviction that here was the finger of God. And it is even more important to observe that these remarkable events were associated in many cases with a word of power from God's ministers. The predictive element, which we have spoken of above (see i. § 14) as characteristic of so many of our Lord's miracles, is here conspicuous. The plagues are foretold; so was the dreadful death of the rebels in Korah's rebellion; and the division of the waters of the Red Sea is described as having been connected with prayer and invocation on the part of Moses. Here we come upon the most prominent aspect of miracle in the OT, viz. the element of prophecy, which includes prediction. However this feature may have been exaggerated in Christian apologetics in the past, and however we may try to reduce it to lower dimensions, it is impossible to eliminate it from the Hebrew literature. function of a prophet was not confined to prediction, but this was certainly within his powers, as indicated from time to time in the history of Israel. And true prediction is essentially miraculous; it is beyond human powers, and it is a sign of a special revelation of God to man over and above that which is continually offered in His provi-dence (see PROPHECY). Prophecy being admitted as possible, and the actual prophecies of the OT seers being certified, the 'wonders and signs' with

which their ministry was accredited are deprived of much of that antecedent improbability which (as we have admitted) attaches itself to miraculous

stories in general. The miracles of Elijah and Elisha may be viewed in this light. They are, as it were, their credentials. Other prophets, both of OT and of NT,

worked no signs indeed (Jn 1041), and this shows that it was not the habit of the Hebrews to surround the figure of every prophetical personage with a halo of miraculous glory. But Elijah and Elisha lived in an age of spiritual upheaval: great wickedness and deep piety came into conflict. 'Let it be known this day that thou art God in Israel' (1 K 1836) was the perpetual burden of Elijah's prayers. And perhaps nothing short of a miraculous sign would have satisfied the Israel of his day that the Lord was God. At the same time it may be freely conceded that the accounts of these two great prophets, Elijah and Elisha, stand somewhat apart from the general history of Israel. The miracles of Elisha are never alluded to in the OT after the story of their occurrence, and they are only once mentioned in the Apocr. (Sir 48<sup>14</sup>). It cannot be said that the miracles ascribed to these prophets are essential to the history, nor can it be maintained that all of their miracles are on the lofty moral level which we have found to be conspicuously the case with the miracles of Christ. It is an hypothesis with a good deal of prima facie evidence in its favour that the miracle-stories of 1 K 17. 18, 2 K 1-6 are rather of the nature of Jewish Haggadoth than of sober history.\* With even greater probability may this be said of the stories of Daniel and the den of lions, and the Three Children in the furnace of Nebuchadnezzar (Dn 3<sup>195</sup>. 6<sup>165</sup>.). In the rest of the OT the miraculous element (if we exclude prophecy) is remarkably small. The song of the Bk. of Jashar, which procked the cure standing still a Cilcular. which speaks of the sun standing still at Gibeon (Jos 10<sup>12</sup>), can hardly be taken as a scientific statement of fact; it is poetry, not prose. The somewhat similar story of the shadow moving backward on the sundial of Ahaz (2 K 20<sup>11</sup>), is related in prose and interwoven with the history of Hezekiah, and cannot be dismissed so easily. But in the absence of fuller knowledge of the circumstances it would be impossible to be sure that in this there was anything 'supernatural,' beyond the foreknowledge which Isaiah seems to have had that this 'sign' would take place. The story of Balaam's ass speaking has been referred to its parallels, s.v. BALAAM; + and the episode of Jonah and the whale seems to be of a similar class. In the latter case, it has been urged, indeed, that our Lord's application of the story (Mt 1239) forecloses all inquiry into its literal truth. But this is not the judgment of the most careful and devout scholars of our own time. #

On the whole, then, while we maintain that the history of the Jews cannot be truly interpreted unless the special intervention of Providence in many a crisis of their national life be discerned, and while we distinctly recognize the miraculous nature of the Messianic prophecies of the OT, and are not slow to accept the allegation that miracles may have accompanied their progress, we cannot think that the evidence for several recorded miracles, such as Elisha making the axe-head to swim (2 K 6°), the speaking of Balaam's ass (Nu 22²8), and the staying of the sun and moon at Gibeon (Jos 10¹²), is at all sufficient to compel implicit credence in their literal truth.

vi. Christian Miracles after the Apostolic AGE .- 1. The last section of this article must be

<sup>\*</sup> See above, vol. i. p. 696b, art. ELISHA.
† See vol. i. p. 234a.
† See Sanday, Inspiration, p. 414 f., and Gore, Bampton
Lectures, p. 195 f., and cf. art. JONAH, above, vol. ii. p. 751.

far too brief for its subject, but something ought to be said of miracles recorded elsewhere than in the OT and NT, if our discussion of miracles in general is to be in any way complete. We have seen that the infant Church is described in Ac as having been favoured with miracles as well as with other gifts of the Spirit. When did these miracles cease in Christian history? Many different opinions have been held, one branch at least of the Church believing that there has been no cessation and that miraculous powers are still in her possession, it being often urged, on the other hand, that they died with the apostolic company. The chief reason alleged for this latter opinion is apparently based on the assumption that miracles are given only for evidential purposes, that their sole function is to certify the Divine character of revelation, and that when this has been sufficiently established their work is done, and that they may not be expected to continue. And, curiously enough but most unreasonably, it has been assumed that the apostles could not have worked any miracle save those recorded in Scripture, or at least that no record of such could be trustworthy. Between these extreme views are to be ranked the great body of old English divines, e.g. Dodwell and Tillotson, who held that miracles were occasional in the Christian Church until the time of Constantine, when, Christianity being established by the civil power, it no longer needed such supernatural assistance. Thus Fuller needed such supernatural assistance. explains that 'miracles are the swaddling clothes of the infant Churches'; and yet another view has commended itself to many, viz. that the power of working miracles extended to but not beyond the disciples upon whom the apostles conferred it by imposition of their hands.\*

2. According to Acts, the Divine powers promised by Christ to His Church were at least occasionally exercised, not only by the apostolic company but by other persons as well. It would not be sur-prising, therefore, if we found in the literature of the early 2nd cent. many references to miracles like those in Acts. And yet such references are few and scanty. Our records of the period are fragmentary, to be sure, but it is remarkable that they tell so little on the subject. With a few notable exceptions, of which something is said further on, there is no trace up to the end of the 2nd cent. of any miraculous gift still existing in the primitive Church save those of prophecy and healing, including

exorcism, both of which are frequently mentioned.

(a) In Hermas (Mand. xi.) and in the Didaché the abuse of the grace of prophecy is spoken of, and a little later Justin (*Dial*. § 82) has the statement παρά γάρ ήμεν και μέχρι νῦν προφητικά χαρισματά έστιν. We observe here that the earliest notices of the power of prophecy imply also the presence of its counterfeit, and indeed prophecy is, of all the Divine 'gifts,' that which would most easily lend itself to imposture. And Justin's statement seems to imply his surprise that prophecy should have continued so long, for he says 'even up to the present,' from which we might gather that instances of genuine prophecy in his day and in his neighbourhood were not very numerous.

(b) The gift of healing is also noted by Justin (Dial. § 39), though he does not give any instances within his own observation. Origen goes further (contra Celsum, iii. 24), and says that he has seen many persons rescued from delirium. But the commonest exemplification of this gift was displayed in the expulsion of demons; exorcism is regarded quite as a thing of course by the 2nd cent. Fathers. Justin (Apol. ii. § 6, Dial. §§ 30, 76) and Tertullian (Apol. 23, 37, 43, de Idolol. 11, etc.) speak in extravagant terms as to the certainty with which demons could be expelled by the prayers of

\* See Kaye's Tertullian, p. 49.

the faithful. They allege these powers to be the common property of all Christian people, and to be susceptible of exercise at any moment and on any occasion. This is going far beyond the language of the Gospels and Acts, but it is here sufficient to observe that phenomena of this sort are often explicable without any recourse to supernatural

agency (see above, iv. § 5).

3. Next, it is important to note that the early Fathers, although seeing the miraculous in the incidents of their daily life, place the miracles of the apostolic age on a pinnacle quite above the miracles of their own time. When we go to the 4th cent., we find Chrysostom saying that 'all the men of his time together' could not do as much as St. Paul's handkerchief (de Sacerdot. iv. 6), and he implies that in his day there were no raisings from the dead (cf. Hom. in 1 Cor. vi. 2). But, much earlier than this, Tertullian, after saying that the apostles had spiritual powers peculiar to themselves, adds 'nam et mortuos suscitaverunt quod Deus solus; et debiles redintegraverunt, quod nemo nisi Christus' (de Pud. c. 21)—language which would be strange if such occurrences were even occasional in his day. And of the miracles of the apostolic age, Origen only says that traces (ίχνη) remain in his time (contra Celsum, i. 2). We find then (i.) that by the end of the 2nd cent. there is a growing suspicion that miracles are dying out, (ii.) that such miracles as are recorded are generally regarded as different in kind from those of the apostolic age, and (iii.) that in the earliest age of post-apostolic Christianity the 'miracles' are almost, without exception, of prophecy, healing, and exorcism.

4. The exceptional cases remain to be mentioned. (a) Eusebius records (HE iii. 39) that Papias related that in his time a man rose from the dead, as he had heard from the daughters of Philip the Evangelist, and that Justus Barsabbas was once delivered from the effects of drinking poison. The former of these occurrences may relate to some such occurrence as the raising of Dorcas (Ac 937), which the daughters of Philip may have witnessed, and the latter is not related in sufficient detail to enable us to draw any conclusion from it (cf. Mk 16<sup>18</sup>). But it is significant that Papias' account seems to have been silent as to miracles which came within his own observation. The occurrences he mentioned were in the apostolic age, and

he does not profess to speak as an eye-witness.

(b) The often quoted statement of Irenæus is more difficult to explain or to explain away. speaks of prophecy, healing, and exorcism as impossible in heretical circles, but as common in the Church, and he adds, 'Yea, even the dead were raised and abode with us many years' (ἡγέρθησαν και παρέμειναν σύν ἡμῖν ἰκανοῖς ἔτεσι, adv. Ηær. II. All that can be said about this is that xxxii.). no specific instance is produced; the language is rhetorical, and the statement occurs in the middle of a polemic against heretics. Nor are we furnished with details. Further, when Irenæus passes from the mention of the more common miracula to speak of raising the dead, the tense is suddenly and unexpectedly changed. Healing, exorcism, and prophecy, these are matters of present experience for him; but he speaks of resurrections from the dead in the past tense. Even the words quoted hardly mean more than that such events happened within living memory. Now Irenæus was a disciple of Polycarp, who was himself a disciple of St. John, so that if we view his statement thus it will not appear so extraordinary. The inference, in short, from the whole passage is that the major miracles are inference which is conno longer happened—an inference which is confirmed by all the available evidence.

\* See further, Mozley, Miracles, p. 295.

5. But if the miraculous powers of the Church seem to have grown less and less as the 2nd cent. went on, it must also be remembered that miracles of the most astounding character abound in the records of ecclesiastical history from the 4th cent. onward. On what grounds, it may be asked, do we reject these? Or must we reject them? Is there any reason why these should be rejected and those of the NT accepted? and on what principles

is such differentiation to be made?

6. It is plain, at the outset, that miracles are always possible to the believer in God, and again that there is always a presumption against them to one who believes that God governs the world by general laws. This fact, that His rule is uniform for the most part, is what gives to miracles their signal character, their character as signs, and so forbids us to see 'miracle' in the ordinary activities of Providence. They are σημεία, and are therefore a priori unlikely to be of everyday occurrence. And the remarkable economy in the use of miracle displayed both in the OT and in the NT confirms us in the conviction that there is an antecedent probability against them as a general rule. This antecedent improbability may be overcome by the special circumstances of the case (as we have pointed out is true of the miracles of Christ), or by the strength of the evidence which may be adduced; but normally it has considerable force. Further, supposing true miracles occur, nothing is more certain than that they will provoke imitation and imposture, and will encounter the rivalry of a host of false ones. Pascal goes so rivalry of a host of false ones. Pascal goes so far as to say that the existence of the false necessarily points to the existence of the true as their antecedent cause, without which they would never have gained a footing.\* We need not accept this dictum in its integrity, but there is this of truth in it, that it shows on the one hand how unscientific it is summarily to reject the evidence for a given occurrence, merely because somewhat similar evidence has proved misleading in other cases; and, on the other hand, that we must always allow for a readiness to believe in miracle arising from previous (real or imaginary) experience of such interpositions of Divine favour. We say then, first, that while we do not in the least feel bound to reject mediaval or modern miracles, we start with a determination to test the evidence for them very severely. If we draw conclusions as to the history of the Christian Church from what we read in the OT of the history of the Jewish Church, we shall expect to find miraculous interposition very rarely exhibited, and then only at great national crises, and not merely for the warning and instruction of individual souls.

7. This same law of Divine economy will bid us also to exclude from the category of miracles such events as may reasonably be referred to natural causes. Visions or voices which may be resolved into false perceptions or deceptions of the senses must be so classed. The extraordinary phenomena which are recorded as having accompanied the martyrdoms of Polycarp, tof Savonarola, of Hooper, may readily enough be explained as the operation of physical forces, a little exaggerated perhaps by pious enthusiasm. Stories like that of the Thundering Legion and the rain which followed the prayers of the Christian host may be true in the main, although the events of which they tell are not necessarily miracles in any other sense than that in which every answer to prayer is a miracle (see above, i. § 15). In other cases the recorded phenomena are too like the tricks of a thaumaturgist for sober piety to recognize in them the finger of God; and in many the alleged

miracles are grotesquely absurd and utterly devoid of that character of σημεία which all true miracles have as revelations of the Divine will and purpose.

395

8. Next, in an overwhelmingly large number of the cases which remain, both of mediæval and modern miracles, the evidence is entirely insufficient. There is no a priori probability in their favour, and very inadequate a posteriori testimony. In how few cases, outside the NT, have we got the evidence of the agent who is supposed to have worked the miracles! And it is to be feared that many stories of miracles worked by saints may be accounted for by the misguided piety of their biographers. All too soon in the Church's history a false criterion of sanctity grew up. It was supposed that the measure of a man's goodness was the amount of miraculous power by which his preaching was aided.\* Now from the belief that the man who works miracles must be a good man, the transition is easy to the converse inference. This man was a good man, hence he must have worked miracles, and so it can be no harm to write down a few in his biography. He must have worked, if not these particular wonders, at least others very like them. We thus find that the further removed in time the saint is from his biographer, the more is his life embellished with legend and glorified with miracle. We distrust the mediæval records on these grounds. Falsus in uno, falsus in omnibus, we say. No criticism of this sort can be applied to the miracles of the NT; for here we have contemporary testimony of the principal persons concerned, and the miraculous is as prominent in the earlier as in the later canonical writings.

9. It is a suspicious circumstance that many of these mediæval miracles happened so opportunely for the triumph of a particular party or the glorification of a particular individual. In one sense, indeed, it is very far from suspicious to read that a miracle came at the right moment, i.e. for the support of God's truth, but in another sense it is suspicious. If men are anxiously expecting a sign from heaven to guarantee the piety of a doubtful undertaking or the success of a hazardous cause, it is very likely that they will see the finger of God in what is really only the operation of His ordinary laws, and it is not improbable that they may be the dupes of unscrupulous persons who

play upon their prejudices.

10. All these qualifications being made, a residuum of recorded cases is left, which it is difficult to explain. Men will view them differently, according to their predispositions. But it is not too much to say that no recorded occurrences in recent centuries seem to bear the character of  $\sigma\eta\mu\epsilon\hat{a}$  in at all the same degree as the miracles of the Gospel, whether we have regard to the general circumstances under which they were worked, or the results, moral and spiritual, which were consequent upon men's belief in them. Quite apart from the adequacy or inadequacy of the evidence brought forward in their favour, or the possibility of 'natural' explanations, alleged miracles such as the apparition of the Blessed Virgin at La Salette, and the cures of pilgrims at the shrine which has been built at the spot, are lacking in the dignity and moral grandeur of the miracles of the Gospel. Whatever may be thought about them, it is plain that even if these and their like are really to be traced to the intervention of the Divine mercy which loves to reward a simple faith (and it does not seem to us that the evidence is sufficient to establish such a conclusion), yet they do not serve as vehicles of revelation as the miracles

<sup>\*</sup> Pensées, ii. 285 (ed. Faugéres). † See Lightfoot, Apostolio Fathers, II. i. 516.

<sup>\*</sup> See Mozley, Miracles, p. 180.
† Newman lays down a principle very like this (University Sermons, p. 845).

of the Gospel did. They may be θαύματα, δυνάμεις, τέρατα, but they are not σημεῖα of a new spiritual message to mankind, which it sorely needed to learn. And this is the essential characteristic of the miracles of the Christ.

On the whole subject of this article cf. Jesus Christ, in vol. ii. p. 624-628; and see NATURAL,

NATURE, PROPHECY, SIGN.

LITERATURE.—The subject has been treated by innumerable writers, but the following books are among the most important, and are easily accessible: Origen, contra Celsum; St. Thomas Aquinas, Summa Theologica, 1. cx.; Spinoza, Tractatus Theologico-politicus, de miraculis (on the negative side); Pascal, Fensées; Butler, Analogy; Hume, Enquiry concerning the Human Understanding, x. (on the negative side); Paley, Evidences; Babbage, Ninth Bridgenater Treatise; Trench, Notes on the Miracles; J. B. Monley, Bannyton Lectures; Lange, Life of Christ, ii. pp. 96-172 (Eng. tr.); J. S. Mill, Three Essays on Italiguon (negative); Duke of Argyll, The Reign of Law; Matthew Arnold, Literature and Doyma and God and the Bible (on the negative side); Supernatural Religion (negative); Temple, Bannyton Lectures; Westcott, Introduction to Study of Gospels, The Gospel of the Resurrection, and The Gospel of Life; Bruce, The Chief End of Revelation, and The Miraculous Element in the Gospel; Newman, Two Essays on Biracles; E. A. Abbott, Philomythus (a reply to the last); Boadder, Natural Theology; Illingworth, Divine Immanence; A. T. Lyttelton, Hulsean Lectures.

MIRIAM (270; LXX and NT Μαριάμ, Josephus Μαριάμνη).—1. The daughter of Amram and Jochebed, and sister of Aaron and Moses, being probably the eldest of the three. Though not mentioned by name, she was the sister who watched from a distance what would happen to Moses in the ark of bulrushes, and went and fetched her mother to act as nurse to her brother for Pharaoh's daughter (Ex 2\*ff. (E)). She took a leading part in the Exodus with her two brothers. She is called 'the prophetess, the sister of Aaron, and she led the women in their chant of victory after the passage of the Red Sea (Ex 15<sup>20</sup>. (E)). We find her during the wanderings combining with Aaron against Moses at Hazeroth because of his marriage with a Cushite woman. They claimed to have the power of prophecy equally with him, though Moses stood upon a higher plane in the world of revelation, which ought to have made them afraid to rebel. Miriam and Aaron were both severely rebuked, but the chief punishment fell upon Miriam. 'The cloud removed from over the tent; and, behold, Miriam was leprous as white as snow.' Aaron at once confessed their sin, and begged Moses' forgive-ness; whereupon Moses obtained Miriam's healing from God. She was, however, sentenced to exclusion from the camp for seven days, and the camp remained unmoved for that time (Nu 12<sup>1-16</sup>). Towards the end of the wanderings Miriam died at Kadesh, and was buried there (Nu 201). Two allusions are made to Miriam in other books of the OT. incitement to the strict observance of the law of leprosy in Dt 248 the people are bidden to remember her case: 'Remember what the Lord thy God did unto Miriam, by the way as ye came forth out of Egypt' (Dt 24°). In Mic 6° she is mentioned with Moses and Aaron as a leader with them of the people. Josephus asserts (Ant. III. ii. 4) that she was the wife of Hur, and grandmother of Bezalel. Jerome (de Loc. Heb. 108) says that her tomb was shown close to Petra in Arabia in his day. Josephus adds other details, which we need not trouble ourselves with; and the Koran identifies her with the Virgin Mary. The name 'Miriam' is of great interest to Christians as being the name by which the Virgin Mother of Christ was known.

2. A second Miriam is mentioned in 1 Ch 4<sup>17</sup> (Heb.). It has been supposed by Bertheau that the last clause of 1 Ch 4<sup>18</sup> should come before the three names of which this is one. If so, they would be the children of a daughter of Pharach.

H. A. REDPATH.

MIRMAH (πρηρ). — Eponym of a Benjamite family, 1 Ch 810 (Β Ίμαμά, Α Μαρμά, Luc. Μαρμά).

MIRROR (המְּמְבֵּר, מִּמְרֵ, מִׁרְ, מִׁרְ, מִׁרְ, מֹרְסִיּר, ἐσοπτρον, ἐσοπτρον).—Any surface so smooth and regular as to reflect uniformly the rays of light, produces, by the operation of simple optical laws, images of objects in front of or above it, which appear to the eye as if they were behind or beneath it. This property has been valued and applied as an aid to the toilet from very early times. The surface of a transparent substance like glass or still water may thus act as a mirror (Pr 2719), and even a black surface if highly polished may do the same. The higher the reflecting power of a substance, however, the brighter and clearer the image which it gives. A flat mirror produces images of the same size as the objects, a convex mirror diminishes the images, while a concave one (if sufficiently near) gives magnified images, which are erect or inverted according to circumstances. Modern mirrors are commonly made of glass coated on the back with an amalgam of mercury and tin. Mirrors for scientific purposes, however, are either of polished 'speculum metal' (a special alloy of copper and tin) or of glass silvered in front. The words 'glass' (in the sense of mirror) and 'looking glass' occur in AV (see the places below); but as all mirrors used in biblical times were metallic, so far as we can judge, RV substitutes for these terms the more general one 'mirror' (see GLASS, 2).

Our knowledge of ancient mirrors is derived (a) from literary notices, and (b) from actual specimens

that have been preserved.

(a) Under the first head we note only references to material, manufacture, and the like. Pliny (Nat. Hist. xxxvi. 26) describes what seems to have been an attempt to make glass mirrors at Sidon, but nothing is said as to the success of the experiment. Alexander of Aphrodisias, a writer of the 3rd cent. A.D., refers (Problem. i. 132) to glass mirrors coated with tin (Marquardt, Das Privatleben der Römer, p. 737, n. 2), and an Egyptian mirror made of glass is said to be in the museum at Turin (ib. n. 1). In Pliny's day, however, only metallic mirrors were in use. The ordinary material for them was an alloy of copper and tin, and the best of this kind were made at Brundusium. Silver mirrors were the finest, and were first made by one Pasiteles in the time of Pompey. The effects of the various kinds of curvature in mirrors were also known (Pliny, Nat. Hist. xxxiii. 45, xxxiv. 48). Seneca describes the phenomena of reflexion in a concave mirror (Nat. Quast. I. iv. 3), and speaks of gold and silver mirrors large enough to give an image of a whole human figure (ib. I. xvii. 8).

(b) The ancient mirrors still existing may be

classified as-

(1) Egyptian. These are made of an alloy of copper, highly polished, and are nearly circular with ornamental handles of wood, stone, or metal. They are described and figured in Wilkinson, Ancient Egyptians, ii. 350 ff. (2) Etruscan. These have been found in great numbers in the ruins of Præneste and in other Etrurian burial-places. They are round or pear-shaped, with handles attached, and are remarkable for the elaborate engravings of mythological scenes on their backs. See Gerhard, Etruskische Spiegel, i. 78 ff., and the plates in the other 4 vols. (3) Roman. The mirrors of this class are mostly circular. Some have handles and some are without them. The term for the latter variety was orbis (Mart. IX. xvii. 5). Among those found at Pompeii some are square (Overbeck-Mau, Pompeii\*, p. 453). (4) Greek. Specimens of these were unknown till 1867. They are of two kinds: circular discs with handles in the form of

statuettes, and box mirrors consisting of two discs which fit into one another and are sometimes hinged together, the outer surface of the polished disc being ornamented in low relief and the inner surface of the other being engraved.

SHITACE OF the other being engraveu.

LITERAFURE —De Witte, Les miroirs chez les anciens; Bauermeister, Denkmäler des Classischen Alterthums, illi. 1690-3; Marquardt, Das Privatleben der Römer, p. 669 fl.; Collignon, Manuel d'Archéologie Greoque, 840 fl.; Mylonas, Ελληνικώ κάνοντρα; Seyffert, Dictionary of Classical Antiquities, by Nettleship and Sandys, s.v. Mirror'; Guhl and Köner, Life of the Greeks and Romans, 184, 499.

The following are the Scripture allusions to mirrors. In Ex 388 the laver of the tabernacle is said to have been made of 'the mirrors' (AV 'looking glasses,' AVm 'brasen glasses') of the serving women.\* This implies that they were made of metal (see BRASS). The Heb. is 777 (LXX κάτοπτρον), a word which is elsewhere rendered 'vision.' In Job 3718 the sky is compared for strength to a molten 'mirror' (Νη, LXX δρασις ἐπιχύσεως, AV 'looking glass'). The whole verse embodies the ancient conception of the sky as a hard metal-like solid. The verb at the beginning ('spread out' AV and RV) is νρη 'to beat, beat out,' from which comes the term γρη ('firmament') applied to the sky (see Cosmogony). In Is 328 'hand mirrors' (AV 'glasses') are named among the articles of female luxury denounced by the prophet. The Heb. is γγ, and the general idea of the word appears to be that of a smooth flat surface. It occurs again in Is 81, where it is rendered 'tablet' in RV and 'roll' in AV. In late Heb. it came to mean the blank margin of a book. In the former passage, however, LXX understands by νη, and renders by διαφανή Λακωνικό.

and renders by διαφανή Λακωνικά.

In Apocr. and NT fσοπτρον takes the place of the usual classical word for mirror, κάτοπτρον. In Wis 728 wisdom is called the unspotted 'mirror' of the working of God. In Sir 1211 the persistent malice of an enemy is compared to the rust on a 'mirror' (AV 'looking glass'), which it is difficult to wipe away completely—a metallic mirror being clearly referred to. In 1 Co 1312 the spiritual knowledge of the present life is likened to the dim perception of images in a 'mirror' (AV 'glass'). In Ja 1225 the Christian law of liberty is described figuratively as a 'mirror' (AV 'glass'). The careless hearer of the law, who does not obey it, is compared to one who looks at himself in the mirror and forgets the reflected image as soon as he has turned away from it, while the obedient disciple is likened to one who keeps gazing steadfastly into the mirror, and who thus has the image of what he ought to

be always before the eye of his soul.

The verb karonrolferbal occurs once (2 Co 318). Here AV has 'beholding as in a glass' the glory of the Lord, RV 'reflecting as a mirror,' and RVm 'beholding as in a mirror.' The translation of the word is closely connected with the interpretation of the context, and the two renderings in RV mark the wide divergence which exists among scholars and commentators with regard to the passage. For the new translation 'reflecting' there may be quoted Chrysostom, Theodoret, Luther, Bengel, Billroth, Olshausen, and, more recently, Schmiedel, and Mayor (on Ja 128). The old rendering 'beholding' is supported by Grimm, Winer, Meyer, Heinrici, Beet, and Denney, and should, we think, be preferred. The idea of 'reflexion' does not accord well either with the context or with the usage of karonrolferbal in other writers. The simple physical fact that one who beholds a bright light reflected in a mirror has his own face illumined by it at the same time is taken as an illustration of the transformation of the Christian's character, which comes about through beholding the glory of God

\* On this passage see Ismar Perits in JBL, 1898, Pt. ii. p. 145 f.

reflected in Christ, or the glory of Christ reflected in the gospel.

JAMES PATRICK.

MISAEL (B Μεισαήλ, A Μισ-).—1. 1 Es 9<sup>44</sup> = MISHAEL, Neh 8<sup>4</sup>. 2. Thr <sup>66</sup> (LXX, Dn 3<sup>58</sup>), elsewhere MISHAEL, the Heb. name of one of Daniel's three companions in captivity; called MESHACH in Babylon (Dn 1<sup>65</sup>.).

MISAIAS.—See MASIAS.

MISGAB (13μφη with art.; B 'Aμάθ, AN τδ κραταίωμα). — Mentioned along with Nebo and Kiriathaim in the oracle against Moab, Jer 48 [Gr. 31]<sup>1</sup>. Perhaps it is not intended as a proper name. The same Heb. term occurs in Is 25<sup>12</sup>, where both AV and RV tr. 'high fort' (cf. 2S 22<sup>3</sup>, Ps 9<sup>9 bis</sup> 18<sup>2</sup> 46<sup>7.11</sup> 48<sup>8</sup> 59<sup>9.16.17</sup> 62<sup>2.6</sup> 94<sup>22</sup> 144<sup>2</sup>, Is 33<sup>16</sup>). C. R. CONDER.

MISHAEL (מִישָׁאַל [the derivation is disputed. It comes either from אָל בְּיִי שָׁ אַל (Who is what God is?' or from מְי שָׁהָּ אַל (Who is like God?' In either case it is sufficiently near such Assyrian forms as Mannu-ki-ilurabu, Manum-ki-Ashur]; LXX Μισαήλ, Μεισαήλ, and [Lv 10<sup>14</sup>] Μισα-δαί).—1. According to Ex 6<sup>22</sup> Mishael belonged to the Kohathites, and stood fourth in descent from Levi. At Lv 104 he and his brother Elzaphan are ordered to carry from before the sanctuary out of the camp the dead bodies of Nadab and Abihu, who have perished because of their presumption. Both of the passages in which Mishael is mentioned are attributed to P. 2. A man named Mishael was one of Ezra's supporters in his great work of reform. He was amongst those who stood at the scribe's left hand on the great pulpit of wood from which the law was read aloud to the people, Neh 84. These men, twelve in number, one for each tribe (as Ryle appears to think), or thirteen (MT and LXX), or fourteen (Guthe on 1 Es), have been supposed to be the chief priests of the course which was at that time performing the temple service. But there is nothing in the text to support this. Almost certainly they were either Levites or laymen. 3. One of Daniel's three companions, Dn men. 3. One of Daniels 16f. 11. 19 217. See MESHACH. J. TAYLOR.

MISHAL (ὑκψρ).—A town of Asher, Jos 19<sup>26</sup> (Μαασά), given to the Gershonite Levites, 21<sup>20</sup> (Β Βασσελλάν, Α Μασαάλ)=1 Ch 6<sup>74</sup> [Heb. <sup>59</sup>], where, perhaps by a clerical error, it is called ὑψρ Mashal. In this last instance B has Μασαά, Α<sup>Δ</sup> Μασάλ. The site is unknown. It is only an inference from the context when Eusebius (Onomast. 280. 139) says Μασάν συνάπτει τῷ Καρμήλφ κατὰ θάλασσαν.

C. R. CONDER.

MISHAM (ομφο). — Eponym of a Benjamite family, 1 Ch 8<sup>13</sup> (B Μεσσαάμ, Α Μισαάλ, Luc. Μεσοάμ).

MISHMA ( $\nu\nu\rho\nu$ ; in Gn  $25^{14}$  Michaelis points  $\nu\nu\rho\nu$ ). — 1. A son of Ishmael, Gn  $25^{14}$  (A Masua, Luc. Masua')=1 Ch  $1^{20}$  (B Maua, A Masua'). The tribe of which Mishma is the eponym has not been identified. The name has no connexion, according to Dillmann, either with the Massaupares of Ptolemy (VI. vii. 21), or with the place called el-Mismiye in the Lejjah, south of Damascus. He thinks that a trace of the name may remain in one or other of the two places — Jebel Misma', south-east of Kâf, east of the Wâdy Sirhân, in the latitude of Idumsa, or another Jebel Misma' farther south, towards Teimâ, where inscriptions have been found. 2. The eponym of a Simeonite family, 1 Ch  $4^{20}$  (B A Masua'). J. A. Selbie.

MISHMANNAH (профр). — A Gadite chief who

joined David at Ziklag, 1 Ch 1210 (Β Μασεμανή, A Μασμάν).

MISHNA .- See TALMUD.

MISHNEH (πμψρ), 2 K 2214, 2 Ch 3422, Zeph 110 RVm.—See COLLEGE.

**MISHRAITES** (ὑητὰνῖ). — Λ family of Kiriath-jearim, 1 Ch 2<sup>63</sup> (Β΄ Ημασαραείμ, Α – είν). No place of the name of Mishra' is mentioned in OT, and the MT of the closing verses of 1 Ch 2 is involved in considerable uncertainty. See Kittel in SBOT, ad loc.

MISPAR (ηφρρ).—One of the exiles who returned with Zerubbabel, Ezr  $2^2$  (B Μαλσάρ, A Μασφάρ), called in Neh  $7^7$  Mispereth (ηγφρρ, B Μασφέράν, A Μαασφαράθ, Ν Μασφαράδ).

MISPERETH .- See preceding article.

MISREPHOTH-MAIM (DID πλογμό, Μασερών, Μασρεφωθμάειμ, Μασερεθμεμφωμάιμ).—One of the places to which Joshua (118) chased the Northern Canaanites after their defeat near Lake Merom. The older explanation, following the Jewish commentators, was to translate the words 'burning of waters,' and to refer them to local hot springs or smelting-works (cf. Ges. Thes.). This ignored the fact that the

words are Canaanite in origin, probably assimilated to like-sounding Hebrew words.

Others gave the site as Zarephath (1 K 17°) on the ground of the similarity of name, and because 'Zarephath belongeth to Zidon,' which place occurs in the verse from Joshua.

Most probably we should revert to a suggestion of Thomson (Land and Book, ch. xv.), who identified it with Musheirifeh or 'Ain Meserfi, a site on the coast, S. of Ras en-Nakhurah or the Ladder of Tyre (Seetzen, ii. 109; Scholz, Reise,

154).
This position would agree much better than This position would agree much better than Zarephath with the only other passage in which the name occurs (Jos 13<sup>6</sup>). There the Zidonians, who are not yet dispossessed, are said to extend from Lebanon to Misrephoth-maim. We should scarcely expect Zarephath, a place which lay between Tyre and Zidon, to be given as the S. point of the dominion of Zidon, while the Ladder of Tyre might wall he so named.

A. C. Welch. might well be so named. A. C. WELCH.

MITE.—See MONEY.

MITHKAH (¬¬¬¬¬¬¬, Матекка́ В, Маθекка́ АF, Methca Vulg.).—One of the 12 stations following Hazeroth, Nu 33<sup>28.29</sup>. See Exodus and Journey to Canaan, vol. i. p. 805a, § iii.

MITHNITE (יְּמְמְתִי). - 'Joshaphat the Mithnite' appears in the catalogue of David's officers in 1 Ch 11<sup>th</sup> (Β ὁ Βαιθανεί, Α ὁ Μαθθανί). This gentilic name would imply the existence of a place called no (however we may vocalize that word), which, however, is nowhere mentioned in OT. Kittel (in SBOT, ad loc.) suggests that the LXX (A) and Vulg. (the latter has Mathanites) readings appear to have the in mind in which case the gentilic rowse to have po in mind, in which case the gentilic name would be vocalized הפתני.

**MITHRADATES.**—1. (A  $M\iota\theta\rho\alpha\delta\delta\sigma\eta$ s, B  $\cdot\rho\iota\delta$ , AV Mithridates), 1 Es  $2^{11}$  (LXX  $^{10}$ ) = MITHREDATH, Ezr  $1^{8}$ , the treasurer of Cyrus king of Persia. 1 Es,

Persian officer stationed in Samaria under Arta-

MITHREDATH (πητης, Pers. = 'given by Mithra, or the sun'; Μιθραδάτης; 1 Es 2<sup>11</sup> Μιθραδάτης Β, ν. <sup>16</sup> B<sup>ab</sup> A'; Mithridates).—1. The Persian treasurer, whom Cyrus commanded to deliver to Sheshbazzar, the prince of Judah, the sacred vessels taken from the temple by Nebuchadrezzar (Ezr 18).

2. Apparently a Persian officer stationed in Samaria. Together with his colleagues he wrote to Artaxerxes (Longimanus) to hinder the rebuilding of the walls of Jerusalem (Ezr 47). The correspondence between the Samaritans and the Persian court probably took place in the interval between the missions of Ezra and of Nehemiah.

MITRE.—1. The word used in AV for named (LXX  $\mu l\tau p \alpha$  or  $\kappa l\delta a p \iota s$ ), the official head-dress of the Heb. high priest (Ex 28<sup>4</sup> · 3<sup>7</sup> · 3<sup>9</sup> 29<sup>9</sup> 39<sup>28</sup> · 3<sup>1</sup> Lv 8<sup>9</sup> 16<sup>4</sup>; cf. also Ezk 21<sup>26</sup>). RVm has 'turban,' except in Ezk 21<sup>26</sup>, where AV has 'diadem' and RV 'mitre,' without marginal note. The head-dress of the ordinary priest was אַפֶּבְאָבָי (AV bonnet, RV headtire).
The mitre of the high priest was, like the headtire of the subordinate priests, of fine linen, and was or the subordinate priests, of line linen, and was made from a piece, said by the Rabbins to have been sixteen cubits long, rolled into a sort of turban. Hence its name, from אין 'to wind.' On the front of the mitre, just above the high priest's forehead, was the sacred crown (see CROWN, 2). The precise shape of the mitre is, however, disputed. It is frequently represented as lower, rounder, fuller at the sides, and resting more lightly on the head the sides, and resting more lightly on the head than the headtire of the ordinary priests, which was shaped somewhat like a helmet (so Braunius, de Vest. Sacerd. Heb. lib. ii. cap. 21). On the other hand, Bähr (Symb. ii. p. 110) maintains that it was higher and longer, though perhaps, as Maimonides seems to imply, with the top bending over. The description of Josephus (Ant. III. vii. 6, The (high priest's) hat was similar to that used by all the priests, but above it was sewn another embroidered with blue') has given trouble to archæologists; and Philo (de Vit. Mos. iii. 11) seems to speak of a third part of the head-dress, besides mitre and crown, which he calls  $\kappa \delta a \rho i s$  or diadem. The language of OT is, in fact, quite indefinite as to the shape of the mitre, and Philo and Josephus may either have misinterpreted its expressions, or have had in mind later embellishments. The mitre was as representative of the priestly dignity as the crown or diadem was of the royal. Hence in Ezk 2126 'Remove the mitre; and take off the crown' (RV), may signify the desolation of both priesthood and monarchy.

2. Another word (1713) from the same root is in Zec 35 trd 'mitre' in AV and RV (RVm 'turban or diadem'), and is applied, apparently as a synonym of the technical word described above, to the head-dress which the prophet saw placed on Joshua the high priest. It is also found in Job 29<sup>14</sup> (AV 'diadem,' RVm 'turban') in a figurative description of a righteous man arrayed in the garments of nobility; in Is 3<sup>23</sup> (AV 'hoods,' RV 'turbans') as an article of elaborate female attire (cf.  $\mu l \tau \rho a$  in Jth 16<sup>8</sup>, Bar 5<sup>2</sup>); and in Is 62<sup>3</sup> Kerê (AV and RV 'diadem') as a symbol of the honour which J" will place upon His people. See HEAD-DRESS

G. T. Purves. MITYLENE (Μιτυλήνη), or Mytilene (as usually spelt on coins, cf. Blass on Ac 11<sup>14</sup>), the chief town of Lesbos, lies on the E. side of that island, about 10 by translating his title  $\gamma_{2}$  correctly with  $\gamma_{2}$  or 12 miles from the coast of Asia. M. itself was  $\phi \dot{\nu} \lambda a \xi$ , shows itself independent of the LXX of Ezr, which renders it as a proper name  $\Gamma a \sigma \beta a \rho \eta \nu \dot{\nu}$ . (BA\*  $M \cdot \theta \rho a \delta$ -,  $A^{*rd}$  Bab  $M \cdot \theta \rho \iota \delta$ -, AV Mithridates), 1 Es  $2^{16}$  (LXX  $^{18}$ )=MITHREDATH, Ezr  $^{47}$ , a other on the S. St. Paul on his return from his Third Missionary Journey had arrived at Troas from Philippi, and, after a week's stay at the former place, had preferred travelling by land to Assos, while the ship rounded the promontory of Lectum and picked him up on its S. voyage. His motive for going by land may have been to remain longer with the disciples at Troas, or to be assured of the complete recovery of Eutychus. After St. Paul was taken on board at Assos, the ship sailed to Mitylene (Ac 2014) and stayed there for the night. This was the usual practice for vessels in the Ægean Sea, where, during the summer, the N. wind blows during the day but falls in the afternoon. An early start would be made each morning before sunrise, so as to get the full benefit of the wind. After leaving Mitylene (Ac 2015) the travellers sailed to a point opposite Chios, probably near Cape Argennum.

M., which has in later times given its name to the whole island of Lesbos, was a town of some importance in early history. It joined the Athenians in the Peloponnesian war, revolted from them, and was punished by almost complete annihilation. It made an alliance with the Macedonians under Alexander the Great, it offered a stubborn resistance to the Romans in the Mithridatic war, and was afterwards made a free city by Pompey. There is no record of any Christian church existing in the island at the time of St. Paul's visit. M. formed part of the eastern half of the Roman empire, and was conquered in A.D. 1462 by the Turks, under

LITERATURE.—Ramsay, St. Paul, p. 291 ff.; Bouillet, Dict. Univ., s.v.; on the present town see Tozer, Islands of the Agean, 121, 134 f., and on the ancient city, ib. 136.
C. H. PRICHARD.

whose power it has since remained.

A similar criticism of AV and RV applies to Neh 133. There the Heb. is אַרְעֶרָה, the LXX renders the noun as before, but Vulg. has omnem alienigenam, which Wyclif renders by 'alien,' and the early English versions 'every one that had mixte himself therin,' a fair rendering of the Hebrew.

The same Heb. word occurs, but with the def. art. (Συη), Jer 50<sup>37</sup> (σύμμικτος), Ezk 30<sup>5</sup>, where it prob.

means 'mercenaries,' and (the ν being pointed with Seghol) Jer 25<sup>20. 24</sup> (σύμμκτος). Both AV and RV translate 'the mingled people' in these passages, in 25<sup>20</sup> the people are in or near Egypt, in 25<sup>24</sup> they are to the S.E. of Palestine on the borders of Arabia. The same Heb. consonants (differently pointed) denote Arabia; and for the parallel passages 1 K 10<sup>15</sup>, 2 Ch 9<sup>14</sup>, where both punctuations occur, see Arabians. The meaning of the Heb. word in the account given in Neh is evident. The strangers with whom Israel had contracted alliances, and the children of such alliances, formed the 'mixed multitude' or the 'mingled people.' The verb (in Hithpael) is used, Ezr 9², of these marriages, and Ps 106<sup>25</sup> of 'mingling with the heathen.' A similar condition of affairs existed when the Israelites came out of their bondage in Egypt. The intercourse between Egypt and Israel continued, Solomon allied himself with Pharaoh's daughter, and the special permission for the children both of Edomite and Egyptian parents to enter into the congregation (Dt 23<sup>2</sup>) shows that alliances between Israel and these nations were recognized. After the return from captivity a strict rule of severance from surrounding nations was enforced.

A. T. CHAPMAN.

MIZAR.—Ps 426 [Heb.7] reads, following the MT,

'O my God, my soul upon me\* is cast down;
therefore do I remember thee from the land of
Jordan and the Hermons, from the mountain of
Mizar' (so Driver, Parallel Psalter, and [substantially] AV and RV; AVm and RVm suggest as an
alternative tr" of the last expression γυρς 'from
the little hill [or mountain], cf. LXX ἀπὸ δρους
μικροῦ, and Vulg. a monte modico). The question
is whether mizar is an appellative or a proper
name. If the latter, Mt. Mizar must have been
in the vicinity of (or perhaps a part of) † Hermon,
but it cannot be identified. In the former sense
(= 'a little thing,' 'a trifle') mizar occurs in Gn
19<sup>20-22</sup>, where by one of J's characteristic etymologies the substitution of the name Zoar for the
earlier Bela' is accounted for by Lot's plea, 'O let
me escape thither, is it not a little one (γυρς)?
... therefore the name of the city was called
Zoar' (γυς, i.e. 'pettiness,' 'petty town,' see Dillm
ad loc.). Cf. 2 Ch 24<sup>24</sup> συμη γυρς 'a small company
of men'; Job 8<sup>7</sup> γυρς γυρς 'a small company
of men'; Job 8<sup>7</sup> γυρς γυρς 'a small company
of men'; Job 8<sup>7</sup> γυρς γυρς 'a small company
of men'; Job 8<sup>7</sup> γυρς γυρς 'a small company

It is possible that we ought to understand the word in this second sense in Ps 426, the reference being to Zion, 'the little mountain,' in contrast to the giant Hermon (so Smend, Wellhausen, Siegried-Stade). The Psalm may be the expression of the feelings of an Israelite, who, when he has reached the northern boundary of the Holy Land on his way to exile, sends back his sighs to the temple-hill and its services. Of course this involves an alteration of the MT, but all that is necessary is to drop the D in DDD, which may easily have crept into the text by accidental repetition of the final letter of DDDD. This would give the rendering, 'I remember thee, thou little mountain, from the land of Jordan and the Hermons.' Wellhausen-Furness (in PB), reading, as above, D instead of DDD, tr. 'Therefore on thee do I think, thou diminutive mountain, above all the land of Jordan and of Hermon,' i.e. Zion is the one spot in all Palestine ('the land of the Jordan and of Hermon') which is

\* See note in Driver, Parallel Psalter, p. 464. † In which case 'the little hill of Hermon' of the Pr. Bk. may be materially correct, although as a translation of סַּרְטֹעִים

מתר מצער מענר it is, of course, quite inaccurate.

‡ 'Isaiah' elsewhere (1025 2917) uses កម្ពុជ្ជា (a word confined to Book of Is) in this sense. § Cf. Ps 68151, where the high mountains look askance at 'the

§ Cf. Ps (815t, where the high mountains look askance at 'the mountain which God hath desired for his abode' הָרֶר חָסֶר אֱלֹהִים').

ever present to the Psalmist's mind. Wellh. (in SBO?) remarks that the expression 'ittle 'ittle mountain,' for אָר צְעֵיר, is very strange. J. A. SELBIE.

MIZPAH and MIZPEH.—A name of several places and towns in Palestine. In most cases it is spelt (in AV) Mizpah, but in several instances Mizpah. The same variety of reading, אין סיר סיר אין, occurs in the original. In three cases only is Mizpah used with the definite article, viz. Mizpah Mizpeh used with the definite article, viz. Mizpeh a town of Judah (Jos 15<sup>28</sup>), Mizpeh a town of Benjamin (Jos 18<sup>26</sup>), and 'the watch-tower of the wilderness' (2 Ch 20<sup>24</sup>). In the other cases the article is omitted, viz. 'the Valley (bik ah) of Mizpeh' (Jos 11<sup>8</sup>), Mizpeh of Gilead (Jg 11<sup>26</sup> bid), Mizpeh of Moab (1 S 22<sup>3</sup>); but in these last two instances it would in any case be without the article, as it is followed by a word in the genitive.
Mizpeh (הְּשָּאָה) is derived from אָני to look out, to

Mizpeh (1945) is derived from 194 to took out, to view; from the same root are derived the proper names Zephath (Jg 11), Zephathah (2 Ch 14<sup>10</sup>), Ramathaim-zophim (1 S 1<sup>1</sup>; an impossible name),\* the field of Zophim (Nu 23<sup>14</sup>). The Targum translates both Mizpeh and Zophim by MMDD 'place of view,' watch-tower' (?).† Mizpeh is used to denote either a town (Jos 15<sup>38</sup> 18<sup>26</sup>, Jg 11<sup>29</sup>, 1 S 22<sup>3</sup>) or a watch-tower (2 Ch 20<sup>24</sup>, Is 21<sup>8</sup>). In the two cases where it is read to denote with tower it is strengthful. is used to denote a watch-tower, it is translated so both in AV and RV, and by LXX  $\tau h \nu \ \sigma \kappa \sigma \pi i \alpha \nu$ ; in the other cases the AV and RV render it as a proper name.

Mizpah is always used with the article except in Hos 5<sup>1</sup>. It is used only in connexion with the land of Mizpah, near Mount Hermon (Jos 118), the site of the heap of stones of witness on Mount Gilead, and the sanctuaries of J" in Benjamin and near Shiloh. It is possible, then, that Mizpah represents an aboriginal name connected with a sanctuary, and hence the play upon the word Mizpah, and its root zānhāh ('to look out or view'), between Laban and Jacob (Gn 3148).

The LXX gives a variety of readings for Mizpeh and Mizpah.

The LLXX gives a variety of the same of the valley of Mizpeh in the Lebanon (Jos 118).

(a) B Μασσάχ, A Μασσφά. The valley of Mizpeh in the Lebanon (Jos 118).

(b) Μασφά. Town of Benjamin (Jos 188).

(c) Β Μασσμιά, Α Μασφά. Τονη of Benjamin (Jos 1826).

(d) Μα(ε)σηφά. Τονη ο΄ Μολο (18 228).

(e) Β τὸν συστιάν, Α τῆς συστιάς. Μίχρεh of Gilead (Jg 1129).

(f) τὸν συστιάν. The watch-tower (2 Ch 2024, Is 218).

(1) την σκοσιας. The Watch-tower (2 On 2022, 18 219).

Mizpah—

(a) ή δρασιε ('that which is seen,' 'a vision'). The scene of the covenant between Jacob and Laban in Gilead (Gn 3143).

(b) B Μασσιυμάν, Α Μασσημάθ. The land of Mizpah under Hermon (Jos 118).

(c<sub>1</sub>) Μασσιμάν, Τhe Mizpah of Gilead, where Jephthah's house was (Jg 1111. 34). Mizpah near Shiloh, where Israel met before the Lord (Jg 201. 3). Mizpah of Benjamin, where Gedaliah ruled Israel (2 K 2523 [B Μασσημάθ], Jer 408-13 411. 10 [Gr. 478-15 481. 10]). Mizpah near Shiloh (Jg 211. 5. 8).

(ω<sub>2</sub>) B Μασσημάθ, Α Μασημάν, Μασσημά (Μίχραh of Benjamin, where Gedaliah ruled Israel (2 K 2523).

(d) Μασφί. Mizpah of Benjamin, where Gedaliah had ruled Israel (Neh 319).

(e) Μασφά. Mizpah of Benjamin in time of Asa (2 Ch 166).

166).

(f) η σκονιά. Mizpah of Gilead (Jg 10<sup>17</sup>). Mizpah of Benjamin in time of king Asa (1 K 15<sup>22</sup>). Josephus gives Μασφά (Ant. VI. iv. 3, VIII. xii. 4) for Mizpah of Benjamin, Μασφαθά (Ant. v. vii. 9) and Μασαφθά (X. ix. 2) for Mizpah both of Benjamin and Cilia. Gilead ; see also Ant. VI. ii. 1.

These differences of name may give some indication of the views held by the LXX as to the location of the various Mizpehs and Mizpahs. The two in the Lebanon and the town of Judah have special names; the remainder, viz. Mizpah or

See Comm. ad loc. and art. RAMATHAIM-ZOPHIM.

† Neither מצפה nor מצפה is necessarily a watch-tower; 'ם 'place of watching,' which may have been merely a hill.

Mizpeh of Gilead, Shiloh, Benjamin, and Moab, are given under the names of Μασφά, Μασσηφά. and  $M\alpha\sigma\sigma\eta\phi d\theta$ . But Mizpah of Gilead is once translated as 'the watch-tower,' and Mizpah of Benjamin is given (in 2 Ch 16°) as  $M\alpha\sigma\phi d$ , and in an identical passage (in 1 K 15°2) as 'the watch-tower.' The inference may be drawn that, according to the view of the LXX, there was a Mizpeh or watchtower' in Gilead, not far from the meeting-place of Jacob and Laban, and this may have given rise to the play upon the word in naming 'the heap of witness' Mizpah. As Mizpeh was a watch-tower over the land of Gilead, so the Lord was 'the watch-tower' or 'witness' to the covenant at Mizpah; and thus the two names would be bound together; and when the ark of the covenant in after-ages was stationed at Shiloh, Gibeah, the meeting-place of the people before the Lord, would be the Mizpah, while the nearest high place or 'watchtower's which for military purposes they would constantly have in use would be Mizpel. The Rabbins took a similar view as to the word 'Ramathaim-zophim,' to which they gave the impossible translation 'Ramotha of the scholars of the prophets,' regarding the prophets as watchmen.

There are at least seven distinct places alluded to under the names of Mizpeh and Mizpah,

namely-

1. Mizpah (הפצבה, Samar. המצבה, i.e. mazzēbāh= the pillar). — One of the names of the pillar (mazzōbāh) and heap of stones (gal) put up by Jacob and his brethren in the mountain of Gilead in token of God being a witness to the covenant made that day between Jacob and Laban (Gn 3146-52).\* The other names were Jegar-sahadutha (which see) and Galeed, the former being the western Aramaic for the 'heap of the testimony,' the latter being the Hebrew equivalent of the same (see GALEED, GILEAD).

The name Mizpah, if it had the sense of a place where the Lord watched between two parties to a covenant, may have come to be applied to the places where the people held solemn assembly for deliberation in time of difficulty near the sanctuary of Jehovah, and it thus would be likely to be found near every place where the ark of the covenant or tabernacle remained for any time in addition to its original position in Gilead. It appears in connexion with the battles between all Israel and the Benjamites a few years after the death of Joshua, and is then evidently near Bethel and Shiloh, and again it appears in its original position some 150 years after in the time of

Jephthah.
There is no record showing to what extent this ancient sanctuary in Gilead was used during the times of the Judges, when the ark and tabernacle were at Gilgal and Shiloh, but at the time that the children of Israel were oppressed by the children of Ammon, and in their misery put away their false gods, the Ammonites were encamped in Gilead and all Israel at Mizpah (Jg 10<sup>17</sup>). It is apparent from the context that this was the original Mizpah of Gilead and not that of Shiloh or Benjamin, and from the expression 'before the Lord in Mizpah 'it is surmised that the ark was present with the host of Israel (Speaker's Comm. on Jg 1111). If this were so, it was sent over without the consent of the tribes of Israel on the western side of Jordan (Jg 121), as Jephthah's action in fighting the Ammonites without the assistance of western Israel was called in question by them. The whole account would lead to the

\*On this passage see Dillmann's note. The name 'Mizpeh' comes in very strangely. It is plain that there is an allusion to the mappebah of the preceding context, as well as a desire to explain the origin of a Watch-Tower in the neighbourhood. See art. JACOB, vol. ii. p. 529.

inference that the eastern tribes assembled as a solemn conclave at the ancient scene of the covenant between Jacob and Laban at Mizpah, and then elected Jephthah as their captain-general to lead them to victory against the Ammonites, without any recourse to Shiloh. He then in the spirit of the Lord passed over Gilead and Manasseh, and over Mizpah of Gilead, and from Mizpah of Gilead to the children of Ammon (Jg 11<sup>29</sup>). The LXX give the term 'watch-tower' both for the Mizpah where the eastern tribes of Israel encamped (Jg 10<sup>17</sup>) and for the Mizpah over which Jephthah passed. On Jephthah's return from his victory over the Ammonites he came to his house at Mizpah, which the LXX render Μασσηφά, as they name the spot near the sanctuary where the tribes gathered before the Lord. There would thus appear, in the view of the LXX, to have been the Mizpah adjoining the sanctuary where the tribes gathered before the Lord and where Jephthah dwelt, and the Mizpeh on high ground near where the tribes encamped and where Jephthah passed over with them.

The topographical indications as to the position of Mizpah of Gilead are meagre. It was in the mountains of Gilead (Gn 31<sup>23</sup>), and it was north of the Jabbok, because Jacob-crossed that torrent after parting with Laban. It was a well-indicated boundary, to be used in succeeding ages between the Hebrews and the Aramæans (Gn 31<sup>22</sup>). It was in the vicinity of a Mizpeh, watch-tower, or commanding situation (Jg 11<sup>29</sup>). Beyond this there can be little but conjecture. There is one indication, however, which seems to limit the line of Jacob's journey east and west: he was coming from Padan-aram in the north-east, and with his herds and flocks would naturally travel along the level tableland to the east of the broken country falling towards the Jordan Valley, near the line of the present *Derb el-Hajj*, which avoids crossing the *Jabbólk* by making a little detour to the east. Whether he came by Damascus or by Bozrah, he would arrive north of the Jabbok by passing through the vale in which Jerash is situated. It is suggested that this is the site of the meeting of Jacob and Laban. From the abundance of its waters, enough for an enormous city, this site must from the earliest times have been a restingplace for herds and flocks on their travels. Near to these waters (1960 ft.) are the commanding situations or Mizpehs, Neby Hûd (2400 ft.) and Jebel Hakûrt (3480 ft.), and to the west are dolmens near the village of Sûf. Sir George Grove has suggested that the site of Mizpah at Jerash is also identical with those of Ramath-mizpah and Ramath-gilead (which see); and this seems to be the most satisfactory identification.

2. Mizpah (תְּשְׁבֶּעְהַת).—The events related in Jg 19

2. Mizpah (תְּשְׁבְּשְׁתְּח).—The events related in Jg 19 to 21 concerning the extermination of all the Benjamites save 600 by united Israel, though placed chronologically after the time of the Judges, are, from the mention of Phinehas, the grandson of Aaron (20<sup>28</sup>), usually considered (so far as the account is historical) to have occurred about 20 years after the death of Joshua, at a time when there were no Judges in the land and the Israelites forsook the Lord and served Baal and Astarte (2<sup>18</sup>). Josephus also places these events at the commencement of his account of the Judges

(Ant. v.).

The tabernacle with the ark had been set up at Shiloh in Ephraim, 10 miles north of Bethel, before the death of Joshua, and remained there as its chief and permanent residence until the death of Eli; but it would appear from the account here given (Jg 20. 21) that the ark of the covenant was carried about from place to place in time of war to the spot where the people assembled, and vol. III.—26

in later years to where the Judge resided (Speaker's Comm. on Jg 20). The positions of the places mentioned, so far as they are at present identified, are: Gibeah (Tell el-Fall), 4 miles north of Jerusalem; Bethel (Beitin), 6 miles north of Gibeah; and Shiloh (Seilan), some 10 miles north of Bethel. A Levite was on his way to the house of the Lord, probably at Shiloh (Jg 1831 918), possibly at Bethel, when he turned aside to spend the night at Gibeah of Benjamin close to Ramah (er-Râm), and here his concubine was outraged to death by Benjamites of that city. This deed united all Israel against Benjamin, and they gathered together as one man unto the Lord at Mizpah (in AV it is given as

Mizpeh throughout), Jg 201.

In order to understand the account, the question 'where was Mizpah?' requires to be answered. It has usually been understood that the Mizpah here spoken of and that where Samuel gathered the people together (1 S 7) were identical. But there is no necessity for this conclusion: and the confusion of the two places renders the accounts of the occurrences unintelligible. The Mizpah of Samuel was in the heart of Benjamin near to Jerusalem, and it would have been impracticable for all Israel to have gathered together on this occasion before the Lord, at such a crisis, in the midst of the people with whom they were about to wage a war of extermination (but see Budde, 'Richter,' in Kurzer Ildcomm. ad loc.). The two Mizpahs may have been quite distinct: they were the places of assembly of the people in solemn conclave near a sanctuary or where the tabernacle and ark were, and in this particular case Mizpah would appear to have been some place of assembly between Shiloh and Bethel, probably close to Shiloh, where the tabernacle was. This is accentuated by the statement (20°) that the children of Benjamin heard that the children of Israel had gone up to Mizpah: suggesting certainly that Mizpah was outside the boundaries of Benjamin.

side the boundaries of Benjamin.

3. The Mizpeh (Jos 18<sup>26</sup>), elsewhere the Mizpah.—Mizpah of Benjamin is first (?) mentioned in the early days of Samuel (1 S 7<sup>5</sup>). At this time Shiloh had fallen from its position as the sanctuary of J" (1 S 4<sup>4</sup>, Jer 7<sup>12</sup> 26<sup>9</sup>) on account of the wickedness of Israel, the ark of the covenant had been captured by the Philistines, had been released by them, and abode in Kiriath-jearim twenty years (1 S 7<sup>2</sup>), during which time the children of Israel had fallen into idolatry and suffered severely at the hands of the Philistines, and then repented, and at the exhortation of Samuel put away the baals and Ashtaroth, and served the Lord only. Then Samuel with all the authority of judge and prophet gathered all the children of Israel to Mizpah to pray for them unto the Lord, as Joshua had gathered the tribes together to Shechem (Jos 24<sup>1</sup>).

The question again arises, Where was this Mizpah where the tribes gathered together before the Lord, and drew water and poured it out before the Lord, and fasted and confessed their sins? There is diversity of opinion as to the position of Samuel's residence, Ramah or Ramathaimzophim (?); but that which lends itself most readily to the account of Samuel's life is a few miles north of Jerusalem, either Nebī Samīl or some point on the high ridge north of Shāfāt (so van de Velde, Dillm., Tristram, G. A. Smith, etc.); and here Samuel built an altar, which may have been in connexion with the tabernacle, and this Mizpah may have been in close proximity to Samuel's residence. If this were so, the position near Shāfāt is most suitable, as it will be shown that in afteryears Mizpah appears to have been located not very far north of Jerusalem and overlooking it.

\* e.g. by Moore (Judges, p. 423), Budde (op. cit. supra), Buhl (GAP 168), and the majority of recent scholars.

We can now follow the changes which, upon the views adopted in this article, took place in the position of the Mizpah. First, it named the spot of the covenant between Jacob and Laban in Gilead; secondly, we find it attached to the place of gathering of the people before the Lord in Shiloh, where the tabernacle was; then again we find the people gathering together before the Lord at the original 'heap of witness' in Gilead in the time of Jephthah; and, lastly, it names the spot where Samuel gathered Israel before the recently-erected tabernacle near Ramah to serve God and resist the Philistines, and subsequently to choose the first king over Israel. Here the tabernacle remained for about fifty-seven years, until the dedication of the temple of Jerusalem; and in process of time the name Mizpah appears to have clung to this spot, for we find that king Asa built Geba and Mizpah (2 Ch 16°); and it is to be noted that the LXX call it in one case Μασφά and in the other την σκοπιάν (1 K 15<sup>22</sup>). During the days of the temple of Jerusalem the sanctuary at Mizpah would lose prestige; but it must have retained the affection of the people, for during the Captivity, when Jerusalem lay desolate, Mizpah became the seat of government of the ruler of Judæa (Gedaliah) under the king of Babylon, 2 K 25<sup>22</sup>, Jer 40<sup>667</sup>. 41¹.

At the time of the rebuilding of the temple the district of Mizpah and men of Mizpah are spoken of and it is alludd to as (the seaf the search).

of, and it is alluded to as 'the seat of the governor on this side the river' (Neh 3"). The account (in Jer 41°) of the pilgrims who were met by Ishmael out of Mizpah on their way southward from Shechem, Shiloh, and Samaria with offerings to the house of the Lord, shows that Mizpah was on the high road from Shiloh to Jerusalem.

In the time of the Maccabees, Mizpah (Μασσηφά) appears again as a place of solemn conclave, 'where the Israelites assembled themselves together and came to Mizpeh over against Jerusalem, for in Mizpeh was there aforetimes a place of prayer of Israel' (I Mac 3<sup>40</sup>). The expression 'over against Jerusalem,' taken in conjunction with the fact stated in Jer 41° that Mizpah was on the north road leading from Shiloh to Jerusalem, seems absolutely to fix Mizpah to a spot immediately north of and close to Jerusalem, as will be seen also to have been the view taken by Josephus. For the relation of Mizpah to Nob, and the view held by some that the two places are identical, see art. Nos.

4. 8. The land of Mizpah (προφή κατ την Μασεύμα, terra Mispha, Jos 118). The valley of Mizpeh (πυρφ προς, Α των πεδίων Μασσηφά, campus Masphe), Jos 11<sup>a</sup>.—These two places, which, according to Dillm. (Jos. ad loc.) and Buhl (GAP 240), should perhaps be regarded as one and the same, are mentioned in connexion with the battle which took place at the waters of Merom, when Joshua led Israel against Jabin king of Hazor and the northern tribes. Joshua chased them (Jos 118) unto great Zidon, and unto Misrephoth-maim, and unto the valley of Mizpeh eastward. On his return he burnt Hazor, which, though not identified, is generally supposed to have been situated somewhat to the north of the waters of Merom (Lake Huleh). Joshua would thus, on going eastward from Zidon, have gone into the at the buka or valley (bikah) of Lebanon under Hermon. We read (Jos 11<sup>17</sup>) of Baal-gad in the valley (bikah) of Lebanon under Hermon (Jos 1117 12'), and the Hivite lived under Hermon in the land of Mizpah (Jos 11<sup>2</sup>). At the present time the only bikah or buka (Arabic) of any extent in the neighbourhood is the great plain between the two Lebanons, reaching from the foot of Hermon to Baalbek. It would therefore appear that, whether these two places are identical or not, they are both near to Hermon. If the land of Mizpah may be taken to be all the country around Hermon, then the valley (bikah) of Mizpeh may be the southern portion of the valley of the Lebanon. For other conjectures see Dillm., Jos.

 Mizpeli (πρερη, Μασφά, Mispha), a city of Judah (Jos 15<sup>36</sup>) in the Shephēlah or lowlands, in a group of sixteen, some of which have been identified both in the north and south of the Shephelah. It is given together with Dilean and Joktheel, neither of which has been identified; and there is no clue to its position, and no account is given. Tell es-Safieh, the Blanche Guarde or Alba Specula of the Middle Ages, has a name equivalent to Scopos or Mizpeh, but it has been suggested that this is Gath (so G. A. Smith, *HGHL* 227). Robinson (BRP ii. 31) suggests that the valley of Zephathah, 2 Ch 1410 (same root as Mizpeh), may have

been near Tell es-Safieh.

7. Mizpeli Moab (1) της της ης Μασσηφά τῆς Μωάβ, Maspha quæ est Moab) is mentioned only once (1 S 223), as the place where the king of Moab (1 S 223), as the place where the king of Moab was staying when David consigned his parents to his care. At this time the territories of Moab did not extend north of the river Arnon, the whole of the old Moabite country beyond having been allotted to Reuben. As Mizpeh means a lofty place where one can see far and wide (Gesenius, Lex.), the only suitable position in Moab appears to be the fortress of Moab (Kir of Moab), which commands the passes going down to the Dead Sea (Luhith and Horonaim). David probably brought his parents from Adullam down by the pass of Ziz to Engedi, and thence round by the southern end of the Dead Sea up the pass of Horonaim to Kir of Moab (now Kerak). There can, however, in the absence of further information, be no certain clue to the situation of Mizpeh Moab.

MIZPEH.—See preceding article.

MIZRAIM. - See EGYPT in vol. i. pp. 653. 655b.

MIZZAH (π/p). — A 'duke' of Edom, descended from Esau and Basemath the daughter of Ishmael, Gn 36<sup>13, 17</sup> (A Mοζέ)=1 Ch 1<sup>37</sup> (B 'Ομοζέ, A Mοχέ). The clan of which he is the eponym has recheen identified. not been identified.

MNASON (Mrdowr [? Cypr. spelling of Attic Mνήσων—Blass]; N' Idσων), of Cyprus, with whom St. Paul and his companions lodged on the occasion of the apostle's last visit to Jerusalem (Ac  $21^{16}$ ). He is described as an 'early'  $(\dot{a}\rho\chi\alpha\hat{i}os)$  disciple, by which we may perhaps understand one who had been a disciple from the time of Pentecost (cf.  $\dot{\epsilon}\nu\,\dot{a}\rho\chi\hat{\eta}$ ,  $11^{16}$ ). Nothing further is known of him, though from his Greek name he was probably, if not a Gentile Christian, at any rate an Hellenist, with whom it would be natural and prudent for St. Paul to lodge, looking to the feelings which existed among the Jewish Christians against him (vv.  $^{20,21}$ , and see Meyer). For an interesting address on Mnason, in which the utmost is made of these scanty notices, see M'Laren, the apostle's last visit to Jerusalem (Ac 2116). He s made of these scanty notices, see M'Laren, Veek-Day Addresses. G. MILLIGAN. Week-Day Addresses.

MOAB, MOABITES (in MT 'Moab' is אָשָה ; on Moabite Stone אָמָה ; LXX Μωάβ, ἡ Μωαβεῖτις, -βῖτις ; Josephus, Μώαβος; Vulg. Moab; 'Moabite(s)' is

י אָנָי מוּאָב, פּוּאָב; LXX Μωαβείτης, -βίτης; Vulg. Moabita; Assyr. Ma'aba, Ma'bu, Mu'aba).—

Literature.

i. NAME.—The MT gives no etymology, but in Gn 1987 (J) LXX adds after 'she called his name Moab, 'λέγουσα, 'Εκ τοῦ πατρός μου, i.e. 'ΣΝΣ 'from my father.' The presence of an etymology of Ammon in the following verse favours the LXX text, which is adopted by Jos. Ant. I. xi. 5, Jerome, de Wette, and Ball, SBOT. Other etymologies suggested are IN D=IN 'D 'seed of a father' (Ges. Thes.; Fuerst, HWB); or from IN' 'to wish for' (Maurer, IN) referring to the ettractive where Cursus, p. 130), referring to the attractive character of the land. The last is the only one that is possible, and it is scarcely probable. 'Moab' serves indifferently as the name of the land or the people, the Moabites occupying Moab throughout the whole period during which they are known to history. Probably 'Moab' was first the name of

the land and then of the people.

ii. TERRITORY.—'Moab' was the high tableland east of the Dead Sea and the southernmost section of the Jordan. Its western frontier is clearly defined by these natural boundaries: to the south lay Edom and the desert; to the east, Ammon and the desert: to the north, before the conquest by the Israelites, probably Ammon, after the conquest Israel. Towards the desert there could be no clearly-defined boundary, and the frontiers between Moab, Edom, Ammon, and Israel shifted with the balance of power; but, roughly speaking, the territory inhabited by Moabites, and forming the Moabite state when not encroached upon by foreign aggression, was the cultivated plateau (specially known as ham-Mishôr, 'the Level' or 'Plateau,' HGHL 53; or Mishôr of Medeba, Jos 139.16; or Sharon, 1 Ch 516, HGHL 548) from the southern end of the Dead Sea to a line some miles beyond its northern extremity. Kir of Moab is nearly as far south as the southern end, and Heshbon and Jazer (wh. see) are some distance beyond the northern end of the Dead Sea. This plateau is divided by the deep chasm of the Arnon. The northern part of this territory is claimed by some documents for Reuben or Gad, and was at times under the dominion of Israel (cf. below, History). The extreme area of Moab might be reckoned at 50 miles long by 30 broad, 1500 sq. miles, about as large as Hampshire, but the cultivated plateau is only about 10 or 12 miles broad.

Conder (*Heth and Moab*, p. 124) describes Moab as 'a plateau about 3000 feet above the Mediterranean level, or 4300 feet above the Dead Sea. The western slopes are generally steep. The lower formation is the Nubian sandstone . . . above this a dolomitic limestone, with bold precipices in some places, forms the upper part of the hills, and is capped by a soft marl full of flints... the general aspect of the Moabite mountains rising to the plateau is barren in the extreme. The sandstone varies from purple to a light tawny colour, and the ridges are divided by deep narrow ravines. . . . In spring the rounded, shapeless hills are covered with grass and wild flowers, and parts of the plateau are now sown with corn; but the number of trees in Moab might be counted with the fingers of one hand. . . . Moab is a land of streams.' According to HGHL (p. 535) the plateau is broken by 'deep, wide, warm valleys,' with

springs and brooks; and 'eastward the plateau is separated from the desert by low rolling hills. Conder states that gazelles, wild oxen, wolves, jackals, hyænas, vultures, and eagles are found on the plateau. But the appearance of the country to-day must be very different from that which it presented when it was the seat of a powerful and prosperous state. The prophets dwell upon the cities of Moab'; and in their days this land of streams was carefully cultivated, dotted here and there with fortified towns and villages. Its roads and ruins still witness to ancient fertility and populousness. Although the existing remains are largely Greek and Roman, they show the former capabilities of the country, and fairly represent the prosperity of Moab in OT times.

The population must have been considerable. Conder estimates the present population of the Belka, of which Moab is a part, at about 19,000. Hampshire in 1891 had 666,250 inhabitants. Perhaps 500,000 would be the highest possible estimate of the population of Moab in its most flourishing days. One remarkable feature of the country is its great wealth of cairns, stone-circles, dolmens, and menhirs. Conder states that 700 of these rude stone monuments were found by the Palestine Exploration Fund surveyors in 1881: he is doubtful whether as many similar monuments exist in all

the rest of Palestine.

In addition to the plateau itself, Moab comprised the southern corner of the eastern part of the Arabah or valley of the Jordan, the 'arbôth Môab, the low hills skirting the plateau east and south, and pasture land beyond these hills out into the deserts. The climate, natural products, etc., are those of Eastern Palestine, in which part of

Moab is usually included.

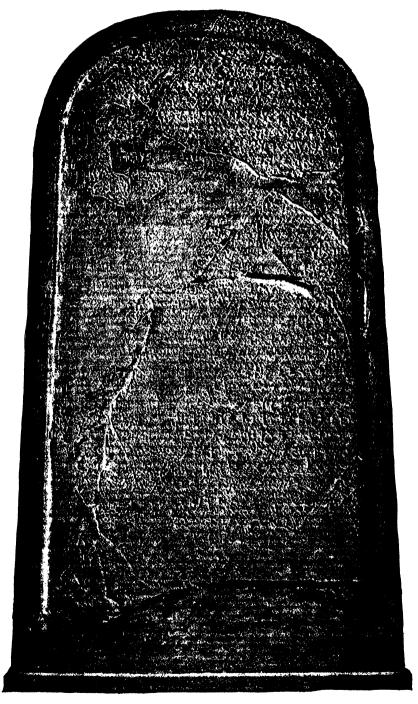

The following cities, etc., are mentioned as at one time or another Moabite; the names in italics are probably variants of those in ordinary type, which respectively precede them; they are sometimes placed slightly out of alphabetical order to show the connexion. Names in capitals are found only on the Moabite Stone. For details see the separate articles on these names.

Ar-of-Moab, Arnon, Aroer, Ataroth, Bayith, Beer-ellm, Beser, Beth-bamoth, Bamoth, Bamoth-baal, Beth-baal-meon, Beth-meon, Beth-diblathaim, Beth-gamul, Beth-jeshimoth, Beth-peor, Bozrah, Dibon, Dimon, Eglaim, Eglath-shelishiyah, Elealeh, Heahbon, Holon, Horonaim, Jahaz, Jahzah, Jazer, Korioth, Kir-of-Moab, Kir-heres, Kir-harsesth, Kirlathaim, Kirlath-huzoth, KRHH (Korhah), Luhith, Madmen, Medeba, Mephaath, Misgab, MHRT (Moharath), Nebo, Nimrim (waters cl., Nimrah, Nophah, Nobah (f), Peor, Pisgah, Sela, Sibmah, SEN (f Sharon), Zoar, Zophim.

iii. LANGUAGE (Proper Names and Moabite Stone).—Our knowledge of the language is derived from the Moabite proper names in OT, etc., and from the Moabite Stone. Both show that Moabite is 'simply a dialect of Heb.' (Stade, i. 113). Where it differs from biblical Hebrewit agrees either with Phœnician or Canaanite, which is also very closely allied with Hebrew; or with Arabic, the language of the eastern neighbours of Moab. According to Hommel (AHT 275), the spelling on the Stone has a strong affinity with that of the Minean inscriptions; e.g. the Moabite Mehdeba', Neboh, are more akin to Minæan than to Heb., which writes Mêdebû, Nebô.

The close connexion with Heb. is shown by the following resemblances—the details of differences are given below. The forms of almost all the proper names are consistent with their being of Hebrew origin. This might be partly accounted for by the fact that, for the most part, they are known to us only from Heb. sources. But the Stone is undoubtedly a Moabite document, and almost all its words, inflexions, and idioms occur in OT. For instance, it has two characteristic Heb. idioms-

404	MOAB, MOABITES

THE MOABITE STONE.

the waw consecutive with Impf., only certainly elsewhere in Phoenician (Ges.-Kautzsch, Eng. tr., 136 n.; cf. König, Syntax, 510 f.); and the use of the Inf. Abs. to emphasize a finite tense (name in l. 7),—not, however, peculiar to Hebrew. T characters on the Stone are very similar to those

of the Siloam inscription.

(A) Proper Names.—In addition to the names of cities given at the end of the section on Territory, the following proper names are found in OT and Moabite Stone (the latter in italics). (1) PERSONS: —Balak, Chemosh-melek or Chemosh-gad, Eglon, Ithmah, Mesha, Orpah, Ruth, Sanballat (?), Shomer or Shimrith, Sihon (?), Zippor; also in inscriptions (see History), Kammusu (Chemosh)nadab, Kmshyhy (Chemoshyehi='Chemosh gives life,' Baethgen, p. 13), Mutsuri, Salmanu. (2) DEITIES:—Chemosh, Ashtar-Chemosh. (3) the RIVER Arnon.

(B) Moabite Stone.—This Stone was a monument erected by Mesha king of Moab, c. 850, to commemorate his victories over Israel. In 1868 a Prussian traveller, the Rev. F. A. Klein, discovered Prussian traveller, the Rev. F. A. Klein, discovered the upper portion of it, about 3½ ft. high, by 2 ft. broad and 2 ft. thick, with rounded top, amongst the ruins of Dibon (Diban). In 1869 a rough squeeze was taken by an Arab for M. Clermont-Ganneau. There is also a copy of 11. 13–20 made for him by another Arab. Then the Stone was broken by the Arab in the hope of meking. broken up by the Arabs in the hope of making more profit out of the fragments. Two large frag-ments and 18 small ones were recovered. From these, with the addition of reconstructions from the squeeze of the missing portions, a restoration of the Stone has been made, and placed in the Jewish Court of the Louvre at Paris. There is a facsimile of this restored Stone in the British Museum. The text is printed on p. 404.

84. In n\*; SS, Cl, w; SS suggest that possibly D may be represented and not w; they discover before this letter traces of a '; Socin thinks that the letter in pur read as I may be 3; G, v; L, \*.

#### (b) Translation.

Words in () represent Moabite words, some or all the letters of which are not clear enough to make it certain what they are. Words in [] represent conjectural restorations where the text has entirely, or almost entirely, disappeared. Words in [()] represent conjectural restorations of words, in which one or more, but not all the letters, can be distinctly read. OT names are given in AV spelling; in other cases the consonants are given, without supplying vowels. Words required by English idiom but not by Hebrew are in Italics. Symbols as in Notes on Text. In some cases the Hebrew order has been preserved, and the English order is shown by subscript numerals.

1. I am Mesha, son of Chemosh (-melech, SS, L,

or -gad, Cl, G), king of Moab, the D-2. ibonite | My father was king over Moab thirty

years and I became ki-

3. ng after my father | And I made this high-place of Chemosh in KRHH | as a token of grati-tude for (the deliverance wrought for M., SS, L)<sup>a</sup>

## (c) Notes on Translation.

(c) Notes on Translation.

8. a. The Moabite of 'the deliverance wrought for Mesha' is MSh' MSh'.

5. b. More idiomatically, 'Omri, king of Israel, who oppressed'; cf. Ges.-Kautzsch, Eng. tr. p. 341 n.

7. c. 80 SS, Noldeke (1870).

G. 'In my days' he [the king of Israel] said, '(Let us go) and I will see my desire on him and his house'; and Israel said, 'I shall destroy it for ever.'

9. d. 'i.e. 'extended and fortified.'

9. s. 'ShWH only occurs here and perhaps line 23, which, with 24f., deals with the water supply of 'RRHH; perhaps=reservoir; SS, 'Teich.'

10. f. Krijathaim and Diblathaim, 30 end in N in the Moabite text.

11. g. 'town,' SS. 'Wall,' G, Nöldeke.

12. A. 'R'I., perhaps also in 17f., probably=Heb. 'NMM Is 291

12. h. 'R'L, perhaps also in 17 f., probably = Heb. אַרָאִיל Is 201

12. h. 'R'L, perhaps also in 17 f., probably = Heb. אַרְאָל וֹל 18 (AV, Ariel) Kethtoh of Ezk 4318.18, Keré אַרְיאַר, not found elsewhere, usually rendered 'altar-hearth' (Ozf. Heb. Lex. s.v.).
12. t. DWDH, apparently the name of a delty worshipped by the Israelites of Alaroth; not mentioned elsewhere, unless the same as the sun-god Dodo; cf. the proper name Dudto in the Amarna tablets. All these names, as well as David='Beloved.' It is curious that, of the three or four places in which 'R'Loccurs, it is connected with the City of David in 18 291 and with DWDH here. Cf. Arikl and David.

12. f. Read המחסמה; cf. l. 18. In 28 1713 במוס 'drag,' so here SS, L, 'schleppen'; in Jer 163='tear,' so here Neubauer. G translates 'offered.'
14. k. Nebo, spelt NBH.
16. l. The sense is the same, whether we read מוס 'all of them,' or היב, itt. 'all of it.'

them,' or כלה, lit. 'all of it.'

'a damsel, two damsels.'

Nebo\* against Israel | and I (w-)

15. ent by night, and fought against it from break of dawn till noon | and I (t-)

16. ook it, and put them all to death, seven | 'R'LY ; cf. h, 'altar-hearths of.'

17. n. made it taboo, and names.

17. n. made it taboo, and names.

17. n. made it taboo, and names.

17. o. 'ShTR = Babylonian Ishtar; cf. on Religion.

17. i. How much is visible is doubtful, but we may restore

18. q. 'dragged' or 'tore'; cf. j. 18. r. built; cf. d.

20. s. its clans, דשה

Either whi is for wan head, so L, which may be interpreted 'chiefs,' Nöldeke, i.e. SS, chiefs and their followers, 'clans'; ef. רוש for אר poppy, Dt 3232.

Or for יבין poor, Ps 823, also written אָר Pr 104, so G. 20. t. led, lit. carried.

21. u. walls of the forests, perhaps enclosing wooded hills, or gardens; or the walls on the side towards the forests.

22. v. 'PhL=Heb. '55' cither hill, SS, L, RV of Is 32<sup>14</sup>, 2 K 5<sup>24</sup>, or citadel, Neubaner, in Neh 3<sup>267</sup> = a quarter of Jerusalem. 22. w. 'I.' The letters of this word are partly in 23.

23. x. Neubauer, 'house of Moloch.' y. sluices, כלאי, so SS (?), L (?), a sense suggested by the use of R in Heb. for 'shut in'; or L (?), Driver, construct of D; \$7\$ both'; G, 'prisons,'

from Heb. 8/3 h'3=' prison.'
25. z. I hewed (KRTY) the MKhRThTh, i.e. a 'cutting' of some kind; SS, 'ich schnitt ein (') die Einschnitte (')'; L, 'I hewed timber'; G, 'I dug the ditch.'

27. aa. ruins reading עין, plural of 'y ' heap.'

28. bb. The beginning of 1. 28 is lost; the w is probably the lost letter of איש (collective) 'men.

lost letter of \$\mathbb{P}^{\text{in}}(\text{collective})^{\text{ men.}}}\$ men.' 29. \( \omega\$, in the cities, so \$SS\$, \$L\$, Neubauer; but \$G\$, 'Bikran'; Nöldeke, 'cattle.' 30. \( di. \) And \( as \) for Beth-baal-meon, so, \$SS\$, the \| is probably equivalent to a stop; moreover, \( Beth\)-baal-meon is probably the same as \( Baal\)-meon, which was built in 1. 9. But \( G\) and Neubauer neglect the \| \, and make \( Beth\)-baal-meon the last of the list of towns beginning with \( Medeba. \)

30. ee. (flocks), so SS, L, translating the reading 73, Neubauer 'shephards,' as Heb. 721, 2 K 34, RV 'sheepmaster,' of Mesha,

and Am 11.

31. f. (the Son of Dedan, etc.), so SS, translating their reading; the text as seen by Cl and L is too fragmentary to admit of probable restoration.

32. gg. and I went (down and), translating SS, L's וארד; if with SS we further read אלח, we should restore with them אלחחם 'fought,' so Neuhauer [and made war].

33. hh. The readings of SS, עלארה; L, איירה, point to a place-name 'L'DhH (Eleadeh).

#### (d) Features in which the language of the Moabite Stone differs from the Hebrew of OT.

(a) אנך 'NK for 'I' without the final 'Y of the Heb. אוכי. As elsewhere the Stone always expresses the silent consonant of final vowels, אוכי can searcely be אוני written defectively. The same scarcely be אנכי written defectively. form is found in Phæn., L, s.v.

( $\beta$ ) The feminine singular ends in n instead of  $\pi$ 

as in Hebrew.

(7) The plural is formed by Nun, as in Aramaic and Arabic, instead of by Mem, as in OT Heb. ארבען ,5 יכן 4, מלכן 5. So occasionally in OT.

(δ) The form no 2, 8, ShTh for Heb. no 'year,'

as in Neopunic inscriptions (L, p. 379).
(e) In אער 5, 'and he humiliated,' and אינה 6, 'and I humiliated,' the last radical is apparently a Waw with full consonantal force, whereas the

corresponding radical in Heb. is a silent He.
(f) The affix for 'his,' 'him,' is ת. ארצה 6, ארצה 7, ובבתה 6, 8, בה 6, ובבתה 7, ובבתה 8, etc., as occasionally in Heb., e.g. אהלה 'his tent,' Gn 921 (see Ges. Kautzsch, § 91 e).

(ח) Line 8, מירבא MHDB', for Heb. מירבא MYDB',

Medeba.

(d) The form אלחחם 'fight against,' line 11

Heb. uses the Niph. (in three cases the Qal) in the sense of 'fight.'

אלחחם, if parsed as Heb., must be taken as Hithpa'el, the n of the prefix and the first radical b being transposed, a transposition only occurring in Heb. when the first radical is a sibilant. This transposition, however, regularly occurs for all first radicals in the Arabic 8th conj. iqtatala, which is equivalent in sense to the Heb. Hithpa'el.

See, further, Driver, Sam. xeiii.
(i) The inscription belongs to the primitive stage of Hebrew writing, in which doubtless most of the OT books were originally written, in which the scriptio defectiva was used, and no distinction was

made between medial and final letters of alphabet. Silent consonants, however, are used for final vowels, אבי 'my father,' l. 2; בב; Heb. ב, etc.; in the affixes, בני, (?), l. 18, m, l. 22; and in בני, ריבני, ריבנ

(x) The following words, in addition to proper names, do not occur in the OT: אשות, l. 9; אים, l. 12; מכרח, l. 25 from Heb. יפרק; (?), l. 34.
(A) According to the readings of SS in Il. 11, 16,

26, the prefixed preposition b is used to express

the genitive.

iv. Religion.—Up to a certain point the Moabite religion was henotheistic, and the relation of Chemosh to Moab was exactly that of J'' to Israel (see CHEMOSH). On the strength of a winged sun-disk on the gem containing the name Chemoshyehi, Baethgen regards Chemosh as God of the Sunshine, and a manifestation of Molech. The Greeks identified Chemosh with Ares. Sanctuaries to Baalpeor (wh. see), and possibly Nebo (wh. see), and other gods, neither destroy the parallel with Israel, nor prove that Moab failed to pay a special, unique homage to Chemosh. Even the occurrence on the Stone of a deity Ashtur- (or Ishtar-) chemosh would not destroy the parallel with Israel. Ashtar-chemosh (see Ashtoreth in vol. i. p. 171\*) is usually distinguished from Chemosh; and probably El Shaddai, El Elyon, Jahwch Zeba'oth, are not sufficiently similar compounds to be urged against this view. But if inscriptions of Solomon or Ahab were preserved, they might name other deities beside Jahweh. According to Baethgen, Ashtar-chemosh is a name which claims for Chemosh the attributes of Ishtar. Chemosh had his temples, priests, sacrifices, and offerings. The inhabitants of conquered cities were 'devoted' to him, i.e. massacred in his honour (Stone, Il. 12, 17). Mesha sacrificed his firstborn to Chemosh, as Ahaz offered his son to Molech.

But there is no extant evidence that any Moabites regarded Chemosh as the one God, in a monotheistic sense; or that there was any attempt by priestly legislation to purify the ritual from superstition and immorality; or that there was any ethical or spiritual movement parallel to the minis-

try of the prophets in Israel.

v. Prople and History. — The patriarchal narratives in Gn preserve a tradition, which may be unhesitatingly accepted as historical, to the effect that Moab was very closely akin to Israel, and that up to a certain point the history of Israel is also the history of Moab. Moab is the son of Lot and the brother of Ammon, Lot is the nephew of Abraham, and accompanies him in the migration first from Ur and then from Haran. In other words, Lot (i.e. Moab with Ammon), Ishmael, the Bnê Keturah and Edom, once formed with Israel that loose confederation of kindred tribes which bore the common name Hebrews, and followed Abraham from Mesopotamia into Canaan. According to these narratives, Lot shared for a time the nomad life of the other Hebrews in Western Palestine, but was the first of the allied clans to leave the confederacy. Lot settled in Sodom and Gomorrah, but after the calamity which overwhelmed those cities the Bnê Lot be-took themselves to the pasture lands E. of Jordan, and, as the separate political organizations of Moab and Ammon, occupied the territory in which they remained till they disappeared from history. Thus Moab passed from the nomad stage into that of agriculturists and city-dwellers at a much earlier date than Israel. Possibly the Khabiri of the Amarna tablets are the Hebrews at their first entry into Palestine before the confederacy began

to break up.
We do not know the exact limits of the territory first occupied by Moab, but it probably stretched northward from the Arnon, along the eastern

banks of the Dead Sea and the Jordan. We read in Dt 210 'the Emim dwelt therein "[in the land of Moab]" aforetime, a people great, and many, and tall, as the Anakim: these also are accounted Rephaim, as the Anakim; but the Moabites call them Emim.' J" gave this land to Moab as He gave the land of the Horites to Edom. In Gn 14° the Emim are at Kiriathaim, a town north of the Arnon, spoken of later on as Moabite. statement is quite consistent with the position of ch. 14, as the birth of Moab, i.e. its first appearance as a distinct tribe, is not related till 1937. If we could trust the synchronisms with Babylonian and Elamite history based on the names in 141, the incident happened shortly before the restoration of Babylonian supremacy by Hammurabi, B.C. 2200; and Moab made its appearance somewhat later (*HCM* p. 161 ff.). But the archæological relations of Gn 14 are still quite uncertain (cf. L. W. King, *Letters*, etc., of *Hammurabi*, Introd.). The antiquarian note, Dt 2<sup>10x</sup>, is a late addition, and, according to Holzinger on Gn 14<sup>5</sup> and Steuernagel on Dt 2<sup>10</sup>, the Emim are purely

and Steuernagel on Dt 2<sup>10</sup>, the Emim are purely legendary (cf. EMIM).

The OT says nothing more about Moab till the time of the Exodus. From the Amarna tablets and other Egyptian, Babylonian, and Assyrian monuments we gather that Babylonia and the Hittites exercised great influence in Syria before c. B.C. 1400; and that for some time before that date Syria was an Egyptian province, but that, apparently, about 1400. Egyptian authority was apparently, about 1400, Egyptian authority was breaking down throughout Syria. Moab is not mentioned in the Amarna tablets at present published (Winckler, Petrie). It lay rather out of the way of the main routes between Syria and Egypt and the East, and especially was not on the Egyptian line of march into Palestine. Pos-sibly, therefore, both as to politics and culture, the relations of Moab with the great empires were slight and superficial. On the other hand, Moab commanded the great routes from Western Palestine and Northern Syria into Arabia (HGHL 430, 597 ff., 626); and probably during this early period and throughout its history Moab remained in touch with its Arab kinsfolk: thus the Mesha inscription shows traces of the influence of Arabic. Yet there is evidence of the connexion of Moab with Egypt. According to Sayce (Patr. Pal. 153), Moab was included in the Canaanite province of Egypt at the time when the Amarna tablets were written; but Edom then encroached on what was afterwards Moabite territory. Ramses II. (c. 1300) afterwards Moabite territory. Ramses II. (c. 1300) fought several campaigns to restore the Egyptian dominion in Syria. In the list of his conquests on the base of one of six colossal figures at Luxor there occurs the name Muab (Patr. Pal. p. 21). Karhu, in a similar list at Karnak (Patr. Pal. p. 237), is probably the KRHH of the Moabite Stone. Other traces of Egyptian influence E. of Jordan are a monolith near the Lake of Tiberias heaving the cartonche of Remeal II. now known bearing the cartouche of Ramses II., now known as the Stone of Job (see vol. i. p. 166<sup>b</sup>); and the delineation of a local deity Akna-zapu, 'Yokin of the North, with the full face and crown of Osiris

(Sayce, Egypt of the Hebrews, p. 81).
We now come to the biblical accounts of the Exodus, which include statements as to the fortunes of Moab in the period immediately preceding the appearance of Israel in Eastern Palestine. According to these, Moab, shortly before the advent of Israel was derived of its norther town. vent of Israel, was deprived of its northern territory, at least, by an Amorite king, Sihon; and though Israel occupied the land of Moab, it was conquered, not from the Moabites, but from Silon. But the historicity of this account is disputed. We will first give the narrative as it stands, and then the criticism of it.

The original authority for the narrative is the section of E, Nu 21<sup>21-31</sup> (Wellh. J), which contains the account of the defeat of Sihon, and the conquest of his dominions. V.26, sometimes held to be a later gloss, states that 'Sihon, king of the Amorites, had fought against the former king of Moab, and taken all his land out of his hand, even Moab, and taken all his land out of his hand, even unto Arnon'; and vv. 27-30 give, on the authority of 'them that speak in proverbs,' i.e. the composers or reciters of 'taunt songs,' celebrating the discomfiture of Israel's enemies, the following poem, probably taken from the Book of the Wars of J", quoted in v.14:-

'Come ye to Heshbon,
Let the city of Sihon be built and established;
For a fire is gone out of Heshbon,
A flame from the city of Sihon.
It hath devoured Ar of Moab,
The lords of the high places of Arnon.
When to the Moab! The lords of the high places of Arnon.

Woe to thee, Moab!
Thou art undone, O people of Chemosh.
He hath made his sons fugitives,
And his daughters captives
To Sihon, king of the Amorites.
We have shot at them; Heshbon is perished even unto Dibon, And we have laid waste even unto Nophah, Which reacheth unto Medeba.'

According to Dillmann, the speakers are Israelites, who, in celebrating their victory over Sihon, describe his recent conquest of Moab. Unless v. 28 is a gloss, Sihon's war against Moab, and Israel's against Sihon, rest on substantially the same authority. The latter is frequently referred to by the Deuteronomic writers; it is also alluded to in P's account of the division of Canaan, Jos 1321. 27 (unless these verses are P<sup>3</sup>), in the late passage Jg 11<sup>12-23</sup> (R<sup>JE</sup>, Budde, Moore), in Neh 9<sup>22</sup>, and in Ps 135<sup>11</sup> 136<sup>19</sup>. The poem is quoted in Jer 48<sup>45</sup> (a late addition, Corn., Giesebr.), but there is no reference to Israel's war with Sihon. Thus the tradition is comparatively early, and was continuously recognized; moreover, the narrative is not intrinsically improbable.

On the other hand, neither J nor P mentions the Sihon episode (unless Jos 13<sup>21, 27</sup> are rightly assigned to P2), and none of the accounts of Moab's relato respect to the accounts of Moab's relations with Israel suggest that Israel had avenged Moab by conquering its oppressor. Hence, though the narrative is accepted by Dillmann (on Nu 21), Cornill (Hist. of the People of Israel, p. 45), etc., it is regarded as unhistorical by Stade (Gesch. Isr. 117 f.), Addis (on Nu 21), etc. According to the latter, the poem refers to the conquest of a Moabite line Silver by Lynching to the Others to for Survey. king, Sihon, by Israel in the 9th cent. (cf. Sihon).

If we accept E's narrative, we may follow Cornill (Hist. p. 45) in reconstructing the history somewhat thus: Sihon expelled the Moabites and Ammonites from the most fertile parts of their territory. The conquered either invited the Israelites, then occupying the country about Kadesh, to come to the rescue, or welcomed them as allies when they appeared on the scene. But, after the Israelites had overthrown Sihon, they kept for themselves the territory he had taken from Moab.

Nu 251-5 (JE), according to which the women of Moab led the Israelites into immorality, and the Israelites worshipped Baal peor as guests at Moabite sacrificial feasts, is entirely in accordance with E. Similarly Dt 2<sup>2-28</sup>, in stating that J" forbade Israel to attack Moab, and that Moab allowed the Israelites to pass through its territory, and furnished them with provisions; and Jg 11<sup>26</sup> (R<sup>JE</sup>?), in stating that Balak did not fight against Israel, are following either E, possibly in a fuller form than we have it, or some equivalent account. The futile attempt of Balak to induce Balaam to curse Israel occurred, according to current analysis, both in J and E, and seems also to imply that up to that point no hostilities had taken place between Israel and Moab. Possibly, however, the whole Balaam section belongs to E, with the exception of the episode of the speaking ass, which may be J, but may originally have had nothing to do with Balak or Moab (cf. BALAAM and the analysis in NUMBERS). In P, Nu 318, Jos 13<sup>22</sup>, Balaam is connected with Midian, and P may have

followed a lost section of J.

On the other hand, there is a series of passages which suggest hostile relations between Moab and Israel at this time. Ex 15<sup>15</sup> (JE), the Song of Triumph after crossing the Red Sea, speaks of the dismay of the Moabites at that event. Dt 23³ states that Moab did not furnish Israel with provisions; it does not mention any war between them; and, according to Jg 11<sup>17</sup> (R<sup>JE</sup>?), the Israelites were refused permission to pass through Moab. But, curiously enough, it is in Jos 24°, the E-speech, that we find the explicit statement, 'Balak ben Zippor, king of Moab, arose and fought against Israel; and he sent and called Balaam ben Beor to curse you.' Perhaps at an earlier stage of the Wanderings, before Sihon attacked Moab, the Moabites feared Israel, and refused to admit them into Moab; after the conquests of Sihon, Moab was glad to obtain the help of Israel, but again became hostile when Israel refused to restore to Moab its former territory.

Whether Israel took the land north of Arnon from Sihon or from Moab, it was always debatable ground, and stimulated and aggravated the quarrels that naturally arose between neighbours. northern frontier of Moab retired or advanced as the power of Israel waxed or waned. The most the power of Israel waxed or waned. The most important incident narrated as to the relations of Israel and Moab, in the period of the Judges, is the occupation of Jericho by the Moabites, the assassination of their king, Eglon, by the Benjamite Ehud, and the consequent slaughter of the Moabites and the recovery of the territory of Jericho for Israel, Jg 3<sup>12-30</sup> (J?, in Dt setting). The occupation of Jericho implies that Moab had reconquered the country porth of the Arnon as far as opposite Jericho (cf. Ehud, Eglon). LXX (not all MSS) and Syr. insert Moab in the post-exilic (Budde, Moore) list of the oppressors from whom Jephthah delivered Israel. The conjecture, though late, was natural, and probably correct. Moab would take advantage of so good an opportunity, and was always closely connected with Ammon. The author of Jg 11<sup>12-28</sup> was certainly under the impression that Moab was concerned in the controversy. The Book of Ruth assigns its story to the period of the Judges, and illustrates the friendly relationships which sometimes existed between the neighbouring peoples. Perhaps the obscure verse I Ch 4<sup>22</sup> (a late addition, Kittel, SBOT) is intended to refer to this period. The Heb. includes in the list of Judahites 'and Jokim, and the men of Cozeba, and Joash, and Saraph, who had dominion in Moab, and Jashubi-lehem'; LXX and Vulg., followed by Kittel, read for 'Jashubi,' 'and they returned,' i.e. probably to Bethlehem when unable to retain power in Moab. Vulg. has the remarkable translation, 'Et qui stare fecit solem, virique mendacii, et Securus, et Incendens, qui principes fuerunt in Moab, et qui reversi sunt in Lahem; hæc autem verba vetera,' apparently on the lines of ancient Jewish exegosis, which sees here a reference to Elimelech, Mahlon, and Chilion of the Book of Ruth (Bertheau). But the original meaning, and intended period, and the value of the verse, are quite uncertain. Another hopelessly corrupt and obscure passage, 1 Ch 88 (late addition, Kittel; according to Gray, Heb. Proper Names, the names are ancient), seems intended to refer to this period, cf. Ehud, 86, and furnishes another statement as to

Israelites, here Benjamites, settling in the Field of Moab, whether as part of an Israelite colony or as  $g\bar{e}rim$  of Moab, does not appear. Further, the Israelites, Jg 10<sup>6</sup> (R<sup>D</sup>), worshipped Moabite gods.

Any account which can now be given of Moab is necessarily one-sided. Our information is chiefly from Israelite sources; and our only Moabite document, the Mosha inscription, happens to be wholly taken up with a war with Israel. But the consequent impression that Moab was chiefly occupied with its relations with Israel would obviously be a mistake. Their dealings with other neighbours, e.g. Ammon and the nomad Arabs, must have been equally important to them—to say nothing of their own private affairs. Here and there we have a gleam of light on such subjects. In the list of Edomite kings, Gn 36<sup>31-39</sup> (J usually, but Dillm. P), 1 Ch 14<sup>3-51</sup>, we read, Gn 36<sup>35</sup>, of a Hadad ben Bedad, who defeated Midian in the Field of Moab, which suggests that at some period, probably that of the Judges (Ewald, in the time of Gideon), part of the Moabite territory was occupied by Edom. Two of the capitals of these kings, Avith and Dinhabah, have been identified with sites in Moabite territory; cf. DINHABAH. Whether the Midianites were present in 'the Field of Moab' as invaders (Moore on Jg 6<sup>1</sup>) or allies is not clear. In Nu 21-25, read continuously, Midian appears in about the same district as the ally of Moab; the references to Midian may be P and R<sup>p</sup>, and yet be based on older documents. It is not clear that Moab and Midian were combined in any of the sources. To this period may also be assigned the capture of KRHH by Ramses III. c. 1280, during one of his Syrian campaigns (Sayce, Patr. Pat.

Passing to the united monarchy, Saul to Solomon, in addition to the account of Saul's victory over Nahash king of Ammon (1 S 11), Moab, Ammon, and Edom are mentioned (1 S 144) amongst the enemies against whom Saul fought successfully; he clearly did not conquer Moab, since David's parents found an asylum there (1 S 222-b) according to Ru 418-22, Ruth the Moabitess was an ancestress of David. During the civil war between David and Eshbaal, Moab must have been able to hold its ground, or even to aggrandize itself at the expense of Israel. Hence, perhaps, David's war with Moab, in which 'he smote Moab, and measured them with the line, making them to lie down on the ground; and he measured two lines to put to death, and one full line to keep alive. And the Moabites became subject to David, and paid tribute' (2 S 82). Part of the spoil of Moab, as of that from other conquests, David dedicated to J" (2 S 812). Probably instead of the 'two lion-like men of Moab,' slain by one of David's warriors (2 S 2320), we should read with Klostermann and Budde, partly following the LXX, 'two lions in their lair.' In the parallel passage, 1 Ch 1124, Kittel reads 'two sons of Ariel from Moab.' Bertheau, who adopts a similar reading, understands Ariel as the name of the king of Moab (cf. ARIEL). In 1 Ch 1146, in a passage which Kittel secribes to an ancient source, no longer extant, Ithmah the Moabite is mentioned among David's mighty men. Kautzsch and Budde ascribe 2 S 82.12 to late editors. According to 1 K 111-7.28 (D2, Kautzsch), Solomon had Moabite women in his harem, erected a temple to Chemosh, and worshipped him.

How long Moab remained tributary we do not know. It is next mentioned as rebelling against Ahab; and it has been supposed that it remained subject to Solomon till his death, and was transferred to Israel after the formation of the Northern Kingdom. But the silence of our meagre and fragmentary authorities as to any prior revolt does

not prove that Moab remained in subjection till the time of Ahab. The express mention of the revolt of Edom from Solomon is slightly against the supposition that a revolt of Moab at that time has been passed over. Further, the fact that Jeroboam's capital was at first E. of Jordan shows that Israel then was in strong force in the east. and makes it possible to suppose that Jeroboam succeeded in wresting the suzerainty of Moab from Rehoboam. On the whole, it is more likely that Moab recovered its independence at this time; or, if not then, soon after, at some point in the period, after Jeroboam, during which Israel was distracted by foreign and civil wars and frequent changes of dynasty. The disaster which almost blotted out Reuben as a tribe may have been suffered at the hands of Moab, at this or at an earlier date.

2 Ch 201-80 narrates a campaign of Moab, Ammon, and Edom against Jehoshaphat, in which the invaders massacre each other. The passage is probably a Midrashic adaptation of 2 K 3, and in its present form rests on no older authority than the Midrash of Kings used by the Chronicler.

The period of Omri-Ahab-Jehoram is specially

important, because we can supplement the Bible account by the Moabite Stone, the text and translation of which are given above, in the section on Language. In the Moabite Stone (Il. 1-8) Mesha Language. In the Moabite Stone (II. 1-8) Mesha tells us that, in the reign of his father, Chemoshmelek (?) of Dibon, Chemosh was angry with Moab, and Omri and his son oppressed Moab, subjected and occupied it forty years. This brings us to the point at which Kings first refers to Moab. 2 K 1<sup>1</sup> 3<sup>4, 5</sup> states that Mesha king of Moab was rich in sheep, and paid to Israel a tribute (? annual) of 100,000 lambs and 100,000 rams (AV), or their wool (RV); and that when Ahab died he rebelled against the king of Israel. According to Mesha (l. 8), the revolt took place in the middle of Ahab's reign. Probably the war of Israel with Syria, which cost Ahab his life, afforded the opportunity for the revolt of Mosh. It is not clear how we for the revolt of Moab. It is not clear how we are to combine the inscription and 2 K 3. We may suppose (Cornill, p. 107; Wellh. Hist. etc. Eng. tr. p. 460) that Mesha's victories took place at the time of the revolt, before the events of 2 K 3; or that, at first, Moab simply asserted its independence, and that Mesha's conquests were made after the retreat of Jehoram; or that the inscription is a comprehensive account of Mesha's achievements both before and after Jehoram's campaign, his reverses being ignored, just as Kings makes no mention of the loss of Israelite cities to Moab. In 2 K 3 we read that Jehoram, at the head of a general muster of Israel, and with Jehoshaphat of Judah and the king of Edom as allies, marched round the southern end of the Dead Sea, a route which suggests that Israel was very weak on the east of the Jordan; that the Moabites fell into an ambush, and were defeated; that the allies captured and destroyed the cities and laid waste the land, and at last shut up Mesha in Kir-hareseth. After an unsuccessful sortie, Mesha 'took his eldest son . . . and offered him for a burnt-offering upon the wall. And there was great wrath against (RV), or upon (RVm), Israel; and they departed from thence and returned to their own land. Possibly the Israelite account disguises a defeat as a voluntary withdrawal; but the prophets' accounts of the superstition of their fellow-countrymen show that they may have been afraid to press the siege after what they believed to be an irresistible appeal to Chemosh. But the retreat was a disastrous blow to the prestige of Israel. Probably the retiring army suffered heavy loss; and the Moabites would certainly be emboldened to make further additions to their terri-

tory at the expense of the eastern tribes. The relations of Edom and Moab in this narrative suggest the existence of bitter hostility, which must have led to other wars between the two neighbours. Nothing is said of Edom in the inscription, possibly because part of it is lost.

The inscription suggests that the revolt arose (ll. 6, 7) through hostile measures of Ahab.\* Mesha recovered the territory occupied by Omri, and fortified Ba'al-meon and Kiriathaim. He then threatened the Gadites—the Reubenites are never mentioned, and had apparently disappeared—in their long-occupied territory of Ataroth. In defence, the king of Israel fortified the city of Ataroth. But Mesha took Ataroth and Nebo, and massacred their inhabitants. The king of Israel fortified Jahaz, but it shared the fate of Ataroth. Mesha seems also to have conquered Horonaim. After his victories he fortified many cities, and provided them with a water supply, and executed other public works, largely, no doubt, by means of Israelite prisoners, as in 1. 25.

According to the cities mentioned in the inscription as conquered or held by Moab, its territory stretched along the whole eastern coast of the Dead Sea, from Kir in the south to Horonaim and Nebo in the north. The silence as to Heshbon may possibly be due to the loss of part of the Stone; but as Mesha's father reigned in Dibon on the Arnon, probably Mesha's conquests did not include

According to 2 Ch 2426, one of the assassins of Joash of Judah had a Moabite mother. The story of Elisha (2 K 1320) mentions Moabite raids in

2 K 1425 states that Jeroboam II. recovered the border of Israel from the entering in of Hamath to the sea of the Arabah, i.e. the Dead Sea. Probably he recovered the suzerainty over Moab (so Cornill, p. 122, 'succeeded... in subduing all Moab'). 1 Ch 5<sup>1-17</sup> seems to imply a tradition of an effective Israelite occupation of territory between Jabbok and Arnon in the time of Jeroboam II. Am 2<sup>1-3</sup> may refer to Israelite conquests in Moab at this time, though it only refers expressly to the feud between Edom and Moab. Possibly the Israelite victories over Moab in Nu 24<sup>17</sup> (Balaam's oracles) belong to this period, though they might refer to the wars of Omri or even David.

Another trace of the hostility of Moab to both Israel and Judah, in the period of the two kingdoms, is the unsympathetic attitude of both J and E to Moab; the most striking example being the account of the birth of Ammon and Moab.

In the period from Jeroboam II. to the Fall of Samaria, the catastrophes of Israel, especially the deportation of the eastern tribes by Tiglath-pileser, and, in a less degree, that of the inhabitants of the rest of the Northern Kingdom, left Moab free to aggrandize itself. All the evidence seems to of Samaria, the century and a half after the fall of Samaria, the prosperity of Moab reached its climax. Apparently its rulers were wise enough to observe the essential condition of continuous prosperity, and submitted to the suzrainty of Assyria; cf. COT ii. 49. Salmanu the Moabite occurs in the Nimrud Clay Inscription of Tiglathpileser as one of the tributaries of Assyria; and this salmanu, and not the Assyrian Shalmaneser, who is to be identified with the Shalman who sacked Beth-arbel in Hos 10<sup>14</sup> (so

Shalman who sacked Detiration in 105 to Sayce, HCM p. 482).

In a fragment, indeed, of Sargon II. (Kellner, Isaiah, p. 34), Moab is mentioned as allied with Philistia, Judah, and Edom in a conspiracy against Assyria; but on the great Taylor Prism, which gives Sennacherib's account of his campaign against

<sup>\*</sup> The translation of these lines is doubtful, cf. above

Hezekiah and his allies, Kammusu-nadab (Chemosh-nadab) of Moab brings tribute to the Assyrian king, and does homage to him. Mutsuri (probably 'the Egyptian') king of Moab is mentioned as attending the court of two successive kings of Assyria, Esar-haddon and Assurbanipal, in company with twenty-one other subject kings, including Manasseh of Judah (Sayce, *HCM* p. 450 ff.). In the last days of Jerusalem, Moab had transferred its elleringes to Bolynam, Moablater fought for its allegiance to Babylon; Moabites fought for Nebuchadnezzar against Jehoiakim, 2 K 24<sup>2</sup>. At the beginning of the reign of Zedekiah, according to the original text of Jer 27<sup>8</sup>, Monbite envoys came to Jerusalem to arrange a revolt against the Chaldmeans; and later on Jewish refugees found an asylum in Moab, Jer 40<sup>11</sup>; and Ezk 25<sup>8-11</sup> also implies that the prosperity of Moab continued after the fall of Jerusalem.

Much light is thrown on the condition of Moab in this period by the references to Moab in Am, Is, Mic, Zeph, Jer, and Ezk; although there is much difference of opinion as to the dates of the passages in question. For Am and Ezk, see above; it may be noted also that in Am the ruler of Moab is called by 'judge.' Mic 65 merely refers to the story of Balaam and Balak, probably in a different form from that in which we now have it. Zeph 28-10, which threatens Moab and Ammon because they have despised and harassed the Jews, is commonly

regarded as exilic (cf. ZEPHANIAH).

The Is-Jer oracles on Month present a very complicated question. Is 15f. and Jer 48 are two independent editions of an older lament over some ruinous catastrophe which befell Moab. Cheyne ('Isaiah' in PB p. 168) thinks the enemy of Moab may have been either Nebuchadnezzar, Assurbanipal, or Jeroboam II. Cheyne, Duhm, Giesebrecht, etc., hold that the later editions of the lament were compiled and inserted in Is and Jer by late post-exilic writers; Dulin refers Jer 48 to the time of Alexander Jannæus and John Hyrcanus. But many critics (e.g. Cornill and Driver) regard Is 15 f. as the work of Isaiah, and Jer 48 as that of Jeremiah—substantially. In the lament the territory of Moab has reached its maximum, and extends from Jazer, Sibmah, and Heshbon to the southern end of the Dead Sea. Thus the poem is probably later than Mesha, and does not refer to the conquest of Moab by Omri, or the campaign of Jehoram; the Stone does not mention Heshbon. Hence the disaster to Moab mention Heshbon. Hence the disaster to Moab was plobably an invasion by Jeroboam II., a view possibly confirmed by Is 16<sup>1.5</sup>, which is often interpreted as meaning that the king of Judah was ruling over Edom; while 2 K 14<sup>7.10</sup> suggest that, some time before, Amaziah of Judah had recovered the suzerainty of Edom. The lament shows that, since Mesha, Moab had made steady progress, and advanced its border beyond Heshbon; that it preserved numerous faiting it walled that it possessed numerous 'cities,' i.e. walled towns, and doubtless many villages; that it was fertile, well-cultivated, and, probably, densely populated; and that it had reached a comparatively high level of civilization, not very different from that of Judah. Jeroboam ravaged the country in the same fashion as Jehoram; and perhaps some districts and cities were occupied by Israelites, but Moab as a whole probably remained autonomous under a native ruler appointed by Jeroboam. If Nu 2121-30 refers to this invasion (see above), the king of Moab at this time may have been named Sihon. The author of the lament shows marked sympathy for Moab; Israel was generally hostile to the Southern Kingdom after the extinction of the house of Omri, and Moab and Judah were drawn together by a common enmity to Samaria. A token of their mutual good feeling was Solomon's temple to Chemosh,

which was not interfered with till the time of Josiah. However severely Moab suffered at the hands of Jeroboam II., it recovered speedily, and became more prosperous than ever, so that Isaiah (?) and Jeremiah (?) do not hesitate to adapt and expand the pictures of the pride and prosperity of Moab, and the lists of its numerous cities, in their descriptions of the doom that threatened Moab at the hands, first of the Assyrians and then of the Chaldmans. The attitude of Is 15f. is still sympathetic; but Jer expresses the bitter resentment inspired by the alliance of Moab with the besiegers of Jerusalem in 4810 'Cursed be he that doeth the work of J" negligently, and cursed be he that keepeth back his sword from blood.' Jer also (48") testifies to the continued prosperity of Moab and its consequent corruption: 'Moab hath been undisturbed from his youth; he hath settled on his lees; he hath not been emptied from vessel to vessel; he hath not gone into captivity: therefore his taste remaineth in him, his scent is not changed.'\* Jeremiah, or an editor, has incorporated Nu 21<sup>281</sup>. as vv. <sup>451</sup>. † Cf. Jer 9<sup>26</sup> 25<sup>21</sup> 27<sup>3</sup>; ISAIAH, BOOK OF; JEREMIAH, BOOK OF.

In Is and Jer we see Moab, at the height of its prosperity, suddenly seized in the grip of an overwhelming calamity: here the curtain falls upon its history. The land is still for some time called Moab, and the name lingered on even into the Christian era; the term Moabite is occasionally applied to cities or people of the district, and doubtless survivors of the old race were still to be found in the land; but there seems no evidence of the existence of Moab as a state, even a dependent state, after the Exile, and we know that at the time of the Maccabean revolt Moab was occupied by the Nabatæan Arabs (1 Mac  $9^{32-42}$ ; Jos. Ant. XIII. xiii. 3, 5, xvi. 4, XIV. i. 4). A comparison of the last two passages shows that Josephus uses 'Moabites' for the Nabatean Arabs, which explains the statement in Ant. I. xi. 5, that the Moabites were still a very great people in his time. I Mac never names the Moabites, even in such passages as 5<sup>1-8</sup> (cf. Bevan, Dan. p. 199; Baethgen, Ps. p. 260). The comparative silence of post-exilic literature as to Moab suggests an early date for its disappearance; even in Neh 47 the Arabians have taken the place of Moab as the allies of Ammon. Possibly Moab, in its pride, unduly tasked the patience of Nebuchadnezzar and was overthrown, and the bulk of its popula-tion deported; then the Arabs may have occupied Moab and absorbed the remnant of the people; or the Nabatæans may have conquered Moab (cf. Aretas). Then Is 15 f., Jer 48, if late editions of an earlier lament, may have been inspired by the report of this great catastrophe; Ezk 258-11 states that Moab shall be conquered by the children of the East, i.e. Arabs.

The post-exilic references to Moab are as follows: In the apocalyptic Is 24-27, variously dated from the time of the Exile to that of Alexander the Great, Moab is the one Gentile people mentioned by name (2510) as doomed. Unless the section is contemporary with Jer 48,‡ 'Moab,' like 'Edom' and 'Babylon,' in later times is used as a type of the enemies of God (Cheyne, 'Isaiah' in PB p. 204). Ezr 91, Neh 131 are mere references to ancient literature. Sanballat the Horonite (Neh 210 etc.) may have belonged to Beth-horon; even if he belonged to Horonaim, he may have been one of

\* If Bozrah is Bosrah esh-Sham in the Hauran, the territory of Moab had extended far to the N.E.; but of. Bozrah.
† Unless Jer 483 'In Heshbon they have devised evil against her,' i.e. Moab, is a deliberate modification of the ancient poem, connected with the insertion of Nu 2128f; it seems better to read with Giesebrecht, 'Against Heshbon they have devised

evil,' omitting אלית 'against her.' ‡ Cf. Jer 4848f. with Is 2417f.

its Arabian conquerors; and if a Moabite, merely an individual who survived the ruin of the state. In Dn 114 Moab may be merely the country, or else combined with Edom and Ammon through the influence of older literature. Similar considerations may explain the occurrence of Moab in the late psalms (60° 83° 108°), unless the lists of peoples in these psalms are fragments from older poems. The references to Moabites in Jth are entirely unhistorical, and due to a use of older literature.

MOADIAH.—See MAADIAH.

MOCHMUR (Μοχμούρ Β, Μουχμούρ κ\*; Machur Old Lat., Peor Syr.; A omits; Vulg. Jth 7<sup>10</sup> omits LXX 7<sup>17-19</sup>).—A wādy (χείμαβρος) on which Chusi, near Ekrebel, was situated, apparently S.E. of Dothan (Jth 7<sup>18</sup>).

MOCK, MOCKINGSTOCK.—The verb to mock is both trans. and intrans. Used transitively it has two distinct meanings: (1) To ridicule, as 1 K 18<sup>27</sup> 'Elijah mocked them, and said, Cry aloud'; Job 12<sup>4</sup> 'I am as one mocked of his neighbour' (RV 'one that is a laughing-stock to his neighbour'. (RV one that is a laughing-stock to his neighbour'). (2) To deceive, bequile, Jg 16<sup>10</sup> 'And Delilah said unto Samson, Behold, thou hast mocked me, and told me lies,' Job 13<sup>9</sup> 'As one man mocketh another, do ye so mock him?' (RV 'as one deceiveth a man, will ye deceive him?'). So Shaks. Rich. III. IV. iv. 87-

A mother only mocked with two sweet babes'; and Macbeth, I. vii. 81-

'Away, and mock the time with fairest show.'

The only meaning of the intrans. verb is to ridicule, as Job 218 'Suffer me that I may speak; and after that I have spoken, mock on' (from Gen. Bible; Cov. 'laugh my wordes to scorne'); Pr 126 'I will mock when your fear cometh'; Ac 17<sup>32</sup>
'And when they heard of the resurrection of the dead, some mocked.' The phrase to 'mock at' occurs in Pr 30<sup>17</sup>, La 1<sup>7</sup>. Tindale has 'mock out,' Expositions 39, 'their sophistical glosses, feigned to make the the law of Coll and to head to be solved. to mock out the law of God, and to beguile the whole world; and 'mock with,' Works, i. 205, 'So shamefully doth the covetousness and ambition of our prelates mock with the law of God.

Mock was once common as a subst.: thus in Matt. Bible, marg. note to Gn 3<sup>22</sup> 'Here thys worde lo is taken as a mocke as it is in 1 K 18'; Joy, Apologye to Tindale, 14, 'This saith Tindale yroniously in a mok as though it were false that oure soulis as sone as we be dead shulde go to heven'; Shaks. Henry V. I. ii. 285—

'For many a thousand widows
Shall this his mock mock out of their dear husbands;
Mock mothers from their sons, mock castles down;
And some are yet ungotten and unborn
That shall have cause to curse the Dauphin's scorn.'

The only example in AV is Pr 149 'Fools make a mock at sin.' Cf. He 66 Tind. 'For as moche as they have (as concerninge them selves) crucified the soune of God a fresshe, makynge a mocke of him.' The subst. 'mocking' (=mod. 'mockery,' which also occurs) is found in Ezk 224 'Therefore have I made thee a reproach unto the heathen, and a mocking to all countries, and He 11<sup>26</sup> 'And others had trials of cruel mockings and scourgings.' Cf. Shaks. Love's Labour's Lost, v. ii. 59

'We are wise girls to mock our lovers so.

They are worse fools to purchase mocking so.'

Mockingstock is used in 2 Mac 77 'to make him a mocking stock' (ἐπὶ τὸν ἐμπαιγμόν, RV 'to the mocking'), and 7<sup>10</sup> 'After him was the third made mocking'), and 7<sup>10</sup> 'Alter him was no bine anaca a mocking stock' (ἐνεπαίζετο). So Raleigh, Hist. World, v. v. 7, 'Philip . . . was taken by the consul; made a mocking stock; and sent away prisoner to Rome.'

J. HASTINGS.

MODERATION.-For moderation in eating and drinking, see TEMPERANCE. The word itself occurs drinking, see TEMPERANCE. The word itself occurs but once in AV, Ph 45 'Let your moderation be known unto all men.' The Greek is τδ ἐπιεικές ὑμῶν. This adj. ἐπιεικής occurs also in 1 Ti 33, Tit 32, Ja 317, 1 P 218; in the first passage AV gives 'patient,' RV 'gentle,' in the others both versions give 'gentle.' The neut. form (τδ ἐπιεικές) does not occur again, but it is common in class. writers as equivalent to ἐπιείκεια. This subst. itself [WH ἐπιεικία] is found in Ac 24 (AV and RV 'clemency'), and in 2 Co 10 (AV and RV 'gentleness'). Both adj. and subst. occur in Apocr., chiefly of the 'gentleness' of God.

But 'gentleness' is not the exact idea. Both τδ έπιεικές and έπιείκεια expressed in class. Greek the spirit that declines to exact its legal right. In Rth. v. 4 Aristotle points out that justice is one thing, equity (ἐπιείκεια) another, and in i. 13, 17 f. he gives a full description of ἐπιείκεια as that which looks to the spirit and not the letter, the intention and not the act, the whole and not the part, etc. This is in exact agreement with what is undoubtedly the derivation of the word, elkós 'reasonable,' becoming,' and the idea in Ph 45 may be expressed in Matthew Arnold's phrase 'sweet reasonableness,' or in a single word 'considerateness.'

In the trans, of the word two mistakes have been made. On the one hand, there was a time when the word degenerated into the expression of respectable behaviour, and respectable behaviour is always the pursuit of a middle course, in mediis tutissimus. Hence Thuc. (i. 76) makes τὸ ἐπικιές equivalent to τὸ μετριάζειν 'moderation.' This idea was seized by the AV translators at Ph 45 (they seem to be alone in thus translating the word), and a modern translation (Ferrar Fenton, The NT in Current English) has 'good conduct.'\* Cf. Lightfoot on Ph 45.

On the other hand, there has been an influence on the other hand, there has been an inducate on the word (perhaps on the Gr. word itself, certainly on its trans.) of  $\epsilon l \kappa \omega$  to yield. Thus Moule, though he says (Camb. Bible, in loc.) that the connexion with  $\tau \delta$   $\epsilon l \kappa \delta s$  'the equitable' is more probable, allows είκω a place, and in his Philippian Studies, p. 228, he translates by 'yieldingness,' explaining it to mean 'selflessness, the spirit which will yield in anything that is only of self, for Christ's sake.' This trans. is represented in Tindale's 'softenes' (followed by Cov., Cran., and Matt.), as well as by RVm 'gentleness'; Luther's Lindigkeit (followed by Weizsäcker) leans too

\*Perhaps this is also the idea contained in Vulg, modestia, if that word is used in its earliest classical sense of 'sobriety,' moderation.' But the Rhemish 'modesty' is a mistranslation (no more than a transliteration, perhaps), for 'modesty' was never used in English in this sonse. Sir Thomas Elyot uses it so in The Governour, i. 267, but he explains that he is adopting the classical sonse of the word: 'In every of these thinges and their semblable is Modestie; whiche worde not beinge knowen in the englishe tonge, no of al them which understode latin, except they had radde good autours, they improperly named this vertue discretion.' Wyellf did not adopt 'modesty,' but used 'temperaunce or pacience' (var. lect. 'tholmoundness').

much in this direction, and even the RV 'forbearance,' which is the favourite rendering since Lightfoot adopted it. 'Gentleness' and 'forbearance' are too passive. The 'considerateness' of the Bible, whether applied to God or man, is an active virtue. It is the spirit of the Messiah Himself, who will not break the bruised reed nor quench the smoking flax, and it is the spirit of every follower who realizes that 'the Lord is at hand.'

### MODERN YERSIONS .- See VERSIONS.

MODIN (Μωδείν or Μωδεείν; but also Μωδεείμ, 1 Mac 222 etc., Jos. Ant. XII. vi. 1, etc., Onomast. Euseb.—rendered by Jerome, Modeim; Μωδεείμ, 1 Mac 164; Μωδιείμ, 2 Mac 1314: Talmud Dyvind and nurud — Neubauer, Geog. du Talm. 99).— This was the ancestral home of the Maccabæan family (1 Mac 217.70), and its interest is derived solely from its connexion with their illustrious history. Unable to endure the outrage upon Jewish faith and feeling perpetrated by Antiochus Epiphanes in Jerusalem, the priest Mattathias retired hither in B.C. 168. But the emissaries of the persecutor followed him; and at last, stung to action alike by the insulting orders of the king's officer and the shameful compliance of a renegade Israelite, he raised his hand on behalf of religion and fatherland. The blow he struck initiated that struggle for freedom which, under the leadership of his heroic sons, forms such a brilliant chapter in the closing history of his people (1 Mac 21.18.22; Jos. Ant. XII. vi. 1, 2; BJ I. i. 3). When Mattathias died he was buried in Modin (1 Mac 270), and here also each of his sons, with their mother, was finally laid to rest (1 Mac 919 1325-80; Jos. Ant. XII. vi. 6, etc.). Judas encamped by Modin the evening before his successful night-raid on the army of Antiochus Eupator (2 Mac 1314); and here John and Judas, the sons of Simon, rested overnight before going forth to the defeat of Cendebæus (1 Mac 164).

Simon, the last of the five brethren, built at Modin a splendid sepulchral monument, to perpetuate the memory of his heroic family. 'It was a square structure, surrounded by colonnades of monolith pillars, of which the front and back were of white polished stone. Seven pyramids were erected by Simon on the summit for the father and mother and the four brothers who now lay there, with the seventh for himself when his time should come. On the faces of the monument were basreliefs, representing the accoutrements of sword and spear and shield, "for an eternal memorial" of their many battles. There were also the sculptures of "ships"—no doubt to record their interest in that long seaboard of the Philistine coast, which they were the first to use for their country's good. A monument at once so Jewish in idea, so Gentile in execution, was worthy of the combination of patriotic fervour and philosophic enlargement of soul which raised the Maccabæan heroes so high above their age' (Stanley, Hist. of Jewish Ch. iii. 318).

This famous structure continued in a state permitting recognition down to the 4th cent. of the Christian era (Williams, Holy City, i. 96), and so long there could be no question as to the site of Modin. Then all trace of the tomb seems to have been lost, and for many centuries the situation of the town was unknown. At different times the home of the Maccabees has been sought at Latrûn, at Soba, and even away to the S. of Anathoth. It is unnecessary to discuss the arguments in favour of these proposed identifications. The ancient Modin is certainly represented by the modern el-Medyeh, a village standing on the E. of Wady Mulaki, about 13 miles W. of Bethel, on one

of the lower ridges by which the mountain range lets itself down towards Lydda. Struck by the resemblance between the ancient and modern names, and also by the name Kabur el-Yehud, 'Tombs of the Jews,' given to a remarkable series of tombs near by, the late Dr. Sandreczki, of Jerusalem, called attention to the place in 1869; and subsequent investigation has gone to confirm his suggestion. The identification has been opposed by le Camus (Rev. Biblique, i. 109 ff.) on insufficient grounds (cf. Buhl, GAP 198).

Modin was near the plain (1 Mac 164.5); the monument built by Simon was clearly visible from the sea (1 Mac 13<sup>29</sup>); and we learn from Euseb. and Jerome, that Diospolis (Lydda) was not far distant. *El-Medych* itself is hidden from the sea by the slope of the hill; but immediately to the south a rocky eminence, er-Ras, with ancient remains, commands a view of the lower hills, the plain of Sharon, and the sea, while Lydda is seen at a distance of not over 6 miles, reposing among her fruitful clives. On the opposite side of the Wady, about half a mile west of the village, there are several tombs, one, associated with the name Sheikh el-Gharbawi, claiming special interest on account of its size and construction. At one time account or its size and construction. At one time it was thought this might prove to be the tomb of the Maccabees; but later investigation revealed its Christian origin. To these tombs Conder gives the name Kabûr el-Yehûd. Of the ruins 1 mile to the south, called by Sandreczki Kabûr el-Yehûd, he speaks as Khirbet el-Medyeh. Guérin says an old inhabitant of the village gave the name Khirbet el-Medyeh to the whole group of ruins. The tomb el-Medych to the whole group of ruins. The tomb of the Maccabees is not yet identified. The place is about 16 miles from the coast. At this distance, to one looking from the sea, towards evening, with the sun behind him, such a monument would stand out with great distinctness, even if the details of the carving could not be plainly traced.

LITERATURE.—PEF Mem. iii. 841 ft.; Stanley, History of Jewish Ch. iii. 207, 318; G. A. Smith, HGHL 1 212 n.; Conder, Judas Macabaus, 84, 176; Schürer, HJP 1. i. 200 ft.; Guérin, Samarie, ii. 65 ft., 404 ft., Galilée, i. 46 ft. W. EWING.

MOETH  $(M\omega \epsilon \theta)$ .—1 Es  $8^{69}$  = Noadiah of Ezr  $8^{29}$ . See Noadiah, No. 1.

MOLADAH (πήνρ).—A city in the south of Judah, Jos 15<sup>26</sup> (B Μωλαδά, A Μωδαδά); reckoned to Simeon in 19<sup>2</sup> (B Κωλαδάμ, A Μωλαδά) and 1 Ch 4<sup>28</sup> (B Μωλαδά, A Μωλαδά); peopled after the Captivity by Judahites, Neh 11<sup>26</sup> (BA om., κο<sup>2 mg</sup> Μωλαδά). In the 4th cent. A.D. (Onomast. s.v. 'Arad') a place called Malatha is located 4 Roman miles from Arad (cf. Jos. Ant. xVIII. vi. 2). This site is clearly the present Tell el-Milh, 'hill of salt,' and is that of an early town, but the modern name has no connexion with the Heb. Moladah, the site of which is unknown (cf. Buhl, GAP 183, who rightly points out that instead of 4 Roman miles from Arad, as Eusebius states, Tell el-Milh and Arad are double that distance apart) in spite of the identification with Tell el-Milh which is adopted by Robinson (BRP<sup>2</sup> ii. 201), Guérin (Judée, iii. 184 ff.), and others. C. R. CONDER.

MOLE. — Two words are tr<sup>4</sup> in AV 'mole.'
1. ηφήπ tinshemeth. This occurs twice in the list of unclean creatures: (a) As the name of a bird (Lv 11<sup>18</sup> LXX πορφυρίων, AV 'swan,' RV 'horned owl,' m. 'swan'; Dt 14<sup>18</sup> LXX τβις, AV 'swan,' RV 'horned owl.' See Swan, Owl.). (b) As the name of a 'creeping thing' at the end of a list of lizards (Lv 11<sup>80</sup> LXX dσπάλαξ, Vulg. talpa, AV 'mole,' RV 'chameleon'). The authority of the LXX and Vulg. favours the rendering 'mole.' No true mole exists now in Palestine. The word

doπάλαξ probably refers to the mole-rat Spalax typhlus, Pall., a rodent, the appearance and habits of which closely resemble those of the genuine mole. It is about the size and shape of a common brown rat, but with much shorter legs. The forelegs are adapted for digging. The head is forelegs are adapted for digging. The head is flattened from above downwards, with a wedgeshaped snout, which acts as a shovel in perforating the soil, and raising the hillocks which occur every few feet along the burrow. The fur is greyish-brown. The eyes are hardly to be made out at all, being quite rudimentary. The animal is nocturnal in its habits, and seldom seen above the surface. It is called by the Arabs khuld, plainly the cognate of holed, which EV tr. 'weasel.' See CHAMELEON,

OF hotea, which EV tr. 'Weasel.' See CHAMELEON,
WEASEL; and Dillmann on Lv 11<sup>80</sup>.
2. http://diphor.peroth (to be read http://diphorparoth, see Dillm. ad loc.), τὰ μάταια, taipæ.
This expression is tr<sup>d</sup> in EV (Is 2<sup>20</sup>) 'moles.'
The LXX τὰ μάταια = 'the vain things,' sheds no light on the meaning. But the root haphare-Arab. hafar, 'to dig or burrow,' and paroth re-calls Arab. far, generic for 'rats' and 'mice.' The compound name may be that of some digging or burrowing animal. There is a large number of such creatures in the Holy Land, of which we note: fam. Muridæ, the rats and mice, including numerous species of Acomys, the Porcupine mouse; Mus, the true rats and mice, of which there are a considerable number; Cricetus, the hamster; Gerbillus and Psammomys, the sand rats; Spalacide, the mole rats; Dipopide, the jerboas; Myrcide, the dormice, etc. It is most probable that the Heb. hapharparoth is generic for all such animals as burrow in waste places, as 'bats,' in the same passage, is generic for the well-known winged tribe of dwellers in caves and rule.

G. E. Post. MOLECH, MOLOCH (η/hm ham-Molech, always with the article except in 1 K 117, Μολόχ, Vulg. Moloch).—The Heb. pointing does not represent the Motion).—The Heb. pointing does not represent the original pronunciation, but is intended to suggest bösheth, 'shame'; just as -baal in Ishbaal and Meribaal was changed to -bosheth in Ishbosheth and Mephibosheth. Originally the word was simply ham-Melech, 'the king.' We find also the forms Milcom (DD/D), Malcam (DD/D), 'A $\mu\epsilon\lambda\chi\delta\mu$ ,  $\mu\epsilon\lambda\chi\delta\mu$ ,  $\mu\epsilon\lambda\chi\delta\mu$ ,  $\mu\epsilon\lambda\chi\delta\mu$ ,  $\mu\epsilon\lambda\chi\delta\lambda$ ,  $\mu\delta\lambda\lambda$ , Melcom), and Malcan and  $\mu\epsilon\lambda\chi\delta\mu$ ,  $\mu\epsilon\lambda\chi\delta\lambda$ ,  $\mu\delta\lambda\lambda\lambda$ , Melcom), and

Malcan; see below.

i. Table of the occurrences of Melech, etc., as divine names.—(a) Cases in which MT uses the pointing Molech to show that it regards Melech

pointing Molech to show that it regards Melech as the name of a false god. Lv 18<sup>21</sup> 20<sup>2.5.4.8</sup> άρχων; 1 K 11<sup>7</sup> A μελχό, Β βασιλεύς, Luc. μελχόμ; 2 K 23<sup>10</sup>, Luc. μελχόμ; Jer 32<sup>25</sup> τῷ Μολὸχ βασιλεῖ.

(b) Cases in which Melech is pointed as a common noun 'king' by MT, but is regarded as a divine name by other authorities. Is 30<sup>25</sup> EV 'the king,' with LXX and Vulg.; Is 57° EV 'the king,' with Vulg.; LXX has entirely different reading. In both, Cheyne, Duhm, Siegfried-Stade (Lex.) have Melech. In Am 7<sup>13</sup> EV 'the king's sanctuary,' so LXX and Vulg., it has been suggested that 'king' should be Melech, but this is improbable. improbable.

(c) Cases where MT points MLKM as the divine name,  $Milcom: 1 \text{ K } 11^{6.38}$ ,  $\tau \hat{\varphi} \beta a \sigma \iota \lambda \epsilon \hat{\iota} \ a \dot{\sigma} \tau \hat{\omega} \nu$ ; 2 K  $23^{18}$  A  $d\mu \epsilon \lambda \chi \delta \mu$ , B  $\mu \epsilon \lambda \chi \delta \lambda$ .

(d) Cases where MT points MLKM as Malcam,

Am 528 RV 'your king,' so Symm. and Theod.; AV 'your Moloch,' with LXX τοῦ Μολόχ; Aq. and Syr. Malchom; cf. Siccuth; Zeph 18 AV, RV Malchlam, so LXX MSS ap. Field, μολόχ, μελχόμ, Vulg. RVm 'their king,' LXX B, etc.
(e) Malcan, in 2 S 1221, the reading of the Kethtbh, 1222 MLKN, was probably intended to mean 'he passed them through the fire to Melech'; but the reading 1222 malbēn, 'brick-kiln,' of the Kerê, i.e. as RVm 'made them labour at the brick-kiln,' is probably correct; so Budde, H. P. Smith, LXX πλινθεῖον, Vulg. typo laterum.

ii. Relation of the forms Melech, Milcom, etc., to one another.—Baethgen (Beiträge, p. 15) maintains that though Milcom was originally only a dialectic variety of Molech, yet Molech and Milcom were regarded as two distinct deities, and supports his

garded as two distinct deities, and supports his contention by the statement in 2 K 23<sup>10.18</sup> that, at Topheth in the valley of the Bene Hinnom, children were passed through the fire to Molech, while, opposite Jerusalem 'on the right hand of the mount of corruption,' the Mount of Olives, there was a high-place for *Milcom*. The argument implies that vv. 10. 18 belong to the same source: thus Kamphausen (Kautzsch's AT) refers both to the Deuteronomic author of the pre-exilic Book of Kings. Benzinger (Könige), however, refers them to different sources, and regards Melech (MT Molech) in 10 as a title of J" (cf. below). Melech and Milcom were originally variants of the name of the same deity, they are both applied to the god of Ammon; cf. 1 K 117 (Melech here may be a mistake), 2 K 2318; but at different sanctuaries and among different peoples, one or other name may have been specially used, with the natural result that the *Melech* of one sanctuary or one people would be popularly distinguished from the Milcom of another. Malc(h)am and Malc(h)an (if read) are only mistaken pointings of Milcom. The deity as worshipped by different peoples would be differentiated through various causes; the sense of the special bond between the national god and the nation would encourage the view that this national god was not the same as any deity worshipped elsewhere; this view would be supported by dialectic differences between the forms of the name, e.g. the Phœnician Milk and the Ammonite Milcom, and by such expansions of the name as the Phœnician Melkart (ברת מלך קרח Milk of the City) and the Palmyrene Malachbel; cf. below.

The references to Milcom (1 K 11<sup>5. 83</sup>, 2 K 23<sup>13</sup>; cf. Am 1<sup>15</sup> above) and Molech (1 K 11<sup>7</sup>) as the 'abomination' or 'god' of the Ammonites, show that Milcom or Molech was the national god of Ammon, and stood to Ammon in the same special henotheistic relation in which Chemosh stood to Moab, and J" to Israel. The analogy suggests that in practice such a relation by no means excluded the worship of other gods. But the El in the name Pudu ilu, king of Ammon, on Sennacherib's 'Taylor Prism' inscription, is merely a general term for 'god,' equivalent to Milcom; and the same may be true of the baal in Baalis, king of Ammon, Jer 40<sup>14</sup>. Baethgen, indeed (Beiträge, p. 16), suggests that Baalis is a compound of Baal and Isis, either as a double name asserting the identity of the two, or with the meaning 'Spouse of Isis,' Isisgemahl. But Gratz explains Baalis as of Isis, Isisgemahl. But Gratz explains Baalis as פּרְשֵלִים 'son of delight' (Oxf. Heb. Lex.). The reading בעלים Baalim, of some MSS, and of Jos. (Ant. X. ix. 2), is clearly a mistake. No details of (d) Cases where MT points MLKM as Malcam, their king; but other authorities regard it as the divine name, Milcom: 2 S  $12^{30}$  (=1 Ch  $20^{2}$ ) AV, RV 'their king,' so Vulg.; RVm Malcam, i.e. Milcom, so LXX; 1 Ch  $20^{3}$  AV, RV 'their king,' RVm Malcam, so LXX and Vulg.; Jer  $49^{1.5}$  (cf. Am  $1^{10}$ ) AV, RVm 'their king,' so Targ.; AVm Malcam, so LXX  $\mu e \lambda \chi \delta \lambda$ , and Vulg.; Am  $1^{16}$  (cf. Jer  $49^{1.5}$ ) EV 'their king' with LXX; but Aq., Symm., Vulg., and Syr. Melchom, etc.; haps the 'Chemarim' or priests of Zeph  $1^{4}$  were priests of Molech (cf. CHEMARIM). None of the passages which speak of child-sacrifice connect it either with Milcom or the Ammonites, and we do not know how far the Ammonite worship of Milcom resembled the Phœnician worship of Melech.

iii. The worship of Moloch (Melech) in Israel and the relation of Moloch to J" raise difficult questions: the following facts are clear:-

(a) There was a high-place for Milcom, the god of Ammon, on the Mount of Olives, 1 K 116.33, 2 K 23.13, the erection of which was ascribed to Solomon; 11.5.33 are regarded as Deuteronomic, but may embody an authentic tradition.

(b) 'Passing children through the fire to ham-Melech' is forbidden in Lv 18<sup>21</sup> 20<sup>2. 2. 4. 5</sup>, Dt 18<sup>10</sup> (Melech not named). 2 K 16<sup>3</sup> states that Ahaz made his son to pass through the fire,' so 216 of

Manasseh.

The Deuteronomic author of 2 K 1717 states that the Israelites of the Northern Kingdom passed their children through the fire. From 2 K 23<sup>10</sup>, Jer 7<sup>30-32</sup> 19<sup>1-18</sup> we learn that such sacrifices were offered at Topheth (wh. see), in the valley of Ben Hinnom, outside Jerusalem; cf. Ps 106<sup>37, 38</sup>, Ezk 16<sup>20, 21</sup> 23<sup>37-39</sup>.

(c) From Jer 195, where the children sacrificed at Topheth are said to be offered to Baal, it appears that the deity thus worshipped was known both as

Baal and Melech.

Baat and Melech.

(d) In Is 6<sup>b</sup> J" Zebaoth is described as ham-Melech,
'the king,' and is frequently spoken of as the 'king
of Israel,' Is 44<sup>c</sup>, cf. Jer 8<sup>16</sup> 'her king,' Mic 2<sup>18</sup>
'their king.' Further, the occurrence of such
numes as Malchiram 1 Ch 3<sup>16</sup>, Malchishua 1 S 14<sup>46</sup>,
Ebed-melech Jer 39<sup>16</sup>, Nathan-melech 2 K 23<sup>11</sup>,
Regem-melech Zec 7<sup>2</sup>, point to the use of Melech
as a divine name. Ebed-melech, however, was an
Ethionian. Nathan-melech, a cupuch, and thora Ethiopian; Nathan-melech, a cunuch, and therefore probably a foreigner; and Regem-melech was a Babylonian Jew.

These facts are variously explained. (1) Melech and Milcom are regarded as absolutely identical, and the child-sacrifices to Melech as part of the worship of Milcom borrowed from the Ammonites. But Melech is probably to be distinguished from Milcom, cf. above; and in 2 K 163 the practice of child-sacrifice is not said to have been borrowed from the Ammonites, but from the Canaanites, cf. Dt 12<sup>31</sup>.

(2) The worship of Melech by child-sacrifice was borrowed from the Canaanites, and was distinct from the worship of Milcom. This would be supported by 2 K 16<sup>3</sup> and by the identification of Baal and Melech in Jer 19<sup>5</sup>. Probably the Tyrian Baal, whose worship Jezebel introduced into the Northern

Kingdom, was Melech or Melkarth.

(3) Whichever of the two previous views be accepted, the Melech in question was quite distinct from J". The use of Melech as a title or even name of J" no more identified Him with the Phoenician Melech, than the use of the title or name Baal identified J" with the Tyrian Baal.

As Schultz says (OT Theol., Eng. tr. i. 233 n.), 'In the oldest sources of the Semitic religion, the god who became J" for the Israelites may not have been different from the one who became Moloch for the Canaanites. But, since the time when Israel and the Hamites separated, there was at any rate no kinship between J" and Moloch, not to speak of identity.

(4) The Melech to whom child-sacrifices were offered was simply J" under another name (Benzinger on 2 K 23<sup>10</sup>; Smend, AT Theol. 271). When J" says, Jer 19<sup>5</sup>, of the child-sacrifices to Baal, 'which I commanded not, nor spake it, neither came it into my mind,' the statement seems to imply that those who offered these sacrifices thought that they were obeying a command of J". thought that they were obeying a command of J",

cf. Ezk 2337-39. Similarly, the account of the proposed sacrifice of Isaac points to the existence of a practice of offering firstborn sons to J", which practice was forbidden by the prophetic revelation; cf. Ex 22<sup>29</sup> E, and Jephthah's vow, Jg 11<sup>31</sup>. This view might imply either that J" and Melech were originally one, and afterwards differentiated by prophetic teaching; or that two distinct deities, J" and Melech, were popularly identified. It can scarcely be that Melech was used as a mere title of J" in connexion with child-sacrifice, without any reference to the Phonician Melech.
iv. Range of Worship.—Melech is found as a

divine name, not only in Ammon and Israel, but in all Semitic peoples of whose religion we have any considerable knowledge. The Assyrians and Babylonians had a god Malik; the Sepharvites had Adram-melech and Anam-melech, 2 K 17<sup>31</sup>. The Phonicians worshipped Melkarth = Melech Kiriath, 'king of the city,' at Tyre, Carthage, etc. The Palmyrenes worshipped Malach-bel (Baudissin,

Studien, p. 193 ff.).

It is generally stated that the Moabite Chemosh was a form of Mclech (Baethgen, Beiträge, p. 238; Movers, Phön. p. 333 f.). This seems probable on general grounds, on account of the wide extent of the worship of Melech amongst the Semites, and the connexion of Baal and possibly J" with Melech; and the intimate racial and political relation of Moab and Ammon. But the express testimony is hardly conclusive. In Jg 1124 Chemosh is spoken of as the god of the Ammonites, in a passage often ascribed (Budde, Moore) to R<sup>JE</sup>, who should have been well informed on the subject. But the whole passage hopelessly confuses Ammon and Moab; the reference to Chemosh may be a slip; or the passage may originally have referred to Moab and passage may originally have referred to Moab and have been very imperfectly adapted to its present context; or it may be late post-exilic. Melech in l. 23 of the Moabite Stone is treated as a divine name, 'Moloch,' by Neubauer and Sayce (HCM 367, 373), but is more probably to be translated 'king' with Smend and Socin.

On Sennacherib's 'Taylor Prism' an Edomite ling Melih germy is mostioned in which Melih

king Malik-rammu is mentioned, in which Malik is doubtless a divine name, showing that Melech

was worshipped in Edom.

This widespread worship of Melech is regarded as an inheritance of the separated Semitic peoples from the primitive stock; but it can scarcely be assumed that his attributes and worship were the same amongst all the different races. Indeed, as in the case of the Ammonite Milcom and the The case of the Ammonte Milcom and the Phenician Molech or Melkarth, different peoples considered that they were worshipping different gods. Amongst the Greeks and Romans 'king' or 'the king' is not a divine name (Baethgen, Beitrage, p. 263), though an occasional title of various code. various gods.

v. Attributes.-Melech, like Baal, Adon, Marna, implies the recognition of the sovereignty of the implies the recognition of the sovereignty of the god over his people. The offerings by fire, the identity with Baal, and the fact that in Assyria and Babylonia Malik, and at Palmyra Malach-bel, were sun-gods, suggest that Melech was a fire-or sun-god (Jastrow, Religion of Babylonia, p. 176 f.). Melkorth at Tyre was identified with Hercules, at Carthage with Saturn, Such pages on Milk.

at Carthage with Saturn. Such names as Milk-baal, Milk-Astart, Milk-Osir, suggest identification with Baal (as shown otherwise), Astarte, Osiris.
As in the case of Baal and other Semitic deities, Melech had a feminine counterpart Milkat, cf. Milcah, Gn 11<sup>29</sup>.
vi. Worship.—Melech was doubtless worshipped

in a similar fashion to other Semitic gods. feature which seems peculiar is the practice of sacrificing children as burnt-offerings, which is found amongst the Israelites, Phœnicians, and

Sepharvites, 2 K 17<sup>81</sup>; cf. Mesha's offering of his firstborn to Chemosh.

The theory of some Rabbis, that 'passing through the fire' meant merely a ceremonial purification by walking between two fires, is contrary to all the evidence. But the case of Isaac (Gn 2210) seems to show that in Israel the child was slain before the fire was kindled. Diodorus Siculus (xx. 14) describes child-sacrifices at Carthage, at which the victim was placed on the hands of a colossal image, from which it rolled off into a pit of fire. Kimchi's description (on 2 K 2310) of the hollow brazen image of Molech within a sevenfold temple outside Jerusalem, and of the placing of the victim in the hands of Molech, is a mere mediæval conjecture based on Diodorus or on some other record of the Carthaginian sacrifices.

The object of these offerings was probably to propitiate the deity, or show devotion to him, by the gift of the most precious possession. Movers (Phon. 328-330), however, holds that the children offered were supposed to be purified from all fleshly corruption and to attain union with the deity.

In the NT, Molech is mentioned only in St. Stephen's quotation, Ac 7<sup>43</sup>; cf. Am 5<sup>23</sup>.

MOLID ("")D).—The name of a Judahite family, 1 Ch. 229 (B. Μωήλ, Α. Μωδάδ). Kittel (in SBOT) coints out that the reading of B. namely MOLIA.

points out that the reading of B, namely M $\Omega$ H $\Lambda$ , has originated from M $\Omega$ H $\Delta$  ( $\Lambda$  and  $\Delta$  being often confused), and that Mano, i.e. מוֹלִיר = מוֹעֵיר, the two letters y and being similar in the oldest script.

MOLLIFY (from mollis 'soft') is used literally 'to soften,' in Is  $1^6$  'mollified with ointment,' and Wis  $16^{12}$  'mollifying plaister' ( $\mu d\lambda \alpha \gamma \mu a$ ). Cf. Purchas, Pilgrimage, 213, 'When they have killed a great beast, they cut out all the veines and sinewes... and likewise all the Suet: which done, they dive them in water to mollife them.' The figurative use seems to be quite as old, and was common about 1611, though not found in AV. Thus Tymme, Calvin upon Genesis, p. 605 (on ch. 28), 'It may be, that he was thus sent away, that the cruell mind of Esau, by so miserable a sight might be mollified and aswaged' (Lat. ad mollitum flecteretur). So Tindale, Prol. to 1 Jn, 'The lusts of the flesh are subdued and killed, and the spirit mollified and made soft.' Cf. Knox, Works, iii. 93, 'O! hard ar the hartis whome so manyfold, most sueit, and sure promissis doith not molefie.' And in the Preface to Rhem. NT, 'Moreover, we presume not in hard places to mollifie the speaches or phrases, but religiously keepe them word for word, and point for point, for feare of missing or restraining the sense of the holy Ghost to our phantasie.'

#### A. UNCOINED MONEY FROM THE EARLIEST TIMES TO THE EXILE.

§ 1. Money in Palestine before the Conquest. The principal weight-standards of antiquity .-The oldest traditions of the Hebrews, as these have come down to us, do not reach back to the time when trade was still carried on by the primitive system of barter. Already in the patriarchal age the existence of a metallic currency is assumed (cf. Gn 1713 'he that is bought with thy money,' 13903, lit. 'thy silver,' and 2313st cited below); and rightly so, for, as we now know, the land of Canaan was even at this early period far advanced in the arts of civilization, including the use of the precious metals as media of exchange. For the century immediately preceding the Hebrew conquest we have the contemporary evidence of the Tel el-Amarna letters, which show not only that gold and silver were in daily use as money, that s, as media in terms of which all other merchandise was valued, but also that already the 'narrowing lust of gold' had asserted its empire over men (see Hugo Winckler's or other rendering, passim). The value, in other words, the purchasing power of these metals, was determined by their weight—a fact which renders some acquaintance with the metrology of the ancients an indispensable preliminary to the study of their money. Fortunately, the question of the origin and inter-relation of the weight-standards of antiquity—one of the most complicated in the whole range of Oriental archæology — will be discussed in the article WEIGHTS AND MEASURES. It will suffice, therefore, in this place to sketch in the barest outline the results of the most recent metrological research, taking as our guide the elaborate treatise of the veteran metrologist, Friedrich Hultsch, Die Gewichte des Alterthums nach ihrem Zusammenhange dargestellt (Leipzig, 1898; cf. C. F. Lehmann, Sitzungsberichte der archäolog. Gesell-Das altbabylonische Maas- und Gewichtssystem, Leyden, 1893; also G. F. Hill, A Handbook of Greek and Roman Coins, 1899, p. 26 ff.). Proceeding from the simpler to the more com-

a system characterized by extreme simplicity. Two weights only were in use from very early times—the ket (also transliterated kat, kite, gedt, etc.), of 140 grains, and its multiple the deben (also transliterated uten, tabun, etc.), equal to ten ket, or a little over 1400 grains (Hultsch, 1403 5 grs.). The Rhind mathematical papyrus, which dates from the Hyksos period, contains, according to an excellent authority, the earliest reference in Egyptian literature to the metals as standards of value. 'It is not known,' says Mr. Griffith in his important essay, 'Notes on Egyptian Weights and Measures,' in PSBA xiv. p. 436 ff., 'how far back into antiquity true money, i.e. pieces of defi-nite weight and value, can be traced. About the time of the 18th Dynasty we know that the precious metals were kept in dust, in ingots, and in ornamental forms, but more especially in rings, and it is almost certain that the important weightname uten has the root-meaning of a ring or coiled wire. It is well known not only that the metals were bought and sold by weight, but further, that goods of all kinds might be valued at a certain weight of metal in order to be exchanged against each other. One of the most frequently reproduced of contemporary illustrations of the daily life of the Egyptians is the weigher with his balance and scales, the stone weights of various animal forms (ox, or ox-head only, gazelle, etc.) in the one scale balancing in the other the rings of precious metal, which appear to have had 'a uniform diameter of about 5 inches' (Erman, Egypt, 464).

The Egyptian temple inscriptions contain numeralists the second of the contain temple inscriptions contain numeralists the second of the contain temple inscriptions contain numeralists.

ous lists of the amount of tribute paid to successive Pharaohs by the kings and peoples of Syria, the best known being that inscribed on the walls of the great temple of Amon at Karnak by order of Thothmes III. (frequently published; see histories of Brugsch, Petrie, etc., under Thothmes). From the mass of detail in this list three typical entries may be selected as having an important bearing on the topic of this section. (1) The tribute of Naharina in Thothmes' thirty-third year (B.C. 1471 acc. to Mahler's chronology) consisted, inter alia, of 45 deben 1 ket of gold; (2) that of 'the great Khita,' or Hittites, comprised among other items shirty, or Intities, comprised among other items 8 silver rings weighing 301 deben; (3) in the thirty-fourth year 'the tribute of the princes of the land of Retennu,' or Palestine, shows, interalia, 55 deben 8 ket of gold. From these and similar fractional weights (45<sub>75</sub> deben, 55‡ deben, and prince we brow that the sale and in the sale and single we have the sale and single weak sale and and, since we know that the gold and silver rings were accurately adjusted to definite weights, the curious number 301 deben) metrologists have long suspected that the tribute here specified had been re-weighed before being entered as above by the Egyptian recorder, its original weight having been Egyptian recorder, its original weight having been in terms of another system and in whole numbers (J. Brandis, Das Münz., Maas., und Gewichtswesen in Vorderasien, 1866, p. 91 ff.; Fr. Hultsch, Griechische und römische Metrologie, zweite Bearbeitung, 1882, 374 ff. [this work to be often cited in the sequel as Hultsch, Metrol.]; id. Gewichte des Alterthums, 1898, 25 ff.). This second weight-system in use in Syria and Palestine in the 15th cent. B.C. it was inferred could only in the 15th cent. B.C., it was inferred, could only be that known as the Babylonian system. This inference was raised to a certainty by the discovery of the Tel el-Amarna clay tablets, which conclusively proved the exclusive use of the Babylonian weights by all the peoples of Mesopotamia and Syria at the date in question. + Here we find not only

\* For the construction of the Egyptian balance, see Flinders Petrle, A Season in Egypt, p. 42, and pl. xx.; also art. Balance in this Dictionary, by the same authority.
† The importance of this testimony was first noted by C. F. Lehmann, 'Ans dem Funde von Tel-el-Amarna' in the Zeitsch.

f. Assyriologie, iii. 391-393.

the sovereigns of Babylonia, such as Kallimasin (see Winckler's Tel-el-Amarna Tablets, 2<sup>15, 21</sup>, 5<sup>24, 27, 28</sup>) and Burnaburyash (7<sup>11, 14</sup>), reckoning their gold and silver by shekels, minas, and talents, but also the kings of the West, such as Dushratta of Mitanni (17<sup>50, 51, 61</sup>) and the king of Alashia, which is Cyprus (25<sup>10</sup> 26<sup>9</sup> 27<sup>18</sup> 33<sup>8</sup>—in three cases the metal

is copper), employing the same system.

This system, which is based on the mina, with its subdivision (50th) the shekel and its multiple the talent (60 minas), was in use in Babylonia from time immemorial. From the evidence of inscribed stone-weights dating from the reigns of Gudea and Dungi, i.e. from the first half of the third millennium B.C., Dr. C. F. Lehmann has recently proved in numerous essays (see esp. Das atthabylonische Maas- und Gewichtssystem, 1803) that what may be called the common trade mina was a weight averaging 4912 grammes=circa 7580 grains. The sixtleth part of this trade mina was the shekel of c. 126 grains, while the talent consisted, as above indicated, of 60 minas, or 3600 shekels. The temple accounts from Tello further show that about B.C. 2000 the shekel was sub-divided into 180 she (G. Reissner, 'Altbabylonische Masse u. Gewichte,' in the Sitzungsb. d. Berliner Akad. d. Wissensch. 1896, pp. 417-426). Side by side with the above series of trade weights was a parallel series of the same denominations, but of double the weight. The latter are known as the heavy shekel (252 grains), mina, and talent respectively, to distinguish them from the light shekel (126 grs.), mina, and talent first mentioned. All these were employed for the weighing of ordinary merchandise. For weighing the precious metals, on the other hand, important alterations were made in the scale. Thus, for gold, the shekel of 126 (and 252) grains; was retained, but a new mina of 50, instead of 60, shekels was created, the talent of gold, however, still comprising 60 of these new minas of c. 6320 (12,640) grains, and therefore 3000 shekels, as compared with the trade talent of 3600 shekels. For silver, as money, the weights were on a different scale, being to the weights for gold just enumerated in the ratio of 4:3; in other words, the light Baby-lonian silver shekel=168 grains, the mina of 50 shekels=8400 grs., and the talent=60 minas (with, as before, their respective heavy denominations of double these weights). It has been customary since Brandis (see op. cit.) to account for this double scale for the precious metals by the longprevailing ratio of gold to silver in early times, viz. 40:3, which means that an ingot of gold was worth 131 times its weight in silver. The extreme awkwardness of this proportion for every-day transactions, if the metals were to be weighed on one and the same standard, scarcely needs to be pointed out. Hence, in order that a given weight of gold might be exchangeable for a whole (not a fractional) number of bars or wedges of silver, the weight of the silver shekel (mina, talent) was raised till it stood to that of the gold shekel in the proportion of 4:3. The practical result of this alteration was that a given weight of gold was always equivalent to ten times the same weight of silver (1 gold shekel=10 silver shekels, 2 minas of gold=20 minas of silver, etc.).§

of fine gold!

† Throughout this article fractions have been avoided, except where special accuracy seemed to be required.

‡ The reader is reminded that an ounce troy weight contains 480 grains; the light Babylonian gold shekel, therefore, is slightly over ‡ oz. troy, and only three grains heavier than an English sovereign (see Table, below).

§ The equation of the two metals may be stated more explicitly thus: 1 gold shekel of 126 grs. = 126×13½, or 1680 grs.

<sup>\*</sup>The statement 819st is noteworthy. Burnaburyash complains that the king of Egypt had sent him nominally 20 minas of gold, but, when tested, this quantity had shrunk to 5 minas of fine gold!

This extremely convenient ratio between the respective denominations was not, however, universally adopted in the East. The great mercantile cities of the Phonician coast when, at a later period, they began to strike coins, employed a heavy silver shekel of circa 224 grains—hence neavy silver shekel of the Phænician shekel—with its companion light shekel of 112 grains. sliekel was one of the most widely spread of all the weights of antiquity, being found not only through-out Syria, but in Western Asia Minor, and even in Greece (for further details and discussion as to origin, etc., see WEIGHTS AND MEASURES). stands, as a glance will show, to the heavy Babylonian silver shekel in the proportion of 2:3;\* consequently with gold to silver in the ratio of 13;:1, the gold shekel of 252 (126) grains is equivalent to fifteen Phenician silver shekels of 224 (112) grains, since  $252 \times 13 = 224 \times 15$ . On the Phænician silver standard, as on the Babylonian, 50 shekels went to the mina, and 60 minas to the talent.

In addition to all the above weights on the common standard, we find still another parallel series on the so-called royal standard—the origin of which can only be conjectured,—the latter being simply the common weights raised by a certain percentage. Thus the gold shekel on the royal standard weighs 130 (and 260) in place of 126 (and 252) grains. The first of these weights, the light royal shekel of 130 grains, plays an important part in the subsequent history of the gold coinage of Western Asia (see below, § 3).+

The Babylono-Phonician weight-system, as outlined above, clearly stands in an intimate relation to the Egyptian. Happily, the long-stand-ing feud between Assyriologists and Egyptologists as to the relative antiquity of the two systems does not here concern us, but the fact remains that the Babylonian gold shekel of 126 grains is exactly 1%ths, the Babylonian silver shekel of 168 grains ths, and the Phœnician silver shekel of 224 grs. ths of the Egyptian weight-unit, the ket of 140 grains—results which cannot be the 'accident of an accident.

§ 2. Hebrew money from the Conquest to the Exile. Sterling value of the shekel.—The evidence of the tribute-lists of Thothmes III. and other Egyptian monarchs, confirmed by the more explicit data of the Tel el-Amarna letters, may now be taken as proving beyond a doubt that, in taking possession of the land of Canaan, the Hebrews settled among a people long accustomed to the use of gold and silver as the recognized media of exchange, and to the use of the balance for estimating the amount of each metal to be given or received. We have not yet been fortunate enough to recover inscribed Canaanite weights of this early period, so that one is compelled to admit at the outset that we have no direct witness to the weight of the ancient Hebrew shekel. Still the facts adduced in the foregoing section regarding the wide diffusion, in space and time, of the Babylono-Phonician weight-system, afford at least a strong

of silver, since gold was to silver in the ratio of 13½:1. Dividing this amount of silver into 10 equal parts, we see that 1 gold shekel of 126 grs. = 10 silver shekels of 168 grs. 224 (112):333 (168)::2:8.
† Professor Ridgeway, in his elaborate work, The Origin of Metallic Currency and Weight-Standards (1892), has endeavoured with much ingenuity and learning to prove (1) that this light shekel of 130 grains lies at the basis of all the weight-systems of antiquity, and (2) that originally 'it was nothing more than the amount of gold which represented the value of the cow, the unit of barter throughout all Europe, Asla, and Africa.'

Africa.'

I Whatever may have been the standard of weight in use among the Hebrews before the conquest, there need be no hesitation in affirming that from that epoch onwards the Hebrews adopted the standards of the country in which they settled.

presumption in favour of our accepting it as the system by which money was reckoned in Old Testament times. This presumption is confirmed by the following testimonies of the historian Josephus. In the fourteenth book of his Antiquities he informs us that Crassus robbed the temple of a beam of solid gold 300 minas in weight, and adds the following important sentence: and adds the following important sentence: ' $\dot{\eta}$   $\dot{\eta}\dot{\epsilon}$   $\mu\nu\hat{a}$   $\pi a\rho'$   $\dot{\eta}\mu\hat{\nu}$   $l\sigma\chi\dot{\nu}\dot{\epsilon}\iota$   $\lambda t\tau\rho\alphas$   $\delta\dot{\nu}o$   $\dot{\eta}\mu\nu\sigma\nu'$  (XIV. vii. 1, ed. Niese, § 106). The Hebrew gold mina, therefore, was equal in weight to  $2\frac{1}{2}$  Roman pounds, or 12,630 grains (taking the libra [ $\lambda t\tau\rho\alpha$ ] according to the best authorities at 5053 grains = 327.45 grammes, see Hultsch, Metrol. 159-161), which gives 50 shelvely  $\delta$  259.24 grains shokels of 2526 grains, the exact weight of the heavy Babylonian shekel (§1). In another passage of the same work, Josephus informs us that the Hebrew silver shekel is equivalent to 'four Attic drachms' ('Αττικὰς δέχεται δραχμὸς τέσσαρας, Ant. III. viii. 10, N. § 194), by which is meant, as will be shown in the sequel (§ 7), four Roman denarii of 55-56 grains each. This is in complete agreement with the weights of the best specimens of the extant silver shekels, which weigh 218-220 grains, as near an approximation as ancient silver coins in general show to the theoretical standard (in this case 224 grs.).\* These conclusions are summed up in the following table, which gives the scale by which it is assumed, throughout this article, that gold and silver were weighed from the conquest of Canaan to the extinction of Jewish nationality, the weight of the shekel being given to the nearest large fraction :-

#### GOLD STANDARD.

## SILVER STANDARD.

112½ grs. 5,660 ,, 336,750 ,,

Notes.

1. The standard weight of the English sovereign (20 shillings) is 123-274 grains troy. The ordinary or heavy gold shekel, therefore, weighed a little more than two sovereigns.

2. Since a pound avoirdupois contains 7000 grains, the Hebrew gold talent weighed c. 108 lb., rather less than a hundredweight (112 lb.)

(112 lb.).

3. Rather more than the weight of an English half-crown

3. Rather more than the weight of an English half-crown (218 grs.).
4. As the pound troy contains 5760 grs. the silver mina may be taken as = circa 2 troy pounds, or more precisely 1? lb. avoirdupois.

Circa 961 lb. avoir., a heavy load for a man to carry (see

At this point the question naturally suggests itself as to the value in sterling money of the Hebrew shekel as gold and silver unit respectively. Since the English sovereign is only eleven parts pure gold to one part alloy, the mere comparison of the respective weights of sovereign and shekel, as in the preceding table, note 1, is not sufficiently accurate for our present purpose. We prefer, therefore, to base our calculations on the price at which the Royal Mint buys its gold, viz. £3, 17s. 10½d. (934.5 pence) per ounce of 480 grains. This gives us as nearly as possible £2, 1s. sterling as the value of the Hebrew gold shekel. The gold mina, accordingly, we value at £102, 10s., and the talent at £6150.

The calculation of the intrinsic value of the silver shekel must be even more carefully set about. By many previous writers the important fact has been overlooked, that the silver currency of this country is but money of account, our only standard being gold. In other words, the coin which we call a shilling, of which the standard weight is

\* See also the discussion of 'the shekel of the sanctuary,' \$ 3.

87.272 grains, is not worth that weight of silver at so much an ounce, but has its value legally fixed as the twentieth part of the gold unit or sovereign. Hence, in order to arrive at even an approximate valuation in our currency of any weight of silver anciently used as money, whether coined or uncoined, we must know in each case the ratio then existing between gold and silver. In the period of Hebrew history with which we are now dealing, this ratio, as we have already learned, appears to have been fixed as 13:3:1, which resulted in the convenient adjustment that one gold shekel of 252 grains was equal in value to fifteen silver shekels of 224 grains (§ 1). This gives us, without further calculation, the value of the Hebrew or Phoenician silver shekel as 17th of 41 shillings, or 2s. 8td., say 2s. 9d. The same proportion holds with regard to the silver mina and shekel, which are 15th of the same denominations in gold, viz. £6, 16s. 8d. and £410 respectively. It will be convenient to have these values in tabular form for easy reference.

# VALUES OF ANCIENT HEBREW MONEY IN STERLING MONEY.+

		GOLD.	SILVER.	
Shekel		£2 1 0	£0 2 9 nearly	
Mina		102 10 0	6 16 8	
Talent		8150 O O	410 0 0	

It cannot be too strongly emphasized that throughout the whole period ending with the return from the Exile there can be no question of coined money. For every transaction of the least importance the balance had to be employed, and the tale of silver duly determined by weight. Thus, in the incident of Abraham's purchase of the cave of Machpelah, though its present record may be late, we have a lifelike picture of how business was done in pre-exilic times. The price having been fixed in approved Oriental style, 'Abraham,' we read, 'weighed to Ephron the silver which he had named, four hundred shekels of silver, current (money) with the merchant' (ממור) און און הוא (ממור) (מור) (מור every (banker's) table and receivable in all transactions.' The weights employed were of stone, and were kept in a bag (hence Pr 16<sup>11</sup> אַרָּגְי 'the weights [lit. stones] of the bag'). From the earliest of the prophetic writings onwards, we find repeated warnings against the use of unjust weights (Am 8<sup>5</sup>, Mic 6<sup>101</sup>, Pr 11<sup>1</sup> 20<sup>10, 23</sup>), and both the Deuteronomic and the Levitical codes find it necessary to issue strict injunctions against the falsification of the balance and its weights (Dt 25<sup>18-16</sup>, Lv 19<sup>36, 36</sup>; cf. Ezk 45<sup>13</sup>, to be read in the light of the Gr. text). It is somewhat remarkable, however, that we nowhere find any attempt to regulate the fineness of the silver, which clearly shows that there was as yet no thought of a proper coinage, the essential characteristic of which is the guarantee by the State of the quality as well as the quantity of the metal. It must not be thought, however, that it was necessary to have recourse to the balance for every transaction however small. On the contrary, there is ample evidence that the precious metals circulated in the form of ingots of known weight. Saul's servant, for example, had with him an ingot to the weight of a quarter of a shekel (1 S 9). In the case of large sums, and especially in official and legal payments where

\*This is the fallacy which vitiates the calculation of the values of the NT sliver coins given in the margins of our AV (see below, §§ 7, 8).

† These figures give merely the intrinsic value of the metal; its purchasing power, as compared with these sums to-day, was many times greater (see § 11).

† It is an anachronism to speak of it as a coin, as in the Internat. Crit. Comm. (1899) ad loc.

great accuracy was necessary, as well as in cases where the parties concerned were not well known to each other, the money was invariably weighed. Hence the word shākal ('>pv), to 'weigh,' is used as synonymous with 'pay' (Ex 2216, 1 K 1059, Is 552 etc.). In illustration of this extensive use of the balance in the most varied transactions, it will suffice to refer to such additional passages as 2 K 12<sup>10, 11</sup> RV (where the money is both 'told' and 'weighed out'), Jer 32<sup>9, 10</sup>, Is 46<sup>6</sup>, Ezr 8<sup>25, 26</sup>.

The custom of wearing ornaments of an accurately determined with transport of the content of the c

ately determined weight—such were Rebekah's gold nose-ring of half a shekel weight and her bracelets of ten shekels, Gn 2422—would naturally tend to facilitate their use on occasion as money. The 'wedge (lit. tongue) of gold of fifty shekels weight' purloined by Achan was probably an ornament of some sort (Jos 721). The ring-money so popular in Egypt, to which allusion has already been made (§ 1), does not appear to have been current among the Hebrews.\* The nature of the piece of money. piece of money—for such it surely must have been—called kësitah (אַסְיּבֶּיה Gn 3319, Jos 2422, and Job 4211 only) is quite unknown. From the fact that the oldest versions render it by 'lamb' or 'sheep,' it is a plausible conjecture, but nothing more, that the kësitah may have been a piece of precious metal, the value of which was in some way indicated by its having a lamb stamped upon it + (see art. KESITAH, and add to the reff. there given, Hultsch, Metrol.<sup>2</sup> pp. 460-63, who attempts to determine its value from utterly insufficient data, and Ridgeway, Metal Currency, pp. 270-72 [with illustrations], who concludes that the qesitah was an old unit of barter like the Homeric ox, and as the latter was transformed into a gold unit so the former was

superseded by an equivalent of silver').

Before we pass from this section, it may be added that the predominant use of the shekel as the monetary unit in ordinary transactions has led to its frequent omission in statements of price in the OT. Joseph, for example, was sold for 'twenty (shekels, AV pieces) of silver,' Solomon paid for his Egyptian chariots 'six hundred of silver' apiece (see complete list of such omissions in Madden, Coins of the Jews, p. 15). It is worthy of note, finally, that the mina (אוף in Ezk 4512 by of note, finally, that the mina (hip in Ezk au-by AV transliterated 'maneh,' elsewhere in OT and NT 'pound') does not occur in any pre-exilic writing.‡ The price of a chariot we have just seen was '600 shekels,' not '12 minas'; Achan's wedge weighed '50 shekels,' not 'one minas,'—while multiplied indefinitely —while examples might be multiplied indefinitely, -while large sums are quoted by talents and shekels only. From among the latter may be singled out Solomon's annual revenue of 666 talents of gold (1 K 10<sup>14</sup>, 2 Ch 9<sup>13</sup>) = £4,095,900, as also the incredible total of David's Temple Fund, which, according to the Chronicler, amounted to the colossal sum of one thousand and twenty-five millions sterling

(£1,025,000,000) ! §

\*G. Hoffmann, in Zeit. f. Assyriol. ii. (1887) 48 f., has proposed to render the obscure word ny of Job 22<sup>24</sup>. <sup>29</sup> (AV gold, RV treasure, RVm 'Heb. ore') by 'ring-gold,' i.e. gold circulating in the form of rings, but on insufficient grounds. † Compare the Assyrian ingots stamped with 'the head of Istar of Nineveh,' to which Babelon refers in Les Origines de la Monnaie, p. 58, and those apparently stamped with a plant, to which Mr. Pinches has called our attention. These stamped ingots were the precursors of true coins. (Cf. now, Johns, 'Did the Assyrians coin Money?' Expos. Nov. 1899). † For this and other reasons the MT of 2 Oh 918 giving 'three hundred (ninc) of gold,' viz. shekels, is to be preferred to, and to be substituted for, the text of the parallel passage 1 K 1017 'three minas (ninc) of gold,' and not vice versa, as most modern

to be substituted for, the text of the parallel passage 1 K 1017 'three minas (mus) of gold,' and not vice versa, as most modern critics. This disposes of the hasty inference which several writers have dirawn from these passages, that in the time of the Ohronicler the mina was computed to contain 100 light sheeks or drachms (of. below, §§ 3, 4).
§ 'One hundred thousand talents of gold and a thousand thousand talents of silver' (1 Ch 2214).

B. Coined Money from the Persian Period to the Reign of Nero.

§ 3. Invention of the art of Coining. Money of Darius and his successors. The 'Shekel of the Sanctuary.'—Modern research tends to confirm the statement of Herodotus (i. 94), that coins are an invention of the Lydians. To the reign of Gyges [c. 700 B.C.] may perhaps be ascribed the earliest essays in the art of coining (Head, Hist. Numorum, p. xxxiii; to this work, to Babelon, Les Origines de la Monnaie, and the other works mentioned at the head of this article, the student is referred for full discussion of the question as to the invention of coining, the process employed, etc.). Wherein, it may be asked, does a true coin differ from the ingots of gold and silver of specified weight so long in use in the ancient world? We answer that an ingot becomes a coin when it receives the impression of an official mark—called by numismatists the 'type' of the coin—which serves as a public guarantee of its weight and fineness, and hence of its value in the currency of the country. When the last band of Jewish exiles left for the land of their captivity (B.C. 586) true coins had circulated in western Asia Minor and Greece for about a century, but there is no evidence that this economic revolution had affected Palestine. Forty years later (B.C. 546 or 548, acc. to Winckler, *Untersuchungen zur altorient. Gesch.* 131) Cyrus gained his decisive victory over Cræsus king of Lydia, who had reorganized the currency of his kingdom thad Crimers of Lydia and Parsia 196. (Head, Coinage of Lydia and Persia, 19f., Hist. Num. 548), introducing a gold stater, the famous κροίσειος στατήρ, of the weight of the light Babylonian gold shekel (126 grs.), and a corresponding silver stater or shekel\* of 168 grs. Lenormant, Head, and others consider that Cyrus continued the issue of these coins from the mint at Sardis: but Babelon has shown that this view is untenable (Les Perses Achéménides, Introd. iif.), and that the royal coinage of Persia was first issued by Darius Hystaspis (B.C. 522-485). Darius' coins were of two denominations—(1) a stater of pure gold (χρυσίον καθαρώτατον, Herod. iv. 166), weighing 130 grs. and circulating throughout Asia and Europe under the designation στατήρ δαρεικός or daric; + and (2) a silver coin of almost 87 grs., known as the σίγλος μηδικός or Median shekel.‡ The former was the light Babylonian shekel on the royal standard (see § 1), -otherwise one half of the corresponding heavy shekel (260 grs.) repreof the corresponding heavy shekel (260 grs.) represented at this period by the popular gold coin known as the stater of Phocoa (Babelon, op. cit. ivf.; Head, op. cit. 506; see also footnote),—while the latter, the siglos, was one half of the light Babylonian silver shekel on the same standard. These were in all probability the first coins to circulate among the Jews. No 1 of the plate of illustrations shows a gold daric of the Persian kings, the type of which is fairly constant throughout. The obverse represents the king as an archer, bearded, crowned with the cidaris, and kneeling right; clad in long robe with left knee bare, he holds a bow in his outstretched left hand, and in his right a spear. The reverse is not occupied by the of great importance in view of subsequent discussions.

his right a spear. The reverse is not occupied by \* It is of great importance, in view of subsequent discussions, to observe that the word στατής, stater (from τστημ in the sense of 'to weigh'), is the true Gr. equivalent of the Semitic shekel, of which σίρλος (see below) is a transliteration.

† The word dartic (δαρμικό) has probably no etymological connexion with Darius (Old Pers. Dārayavaus), but is rather to be traced to the Assyrian dartic, applied to a piece of money in the reign of Nabonidus.

† The siglos, it must be observed, is in reality a half-shekel, being τθη the of the Babylonian silver mina. Inasmuch as the term stater, as the equivalent of shekel, represents τ the of the mina, the Greeks applied the term δραχωά, drachm, to the half-stater, or τψη the part. From this point of view, the daric—while a stater or shekel on the light Babylonian standard—might be regarded as a drachm on the heavy standard (see below).

a 'type' but by an irregular oblong 'incuse.' The type of the siglos closely resembles that of the daric, but is less constant. In sterling money the daric (130 grs. of pure gold), on the basis of calculation adopted in § 1, was worth £1, 1s. 1d., say one guinea, and, since the gold unit was equal to twenty of the silver unit \* (on the basis of 13.3:1; cf. Xen. Anab. i. 7. 18), the siglos was worth a fraction

more than a shilling.

The daric and siglos, we have said, are the first coins that can possibly have circulated in Palestine, which formed part of the fifth satrapy (Babelon, op. cit. xxf.). Is there any reference to either in the Hebrew literature of the period? Our Revisers reply in the affirmative, since in six from an earlier document recording the contributions for religious purposes given on the occasion of the return under Cyrus, i.e. nearly twenty years before the introduction of the daric, while Ezr 87 refers not to money but to the weight (1000 'adarkônîm) t of 'twenty basins of gold.' Since, then, the darkemon is clearly a weight and not a coin, it scarcely can be anything but the word δραχνή, the standing designation among the Greeks for the του hard the considerations. (1) tions for religious purposes given on the occasion for the 180 th part of the mina. This conclusion is confirmed by the following considerations: (1) Lucian's Greek text has δραχμάς throughout; (2) darkemon was the recognized Semitic transcription of  $\delta \rho a \chi \mu \eta$ , as is proved by a Phenician inscription from the Piraus, in which a colony of Sidonians there (prob. in the 3rd cent. B.C.) vote two sums of twenty darkemonim (ררכמנים) § each to defray the expense of a gold crown and a gilded stele in honour of a countryman, 'Shemabaal, son of Magon.'

In attempting to estimate the value of the darkemon or drachm as the weight in terms of which the contributions are entered in Nehemiah's lists, we would lay stress on the fact above indicated, that the drachm is essentially the hundredth part of the mina—in other words, a half-shekel. Now if, as we believe, the Hebrew gold shekel par excellence was the heavy shekel of 252-260 grains, and if, as is most probable, the original entries were made on the Persian or light Babylonian royal standard, of which the shekel was 130 gra (the weight of the later daric), we can understand why a Jewish author—or, it may be, editor—to avoid possible ambiguity, should have altered the original light shekels into the equivalent drachms (either being 100 the Hebrew gold mina). If this be so, the total amount of gold contributed by 'the Tirshatha (1000 drachms), the

\* This proportion of 20 to 1, first adopted by Darius, is still maintained in most currencies at the present day (cf. sovereign and shilling, 'Napoleon' and franc, etc.).

† For the conflicting views of scholars as to the etymology of

these words, see sub דרכמון in Oxf. Lex. (Brown-Briggs-Driver) and reff. there. Also Madden, Coins of the Jews, 46; Hultsch, Metrol. 2 485 n. 2.

t The interesting corruptions in the Greek text of A and B (סבר ליינים ביינים ביינים

§ In line 3, owing probably to a slip of the engraver, the word is written ררכנים. On the strength of this, Ed. Meyer in his detailed discussion of Neh 770s. in his Entstehung d. Judenthums, 196 ff., takes דרכנים as = gold darics and ברכנים Attic (silver) led it., takes just it is much more likely that the same denomination, viz. Attic gold drachms, is intended throughout (cf. the interesting parallels from the Greek Corpus given by Lidzbarski, Handb. d. nordsemit. Epigraphik (1898), pp. 124 and 160. The inscription itself, b. pl. vili. 6, in square characters, p. 425. Other literature apud Bloch, Phön. Glossar. p. 6).

chief of the fathers (20,000), and the rest of the people (20,000), is equal to 41,000 drachins, daries, or guineas.\* In the same way the mina (EV pound), by which the silver contributions are reckoned, can hardly be other than the Perso-Babylonic royal mina, of which the later siglos was the hundredth part. Since the latter was in value th of the daric, its mina was equal to five daries, and the total contributions (4200 minas, Neh 7<sup>71,72</sup>) to 21,000 daries, that is, to *circa* as many

guineas.

The shekel (173 grs.) of this mina, of which the siglos is the half-shekel (see above), is perhaps intended in the reference Neh 5<sup>15</sup> to the table allowances of Nehomiah as a high official of Artaxerxes I. Longimanus (see Babelon, op. cit. p. 6 f., for the coins of this sovereign). The satraps of the Great King enjoyed to a limited extent (Lenormant, La monnaie dans l'antiq. ii. 16f., and esp. Babelon, op. cit. xxi ff.) the privilege of with one of these, Bagoas, satrap of Egypt (c. 345-343) under Artaxerxes III. Ochus, is generally identified the Bagoas of Josephus (Ant. xI. vii. 1, N. § 297), who under the circumstances there recorded imposed a tax of 50 shekels upon every lamb offered in the daily sacrifice. These must have been either Persian shekels, as above, or, since Bagoas' Egyptian coinage is entirely on the Phonician standard (see ap. Babelon, pp. 52-55), shekels on the Hebrew-Phoenician standard (224

Since the document known as the Priests' Code (P) is now universally recognized as having first received public sanction under the governorship of Nehemiah (c. 444 B.C.), we have reserved for this section the discussion of the monetary unit adopted section the discussion of the moleculy and adaptive therein for various important payments, viz. the so-called 'snekel of the sanctuary' † (מַנְישׁ בְּשִׁלְישׁ אָשְׁלְי, more probably 'sacred shekel'), regarding which so much has been written and so many conjectures hazarded. The expression occurs in the following passages of P only: Ex 30<sup>13, 24</sup> 38<sup>24-26</sup>, Lv 5<sup>15</sup> 27<sup>3, 25</sup>, Nu 3<sup>47, 50</sup> 7<sup>13-66</sup> (14 times) 18<sup>16</sup>, and in these it is used not only of silver and gold but of spices (Ex 30<sup>23t</sup>.) and presumably copper (3829). This confirms the impression we derive from Lv 2728 ('all the estimated and the challed of tions shall be reckoned according to the shekel of tions shall be reckoned according to the shekel of the sanctuary') that part of P's aim is to introduce a uniform shekel for all transactions. From the numbers given Ex 38<sup>20π</sup>, an easy calculation proves that 3000 'sacred' shekels went to the talent. What, then, is the value of P's shekel? Let us examine (1) The testimony of the text and the versions. In four of the passages cited (Ex 30<sup>13</sup>, Lv 27<sup>28</sup>, Nu 3<sup>47</sup> 18<sup>16</sup>) the 'shekel of the sanctuary' is defined as consisting of 20 gerals (batin an energy). is defined as consisting of 20 gerahs (עשְרִים גַּרָה הַשָּׁקָל), words which Ezekiel had already applied to his shekel (45<sup>12</sup>). Now the gerah—whether its original meaning be a seed-grain generally, or specially the seed of the carob tree (Löw, Aramäische Pylanzennamen, p. 317) or the lupin (Ridgeway, op. cit. 217)—was most probably a small Babylonian weight (cf. the giru of Nebuchadnezzar's inscriptions, used in connexion with money, see Muss-Arnolls, Lex. s.v.), identified by Talmudic writers with the map or obol, by which it is rendered in the Targum of The same identification is adopted by Onkelos.

\*The first being the weight of the whole, the second its equivalent in the later coinage of Darius, the third the same in sterling money.

† This rendering probably presupposes that the standard weight was kept in the temple in accordance with a well-attested ancient custom. But this hardly suits the exilic or early postexilic origin of P.

‡ In this, as in so much else, P continues the policy of Ezekiel, who appears to contemplate a simplification of the standard measures (4510-19).

§ Hence it is possible that the words in question are everywhere in P a gloss introduced from this passage of Ezekiel.

the LXX (εἴκοσι ὁβολοί).\* The obol is, of course, the sixth of the Attic drachm, at this period = c. 11.23 grs., twenty of which give us a shekel of 224 grs. (cf. Josephus' statement (Ant. III. vi. 7) that the Heb. talent=100 (Attic) minas, i.e. 3000 shekels=10,000 drachms or 60,000 obols; hence 1 shekel=20

(2) The testimony of the New Testament and Josephus.—In the 1st cent. the amount of the tax paid by every adult Jew for the maintenance of the temple services had long been fixed at half a shekel, which, since the tax was ultimately based on Ex 30<sup>187</sup>. (see next paragraph), must necessarily have been the 'sacred' shekel. Now, on a well-known occasion in the life of our Lord (Mt 17<sup>247</sup>.), the amount due by two persons was paid by a stater, which can only be a tetradrachm of Antioch or of Tyre (see §§ 4, 7, 8), both of them slightly reduced from the standard weight of 224 grs.+ Josephus, also, in his references to this tax, uses in one place (Ant. XVIII. ix. 1) the same word as the evangelist ( $\tau \delta$   $\delta (\delta \rho \alpha \chi \mu o \nu)$ ; cf. Mt  $17^{24}$ ), in another evaluation of the equivalent  $\delta vo$   $\delta \rho a \chi \mu ds$ , while in a third (Ant. III. viii. 2) he writes  $\sigma k \lambda o v$   $\tau \delta \eta \mu \sigma v$ , the half-shekel. (3) The testimony of the Talmud. The Talmud repeatedly lays down the canon that all sums mentioned in the Pentateuch are to be reckoned in the money of Tyre (יף צר), see ress. in Zuckermandel, Ueber talmudische Gewichte u. Münzen, pp. 5, 15); and in particular in Bekhoroth viii. 7, with reference to the very passages we are discussing, we read that 'all payments according to the sacred shekel are to be made in Tyrian (i.e. Phonician) currency,' in other words, according to the Hebrew-Phonician shekel of 224 grs. On the strength of this threefold testimony, we are justified in maintaining that 'the shekel of the sanctuary' is nothing but the ancient silver shekel of the country, fifteen of which (at 224 grs.) we saw (§ 1) to be equivalent to the gold shekel of 253 grs. It was 'sacred,' not only as having been associated with the payment of the priestly dues from time immemorial, but also as being the specifically Hebrew shekel, just as the Hebrew language was distinguished from all others as 'the sacred tongue (לשון הפּרָש').' Some epithet of the kind was required in early post-exilic times to distinguish this shekel from the Perso-Babylonic shekel of 168-173 grs. (see next paragraph), which may well have been the only shekel then officially recognized in Judæa, a province of the Persian

empire.

The date of the institution of the temple tax of half a shekel, above referred to, has been the discussion. It does not appear to have been contemplated by the original framers to have been contemplated by the original tramers of the Priests' Code, ‡ since we find the community, immediately after ratifying that code, charging themselves 'yearly with the third part of a shekel for the service of the house' (Neh 10<sup>82</sup> Heb. <sup>83</sup>). Since the Hebrew-Phænician shekel is never divided otherwise than by halves and quarters, this must be the official Perso-Babylonian shekel (\$=56-58 grs., worth c. 8\d.). At a later date, certainly before the time of the Chronicler (c. 300 B.C.; cf. 2 Ch 24<sup>5-9</sup>), the tax was raised by the

have been emphasized.

priestly authorities-appealing, no doubt, to the passage in Exodus-to half the native shekel (112

grs., worth c. ls. 4½d.).

The daric and siglos, we have said, were the first coins to have legal currency in Judæa. soon after Nehemiah's time another silver coinage made its appearance. In the second half of the made its appearance. In the second half of the 5th cent. the wealthy commercial cities on the Mediterranean seaboard had begun to issue silver money under their native kings. \* Aradus, Sidon, Tyre, and Gaza were among the greatest trade centres of the period. The 'men of Tyre,' we may be sure, were not the only traders that brought 'all manner of ware' to Jerusalem (Neh 1316), and the coins followed the trade. One of the earliest of these is a fine double-shekel of Sidon (423 grs.) in the British Museum (see Plate No. 2).

Rev. A Phœnician galley with mast and sails. Obv. King of Persia in his chariot, driven by his charioteer. A. Wt. 423 grs.

Of no city or sovereign, however, are the coins of such importance to the student of Jewish numismatics as those of Tyre. Have we not seen that all the moneys mentioned in the Pentateuch were to be paid in Tyrian—rather, in a wider sense, Phœnician—currency? The earliest coins of Tyre take us back to near the middle of the 5th cent. B.C., the latest date from the reign of Septimins Severus. No. 3 of our Plate shows an early, not perhaps the earliest, specimen of a tetra-drachm of Tyre (a shekel of c. 220 grs.), the real 'shekel of the sanctuary.'
Obv. Melkarth (the Tyrian Hercules) holding a

bow, and riding over the waves on hippocamp

or sea horse; beneath, a dolphin.

Rev. Owl bearing over left shoulder the Egyptian crook and flail (the symbols of Osiris).

The reverse is of great interest as showing the range of the mercantile relations of Tyre and the resulting influence of Athens on the one hand, and of Egypt on the other (cf. Babelon, op cit. Introd. clxxxix). The influence of Athens on Palestine at this early period is still more strikingly shown by the coins of Gaza, which not only imitate the type and legend of the coins of Athens, but are struck on the Attic standard.

§ 4. Coinage of the Ptolemies and Seleucids and of the semi-autonomous cities to the time of Simon Maccabæus.—At the date of his conquest of Asia, Alexander the Great introduced his international currency in the three metals, gold, silver, and bronze.† The principal coins are the gold stater or didrachm of 133 grs. actual weight; for silver the tetradrachm (266 grs.) and the drachm (66½ grs.). These weights introduce us to a new rency of Athens was based—from this time on-wards to the 3rd cent. A.D. the most widely spread of ancient monetary standards. Coins with Alexander's types were struck, even long after his death, by various cities of Syria and Palestine.

After years of varying fortune on the field of

\*The brilliant sketch of M. Six, 'Observations sur les monnales phéniciennes,' in the Numismatic Chronicle, 1877, p. 177 ff., is still of value alongside of the more recent and exhaustive work of M. Babelon, Lee Perses Achéménides, Cypre et Phénice, 1893. Cf. Head's résumé in Hist. Num. 666-676; and, of older works, Brandis, Das Münz- Maas- und Gewichtswesen in Vorderasien, 1866 passim.

† The chief authority is still Ludwig Müller's La Numismatique d'Aiexandre le Grand, 1855 (cf. Head's conspectus, Hist. Num. 810 ff.).

‡ For which see Head, op. cit. xl-xliil and p. 309 f. Acc. to Hultsch (Gew. d. All. pp. 68-68), the shekel or stater of this standard was 1th of a mina of 60 light Phémician shekels=184'7 (112½×60+50) grains, which is found as early as the 12th Dynasty in Egypt, whence, through Phémician intermediaries, it was carried to Greece and Asia Minor. This gives c. 269'6 and 67'86 gra. for the Attic tetradrachm and drachm respectively, and for the mina and talent 6785 and 404,100 grs. respectively.

battle, Ptolemy I. finally succeeded (B.C. 301) in adding Palestine to his Egyptian dominions.
The Jews were still, however, but 'a feeble folk,' content to use the coins that issued in great abundance from the royal mints at Alexandria and the cities of the seacoast. This was all the more practicable, since Ptolemy (from B.C. 305), alone among the successors of Alexander, coined on the light Phoenician standard (see Poole, The Ptolemies [Brit. Mus. Cat. of Gr. Coins], 1883, Introd. xxiii f.; Head, Hist. Num. 711 ff.; Hultsch, Metrol. 646 ff.). No. 4 of our Plate is a typical coin, a tetradrachm or double-shekel of the Ptolemies.

Obv. Head of Ptolemy I. diademed.

Tyre, which passed into the hands of Ptolemy II.

Philadelphus in B.C. 275, still possessed a flourishing mint, its coins bearing as adjunct, in addition ing mint, its coins bearing as adjunct, in addition to the Ptolemaic types, the monogram of the city with the club of the Tyrian Hercules (see Poole, op. cit. Plate IV. 8). Sidon, Acco (named Ptolemais by Philadelphus), Gaza, Joppa, were all Ptolemaic mints,† from which, especially from the three latter, the peaceful Jewish community derived their supply of shekels. The yoke of the Ptolemies pressed lightly, for the greater part of the century (R.C. 300-200) at least, upon the Jews. According to the highly embellished story of Joseph, the nephew of the high priest (Onias II.), told in detail by Josephus (Ant. xii. 4), the tribute in the reign by Josephus (Ant. xii. 4), the tribute in the reign of Ptolemy III. Euergetes did not exceed twenty shekels of silver (ib. XII. iv. 1, Niese, § 158). To obtain the modern equivalent of a Ptolemaic talent of silver (6000 drachms of 56 grs.), we must, in accordance with the principles laid down in § 2 of this article, first translate the silver into gold, which is our only standard. Now the ratio of gold to silver in the Ptolemaic system is 12½: 1, eight gold drachms being equivalent to a mina (100 drachms) of silver (cf. Hultsch, Metrol. 2646 f.). We thus obtain, at the mint price of gold £3, 17s. 10 d. per oz. of 480 grs., 9s. 1d. as the value of the gold drachm, £45 for the gold mina (3 Mac 14), 8 d. for the silver drachm (ib. 328), and £218 for the silver talent, twenty of which amount to £4360. The total revenue of Ptolemy's Asiatic possession, Cœle-Syria, and Phœnicia, and Judæa, and Samaria amounted if the figures (Ant. VII. iv. A. N. 175 f.) amounted—if the figures (Ant. XII. iv. 4, N. 175 f.) are to be trusted—to 8000 talents, raised by Joseph to 16,000, almost three and a half million pounds sterling! On the same standard are to be reckoned the numerous other sums mentioned throughout the story.

When we reflect that the Ptolemaic silver shekel is a double-drachm or stater (of 112 grs.)the latter term, when the didrachm fell into disfavour, the Greeks applied to the tetradrachm—we understand how the Alexandrian translators of we understand now the Alexandrian translators of the Pentateuch so frequently render the Hebrew shekel, which weighed 224 grs., by δίδραχμον as well as by σίκλος, instead of by the more exact τετράδραχμον (in LXX only Job 42<sup>11</sup>).‡ Similarly the bekα' (γρ3) or half-shekel is in the two passages where it occurs (Gn 24<sup>22</sup>, Ex 38<sup>26</sup>=LXX 39<sup>2</sup>) rendered the standard of the same standar dered by δραχμή.
In B.C. 198 Antiochus III. succeeded in wresting

Palestine from the feeble grasp of the youthful Ptolemy Epiphanes; it now became a province of the Syrian empire. The Seleucids, like all the successors of Alexander save the Ptolemics, continued his coinage on the Attic standard, retain-

\* The special badge or 'creat' of the Ptolemies, as the anchor was of the Seleucids (see below).

(cf. Mt 2727).

ing, for some time at least, even his name and types, to which the anchor was added—the family badge or cognizance of Selencus, the founder of the dynasty. Gold coins are comparatively rare; the commonest silver coins are the tetradrachm (at this period as high as 265 grs.) and the drachm, to which fall to be added bronze coins of numerous denominations.\* For half a century (c. 150-100 B.C.) the Phoenician standard appears alongside of the Attic (Babelon, op. cit. clxxxiii). The mints are numerous; besides Antioch and other cities of Northern Syria we still have Sidon, Tyre,

Ptolemais, Ascalon, and others. †

Antiochus treated the Jews with great consideration, even with kindness. Taxes were remitted, in some cases permanently, in others for three years, with one-third abatement thereafter; while a grant of 20,000 drachms, in addition to allowances of wheat and salt, was made from the imperial treasury to defray the cost of the temple service (Jos. Ant. XII. iii. 3, N. 138 ff.). From this time onwards to the date of the complete rupture with Antioch the taxes and other official payments must have been settled in Attic drachms (see below) from one or other of the coast mints. For ordinary transactions and for the sacred dues, the former Ptolemaic currency, based on the native standard, probably still held the field. We give (No. 5) a tetradrachm of Antiochus IV. Epiphanes, with whose accession, in B.C. 175, we approach a turning-point in the fortunes of the Jawa.

Obv. Head of Antiochus Epiphanes (looking)

right, diademed, with fillet border.

Rev. ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΥ ΘΕΟΥ ΕΠΙΦΑΝΟΥΣ [king Antiochus, divine, illustrious]. (looking) left, seated on throne, naked to the waist, and holding a Nike, who crowns him, in right hand, while left rests on sceptre. In exergue a monogram. Wt. 259 grs.

The portrait of Antiochus is considerably ideal-

ized; the titles on the reverse show that the coin was struck about the middle of his reign (Babelon, op. cit. xxiii.), probably before he had set up 'the abomination that maketh desolate' in the Jewish

temple (Dn 1181 1211).

Several of the more important cities of the Seleucid empire were about this time permitted to issue a series of semi-autonomous bronze coins, distinguished from the royal bronzes of the same minting-places by having, besides the royal portrait on the obverse, the name of the issuing city (TYPIQN, כצר אם צרנם) § on the reverse.

To the earlier part of Antiochus Epiphanes' To the earlier part of Antiochus Epiphanes' reign belong the intrigues of Jason, brother of the high priest Onias III., who offered Antiochus the large sum of 440 talents for the high-priestly office, with 'a hundred and fifty more, if it might be allowed him . . to set up a (Greek) place of exercise and (form) a body of youths (to be trained therein), and to register the inhabitants of Jerusalem as citizens of Antioch' (2 Mac 49). Jason in his turn was outhid by Menelaus, who offered the his turn was outbid by Menelaus, who offered the

\*See the standard work of E. Babelon, Les Rois de Syrie, 1890; also P. Gardner, The Seleucid Kings of Syria (Brit. Mus. Cat. of Gr. Coins), 1878. Cf. Head, Hist. Num. 637ff., where the older literature is given.

† From the royal Seleucid coins struck in the cities just named must be carefully distinguished the coins of these and other cities issued by them on their obtaining a measure of autonomy, which increased as the power of the Seleucids declined (see below).

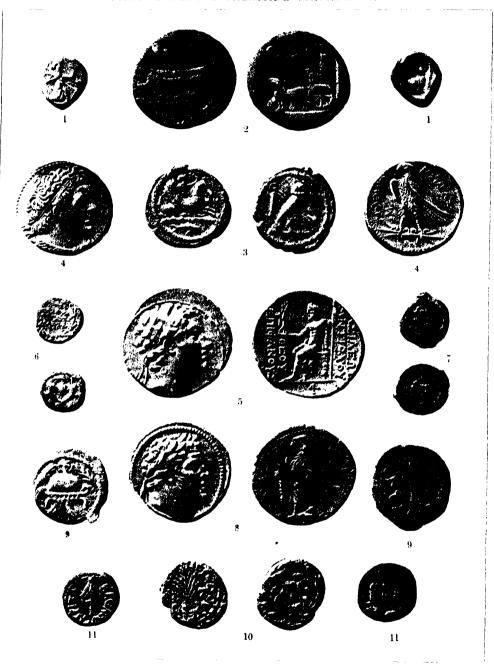

† On the coin-portraits of this famous figure in Jewish history see Babelon, op. cit. xcii ff., and Plates XII.-XV.

‡ The title here assumed by Tyre is noteworthy, 'mother (city) of the Bidonians,'a reply to the, historically more justifiable, pretensions of Sidon to be the 'mother-city of Tyre.' Similar rivalries were common in the Roman period. Also of interest, in view of the legend on the later Jewish shekels, is that on the bronze coins of Gebal-Byblus, nearly 'Gebal the holy.'

impecunious monarch 'more than Jason by 300 talents of silver' (*ib.* v.<sup>24</sup>). These and the other sums mentioned in 1 and 2 Maccabees (1 Mac 11<sup>28</sup> 13<sup>16-19</sup> 15<sup>31-18</sup>, all talents; 2 Mac 3<sup>11</sup> 4<sup>19</sup> [read 3300 drachms] etc.) are to be reckoned as Syrian-Attic drachins and talents. In endeavouring to reach an approximate valuation of these sums, it must be remembered that the Syrian currency is on a silver, ours on a gold standard. The gold of the silver, ours on a gold standard. Seleucids, even in the shape of coins, was always bullion, and varied in its ratio to silver between 10: I and 12½: 1 (see Hultsch, Metrol. 2§ 30 f.). Now, if we take the normal weight of the Attic drachm at 67:367 grs. (=4:366 grammes), we have as the sterling value of the gold drachm at the mint price 10s. 11½d., and of the talent (6000 drachm\*) in round numbers £3280. At the ratio of 10:1 this gives £328 for the silver talent, at 12½:1 £262, the mean value being £295, for the silver drachm 113d., which is considerably higher than the estimates of previous writers. The large sums deposited in the temple (400 talents of silver and 200 talents of gold, 2 Mac 311) would thus amount to £118,000 and £656,000 respectively, a total of over three-quarters of a million.

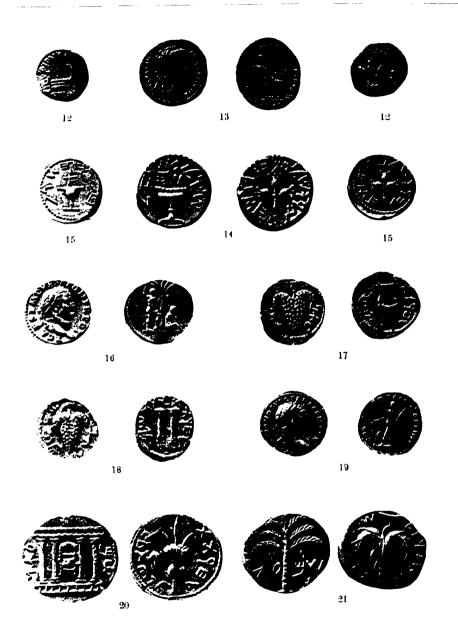

§ 5. The first native coinage; the problem of the so-called 'Maccabaun shekels'; the bronze coins of the Hasmonaan princes.—The latter half of the 2nd cent. saw the once powerful empire of the Seleucide rent by internal dissensions and hasting to its fall. Already the Jews, under the brave sons of Mattathias the Hasmonean (אַבְּעָלוּ, had taken the field in defence of the national religion, and had proved themselves so dangerous as foes that Demetrius II. (145-139/8 B.C.) recognized them as likely to prove not less valuable as allies (1 Mac 13<sup>36-40</sup>). The privileges then granted by Demetrius, amounting to political autonomy under the suzerainty of Syria,—not, as is often represented, to complete independence,—were confirmed by his brother Antiochus VII. Sidetes (B.C. firmed by his brother Antiochus VII. Sidetes (B.C. 138-129) in the famous rescript preserved in 1 Mac 155t. 'Now therefore,' it runs, according to the best text, 'I confirm unto thee [Simon] all the exactions which the kings that were before me remitted unto thee, and I give thee leave to coin money for thy country with thine own stamp (ποιβσαι κόμμα tδιον νόμισμα τῆ χώρα σου),' etc. Did Simon avail himself of the privilege here recorded of issuing money in his own name? This has hitherto been the guestic veratissima of Jewish number. been the quastic vexatissima of Jewish numis-matics. For some time past, however, the attri-bution to Simon the Hasmonæan (less correctly, the Maccabee) of the well-known silver shekels and half-shekels with the legends Shekel Yisrāel and Yerāshalēm Kědôshah, and the dates 'year 1' to 'year 5,' has been an accepted numismatic doctrine, so much so that very convincing reasons will naturso much so that very convincing reasons will naturally be expected to justify the present writer's rejection of it. These reasons may be stated here in preference to a later section. They are (1) the principles of the rights of coinage in antiquity. These cannot be here set forth in detail (see esp. Lenormant's classical work, La monnaie dans l'antiquité, ii. § 1, 'Le droit de monnayage,' etc.); it must suffice to emphasize the fact that the right it must suffice to emphasize the fact that the right to coin money of the standard metal, whether gold or silver, was the exclusive prerogative of the or silver, was the exclusive prerogative of the sovereign power. Just as the Persian kings, for example, guarded most jealously their exclusive right to coin gold, which was their standard, so the Seleucid sovereigns, coining on the silver standard, permitted certain privileged cities to strike bronze coins only (see previous section, and cf. Babelon, Rois de Syrie, exi, exliv). The resumption of a silver coinage with a special era by the cities of Phœnicia, at a slightly later period, was tantamount to the assertion of their complete

The admitted fact that the only independence. other silver coins of the Jews date from a time of asserted independence, at least suggests a similar date for the shekels in question. (2) The shekels of years 1 to 5 cannot be fitted into the chronology of this period. Since Simon died in the year B.C. 135, five years backwards Demetrius II. was still on the throne. Accordingly supporters of the Maccabean theory are compelled to assume that Antiochus Sidetes was merely confirming a right that had already been usurped by Simon. On the other hand, if the dates run from B.C. 142 (see I Mac 1342), two years are left without any coins. Whereas on the theory advocated in this article (see, further, § 9), that these coins belong to the first revolt, A.D. 66-70, we understand both why there should be only shekels of five years, and why those of the fifth year should be so rare. (3) The silver coinage ceases, ex hypothesi, with Simon. No reason for this can be given on the hypothesis we are combating. Subsequent Hasmonæan princes, such as John Hyrcanus and Alexander Jannæus, were men of greater wealth and power than Simon: why should they have been content to issue only bronze coins, if Simon had already struck in silver? (4) There is, further, the more technical argument from the size, fabric, and style of the coins in dispute. They do not resemble the contemporary silver coins of the Seleucidæ nearly so much as they do the imperial coins of the 1st cent. A.D. (see § 9, below), nor do they show any points of contact with the types or legends of the bronze coins of Simon's successors. The palæographic argument from the forms of the old Hebrew characters is of little weight either way; it is almost impossible to distinguish between the genuinely archaic and the intentionally archaistic in Semitic epigraphy. We believe, then, that if Simon availed himself of the right, which was soon withdrawn (1 Mac 15<sup>27</sup>), of issuing coins, these can only have been of bronze. No such coins, however, can with certainty be ascribed to

MONEY

The first native Jewish coinage dates from the reign of Simon's son and successor, John Hyrcanus. The earliest coins, however, that can with any confidence be said to have been struck at Jerusalem are some small bronzes—hemichalki,\* according to M. Babelon—of Antiochus VII. of dates B.C. 132 to M. Bauelon—of Antiochus vii. of dates B.C. 132 and 131 (see Madden, Coins of the Jews, 76; Babelon, op. cit. Nos. 1166-7, pl. xxii. 1; Gardner, op. cit. 75, pl. xx. 14). The coins of Hyrcanus are of small size, three specimens in the British Museum averaging 28 grs., and undated. In place of a type the field of the obverse is occupied by an inscription in the old Hebrew character, see plate

No. 6.

Obv. יהוחנן הכהן הגרול וחבר היהורים A (John, the high priest and (with) the commonwealth (?) of the Jews) within a wreath of olive leaves.

Rev. A double cornucopiæ with a poppy head in

the centre. A..
The initial A of the obverse is probably the first letter of the name of his suzerain Alexander II. Zebina (B.C. 128-123), who introduced the double cornucopiæ as his monetary badge, and from whose coins it was borrowed by Hyrcanus. The earlier coins of Hyrcanus were issued, as the above coins of flyrcanus were issued, as the above example shows, in his own name and that of the heber (אָרָר) of the Jews; his later issues, however, read: John the high priest, head of the heber of the Jews (ראש חבר היהודים). The word חבר, now generally pronounced as above, has been a fruitful subject of speculation among historians and numismatists, since its precise significance is unknown. A summary of the more important of the interpre-

\* The xalmer was a copper coin, eight of which were equiva-lent to a silver obol (& drachm).

tations proposed is given by Madden (Coins, p. 77; cf. Schürer, HJP 1. i. 284 f.). Only two need be mentioned here.

(1) Heber is the Heb. for the γερουσία or senate of the books of Maccabees and Judith, the later Sanhedrin (so Geiger, Levy, Madden, etc., and most recently Wellhausen, Isr. u. jud. Gesch.

[1894], 236).

(2) Heber denotes the whole body of the people This view has found an able advocate recently in Prof. Eb. Nestle (ZATW, 1895, 288 ff.: ¬¬¬= εθνος), who seeks to prove the equation stated in the title of his paper, and this other:  $= \epsilon \theta \nu d\rho \chi \eta s$ , a title frequently given to the Hasmonæan princes in the books of Maccabees. Neither of these views quite commends itself to the present writer. On the one hand, it is difficult to account for the mention of a body like the  $\gamma \epsilon povoria$ , which our best authorities regard as of little or no importance at this epoch (see Wellh. loc. cit., and Holtzmann-Stade, Gesch. ii. 398); on the other hand, it is not less difficult to see why the more familiar words by, לְּהָהָ, etc., were passed over if Nestle is right. The LXX, we believe, supplies the key. In Pr 21 $^{\circ}$  (=25 $^{24}$ ) the Heb. אָרָה דְּהָה (lit. house of association, i.e. one shared with another) is rendered  $\ell\nu$  of  $\kappa\nu$ κοινώ, while κοινωνέω and κοινωνός are elsewhere employed to render derivatives of the root π.π. We consider, then, that the קָּרָה of the coins is the equivalent of the Gr. expression 7d κοινόν in one of its various significations. Of these the following are the most probable: (a) respublica; commonwealth, community.\* τὸ κοινόν in this sense is synonymous with  $\dot{\eta}$   $\pi \delta \lambda \iota s$  (Aristotle, ap. Bonitz, syndyhody whole in the control of t be adduced the fact that the contemporary bronze coins of the semi-autonomous cities, as we saw above, combine the royal name with that of the people (ΤΥΡΙΩΝ, etc.; see list in Babelon, ci).
(b) Public authorities, officers of state (Staats-(b) Public authorities, officers of state (Staats-behörden), perhaps the executive. In support of this rendering we would appeal to the use by Josephus in his Life (passim) of the expression το κοινον τῶν Ἱεροσολυμπῶν, apparently in the sense of 'the executive authorities of the people of Jerusalem.' A comparison of § 52 (Niese, 266 f.) with § 60 (N. 309 f.) seems to show conclusively (1) that the κοινόν must have been a body with functions resembling those of an executive of the functions resembling those of an executive of the  $\delta\hat{\eta}\mu$ os, and (2) that the former is to be taken as synonymous with of τῶν Ἱεροσολυμιτῶν πρῶτοι, by which expression, at the first mention of his appointment as governor-general of Galilee (§ 9), Josephus designates the nominating body, which in all succeeding references he names τὸ κοινὸν τῶν Ἱερ. (c) The meaning 'confederation,' which κοινόν so frequently has in the constitutional history of the Greek states, may also be suggested; but, with our lack of knowledge regarding the constitution of the Jewish State at this period, it is best to leave the solution of the equation =κοινόν an open question.

Aristobulus (B.C. 105-104), in his few extant coins, retains the earlier legend of his father: 'Yehûdah high priest and the commonwealth (!) of the Jews.' They were all apparently struck before he assumed—first of the Hasmonæans—the title of king (Jos. Ant. XIII. xi. 1). The powerful Alexander Janneus (Heb. wr., contracted from [10], [10], [10] during his long reign (B.C. 104-78) issued a plentiful supply of bronze coins. Some of these are remarkable (1) for the appearance for the first

<sup>\*</sup> See Liddell and Scott ; Schweighäuser, Herod. Lez. ; Bonits, Index Aristot. s.v.

time of the royal title, and (2) for the introduction of a Greek legend. Thus (No. 7)—

the king. Type: a half-opened flower (another series has the same legend with each letter between the rays of a star, which serves as type).  $BAXINE\Omega X$  ANEEANAPOY. Type: an

anchor with two cross-timbers within a circle. Besides these regal coins, Alexander issued a series of pontifical coins with the legend 'Jonathan (written min and par) the high priest and the commonwealth (?) of the Jews. On the reverse is the double cornucopiæ with the poppy-head, which, like the anchor on the regal series, shows the continued influence of the Seleucid coinage. For full details of the numerous varieties of Alexander's coins as for those of John Hyrcanus, the student is referred to Madden and the other writers mentioned in the bibliography at the end of this article. The only other Hasmonwan prince whose coins are of sufficient interest to warrant mention in this summary is Antigonus (B.C. 40-37), the protégé of the Parthians and the last of the dynasty. These inform us that Antigonus bore the name of his illustrious ancestor, Mattathias, and they are the first Jewish coins to show a date: אם and ישב, i.e. 'year (שְּלֵּי, one' and 'year two' of his unfortunate reign. one' and 'year two' of his unfortunate reign. 'The Asmonean dynasty commenced with a Mattathias, with the coins of a Mattathias the Asmonean dynasty concludes' (Madden). All these native coins, we must repeat, were from first to last of bronze, and all, with the exception of some of those of Antigonus, of very small size, viz. 2 and 3 of Mionnet's scale, i.e. about '5 and '6 in. in the control of the control diameter. Further research, and in particular much patient weighing, of the extant coins will be required before we can pronounce with confidence on the denominations they represent—in other words, on their relation to the standard silver The smallest coins, at least, can scarcely be other than the peratah of later Jewish writings, the lepton of the NT (cf. § 8).

The money par excellence (ηρφ, ἀργύριον) of the Jews during the greater part of the Maccabæan period was obtained from heathen mints, as, with the decline of the central power, the cities of the coast one after another recovered their utonomy. Tyre, in particular, began in B.C. 126—from which its new era is dated—to issue an autonomy. important series of silver and bronze coins with considerable variety of types. The principal denominations were the tetradrachm or heavy shekel, and longo intervallo, the didrachm or light shekel, which was doubtless in considerable demand among the Jews for the payment of the temple tax. The weights are at first well maintained, at c. 220 and 110 grs. respectively. No. 8 illustrates a Tyrian shekel or tetradrachm of the Hasmonæan period.

§ 6. Bronze coinage of the Idumwan dynasty. In the year B.C. 37, with the help of the Roman legions, Herod, the son of Antipater, 'by birth an Roman, by profession a Jew, by necessity a Roman, by culture and choice a Greek, succeeded in securing the throne which Rome had promised him a few years before. Nothing could better show the condition of vassalage under which Herod held his kingdom than the fact that for all his progressive wealth as evidenced not solve by he his enormous wealth, as evidenced not only by his princely gifts to foreign cities and his lavish expenditure at home, but by the great sums of coined money (αργυρίου ἐπισήμου) which he bequeathed at his death (Ant. XVII. viii. 1), he was restricted by

the suzerain power to a coinage exclusively in bronze. The Hebrew of the legends is now displaced by Greek, while, in addition to the familiar Hasmonæan types of the anchor and the cornucopies, we have such new types as the tripod,—another favourite Seleucid emblem,—the helmet, the Macedonian shield, the pomegranate, the caduceus, etc. One of the most interesting of Herod's coins is that represented by No. 9.

Obv. Metal helmet with cheek pieces; in the

Fig. Metal neimet with cheek pieces; in the field above, a star; on either side, a palm branch. (Others with the same type have only one branch to left, above).

TIBE within a wreath.

In an article devoted rather to an exposition of the principal varieties of money in circulation among the Jews than to a catalogue of coins, we must be excused from entering into an examination of the coins of Philip the tetrarch (Lk 3'), and especially of the long and complicated series of Agrippa II., the last of the Herods.† A word must suffice even for those struck by Agrippa I. during his short reign (A.D. 41-44) over the reunited territories of the great Herod. According to de Sauley these all bear the same date, 'year 6,' i.e. according to the Jewish method of computation the year A.D. 41-42, reckoning from the first year of Caligula A.D. 37.‡ (See No. 11.)

Rev. ΒΑCΙΛΕΩC ΑΓΡΙΠΑ (sic). Type, umbrella

with tasselled fringe.

Obv. Three ears of corn united on one stalk; to right and left LS (year 6). Æ 4. Wts. 38-47 grs.

These were the last Jewish coins legitimately and constitutionally struck in Jerusalem. In allusion to his alliance with Claudius, Agrippa struck elsewhere coins with the interesting legend BACIAEYC MEFAC AFPINIAC PIAOKAICAP friend of Crear, cf. Jn 19<sup>12</sup>). On the death of Agrippa, Judgea was once more, and finally, incorporated with the Roman empire.

§ 7. Imperial coinage of Rome, including coins of the Procurators, and of the autonomous cities of Palestine.—When the Romans entered upon their

Palestine.—When the Romans entered upon their \*The symbol L to denote iros (year) is first found in the Ptolemaic papyrl. The monogram is probably the initial letters of TP/xulus, indicating that the coin is of the value of three chalki, the chalkus, in the Greek system, being a copper coin, eight of which were equivalent to an obol († drachm). For coins of Antiochus IV. Epiphanes with similar monograms of value, and for details as to the weights of the Seleucid bronzes generally, see Babelon, Rois de Syrie, clxxxy ff.

† 'Unter allen numismatischen Kreuzen sind die Jahreszahlen auf den Münzen Agrippas II. elns der peinlichsten.' So wrote Mommsen in 1871 (Wiener Num. Zeitz. iii. 451). For the latest attempt to adjust the chronology of this prince, see Carl Erbes 'Das Todesjahr Agrippas's II. '[year of death fixed at 36 instead of 100 A.D.] in Z.f. wiss. Theol. 39 (1896), p. 415-435.

I See, however, for the chronology of Agrippa I. and for the possibility of coins of seventh to ninth years. Unger: 'zu Josephus' in Sitzb. d. shilos.-philolog. Classe d. k. b. Akad. d. Wiss. zu München, 1896, 894f.; cf. Reichardt apud Madden, Coins, 182.

career of conquest in the East, they found, as the career of conquest in the East, they found, as the universal silver unit, the Attic drachm, now reduced to about 62 grains. The corresponding Roman unit was the denarius, also reduced from \( \frac{1}{1}\) to \( \frac{1}{8}\) of the Roman pound, i.c. to 60 grains. It followed as a matter of course that the two coins were identified, with a slight advantage in favour of the denarius. Henceforward, in Greek and Roman writers, 'Attic drachm' \* and 'denarius' are convertible terms (see Hultsch, Metrol. 250 f.); a tetradrachm is now, in ordinary speech, the equivalent of four, an Attic talent of 6000 denarii. Since Pompey's conquest of Syria, B.C. 65, the denarius had circulated in Palestine alongside of the tetradrachms of Antioch and Tyre, both tariffed by Pompey at four denarii. In B.C. 15 Augustus carried through his thoroughgoing reform of the currency, retaining the gold and silver coinage in his own hands, while the senate was accorded the exclusive right of striking copper coins, the distinguishing mark of which was the letters S. C. (senatus consulto) on the reverse. The principal coins of the Augustan currency were—in gold, the aureus; in silver, the denarius; the sestertius (=4 asses or 1th denarius) and dupondius of fine brass (orichalcum); finally, the as  $(\iota_n^{\dagger}$ th denarius) with its half (semis) and quarter (quadrans), all in copper. All government payments, such as taxes and tolls, fines imposed by a Roman court, and the like, were calculated in this currency throughout the empire. We learn, however, from the Palmyra tariff, regulating the amount of toll or custom to be paid on various articles of merchandise, that while the amounts were calculated according to the denarius and as, payment of sums under a denarius was accepted in the native copper currency + (see, further, § 8).

In A.D. 6 Archelaus was deposed by Augustus, and Judæa became a Roman province under an imperial procurator, with headquarters in Cæsarea. Neglecting the copper coins of the Herodian princes, which had merely a local circulation, we may group the principal denominations circulating in Palestine during this period as follows:—

A. Imperial aurei and denarii, with 'superscrip-

tion' in Latin.

B. Roman provincial silver and copper from the mint of Antioch, to which were added, after A.D. 17, the issues of the mint set up at Cæsarea Cappadociæ.

C. Silver and copper from the mint of Tyre.
D. Copper coins from the procurator's mint at

Cæsarea.

A. The aureus and, in particular, the denarius were the standard coins of the empire, circulating everywhere. As first fixed by Julius Cæsar, the aureus; weighed 126.3 grs. (4) th of libra or pound) of pure gold. This represents, at the mint price of gold, a sterling value of £1, 0s. 6d. In Augustus' later years, however, and under his successors to the time of Nero, the effective weight of the coins never exceeds  $\frac{1}{4}$  pound or 120'3 grs. (see Hultsch, Metrol.<sup>2</sup> 309 ff.), equal to 19s. 6d.§ Under Nero the weight fell to 115 grs. (18s. 8d.). The pieces of gold swallowed by the wretched fugitives from Jerusalem at the time of the great siege were aurei, the supply of which was so great after the capture of the city that—if we can believe Josephus

\* In Josephus δραχμή 'Αττική or 'Ατθίς is everywhere the denarius.

denarius.

† For this important inscription in Greek and Aramaic, discovered in 1881, see de Vogüé, Jour. Asiat. 1883; Schroeder, Sittò. d. Beri. Akad. 1884, 417-436; and esp. Dessau in Hermes, xix. 486-588 for Greek text, and Reckendorf in ZDMG 42, 1888, 870 ff., for the Aramaic text.

‡ Soil. nummus, the xpursus [stat4p] of Greek writers, in the Michael Tri. 1017 (-descript surgers)

cluding Josephus; in the Mishna קינר וחב (=denarius aureus),

§ The mean of these two values is a sovereign, at which the aureus may be reckoned for the first half of the 1st cent. A.D.

(BJ v. xiii. 4)—the value fell from twenty-five denarii, the legal tariff, to twelve. The denarius (δηνάριον, originally the equivalent in silver of ten copper asses,—hence its name) from Augustus to Nero weighed 14 libra or 60 grs., and was now= 4 sestertii or 16 asses. By Nero it was reduced to be or 52 grs., still retaining, however, its legal value of the aureus. The many conflicting estimates of the value of the denarius (the penny of our EV) which are to be met with in works of repute, render it imperative to discuss this subject more fully. King James's translators give the value thus: 'The Roman penny is the eighth part of an ounce [which it was not till after A.D. 60], which, after live shillings the ounce, is seven ence halfpenny' (Mt 18<sup>28 marg</sup>). This method has two grave defects: (1) it attempts to value the denarius in terms of a constantly fluctuating quantity, the price of silver; and (2) even at the market price of silver at any given date, by this method we should only have the price of the denarius as bullion, not as a coin with a fixed legal currency. In order to express the value of the denarius in terms of our English standard (gold), we must start from its value relative to its own gold unit, viz. as 215th of the aureus. The denarius accordingly varied in value with the aureus from 9.83d. to 9.37d., of which 91d. may be taken as a sufficiently accurate mean value for ordinary calculations.\*

MONEY

B. Throughout the western half of the Roman empire the denarius was the only legal silver coin. In the East, however, the system based on the Greek drachm was continued, the coins on this standard, chiefly tetradrachms and drachms, being issued for Syria and part of Asia Minor from the two imperial mints of Antioch and Cæsarea of Cappadocia. From the former mint † were sent forth tetradrachms with Greek legends, which, though actually weighing 220-230 grs., were tarified by the imperial government at only three denarii (see Mommsen, Röm. Münzwesen, 37 f., 715 f.; Hultsch, Metrol.<sup>2</sup> 595). Antioch, moreover, shared with Rome the honour of having a mint for the issue of senatorial copper distinguished by their Latin legends, and, in particular, by the letters S. C., within a wreath, on the obverse. The two denominations issued, which also had legal currency throughout the Syro-Convedering more than the syro-Cappadocian monetary province, are generally identified with the sestertius and the as (Mommsen, op. cit. 718; Madden, Coins, 301 f.). The coins of Cæsarea § (from A.D. 17) are principally drachms and didrachms on the Phænician standard. Vast numbers of the former must have circulated in Palestine in the 2nd cent. (see below, § 10), but they can scarcely have reached that country in any

number in the time of our Lord (see drachm, next §).

C. The great mint of Tyre continued to issue silver and bronze, the former mainly tetradrachms, without interruption down to the eve of Nero's innovations, on the old Phænician standard (220-224 grs.). In Josephus' day the Tyrian tetradrachm was, at least in popular usage, accepted as equivalent to four denarii (τοῦ Τυρίου νομίσματος δ τέσσαρας 'Αττικάς δύναται, BJ ii. 21. 2, N. 592). It is the stater of the NT (see next §).

D. The procurators who governed the province

After Nero it would not exceed 9d.

\* After Nero it would not exceed 9d.

of Judea from A.D. 6 to the outbreak of the great rebellion of A.D. 66, of whom Pontius Pilate, Felix, Festus, and Gessius Florus are the best known, issued copper coins in the emperor's name, probassure copper coins in the emperor's name, probably at Cæsarea. These are of small module, and apparently all of one denomination (the quadrans (?)). Under Augustus they are dated according to the era of Actium, B.C. 31,† but under Tiberius by the years of his reign. Though Roman coins, they avoid all representation of living creatures, in deference to the susceptibilities of the Jews.

The legend of the obv. generally runs, KAICAPOC or TIB. KAICAP.; or in full, TIBEPIOY KAICAPOC, as on the coins of Pilate. Thus illustr. No. 12—Obv. TIBEPIOY KAICAPOC LIS (year 16=A.D.

29-30). Type, a simpulum.

Rev. IOYAIA KAICAPOC. Three ears of corn bound together. Æ 3. The date shows that this coin was struck by Pontius Pilate. In order to complete this sketch of coins cir-

culating in Palestine in the first century of our era, a single reference must be made to the money of the numerous cities (e.g. Samaria Sebaste and the cities of the Decapolis) to which Rome had granted the right to strike 'autonomous' bronze The circulation of these, it is true, was local and restricted, yet they are full of interest to the historical student, who is referred to the classical treatise of M. de Saulcy, La Numis-

matique de la Terre Sainte, 1874. § 8. Money of the New Testament.—Under this head it is proposed to bring together the references to money and coins in the NT, at the same time avoiding all unnecessary repetition. In the NT, as in the OT, 'money' is still par excellence silver money (ἄργυρος, ἀργύριον), although all three metals are in circulation (cf. Mt 10° χρυσόν—ἄργυρον—χαλκόν). Large sums are expressed in minas (μνᾶ, AV pound) and talents (τάλαντον). The latter is no longer a weight of silver, but the Roman-Attic talent, which comprised 6000 denarii or drachms (Hultsch, Metrol.<sup>2</sup> 252, and Index 'Talent'). was thus equal to 240 aurei, or £240 (see previous §). The mina (Lk  $19^{18-25}$ ) is the sixtieth part of the talent, 100 denarii, or £4. Of specific coins, the aureus is only indirectly referred to in the passage above referred to: 'provide neither gold, nor silver, nor brass in your purses (Mt  $10^9$ ). On the other hand, the denarius  $(\delta\eta\nu d\rho\iota\sigma\nu$ , EV penny) is mentioned sixteen times in all in the NT, and constantly as the  $dinar(\gamma)$  in the Mishna. Its value in our Lord's time may with sufficient accuracy be set down as 94d., as was shown in the previous section. Our Revisers unfortunately have still adtion.§ Our Revisers unfortunately have still adhered to the ridiculous rendering 'penny' instead of admitting the more accurate 'shilling,' as proposed by the American translators, and retaining 'penny' for the as || and 'farthing' for the quadrans (see below). The Roman taxes were reckoned and paid in denarii (cf. τὸ νόμισμα τοῦ κήνσον, Mt 22<sup>19</sup>); the 'image and superscription' (Lk 20<sup>24</sup>) of a contemporary denarius of the emperor Tiberius is given in our plate. No. 13.

Tiberius is given in our plate, No. 13.

holding sceptre and flower.

\*The emperor's peculiar relation to the procuratorial provinces explains why this coinage was not issued in the name of the senate in accordance with the agreement of B.C. 15. See, turther, Pick, loc. cit.

† See for this question Pick, l.c. p. 307 f.; Schürer, HJP 11. ii. 80, and cf. Madden's tables.

it has one and or. meadens tables.

I this is well shown by the use made of these coins by Schürer in his great work. See ILJP Index under 'Coins.'

The real test, however, of the value of this or of any other coin is its purchasing power, for which see the appendix to this

article.

" 'Let & rekess (Mt 1029, Lk 128) be translated "penny," and bywkess "shilling," except in Mt 2219, Mk 1215, Lk 2024, where the name of the coin should be given.'

The Greek drachm (δραχμή; in later Hebrew m zdz, also kpi, by which Onkelos renders correctly the quarter of the shekel, 1 S 9°) is only once mentioned by name (Lk 15° 'ten pieces of silver'). Its value at this time was neither 71d. as AVm, nor 8d. as RVm, but was the same as that of the denarius in ordinary transactions. In government payments, however, as we saw above, it was tarified at a of the denarius. The 50,000 'pieces of silver' (doyuplou, Ac 1919) at which the magical books were valued, are also to be understood as denarius-drachms,\* the universal unit of calculation. In a previous section it has been shown that the δίδραχμον, or double-drachm, was the Gr. equivalent of the half-shekel, the whole shekel being a tetradrachm of Tyrian currency, The didrachm was very rarely coined at this time, and indeed was at all times much rarer than the tetradrachm. Hence it must have been very common, if not the usual custom, for two persons to unite in paying 'the tribute money'  $(\tau \delta \delta \delta \rho a \chi \mu a)$ , Mt  $17^{24}$ )—the annual contribution of every male adult Jew to the maintenance of the temple services-by means of a Tyrian or other tetradrachm on the Phonician standard. This last is the stater (στατήρ, Mt 1727 AV piece of money, RV shekel t) found in the fish's mouth, which Peter was instructed to pay as 'tribute money' for the Master and himself. The contributions of Jews in foreign lands were collected and changed into gold pieces (בְּרְבּוֹנְים darkônîm, Shekalim ii. 1, which are not darics but aurei; cf. Bab. bath. x. 2) for convenience of transport (see, further, Jos. Ant. XVIII. ix. 1, N. 312, where τδ δίδραχμον is used precisely as by St. Matthew for 'half-shekel'). After the destruction of Jerusalem the half-shekel, otherwise two drachms or denarii (δύο δραχμάς, Jos. BJ VII. vi. 6), was appropriated by the Roman authorities for the temple of Jupiter Capitolinus (Jos. l.c.).
The 'thirty pieces of silver' (τριάκοντα αργύρια,
Mt 26<sup>15</sup> 27<sup>86</sup>), for which our Lord was betrayed, are in all the circumstances more likely to have been thirty Phœnician tetradrachms—hence=

been thirty Phœnician tetradrachms—hence=120 denarii (£4, 16s.)—from the temple treasury (cf. Zec 11<sup>12</sup> in LXX), than thirty denarius-drachms.

We come now to the copper coins of the NT, and find mention of three different denominations. (1) The lowest of these is the lepton (λεπτόν, Mk 12<sup>42</sup> = Lk 21<sup>2</sup> the widow's 'mite'; Lk 12<sup>59</sup> 'thou shalt not depart [out of prison] till thou hast paid the very last "mite"; [τὸ ἐσχατον λεπτόν = Mt 5<sup>26</sup> τὸν ἐσχατον κοδράντην, 'the uttermost farthing']. The coin mentioned in these three passages can only be the pἔτᾶtαh (περιτε), so often spoken of in the Mishna as pro-(নহান্ত্ৰ), so often spoken of in the Mishna as proverbially the smallest Jewish coin (so Lk 12<sup>99</sup>). In at least two places (Kiddush. i. 1, Ediyy. iv. 7) it is expressly declared to have been tariffed as ith of the Italian or Roman as (γρων ων isşâr (or aşşâr) italkî), in other words the half of the Roman quadrans. This agrees precisely with the much discussed note—whether original or marginal—in Mk 12<sup>42</sup> λεπτὰ δύο δ έστιν κοδράντης, 'two lepta, which makes a quadrans,' as it accords with 'the unanimous tradition of the Hellenistic metrologists' (Hultsch Metrol 2 805 n. 6). It must be gists' (Hultsch, Metrol. 2 605, n. 6). It must be sought for among the minute bronzes of the Hasmonæan and Herodian princes, some of which do not weigh more than 15 to 20 grains. Since it is ith of the as, or righth part of the denarius, its legal value was about ird of an English farthing. The two remaining bronzes may best be examined together; they are (2) the kodrantes (κοδράντης, Mt 526, Mk 1242 already cited), and (3) the

\*This use of approfer is often met with in Josephus.
† The OT word אָרֶל was in later Hebrew displaced by אַרְלָּכ ecla', stater or tetradrachm, which in the Mishna contains four D'il susim, or drachms.

assarion (doodpoor, Mt 10<sup>29</sup> 'are not two sparrows sold for a farthing?' \* Lk 12<sup>9</sup> 'are not five sparrows sold for two farthings?' Cf. Vulg. nonne quinque passeres veneunt dipondio?). The kodrantes is passeres veneunt apponato 1). The kodrantes is undoubtedly the Roman quadrans (the fourth part of the as, value about § farthing)—from which, of course, the name is derived—since in the one passage (Mk 1242) the note is clearly intended for Roman readers, and in the other (Mt 526) the popular perutah-lepton of Lk 1259 is replaced by St. Matthew, familiar as a tax-gatherer with the Roman system of accounting by the with the Roman system of accounting, by the lowest denomination in the Roman scale. With lowest denomination in the Roman scale. With regard to the assarion (from the Latin assarium, a by-form of as) we are on less firm ground, for, in the existing uncertainty as to how the copper of the Hellenistic system was adjusted to that of the Roman system, we must not hastily identify the Hellenistic assarion with the Roman as. former passed into the contemporary Hebrew as the issar (אפר), see Mishna, passim; cf. אפרא of the Palmyra tariff, and the assārā of the Peshitta and Palestinian Syriac, Lk 126), and the authorities of the Mishna repeatedly refer to the dinar or zůz (the denarius-drachm) as containing 6 maoth (n)pp obols), and 24 issarim, from which it is evident that in the 2nd cent. at least the issarassarion was a different coin from the as. venture to think that the key to the difficulty is to be found in the distinction between the 'current' and 'tariff' value of a coin, to adopt expressions employed in the East at the present day. In ordinary transactions the drachm and the denarius were equal in value, the former containing 6 obols, 24 dichalki or 48 chalki, and the latter 8 dupondii, 16 asses or 64 quadrantes. Since 24 issarim-assaria also went to the denarius-drachm, we must infer that the Greeco-Roman name assarion was popularly applied to the old di-But all government dues and official payments were calculated on the Roman denariusas system (see the rescript of Germanicus Cosar, A.D. 17-19, quoted in the Palmyra tariff δεί πρός ἀσσάριον ἰτα[λικόν]—elsewhere εἰς δηνάριον—τὰ τέλη λογεύεσθαι, Col. IV 41 ff.), with the proviso added that small dues amounting to less than a denarius (τὸ δὲ ἐντὸς δηναρίου τέλος) might be defrayed in the native copper † (πρὸς κέρμα = 1971); cf. same word in Peshitta Jn 218). Now the Romans, it will be remembered, tariffed the tetradrachm at 3 denarii (i.e. 1 drachm = 2 denarius); accordingly a tax of the latter amount, 2 denarius, might be paid either in Roman copper, if available, i.e. by 6 dupondii or 12 asses, or 48 quadrantes, or in native copper or 12 asses, or 48 quadrantes, or in native copper on the drachm-system, in this case by 6 obols (a drachm), or 12 tetrachalki (half-obols), or 48 chalki. By government tariff, therefore, the dupondius was made equal to the obol, the as to the tetrachalkus, and the quadrans to the chalkus. These equations are confirmed (a) by the ancient gloss: δβολότ hoc duopundium (Corp. Gloss, ii. 378, cited by Kubitschek, art. 'Ασσάρων in Panily-Wissows Realency! vol ii) and (b) by the Pauly-Wissowa, Realencyl. vol. ii.); and (b) by the Peshitta rendering of kodpartns, viz. shamona, which is the Talmudic prop shamin, Kiddush. 12c, ‡ i.e. the eighth part (of the obol), in other words the chalkus. We assume, then, that just as in Alexandria at the present day we have the piastre tariff' and the 'piastre current,' the former equal to two of the latter; so in NT times former equal to two of the latter; so in NT times

\* See above for improved rendering of the American Revisers.

\*\*Yssers. † For this see Dessau's paper cited above (Hermes, xx. p. 520); cf. ZDMG 42, p. 412.

† Where it is added: 'two perûtahs make a shāmîn,' another confirmation of Mk 12°8.

§ This identification of the quadrans with the chalkus has already been suggested on other grounds (see Madden, Coins, p. 300 f.).

there was the current issar-assarion, which was the dichalkus, and the tariff or Roman as-distinguished from the other as the issar italks of the Mishna and the Palmyra tariff; cf.  $A\Sigma(\sigma\delta\rho\iota\rho\nu)$ IT(dλικον) on coins of Crete of the 1st cent. (Svoronos, Num. de la Crète ancienne),—which was double the value of the former. The quadrans, finally, was always a tariff coin, represented by the imperial coins of the procurators (40-45 grs.), but popularly known by the name of its tariff equivalent, the Greek chalkus (Heb. shamîn).

#### C. THE COINS OF THE REVOLTS.

§ 9. Coins of the First Revolt (A.D. 66-70).—In the year A.D. 66 began the struggle against the might of imperial Rome, which ended in the destruction of both temple and city, August A.D. 70. To these five years (spring 66-67 to autumn 70-71) of the so-called 'first revolt' must be ascribed the first issue of silver money from a Jewish mint. These are the famous shekels and half-shekels of which we now give the illustration (Nos. 14, 15 of plate) and description.

שקל ישראל [shékel Yisrāēl, the shekel of Israel] שקל in old-Heb. characters. Type: a jewelled chalice with knop on stem; above the cup שה [contraction for שנח ה year five]; border of dots. Rev. ירושלים הקרושה [Yerashalayim ha-kedoshah,

Jerusalem the holy] in same characters. Type: a flowering lily; border of dots.

Obv. מצי השקל [hazt ha-shekel, the half-shekel] in old-Heb. characters. Type: a broad-lipped chalice with knop on stem, on either side a pellet (of incense?); above the cup  $\aleph$  [= year 1]; border of dots.

Rev. ירושלם קרשה [Yěrûshûlēm ķědôshah]. Type

and border as in shekel.

The shekels and half-shekels of the first year are distinguished from those of the following years (1) by the chalice having a broad projecting lip instead of a jewelled rim; (2) by the letter & alone, without w; and (3) by the scriptio defectiva of the reverse legend, the adjective holy, further, being without the article. No Jewish coins have given rise to so much discussion, or have been assigned to so many different periods of Jewish history as these. † The time of Ezra and Nehemiah, the age of Alexander the Great, and the principate of Simon Maccabæus have all been proposed, the last in particular, by almost all recent writers on Jewish history and archeology. The main grounds on which this date must be pronounced untenable have been given in a former section (§ 5). The explicit testimony of the coins themselves, with the uniform legend 'Jerusalem the holy,' proves, according to a well-known numismatic canon, that the authority under whose auspices the coins were struck was that of an independent and autonomous city. Now Jerusalem enjoyed the requisite independence only on two occasions, and on both the independence was not constitutional but usurped. These two occasions coincide with the first and second revolts. The latter is out of the question, since the coins of that period are now known in great detail (see next §). There remains only the period

\*This explains how the quadrans does not appear in a Hebraized form in the Mishna, like the as and the dupondius (†\*\*η\*)\*Β), which the Vulgate inserts in Lk 124. The coins of Herod with a X (χαλουῦ) on the obverse within a circle (Madden, p. 111), which weigh 43-48 grs., are also probably quadrantes-chalki. For the circulation of the quadrans in the East, see the Blass-Ramsay controversy over Mk 1242 in the Exp. Times, x. (1898-90) passiva.
† Besides the discussions in the numismatic works mentioned in the bibliography to this article, see Schürer, HJP1. il. 370 ff.
† The most recent theory of all, that these shekels were struck by 'the (hypothetical) republic of Jerusalem' set up by Gabinius, n. o. 57/6-58/2 (Unger, 'zu Josephus iv., Die Republik Jerusalem,' Sitzb. d. philos-philolog. Classe d. Akad. zu München, 1897, D. 199 ff.), is based on too many hazardous combinations to command our confidence.

of the first revolt, A.D. 66-70.\* We maintain, therefore,—and in this contention we claim the support of a growing body of expert opinion (Imhoof-Blumer, Babelon, Reinach, and others),—that the coins in question were struck by the same executive authority (τὸ κοινὸν τῶν Ἰεροσολυμπῶν, Jos. Life, passim) as was responsible for the defence of the city and the general conduct of the war. This attribution is confirmed by the comparative frequency of coins of the first three years, by the rarity of coins of the fourth year, and by their almost complete absence in the fifth year (April to August A.D. 70), all corresponding in the most complete manner with the success and gradual collapse of the Jewish power in the course of the revolt. Further, the fabric and module of these shekels present a remarkable similarity to those of the tetradrachms of Nero and Vespasian, issued about the same time from the mint of Antioch. † It is possible, as Reinach suggests, that the immediate purpose of the new coinage was to supply, for the first time in Jewish history, native 'shekels of the sanctuary' for the various religious dues.‡
The question of the copper coinage of the two

revolts is too intricate a subject for detailed discussion here (see Schürer, HJP I. ii. 383 ff. for the conflicting views of numismatists). Only two sets of bronze coins can now, in all probability, be assigned to the same period as the silver shekels. These are (1) a set of small coins distinguished by the legend אין היה ציון (hērāth Ziyyôn, emancipation of Zion) round a vine leaf, and on the obverse, in old-Hebrew characters, 'year two' and 'year three' (illustr. Madden, p. 206). (2) A series of copper coins of three denominations, of which the distinguishing mark is the legend pur hous (lig'allath Ziyyûn, the redemption of Zion) on the reverse; the obverses have the following: (a) שנה ארבע חצי (year four—a half), (b) שנח ארבע רביע (year four—a quarter), and (c) שנח ארבע (year four) alone. The principal types (see Madden, p. 71 ff.) are the lillab (לולָב), a sort of bouquet composed of twigs of the myrtle and willow with a palm leaf; see Lv 2340) and ethrog אַחָרנ a citron), which were carried in either hand at the feast of Booths. The obverse of the third group (c), however, is the chalice, which serves to connect the whole series with the shekels of the first revolt. The coins just described are generally known as 'the copper shekels of the year four,' it being assumed that they represent \( \frac{1}{2}, \frac{1}{2}, \text{ and } \frac{1}{2} \text{ shekels respectively.} \)
If this be so—the view is by no means beyond question—these coins will be specimens of 'siege money,' tokens issued by the authorities to be redeemed by silver money after the victory—which never came.

Perhaps no coins of antiquity have been more frequently reproduced in illustrations than the numerous coins struck by Vespasian, Titus, Domitian, and the Roman senate to commemorate the subjugation of Judæa (see Madden, pp. 207-229; de Sauley, Numism. de la Terre Sainte, p. 79 ff.; Pick, Zeit. f. Numism. xiv. 1887, 328 ff.). One of these, an aureus of Titus, is shown in No. 16.

Obv. T. CAES. IMP. VESP. PON. TR. POT.

Head of Titus, right, laureated.

Rev. No legend (other coins have JUDAEA CAPTA and the like). Palm tree; to left; Titus, with left foot on helmet, holding spear in right hand, with left resting on para-zonium; § to right: Judea as a Jewess seated on the ground.

fror weights of extant shekels and half-shekels, see Madden, Coins, p. 286 n. 5.

§ A short sword attached to a belt round the waist; see Rich, Dict. of Antig. s.v.

§ 10. Coins of the Second Revolt, A.D. 132-135.— The history of the Jewish community in Judea during the sixty years that followed the destruc-tion of their temple is very imperfectly known; in particular, the antecedents of the shortlived but sanguinary rebellion which broke out in the 16th vear of Hadrian's principate.\* The conflicting year of Hadrian's principate.\* The conflicting and fragmentary evidence seems to warrant either of two alternatives. Either the Jews were goaded to revolt by coercive measures on Hadrian's part, and by the founding of Alia Capitolina with its heathen temple, on the occasion of his with its heathen temple, on the occasion of his visit to Jerusalem A.D. 130; † or on a former visit in A.D. 117 (see for this Dürr, op. cit. p. 63, following Epiphanius) the Jews had received permission to rebuild the temple, and were now incited to revolt by Bar Cochba, whose Messianic claims had been approved by R. Akîba, the most respected religious leader of the time. The founding of Ælia Capitolina would thus fall naturally after the suppression of the revolt. The numismatic evidence seems rather favourable to the second alternative alternative.

The distinguishing feature of the silver coins of the 'second revolt' is the fact that they are all, probably without a single exception, imperial denarii, drachms, and tetradrachms from the mints of Rome, Cæsarea, and Antioch respectively, which have been re-struck with Jewish types and legends. On most of them some trace, more or less, of the original legend, and even in some cases of the head of the emperor—from Galba to Hadrian inclusive—has survived. Where such is not the case, we may assign as the cause the success of the process of re-striking rather than the use of native flans. Our knowledge of these coins has recently been enlarged by a valuable find a few miles from Hebron, which has enabled a German numismatist to undertake an exhaustive study of all the known specimens (see L. Hamburger, 'Die Silbermünzprägungen während des letzten Aufstandes der Israeliten gegen Rom' in Von Sallet's Zeitsch. für Numismatik, xviii. (1892) pp. 240–347).

The activity of the Jewish moneyers during the short period of the revolt is very remarkable, since, according to Hamburger's data, no fewer than twenty-four different classes of silver coins have to be registered (op. cit. p. 246). From these we learn that the leaders of the revolt were the secular chief, 'Simeon, Nasi (or Prince) of Israel,' and the religious head of the nation, 'Eleazar the (high) priest.' The latter has been variously identified as Eleazar of Modein, whose priestly descent, however, is uncertain; Eleazar ben Azariah (Hamburger), and most recently Eleazar ben Harsom (Schlatter, op. cit. 54 if.; 'assez plausible' is Bacher's verdict, REJ, 1895. The Simeon of the win lagends on bertly be. Simeon of the coin-legends can hardly be other than the pseudo-Messiah known as Simon bar Cochba בּר מוקדא bar Kôkébá, 'son of the star,' בְּ in allusion to Nu 24<sup>17</sup>), whose real name was probably Simeon bar Kozēba, i.e. native of Kozēba, a place on the road to Jericho (cf. Buhl, Geogr. 176).

The following, apart from graphical details, is substantially Hamburger's arrangement of the

<sup>\*</sup> This date was first advocated by Ewald in the Göttinger Nachrichten, 1855. † Ct. our illustrations with plates xxi. and xxii. of Wroth, Greek Coins of Galatia, etc.

<sup>\*</sup> Besides the well-known histories of Grätz (vol. iv.), Mommsen (Provinces, etc. ii. 223 ff.), Gregorovius (The Emperor Hadrian, 1898, unfortunately not brought down to dato), and Schürer (HJP I. ii. 287 ff., with ample reff.), see Dürr, Die Reisen Hadrians, 1891, and Schlatter, Die Tage Trajans u. Hadrians, 1897 (an attempt to construct a connected history from the scattered notices in later Jewish literature). For the Roman forces engaged in suppressing the revolt (which were more numerous than has hitherto been supposed), see, besides Pfitzner, Gesch. d. röm. Kaiserlegionen, J. Offord in PSBA, 1898, pp. 59-69.

† This visit is commemorated by the coins of Hadrian with the legend ADVENTVI AUG. IVDAEAE (see Cohen, Description de monnaies impériales, ed. 1, p. 1761; Madden, p. 2511.).

† The star on some of the tetradrachms has generally been supposed to refer to this.

silver coins of Eleazar and Simeon, the three larger groups being determined by the legend of the reverse.

I. Coins (denarii, drachms, and tetradrachms) of 'the year one \* of the redemption of Israel' שנת אחת לנאלת ישראל.

i. Denarius - drachms with the name of

"Eliezer the priest' אלעור הכהן.

ii. Tetradrachms with legend 'Jerusalem' round the conventional representation of the 'golden gate' (?) of the temple (see below).

II. Coins (as before) of the 'year 2 of the emancipation of Israel '-שב לחרות ישראל.

This group is composed of two main classes of denarius drachms of Simeon.

iii. A. D.-d. of Simeon, with his name, contracted (מכש) or in full (מכשעי), within a wreath.

B. D.-d. of Simeon, with his name always in full round a bunch of grapes.

Each of these may be arranged in four subclasses, according to the type of the reverse, viz.-

(a) Rev. Sacrificial flagon, with small palm branch above.

(b) Kev. Three-stringed lyre.

(c) Kev. Two trumpets.

(d) Kev. Palm branch.

iv. Tetradrachms of the same year with obv. legend 'Jerusalem.

v. Tetradrachms of the same year with obv. legend 'Simeon.'

III. Undated coins of 'the emancipation of Jerusalem '-רות ירושלם.

vi. D.-d. of Simeon, falling into two classes (A and B), each into four sub-classes (a)-(d) as under division iii. above.† vii. Undated tetradrachms of Simeon.

From the great variety of coins above represented we have selected three from group III. for illustration—a re-struck drachm, denarius, and tetradrachm (this last showing no traces of the

original) from the British Museum collection. Obv. שמעון round a bunch of grapes.

Rev. לחרות ירושלם round a three-stringed lyre (class vi. B b of Hamburger's classification above). Plate No. 17.

This is a re-struck drachm of Trajan from the mint of Casarea Cappadociae; on the reverse may be seen AYTOKP. KAIC. of the legend of the original obverse, and on the present obverse [AH]MAPX from the original reverse legend (see Wroth's Catalogue, p. 54 ff.).
Obv. As above (Plate No. 18).

Rev. Same legend; type, two trumpets (= Ham-

burger's vi. B c).

A re-struck denarius of Trajan; on the obverse are clear traces of the back of the emperor's head, with the ends of the ribbons with which the wreath was fastened, while the reverse shows the arm of Arabia as a female holding a branch over a camel. No. 19 shows the original denarius of A.D. 105.

Obv. שמען. Type of uncertain significance (by Madden, 'a conventional figure of the Beauti-

ful Gate of the Temple; below, Solomon's colonnade' [?]); above, a star.

Rev. לחרות ירושלם Type, a lalab (see previous section) with small ethrog as adjunct. (No. 20). A tetradrachm of class vii. above; weight of specimen, 213 grs.

\*In the sequel, 'year one,' 'year two' denote that the Hebrew words are written in full; 'yr. 1,' 'yr. 2' represent the

contractions No. 10.
† This gives in all sixteen possible varieties of denarius-drachms issued in Simeon's name, only fifteen of which have as yet been recovered.

Hamburger has not dealt with the copper coins of this period in the same systematic way. following arrangement is here proposed, and will be found to embrace most of the coins.

I. Bronze coins of 'the first year of the redemption of Israel.'
i. Coins of 'Eleazar the priest,' written in

bizarre fashion on either side of the stem of a palm-tree. Rev. type a bunch of grapes (see Madden, 198 ff., who refers those coins to an Eleazar of the first revolt). It is now evident that these cannot be separated from the Eleazar silver coins of the second revolt.

ii. Various denominations of 'Simeon, prince of Israel,' with, as types, palm, vine leaf, diota (two-eared jar), lyre, etc. (Madden,

203 ff.).

II. Bronze coins of 'year 2 of the emancipation of Israel.'

iii. Obv. שמען (sic) and אמש on either side of a

palm-tree. Types of Rev. (a) bunch of grapes, (b) vine leaf.

iv. Obv. ירושלם arranged as in iii., and with same rev. types.

III. Undated bronzes of 'the emancipation of Jerusalem.'

v. Obv. שמעון arranged as above, and with same rev. types.

vi. Obv. ירושלם arranged as above, and with same rev. types.

From the relative sizes (Æ 4 and 6) and weights of the bronzes with the bunch of grapes and the vine leaf respectively as obv. types (see No. 21), it is evident that the former are one half of the latter, perhaps 'current' chalki and dichalki respectively (see § 8). The types of these revolt coins, silver and copper alike, in almost all cases have a reference to some characteristic product of the country (palm, vine, grapes), or to the paraphernalia of the temple-worship (lyre, flagon, trumpets).

The fall of Bethar, the modern Bittir, a few miles S.W. of Jerusalem, where Simeon and his frenzied followers made their last despairing stand, had been preceded by the recapture of Jerusalem, on the site of which Hadrian built his new city of Ælia Capitolina. The coins commemorating its foundation are given by Madden, p. 249 ff., and de Saulcy, Numism. de la Terre Sainte,

p. 63 ff.

Our task is done. Yet the writer cannot forbear to call attention once more to the most striking feature of Jewish numismatics, and to a reflexion which it suggests. Not once in the whole course of their history did the Jews enjoy, as a constitutional and legal right, the privilege of coining money in either silver or gold.—Is not this a remarkable testimony to the fact that the true mission of the Hebrew race lay in another than the temporal sphere, even the spiritual? 'Out of Zion' went 'forth the Law, and the Word of the Lord from Jerusalem.

§ 11. Appendix. The purchasing power of money in Bible times.—Throughout this article an approximate estimate in sterling currency has been given of the moneys of the various standards we have met with in the course of the history of the Hebrew race. A much more adequate idea of their real value, however, would be gained if we knew their purchasing power in these ancient times. sidering the compass and variety of our Scriptures, it is somewhat remarkable how few indications are to be found of the prices of the ordinary articles of commerce. The purchase of land is probably more frequently mentioned than any other (Gn 23<sup>11π</sup>. 33<sup>10</sup>, 2 S 24<sup>24</sup>, 1 K 16<sup>24</sup>, Jer 32<sup>7π</sup>., Mt 27<sup>7</sup>), but in no case have we definite information as to the size of the ground acquired. From Is 729 we learn that a good vineyard was valued at the rate of a thousand vines for 'a thousand silverlings' or silver shekels, a sum (c. £135) which represents the yearly rent (though this is not certain) of Solomon's vineyard at Baal-hamon (Ca 811). This monarch paid '600 shekels of silver' (c. £80) for an Egyptian chariot, and a quarter of that sum for a horse (2 Ch 117); in each case, no doubt, a high price. A better indication of the value of money in antiquity is the rate tion of the value of money in antiquity is the rate of wages paid. Micah's private chaplain received but ten shekels a year  $(Jg\ 17^{10})$ . He had, however, 'everything found' in addition, as had the angel Raphael when he accepted service with Tobit for a drachm a day (Tob  $5^{16}\ (Gr\ 15)\ \delta\rho\alpha\chi\mu\eta\nu\ \tau\eta\dot{\tau}\dot{\tau}\dot{\tau}\dot{\mu}\mu\rho_{\sigma}s$  kal  $\tau\dot{\alpha}\ \delta\ell\rho\nu\tau d\ \sigma\alpha$ ). In NT times a denarius (9\flat{d}.) was a fair day's wages for a labourer (Mt  $20^{3\pi}$ ). Labourers in Cicarc's time act only  $12\ asses\ (Td)\ but soldiers$ in Cicero's time got only 12 asses (c. 7d.), but soldiers received a denarius. The price of slaves naturally varied not only according to age and capacity, but also according to the supply. The normal value, also according to the supply. The normal value, according to the Priests' Code, was 30 shekels, over £4 (Ex 21<sup>32</sup>). Joseph was sold for twenty (Gn 37<sup>28</sup>). The former price differs but little from the average of 120 drachms in the age of the Ptolemies (Jos. Ant. XII. ii. 3). A talent was a high price even for an educated slave 'in the flower of his youth' (Ant. XII. iv. 9), while ninety slaves for that amount (2 Mac 8<sup>11</sup>) represent the other extreme. The truest indication of all would be the price of the standard food-stuffs, especially wheat and barley, but unfortunately the biblical data are scanty in the extreme. In 2 K 7<sup>1</sup> a seah (about 1½) peck) of fine flour was sold for a shekel (2s. 9d.), and two seahs of barley at the same price. This could only be considered cheap in comparison with Another 'famine' price is found Rev 6<sup>6</sup>: a choenix (about a quart) of wheat for a denarius, and three of the same measure of barley at the same price. From these two passages (2 K 7<sup>1</sup>, Rev 6<sup>6</sup>) we learn this at least, that in the period of the monarchy flour was twice as dear as barley meal, while in the let cent. A D the price of wheat was to the the lst cent. A.D. the price of wheat was to that of barley as 3:1. In any case the prices in Revelation are very high, about twelve times the ordinary prices, to judge from those of the 2nd cent. as given in the Mishna. Thus a seah of wheat is there priced at a denarius (Erubin viii. 2), about 16s. a quarter.† Little can be learned from the contradictory statements of Josephus (Wars, II. xxi. 2, and Life, 13) regarding the price of oil, beyond the fact of its extreme cheapness in Galilee during the war with Rome. The low price of the sparrow, finally, is familiar to every reader of the Gospels, two being sold for a 'current' issar-assarion, or a farthing and a half (see § 8), and five for three English farthings.

LITERATURE.—Indispensable for the study of Jewish numismatics is F. W. Madden's exhaustive corpus, Coins of the Jews, 1881, which has taken the place of his earlier work, History of Jewish Coinage, 1864. Hardly less so are B. V. Head's Historia Numorum, 1887, which covers the whole field of Greek numismatics, and Fr. Hultach, Griechische und Römische Metrologie, 2te Bearbeitg. 1882. Other standard works are, besides the general works of Eckhel and Mionnet:—F. de Saulcy, Recherches sur la Numismatique Judaique, 1864; Cavedoni, Biblische Numismatik, trans. from the Italian by Werlhof, 1855; Levy, Gesch. d. füdischen Münzen, 1862; de Saulcy, Numismatique de la Terre Sainte, 1874 (complement of his Recherches, dealing only with non-Jewish coins of Palestine); Merzbacher in the Zeitschrift f. Numismatik, Bd. iii.—v., 1876-78 (specially on the 'Maccabean' shekels); Th. Reinach, Les monnaies juives,

\* MT is here corrupt. Cheyne emends: 'A homer (10 bushels) of lentils for 50 shekels, and a quarter of a cor (2½ bushels) of carob-pods for 5 shekels, 'Expos. July 1899.
† Of. Baba Mestav. 1, where a kor (30 seahs) of wheat is bought for 25 and sold for 30 denarii, also 16s. a quarter. In Cicero's time wheat was sold at Rome at the rate of 3 sestertii the modius, which is under £1 a quarter.

1887; Hamburger, Z. f. Numism. xviii. 1892 (see § 10). The standard works on the Persian, Phonician, Ptolemaic, Seleucid, and Roman coins respectively are given in the body of the article.

A. R. S. KENNEDY.

MONEY-CHANGERS (Exchangers, Changers, BANKERS). - In the preceding article it has been shown how various were the standards according to which money was reckoned in the course of Jewish history. In the 1st cent. of our era, for example (Money, § 8), we find coins of the Roman system (denarius, as, etc.) side by side with coins of the Greek system (drachm, tetradrachm, etc.). The Jews, moreover, according to the testimony of their own Rabbis, were required to pay the sacred dues in coins of still another standard, viz. the When to these facts is added the Phœnician. circumstance that Palestine and Jerusalem, in particular, were visited by vast numbers of Jews 'out of every nation under heaven' (Ac 25), each of whom required to be furnished with the current coins of the country, it will be admitted that there was great need for 'the tables of the money-changers.' The words denoting this important class of the community in NT are three in number: class of the community in NT are three in number: (1) κερματιστής (from κέρμα, a small coin, then money generally, Jn 2<sup>18</sup>), Jn 2<sup>14</sup> only, AV and RV 'changers of money,' parallel to and synonymous with (2) κολλυβιστής (from κόλλυβος, originally a small coin, apparently one fourth of the χαλκοῦς [Hultzech, Metrol.<sup>2</sup> p. 228], then the 'commission' or agio paid to the money-changer), Mt 21<sup>12</sup>, Mk 11<sup>18</sup>, AV and RV 'money-changers,' Jn 2<sup>18</sup> 'changers.' According to some we should distinguish the κερματιστής who gave small change (κέρματα) for the larger coins, copper and silver, etc., from the the larger coins, copper and silver, etc., from the κολλυβιστής who 'changed foreign money at an agio (καταλλαγή), or provided gold to be remitted abroad' (Smith's Dict. of Antig. 'Argentarii'). The Jews, however, expressed both words by the post-biblical שְלְחָנִי shulḥānî (from shulḥān, table), which is merely the Hebrew equivalent of (3) τραπεζίτης (from τράπεζα, the table or stand at which the changer rpaπετα, the tuble of stand at which the charger sat and on which he ranged his money, Mt 21<sup>19</sup>, Mk 11<sup>19</sup>, Jn 2<sup>19</sup>, AV and RV 'tables,' but Lk 19<sup>29</sup> 'bank'\*), only Mt 25<sup>27</sup>, AV 'exchangers,' RV 'bankers.' The business of the Jewish shuthant was threefold: (1) he changed the larger denominations (tetradrachm, denarius, drachm) into their equivalent in the copper money in which the minor purchases of the average household were made, or, it might be, the gold aureus into silver coin, and vice versa. (2) He exchanged all money that had not legal currency in Palestine into such as had. (3) The wealthier members of the class received money on deposit for the purpose of investment, on which interest (τόκος, Mt 25<sup>π</sup>, Lk 19<sup>23</sup> AV 'usury,' RV 'interest') at fixed rates was paid. They also negotiated drafts on correspondents abroad. This third department will be dealt with members. third department will be dealt with more in detail under USURY.

The 'money-changers' are introduced in the NT, in respect of the first two departments of their business, in the incident (or incidents) of the clearng of the temple courts (Mt 21<sup>12π</sup>, Mk 11<sup>12π</sup>, Mn 12<sup>12π</sup>). The practice had grown up of allowing the shulhānîm to set up their stands or 'tables' (אַרְלָּי) in the outer court or 'court of the Gentiles' for the convenience of the numerous worshippers, especially of those from foreign countries—a practice which evidently led to much unseemly wrangling, and even to acts of downright dishonesty (cf. Mt 21<sup>13</sup>, Mk 11<sup>17</sup>, Lk 19<sup>46</sup>). A special and important branch of the money-changer's work was the pro-viding of the half-shekel or didrachm (MONEY, § 8) required annually of every adult male for the maintenance of the public services of the temple.

<sup>\*</sup>The Latin mensa and mensarius afford a complete parallel; cf. our own 'bank' cognate with 'bench.'

From the Mishna treatise Shěkālim we learn that one month (15th Adar) before the Passover festival accredited shulhanim set up their tables in the provinces to receive the contributions of the provincials, removing ten days later to the capital (see, further, TRIBUTE MONEY). While in their ordinary transactions the changers were probably not over-scrupulous as to the amount of commission they charged, in the case of the half-shekel the amount of the agio (1<sup>12</sup>)ρ, κόλλυβον) was fixed at 4 per cent. This seems the natural inference from the data in Shêkâlîm i. 6, 7, which we understand to mean that the price of the Tyrian tetradrachm or stater (Mt 1727), which contained 24 maoth (nyp) or obols, was 25 obols, the extra obol (1 in 25, or 4 p.c.=c. 13d.) being the agio.
This we saw (MONEY, § 8) was probably the usual method of paying the tax. For a single halfshekel or didrachm of silver apparently only half an obol was charged (see Shek. i. end \*). A commission of 4 p.c. seems to have been usual in secular transactions also. In Meilah vi. 4 we read of an aureus (=25 denarii) being spent, although the total of the purchases amounts to only 24 denarii. Clearly the remaining denarius was retained as agio. The changers had always to be on their guard against false money, hence the saying-

אין הַרָה שׁוּלְחָנִי לְתַּן אִיפֶר עֵר שֵׁיִפוֹל דִינרוֹ

'it is not the custom of the money-changer to give change (lit. an issar or as) until he receives [and has tested] his denarius! A. R. S. KENNEDY.

MONSTER.—The only occurrence of this word is in La 4<sup>3</sup>, where in AV μs tannin (LXX δράκοντες) is tr<sup>4</sup> 'sea monsters,' RV 'jackals.' Post prefers wolves; see DRAGON, vol. i. p. 621<sup>a</sup>. Amer. RV prefers 'monster' to 'dragon' in Is 27<sup>1</sup>, Jer 51<sup>34</sup>.

The adj.' monstrous' is applied in Wis 17<sup>1b</sup> to the approximate which tensified the Equations during

apparitions which terrified the Egyptians during the plague of darkness,— were partly vexed with monstrous apparitions (τέρασιν φαντασμάτων, Vulg. monstrorum timore), and partly fainted.

A monster (Lat. monstrum, a divine omen, from monser (Lat. monstrum, a divine other, from monere, to warn) is anything which attracts the attention from being out of the ordinary course of nature. The 'sea monsters' above are so on account of their size, while the adj. 'monstrous' is used of the apparitions, because of their warning or ominous character. Cf. Udall, Erasmus' Paraphrase, i. fol. lxvi, 'It semeth a monstreous thing unto them which chaunced to the Prophete Jonas: they shall have a lyke monstre, but more wondre-

The tr. of Ps 716 in Pr. Bk. is, 'I am become as it were a monster unto many,' on which Davies (Bible English, 183) remarks, 'We might suppose that the Psalmist meant that he was an object of horror and detestation, but he is affirming that his preservation through so great trials and dangers appeared miraculous to many.' Driver (Parallel Psalter) translates, 'I am become as it were a portent unto many,' and in a footnote explains, 'Attracting attention on account of my extraordinary sufferings,' comparing Dt 2846 ('for a sign and for a portent'). So most commentators. Shakespeare often uses the adj. of that which attracts attention because of its magnitude, as I Henry IV. II. iv. 530, 'the sheriff with a most monstrous watch is at the door'; II Henry VI. IV. vii. 88, 'O monstrous coward.' J. HASTINGS.

MONTH.—See TIME.

MONUMENT.—This word occurs in Is 654 'A rebellious people . . . which remain among the graves, and lodge in the monuments' (אָרָצִּירִים יָלִינוֹ), וּבְּנְצִּירִים יָלִינוֹ RV 'and lodge in the secret places,' RVm 'vaults').

\* See this treatise for other details, especially chs. i. and ii. #.g. the priests, but not the Levites, were exempt from the payment of commission. Again, 'if one gives [to the changer] a tetradrachm (P\D) and [after paying the half-shekel due] receives back a didrachm (שָקל), he has to pay double agio (סלע וניפל שָׁבֶּל מָיֶב שְׁפִּי קוֹלְבּנוֹת, ம். ו. 7). VOL. III.—28

The EV word 'monuments' means 'tombs.' Rhemish NT often uses the word in this sense, after the Vulg. monumentum. Thus Mt 23. You build the Prophets scyulchres, and garnish the moniments of just men; Lk 827 'There mette him a certaine man that had a devil now a very long time, and he did weare no clothes, neither did he thine, and he did weater ho cooles, nettered the herarie in house, but in the monuments.' So John's disciples (Mk 6<sup>20</sup>) 'tooke his body, and they put it in a monument'; and our Lord's sepulchre is called a 'monument' in Mt 27<sup>60</sup>, Lk 23<sup>53</sup>, Jn 19<sup>42</sup>, Ac 13<sup>29</sup>. Cf. Shaks. *Tit. Andronicus*, II. iii. 228—

'Upon his bloody finger he doth wear A precious ring, that lightens all the hole, Which like a taper in some monument, Doth shine upon the dead man's earthy checks, And shows the ragged entrails of the pit.

And shows the ragged entrails of the pit.

The translation of is 654 is uncertain, owing to the uncertainty of the reference. The Heb. word means literally 'guarded places.' The LXX renders the two clauses in one, is rois translations are in the two clauses in one, is rois translations are in the two clauses in one, is rois translations are incubation (sampaire,), i.e. spending the night in subterranean sacred places. W. R. Smith (RS2, 1981.) points out that 'the whole N. Semitic area was dotted over with sacred tombs, Memnonia, Semiramis mounds, and the like, and at every such spot a god or demigod had his subterranean abode.' See also A. van Hoonacker's art, on 'Divination by the 'Ob amongst the Ancient Hebrews' in Expos. Times, vol. ix. 1898, p. 157 ft., and the artt. Divination, Witchicaff.

**MOOLI** (A Mooll, B - $\epsilon l$ , AV Moli), 1 Es 8<sup>47</sup> (LXX <sup>46</sup>) = MAHLI, Ezr 8<sup>18</sup>, son of Merari and grandson of Levi (see Ex 6<sup>16</sup>. <sup>19</sup>). The LXX in all places renders in this way.

MOON.—The most common name used for the second of the great lights of heaven in the OT is רָיֵי, \* written in Phonician with the same consonants; in Assyr. irihu; Eth. wareh. The meaning of the word is regarded as uncertain, but there can be but little doubt that the root to which it belongs was originally of the class "5, as is clearly indicated by the Ethiopic, and also by the Assyrian name for 'month,' which, being transcribed in the month-name Marcheswan with p replacing the original w (m and w are interchangeable consonants in Assyrian), implies a connexion with the Assyrian word "irhu" road, and confirms the correctness of the suggestion of Ges.-Buhl that ירס; means 'wanthe suggestion of Ges.-Built that קרן means 'wanderer,' and is connected with the cognate הוא 'to wander,' 'journey.' The less common word קרָה designates the moon as 'the white one,' from the root בל 'to be white.' There is also another word, namely אָרָש, which is used to designate the new moon (see NEW MOON, and art. FEASTS in 250b). vol. i. p. 859b).

Where first mentioned in the Bible (Gn 116), neither of the above words is used, the luminary being described as 'the lesser light' (parallel with the descrip-It is described as being placed in the heavens to rule the night, and also 'for signs, and for seasons, and for days and years'; and it was apparently as a time-measurer that it was principally looked on by the Hebrews, and also, to a somewhat less degree, by the Babylonians and Assyrians, to whom the chief character of the moon was a personal one, namely, that of the representative of the moon-god Sin (cf. Sennacherib = Sin has multiplied the brothers') and the moon-goddess (the moon as the consort of the sun) Aa. A further reference to the moon as the indicator of the (religious) festivals is to be found in Ps 10419 'he appointeth the moon for seasons, and the sun knoweth his going down.'

Notwithstanding that the bright portion of the moon's disc, being always turned towards the sun,

\* According to Sayce (EIIII 250), Jericho און means 'city of the moon-god.'

implied that it received its light from that body, the moon is represented in Gn 1 as having been created at the same time as the sun, and apparently as shining by its own light. It was also, with the sun, set in the heavens to give light upon the earth, and as the 'lesser light' to rule over the night, and to divide between the light and between the darkness, though this is, with reference to the moon, a very loose phrase, when we take into consideration the imperfect way in which it performs this office.

All these statements would, of course, lead one to suppose that the Hebrews had but a very imperfeet knowledge of astronomy, and especially of the movements of the luminary in question, though they must have seen and noticed the regularity of its motions, and it apparently became for them, in course of time, a kind of emblem of constancy and everlastingness, hence the expressions 'peace as long as the moon endureth' (Ps 727), and 'established for ever as the moon' (Ps 8987, likewise Ps 727 'as long as the sun and moon endure [lit. with the sun and in the presence of the moon] through-

out all generations

The calm, clear light of the moon seems to be noticed in the expressions 'fair as the moon, parallel to the second member of the verse, 'clear as the sun,' both being comparisons referring to the Shulammite in Ca 6<sup>10</sup>. Increase of the light of the moon to the equal of that of the sun is foretold for the day when the Lord should bind up His people's hurt, and heal their wound (Is 30<sup>26</sup>). The influence of the moon on persons is apparently referred to in Ps 121s, in the phrase, 'The sun shall not smite thee by day, nor the moon by night,' where the smiting by the sun being undoubtedly sunstroke, the smiting by the moon may well be regarded as an early instance of the belief that the rays of the moon could exert an influence so baleful as to produce lunacy, or to cause that a person might become 'moon-struck.' That the moon was supposed to have this effect is hardly to be wondered at, as many people believe hardly to be wondered at, as many people believe the same thing at the present time; and in ancient days it was supposed also that its rays could bring on epilepsy, as is illustrated by the Greek text of Mt 4<sup>24</sup> and 17<sup>15</sup>, where the original has σεληνιαζομένους and σεληνιάζεται, 'opileptic' (RV).
There is some uncertainty as to what is intended

by the 'precious things put forth by the moons' in Dt 33<sup>14</sup> (AV). The phrase has been supposed to refer to the produce of the months in their order, which is not improbable. An Assyrian tablet exists in which the produce of every month is enumerated in order, and as moon and month are convertible terms it is not unlikely that something of the kind is intended here, rather than omens derived from the moon's motions, such as are so often found among the numerous astrological forecasts of Babylonia and Assyria. In fact we should probably translate 'months,' not 'moons,' although properties of the p

regarded as a deity, and divine honours were paid it as such. Among the Babylonians and Assyrians the moon, as a deity, was apparently not called *irilu*, but Sin (possibly also pronounced Sen), and it is this word that we meet with as the first element of the name of the well-known Assyrian king Sennacherib.† Besides this, however, he was also called Aku, and it is in all probability

\*Steuernagel, who retains 'moons,' thinks the allusion is to the dere, which is truced to the moon as light is to the sun. † With regard to the etymology of the word Sin, it has been suggested that this is for Zu-en, 'knowledge-lord' (generally written En-zu-na-i.e. so as to be read Zu-en-na), one of his Accadian names.

this word that we find in the Babylonian royal this word that we find in the Babylonian royal name Eri-aku (Eri-eaku) or Arioch. Another not uncommon name of the moon-god among the Babylonians was Nannara, under which appellation he was worshipped at Ur (Mugheir or Mukeyyer), a city probably possessing his oldest and most renowned temple.\* The month Sivan was dedicated to the moon-god by the old inhabitants of Babylonia. Reference has already been made to the moon-goddess Aa, who was regarded as the consort of the sun-god Samaš, and was probably the equivalent of the Ashtaroth-karnaim of the Phœnícians.+

The name of the moon-god seems to have been Sin, not only in Assyria and Babylonia, but in other parts of the ancient East also. Thus we have reference to this deity in the name of Mount Sinai, the peninsula of which, even at the end of the 6th cent. B.C., was devoted to the worship of the moon. Antoninus Martyr relates that, at the time of the worship of the deity in this district, the marble of which the idols were made changed colour, and ultimately became black as pitch, colour, and ultimately became black returning when the festival was over to its original returning when the wondered greatly. This was, of hue, at which he wondered greatly. This was, of course, a symbolical festival, typifying the phases of the moon in its monthly journey, the change of the colour of the statues of the god being brought about artificially, but in such a way as to work upon the superstitions of the ignorant. The Phænicians seem to have worshipped the new moon under the name of win Hodesh (Baethgen, p. 61). See New Moon. The moon-god was represented either standing with his attributes, or seated upon a horse. In Palmyra he seems to have been called Yarkhibol (= Yareah-baal), and in the name Aglibol we have a reference to the moon as a 'young steer,' by the Assyrian equivalent of which it is designated in the hymn to the moon-god published in WAI iv. pl. 9. In an Assyrian inscription the name of an Arab, Aa-kamaru, leads one to ask whether we may not have here two old names of the moon deity: Aa, the Babylonian goddess of the moon as the consort of the sun god; and kamaru, an Assyrian transcription of the Arabic kamar, 'the moon.'

With the Egyptians there were several moon-deities, all masculine. The principal of these was Thoth, the god of knowledge, an attribute applied to him in consequence of the moon's character as time-measurer (for such is the meaning of its name in the Indo-European languages). Sefekh, a goddess associated with Thoth, in all probability typified the full moon. As the wanderer, the moon was called Khunsu or Khons. Isis, Muth, and Hathor, who wear as their crowns the disc of the moon, were evidently in some manner asso-

ciated with that luminary.

The worship of the moon and the other heavenly bodies is mentioned and prohibited in Dt 17. Kissing the hand on seeing the moon (undoubtedly an act of adoration) is referred to in Job 31<sup>201</sup>, and sacrifices made 'unto the queen of heaven' ‡ are spoken of in Jer 44<sup>17</sup>. The moon- or crescentshaped ornaments spoken of as adornments of 'the daughters of Zion' in Is 318 (cf. Jg 821.26), were

\* This is the Urie (= Uriwa, the Accadian form) of Eupolemus (ap. Eusebius, Prap. Evan. 9), who says that it also bore the name of Camarina, apparently from the same root as the Arab.

tamar (see below).

† There is also a deity named Laban, mentioned as having been worshipped in the temple of Anu, in the city of Asshur. As the moon-god was the minister of Anu, the question naturally arises whether the word Laban may not, in this passage, be another name of Sin. If this be the case, Laban would be connected with לבנה

1 See the elaborate article, 'Die Melecheth des Himmels,' by Kuenen, Gesammelte Abhandlungen, p. 186 ff., and cf. the chapter on Al 'Usza in Wellhausen's Reste Arab. Heldentums's, p. 24 ff.

probably due to the same idolatrous tendency which at the time often led the chosen people astray. See CRESCENTS.

T. G. PINCHES.

MOOSSIAS

MOOSSIAS (Β Μοοσσείας, Α Μοός Σιάς, ΑV Μοοsias), 1 Es 9<sup>31</sup> = ΜΑΑΣΕΙΑΙΙ, Ezr 10<sup>50</sup>.

MOPH.—See MEMPHIS.

MORALITY.—See ETHICS.

MORASHTITE (so correctly in RV, in place of Morasthite of AV; Heb. "τοῦ Μωραθεί Β, . . . Μωραθεί Α).—A gentilic adjective used to designate the prophet Micah (Mic 1, Jer 26 [Gr. 33] 18), probably derived from Moresheth-gath (wh. see).

MORDECAI (קרְיְּכִי, Baer קרְיְּכִי ; Μαρδοχαῖος ; Mardochæus, Ezr 2º Mardochæi; the name denotes 'belonging to Merodach, or Marduk,' a Babylonian deity).—1. One of the leaders of the people at the time of the return of the exiles under Zerubbabel and Jeshua (Ezr 2, Neh 7, 1 Es 5.). From a comparison of the three lists it appears probable that

the leaders were twelve in number.

2. The deliverer of the Jews in the Book of Esther. He is described as a Benjamite, the son of Jair, the son of Shimei, the son of Kish, one of the Jewish captives who had been carried away by Nebuchadnezzar in the days of Jehoiachin (Est 2<sup>5, 6</sup>).\* Mordecai lived in Shushan (Susa), the Persian capital, and brought up as his own daughter his cousin Esther, whose parents were dead (27). When Esther was taken into the royal harem, Mordecai forbade her to reveal her connexions or her nationality (220). He was nevertheless able to remain in close communication with her, and for this purpose he was constantly at the gate of the palace. Here he discovered the plot of two cunuchs against the king, and, by informing Esther of it, procured their execution, the only reward which he himself as yet received being the entry of his name in the royal chronicles (2<sup>19-23</sup>). When Haman [which see] was exalted to the rank of chief minister, Mordecai aroused his wrath by repeatedly refusing to bow before him; and, to avenge the slight, Haman procured from the king a decree for the destruction of the Jews, Mordecai's fellow-countrymen (3). After Esther, who had heard from her maidens of the distress of Mordecai and the Jews, had sent to inquire the cause, Mordecai, by means of the eunuch Hathach, informed her of the king's decree, and bade her go to the king and seek for protection for her people, reminding her that she also would be one of the victims of the massacre (4). Meanwhile, however, Haman, mortified at the continued disrespect shown to him by Mordecai, determined to anticipate the massacre, and, preparing a high gibbet, went to the palace to obtain permission to hang Mordecai thereon. The king, who during a sleep-less night had heard the chronicles read, and thus learnt that Mordecai's services remained unre-warded, consulted Haman, on his appearance, as to a fitting recompense for one whom the king

wished to honour. In consequence of his own suggestion the vizier was then bidden to conduct his enemy in honour round the city, while his friends saw in this misfortune an omen of his coming overthrow by Mordecai (5"-6). After the disgrace and death of Haman, Mordecai succeeded to his place, receiving the king's seal, being arrayed in gorgeous attire, and writing letters in the king's name to grant the Jews permission to defend themselves; while the fame of Mordecai throughout the empire led all the Persian officials to assist the Jews (8. 9<sup>3t</sup>.). Finally, Mordecai and Esther wrote two letters to all the Jews, enjoining that the feast of Purim should be everywhere celebrated on the 14th and 15th days of Adar; and that fastings and lamentation should be connected with the observance of the festival (9<sup>20-32</sup>). The Bk. of Esther closes with an account of the fame and dignity of Mordecai, who stood next in rank to the king, and was recognized as the protector of his countrymen (10).

The apocryphal additions to Esther in the Greek version glorify Mordecai still more. In the LXX the book opens with the description of a dream which he had concerning two great dragons, and a great river springing from a little fountain. In the last chapter Mordecai interprets this dream, explaining the river of queen Esther, and the dragons of Haman and himself (Ad. Est 11<sup>2-12</sup> 10). We find also a few more particulars regarding the conspiracy of the two eunuchs, and a prayer of Mordecai, in which he declares that his refusal to bow before Haman was prompted by zeal for the glory of God, and not by human pride (138-17). In later literature the first reference to the Bk. of Esther is in 2 Mac 1536, where the 14th of Adar is

called the Day of Mordecai.

As the general question of the historical character of the Bk. of Esther is discussed elsewhere [ESTHER], it will be sufficient to add here one or two comments on the position assigned to Mordecai. There is a certain inconsistency in the representation that Esther's Jewish descent was unknown (2<sup>20</sup>), whereas Mordecai was recognized as a Jew (3<sup>4n</sup>. 5<sup>13</sup>), and was in frequent communication with the queen (2<sup>22</sup> 4), and also in the fact that the king should bestow honour upon Mordecai the Jew after the race had been proscribed. On the other hand, it is a plausible view which regards Kish (20), not as the great-grandfather of Mordecai, but as his remote ancestor, the father of Saul, and holds Haman to be an Amalekite (so Jos. Ant. XI. vi. 5, 12; and Targ.); in this case the descendant of Saul is opposed to the descendant of his ancient enemy Agag. In profane history we hear of no great minister of Xerxes whom we can identify with Mordecai, but it must be admitted that the domestic annals of this reign are scanty. To connect the Jewish vizier with the influential eunuch Matacao, named by Ctesias (so Rawlinson), seems very precarious. During the last years of Xerxes, Artabanus, the commander of the body-guard, was the chief minister.\*

In Kabbinical literature Mordecai is a favourite The late Targum on Esther traces the character. descent of the 'righteous' Mordecai from Shimei, who cursed David, and from Jonathan the son of Saul: he knows the seventy languages, he receives supernatural warning of the danger of the Jews, and a long description is given of the pomp and splendour bestowed upon him after he became the H. A. WHITE. king's minister.

\*For a full account of Jensen's attempt to explain Mordecal (Marduk), Haman (Humman, the national god of the Elamites), and the other principal characters in the Bk. of Esther upon the theory that in that book we have a Judalzed form of Babylonian legend, see Wildeboer, 'Esther,' in Kurzer Hand-Comm. 178 ft.; of Espos. Times, Aug. 1898, p. 498, and art. Purim (Frast of) in this Dictionary.

<sup>\*</sup>The interpretation of v.6 is disputed, the relative 'who' being referred either to Mordecai himself, or to Kish, his great-grandfather. On chronological grounds it is practically impossible to suppose that any one carried to Babylon in B.C. 597 should be living in the reign of Ahasuerus (Kerkes) 485-465. If, on the other hand, we regard the Book of Esther as being in the main unhistorical, this difficulty ceases to be of weight. Grammatical considerations do not decide the question, for, though certainly it is more natural to refer the pronoun to Mordecai, the other construction cannot be regarded as impossible, if on independent grounds we are unwilling to convict the author of a great anachronism (comp. Bertheau-Ryssel, ad loc.; Kuenen refuses to lay any weight on this passage, Hist.-Krit. Einl. I. ii. 209).

MORE.—In middle English there were two comparatives, 'moe' referring to number, and 'more' referring to size or importance; and the distinction between them was occasionally observed as late as the publication of AV in 1611. Thus Nu 22<sup>15</sup> in the first ed. of AV reads, 'And Balak sent yet againe Princes, moe, and more honourable then they; and 33<sup>34</sup> 'To the moe ye shall give the more inheritance, and to the fewer ye shall give the lesse inheritance.' The Anglo-Saxon word was ma, originally an adv. and connected with Lat. magis, Goth. mais, Germ. mehr. This ma became in Eng. 'mo' with subscript e (whence 'moe' and 'moo') as ban became 'bone,' dran 'drone,' and the like (Earle, Philology, § iii.). The spelling is capricious even in Elizabethan writers. Shaks. varies between 'mo' and 'moe'; Tindale's favourite spelling is 'moo'. Ridley, A Brefe Declaration, has 'mo' on p. 163 (Moule's ed.), 'Therfore I wyll rehearse mo places of him than hertofore I have done of the other'; and 'moo' on p. 171, 'itshould not nede . . . to bring in for the confyrmation of thys matter anye moo.' In AV 'mo' occurs once 2 \$ 5<sup>13</sup>, and 'moe' 34 times.

'More' is really a double comparative, already formed in Anglo-Sax., mara. It is at least probable that it was originally confined to greater bulk or importance, but even early examples show that 'moe' and 'more' were used almost indiscriminately. Wright (on Shaks. As You Like It, p. 135) thinks that, as far as Shaks. and AV are concerned, all that can be asserted is that 'moe' is used only with the plural, 'more' with both is used only with the plural, 'more with oth sing, and plural. Modern editors of Shaks, (chiefly Rowe in 1709) and of AV (chiefly Paris in 1762 and Blayney in 1769) have changed 'moe' into 'more.' Scrivener restored 'moe' in his Camb. Paragraph Bible, but nothing seems to be gained by it. In Shaks., on the other hand, the form 'moe' is sometimes required by the verse. Thus in Much Ado, it is 720.

II. iii. 72-

'Sing no more ditties, sing no mos, Of dumps so dull and heavy; The fraud of men was ever so, Since summer first was leavy.'

Examples of 'more' in the sense of 'greater' are Ac 19<sup>32</sup> 'the more part knew not wherefore they were come together'; 27<sup>12</sup> 'the more part advised to depart thence also.' Cf. Mt 11<sup>11</sup>, Wyc. Trewly I say to you, ther roose noon more than Joon Baptist amonge children of wommen; forsothe he that is lesse in the kyngdam of hevenes, is more than he'; Ro 9<sup>12</sup>, Wyc. 'the more schal serve to the lasse'; Tind. Expos. 228, 'Locusts are more than our grasshoppers'; Shaks. K. John, II. i. 34-

O, take his mother's thanks, a widow's thanks, Till your strong hand shall help to give him strength To make a more requital to your love!'

J. Hastings. MOREH.-1. OAK(S) OF, RVm 'Terebinth(s), AV [wrongly, with Targ. Onk.] PLAIN(s) OF; Gn 12<sup>6</sup>, την δρῦν την ψηλήν, convallent illustrem; Dt 11<sup>20</sup>, της κτῆς δρυός (so Sam.) τῆς ψηλῆς, vallem tendentem et intrantem procul; Syr. has the impossible 'oak of Mamre' in both syr. has the impossible 'oak of Manire' in both places. A sacred tree near Shechem, mentioned Gn 126 as the scene of a theophany to Abraham, in consequence of which he built an altar there (J; but according to Ball, SBOT, 'unto the Oak of Moreh' is RJ). In Dt 1120 (late R) the Oaks of Moreh are named amongst other landmarks given to fix the position of Ebal and Gerizim.

Moreh is the participle of horāh, 'to give (divine) direction,' e.g. Is 918 nābî' mōreh sheker, 'a prophet who gives a false direction.' The oak, therefore, was connected with a sanctuary, whose priests gave oracles on questions asked by worshippers.

According to Dillm., 'Gilgal' in Dt 11<sup>30</sup> is to be taken as a common noun, 'a circle of sacred stones' or 'cromlech,' which was another feature of this sanctuary. There is nothing in the context, either in Gn or Dt, to tell us anything more of the position of the Oak of Moreh than that it was in the neighbourhood of Shechem. Buhl (GAP 202f.) identifies 'Gilgal' in Dt with Jalejû, some little distance to the east of Shechem, and concludes that the Oak(s) of Moreh were not close But, even if the identification be to Shechem. accepted, Gilgal and Moreh in Dt may be inde-pendent landmarks for Ebal and Gerizim, and Gilgal not defined by Moreh. Sam. adds in Dt after 'Oak of Moreh,' 'opposite Shechem,' a gloss suggested by Gn 12°. It is not likely that Mabortha, according to Pliny and Josephus (BJ IV. viii. 1), the native name for the Greek city Neapolis, which replaced Shechem, has any connexion with Moreh. Morthia also occurs on coins as a title of Neapolis (cf. Smith's DB, s. 'Moreh'), but is probably connected with the Aram. martha, 'mistress.' On the suggested identification of Morel with Moriah, and with the sacred trees in Gn

with Moriah, and with the sacred trees in Gn 354, Jos 2426, Jg 96. 87, cf. Meonenim (Oak of).

2. Hill of, Jg 71 only (πήμα πυγμ; Α τοῦ βωμοῦ τοῦ 'Αβώρ, Β Γαβααθαμωρά, Luc. ἀπὸ βουνοῦ τοῦ 'Αμωρέ; collis excelsi. Targ. for πήμα gives κιρερεργ 'that faces'). Mentioned in describing the position of the camp of the Midianites on the eve of their defeat by Gideon. RV translates MT of v. 1b 'and the camp of Midian was on the north side of them, by the hill of Moreh, in the valley' (RVm 'from the hill of Moreh onwards in the valley'). The text is probably corrupt. Moore proposes to read, 'While the camp of Midian was north of Gibeath ha-Moreh,' but suggests as a possible alternative, 'was north of him in Gibeath ha-Moreh.' Budde proposes, 'was beneath him north of Gibeath ha-Moreh.' Neither the well of Harod, mentioned as the site of Gideon's camp, nor the hill of Moreh, can be certainly identified. If 71 and 633 are referred to the same source (E; If  $\gamma^2$  and  $\delta^{\omega}$  are referred to the same source (12; so Kautzsch, Budde), probably the 'valley' in  $7^1$  is the 'valley of Jezreel' in  $6^{33}$ , and the hill of Moreh is Jebel Nabi Dahi, sometimes called the Little Hermon, to the N.W. of the plain of Jezreel (G. A. Smith, HGHL p. 307; Buhl, GAP p. 202). Moore refers  $7^1$  to J, and  $6^{33}$  to E, and is inclined to compact the Hill of Moreh with the Oak of to connect the Hill of Moreh with the Oak of Moreh. The LXX seems to have read 'Hill of the Amorites.' See Morian. 'Hill of Moreh' suggests that the hill was the site of a sanctuary; cf. 1. See HAROD.

W. H. BENNETT.

MORESHETH-GATH (τι πότιο, κληρονομίας Γίθ) is mentioned only in Mic 114, in a group with Gath, Zaanan, Lachish, Achzib, Marcshah, and other towns of the Judahite-Philistine region. The daughter of Zion is advised to make a bridal speeding-gift (cf. 1 K 9<sup>16</sup>, Ex 18<sup>2</sup>) concerning Moresheth-gath. Mich is himself a Morashetts. that is, a citizen of Moresheth (Mic 1¹, Jer 26¹8), which may or may not be the same place. Moresheth gath may signify 'she that takes possession of Gath,' or 'that which Gath possesses,' or simply as a proper name, 'Moresheth of Gath,' with other possible variations. Or the word 'gath' in the combination may be the common noun 'winepress.' mon noun 'winepress.'

In the Onomasticon, and in the Prologue of the Commentary of Jerome on Micah, Morasthi is said to be a village east of, and near by, Eleuther-opolis. There is no sufficient reason for disputing this, though the site has not been identified. Or again, when we note that the context is full of puns on the proper names that are mentioned (10b 12a 14b etc.), we find it possible to regard

S. R. DRIVER.

Moresheth-gath as a play upon the proper name Mareshah, leading up to the statement, 'I will yet bring in to thee him that taketh possession, O lady that inhabitest Mareshah' (15), and so, virtually, as a mere variant of Mareshah. Well-hausen (Kl. Proph. ad loc.) takes 14 as vocative, rendering, 'Thou must let go Moresheth, O Gath,' and this is favoured by Oxf. Heb. Lex. Nowack (ad loc.) thinks that neither this nor the usual construction gives a sense guite apposite to the construction gives a sense quite apposite to the context.

W. J. BEECHER.

of (2 Ch 3) (πατερ, περικος: in Gn, LXX είς την γην την ὑψηλήν [prob. a paraphr. of conspicuous: κε το 126, and πρίκ το bi κ in Dt 1120, are also rendered by LXX ἡ δρῶς ἡ ὑψηλή], Aq. την καταφανή (connecting the word falsely with πκη; so Aq. Symm. for πρίς Dt 1120), Symm. τῆς ὁπτασίας,\* Vulg. visionis, Onk. (paraphrasing) κην είνηια of worship,' † Pesh. κτικοτές λακον Vulg. immonte Moria Pesh Aμορεια, Luc. τῷ Αμορια, Vulg. in monte Moria, Pesh. as in Gn, Targ. (late) 'the mountain of Moriah,' but with a long Midrash about its being the place where Abraham and others worshipped).—What was originally denoted by this designation is very was originally denoted by this designation is very obscure. It is indeed evident that in 2 Ch 3<sup>1</sup> the Temple hill is referred to; but this does not settle the sense of the expression 'land of Moriah' in Gn 22<sup>2</sup>: the Chronicler may, in common with the later Jews, have supposed that that was the scene of the sacrifice of Isaac, and borrowed the expression from Gn 22<sup>2</sup>—perhaps to suggest (Baudissin, Studien, ii. 252) that the spot was chosen already by J" in the patriarchal age. In Gn, however, even supposing—what certainly seems to be implied from the terms of v. 1<sup>4</sup>—that the writer placed the sacrifice of Isaac on the Temple hill, he placed the sacrifice of Isaac on the Temple hill, he does not apply the name Moriah to it: 'the land of M.' is the name of the region into which Abraham is to go, and he is to offer Isaac on 'one of the mountains' in it. The mountain on which Isaac is to be offered does not even seem to be mentioned as a central or important one, from which, for instance, the region might have derived its name: it is merely 'one' of the mountains in a region which, so far as the terms of this verse go, might be co-extensive with a large part of Palestine. It is remarkable that, though it is here implied that it is well known to Abraham, the region is not mentioned elsewhere in the OT. It is difficult, under the circumstances, not to doubt the originality of the text; and it must be admitted that—though it has the disadvantage of being the proclivis lectio,—the reading of Pesh. 'of the Amorites' (1516 4822, Jos 51 al.) has some claims to be considered the original one.

Heb. pr. names, when accompanied by the art., have the presumption of possessing, or at least of having once possessed, an appellative force: but the meaning of מוויה obscure; and the etymologies that have been proposed are far from satisfactory. It is at least certain that it does not mean 'shewn of Jah' (which—cf. קקנוה, הקקנוה, ששנות שלום), or 'vision of Jah' (which would be כְּרָאֵיָה), neither of which forms could pass into קרְיָה For various 'Midrashic' explanations of the name, see B'reshith Rabbā, ad loc. (p. 2631. in Wünsche's tr.), or Beer, Leben Abr. nach der Jüd. Sage, pp. 59, 1771.

It is held by the Samaritans (see ZDPV vi. 198, vii. 133; and above, s.v.), that GERIZIM was the scene of the sacrifice of Isaac; and the same opinion has been advocated by some modern scholars. The

\* The same interpretation is expressed by the reading of the Sam. text המוראה, and by the Sam. Targ. מוראה 'of vision' (cf.

Dt 1128 Sam. text MMD, Sam. Targ. M111 'of vision').
† Of. Onk.'s rendering of v.14: 'And Abraham worshipped and prayed there in that place; he said before J", "Here shall the generations be worshipping": therefore it is said at this day, "In this mountain did Abraham worship before J"."

grounds for it are stated most fully by Stanley. grounds for it are stated most fully by Stanley, SP pp. 251 f., and Grove in Smith's DB, s.v. Moriah: Abraham saw the spot 'afar off,' on the third day' (v.4) after leaving 'the land of the Philistines' (21<sup>24</sup>)—a statement which suits the distances much better if the goal of his journey were Gerizim than if it were Jerusalem; Gerizim, moreover, is an elevation which a traveller approaching from the S. might lift up his eyes' (224) and see conspicuously at a distance, which is not the case with Jerusalem. In view of the rivalry which prevailed in later times between the Samaritans and the Jews, the preference of the former for Gerizim does not count for much; and with regard to the other arguments it may be doubted whether, in a narrative which cannot be by an eye-witness or contemporary of the facts recorded, the expressions used are not interpreted with undue strictness. The presumption derived from v. 14 is strong, that in the view of the narrator the Temple hill was the scene of Abraham's trial (cf. Jehovah-Jireh; and HGHL p. 334 n.). But of course Gerizim might, equally with Jerusalem, have been (so far as we know) within the undefined limits of the land of Moriah,' as it certainly would be within the limits of the 'land of the Amorites.'

MORNING.—See TIME.

MORROW.-Both 'morn' and 'morrow' are formed from Anglo-Sax. morgen, the former by contraction, the latter by changing the g to w and dropping the n (whence morwe=morrow); and 'morning' is the same, with subst. suffix -ing. Thus 'morn,' 'morning,' 'morrow,' and 'to-morrow' (with prep. to='for' or 'on') are all morrow' (with prep. to='for' or 'on') are all one and the same word, and have all the same meaning. They mean either early in the day=mod. 'morning,' or next day=mod. 'tomorrow.'

The word 'morrow' about 1611 usually means next day ('tomorrow'), but sometimes it is used for 'morning.' Thus 1 S 30<sup>17</sup>, Cov. 'And David smote them from the morow tyll the even'; Shaks. Lucrece, 1571—

'She looks for night, and then she longs for morrow.'

In AV  $25^{10}$   $b\bar{b}ker$  is translated 'morrow' in Lv  $22^{20}$ , Nu  $22^{41}$ , Est  $2^{14}$ , Zeph  $3^3$ , and 'tomorrow' in Nu  $16^5$ ,  $1 \text{ S} 9^{19}$ , Est  $5^{14}$ . RV changes into 'morning' in Lv  $22^{30}$ , Nu  $16^5$   $22^{41}$ ,  $1 \text{ S} 9^{19}$ , Est  $5^{14}$ , but leaves the other two unchanged. Now  $b\bar{b}ker$  usually the other two unchanged. Now boker usually means 'morning,' and is mostly rendered so in AV; but the editors of the Oxf. Heb. Lex. believe that the meaning is 'tomorrow' in the following places: Ex 16<sup>19. 20. 22. 24</sup> 29<sup>24</sup> 34<sup>25</sup>, I.v 7<sup>15</sup> 22<sup>20</sup>, Nu 16<sup>5</sup> 22<sup>24</sup>, 1 S 9<sup>19</sup>, Zeph 3<sup>3</sup>. If they are right, as they appear to be, some passages should have been left 'morrow' or 'tomorrow' by RV, and some that have 'morning' in AV should have been changed to 'tomorrow.' But as regards AV itself, it seems probable that in every case in which 'morrow' is probable that, in every case in which 'morrow' is found, the translators intended to express what we now express by 'tomorrow.' J. HASTINGS.

MORTAR (מְכָהִשׁ , מְרְכָה).—Probably the first kind of mortar may have been, as is generally supposed, two stones, between which the grain was pounded. Mortars in Syria and Palestine were anciently of wood, and the larger ones were cut out of the trunk of a tree, the sindiyan, or evergreen oak, being preferred.

The passage in Pr 2722 (on which see Expos. Times, March and April 1897, pp. 287, 336) does not, of course, refer to any custom in Syria or Palestine of pounding men in a mortar (פּפֶּקֶים). The reference seems to be to the custom of making kibby, a favourite dish in Syria (see MILL). The more the kibby is pounded, the more excellent

Hours are spent in beating it, and certain women are celebrated for their skill in preparing it. It is very hard work, and requires strong as well as skilful arms to make it.

In Syria at the present time there are two kinds of mortars used: small ones are made of wood, and the large ones of stone. The wooden mortars are generally used for pounding coffee or spices. They are often beautifully carved, and the pestle is sometimes 2 ft. long.\* The stone mortars are now preferred for making kibby; they are large and very heavy, and the pestle is a heavy block of wood.

Lifting a stone mortar with one hand and raising it above the head, was a favourite test of strength among the young men of the villages of Lebanon a few years ago. W. CARSLAW.

MORTAR (AV morter).—In Gn 113 it is said that the builders of the tower of Babel used slime or bitumen (אָבָה) instead of mortar (אָבָה, Arab. hummar, asphalt or bitumen).

Asphalt or BITUMEN (wh. sec) is found on the shores of the Dead Sea, and at Hasbeyah near Mt. Hermon, but it is not used in Palestine or Syria in building. The most common material in use for that purpose is clay (wh. see), and the ordinary Arabic word for mortar is tin, which properly means clay. Walls of houses are plastered inside with clay, but the clay must be well trodden and mixed with water to a proper consistence, else, if too dry, it will not adhere, but crack and fall off. In Ezk 13<sup>10</sup> the Arab. VS has 'dry clay' (tafal) instead of 'untempered mortar' instead of 'untempered mortar.'

Mortar made with lime is being more frequently used now than formerly. The lime is slaked in a long wooden box, and the liquid portion run off into a pit; when the pit is full, the lime is covered with sand. It is the opinion of the builders in Lebanon that the lime should remain in the pit for several months before being used. The lime in Lebanon is rich, and has no hydraulic properties; and during the rainy season a good deal of the lime in a building is washed away, even when the mortar seems to be hard. In making mortar the lime is usually mixed with ordinary clay, but a reddish clay containing some red oxide of iron is preferred. Sand is used for outside work on account of its colour.

For making plaster for coating the inside walls of houses, lime and sand are generally used now, mixed with straw or hemp cut small, instead of hair, which is never used. A cement for plastering the sides of cisterns is often made with lime, wood ashes, pounded calcarcous spar, and sand. Over the coating just mentioned a finer one is put, consisting of lime and homra, which is broken pottery ground very fine. All channels for running water are coated with lime and homra.

Roofs and floors of houses are often laid with concrete, which is formed of lime, sand, and stones broken small. This has to be beaten constantly day and night till it has hardened. Some of the very old buildings in Lebanon are said to have been built with mortar in which oil took the place of water.

W. CARSLAW.

MORTIFY.—To 'mortify' is to put to death. The word was once used literally, as in Erasmus, Commune Crede, fol. 81, 'Christ was mortified and killed in dede, as touchynge to his fleshe: but was quickened in spirite.' In AV it is used only figuratively, Ro 8<sup>18</sup> 'If ye through the Spirit do mortify the deeds of the body, ye shall live' (el... θανατούτε, RVm 'make to die,' Amer. RV 'put to death'); Col 3<sup>5</sup> 'Mortify therefore your

\* Brass mortars are now generally taking the place of the old wooden ones.

members which are upon the earth' (νεκρώσατε, RVm 'make dead,' Amer. RV 'put to death'). The translation in both places comes from Tindale, and is adopted by all the versions; Wyclif's word is 'slay.' Cf. Tindale, Prologe to Leviticus, 'Baptism signyfyeth unto us repentance and the mortefyinge of oure unruly members and body of synne, to walk in a news luffa and so forth' synne, to walk in a newe lyffe and so forth.' Fuller (Holy State, p. 70) exclaims of the ancient Fathers, 'O the holinesse of their living and painfulnesse of their preaching! how full were they of mortified thoughts, and heavenly meditations'; and (p. 81) he describes St. Anthony the monk as 'having ever (though a most mortified man) a merry countenance.' Hall, Works, i. 68, says, 'If we preach plainly, to some it will savour of a carelesse slubbering, to others of a mortified sincerity. The biblical use of the word is clearly seen in Rogers, Chief Grounds of Christian Religion, one of the early Catechisms (1642): 'Q. What is Sanctification? A. The purifying of our whole nature. Q. Which be the parts of it? A. Mortifying and J. HASTINGS. quickening.

MOSERAH, MOSEROTH. — Moserah occurs Dt 106 (AB Μεισαδαί, F Μισαδαί, Vulg. Mosera), and is noted as the place where Aaron died and was buried. This passage is generally considered was builted. This passage is goldentally as a part of E's narrative of the journeyings. Moseroth occurs Nu 33<sup>30.51</sup> (Μασσουρώθ B v. <sup>50</sup> and -ρούθ B v. <sup>51</sup>, and A in both vv., Vulg. Moseroth) as the first of the 8 stations following Hashmonah, the first of the 8 stations following of these on the route to Mt. Hor. For discussion of these names see Exodus and Journey to Canaan, vol. i. p. 805, § iii., and Driver's notes on Dt 106 in Int. Crit. Com. p. 119f. Trumbull (Kadesh Barnea, p. 128) thinks that Jebel Madura is the modern equivalent of Moserah, and would make that the burial-place of Aaron.

Moses heh): Josephus, Philo, NA. A. NAME.—πψΦ (Mōsheh); Josephus, Philo, NAB, etc., in LXX and NT generally Μωυσῆς, but occasionally, as in later MSS, Μωσῆς, etc.; Moyses;

• Co. The MT form and pointing imply the derivation from משה 'draw,' given in Ex 210, which is not accepted. The form Μωυση̂s implies the derivation, given by Josephus (Ant. II. ix. 6, c. Ap. i. 31) and Philo (Vita Moys. i. 4), from the Coptic mo 'water' and ushe 'saved'; or moü 'water' and se 'taken,' a view once fashionable, but now mostly set aside in favour of the derivation from the Egyptian

mes, mesu, 'son, child'; see Oxf. Heb. Lex.\*

B. Moses in the Old Testament. —i. The Documents .- As the OT includes more than one tradition as to the life and work of Moses, these tradition as to the fife and work of Moses, these traditions are given separately below. The separation, however, of J from E cannot be effected with absolute certainty; and the division of JE material between J and E and the various editors is, in a measure, provisional. Some of the points as to which there is most doubt are placed in

\*Other derivations are from the Egyptian royal name Amosis by way of contraction, favoured by Renan (Hist. i. 160); and as act. ptcp. = 'saviour,' favoured by Seinecke (Gesch. i. 78). The pointing supports the latter view, but not the usage. See also Geschius, Thes. s.v.

quare brackets []. In the main, the analysis of B. W. Bacon in his Triple Tradition of the Exodus has been followed here, as in the articles on EXODUS and NUMBERS (wh. sec). As in art. EXODUS, corresponding features are marked with the same letter in the different documents. The general features of the character and work of Moses will be seen to be the same in all the documents, and are epitomized at the beginning of vii. The chief difference is in the relation of Moses and Aaron (see ii.-iv. (a)).

ii. The Narrative in J.—(a) It is doubtful whether J, at any rate in its earliest form, mentioned Aaron. Dillmann, indeed, regards the prominent position given to Aaron as a mark of J; and the analysis as given by Bacon, and in the articles AARON, EXODUS, finds Aaron in this source. But Wellhausen and Stade (i. 127) hold that J does not mention Aaron. If this is so, Moses stands alone in J, and some of the passages mentioning Aaron, given here as J, must be referred to other sources, while in other passages the references to Aaron are due to one of the editors (Holzinger,

Hex. p. 76).
(b) J says nothing as to the parentage of Moses. Even if 'Is not Aaron the Levite thy brother?' in Ex 414 is J, 'Levite' here is probably a title and not a gentilic name. The absence of any information on this subject may be original; or J's statement may have been omitted because of its identity with that of E; or suppressed because it contradicted E.

(c) In J, as we have it, Moses first appears as a fugitive in Midian. As Jacob (Gn 29<sup>2-10</sup> J) met Rachel at the well, helped her to water her sheep, and was received as a ger into her family; so Moses met the seven daughters of the priest of Midian, helped them to water their sheep, in spite of the shepherds, and became a  $g\bar{e}r$  in the priest's family. He married Zipporah, one of the seven daughters, and had one son, Gershom, Ex 2<sup>150-22</sup>.

(d) After a time the king of Egypt, from whom Moses had fled, \* died; J" told Moses to return to Egypt, for all the men who sought his life were dead; Moses set out with his wife and son.+ (e) At a caravanserai on the way, J'' sought to kill Moses because he was uncircumcised. Zipporah averted His wrath by circumcising their son,‡ Ex 228a 419. 20a. 24-26.8

(f) On the way, or even after Moses reached Goshen, the angel of J" appeared to him in a bush which burned without being consumed, and J" || said that He had seen the oppression of His people, and had come down to deliver them, and bring them to Canaan. Moses was to repeat this to the elders of Israel; and was to go with them to request Pharaoh that Israel might go three days' journey into the wilderness to sacrifice to J". Moses feared they would not believe that J" had appeared to him. Whereupon J" gave him three signs to convince them: a rod turned into a serpent, and back again into a rod; his hand made leprous, and then restored as his other flesh; water poured on the ground and turned into blood. At J''s command, Moses now performed the first two signs in His presence. Then Moses objected that he was not eloquent; and J'' answered, 'I

\* Probably stated in an omitted portion of J, unless Ex 211-14 belong to J; cf. iii. (b).

† MT, sons; but in J Moses has only one son, so that the plural is R (cf. Ex 222).

‡ An ancient account of the origin of circumcision; cf., however, Circumcision in vol. i. p. 443° and Jos 53.

§ Bacon's analysis, followed here, requires the transposition of the journey from Midian before the Theophany in the Burning Bush; the account of the latter in J gives no direction to leave Midian, and takes for granted that Moses is on his way to Egypt, i.s. implies what is given in these verses. Cf. Exours in vol. i. 807.

Il Here, as elsewhere, 'Angel of J''' and 'J'' are interchangeable.

will be with thy mouth, and teach thee what thou shalt say' (Ex 3<sup>2-1a.5.7.8a.16.17ac.18</sup> 4<sup>1-12</sup>). [Moses still begged J" to send some other messenger, and J" in anger gave him Aaron as a spokesman to the people, Ex 4<sup>18</sup>, 1<sup>4a</sup>, 1<sup>5</sup>, 1<sup>6</sup>], \*

(h) Moses [with Aaron] delivered J"s message to the Israelite elders, and showed them the signs. The Israelites believed. Moses [and Aaron] requested Pharaoh to let the Israelites go into the wilderness to sacrifice; Pharaoh refused, and increased their taskwork, whereupon they turned upon Moses [and Aaron] and reproached them; Moses, in turn, appealed to J", Ex 4<sup>20-31</sup> 5<sup>3.5-23</sup>.

(1) At the command of J", Moses inflicted upon

the Egyptians seven plagues - the turning of the Nile into Blood; Frogs; Gnats (EV 'lice'); Murrain; Hail; Locusts; the Death of the Firstborn (for the last see next paragraph). As regards the first six—in each case Moses † asked permission for Israel to go to sacrifice to or serve J", threatening the plague as the penalty of refusal; after Pharaoh's refusal-implied, not stated-the plague happened -nothing is said of any utterance or action of Moses or J" as the immediate cause of the plague, except that J" brings the locusts with an east wind, and removes them by a west wind. In the case of the Frogs, Gnats, Hail, and Locusts, Pharaoh sent for Moses [and Aaron] and begged for his intercession to remove the plagues, promising, after an attempt to obtain better terms, to grant Moses' request. After the cessation of each plague, he hardened his heart and withdrew his promise. In the case of the Locusts, however, Pharaoh was induced by his servants to make concessions on the mere threat, before the plague was actually inflicted; he offered to let the men go, without the women and children. Moses refused, and the plague followed, Ex 714. 16. 17a. 18. 21a. 24. 25 g1-4. 8-15a. 20-39 g1-7. 13-18. 23b. 24. 25b-29. 31-84  $10^{1a}$  3b-11. 13b. 14b. 15a. 15c-19

(j) After the removal of the locusts, Pharaoh sent for Moses and offered to let all the Israelites, both old and young, go to sacrifice if they would leave their cattle behind. Moses refused, and Pharaoh, in great anger, bade him go, and declared that he should never see his face again. Moses answered, 'Thou hast spoken well, I will see thy face again no more,' and announced that all the firstborn of the Egyptians should perish, while no Israelite should suffer anything; and that in consequence all Pharaoh's servants should come to Moses, and entreat him and his people to go. After this utterance, Moses, in hot anger, left the presence of Pharaoh, Ex 10<sup>24-25, 25, 29</sup> 11<sup>4-8</sup>. [Then Moses directed the elders of Israel to kill the passover-lamb, and to put some of its blood upon their lintels and door-posts, that when J" was slaying the Egyptians He might spare the Israelites, Ex 12<sup>21-23-24</sup>].‡ At midnight J" slew all the firstborn of the Egyptians; and the Egyptians, in a panic, made the Israelites start on their journey to the descript such better they carried their to the desert in such haste that they carried their dough with them unbaked. A mixed multitude went with them, Ex 12<sup>29, 30, 81b-84, 87-39</sup>.§

[Moses gave laws as to the Passover, etc. 133a. 4-7. 11-13].

(k) Guided by J" in a pillar, by day a cloud, by night a fire, Moses led the Israelites into the wilderness, towards the sea. Tharaoh, recovering from his terror, pursued them with his army. At

\*So Bacon, followed in AARON and Exorus; Dillmann, Jülicher, and Cornill ascribe these verses to R; cf. (a).
† The introduction of Aaron into the J narratives of the plagues is due to R.

plagues is due to R.

1 So Dillmann and Bacon; but, according to Addis, Cornill,
etc., inserted by R, perhaps from source other than JE.

1 The 600,000 in v.37 is probably R; so Addis, etc.

1 So Bacon; but mostly assigned to R. It may be J material,
but owes its position to R; i.e. in the separate J the giving
of laws was not an incident of the hurried flight.

1 Cf. art. Red Sea.

his approach the panic-stricken Israelites turned upon Moses, and upbraided him for bringing them out of Egypt. He replied, 'Fear not, be still, and see how J' will deliver you to-day. You shall never see again the Egyptians whom you saw to-day. J" shall fight for you, and you shall hold your peace.' The pillar placed itself between the Israelites and the Egyptians. J", by means of a strong east wind, drove back the waters, so that the Israelites passed over in the night; while from the pillar He 'discomfited' the Egyptians, so that they turned and fled; but they perished in the re-turning waters; and, in the morning, 'Israel saw the Egyptians dead upon the seashore, Ex 1321. 22 145-7. 16-14, 190, 20b. 21b. 24. 25b. 27b. 28b. 30

[Then Moses and the Israelites sang to J"-'I will sing unto J", for he hath triumphed gloriously; The horse and his rider hath he thrown into the sea,'

(m) From the sea, Moses led Israel on into the wilderness, where they found no water till they came to Marah ('bitter'), where the waters were bitter; and the people murmured against Moses. In answer to his prayer, J" showed him how to make the waters sweet by using a certain tree.

At their next camping-place, Elim, they found 12 springs and 70 palm-trees, Ex 15<sup>22-25a. 27</sup>.

(p) ‡ At Massah the people murmured against Moses because they were without water. He reproved them for tempting J''..., § hence the place was called Massah ('temptation'), Ex  $17^3$  and the references to 'tempting' and 'Massah' in vv. 2. 7.

(q) | Moses brought the Israelites to Sinai, and they encamped before the mount. J' came down upon Sinai, called Moses to Him, and bade him charge the people and the priests not to 'break through unto J" to gaze . . . lest he break ¶ forth upon them.' Bounds were to be set round the mount, not to be passed on pain of death, Ex 192b. 20-22. 24. 11b-13. 25

[Moses, Aaron, Nadab, and Abihu, and 70 elders went up, and beheld J" afar off, and ate and drank a covenant-meal, Ex 241.2.9.11].\*\*

Moses, who alone was allowed to approach J", †† received from Him Ten Commandments, the words of the covenant' concerning ritual, which he words of the covenant' concerning ritual, which he (Moses) wrote on two tables of stone. He remained with J" forty days and forty nights, and neither ate nor drank, Ex 34<sup>1-28</sup>.‡‡ [J" told Moses that the Israelites had corrupted themselves, and that He intended to destroy them; but at Moses' intercession 'J" repented of the evil which He said He would do unto His people.' When he reached the camp, Moses called to his side those who were faithful to J"; the Levites responded, and at his command massacred 3000 evil-doers and thus confaithful to J"; the Levites responded, and at his command massacred 3000 evil-doers, and thus consecrated themselves to J", Ex 32<sup>7</sup>, 90-12. 14. 22-21], Sg J" bade Moses and Israel go up without Him to Canaan; but, moved by their distress and prayers He relented, and said, 'My presence shall go with thee, and I will give thee rest'; then He permitted Moses to see something of His glory, and proclaimed His name 'J", J", a God full of compassion and gracious, slow to anger, and plenteous in morey. and gracious, slow to anger, and plenteous in mercy

\*So Bacon and Exonus; usually assigned to E or R. †So Bacon, Driver, etc.; others, e.g. Addis, refer vv. 22-26a to E, and v. 27 to P. †For (n) and (o) see after (r). § J's account of how water was provided is omitted. In the transposition of passages, Bacon is followed; cf. Exonus in vol. i. 809.

¶ There is no similarity between the Hebrew words for 'break

through ' (סרץ) and 'break forth ' (פרץ).

- \*\* So Bacon, and similarly Dillmann; most critics give these
- †† Ex 242. 11 The references to a former set of tables and some other matters are R.
  - §§ These verses are often ascribed to R or E.

and truth,' Ex 311.8, Nu 1110-12.14.15, Ex 3312-24

(r) Moses' father in law, Hobab the son of Reuel the Midianite, having come to visit him, † Moses invited him to accompany the Israelites to Canaan. At first he refused. But Moses told him that his local knowledge would enable him to guide Israel through the desert, and promised that he should share in the blessings promised to the Israelites. Whereupon he consented to accompany them,‡ Nu 10<sup>29-92</sup>.

(n) (o) After the departure from Sinai, the Israelites, lacking food and reduced to manna, apparently a natural product of the desert, hank-ered after the flesh-pots of Egypt, and 'wept . . . every man at his tent-door.' Moses remon-strated bitterly with J" for assigning him a task entirely beyond his powers! 'I cannot bear all this people by myself, it is too much for me. If thou deal thus with me, kill me, I pray thee, out of hand, if I have found favour in thy sight; and let me not see my wretchedness.' J" bade him tell the people that they should have flesh for a month. Moses asked how he should find so much for 600,000 men. J" bade him wait and see; and sent a wind which brought an immense flight of quails; but while the people were only beginning to eat them, J' smote them with a plague, Nu 114-15. 18-23. 81-35.

(y) Perhaps the narrative of Dathan and Abiram given under E, with Kuenen, should be ascribed to J, with Cornill. Bacon analyzes the JE portions of Nu 16 into two narratives, J and E; and this analysis is adopted substantially in Numbers; cf.

(aa) At Kadesh the people lacked water, and murmured against Moses, who at J''s command procured them water by smiting a rock. The water was called 'The water of Meribah'

('striving'). Parts of Nu 20<sup>1-18</sup>.
(bb) Moses sent Caleb and others into the southern highlands of Canaan as far as Hebron, to view the land. They reported that the land was fertile, but the inhabitants powerful. Nevertheless, Caleb encouraged the people to invade the land; but his comrades dissuaded them, and they were panic-stricken and refused to go forward. J" were panic-stricken and refused to go forward. proposed to destroy them and make Moses the ancestor of a greater nation; but spared them at his intercession. Yet because they had tempted Him ten times, none of the adults of that generation should enter Canaan, except Caleb, Nu 13<sup>17b</sup>.
18b. 19. 22. 27 to honey. 28. 30. 81 141c 8. 9. 11-24. 81. Moses promised Caleb Hebron as his future possession, Jos 146-14.

(ff) Israel marched along the borders of Edom to Moab, Nu 21<sup>16-20</sup>; (gg) and conquered Heshbon and other Amorite cities, Nu 21<sup>24b-25, 31, 12</sup>; (hh) Balaam, sent for by Balak of Moab, to curse the Israelites, blessed them. Parts of Nu 22-24; (ii) When the Israelites sinned with Moabite women, Moses, at the command of J", hung their chiefs before J", Nu 25<sup>1b. 2. 8b. 4</sup>.

(II) Moses delivered final laws and exhortations to the Israelites, Nu 31<sup>16-22</sup> 32<sup>1-43</sup>; (nn) J" called Moses to the top of Pisgah, whence He showed him all Canaan. After Moses' death, J" buried him in a valley of Moab, opposite Beth-peor, Dt 341b to land. 4.6a.

iii. The Narrative in E.—(a) It is generally agreed that Aaron and Miriam appeared in the original E-story, Miriam being specially conspicuous.

\* Ex 3312-23 or portions of it are often ascribed to R.
† There are probably traces of J's account of Hobab's coming
in Ex 18. Bacon, etc., refer vv.7.10.11 to J.
† This seems implied by Jg 116 J.
§ No mention, however, of this in J.
§ Nu 211-3, usually given to J, clearly connects with these
incidents, but is probably from another stratum of J.

Aaron does not appear in the narrative of the plagues, the references in the present text being due to redactors, and his rôle is not clear; he scarcely seems to have been the brother and almost equal partner of Moses, perhaps not even the priest; but is chiefly conspicuous as opposing Moses and leading Israel in sin. He was perhaps represented as a chief amongst the elders.

(b) Moses was born of parents of the house of Levi, at a time when Pharaoh had ordered that all male children born to Israelites should be put to death. He was hidden for three months, and then placed in an ark of bulrushes, amongst the flags by the Nile. His sister + watched him, and, when he was found and pitied by Pharaoh's daughter, the sister induced her to employ Moses' mother as his nurse. Later on he was taken into the princess's house and trained as an Egyptian noble, Ex 2<sup>1-10</sup>. (c) But when he was grown up, and had learnt that he was an Israelite, he went to see how his people fared, slew an Egyptian who was ill-treating an Israelite, and when he found, on attempting the next day to reconcile two Israelites, that his deed was known, he fled to Midian, Ex 2<sup>11-18</sup>.‡

(e) § While Moses was keeping the flock of Jethro, his father-in-law, on Horeb, the mountain

of God, God called to him, and announced Himself as the God of Abraham, Isaac, and Jacob; 'and Moses hid his face, for he was afraid to look upon God.' God told him that He had heard the cry of the oppressed Israelites, and would send Moses to Pharaoh, that the Israelites might be released. Moses pleaded his unfitness for such a mission; and God promised to be with him, and gave him a sign, that the people, after escaping from Egypt, should worship Him on Horeb, Ex 3<sup>1, 4b, 6, 9-12</sup> ||

(f) God revealed to Moses His new name,

YAHWEH, which is explained as equivalent to 'EHYEH (EV, 'I am'), in the phrase 'EHYEH 'ASHER 'EHYEH (EV, 'I AM THAT I AM'); \{\pi\} warned him that Pharaoh would not release the Israelites till Egypt had been smitten with 'all my wonders,' and directed that, when the Israelites departed, their women should borrow jewels and raiment of their Egyptian neighbours. He gave Moses a rod, with which to work the wonders, Ex 313. 14. 19-22 417.

(d) Moses took leave of Jethro, and set out for Egypt 'with the rod of God in his hand,' Ex

[(g) At 'the mount of God,' Aaron, sent by J", met him; and he told Aaron all J"s words, Ex 427. 287. \*\*

(h) Moses [and Aaron] went to Pharaoh, and in the name of J" bade him let Israel go; he refused, reproached them with keeping the Israelites from their labour, and bade Moses [and Aaron] get to their burdens, Ex 5<sup>1a. 2. 4</sup>.

(i) At the command of J", Moses inflicted upon the Egyptians five plagues—the turning of the Nile into Blood; Hail; Locusts; Three Days' Darkness; the Death of the Firstborn (for the last see next paragraph). As regards the first four in each case Moses worked the miracle by lifting up or stretching out the rod; ++ and Pharaoh's heart was hardened. It is stated that after the plagues of Locusts and Darkness J" hardened Pharaoh's heart.‡‡ The Hail destroyed both man

and beast, Ex 61 715. 17b. 20b. 28 922. 23a. 25a. 85 1012. 18a. 14a. 20-23. 27

- (j) J" announced to Moses that, after the infliction of a final plague, Pharaoh would let the people go; He bade him instruct them to borrow people go; He bade him instruct them to borrow jewels of their neighbours. 'J" made the Egyptians favourably disposed towards the people. Moreover, the man Moses was very great in the land of Egypt, and in the eyes of Pharaoh's servants, and of the people.' . . . \* Pharaoh sent for Moses [and Aaron] by night, and bade them depart with the Israelites. The latter borrowed jewels and raiment of their Egyptian neighbours, and started on their journey. They were armed, and carried with them the bones of Joseph. God led them to the wilderness of the Red Sea, to avoid the warlike Philistines, Ex 11<sup>1-3</sup> 12<sup>31a. 35. 36</sup> 1317-19
- (k) Pharaoh pursued with 600 chosen chariots; the Israelites cried unto J", who bade them go forward; Moses lifted up his rod: . . . the Angel of God placed himself between Israel and its pursuers . . . and took off their chariot wheels . . . [and when the Israelites saw what had been done they believed J" and His servant Moses], Ex 143.7 in part. 10d. 15bd. 19a. 20a. 25a. 31.+
- (1) Miriam the prophetess [the sister of Aaron] ‡ led the women in a triumphal dance, while they sang-

'Sing ye to J", for he hath triumphed gloriously:
The horse and his rider hath he thrown into the sea,' Ex 15<sup>20</sup>. 21.

(n) J" gave the Israelites 'bread from heaven,' i.e. manna, Ex 164.§

(p) They reached Horeb, where, finding themselves without water in the wilderness, the people strove with Moses, who, by commend of J", smote

a rock, and water came from it. Hence the place was called Meribah ('striving'), Ex 17<sup>1b. 4-6</sup> and the references to 'striving' and 'Meribah' in vv.<sup>2.7</sup>.

(q) || Moses went up to God, and received instructions for the people to purify themselves in preparation for a Theophany on the third day. This was done, Ex 19<sup>8.6b-2a. 10. 11a. 14. 15</sup>. On the third day there was a thunderstorm, and God descended on the mountain in a thick cloud, to the sound of a trumpet. Moses brought the people before the mountain to meet with God. Moses spake and God answered, Ex 19<sup>16, 17, 19</sup>. The people, terrified by the storm and the trumpet, fled from the mountain, and begged that they might hear God's words through Moses. Moses reassured them, and 'drew near to the thick darkness where God was.' God spake 'all these words,' i.e. the Ten Commandments. ¶ Moses reported them to the elders of Israel; and the people promised to obey them; and Moses told J" their promise, Ex 20<sup>18-21.1-17</sup> 19<sup>65-8</sup> \*\* At J"s command Moses and Joshua went up to the mountain and remained there forty days and nights, leaving Aaron and Hur in charge of the people. But, meanwhile, Aaron, at the request of the people, made a golden calf as an image of J"; built an altar for it, and celebrated a feast to J". At the end of the forty days, God gave Moses two tables of stone, written with the finger of God, and probably containing the Ten Commandments. As Moses and Joshua

\* According to this analysis, E's account of the Death of the Firstborn and the Institution of the Passover have been omitted; but doubtless the final plague of 11' was the Death of the Firstborn, especially if 42' 2' are E (so Bacon, etc.).
† V.31, usually assigned to J or R. E's account of the crossing of the Red Sea has been almost entirely omitted, probably because it was closely parallel to J's.
† Perhaps R.
§ Usually ascribed to J.
§ Tor transposition of passages see ii. (q).
¶ Those usually so called.
\*Bacon's order as in Exodus is 201-21 1965-5; but if so, 'these are the words' in 1965 have nothing to refer to.

are the words' in 196b have nothing to refer to.

returned, they heard the noise of the feast; and when he came near, Moses saw the calf and the dancing. His anger waxed hot; he threw down the tables of stone, and broke them. He burned the calf, ground it to powder, and made the children of Israel drink water upon which the powder had been strewn; he reproached Aaron with his sin; and Aaron excused himself as having acted under compulsion. Then Moses returned to J" and interceded for the people: 'This people have sinned a great sin, and have made them a god of gold! Yet now, if thou wilt forgive their sinand if not, blot me, I pray thee, out of thy book which thou hast written. And J" answered: 'Whosoever hath sinned against me, him will I blot out of my book. blot out of my book. And now go, lead the people into the place of which I have spoken unto people into the place of which I have spoken unto thee. Behold, mine angel shall go before thee: nevertheless, in the day when I visit, I will visit their sin upon them.' At these tidings the people mourned, and put off their ornaments, Ex 24<sup>12-14</sup>. 18b 321-6 3118b 3216-24. 20-24 334.6... Various laws were given by J" to Moses, Ex 20<sup>22-26</sup> 23<sup>10-38</sup> 22<sup>22-21</sup>.

Moses repeated these to the people, who promised to obey them; Moses wrote them down. The next day he built an altar and set up twelve mazzeboth, one for each tribe. Under his directions, certain young men offered burnt-offerings and peace-offerings. Moses sprinkled half the blood of the victims on the altar; and then read to the people the Book of the Covenant, containing the laws just referred to. The Israelites again promised to obey these laws, and Moses sprinkled the people with blood: 'Behold the blood of the covenant which J" has made with you concerning all these words,' Ex 248-8.

(r) Jethro, Moses' father-in-law, hearing what God had done for Moses and Israel, came to visit God had done for Moses and Israel, came to visit him at Horeb, and brought to him his wife and his two sons.\* Jethro and Moses, together with Aaron and all the elders of Israel, partook of a sacrificial feast before God. Observing the continual concourse of the people to Moses 'to inquire of God,' Jethro advised him to appoint subordinates to deal with lesser matters. Moses accordingly appointed rulers of tens, fifties, hundreds, and thousands. Then Jethro departed to his own land. Ex 18.+ land, Ex 18.+

(a) ‡At this point, apparently, some account was given of the construction of the 'Tent of Meeting,' and perhaps of the Ark; for we are now told that Moses used to pitch the tent outside the camp, and worshippers used to go out to it. Moses went out to the tent, the people stood at their tent-doors to watch him. As he entered, the pillar of God descended, and stood at the door of the tent; and the people prostrated themselves. Meanwhile, within, 'J" spake unto Moses face to face, as a man speaketh unto his friend.' When Moses returned to the camp, Joshua, his minister, remained as attendant to the 'Tent of Meeting,' Ex 337-11.

(t) The Israelites, guided by the Ark, departed from the Mount of J". When the Ark set forward Moses used to pronounce the blessing-

Rise up, O J'', and let thine enemies be scattered; Let them that hate thee flee before thee';

and when it rested-

'Return, O J", unto the ten thousands of the thousands of Israel.'

Nu 1033abg. 34-36, 8

(u) At Taberah, a consuming fire from J", sent

\*Cf. ii. (d); 'after he had sent her back' in v.² is a harmonistic addition to reconcile J and E.

† There are probable traces of J in this chapter.

† Cf. P(g).

\$ Sometimes given to J.

to punish the people for murmuring, was quenched at the intercession of Moses, Nu 11<sup>1-3</sup>.

(x) At the command of J", Moses went out to the

Tent of Meeting with seventy elders; J" came down in a cloud and spake to him, and 'took of the spirit that was upon him, and gave it unto the elders,' so that they prophesied. Two of the selected seventy, however, Eldad and Medad, had stayed in the camp; nevertheless the spirit came on stayed in the camp; nevertheless the spirit came on them, and they prophesied. A young man ran to the Tent of Meeting to tell Moses, whereupon Joshua urged Moses to forbid them; but Moses replied, 'Art thou jealous for my sake? Would that all J"s people were prophets, and that J" would put his spirit upon them,' Nu 1118-17.24-29.\*

(w) Miriam and Aaron attacked Moses, saying, + 'Has J" spoken only by Moses, and not also by us?' J" suddenly summoned Moses, Miriam, and Aaron to the Tent of Meeting, and declared to them, that while He made Himself known to prophets in visions and dreams, He would speak plainly to Moses face to face, and Moses should behold the form (těmūnāh) of J". Miriam was smitten with leprosy, but healed at the intercession of Moses, Nu 12.

(x) At Rephidim, Amalek attacked Israel. Moses committed the direction of the battle to Joshua, while he himself, with Aaron and Hur, went up to the top of a hill, and held aloft the 'rod of God.' When it was held up, Israel prevailed; when it was lowered, Amalek. But when Moses was exhausted, Aaron and Hur made him sit down while they held up his hands till sunset. Then while they held up his hands till sunset. Amalek was completely routed. J" bade Moses record in a book the victory, and J"s purpose to war against the Amalekites till they were exterminated. Moses built an altar called J"-nissi, 'J" my banner,' Ex 178-16.

(y) Two Reubenite chiefs, Dathan and Abiram,

rebelled against Moses because he sought to make himself a prince over Israel, and had failed to fulfil his promise to bring them into a land flowing with milk and honey. Summoned to appear before Moses, they declined; whereupon he went to them, bade the other Israelites separate themselves from the rebels, and appealed to J" to punish them by a hitherto unknown chastisement—the earth should open and swallow them up—as a sign that he had J<sup>n</sup>s authority for his leadership. 's authority for his leadership of Israel. upon the earth opened, and swallowed them up with their households, and they went down alive into Sheol, Nu 16<sup>1b. 2bg. 18. 14. 15b. 2b. 26. 27b-82a. 38. 34. §</sup>

(z) When the people reached Kadesh, Miriam died and was buried, Nu 201. (bb) Moses urged the people to invade the land; but, at their request, consented to send 12 men to survey it. These went as far as Eshcol, returned with a gigantic cluster of grapes and other fruit, but reported that the inhabitants were numerous and powerful. Whereupon the people cried out against Moses, and proposed to appoint a new captain, and return to Egypt. ... Moses bade the people return to the wilderness of the Red Sea; but, in spite of him, they advanced towards Canaan, but were

\*Often referred to a later stratum of E than Ex 18. The paragraph is probably an expansion of an older narrative containing only the prophesying of Eldad and Medad, Joshua's protest, and Moses' answer.

† Moses' 'Cushito wife,' v. lagb, is never again referred to, either in this chapter or elsewhere; and it is clear from the rest of the chapter that the controversy between Moses on the one hand, and Miriam and Aaron on the other, had nothing to do with any such matter; v. lagb can hardly have been inserted by either RD or RP, but by RJE from some older source; it is probably a fragment of an ancient narrative, the rest of which has been omitted because it was not considered edifying.

† V.9.

§ On in v.1 is probably due to textual corruption. Bacon thinks the name occurred in a J version; this view is adorted in Numbers; cf. ii. (y).

attacked and routed, Dt 1<sup>19-45</sup> (probably based on E), Nu 13<sup>18ac.</sup> 20. 23. 24. 26b. 27b. 29. 38 14<sup>1b.</sup> 3. 4. 25. 89-45.\*

(cc) Moses sought permission for Israel to pass peaceably through Edom, but without success, Nu

peaceably through Edom, but without success, and  $20^{14-21}$ . (dd) In the course of the journey from Kadesh, Aaron died, Dt  $10^6$  to burted.

(ee) For murmuring at the hardships of their renewed march through the desert, the people were plagued with fiery serpents. Moses prayed for them, and was told to make a brazen serpent, and by looking at this the sufferers were healed, Nu 21<sup>4b-9</sup>. (ff) Israel marched along the borders of Edom to Moab, Nu 21<sup>11b-15</sup>; (gg) and conquered the territory of Sihon, Nu 21<sup>21-24-27-30</sup>. + (hh) Balaam, sent for by Balak of Moab to curse the Israelites, blessed them, parts of Nu 22-24. (ii) Israelites, shipped Baal-peor, and Moses bade the judges slay the offenders, Dt 25<sup>1a. 3a. 5</sup>.

(kk) J" announced to Moses that he was about to die, and Moses appointed Joshua his successor, Nu 3114-15.23.

(II) Moses delivered final laws and exhortations to the people. Ex 211-238, displaced by Ro to make room for D. Dt 1<sup>1</sup>-4<sup>0</sup> is probably an R<sup>2</sup> expansion of E's farewell speech of Moses, parallel to that of Joshua in Jos 24. Dt 27<sup>1-8.17-19</sup>.

(nn) Moses died in the land of Moab; his tomb

(nn) Moses died in the land of Moab; his tomb was unknown. 'There hath not arisen a prophet since in Israel like unto Moses, whom J' knew face to face,' Dt 34<sup>5, 6b, 10</sup>.

iv. The Narrative in P.—(a) Aaron is Moses' brother, and Aaron and Moses are constantly coupled together. Miriam is ignored, the Moses and Aaron were the children of Aaron who was the children of the property of o Moses and Aaron were the children of Amram and Jochebed; Amram was the son of Kohath, the son of Levi, Ex 6<sup>14-27</sup>, Nu 26<sup>58b-61</sup>; § cf. 1 Ch 6<sup>1-8</sup>.

Moses' wife and children are ignored.

(e) (f) When Moses was 80 and Aaron 83 years old (Ex 7'), God spoke to Moses in Egypt, and revealed His new name—J"—thus: 'I am J": and I appeared unto Abraham, unto Isaac, and unto Jacob as El Shaddai, but by my name J" I was not known to them '—and declared that He had heard the groaning of the Israelites under the oppression of the Egyptians; and that He would now fulfil His covenant with the patriarchs, by giving Canaan to their descendants. Moses told this to the Israelites, but they would not listen because their spirit was broken by their sufferings (Ex 6<sup>2-9</sup>).

(g) When J'' bade him demand from l'haraoh the release of the Israelites, he replied that he had not the gift of speech, and that, as the Israelites had not listened to him, it was not likely that he would make any impression upon Pharaoh. J" replied: 'I have made thee a god to Pharaoh, and Aaron Thave made thee a god to Financia, and Anton thy brother shall be thy prophet . . . I will harden Pharaoh's heart . . . Pharaoh will not listen to you . . . so I will bring forth my people by great judgments,' Ex 6<sup>11, 12</sup> 7<sup>1-5</sup>. (i) At the command of J", conveyed through Moses, Aaron inflicted size plagues on the Egyptians—his Rod changed into a Reptile; \*\* all the Water in the land turned into Blood; Frogs; Gnats; Boils; the Death of the Firstborn (for which see next paragraph).

The first four wonders were wrought by means of Aaron's rod; but, in the case of the fifth, the Boils were caused by Moses appearing before

Nu 1441-45 is sometimes given to J, and probably contains

\* Nu 1441-45 is sometimes given to J, and probably contains R-additions.

† Vv. 32-35 (Og) are referred to R.

† Miriam in Nu 201 is E, and 2659 is RP.

† These passages are often referred to late strata of P or to RP; even in that case they would probably be based on P; which throughout implies that Aaron and, therefore, Moses belong to the tribe of Levi.

† This gap is supplied by 1 Ch 2414-17. Aaron's uncles and cousins are mentioned Lv 102.

† Cf. Ex 638, RP.

\*\* A wonder rather than a plague, but reckoned by P in the same series as the rest.

Pharaoh and throwing soot into the air. case Pharaoh's magicians competed with Moses Rods into Reptiles, Water into Blood, and in producing Frogs, so that Pharaoh was encouraged in hardening his heart against the request of Moses and Aaron; but the magicians failed to produce Gnats, and said, 'The finger of God is here'; but Pharaoh still hardened his heart. In the case of the Boils, the magicians themselves were smitten and fled from Moses; but J" hardened Pharach's heart, so that he would not listen to Moses and Aaron, Ex 78-18. 19. 20a. 21b. 22 85-7. 16-19.

(j) At the command of J", Moses and Aaron instituted the Passover, which was observed for the first time \* . . . The Israelites marched out of Egypt into the wilderness, Ex 12<sup>1-20</sup>. <sup>28</sup>. <sup>43-51</sup> 13<sup>1-2</sup>. <sup>20</sup>.

- (k) At the command of J", Israel turned back and encamped by the sea, that J" might harden Pharaoh's heart, and make him pursue Israel. All of which happened. Still, at the command of J", Moses stretched out his hand over the sea, the waters were divided, and the Israelites 'went into the midst of the sea upon the dry ground: and the waters were a wall unto them on their right hand and on their left.' The Egyptians pursued into the sea, but Moses again stretched out his hand over the sea, and the waters returned and overwhelmed them; while the Israelites reached the further shore in safety, Ex 141. 2. 4. 8. 9. 15ac. 16-18. 21a. 21c-22. 26. 27a. 28a. 29.
- (n) (o) In the wilderness the Israelites hankered after the flesh-pots of Egypt, and murmured against Moses and Aaron; J' sent them manna in the morning, and quails in the evening, Ex 161-4 6. 7. 9-14. 15b. 16b. 11. +

(q) After sundry journeys (Er 171 191. 2a), the Israelites came to the wilderness before Sinai. The glory of J" dwelt on Sinai, hidden for six days in a cloud, but (apparently) manifested on the seventh like fire glowing through the cloud. On the seventh day J" called Moses into the cloud (Ex 24<sup>110-13a</sup>), where he received instructions as to the tabernacle and its furniture, and the priests and their vestments and duties, Ex 251-3117b.

Moses came down from Sinai with the two Tables; his face shone so that he veiled it § when he spoke to Aaron and 'the princes of the congregation.' He gave the Israelites J"'s commands, which they executed with great zeal; the taber-nacle was constructed, furnished, and consecrated. The glory of J" filled it, and the cloud covered it (Ex 349-4038), Aaron and his sons were consecrated as priests, and entered upon the work of their office; but two of the sons, Nadab and Abihu, offered before J" strange fire, which He had not commanded; and fire went forth from the presence of J" and devoured them.' From time to time J" revealed various laws to Moses at Mt. Sinai, which make up the Book of Leviticus.

Moses and Aaron proceeded to organize the nation and its worship. A census was taken showing the number of the adult males, apart from the Levites, to be 603,505; a census of male

\* P's account of the Death of the Firstborn, implied in Ex 1212,

\* P's account of the Death of the Firstborn, implied in Ex 12<sup>19</sup>, has been omitted.

† RP adds in vv.17-30.32-34 details as to the amount gathered, the observance of the Sabbath, and the placing of a pot of manna before the Testimony, i.e. the Tables in the Ark. Unless this chapter originally stood after the narrative of the events at Sinal (so Addis and Bacon), the reference to the tables is an anachronism due to an oversight.

† P contains large number of laws revealed by J" to Moses, and promulgated by him to the people. It is not necessary to enumerate these in an article on Moses. See under Hexateuch in vol. ii. n. 368.

LEVITICUS.

in vol. ii, p. 368.
§ According to 2 Co 3<sup>18</sup> Moses veiled his face that the Israelites might not see the glory pass away. He are or all of Ex 342-4032 belongs to late strata of P; and Leviticus contains material from various strata; see Exodus.

Levites, young and old, taken later, showed them

to amount to 22,000, Nu 11-1010.\*

(t) On the 20th day, of the 2nd month, of the 2nd year, the cloud was taken up from over the Tabernacle, and the Israelites left the wilderness of Sinai, according to J"'s commandment given through Moses, Nu 10<sup>11-28</sup>.

(y) Korah and 250 princes attacked Moses and Aaron for claiming a sanctity superior, i.e. an exclusive priesthood, to that of the rest of the congregation. This claim, apparently, was made by Moses and Aaron as Levites (so v.76, which has been transposed from v. Ye take too much upon you, ye sons of Levi'). Moses proposed that Korah and his company should officiate before J" as priests, that He might show His will in the matter. They did so, and appeared supported by all the congregation. J" threatened to destroy all Israel, except Moses and Aaron; but, at the intercession of Moses, the congregation were allowed to separate from Korah and his 250 princes, who were devoured by fire from J". The congregation murmured and were smitten with a plague, which was stayed by an atoning oblation of incense made by Aaron, Nu 161 to Korah. 2-7. 18-24. 27 to side. 35. 41-50.  $\pm$ Twelve rods, one for each tribe, being placed before the Ark, Aaron's rod budded to show that the tribe of Levi was chosen for the priesthood. J" ordered that Aaron's rod should be kept always before the Ark, Nu 17.

(aa) In the wilderness of Zin, the people, lacking water, murmured at Moses and Aaron. J" bade Moses take Aaron's rod from before the Ark.§ Moses did so, gathered the congregation together before the rock, saying, 'Hear now, ye rebels; shall we bring you forth water out of this rock?' He smote the rock twice with his rod, and the water gushed forth. But J" rebuked Moses and Aaron for lack of faith, and told them that they should not be allowed to lead Israel into Canaan.

Parts of Nu 201a. 2-18.

(bb) At the command of J", Moses sent from the wilderness of Paran Joshua and Caleb and ten others to survey the land. They went through the whole land, as far as Rehob on the borders of Hamath; and, after forty days, they brought back an evil report, that it was a land which ate up its inhabitants, and that all the people in it were giants. The congregation murmured against Moses and Aaron, who prostrated themselves before them. Joshua and Caleb protested that the land was a good land. But the congregation were about to stone Moses and Aaron, when the glory of J" appeared in the Tabernacle, and J" declared that of the grown men only Caleb and Joshua should enter Canaan. The other ten spies died at once by a plague, Nu 13<sup>1-17a, 21, 25, 26a, 82</sup> 14<sup>1a, 2, 5-7, 10, 26-30, 84-38</sup>. (dd) When Israel, journeying from Paran, reached Mount Hor, Aaron died, and was succeeded by Eleazar, Nu 20<sup>22b-29</sup>.

(ff) Israel marched along the borders of Edom to Moab, Nu 20<sup>22</sup> 21<sup>4a. 10. 11a</sup>.

(ii) An Israelite brought in a Midianite woman; whereupon there came a plague, which was stayed whereupon there came a plague, which was scayed by the execution of the guilty couple by Phinehas the grandson of Aaron. J" bade Moses promise Phinehas 'an everlasting priesthood,' Nu 25<sup>6-15</sup>. (jj) Moses and Eleazar took a second census, none of those included in the former census surviving,

From various strata of P.

except Joshua and Caleb, Nu 26. (kk) J" told Moses he was about to die; and, at J''s command, Moses appointed Joshua his successor, Nu 27. (II) Moses delivered final laws, etc., Nu 28-30. The Israelites defeated the Midianites and slew Release Nu 21 (2012) Balaam, Nu 31. (mm) Moses gave the territories of Sihon and Og to Reuben and Gad, Nu 32<sup>1-38</sup>.\*

(nn) Moses went up to Mt. Nebo and died there, at the age of 120, in full possession of all his faculties. The Israelites mourned him thirty days; and Joshua succeeded him, 'full of the spirit of wisdom; for Moses had laid his hands upon him,' Dt 34<sup>1a. 7-9</sup>.

v. Moses in D, etc.—The additions made by the Deuteronomic writers and the various editors to the Pentateuch simply expound, interpret, and harmonize the information given by the older character and work of Moses. The various songs, though probably included in J and E, or JE, etc., are really independent sources. Ex 15<sup>2-18</sup> (Song at the Red Sea) is doubtless the oldest account of the great deliverance. It states, in accordance with J, that J", through a mighty wind, which first held back and then let loose the waters, overwhelmed the Egyptians in the Dead Sea. The 'Blessing of Moses,' Dt 33, speaks of a Theophany from Sinai, Seir, Mt. Paran, of a Law given by Moses, who† was 'king in Jeshurun,' and connects Levi with Massah and Meribah, either because Levi was regarded as equivalent to Moses, or else following an otherwise unknown tradition.

or else following an otherwise unknown tradition.
vi. Moses in the OT outside the Pentateuch.—
In the pre-exilic prophets, Hos 12<sup>13</sup>, sometimes regarded as a later addition, states that J" brought up Israel from Egypt, and preserved him, by a prophet; Mic 6<sup>4</sup> ‡ refers to Moses, Aaron, and Miriam as the leaders of Israel in the Exodus; Jer 15<sup>1</sup> couples Moses with Samuel. In the post-exilic prophets Moses is referred to in Is 63<sup>11, 12</sup>, and the law of Moses in Mal 4<sup>4</sup>, Dn 9<sup>11, 18</sup>. In the Paalter, Ps 105, 106 are a lyrical summary of the Psalter, Ps 105. 106 are a lyrical summary of the history of the Exodus; they are based on an edition of the Pentateuch, in which P had already been combined with JED, but which did not contain some of the latest priestly additions. Moses and Aaron are also referred to in 7720 as leaders of the people, and in 996-

'Moses and Aaron among his priests, And Samuel among them that call upon his name.

In Jos the Deuteronomic editors make frequent reference to the 'law of Moses,' i.e. D, which, according to them, was strictly observed by Joshua and the elders of his generation, e.g. 830-25. In Sam.-Kings, the Deuteron editors seem to hold that this law was invested till discussed. to hold that this law was ignored till discovered in the temple in the reign of Josiah. In Ch, the priestly edition of the history, the law of Moses, i.e. the laws of the Pentateuch, was strictly ob-

served by all good kings from David onwards.

In Jos 24<sup>1-10</sup> (E) Joshua's farewell speech gives a brief summary of the history of the Exodus, beginning, 'I sent Moses and Aaron.' § There is a similar reference to Moses and Aaron in 1 S 12<sup>6-8</sup> (E?), Samuel's farewell speech. 1 Ch 23<sup>14-17</sup> gives the sons and grandsons of 'Moses the man of God,' and states that they were reckoned with (יקראו על)

the tribe of Levi.

vii. Reconstruction of the History. - We can take as our starting-point certain facts as to which the ancient sources and most modern critics agree -(a) That Moses was the leader under whom Israel was delivered from bondage in Egypt and

\* Probably RP, but based on JE.
† Driver, Steuernagel, etc., prefer to refer 'the king' to Jahweh.
† Perhaps written in the reign of Manasseh.
§ Omitted by the LXX. In view of the general attitude of E to Aaron, the words 'and Aaron' are probably R, if the clause belongs to the text at all.

from peril of annihilation by the Red Sea, and was governed during its sojourn in the wilderness; (b) that through him Israel received a revelation, which was a new departure in the national religion, and the foundation of Judaism and Christianity; and (c)-practically another aspect of the last point-that he originated or formulated many customs and institutions from which the later national system was developed; that thus (d) Israel owed to Moses its existence as a nation; and (e) Moses is a unique personality of supreme importance in OT history.

The following quotations will show the extent to which the general historicity of the Mosaic narrative is accepted; in (A) are placed those which minimize the historical element: the rest in (B):-

minimize the historical element; the rest in (B):—

(A) Stade, who in his GVI was more sceptical about the sojourn of the people in Egypt than in more recent utterances, accepts Moses as a real person, thus: 'Like all founders of religions, he brought to his people a new, creative idea, which moulded their national life. This new idea was the worship of Yahwe as national God' (Stamngottes), p. 130. Ct. Akad. Reden, 105 ff.

Renan, Hist. du Peuple d'Isr. i. p. 161: 'Mais ce qui est possible aussi, c'est que tous ces récits de l'Exode, où la fable a pénétré pour une si large part, soient plus mythiques encore qu'on ne le suppose d'ordinaire, et qu'il ne faille, de tous ces récits, conserver que le fait même de la sortie d'Israel de l'Égypte et de son entrée dans la péninsule du Sinal.' Of Moses he says: 'La légende a entièrement recouvert Moise . . . quoique son existence soit très probable,' p. 159.

(B) In Ewald's treatment of this period, Hist. of Isr. [Eng. I.] ii. 16-228, his own view of the history is partly subordinated to an exposition of the narratives in the various sources; but he clearly accepted the historicity of the leading events. Thus, of the passage of the Red Sea, he wrote: 'Whatever may have been the exact course of this event, whose historical certainty is well established, its momentous results, the nearer as well as the more remote, were sure to be experienced, and are even tous ment distinctly wishle.' 75

been the exact course of this event, whose historical certainty is well established, its momentous results, the nearer as well as the more remote, were sure to be experienced, and are even to us most distinctly visible, p. 7.

Wellhausen, Hist. of Isr. pp. 429-438: 'Moses . . . saw a favourable opportunity of deliverance . . . At a time when Egypt was scourged by a grievous plague, the Hebrews broke up their settlement in Goshen one night in spring . . on the shore . . . of the Red Sea . . they were overtaken by Pharaoli's army. . . A high wind during the night left the shallow sea so low that it became possible to ford it. Moses eagerly accepted the suggestion, and made the venture with success. The Egyptians, rushing after, came up with them on the highten of the red with the assailants fought at a disadvantage: the ground being ill suited for their charlots and horsemen, they fell into confusion and attempted a retreat. Meanwhile the wind had changed; the waters returned, and the pursuers were annihilated. After turning to visit Sinai . . the emigrants settled at Kadesh.' 'A certain inner unity actually subsisted long before it had found any outward political expression; it goes back to the time of Moses, who is to be regarded as its author. The foundation upon which, at all periods, Israel's sense of its national unity rested was religious in its character. It was the faith which may be summed up in the formula, Jehovah is the God of Israel, and Israel is the people of Jehovah. Moses was not the first discoverer of this faith, but it was through him that it came to be the fundamental basis of the national existence and history.' From the historical tradition . . . it is certain that Moses was the founder of the Torah.'

The late W. Robertson Smith wrote, OTJC?: 'Moses . . . is

the founder of the Torah.'
The late W. Robertson Smith wrote, OTJC2:

'From the historical tradition . . . it is certain that Moses was the founder of the Torah.'

The late W. Robertson Smith wrote, OTJC2: 'Moses . . . is the father of the prophets,' is the father of the priests as well as the father of the prophets,' p. 303. 'He was a prophet as well as a judge. As such, he founded in Israel the great principles of the moral religion of the righteous Jehovah, p. 305.

Smend, AT Religionsgeschichte?, writes: 'The narrative of the Mosalc period contains certain leading features, the historicity of which there is no reason to doubt, viz. the sojourn in Egypt of the Israelites, or at any rate of a part of them; their flight from Egypt; their connexion with the tribes of the Sinaitic peninsula and with the holy mountain; their stay at Kadesh, and finally the conquest of the Amorite kingdom east of the Jordan. . Moses was not the lawgiver of Israel, but he was much more than that. By leading the Israelites out of Egypt, by unlying them in the wilderness, by conquering the land E. of Jordan, thus giving the Israelites a settled abode, and enabling them to become agriculturists instead of nomads, he created Israel. . . . Through him Yahwa became the God of Israel,' pp. 16-17.

Kittel, in his Hist. of the Hebrews [Eng. tr.], which applies Dillmann's critical views to the history, writes: 'Not only the Song (at the Red Sea), but all three main sources (I E P) have historic ground beneath them. The Passage through the sea is a historical fact, but this is a link of a chain which implies tothers, earlier as well as later. The abode in Egypt, the Exodus thence, the continued journeying in the Desert towards Sinai, are thereby all made certain,' 1. P. 227 f. Smillarly he accepts connexion with Midian and the sojourns at Sinai and Kadesh, pp. 229-234, and finds a Mosaic kernel in the Decalogue and the

Book of the Covenant. Further: 'If the events of that period are, as a whole, beyond dispute, they demand for their explanation such a personality as the sources give us in Moses,'

plantation such a personanty as the source give us in aloses, p. 239.

Cornill, Hist. of the People of Isr. pp. 41-43, writes: 'Moses, a Hebrew of the tribe of Levi, had by favourable providence had access to the learning and civilization of Egypt,' and led the Israelites out of Egypt. They were overtaken by the Egyptians at the Red Sea, but 'a mighty north-east wind lays dry the shallow strait, and they go through on the bottom of the sea, into the desert, into freedom.'...' In Sinai... tradition locates the capital achievement of Moses, his religious reorganization of the people. It is one of the most remarkable moments in the history of mankind, the birth-hour of the religion of the spirit. In the thunderstorms of Sinai the God of revelation Himself comes down upon the earth: here we have the dawn of the day which was to break upon the whole human race, and among the greatest mortals who ever walked this earth Moses will always remain one of the greatest.'

Passing to details: Moses' connexion with the

Passing to details: Moses' connexion with the Levites is vouched for not only by the statements as to his birth, Ex 2<sup>2</sup> E, 6<sup>20</sup> P, but also from the fact that the Levites of the sanctuary at Dan claimed to be descended from Moses; \* and also by the designation of the Levites in Dt 338 as the people of thy holy one, אוש חסיר, t.e. Moses. Perhaps Mushi (Ex 619 [P]), as the name of a division of the Levitical clan Merari, denotes another group of Levites, who at one time claimed descent from Moses. 1 Ch 23<sup>14-17</sup>, where it is stated that the sons of Moses were reckoned (יַּקראוּי) to the tribe of Levi, is possibly a trace of some arrangement by which the Mosaic Levites were placed on the same level as the other Levites; the genealogical statement of the transaction would be that Gershom was a son of Levi and not of Moses.

The E statement (Ex 210), that Moses grew up in Egyptian surroundings, is supported by the apparent identity of his name with the Egyptian mesu; but it is not likely, as Renan (Hist. du Peuple d'Isr. i. 142 ff.) supposes, that he was greatly influenced in his work as the medium of divine revelation to Israel, by any Egyptian training. The pre-prophetic religion of Israel has little in common with that of Egypt. Moreover, the early narratives make it clear that the scene of what we may call his religious education was the desert between Egypt and Palestine. It was at Horeb or in Midian that God appeared to him; and the only human being by whose advice he was guided alike in religious and secular matters was his father-in-law, variously styled Jethro, the priest of Midian, Reuel, Hobab ben-Reuel, the Kenite. See HOBAB, JETHRO. It was at Horeb or Sinai that Moses received his fuller revelation; and throughout the carlier history J" is specially connected with Sinai. Thus it appears that Moses, as an exile from Egypt, found among the Bedawin of the wilderness of Sinai the human influences which helped to shape his subsequent teaching, § cf. art. GoD in vol. ii. p. 200a: there, too, he received the divine inspiration, which sent him back to Egypt to rescue his people. In that rescue and for the rest of his life, Moses was the mediator between J" and Israel alike in things material and spiritual. Israel, in its better moments, recognized that J" guided, protected, and championed His people through the leading and governance of Moses, and instructed them through his teaching. The tradition is equally clear that Israel had its evil moods in which it strove to

Shiloh.

† So Dillmann, Addis, etc.; Driver prefers to render, 'the man, thy godly one,' i.e. the tribe of Levi.

† Cf. the exile of the Egyptian Sanehat amongst the Bedawin, Petrie, Egypt, 1. 153.

† The occurrence of J" in Jochebed suggests that the name J" was known in the tribe of Levi before the time of Moses; but this name is found only in P.

<sup>\*</sup> Jg 1830 (J?), where the true reading is Moses, not Manassch. The suggestion (Addis, Hex. p. 196 n.) that 1 S 227 implies that a similar claim was made by the priesthood of Shiloh is not supported by the general sense of the passage, which, moreover, was probably not written till after the destruction of Shiloh.

+ So Dillmann Additable

shake itself free from the control of Moses, and that there were times when even he despaired of accomplishing the task which J" had laid upon him. The repeated offers of J" to annihilate Israel and make Moses the ancestor of a new nation, are probably a faithful reminiscence of importunate doubts as to whether Israel was worthy to be 'the people of J", 'i.e. to receive and entertain the Divine Presence by which Moses felt himself possessed and inspired. For then a nation was a necessary correlative of a religion. Would it not be better to leave Israel to its fate and to gather round himself some new community, just as centuries later Paul turned from the Jews to the Gentiles? But Moses' intense patriotism made such a course impossible. 'If thou wilt forgive their sin —; if not, blot me, I pray thee, out of thy book which thou hast written.' Again and again he returned to the task of keeping the people true to their high vocation, alike by persuasion and chastisement; while he as constantly besought J" to pardon their sin and bear with their frailty.

We may also trust the tradition that Moses led Israel first to Kadesh and then to the plains of Moab, but that he died before the invasion of Palestine. The tradition of some sin, of which exclusion from Canaan was the penalty, is too obscure to be interpreted, far less verified. The important and controlling element of Moses' work for Israel, and through Israel for the religion of the world, was the uniting of the various tribes as 'the people of J",' and of J" only, in the faith that J" could control nature and history to His purposes. The mutual loyalty of the tribes to one another had an immense ethical value, of which their common loyalty to J" was the bond and symbol. Hence an ethical character necessarily attached to J" Himself. In a primitive age a new departure necessarily had a concrete embodiment; Moses therefore provided for J" a sanctuary and a priesthood. The Tent of Meeting is mentioned by E (Nu 11 etc.); and, even apart from P, who has probably expanded ancient material, the Ark was evidently constructed by Moses; it is conspicuous in JE at the crossing of the Jordan, but entirely absent at the Red Sea. As to the priesthood, Moses clearly placed the care of the Ark and the Tent of Meeting in the hands of his own family. Joshua, indeed, was left in charge of the Tent, but only as the deputy of Moses, who was the real priest, or, as Philo says, high priest. Moses appears (see above) to have left the succession in the priesthood to his children; it is not clear how far P's statement that the family of Aaron was entrusted with the priesthood is derived from ancient tradition, but the ordinary analysis supports this view by giving Dt 10<sup>6</sup>, Jos 14<sup>85</sup> to E, but they may belong to R<sup>5</sup>; see 'Joshua' in PB. Cf. ARK, TABERNACLE, etc.

The Pentateuch also states that Moses committed to writing certain laws and records: 'all the words of J",' Ex 24° (E) — what these 'words' were is not stated; the ritual Ten Commandments, Ex 342° (J); the register of the Stations in the Wilderness, Nu 33¹ (R¹); 'this law,' probably the original Deuteronomic Code, Dt 31° (R¹). The articles Exodus, Deuteronomy, Numbers explain why even these sections, at any rate in their present form, are not attributed to Moses. Yet these passages warrant us in believing that many of the laws and institutions of the Pentateuch originated with Moses, or received his sanction, or are the natural application to later times of the principles involved in his government of Israel.

It is doubtful whether we can regard Moses as an author in the literary sense. His name is indeed found in the OT in connexion with various poems, viz. Ex 15<sup>1-18</sup>, the Song of Triumph at the Red Sea; Dt 32<sup>1-43</sup>, the Song of Moses; Dt 33<sup>2-29</sup>; and some other poems in Ex-Dt; Ps 90, the Prayer of Moses; and the whole Pentateuch and the Bk. of Job have been attributed to him by rabbinical and other theories. The reasons why this ascription of these books and poems to Moses has been for the most part abandoned will be found in the articles on the several books. It is not impossible that he may have composed narratives and poems, and that portions of such work are preserved in the Pentateuch, but we have no means of identifying them.

ing them.

It will be obvious that the question, 'What new elements of cult and faith did Moses add to the religion of Israel?' can be only very partially answered. Later times rightly held that, in a sense, they were his debtors for their whole treasure of religious faith and life; they were not careful to distinguish between original Mosaism and its developments; but included both alike under the formula, 'J" said to Moses.' Modern analysis has not yet succeeded in definitely and certainly separating the one from the other. It has been proposed to determine Mosaism by ascertaining the nature of the pre-prophetic religion of Israel. But our data for this calculation are in-adequate; and even if it were successfully performed, we have still to discover the exact state of pre-Mosaic religion, and to establish some principle by which the credit for the advance from that to prophetic religion is to be distributed between Moses and other teachers, such as Samuel and Elijah. Moses' work was rather practical than didactic, the influence of an inspired life rather than the inculcation of abstract dogmas. He made the faith, the sanctuary, the Ark of J" the rallying-point of a united Israel. This point is rallying-point of a united Israel. This point is rightly emphasized by E and P in their statements that it was through Moses that the name YAHWEH was made known to Israel. What there was new to Israel in this name, as compared with the divine names they had hitherto used, we cannot at present determine. But, in the natural course of things, each of the tribes of Israel would have developed, like Ammon, Moab, and Edom, its own henotheistic religion. The devotion of so great a group of tribes to J', and J' only, and the survival of this common devotion when the political unity disappeared, under the Judges and again during the divided monarchy, was a distinct step from henotheism to monotheism. Moreover, the faith that the God whose sanctuary was Sinai could rescue Israel from Egypt, protect and provide for them in the wilderness, and put them in possession of Palestine, emphasized the truth that J" was not the God of a country, but of a people; and the relation of a deity to a people is far more spiritual than the relation of a deity to a country—J" is of a higher order than Baal. Hence the Mosaic faith, 'J" is the God of Israel,' and the realization of that faith in the events of Israel's history during the leadership of Moses, constitute a distinct advance in spiritual monotheism.

Moses' personality cannot be exactly defined, for similar reasons. In the oldest tradition he stands in such isolated grandeur,\* is so constantly thought of as the ideal ruler and prophet, that the traits of human, individual life and character are lost. Even points that seem characteristic are soon seen to belong to the Israelite ideal of the saint and prophet. His shrinking from his mission he shared with men like Jeremiah and Ezekiel. When Nu 128 (E2 or perhaps R) states that Moses was meek ('andw) above all other men, it means that he was unique in his piety, for to be 'andw came to be the characteristic grace of

\* For Aaron see il.-iv. (a).

the godly man. On the other hand, his wife and sons vanish silently from the story, which cares nothing about his personal relations, and is interested only in the official successor to his leadership. The picture drawn of him in the Pentateuch is adequately sketched by saying, with Philo, that Moses is portrayed as supremely endowed with the human gifts and divine inspiration of king and

lawgiver, priest and prophet.

C. Moses in the New Testament.—The NT makes frequent reference to the history of Moses. For the most part, however, it adds nothing to the OT narrative. In some instances it follows a text differing from MT, or a tradition varying from the Pentateuch,\* but these differences do not affect the general history of Moses. In other cases, the NT follows tradition in obtaining new features from the interpretation of the OT narrative. The simple τω (EV 'goodly' of Ex 22') becomes, by a development from the LXX dστείος, the emphatic phrase  $d\sigma\tau s \hat{i} \hat{o} s \tau \hat{\varphi} \theta \epsilon \hat{\varphi}$  (EV 'exceeding fair'), Ac  $7^{20}$ ; cf. He  $11^{28}$ . So, again, He  $11^{24-26}$ 'Moses, when he was grown up, refused to be called the son of Pharaoh's daughter; choosing rather to be evil entreated with the people of God, than to enjoy the pleasures of sin for a season; accounting the reproach of Christ greater riches than the treasures of Egypt: for he looked unto the recompense of the reward. By faith he forsook Egypt, not fearing the wrath of the king: for he endured, as seeing him who is invisible.' Similarly, St. Stephen (Ac 7<sup>25-41</sup>), in stating that Moses 'was instructed in all the wisdom of the Egyptians,' that he was about forty when he fled from Egypt, that he spent forty years in Midian, etc., follows traditions which are an obvious deduction from the OT statement that Moses was brought up as the 'son of Pharaoh's daughter,' and from the chronology of the Pentateuch.

There are, however, a few statements about Moses in the NT which can scarcely be conjectural expansions of suggestions found in the Pentateuch. They are, for the most part, derived from apo-cryphal works: 2 Ti 38.5 'Jannes and Jambres withstood Moses,' and 'their folly... came to be evident unto all men, is said by Origen (on Mt 27") to be taken from an apocryphal Book of Jannes and Jambres; see Jannes and Jambres (Book of). Jude , the contention of Michael and Satan over the body of Moses, is from another apocryphal work, the Assumption of Moses; see

following article.

The NT constantly refers to the law of Moses, and to Moses as the founder of OT religion, and refers to the Pentateuch as 'Moses' (Lk 1629). His prophetical status is recognized by the quotation in Ac 3<sup>22</sup>. At the Transfiguration, Moses and Elijah appear as the representatives of the OT dispensation, and Christ and they speak of His approaching death as an 'Exodus' (Lk 9<sup>31</sup>, cf. 2 Pe 1<sup>15</sup>). While the NT contrasts the law with the gospel, and Moses with Christ (Jn 1<sup>17</sup> etc.), yet it appeals to the Pentateuch as bearing witness to Christ (Dt 18<sup>15-19</sup> in Ac 7<sup>57</sup>), in a way which implies that what Moses was to the old, Christ is to the new dispensation. Similarly, the comparison between Moses and Christ in He 3<sup>5.6</sup> impalies that though Christ trace greater that Moses Moses are the though Christ trace greater that Moses Moses are the state of the second christ in the s plies that, though Christ was greater than Moses, He was, in a sense, a greater Moses, and that

Moses was a forerunner and prototype of Christ.

D. Moses in Tradition.—An immense mass of traditions gathered round Moses. Many of these are collected in Josephus, Ant. II.-IV., c. Apion.; Philo, Vita Moysis; Eusebius, Prap. Ev. 9; in the Targums and rabbinical commentaries; and in the pseudepigraphal works ascribed to Moses. †

\*2 Co 318, He 94 (cf. Nu 1710). † See Moszs, Assumption of.

Traditions are also found in the Koran, and in other Arabian works. It is possible that there may be in this wilderness of chaff some grain of fact not otherwise known; but, speaking generally, the student of OT history may set the whole on

So Canon Rawlinson, Moses, His Life and Times, Pref. iii: 'Many legends have clustered round the name of Moses, some Jewish, others Mahometan, but these are almost always worthless, and throughout the following pages, excepting in a single instance, no notice has been taken of them. The writer strong conviction has been that it is from the Scriptures almost entirely, if not entirely, that we must learn the facts of Moses life and deduce our estimate of his character.'

Hence, with the partial exception of the Manetho traditions preserved by Josephus, to be noticed hereafter, these legends are mostly ignored by historians. The chief exception is Stanley, who, in his Jewish Church and the article 'Moses' in Smith's *DB*, interweaves legends with biblical data in his usual picturesque fashion.

Doubtless, however, the ideas which the Jews in the NT period had of Moses were somewhat influenced by such traditions-witness their currency in Philo and Josephus: these traditions, however, would not—and the NT shows that they did not—seriously modify the account given in the OT of the life and work of Moses. They supply details of names and numbers; narrate incidents that fill gaps in the story; and provide facts which explain obscurities. Further, by adding to the marvellous in the history of Moses, they attempt the superfluous task of increasing his unique spiritual importance. We can cite only a few examples. Thus Josephus (Ant. II. ix. x.) gives many details of the childhood and youth of Moses. Pharaoh's daughter's name was Thermuthis; the infant refused to be suckled by Egyptian nurses; he was of divine form (μορφη θείον); the princess induced her father to put his crown on Moses' head, but Moses threw it down and trod on it, etc. etc. An account of a successful campaign against the Ethiopians, in which Moses commanded the Egyptian army, and married Tharbis, the daughter of the Ethiopian king, probably grew out of the reference to his 'Cushite wife' in Nu 12¹. The account of Moses' death (IV. viii. 49) concludes: 'As he was embracing Eleazar and Joshua, and was still talking with them, a cloud suddenly stood over him, and he disappeared down suddenly stood over him, and he disappeared down a certain valley. But he wrote in the Sacred Books that he died  $(a\dot{\nu}\dot{\tau}\dot{\nu} \tau \epsilon\theta\nu\epsilon\dot{\omega}\tau a)$ , fearing lest men should venture to say that he had been deified  $(\pi\rho\delta s \ \tau\dot{\delta} \ \theta\epsilon\hat{l}o\nu \ a\dot{\nu}\tau\dot{\delta}\nu \ d\nu a\chi\omega\rho\hat{\eta}\sigma a)$  on account of his extraordinary virtue. Elsewhere (c. Apion. i. 26) he quotes Manetho to the effect that Moses was hore in Heliopolis and hore the Ergyptian was born in Heliopolis, and bore the Egyptian name of Osarsiph. Philo (Vita Moysis, i. 5) gives the details of his education in the learning of Egypt, Greece, Assyria, and Chaldea. In i. 39 Egypt, Greece, Assyria, and Chaldæa. In i. 39 he has a version of the fight at Rephidim (Ex he has a version of the fight at Repniam (Ex 178-18), in which Aaron and Hur are dispensed with, and Moses' hands are miraculously upheld. In iii. 39 he speaks of Moses' prophesying his own death, by divine inspiration, while yet alive, and being buried 'not by mortal hands, but by immortal powers,' and concludes, 'Such was the life, and such the death of Moses, king, lawgiver, high priest, and prophet, as it is recorded in the Sacred priest, and prophet, as it is recorded in the Sacred Scriptures.

Although the Manetho traditions belong rather to the general history of the Exodus than to the personal career of Moses, something more may be said about them here. Josephus (c. Apion.) gives the traditions as to the Exodus preserved by

<sup>\*</sup> The many tedious expansions of the Bible story in Josephus and Philo, especially the speeches, which, after the manner of Thucydides, they put into the mouths of Moses and others, have of course no historical value.

Manetho, an Egyptian priest and historian of Heliopolis, during the reign of Ptolemy Philadelphus, B.C. 285-246. In i. 26, 27, Manetho is quoted as stating that a priest of Heliopolis, named Osar-siph, afterwards Moses, raised a revolt of persons afflicted by leprosy and other foul diseases, who had been settled on the borders to deliver Egypt from the pollution of their presence. They were defeated and driven out of Egypt into Syria by Amenophis king of Egypt. In ch. 32 a similar story is quoted from Cheremon,\* the leaders of the Jews being Moüses Tisithen and Joseph Peteseph. In ch. 34, cf. ii. 2, a third version of the story is quoted from Lysimachus.† According to i. 14, 15, 26, ii. 2, Manetho stated that Jerusalem was built by the followers of shepherd kings, Hyksos, when they were expelled from Egypt by Tethmosis; and, apparently, regards these Hyksos as the ancestors of the Israelites. It has sometimes been maintained that the story of the expulsion of the lepers is a truer version of the Exodus than that given in the OT; and some who reject Manetho's main story quote his names of persons and places. It is safer to regard his and other narratives as mere perversions of the hiblical account (Stade, Gesch. i. 128; Seinecke, Gesch. i. 80).

The Mussulman legends are partly imaginative but tedious expansions of the Bible narrative, probably known only indirectly; partly pure myths. Thus, when Moses struck the rock, twelve streams gushed forth, one for each tribe (Koran, ii.). Sura xviii. gives a story of the journey of Moses with el-Khidr, the Unknown, which reads like a section of the Arabian Nights. The numerous legends about Moses illustrate the fact that the Moslems recognize Moses, in common with Jesus and Mohammed, as a prophet and apostle (Koran, xix.).

Cf. CHRONOLOGY OF OT, EXODUS TO CANAAN, ISRAEL (HISTORY OF), HEXATEUCH, EXODUS, LEVITICUS, NUMBERS, DEUTERONOMY, ARK, TABERNACLE, AARON, and articles on the various persons, places, and things mentioned in Ex-Dt;

also Moses (Assumption of).

LITERATURE. - Commentaries on the Pentateuch, and sections

LITERATURE.—Commentaries on the Pentateuch, and sections referring to Pent. in the OT Introductions. Sections on Mosaic period in the Histories and OT Theologies cited in Literature under Israel (Histories and OT Theologies cited in Literature under Israel (Histories and OT Theologies of Kayser-Marti, Oehler (Eng. tr.), Pleponbring (Eng. tr.), W. R. Smith, OTVC? pp. 254-430. See also G. Rawlinson, Moses; Baker-Greene, Migration of the Hebrews.

A list of pseudepigraphal books ascribed to Moses is given in Charles' Assumption of Moses, pp. xiv-xvii. For the Jewish and Mohammedan legends see Stanley, Jewish Church, 1. 86-173, and art. Moses' in Smith's DB; also Koran, Suras Ii., vii., x, xviii., xix., xxx., xxvii. xb.; Gustav Weil, Biblical Legends of the Musulmans, tr'a as The Bible, the Koran, and the Talmud, and notes to Rodwell's tru of the Koran; d'Herbelot, Bibliothèque Orientale, Moussa ben-Amram; P. MOSES, ASSUMPTION OF.—The Assumption of

MOSES, ASSUMPTION OF .- The Assumption of Moses ['Ανάληψις Μωυσέως αp. Gelasius of Cyzicum (Mansi ii. 844)] is a Jewish writing originally composed in Hebrew or Aramaic early in the 1st cent. A.D. It is extant in a Latin translation preserved in a single palimpsest MS, which was discovered by Ceriani and edited by him in Monumenta Sacra et Profana, vol. i. fasc. i. pp. 55-64 (1864). The best edition is that of Dr. R. H. Charles (1897): his division of the text into chapters and verses is here adopted, and his edition quoted by its pages [e.g. 'Charles 87']

i. Contents (Historical allusions not expressly

\*An Alexandrian living shortly before the Christian era (Ewald, Hist. of Jer. tr. 4 ii. 85 n.).

† 'Otherwise unknown, but certainly still later than Choremon,' Ewald, op. cit. ii. 86.

named in the text are given in brackets).-I. In the year 2500 A.M., Moses, being 120 years old, the year 2500 A.M., Moses, being 120 years old, calls Joshua and appoints him to be his successor, at the same time giving him the books, which he is to bury carefully in a safe place. II. Joshua shall give the people their inheritance (1, 2): afterwards they will be ruled by chiefs and kings, and God will fix the place of His sanctury (2, 2). (3, 4), though the ten tribes will break off (5). But the people will fall into idolatry (6-9). III. Then a king from the East [Nebuchadnezzar] will burn their 'colony' [Jerusalem] and the temple, and will carry them captive (1-3). The ten tribes and will remember the warnings of Moses (4-13). They will be in bondage about 77 years (14). IV. Then a certain one [Daniel] will pray for them (1-5), and some of them will be allowed to return, though the ten tribes will remain among the Gentiles (6-9). V. At a later period the priests, 'slaves, sons of slaves,' will fall into idolatry and iniquity through the wicked kings who are over them [Antiochus and the Hellenizing Priests, such as Menelaus (2 Mac 4<sup>50</sup>)]. VI. Then will come kings calling themselves priests [The Hasmonæans], who also will work iniquity (1). These in turn are to be followed by a king not of the race of the priests [Herod], who will tyrannize over them for 34 years (2-6); his children will reign for shorter periods (7), and a powerful king of the West [Varus, governor of Syria, B.C. 4] will conquer them and burn part of the temple (8, 9). VII. Here the history ends and the predictions begin: first will come rulers who will be hypocrites, gluttons, tyrannical, impious, boastful, proud . . . (This chapter is much mutilated in the MS). VIII. Another visitation of wrath will descend upon them, and the 'king of the kings of the earth' will crucify those who confess their circumcision and give their wives to the Gentiles, and will make them carry unclean idols and blaspheme. IX. Then there will be a man of the tribe of Levi whose name will be TAXO [Eleazar (see below)], who will take his seven sons into the wilderness to fast for three days and then die, rather than transgress the law of the Lord of lords. X. Then the Lord's kingdom will appear, and the angel [Michael] will be commissioned to avenge the enemies of Israel (1, 2). The Most High will arise, while the earth trembles and the sun and moon are darkened, and He will punish the Gentiles; but thou, Israel, wilt be blessed and mount up to the heavens, and thou shalt see thy enemies on the earth,\* and shalt give thanks to thy Creator (3-10). But now Joshua is to keep these words safe: from the death of Moses to the Advent shall be 250 'times' (11-15). XI. When Joshua hears these words of Moses, he is much grieved. What sepulchre (he says) can be fit for Moses? How can I, Joshua, guide the 600,000 Israelites, or defend them from the Amorites, who will attack them when Moses is gone? XII. Moses then places Joshua in his own seat, and comforts him by reminding him of the providence of God . . . (Here the MS breaks off in the middle of a sentence).

ii. DATE.—It follows from the above analysis that the Assumption was written after Herod's death, but before any of his sons had reigned so long as their father, i.e. between B.C. 3 and A.D. 30. The most probable date is soon after the deposition of Archelaus in A.D. 6. (So Charles lvili, who also examines the views of other scholars).

iii. STANDPOINT AND TEACHING.—The value of the Assumption of Moses for modern students is expressed by the title of J. E. H. Thomson's work,

\* Or, according to Charles' conjecture, in Gehenna.

Books which influenced our Lord and His Apostles' (see Charles xxvii f.). The author is characterized by Dr. Charles as a Pharisaic Quietist. He was not a Sadducee, for he attacks the priests and expects a theocratic kingdom. He was not a Zealot, for he is significantly silent about the exploits of the Maccabees, and his ideal hero, Taxo [Eleazar], is one who will be passively faithful unto death. Nor was he an Essene, for he is keenly interested in the fortunes of the temple. 'He was a Pharisee of a fast-disappearing type, recalling in all respects the Chasid of the early Maccabaan times, and upholding the old traditions of quietude and resignation' (Charles li-liv). Hence he represents that tendency in Jewish thought which was most nearly allied to primitive Christianity.\* It is this which gives real interest to the investigation of the many critical difficulties

presented by the text of the book.
iv. The Latin Text.—The Milan Palimpsest (Bibl. Amb. c. 73 inf.), our sole witness for the text, appears to date from the 6th cent. † The Assumption occupies quire xvii, the preceding quires containing the unique fragments of the Latin translation of the Book of Jubilees (wh. see). But, though the whole volume is marked by peculiarities of writing and spelling due to the scribe, the two works were not translated at the same time or place, as is clear from the divergent renderings of Greek words. The Latin vocabulary of the Assumption includes aedes (vabs), arbiter (μεσίτης)‡, colonia (= 'a town')§, nuntius (ἄγγελος), pulam facere (ἀποκαλύπτειν), Summus ("Υψιστος), and transliterations such as acrobistia (= ἀκροβυστία), clibsis (θλίψις), scene (σκηνή). Important for the date is the rare use of secus for kard 'according to, parallels to which occur in Clem. Rom. lat 21, and in a non-Christian inscription found at Peschiera (CIL v. 4017).

The MS (which is often very hard to read) was transcribed by Ceriani with wonderful accuracy. I But the Latin itself is disfigured by many corruptions, mostly due to the carelessness of transcribers, e.g. ex tribus for patribus (i. 8), sub anulo for sub nullo (xii. 9).\*\* More serious are those which rest on mistakes in the underlying Greek. Dr. Charles has detected a notable instance in ii. 7, where adcedent ad testamentum Domini et finem polluent must correspond to προσβήσονται τη reading παραβήσουται την διαθήκην and δρκον (for δρον) we get the appropriate sense, 'they will transgress the covenant of the Lord and profane the oath.' No doubt there are cases of still deeper corruptions which arose in the original Semitic, but these are more difficult to discover and remove.

A full discussion of all the obscurities presented by the text as we have it would be impossible here: one point, however, must be noticed, as it affects the general understanding of the book. This is the interpretation of chs. viii. and ix.,

\*Comp., for instance, Mk 338 with Assump. xi. (tune parebit regnum [Dei] ... et tune Zahulus finem habebit).

† A rough facsimile of a couple of lines is given in Volkmar's edition of the Assumption, p. 153.

‡ So d₂ in 11e 016 (not elsewhere).

§ Cf. Clem. Rom. lat, p. 2011.

¶ This use of secus must not be confused with the late and vulgar use of secus for σαρά, e.g. secus mare Mt 131 in latt. own. (exc. afr.), examples of which are hardly found before the 4th cent. A.D. Secus for σαρά eccurs in Jubilees 1618 4918 etc.

¶ Only in four places have we found ourselves unable to follow Dr. Ceriani. We read aerobisam (not aerosisam), MS p. 67a12; tam (not tamp, p. 100a7; eum (not cum), p. 100a13; incut (not fineut), p. 100b7. The last word we take to be a mistake in the MS for sicut.

\*\* The obscure phrase in tempore tribum (iv. 0) seems to the present writer like a corruption of in tempore retributionis (or retribuendi): cf. Hos 97. In the same verse Schmidt-Merx and Charles have already recognized that natos is a mistake of the scribe for nationes. In the very corrupt clause at the end of viii. 5 suum looks like a mistake for suem.

VOL. III.—29

describing the 'second tribulation' of the Jews. As it stands, this section comes between the death of Herod and the final judgment, but the details of the persecution notably coincide with that which befell the Jews under Antiochus Epiphanes, a period which is very rapidly passed over in chs. v. and vi. owing to the author's dislike of the Hasmona ans. Dr. Charles, therefore, in his Notes to pp. 28-30, supposes that the section has been misplaced, and that its real place is between chs. v. and vi. But Theophany (ch. x.) comes in well after the story of the ideal saint Taxo (ch. ix.), but very badly after the description of the wicked priests and rulers in ch. vii. In the opinion of the present writer, the difficulty disappears if we regard the author of the Assumption as having filled up his Autior of the Assumption as naving and up in-picture of the final woes from the stories of the Antiochian martyrs. Dr. Charles himself says of ch. ix. (p. 34): 'Its purpose is to indicate the line of action which the Chasids or Pharisaic party of his own time should pursue. . . . It prescribes the duty our author would enforce on the Pharisaism of his own time. Just as his complete silence as to the Maccabæan uprising forms an emphatic censure of its aims, so his vigorous statement of the opposed and Chasid line of action is designed

as a commendation of its character.' The latter part of the above quotation refers especially to Taxo, who (as Dr. Charles points out, p. 35) has been evolved out of the story of Eleazar (2 Mac 6<sup>18st</sup>, 4 Mac 5<sup>3</sup>). His seven sons correspond to the seven sons of the widow (2 Mac 7), and his cave of refuge corresponds to those of the Chasids (1 Mac 168 281). Various unsatisfactory explanations of the origin of the name Taxo have been put forward: they are given in Charles 35 f. What has hitherto escaped observation is that Taxo itself, when put back into the original language of the book, is nothing more than a slightly corrupted cipher for Eleazar. All that is necessary is to read Taxoc for Taxo. The letter may have fallen out in the Latin of the Assumption, as in ore for orbe (xii. 4), or in the underlying Greek, as in δρον for δρκον (ii. 7). Now TAXOC in the Latin implies τα Σωκ in the Greek, and this in turn implies תכסוק in the Semitic original. This word means nothing as it stands, but if we take in each case the next letter of the Semitic alphabet, e.g. B for A, M for L, etc., we get אלעור Eleazar, the very name which of all others is most suitable.\*

Thus the future anticipated in the Assumption is

a period of triumphant wickedness and oppression; but just when the saints have given an example of passive endurance, at once most hopeless and most splendid, the Most High will Himself intervene and deliver His people.

v. THE END OF THE WORK.—The Milan Palimpsest breaks off in the middle of a sentence, and the question arises how much is lost. The purely internal evidence would suggest that very little is lacking. Moses has finished his prophecy and is about to die: there is nothing more to be said. With this also goes the fact that all the leaves of the quire containing the fragment of the Assumption are preserved. If the missing portion consisted of several whole quires and not merely a single leaf or pair of leaves, it is somewhat strange that the final quire of the extant fragments is intact.+

fragments is intuct. T
\* We know from the parable in St. Luke (10<sup>2007</sup>) that Eleazar (or, in the Greek form, Lazarus) is an appropriate name to give to the representative of the poor but plous Israelite. † The Stichometry of Nicephorus does not greatly help us to discover how much is missing at the end. The number of  $\pi \tau \chi s \tau$  there given for the  $\Delta \pi \lambda \lambda \lambda \gamma t = 18$ ,  $\pi \omega = -t.8$  1400. If this becorrect, about 1000  $\pi \tau \chi s \tau$  are lost, equivalent to 20 leaves; but as the number assigned to the preceding work on the list (the  $\Delta \iota \alpha b \theta \pi s \tau$  Mavoriar) is on any hypothesis corrupt, too much reliance must not be placed on the figures for the Assumption.

VOL. 111.-29

But a number of Greek patristic references (collected in Charles 107-110) indicate that the book was in circulation with an Appendix containing the dispute of Michael and Satan over the body of Moses after the latter's death, followed by his triumphant 'assumption' into heaven. A detail of this dispute is alluded to in the canonical Epistle of St. Jude (v.\*). Especially clear is a quotation in Gelasius of Cyzicum: 'In the book of the Assumption of Moses, Michael the archangel, disputing with the devil, saith, For from His holy Spirit we all were created. And again he saith, From before God went forth His Spirit, and the world was made." The formula of quotation is identical with that used by the same author (ap.

Mansi ii. 844) for quoting i. 14 of our Assumption. It is difficult to decide whether the Latin of the Assumption ever contained the Appendix. On the one hand, it is hard to imagine how the book could have reached a Latin-speaking community without the Appendix having been associated with it. Yet the work could only have been spoiled by the addition, and there is a certain improbability that the accidental loss of a couple of quires from the Milan Palimpsest should improve the artistic unity of the book. The interest of the Assumption as we have it is wholly taken up with the fate of the chosen people, present and future, but the Appendix is concerned with the personal fate of Moses.+

According to Philo of Byblus (ap. Euseb. Prap. Ev. i. 10 §§ 11, 12; cf. Lenormant. Origines<sup>2</sup> f. 540), there §§ 11, 12; cf. Lenormant, Origines<sup>2</sup>, i. 540), there was in the Phœnician theogony a god Eliûn, father of heaven and earth, who was slain in an encounter with wild beasts, and afterwards divinized (κατά τούτους γίνεται τις 'Ελιοῦν καλούμενος "Υψιστος, και θήλεια λεγομένη Βηρούθ, οί και κατώκουν περί Βύβλον, έξ ων γενναται Έπίγειος ή Αυτόχθων, δν ύστερον έκάλεσαν

\* From Mansi, ii. 867: ir βιβλίω δὶ 'Aναλήψιων Μωντίων Μιχαήλ ὁ ἀρχάγγιλον διαλιγόμινον τῷ διαβόλω λίγιν ἀπὸ γὰρ πνύματως ἀγου αὐτοῦ τὰντε ἰπτίσθημεν. παὶ πάλιγ λίγιν ἀπὸ γὰρ πνύματως τῷ διαβόλω λίγιν ἀπὸ τρὰρ πνύματως ἀγου αὐτοῦ τὰντει ἰπτίσθημεν. παὶ πάλιγ λίγιν ἀπο προσώπου τῶθιοῦ ἰξηλθι τὰ τνίμα αὐτοῦ, παὶ ὁ πόσμος ἰγέιντο. The second part of the quotation is not given by Fabricius and Charles.

† Perhaps we may take as a parallel the transmission of the Epistle of Barnabas. The concluding chapters in our Greek MSS (cls. 18-21) are taken from the 'Two Ways' or some such source, and these chapters are wholly wanting in the Latin.

‡ Eight out of these 17 Psalms are Korahite or Asaphite Paalms.

Οὐρανόν, κ. $\tau$ .λ.). The 'El'Elyōn of Gn 14 may stand in some relation to this Phoen. deity. El (God) was often distinguished by different epithets, bringing out different aspects of the divine nature, as in the patriarchal אל שור (Gn 17'), אל עולם, (21°3), אל עולם (33°), אל ביחאל (33°), אל אלהי ישראל (35°), את in the Phon. (CIS I. i. 8; Lidzbarski, Nordsem. Epigraphik, 419); and so the Canaanite has here his 'El' Elyōn. It may have been a deity whom Melchizedek recognized, in opposition to other inferior ones, as the highest, and in whose name, tradition told, he had blessed Israel's ancestor: the Israelitish narrator, not unnaturally, identifies him (v.22) with J". The statement, however, that a deity bearing this name was worshipped at 'Salem' has not, up to the present time (July 1899), received any confirmation or illustration from the inscriptions.

In the other passages quoted, the title seems In the other passages quoted, the three seems simply to give expression to the thought that J" is the God who is supreme,—whether over the earth, as ruler and governor of the world (cf. Ps 47<sup>2.8.9d</sup> 83<sup>18</sup> 97<sup>9s</sup> 90<sup>2</sup>), or over other gods (95<sup>8</sup> 96<sup>4.9</sup> 97<sup>9b</sup>; cf. also Cheyne on Ps 7<sup>18</sup>; Schultz, OT Theol. ii. 129 f; Smend, AT Rel.-Gesch. 470). Like 'God of heaven' (LOT 519, 6553), it is a title which was undoubtedly in frequent use in post-exilic times (Cheyne, OP, 26, +27, 41, +83 f., 164, 314, 464); but it may be questioned how far, except when found in combination with other indications, it can be used as a criterion for the date of a psalm. In its Greek form (see Hatch and Redpath's Concordance to the LXX, under ψμστος), it occurs in the Apocrypha, 1 Es 23 631 819.21 946, To 14+13+ 411,± Jth 1318, Est 1616, Wis 515+ 68+, Bar 420 (Λ), 2 Mac 321,± 3 Mac 6279; and with particular frequency in Ecclus.,—much more frequently indeed than the corresponding Heb. form occurs in the recently discovered Heb. text of this book. It is also frequent (as a title) in the Book of Enoch (see Charles' note on 998), the Apoc. of Baruch (see Charles on 171), and 2 (4) Esdras. In the Assumption of Moses it occurs 107. In Rabb. literature it is stated by Dalman (Worte Jesu, 162 f.) to be exceedingly rare.

In the NT the use of the expression is almost confined to St. Luke, the occurrences being Mk 57 = Lk 828 ( $vl\hat{\epsilon}$   $ro\hat{v}$   $\theta$ eo $\hat{v}$   $ro\hat{v}$   $\hat{v}$ , :  $ro\hat{v}$   $\hat{v}$ , om. in Mt 529), Lk  $1^{32}$   $+^{36}$   $+^{76}$   $+^{635}$  + (cf. Ps 826: not in the || Mt 546), Ac  $7^{48}$   $+^{1617}$ , He  $7^1$  (from Gn  $14^{18}$ ).

S. R. DRIVER. MOTE.—Mote is the word chosen by Wyclif and Tindale, and accepted by all the subsequent versions as the tr. of Gr.  $\kappa d\rho \phi o s$  in Mt  $7^{3.4.5}$ , Lk versions as the tr. of Gr. καρφος in Mit  $I^{a...a.}$ , Lik  $6^{41.42}$  bis. The root of καρφος is καρφω to dry up, and it signifies a bit of dried stick, straw, or wool, such as, in the illustration, might be flying about and enter the eye. In its minuteness it is contrasted by our Lord with  $\delta o \kappa \phi s$ , the beam that supports  $(\delta \epsilon \chi o \mu a)$  the roof of a building. The Gr. word does not elsewhere occur in Mt, and in LXX only in Gn 8<sup>11</sup> as the tr. of 779, the adj. applied to the olive leaf which Noah's dove carried; 'plucked off' is the Eng. translation.

The origin of the Eng. word 'mote' is unknown. It means any small particle, as Hall, Works, ii. 136, 'Our mountaines are but moates to God'; especially a particle of dust, as Chaucer, Wife of Bath's Tale, 12, 'As thikke as motes in the sonne-beame.' The use of the word by Wyclif and Tindale led to its early application in the same connexion: thus Barlowe, Dialoge, 73, 'Woulde

עליון 465. 5 475. 8 4820.

<sup>\*</sup> The combinations in AIIT 155 ff. are purely hypothetical.
† The title 'high priest of God Most High' given to John Hyrcanus (Rosh ha-shana, 18b), and Hyrcanus II. (Jos. Ant. xvi. vi. 2): see further, Geiger, Urschrift, p. 83 ff. On the Assumption of Moses, vi. 1 [not 17], cited O.P., p. 27, see, however, Charles, ad loc.
† In these passages standing as a title, alone.
† See 677 401 marg. 414 8 422 442.30 494 5014 18 17 (alone);

God they were as prest to remove the balk out of their owne eyes, as they be prompte to aspye a lytle mote in other men's'; and Lever, Sermons, 119, 'You of the laytye, when ye see these small motes in the eyes of the clargye, take hede too the greate beames that be in your owne eyes.

J. HASTINGS. **MOTH** ( $\psi y$  (ash).—The LXX tr. this word in Ps 38 (39)<sup>12</sup>  $d\rho d\chi \nu \eta$ , in Is  $51^8$   $\chi \rho \rho \nu \sigma$ , in Hos  $5^{12}$   $\tau a \rho a \chi \dot{\eta}$ , in all other instances  $\sigma \dot{\eta}$ s. There is no reason for these variations. The Arab. 'uth is the cognate form of the Heb. word. In the NT only is used (Mt 6<sup>19.20</sup>, Lk 12<sup>38</sup>). There are many species of the *Tineida*, or 'clothes' moths,' in the Holy Land. They are small lepidopterous insects, which commit immense havoc in clothes, carpets, tapestry, etc. In this warm climate it is almost impossible to guard against their ravages (Is 50°, Ja 5° etc.). 'He buildeth his house as a moth' (Job 27¹8) alludes to the frail covering which a larval moth constructs out of the substance which he consumes. 'Crushed before the moth' (Job 4<sup>19</sup>) refers to the way in which woollen stuffs are riddled by the larvæ of moths, until they become so fragile that they break down to powder at a touch (but see Dillm. and Dav. ad loc.). Moths are mentioned in Sir 19<sup>3</sup> 42<sup>13</sup>.

G. E. POST.

## MOTHER.—See FAMILY.

MOTION.—In 2 Es 614 'motion' is used loosely for 'commotion' (Lat. commotio). In Wis 511 the meaning is 'movement': 'As when a bird hath flown through the air, there is no token of her way to be found, but the light air being beaten with the stroke of her wings, and parted with the violent noise and motion of them, is passed through '(βία ροίζου κινουμένων πτερύγων ; RV ' with through' (βία holfor κινουμένων πτερύγων; RV 'with the violent rush of the moving wings'). Cf. Bacon, Essays, p. 176, 'In Beauty, that of Favour is more then that of Colour, and that of Decent and gracious Motion, more then that of Favour.' In Wis 7<sup>24</sup> 'For wisdom is more moving than any motion' (πάσης γὰρ κινήσεως κινητικώτερον σοφία; RV 'more mobile than any motion,' after Vulg. 'Omnibus cnim mobilibus mobilior'), the reference is to the speed of thought. Farra ently quotes Cowporspeed of thought. Farrar aptly quotes Cowper-

' How fleet is the glance of the mind! Compared with the speed of its flight, The tempest itself lags behind; And the swift-winged arrows of light.'

The only other occurrence of the word is in Ro 75 'For when we were in the flesh, the motions of sins, which were by the law, did work in our members, to bring forth fruit unto death' (τὰ παθήματα τῶν ἀμαρτιῶν, RV 'the sinful passions,' RVm 'Gr. passions of sins': this is Wyclif's tr. 'passions of synnes,' so also Rhemish NT; 'motions' comes from the Cos Ribband NT; 'motions' comes from the Gen. Bible). The word was often used by writers of the day in this sense of mental or by writers of the day in this sense of mental or spiritual impulse or agitation. It became almost a technical expression in Scotch Reformed religion. Thus Knox, Works, iii. 286, 'When I feele any taste or motion of these promyses, then thinke I myselfe most happy'; Livingstone (in Sclect Biographies of Wodrow Soc., p. 305), 'He [Robert Bruce] did goe on, and celebrated the communion to the rest with ward resistance. to the rest with such assistance and motion, as had not been seen in that place before'; Melvill, Diary, 16, 'Ther first I fand (blysed be my guid God for it!) that Spirit of sanctification beginning to work some motiones in my hart, even about the aught and nynt yeir of my age'; and p. 37, 'Onlie now and then I fand sum sweit and constant motiones of the feir and love of God within me. Cf. also Bacon, Essays (Gold. Treas. ed. p. 38), 'There is in Mans Nature, a secret Inclination, and Motion, towards love of others'; p. 52, 'He |

that standeth at a stay, when others rise, can hardly avoid Motions of Envy'; and Shaks, Jul. Cæs. II. i. 64-

' Between the acting of a dreadful thing And the first motion, all the interim is Like a phantasma or a hideous dream.'

In the Preface to AV 'motion' is used in the sense of 'proposal.' So Fuller speaks of Eliezer, Abraham's servant: 'Then concludes he, with desiring a direct answer to his motion.' Cf. Berners, Froissart, p. 208 (Globe ed.), 'And then he said to his cardinals: Sirs, make you ready, for I will to Rome. Of that motion his cardinals were sore abashed and displeased, for they loved not the Romans.'

In the Preface to AV occurs the verb to 'motion' 'In some Common-weales it was made a capitall crime, once to motion the making of a new law.'

Cf. Milton, Samson, 222-

'They knew not That what I motioned was of God.'

J. HASTINGS.

MOUNT.—The subst. The muzzābh in its only occurrence (Is 298, unless Jg 96 is another) is translated 'mount' in AV. The root of the word is [נעב] to set up, and means a mound or in-

| 1347 to set up, and means a mound or intrenchment (Cheyne), palisade (Kay), RV 'fort.'

Another word translated 'mount' is 7775 solellah,
Jer 6° 32° 33°, Ezk 4° 17¹7 21° 26°, Dn 11¹5. RV
retains the tr. 'mount,' but Amer. RV prefers 'mound' in all these places. Elsewhere this word is rendered 'bank' (2 S 20¹5, 2 K 19³, Is 37³3).
See BANK. Its root is 575 to cast up, heap up,

See BANK. Its root is 779 to cast up, neap up, and it means an earthwork or rampart.

The only other occurrence of 'mount' in the sense of 'mound,' 'intrenchment,' is 1 Mac 12<sup>36</sup> 'raising a great mount between the tower and the city' (6\psi\_0s, RV 'mound').

This Eng. word 'mount' meaning an earth-

work is the same as mount=mountain, and comes directly from Lat. mons, montis. Its use to describe an earthen defence seems due to confusion with 'mound,' a native word (Anglo-Sax. mund), which meant a protection or guard, and was used of a bodyguard of soldiers as well as a defence of earth or the like. The word 'mount' has gone out of use in prose. It has given up its own proper meaning of an elevation (same root as e-min-ere to be prominent) to 'mountain' (which came into English from Lat. not directly as 'mount,' but through the Fr. montaigne, montaine; Lat. montanus, 'hilly'). And it has restored the meaning of earthwork to 'mound,' from which that was borrowed. Its use in AV may be illustrated from Hakluyt, Voyages, ii. 122, 'They raised up mounts to plant their artillery upon'; Knox, Hist. 246, 'The English men most wisely considering themselves not able to besiege the Town round about, devised to make Mounts at divers quarters of it; in the which they and their Ordensee lev in eaged strength. they and their Ordnance lay in as good strength, as they did within the Towne'; and Bunyan, Holy War, 69, 'Besides, there were Mounts cast up against it. The Mount Gracious was on the one side, and Mount Justice was on the other. Further, there were several small banks and advance-grounds, as Plain-Truth-Hill and No-Sin-Banks, where many of the Slings were placed against the Town.'

J. HASTINGS.

MOUNT, MOUNTAIN (Heb. τσ; Gr. δρος; Celt. tor?).—In Dn 285. 45 the Aram. ταν tar is tra mountain.' The word τσ is also pretty frequently tra in AV 'hill,' as in Ps 26 and 6815. 16. In most of these instances RV has with advantage substituted the rendering 'mount' or 'mountain.' See, further, on this subject, and on the distinction between זה and aya, art. HILL. It is clear that the AV trans-

lators used 'mountain,' 'mount,' and 'hill' interchangeably. The distinction between these terms has never been clearly recognized, even down to the present day; and we cannot feel surprise that it was not so recognized by the translators of the Thus, if we take the word 'mountain' to signify a range or group of high elevations, we are met by the same word as applied to Moriah, a single elevated summit amongst the hills of Palestine, the scene of Abraham's intended sacrifice. elsewhere called 'the mount' (cf. Gn 222 and 2214). Yet, upon a general comparison of the passages in which these terms are used, it appears clear that the word 'mount' is more frequently applied to some specialized summit or elevation, such as Carmel (Jos 1920), Hermon (Jos 113), Sinai (Ex 192 et passim, except v. 9), and Seir (Dt 12), while 'mountain' is used to designate an extensive district of elevated ground, such as those of Moab (Gn 19<sup>30</sup>), South Canaan (Nu 13<sup>17</sup>), Gilboa (2 S 1<sup>21</sup>).

Amongst geographers, the terms 'mountain' Amongst geographers, the terms mountain and 'hill' are generally used as relative terms to designate the higher and lower elevations in special countries. Thus we apply the term 'mountain' to those of North Wales as being the highest elevations in S. Britain, though they are really lower in height than those of the Jura, which are generally called 'hills,' as being of less elevation than the neighbouring Alps. All that can be said on this point is that geographers have not settled the question at what elevation above the sea a 'hill' becomes a 'mountain.'

Origin.—Without entering at any great length

into the question of the mode of formation of mountains, which would be here out of place, it may be stated that in the great majority of cases they are referable to three natural modes of formation, namely (1) elevation, (2) erosion, and (3) accumulation: of these three modes we have

examples in Palestine and the regions around.

1. By elevation.—Many mountain ranges owe their origin to direct elevation en masse at various ancient geological periods, above the surface of the ocean, or the general level of the adjoining lands. Some of these have been upraised at successive intervals of time, and from very early periods have preserved their dominant characters. To this class may be referred the Scandinavian and Grampian ranges, that of North Wales, the Bavarian (or Hercynian) Highlands, and the Sinaitic group between the Gulfs of Suez and of 'Akabah. This last probably existed as a part of an extensive tract of continental land in Palæozoic times, and has maintained its dominant position down to the present day during the general submergence of the adjoining regions in the Cretaceous and Tertiary periods. The Alps and Pyrenees received their final and probably most important

upheaval in late Tertiary times.

2. By erosion.—In various parts of the globe mountain groups or ranges have been formed, owing to the erosion of valleys amongst previously existing tablelands. When the floor of the ocean has been upraised into dry land in the form of a plateau, consisting of approximately horizontal (or even inclined) strata, rain and river action sets in, owing to which channels of ever-increasing depth and breadth are eroded, thus carving the plateau into separate and independent mountain masses if the process is sufficiently prolonged. In this manner the great ranges of the Colorado in North America, the lesser group of Central and South Wales, the range of the Jura on the borders of Switzerland; and, in Eastern countries, those of Upper Egypt, Edom and Moab, and of Southern Judæa, have been formed. The Lebanon range owes its predominant position, with its culminating dome-like mass of Hermon (? Mount Hor, Nu 347. 8),

which formed the northern limit of the land given to Israel, to direct elevation followed by erosion. by which the deep valleys and ravines have been worn down through an original tableland in late Tertiary and post-Tertiary times. The range of Edom and Moab, stretching from the Gulf of Akabah to the shore of the Dead Sea, is doubtless originally due to the elevation of the Arabian tableland from the bed of the ocean along one or more lines of fracture (or 'fault') in the crust of the earth, but has subsequently been carved out into many distinct summits by river crosson at a period when the rainfall was more abundant than at present (see Arabah); and amongst these Mount Hor (Jebel Haroun), the scene of Aaron's death, is

the most conspicuous example (Nu 2025. 27).

3. By accumulation.—To this third class of mountains nearly all those of modern volcanic origin may be referred. During eruptions of volcanoes, either upon the surface of the land or upon the floor of the sea, molten lava is poured forth in sheets or streams from the throat of the crater in each case, together with solid blocks of lava, showers of ashes, and lapilli, which spread over the flanks of the mountain and adjoining tracts, and ultimately rise in piled-up masses to varying heights in the form of truncated cones or domes. The most familiar examples are the groups of Auvergne in Central France, and the isolated Mounts of Vesuvius and Etna. The regions adjoining Eastern Palestine present numerous examples of volcanic mountains. In the region east of the Upper Jordan, called in the NT Trachonitis, but now known as the Jaulan and Hauran, there are several distinct volcanic cones rising above the general surface of the country; \* and still farther eastwards, in the wild region of the Lejah, a grand range of volcanic mountains dominates the wide expanse of lava-fields of Bashan. Arabia, and were little known until brought to our knowledge by a recent traveller. Here, not far from the cities of Mecca and Medina, a group of volcanic mountains rises above the expanse of the Arabian Desert, from which lava-floes descend to the plain. In all these districts of Arabia volcanic action has long been extinct; perhaps even before the appearance of man.;

From the above account it will be seen that in strictly Bible lands we have representatives of mountain forms owing their origin to the various modes of natural operations which in past ages

have diversified the surface of our globe.

A few special biblical references to mountains may be noted. 'Mountain of God' (סר אַלהים) in may be noted. 'Mountain or God (1777% M) in Ps 68<sup>16</sup> is general = a God's mountain, indicating greatness or majesty. On the other hand, Sinai or Horeb is called 'the mountain of God' in a special sense (Ex 4<sup>27</sup> 18<sup>5</sup> 24<sup>15</sup>, 1 K 19<sup>8</sup>; cf. mount in Nu 10<sup>25</sup>). The 'mount of congregation' (RV: better, 'mountain of meeting or assembly, און in Is 14<sup>18</sup> refers to the dwelling-place of the gods, which the Babylonians located in the far north. See Congregation in vol. i. p. 466b. Mountains are frequently alluded to in connexion with theophanies; they melt at the presence of J", Jg 5<sup>5</sup>, l's 97<sup>5</sup> etc.; they are called on to cover the guilty from His face, Hos 10<sup>8</sup>, Lk 23<sup>80</sup> ||; they leap in praise of J", l's 114<sup>4, 6</sup>; they are called on to witness His dealings with His people, Mic 6<sup>2</sup> etc. etc. Mountains were resorted to as hiding-places in time of war, Jg 62, Mt 2418 ||; they were hunting-grounds, 1 S 2620; grazing-places for cattle, Ps 5010

<sup>\*</sup> G. Schumacher, 'The Jaulan,' PEFSt, 1866-1888.
† C. M. Doughty, Arabia Deserta, 2 vols. (1888).
† The age of these volcanic cruptions is discussed in the present writer's 'Physical Geology of Arabia Petres and Palestine,' PEF Mem. p. 98 (1886).

etc.; places of illicit worship, Is 657, Ezk 618; beacon stations, Is 30<sup>17</sup>; lurking-places for ambuscade, Jg 9<sup>25, 26</sup>. Mountains are typical of difficulties, Zec 4<sup>7</sup>. Their removal is spoken of by our Lord as a type of what is possible to strong faith, Mt 1720 ||. E. HULL.

MOURNING (אָנָה 'mourn'; אָנָה 'sigh or groan'; in Scripture is sometimes attributed in a figurative sense to Nature,—the withering of the pastures beneath and the blackening of the sky above, the wasting of the fruit-trees, and the destruction of the beasts of the field, of the fowl of the air, of the fish of the sea, being at once the effects of God's judgments upon her for man's sin and the manifestations of her sorrow and grief as the sharer of his punishment and misery (Jer 4<sup>28</sup>, Hos 4<sup>3</sup>, Jl 1<sup>10-12</sup>). In a like figurative sense it is attributed to nations, and especially to Israel, as when the prophet (Jl 18) summons the daughter of Zion to repentance, and bids her 'lament like a virgin girded with sackcloth for the husband of her youth'; or when, in a time of famine, Judah is said to mourn (Jer 142), and the people assembled at the gates are in deep mourning, and sit humbly on the ground; or when, again, it is predicted (Zec 12<sup>10-14</sup>) that, in the day of the outpouring of the Spirit of grace and supplication upon the house of David and the inhabitants of Jerusalem, 'they shall look unto me whom they have pierced, and they shall mourn for him as one mourneth for his only son, and shall be in bitterness for him as one that is in bitterness for his first-born' (RV). With a moral connotation, too, expressive of sorrow for sin, or distress for the miseries of the nation, it is ascribed to individuals, as to Daniel (102), to Ezra (10°), and to Nehemiah (1°), while Ahab in penitential mourning rends his clothes and puts sackcloth upon his flesh, and fasts like a man sorrowing for the dead (1 K 21<sup>27</sup>).

Mourning in the literal sense, as the expression of sorrow for the dead, appears in Scripture not only with all its ordinary natural manifestations, but also with the large body of conventional and formulated grief which usage had gathered round it among the Israelites as among other Oriental peoples. However ready to submit to the will of God without murmur or complaint, the Oriental is demonstrative in the social and public manifestations of his sorrow, and has reduced the expression of his grief for the dead to a system which tends to crush out natural feeling. In Jer 16<sup>6-8</sup> and Ezk 24<sup>16, 17</sup> together there is a fairly complete list of the mourning customs of Israel.

Weeping is the most general and most strongly marked expression of pain or mental emotion, and is the primary and, indeed, universal expression of mourning for the dead. This, like other manifestations of deep emotion, is more under control among civilized than uncivilized peoples, and more restrained among the staid and unimpassioned people of the West than the lively and excitable children of the East. 'Englishmen,' says Darwin (The Expression of the Emotions, p. 155), 'rarely cry except under the pressure of the acutest grief,' Egyptian funerals,' says Maspero (The Struggle of the Nations, p. 511),—and his description of Egyptian mourning finds frequent parallels among the Hebrews,- were not like those to which we are accustomed,—mute ceremonies, in which sorrow is barely expressed by a furtive tear: noise, sobbings, and wild gestures were their necessary con-comitants. Not only was it customary to hire weeping women, who tore their hair, filled the air with their lamentations, and simulated by skilful actions the depths of despair, but the relatives and friends themselves did not shrink from making an outward show of their grief, nor from disturbing

the equanimity of the passers-by by the immoderate expressions of their sorrow.' Of weeping for the dead the books of the Old and New Testament are full. It was considered unnatural not to weep for the dead. 'Weep for the dead,' says the Son of Sirach, 'so as not to be evil spoken of' (Sir 3817). Whatever the position of woman in the ancient Hebrew cult, there is evidence that mourning was performed both for women and by women. In proof that women were mourned for, we have the notices recorded in Genesis of the care and interest taken by the patriarchs in the burial of their wives. Isaac was comforted after his mother's death (Gn 24<sup>67</sup>); and grief for a mother was always bitter (Ps 35<sup>14</sup>). We have also Barzillai's words to David, 'Let thy servant, I pray thee, be buried in the grave of my father and mother' (2 S 19<sup>57</sup>). In NT times we have the case of Dorcas, around whose remains, in the short interval before interment, all the widows for whom she had done so much stood weeping (Ac 939). Abraham, as we have noted, wept for Sarah (Gn 232); Jacob when deceived by the report of Joseph's death (3735); Joseph for his father (501); the camp of Israel for Moses (Dt 348); David and his men for Saul and Jonathan (2 S 112); David at the grave of Abner, for the child of Bathsheba, for Amnon, for Absalom (3<sup>32</sup> 12<sup>21</sup> 13<sup>36</sup> 18<sup>33</sup>); the mothers of Bethlehem for their murdered innocents (Mt 2<sup>18</sup>); Josus at the grave of Lazarus (Jn 11<sup>35</sup>), where His weeping was restrained and silent (ἐδάκρυσε), and over the coming doom of Jerusalem (Lk 1941), where He wept aloud (ἔκλαυσε). Wailing is sometimes added to weeping, to express a deeper intensity of grief, as in the case of the mourners gathered in the death-chamber of Jairus' daughter (Mk 588, 89). Wailing like the jackals, and nourning as the ostriches (Mic 18), is expressive of the bitterest sorrow; and groaning like the bear, the dove, or the crane (Is 38<sup>14</sup> 59<sup>11</sup>), of a grief more restrained. Exclamations of grief were common along with wailing (Jer 22<sup>18</sup>, Am 5<sup>16</sup>, 1 K 13<sup>20</sup>). Vociferous grief, as Maspero points out above, was specially observativities of the Excitation. It was least as characteristic of the Egyptians. It was heard as a great cry in Egypt that night when all the first-born were stricken (Ex 1250), and it no doubt entered into the 'grievous mourning' which the Egyptians made for Jacob as they escorted the remains of the patriarch to his last resting-place in the cave of Machpelah (Gn 5011). Of such mourning a striking illustration is given (Ball, Light from the East, p. 119) from a wall-painting in an Egyptian tomb. In the funeral procession here represented, a master of the ceremonies, followed by eight women, precedes, and four men with long staffs follow the shrine; 'all making gestures of mourning by beating their breasts and their mouths while wailing (the interrupted sound has a peculiarly melancholy effect), or by throwing dust on the head.'

The excitable Eastern temperament, however, was not content with weeping and wailing and exclamations of grief. Beating the breast (Is 3212, but text dubious) was one of the commonest forms of lamentation. Beating the breast and the mouth, as we have just seen, was a feature of the mourning of the early Egyptians. The bewailing which accompanied the weeping for the daughter of Jairus (ἐκόπτοντο) probably included the beating of the breast (Lk 8<sup>32</sup>), and so also the lamentation (κοπετόν) made by devout men for Stephen (Ac 82). of Joseph it is recorded that he fell upon his dead father's face and kissed him (Gn 50<sup>1</sup>), although this is a solitary instance in Scripture. See art. KISS. Tamar is represented (2 S 13<sup>19</sup>) as laying her hand upon her head and going her way, crying as she went. To tear the hair and the heard (Ezr 93), to rend the clothes and put on sackcloth and filthy garments (2 S 3<sup>91, 92</sup>, Est 4<sup>3</sup>), to sit among the ashes (Job 2<sup>6</sup>), and to sprinkle earth or dust or ashes upon the head (2 S 13<sup>16</sup>, Rev 18<sup>16</sup>), were actions in which sorrow and grief more or less naturally or conventionally expressed themselves. To go bent as under a load (Ps 35<sup>14</sup> 38<sup>6, 7</sup>), to go barefoot and bareheaded and to cover the lips (Ezk 24<sup>16, 17</sup>, Mic 3<sup>7</sup>), were less demonstrative tokens of mourning. Mutilation of nose, brow, ears, hands is mentioned by Herodotus (iv. 17) as being practised by the Scythians in token of mourning for a departed king. Such mutilation was forbidden by the law of Moses (Lv 19<sup>28</sup>, Dt 14<sup>1</sup>), although we read of making bald the hair and cutting off the beard (Is 15<sup>2</sup>), and even of lacerating the body, as a sign of vexation and grief (Jer 41<sup>5</sup>). Among the Arabs it was customary in mourning, especially for the women, both to scratch their faces till the blood flowed and to shave off the hair; and it looks as if, in spite of the Deuteronomic prohibitions, similar practices had come into vogue among the Israelites (Driver, Deuteronomy, p. 136).

Fasting, more or less strict, seems to have been an invariable accompaniment of mourning, and mourners denied themselves recreation and other enjoyments. When it is said that the men of Jabesh-gilead fasted seven days in grief for the death of Saul and Jonathan (1 S 3118), we must suppose the fast to have been less strict than usual among Orientals, and that some food was allowed to the mourning people. From the Talmud (Baba Bathra, 16a) we learn that lentils were allowed during the period of mourning. It was customary for friends and neighbours after an interval to come and comfort the mourners and urge food upon them (2 S 12<sup>16, 17</sup>), and food was also distributed at funerals (Jer 14<sup>7</sup> RV, Ezk 24<sup>17</sup>, Hos 9<sup>4</sup>), especially to the poor (? Job 4<sup>17</sup>). 'The bread of mourners,' the bread partaken of by the nearest relatives of the deceased during the suppose the fast to have been less strict than by the nearest relatives of the deceased during the period of mourning, was accounted ceremonially unclean and defiling (Hos 94). It has been discussed whether this mourners' meal of the days of the prophets was not in some way connected with a funeral feast. The subject is obscure, but with a funeral feast. In esubject is obscure, but in Dt (2614) the Israelite, speaking of the tithe, is represented as saying, 'I have not eaten thereof in my mourning, neither have I put away thereof, being unclean, nor given thereof for the dead.' If we adopt the rendering 'for the dead,' the passage may be taken as pointing to the custom for the friends of the deceased to testify their sympathy with the mourning relatestify their sympathy with the mourning relatives by sending bread or other food for their refreshment, as we have just observed. If we render 'to the dead,' the passage would rather point to the widespread custom of placing food in the grave with the dead-a custom common among the Egyptians, and found among the later Jews in 'the messes of meat laid upon a grave' (Sir 30<sup>18</sup>). See the subject discussed in Driver, Deutcronomy, pp. 291, 292. That funeral feasts became an institution of later Judaism is clear, for Josephus (BJ II. i. 1) records that the custom of giving funeral feasts 'is an occasion of poverty to many of the Jews, because they are forced to feast the multitude, for if any one omits it he is not esteemed a holy man.' To this day it is a custom among the Jews to dispense alms with a liberal hand during the week of mourning in honour of the departed.

In a time of mourning it was a good custom to send messages of condolence to the bereaved (2 S 10<sup>1,2</sup>); and friends were wont to gather to comfort them in their sorrow (Jn 11<sup>19</sup>)—a custom which prevails to this day in Syria in the bands of mourners who assemble from neighbouring villages to ioin in the lamentations. Funeral orations

were common in later times. Elegies, as we learn from Scripture, were composed to be sung for the dead. David composed his well-known elegy to honour the memory of Saul and Jonathan (2 S 1<sup>17</sup>), and another for the gallant Abner (2 S 3<sup>38</sup>). Such an elegy was composed by Jeremiah for king Josiah, and the 'singing men and women' sang dirges for him, continued, as it would appear, through a course of years (2 Ch 35<sup>28</sup>). Of this character were the Lamentations of Jeremiah, called in the Talmud and elsewhere by the very name (http), 'elegies,' 'dirges,' full of the bitterness of grief, as they were, for Jerusalem destroyed by the Chaldwans. See LAMENTATIONS (BOOK OF), and, on the rhythm of such kinoth, POETRY. When a young person dies unmarried, modern Syrians make the funeral lamentation more pathetic by first going through some forms of a wedding ceremony.

The chief mourners naturally were the relatives of the deceased,—husband (Gn 23<sup>2</sup>), widow (Job 27<sup>15</sup>), father and mother (Mk 5<sup>38</sup>. 40), brother (Lk 7<sup>18</sup>), sons (Gn 25 et passim). Among the well-to-do it was common to hire professional mourners. They accompanied the dead body to the grave, moving onwards with formal music (cf. Mt 923), and singing dirges to the dead. They were both men and women. We have already noted the presence of both in Egyptian funeral processions, and, as has been just observed, they were 'singing men and women' that lamented Josiah. It is men skilful in lamenta-tion whom Amos (5<sup>16</sup>) summons to pronounce a dirge over the moral ruin of their country. It is men that are spoken of in Ecclesiastes (125) as the wailers that go about the streets. It was male flute-players that were present lamenting the death of Jairus' daughter (Mt 922). On the other hand, it is the women whose profession it was (מְּמֶלְנָנוֹת) to attend at funerals, and by their skilled lamentations to aid the real mourners in giving vent to their grief, whom Jeremiah has in view when he says, 'Call for the women who chant dirges, and send for cunning (Heb. 'wise') women that they may come' (Jer 917). They are still required for such service, and are skilful in interweaving family references and in improvising poetry in praise of the departed.

These professional mourning women are met with both in ancient and modern Arabia (Trumbull's Studies in Oriental Life, p. 153 ff.); and Maspero (Dawn of Civilisation, p. 684) mentions that among the ancient Chaldwans old women performed the office of mourners, washing the dead body, per-fuming it, and clothing it in its best apparel.

The period of mourning for the dead is variously given. The ordinary time, however, as we have already noticed, was seven days. All that was in a house or tent along with a dead body was unclean for seven days, and the bread which the mourners ate was, as we have seen, defiled. The period of mourning prescribed by Jewish authorities for a parent is a year. Of this time the first thirty days are considered the most important, and of these, again, the first seven are most stringently observed. The first seven days after a death are known as the Shiva, during which the mourners, as has already been indicated, are not permitted to cook anything for their own use, and are required to avoid all forms of amusement and recreation, not even listening to music. On hearing of the falsely reported death of Joseph, Jacob mourned for him many days (Gn 37<sup>34</sup>), and he himself in turn was mourned by the Egyptians threescore and ten days (Gn 50<sup>3</sup>), including, however, forty days of his embalming. Herodotus (ii. 86, 88) tells us that the Egyptians had seventy-two days of mourning for the dead. Joseph's own mourning for his father is said to have lasted seven days (Gn 50<sup>10</sup>). The children of Israel wept for Moses in the plains of Moab, as they had wept for Aaron when he died

upon Mt. Hor (Nu  $20^{20}$ , Dt  $34^{8}$ ). Of Judith it is said (Jth  $16^{24}$ ) that the house of Israel mourned for her seven days. 'Seven days,' says the Son of Sirach (Sir 2212), 'are the days of mourning for the dead; but for a fool and an ungodly man, all the days of his life. The prescribed period of mourning for a father and mother expires on the eve of the first anniversary of the death. The anniversary itself is invariably observed with strict solemnity by the Jews. It is said that hundreds of Israelites who profess none of the orthodox beliefs of Judaism, and recognize none of its ceremonial laws as binding upon them, yet keep this anniversary, attending the synagogue for the only time in the year, and distributing money among their poor and afflicted co-religionists. The scriptural instance afflicted co-religionists. The scriptural instance of commemorating the dead on the anniversary of their death is that of the daughters of Israel who went yearly to lament the daughter of Jephthan the Gileadite, and kept up the celebration four days (Jg 1140).

Zustand nach dem Tode.

T. NICOL.

MOUSE (יַנְּכְּרְ 'akbār,  $\mu \tilde{v}s$ , mus).—'The mice that mar the land,' of which the Philistines made golden images (1 S 6<sup>4-8</sup>), were probably the short-tailed field mice, or 'voles,' Arvicola arvalis, Desm., which are universal in Palestine. The kind of mouse that was eaten (Is 66<sup>17</sup>) may be the hamster, Cricetus phœus, Pall., which is edible. The mouse forbidden as food (Lv  $11^{29}$ ) is probably a generic or family name. See, further, Dillm. on Lv  $11^{29}$  and W. R. Smith,  $RS^1$  275. Tristram found 25 species of rats and mice, six of sand rats, three of jerboas, and four of dormice, in Pal. and Syria. Immense numbers of the warrens of these rodents are found even in the deserts. Their food is provided for them by the vast number of bulbs and corms of crocus, iris, squill, asphodel, cyclamen, erodium, etc.

On the question whether the mouse was anciently used as a symbol of pestilence, see J. Meinhold, Die Jesajaerzählungen, p. 34 ff. G. E. Post.

MOUTH (75 the commonest term, also 75 'palate,' 'roof of mouth'; Aram. D. Dn 481+5 t. in Dn; Tool of mouth'; Aram. as Dn 4°+5 t. in Dn; LXX and NT στόμα).—π5 pch, the ordinary Heb. word for 'mouth,' means also 'language,' 'corner,' 'edge,' 'skirt,' and any opening such as of a well Gn 29², sack Gn 42²¹, the earth Nu 16³⁰, a cave Jos 10²², grave Ps 141². π5 hēk, 'palate,' is used where the reference is to the sense of taste or to the interior of the mouth, as when the tongue cleaves to the roof of the mouth, Job 12<sup>11</sup> 20<sup>13</sup>, Ps 137<sup>5</sup>, Ca 7°, but in Hos 8¹ this is the word that is used in connexion with the blowing of the trumpet.

The way in which the Bible constantly uses the

organ of speech in the sense of 'language' is a conspicuous instance of its employment of the concrete for the abstract. Thus enforced silence is concrete for the abstract. Thus enforced silence is the laying of the hand upon the mouth, Jg 18<sup>19</sup>, Job 29<sup>3</sup> 40<sup>4</sup>, Mic 7<sup>16</sup>, Tit 1<sup>11</sup> (see Lip). So freedom of speech is the enlarged mouth, 1 S 2<sup>1</sup>, Ps 35<sup>21</sup>, Is 57<sup>4</sup>, Eph 6<sup>19</sup>. Similarly, to receive a message or be instructed as to what to say is to have words put into the mouth, 2 S 14<sup>3</sup>, Jer 1<sup>9</sup>. Humiliation is the mouth laid in the dust, La 3<sup>20</sup>.

In this figurative usage the final form is personifaction where the mouth is received as an inde-

fication where the mouth is regarded as an inde-

pendent agent, with feelings, purposes, and actions of its own. Thus it has free-will offerings to give Ps 119<sup>108</sup>, God is asked to set a watch before it Ps 141<sup>3</sup>, it selects its food Pr 15<sup>14</sup>, uses a rod Pr 14<sup>3</sup>, and has a sword Rev 19<sup>15</sup>. Such a familiar use of personification with regard to the lips, mouth, and voice would have an influence on the Jewish where would have an inheater on the news mind in the discussion of such subjects as 'The angel of the Lord' and 'The voice of the Lord' (bath-kbl), and would prepare the mind to apprehend the meaning of the word made flesh. See art. Logos.

G. M. MACKIE.

MOWING .- See AGRICULTURE.

**MOZA** (מלצא).—1. Son of Caleb by his concubine Ephah, 1 Ch 2<sup>46</sup> (Β Ἰωσάν, Α Ἰωσά). 2. A descendant of Saul, 1 Ch 8<sup>36, 37</sup> (Μαισά) 9<sup>42, 43</sup> (Β Μασσά, Α Μασά, Luc. Μωσά).

MOZAH (πόξη with art.; Β' Αμωκή, Α' Αμωσά). - -A town of Benjamin, mentioned next to Chephirah, Jos 1826. A possible site is the ruin Beit Mizzeh, close to Kulonich (i.e. Colonia), west of Jerusalem. The Heb. Tsade becomes the Arabic Zain in some stone. The modern name means 'house of hard stone.' There is a good spring at this site. (See SWP vol. iii. sheet xvii.; Buhl, GAP 167; Guérin, Judée, i. 262 f.). C. R. CONDER.

MUCH is used in AV with more freedom than we now permit. It is quite common, for example, we now permit. It is duite common, for example, with collective nouns. These are nearly always either 'cattle,' as Ex 1286 'And a mixed multitude went up also with them; and flocks, and herds, even very much cattle'; or 'people,' as Nu 2020 'Edom came out against him with much people.' But we also find 'much goods,' l.k 1216, and 'much alms,' Ac 102. Cf. Rhemish NT, Lk 102 'The hardstate the state of the vest truely is much, but the workemen few.

Again, 'much' is an adv. and qualities an adj. in Philem's 'Though I might be much bold in Christ' (πολλήν εν Χριστῷ παρρησίαν εχων), RV 'Though I have all boldness in Christ.' Cf. Pref. to Pr. Bk. 'Here you have an order for prayer . . . agreeable to the mind and purpose of the Fathers.' So Cranmer in Pref. to Great Bible, 'Concernyng two sundry sortes of people it seemeth much necessarie that some thyng be sayde in the entrie of thys booke by way of a Preface or Prologue'; and Udall's Erasmus' Paraphrase, fol. xxxiv. 'This disease [leprosy] emong the Jewes was counted muche abhominable, and is thought to be suche,

that no Physician can heale it.'
In the Pref. to AV 'much' occurs in the sense of 'nearly,' 'Much about that time.' The word is often so used by Shaks., as Meas. for Meas. III. ii. 242—'Much upon this riddle runs the wisdom of the world,' and IV. i. 17—'Much upon this time have I promised here to meet.' J. HASTINGS.

midst of a list of articles of female attire and adornment. The LXX, which, however, does not apparently include all the items enumerated in the apparently include all the Items enumerated in the Heb. text, perhaps tr. by τον κόσμον τοῦ προσώπου αὐτῶν; Vulg. has mitras. It is generally agreed that some kind of veil is intended (so Siegfried-Stade, Dillm., Del., Guthe [in Kautzsch's AT, 'Kopfschleier']). Delitzsch derives κίνχη from a root [γη], Aram. γη 'to be loose or flaccid,' 'to hang down or hang over loosely,' and pronounces the veil spoken of to be more costly and of better quality than the ordinary one worn by maidens, which is called yyy. Dillmann compares the Arab. ra'l (see also Mishna, Zabim, vi. 6, where is applied to the veils worn by Arab women), and

describes the veil in question as consisting of two pieces, one starting above the eyes and thrown back over the head and neck, the other beginning below the eyes and falling down over the breast. See, also, art. Dress in vol. i. p. 627b.

J. A. SELBIE. MULBERRY TREES (c)  $b \dot{c} k \dot{a}^{\dagger} im$ , κλαυθμών,  $\dot{a}$ πιοι, pyri).—1. The Heb. word is the name of a tree (2 S  $5^{23\cdot 24}$  = 1 Ch  $14^{14\cdot 16}$ ), to the identity of which we have no clue. From a confusion with the root קקה bākāh, 'to weep,' אַרְסָה מְּבֶּנְה 'the valley of Baca' (Ps 84") has been often trd 'the valley of weeping.' Neither of the LXX renderings supports the claim of the mulberry, κλανθμών signifying 'a place of mourning,' and ἄπιοι 'pear trees.' The tree is supposed by different writers to have been the balsam tree (so Oxf. Heb. Lex.), the poplar (Arab. shajaret el-bok, 'the bed-bug tree'), and the pear. Abu el-Fudli mentions a tree, with an Arab. name similar to běkā'im, which has been identified with Amyris or Balsamodendron. But this tree grows only in tropical countries, and could never have flourished in the Plain of Rephaim. There is no support to the tru 'mulberry' or 'poplar.' We support to the tru 'mulberry' or 'poplar.' must therefore be content to remain uncertain as to the identity of běkā'im, and it would perhaps be best to transliterate it. See, further, BACA (VALLEY OF).

2. Although it is thus probable that the mulberry is not mentioned in the canonical books of OT, the blood (juice) of the fruit of this tree ( $\mu\delta\rho\sigma$ ) is said to have been mingled with that of the grape (1 Mac  $6^{34}$ ), and shown to the elephants of Antiochus Eupator, to enrage them and excite them to war against the Jews.

3. The sycamine (Lk 176) is the 'black mulberry' (see Sycamine). G. E. Post.

MULE.—Three Heb. words are tr<sup>4</sup> 'mule' in AV. 1. \$\varphi\_{\gamma\_1}^{\gamma\_1} \text{ rekesh.}\$ This word (which is really a rare synonym of \$\varphi\_{\gamma\_1}^{\gamma\_1}\$ is \$\text{tr}^4\$ only twice in AV 'mules' (Est \$\varphi\_{\gamma\_1}^{\gamma\_1}\$, RV 'swift steeds'), once 'swift beast' (Mic 1\varphi\_{\gamma\_1}^{\gamma\_1}\$, RV 'swift steeds'), and once 'dromedaries' (1 K 4\varphi\_{\gamma\_1}^{\gamma\_2}\$, m. 'mules' or 'swift beasts,' RV 'swift steeds'). See Dromedary.

2. \$\varphi\_{\gamma\_1}^{\gamma\_2}\$ in \sigma\_1\varphi\_{\gamma\_2}^{\gamma\_2}\$ to something which Angle (where \$\varphi\_{\gamma\_2}^{\gamma\_2}\$) and (where \$\varphi\_{\gamma\_2}^{\gamma\_2}\$ in \quad \text{tr} \text{tr} \text{ for } \varphi\_{\gamma\_2}^{\gamma\_2}\$ in \quad \text{tr} \text{tr} \text{ for } \varphi\_{\gamma\_2}^{\gamma\_2}\$ in \quad \tex

3624), and refers to something which Anah (wh. see) found when feeding his father's asses in the desert of Edom. Mules would not have been a likely find in such a place. The LXX tr. it by τον 'laμείν, a proper name, showing that the signification was not understood. The Vulg. tr. it aquae calidar = RV 'hot springs.' Such springs exist at Callirrhoë and elsewhere around the Dead Sea. Callirrhoë is called by the Arabs Hamamim Sulciman='the hot springs of Solomon.' The springs below Umm-Keis (Gadara) are known as Ard el-Hamma='land of hot springs.' Yêmîm may be a dialectic modification of this local term. The Arabs attach great medicinal value to such hot springs, and such a discovery would be considered well worthy of record.

3. פְּרֶד peredh, o huloros, mulus. This is the common word for 'mule' in both AV and RV. It occurs once in the feminine פְּרָנָה pirdah, אָ אָשְוֹסיסs, mula (1 K 1<sup>23, 28, 44</sup>). Mules were forbidden (but see below) in the Levitical law (Lv 19<sup>19</sup>); but this, like many minor provisions of the law, was not in force in the era of the kings. David seems to have been the first to ride one, as also to introduce the horse (2 S 84), contrary to the previous practice of the people, and the sentiment reflected in the prohibition of Dt 17<sup>16</sup> (where see Driver's note). Mules became common during David's reign, and were ridden by his sons (2 S 13<sup>29</sup>). Absalom rode a mule in war (2 S 18°). Solomon rode one when he was proclaimed king (1 K 128). He received tribute in mules (1 K 1028). The subsequent monarchs kept them (18°). The Gentiles, riding on mules, are to honour Israel (Is 66°°). The Phœnicians imported them from Togarmah=Armenia (Ezk 27<sup>14</sup>). Mules are mentioned in Jth 15<sup>11</sup>. They are still used as riding animals by high functionaries. The Governor-General of the province of Beirût often goes to the scraglio on his spirited and sure-footed mule. The late Governorspirited and sure-footed mule. The late Governor-General of Lebanon, Rustem Pasha, had a very fine riding mule, which he much preferred to a horse. Mules were also used as beasts of burden (1 Ch 1240, 2 K 517). A good pack-mule brings a much higher price than a pack-horse. He is longerlived, much surer of foot, and will carry a heavier burden. In the later days of the Heb. State, the law against mules (which may have been interpreted as forbidding the breeding but not the use; see Dillm. on Lv 1919) seems to have been quite disregarded, as so strict a legalist as Ezra allowed his returning people to bring 245 of them from Babylon (Ezr 265; see Ryle's note). They are now G. E. Post. universally used in Bible lands.

MUNITION is used in AV in the orig. sense of the Lat. munitio (from munio, to fortify), a fortified the Lat. munitio (from munio, to fortify), a fortified place of defence, a stronghold or entrenchment. The places are Is 297 'all that fight against her and her munition' (πρίγς), RV 'her stronghold,' which is Coverdale's word); 3316 'his place of defence shall be the munitions of rocks' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Nah 2¹ 'keep the munition' (so RV, Heb. מקוקס); Naher. RV 'fortress'); 1 Mac 14¹⁰ 'Heb. αφισάς εν σκεύεσω δχυρώσεως; RV 'furnished them with all manner of munition', RVm 'Gr. implements of munition'); also marg. of Dn 11¹¹¹⁵. 83. 39. Cf. South, viii. ser. 5, 'No defence or munition can keep out a judgment. 'No defence or munition can keep out a judgment, when commissioned by God to enter.' This meaning of the word is retained in AV from the Geneva Version; in 1611 the commoner meaning was that of the Fr. munition, i.e. military stores, provision for an army or fortress. Thus Shaks., K. John, v. ii. 98--

'What penny hath Rome borne, What men provided, what munition sent, To underprop this action?'

J. HASTINGS.

MUPPIM (1935). — A son of Benjamin, Gn 46<sup>21</sup> (Μαμφείν), called in 1 Ch 7<sup>12, 15</sup> 26<sup>16</sup> Shuppim (1937), in Nu 26<sup>39</sup> Shephupham, and in 1 Ch 8<sup>5</sup> Shephuphan. The proper form of the name can hardly be determined. See Bell and Vittal (1947) be determined. See Ball and Kittel (on Gn and Ch in SBOT) and Dillm. on Nu 2639. See, further, separate articles on the above variant forms.

MURDER.—See CRIMES AND PUNISHMENTS, vol. i. p. 522a.

MURRAIN.-See PLAGUES.

MUSHI (ψhp, in 1 Ch 64 ψhp).—A son of Merari, Ex 619 ('Ομουσεί), Nu 320, 1 Ch 619 [Heb. 4] (B' Ομουσεί, A 'Ομουσί), 647 [Heb. 82] (B Moσεί, A 'Ομουσί), 2321 (B' Ομουσεί, A Μουσί) 22 (B Μουσεί, A Μουσί) 24:8 (B' Ομουσεί, A Μουσί) 24:8 (B' Ομουσεί, A Μουσί). The patronymic Mushites (ψhp) occurs in Nu 333 2658 (Β ο Μουσεί, Α ο 'Ομουσί).

i. Occasions when used.
ii. Nature of Hebrew music.
iii. Musical instruments.
1. Stringed: (a) the kinnör; (b) the nebel;—the terms gittith, 'diāmōth, neytnöth; (c) the stringed instruments named in Dn.

2. Wed (a) the highly a dates the terms notes and

Wind: (a) the hātā or flute;—the terms neķeb and neḥtlāch; (b) the 'ugab; (c) the mashrökthā; (d) the symphonia; (e) the shöphār or ţeren, the horn; (f) the hāzōgērāh or trumpet.

Percussion: (a) the toph or tabret; (b) the meziltaim or zelzelim, cymbals; (c) the mena an im; (d) the shalishim.

Literature.

-The most cursory i. Occasions when used .glance at the books of the OT shows the devotion of the Hebrews to the art of music. It is unlikely that it was so predominantly a sacred art as would at first sight appear from the Bible. The sacred writers look at everything more or less from a religious point of view; but we have quite sufficient evidence that music was loved by all classes of the people, and was practised in the home and in the fields. The favourite instruments had been invented long before the institution of the national religion and its ceremonies (Gn 421); Laban the Syrian was aggrieved that Jacob had stolen away without the usual song of leave-taking (Gn 3127); and Job (2112) refers to the performance of music as a common feature in an unsophisticated prosperous life (cf. Nu 2117). In the headings of some of the psalms we have probably traces of popular secular songs: thus Ps 45 is to be sung to the tune of 'The Lilles,' 60 to that of the 'Lily of the Testimony,' Lilies, 60 to that of the lany of the lete. We have references also to vintage songs etc. We have references also to vintage songs (Is 65<sup>8</sup>; cf. title of Ps-57. 58. 59. 75), which would not always be as sacred as Isaiah's (Is 5), and to music performed at feasts (Am 6<sup>9</sup>), and at processions (1 S 18<sup>6</sup>). Wherever there was a at processions (1 S 18°). Wherever there was a dance, or wherever two or three joined together in some common occupation, the movement would suggest rhythm, and rhythm melody. Dancing suggest rhythin, and rhythin mosay. and music emerged spontaneously, and were practiced together under all sorts of conditions. The tised together under all sorts of conditions. kinah or wailing song was also familiar to the Hebrews. See LAMENTATIONS (BOOK OF).

But the consecration of music to the service of religion led to its being developed and cultivated with greater zeal and earnestness. Even if we cannot accept all the details in the statements of the historical books, at least as applying to the dates to which they are referred, they are not altogether valueless. We may allow for exaggerations in respect to figures, and we must transfer descriptions of the worship in the first temple to that of the second, but the tradition reveals the fact that sacred music was raised by the Israelites to the dignity of an art, and was

treated accordingly.

It is in Chronicles that we have the fullest account of the musical arrangements in the temple service. According to 1 Ch 15<sup>16-24</sup>, David organized the Levitical chorus and orchestra. Heman, Asaph, and Ethan (? Jeduthun) were appointed chief conductors (under the king himself), giving the beat with their cymbals; seven Levites played on nebels על עלמות, i.e. of a high pitch (?; see p. 460<sup>b</sup>), while six accompanied on kinnārs, whose description is quite uncertain (מִיִּרְיִשְׁרָּיִּלְ, lit. 'on the eighth'). The whole of the choristers and players were divided into 24 classes, and are said to have been 4000 in number, with 288 leaders. Even the name of the director of the choral rehearsals is given. Although such minute details must be unhistorical, one feature is probably correct for all periods of the history, i.e. the large proportion of experts (בּנְינִים) compared with pupils (בּנְינִים) The whole of these forces were employed to add extraordinary impressiveness to the ceremonies at the consecration of Solomon's Temple (2 Ch 5<sup>12</sup>).

After idolatrous kings had occupied the throne, Hezekiah and Josiah made it an important part of their task to restore 'the instruments and songs of David.' Among the exiles who returned from Babylon, and took part in consecrating the foundations of the second temple and the walls of Jerus., were the descendants of the great Levitical choristers (Neh 1227), and in vv. 45-47 we

are informed that from that time divine service was regularly performed as instituted by David. the people contributing the necessary support for the singers.

ii. NATURE OF HEBREW MUSIC. - We know nothing whatever of the nature of the music performed by these singers and players. What ancient instruments have been preserved have either been too frail to admit of being handled, or have refused to emit any sound. Besides, even if we could reproduce the ancient harps and flutes, etc., we should require to know the method of blowing or of tuning them. Nor can we learn anything from the music still performed in the synagogues. It is possible that the trumpet-calls now in use originated at an early date, but that does not take us far. The hymn-tunes are certainly comparatively modern, and their composi-tion shows traces of the country and period in which they have originated. Of a musical notation there is no trace. Much ingenuity has been lavished on the attempt to interpret the accents from a musical point of view. It has been suggested that they were signs of musical phrases, or that they were even a kind of figured bass; but these are only far-fetched guesses. Not only were they of late origin, but their purpose was wholly different. They are guides to the proper recitation or cantillation of the text. Even to this extent they do not furnish any reliable information as to ancient usage: meant to preserve tradition, they are themselves subject to tradition, and are interpreted differently in different synagogues.

Under the circumstances, it is possible to form only a very general and vague idea of the character of Hebrew music. It was evidently of a strident and noisy character. The melody was apparently often reduplicated in octaves. Harmony in our sense of the term was almost certainly unknown, though it does not follow that the accompaniments were wholly unisonous. It is hardly possible to conceive of players on harps and lyres not adding something of the nature of a chord. They could not fail to discover that certain notes produced a pleasing effect when played together or in arpeggios. The psalms show by their construction that they were intended to be sung antiphonally,—in some cases (e.g. Ps 13, 20, 38 etc.) by two choirs, in others by a choir and the congregation, the part taken by the latter being limited to the singing of a simple constantly recurring phrase or refrain (e.g. Ps 136. 1181-4). The leaders would possess the tradition of the music, and would impart it to the general body of the chorus.

The psalms must have been chanted, but it is most unlikely that the chants bore any resemblance to what we understand by the term. Our irrational and exceedingly artificial method of rushing over any number of syllables on a fixed note would hardly commend itself to a people to whom their sacred songs formed a living expression of their deepest feelings. The elaborate provision made for instructing the chorus suggests the existence of a system, which, along with a certain uniformity, admitted of some flexibility in its application. We can quite well imagine a chant which would allow of a greater number of notes being used in the longer verses, and which would vary slightly in character with the changing sentiment of the text. In point of fact, however, this is wholly conjectural, and the vocal method of the Hebrews is a lost and unknown art.

iii. MUSICAL INSTRUMENTS .- We know a little more about the instruments employed by the Hebrews. It is true that the OT, while it contains numerous references to them, gives us no definite information as to their form or construc-tion, and that this defect is not supplied by the

existence on Jewish ground of any sculptures or pictures, such as have been found in Egypt or Assyria. It is also true that the inferences drawn from etymology, the translation of Heb. names in the Greek versions, the statements of the Church Fathers, and the records of ancient nations, fall very far short of affording us definite and precise information, and have given rise to an endless diversity of opinion on almost every detail. Yet in spite of this we can form a general idea of the nature of a Jewish orchestra, and of the construction of the instruments of which it was composed. We consider them under the usual division into String, Wind, and Percussion Instruments.

1. Stringed Instruments.—Of these the kinnōr and the nebel (RV 'harp' and 'psaltery') are the most important, and may be described as the favourite national instruments. The kinnōr is indicated as having been the older, and is said to have been invented by Jubal, the second son of Lamech (Gn 4<sup>21</sup>). It is the only stringed instrument mentioned in the Hexateuch. The nebel first occurs in 1 S 10<sup>5</sup>, where it is found among the instruments played by the prophets who met

Saul.

There is now a general consensus of opinion that these were species of the lute or lyre and the harp, but there is no agreement as to which was which, and many scholars have given up the attempt to distinguish between them, contenting themselves with describing the various instruments to which the names may have been applied. In any case, even if we attempt to reach greater precision, we must admit that we come very far short of certainty, and that a considerable proportion of our conclusions is more or less conjectural.

Before trying to distinguish them, however, we may note certain common features. They were mainly, if not exclusively, used to accompany vocal music. They were par excellence the voltage (Am 6°). They are said to have been the sole accompanying instruments in the temple service, though this is doubtful. Their use was associated principally with joyful and exultant strains (the captives hung up their kinnors in their time of dejection, Ps 137°), but it is perhaps straining poetical language unduly to confine it exclusively to those.

In 2 Ch 9° it is said that the nobel and kinnor

In 2 Ch 9<sup>11</sup> it is said that the nebel and kinnōr under Solomon were constructed of almug or algum, a wood which it is impossible to identify with any certainty, but which was at all events very valuable and much sought after (see art. ALGUM TREES, and Cheyne and Hommel in Expos. Times, viii. 470, 525). According to Josephus (Ant. VIII. iii. 8), the framework was fitted with electrum, i.e. either a mixed metal or amber, which in any case could have served only for decorating the body of the instrument. The strings (0.32) were originally made of twisted grass or plant-fibres, then of gut, and in later times of silk and metal.

(a) The kinnōr (קנור, a mimetic word derived from the rustling sound of the strings) has been identi-

fied with a number of instruments: the tanbur or tinbur, a kind of guitar; the lute (al-'ood), which is closely allied to the guitar; the trigon, a small, easily portable triangular harp; a large harp provided with 47 strings; and the lyre. We can at once delete several of these if we remember the hints given in the OT. The kinnör was portable; it was played during marches and processions, and was hung upon the willows by the Babylonian captives. It was therefore not a harp of the larger sort. As against the view that it was a trigon, it is urged that the latter could not have been the favourite instrument of a people so musically gifted as the Jews. It was small, and from its construction weak in tone, and would have contrasted unfavourably with the larger and fullertoned harps and citterns which intercourse with other nations had rendered familiar. The guitar or lute, again, is open to several objections. It is not known to have been current among Semitic nations in early times. We have a representation of one lute-shaped instrument in Nineveh; it has a small oval body and a very long neck, exactly like those depicted in Egypt; but this one example, most probably derived from Egypt, does not furnish adequate support for the theory that the lute was familiar to the Semitic peoples, and may therefore have formed the model of the kinnōr. Besides, it is hardly conceivable that such a slim long-necked instrument could have been easily portable, and a favourite for processional music.

But the strongest evidence we have for the nature of the kinnõr is to be found in the LXX. The translators, except in a very few cases, render the following by  $\kappa\iota\theta d\rho a$ , or by  $\kappa\iota\nu i\rho a$ , which is explained by Greek writers as equivalent to  $\kappa\iota\theta d\rho a$ . Unless we suppose that the LXX wrote in utter ignorance of the shape of the kinnõr, this fact is decisive against either the lute or the harp. It would have been impossible for even the most careless or inexpert writer to confound the lute with its long neck and finger-board, or the harp, with the kithara or the lyre. It is probable that the kinnõr presented differences from the kithara, but it is unnatural

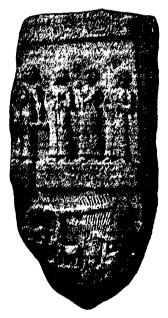

PLAYING THE LYRE. (Middle Empire).

to suppose that these should have been so great as to make the rendering of the LXX wholly inappropriate.

Now numerous lyre-shaped instruments, i.e. instruments with resonance-body at the base, side arms of wood, and cross-bar at the top from which the strings descend to the sound-box, or string-holder resting on it, are found on the monuments.

A very ancient one is depicted in an Egyptian tomb, and dates from the 12th Dynasty. It represents a Semitic immigrant with an eight-stringed kithara, which he holds in a horizontal position under his right (?) arm; he plucks the strings with the fingers of the left hand, while he uses a plectrum with the right. The body of the instrument is really a quadrangular-shaped board with the upper half cut out. There is also a picture of a player on the kithara, accompanying two harpists, in a grave at Thebes belonging to the period between the 12th and 18th Dynasties. Here, again, we have the ruder form characteristic of the Semitic kithara. Later the kithara becomes quite common, and is more artistically constructed. It generally has a square, sometimes an urnshaped sound-box, from which rise arms of various design and thickness, bound together by a wooden cross-bar. These arms are often of different lengths, and the cross-bar therefore slopes downwards, thus serving to give the strings their proper pitch. The strings radiate from the sound-box in the form of a fan and vary in number from 3 to 12.

The kithura was, however, not properly an Egyptian but an Asiatic instrument. We have already seen that the oldest known to be depicted in Egypt was played by a Semitic immigrant. The very earliest representation of a stringed instrument is that discovered at Telloh in Southern Babylonia. It is of a large size, but the frame shows a sound-body beneath, on which are set the

HARPER AND CHOIR. (c. B.C. 3000).

two upright posts and the cross-bar of the lyre. The number of the strings is great enough to suggest that a harp was meant, but the model, which is exceedingly rude, is that of the kithara. Many specimens have been also found at Khorsabad, Kouyunjik, and Nimrud, which strongly resemble those of the immigrant Semites in Egypt. They are, however, more fully developed and have a larger sound-box at the base. They differ in form and in number of strings at the same period. A twelve-stringed kithara, shown on a bas-relief at

Khorsabad, is remarkable for its rectangular form and the exceptional fulness of its sound-box.

The evidence of Jewish coins also points to the similarity of the kinnör to the kithura or lyre. The representations of instruments found on them

are unmistakable. The strings are fixed in a strong oval body resting on a kettle-shaped or vase-like sounding-box; the frame is simple and nearly square. The projecting arms are curved and joined by a cross-bar to which the strings, which vary in number from 3 to 6, are fixed. The figures thus resemble the Greek lyre or kithara. It is not likely, however, that they simply depict foreign importations, and that they cannot therefore be relied upon as evidence for the ancient kinnör. Oriental conservatism was at its strongest in matters affecting the cultus of the Israelites, and though the kinnör may have been modified in certain details, it is unlikely to have been wholly supplanted. We may assume with great probability that these coins represent Jewish instruments, and in that case the biblical kinnör.

We may then sum up, following Weiss. The ancient versions render kinnor by kithara: the kithara was of Asiatic origin, was introduced by Semites into Egypt, and was in common use in Western Asia; and the representations on Jewish coins of the 2nd cent. before Christ clearly resemble the Greek kithara. The view is therefore very credible, that we should regard the ancient Heb. kinnor as a simple and primitive form of the kithara.

(b) The nchel. If we suppose the kinnor to have been a lyre, then it almost necessarily follows that the nchel was a harp. We can hardly imagine this instrument, so familiar to all early nations, to have been absent from the Jewish orchestra. Many other suggestions have been made, mostly based on the etymological meaning of the word (52; 'a skin or bottle'). It has been identified with the bagpipe, with some sort of wind instrument, and with the lute, guitar, or mandoline; but none of these suppositions is satisfactory. The lute was held to be supported by reference to the Egyptian nfr, which denotes a lute with two or three strings and a very long neck; but the identification of nbl with nfr is now abandoned, and the lute, as has been said, is not known to have been a popular Semitic instrument. A somewhat more likely supposition is that the nebel was a kind of dulcimer. This instrument occurs in a monument of the time of Assurbanipal (B.C. 668-626), on which is depicted an Assyrian orchestra of 11 performers. Of these, one a dulcimer player. This dulcimer is said by some to have been the nebel, the chief reason being that its Arabic name, santir, is a corruption of the Greek psalterion, which in turn is the equivalent of the Heb. nablion or nebel. But psalterion was a

general name for several kinds of instruments, and was especially applied to every stringed instrument which was played upon with the fingers

ASSYRIAN DULCIMER. (c, b,c, 610).

of both hands, instead of by one hand and a plectrum held in the other. Therefore the Greek name for a harp was also psatterion. The Greek

PRIEST PLAYING HARP, (Tomb of Ramses III.),

translation does not, therefore, decide in favour of the dulcimer, and the very fact that psatterion was a generic term would make it particularly appropriate as a designation of the harp, which varied so much in size and shape. That a corruption or derivative should be applied to a stringed instrument of another kind is quite intelligible. The description of the nabla by Ovid (Ars. Am. iii. 327), the statement by Josephus (Ant. VII. xii. 3) that the nebel had 12 strings and was played without plectrum, and, as we shall see, the distinction drawn by the early Fathers between instruments with a sound-body below and those having a resonance-board above the strings, all point to the harp.

the harp.

The Egyptian monuments present us with a great variety of harps. The earliest form shown is very primitive; it is in the shape of an archer's bow, possesses no sound-box, and has but a limited number of strings. As early as the 5th Dynasty, however, improvements began to be effected; the upper part, to which the strings were affixed with pegs, was broadened and developed into a sound-body, and the frame began to be more or less elaborately ornamented. While playing, the musi-

cian knelt, and the frame rested on his shoulder. As time advanced, harps were still further developed. The lower part of the frame was converted into a sound-body, which was broadened at the base so that it could rest on the ground unsupported by the player. Some harps were placed on a stool, or raised upon a stand or limb attached to the lower part. The players of these large instruments stood during the performance. While we cannot deny the possibility or even the probability of the Hebrews having been familiar with such harps, they were not the common or nounter schol. which were easily nortable

probability of the Hebrews having been familiar with such harps, they were not the common or popular nebels, which were easily portable.

Now, smaller portable harps did exist in Egypt in a great variety of forms. One is how-shaped with a transverse string-holder; a second has a quadrangular flat-shaped sound-box pierced with holes, while the strings are stretched from a string-holder resting on the sounding-board to a postrising at right angles from one end of the latter; and a third, ornamented with a bird's head, is quite triangular, the upright post being at once string-holder and sound-box. Another instrument is very common in Upper Egypt. It resembles a mandoline, with the neck bending abruptly upwards from the sound-body; the strings, which are from three to five in number, are not attached to the body of the instrument itself, but to a string-holder attached to its centre. At the upper end of the neck are pins for stretching and tuning the strings.

We might have regarded one or other of these smaller harps as furnishing the model of the nebel

EGYPTIAN HARPS.

but for one fact. They all have the sound-box at their base. But we have already come to the conclusion that the kinnör had its resonance-body beneath; and if we are to follow the description given by the Fathers (Augustine on Ps 42, Jerome

ASSYRIAN HARD.

on Ps 1498, Isidore Etym. 111. xxii. 2), who distinguished between instruments with the sound-body beneath and those possessing it above, we must look for a harp that satisfies the latter condition. And this we find, again among a

Semitic people, in Assyria. On the bas-relief at Kouyunjik there are seven of these harps. They are portable, are triangular in shape, and are supported by a belt worn by the player. The resonance-frame slopes upwards and forwards from the ance-frame slopes upwards and forwards from the player and is pierced by holes, and the strings descend from it to a bridge or string-holder beneath which they fall. The performer plays while marching, using both hands without plectrum. While, of course, certainty is out of the question, this Assyrian harp seems to satisfy the requisite conditions best, and is most likely to have been the biblical nebel.

It is highly probable that there were different It is highly probable that there were different species of kinnōrs and nebels, but whether these are designated in the OT or not is unknown. In one case this is almost certain. The אַבּל עֲשׁוֹר Ps 33² and 144°, or simply איש Ps 92³, was in all likelihood a ten-stringed harp.

The meaning of the word אַבּל (Gittith) in the headings of Ps 8. 81. 84 is wholly obscure. The LXX and Vulg. suggest the rendering 'Song of the vintage': but it may be derived from Gath. and

vintage'; but it may be derived from Gath, and may refer to a mode, or singers, or instruments named after that town. Ewald understands it to be 'the March of the Gittite guard.'

The meaning 'Gittite instruments' is rendered not improbable if we translate אל־שֵלְעוֹ (1 Ch 15<sup>20</sup>) not improbable if we translate מלאיני (I Ch 15<sup>w</sup> and 46 times in Ps) with Wellhausen on Elamite instruments.' This term is, however, more generally taken to mean with women's voice' (lit. on or acc. to damsels'; RV 'set to'' איז as name of a tune, which is quite possible), i.e. soprano, and to refer to instruments of a higher pitch.

Neginoth (רוֹיִיתוֹ) has sometimes been taken to denote a particular kind of instrument, but it is a general term for string music. In Ps 6825 we have contrasted with יְנְנִים, i.e. the singers with the

players.

(c) This division of the orchestra is supplemented by instruments which occur only in the Book of Daniel (3<sup>ad</sup>.). These are the  $psant\bar{e}rin$  (מְּחַכְּים), the kitharis (מְּחַכִּים), and the sabbekha (מְּחָבְּים). The  $psant\bar{e}rin$  is the Greek  $\psi a\lambda r \eta \rho c o \nu$ , and that is all we know definitely about it. It has been identified by some with the magadis, but this is itself only a general term for an instrument (most commonly, however, a lyre) which could be played in octaves; and with a dulcimer because of the retention of the word in the Arabic santir. But psantērin may just as well have kept its original force, and have denoted a harp played with both hands. There is nothing to lead us to identify it with the dulcimer represented on Assyrian monuments. The kitharis

is the Greek  $\kappa \iota \theta d\rho a$ .

The  $sabbekha \ddagger$  is the Greek  $\sigma a\mu \beta i\kappa \eta$ . But the sabbuca is itself a word of very varied import. Stainer (Mus. of the Bible, p. 39) concludes that it was a large and powerful harp of a rich quality of the property is in the property of tone, perhaps similar to, if not identical with, the great Egyptian harp. Weiss (Mus. Inst. p. 67) goes to the opposite extreme, and holds that it was a small trigon characterized by a high shrill tone, and used to accompany female voices. Chappell (Hist. of Mus. p. 255) summarizes the various meanings given to the word in Greek writers: it was ings given to the word in Greek writers: it was either a trigon, a barbitos or many-stringed lyre, a byrophæniæ or Phænician lyre, a Greek lyre, a magadis, a pipe, a dulcimer, or a siege-ladder; in short, anything made of elder-wood. It was not, however, a 'sackbut,' i.e. a trombone.

2. Wind Instruments.—(a) Of these the one in most general use was the flute or half (195n). It

most general use was the flute or halil (חליל). It has been denied that it was ever used to accompany

\* In Dn 35. 10. 15 the word is spelt בָּמָנָמָרִין, in v. 7 מָּמָנְמֶרִין. † Dn 35. 7. 10. 15, Kethibh Danp, Kere Danp (as in Targums). ! Baer reads #DDD.

sacred song, but this is very doubtful. In 1 S 10<sup>3</sup> and 1 K 1<sup>3</sup> it is played in descending from and ascending to the High Place, and its tones accompanied the festal processions of pilgrims from the country (Is 30<sup>20</sup>). In the second temple it was played before the altar on twelve days: the day of Passover, the first and that of killing the second Passover, the first day of unleavened bread, Pentecost, and the eight days of the Feast of Tabernacles (Erachin ii. 3, Succah v. 1). While the singers required to be Levites, other distinguished Israelites might perform on the instruments. The flute was also used at marriage feasts and funerals: in the time of Christ, even the poorest were expected

to provide two flautists at a funeral.

Flute-like instruments date from the very earliest Finte-like instruments date from the very earliest times. From the first, two kinds are met with—the long flute, played by blowing in one end and held straight before the player, and the oblique flute, played by blowing in a hole at the side. Both these kinds are depicted on the Egyptian monuments. Double flutes are also shown in the Egyptian and Assyrian monuments, they were Egyptian and Assyrian monuments; they were probably preferred as giving the performer a greater range or compass. The material of which flutes were made was at first the reed, then wood of various kinds, and lastly bone and ivory.

Wood-winds were of two kinds: those with and

those without reeds or vibrating tongues. those without feets of violating tongues. The former are represented by the oboe and clarinet, the latter by the flute proper. From specimens found in Pompeii and elsewhere it is known that the Greeks were familiar with reed instruments, the Greeks were familiar with reed instruments, especially those provided with a single tongue, and therefore of the clarinet class. If we are to trust the evidence of ancient myths (cf. legend of Apollo and Marsyas), the Greeks owed this instrument to the Phrygians, who may have acquired the double

flute from the Assyrians.

Whether the halil was a single or double flute, Whether the hall was a single or double flute, or a flue or reed pipe, we do not know. It is certain that the Hebrews had every opportunity of becoming acquainted with all these kinds, but we have no information on the subject. In any case, the number of notes was limited to those produced by stopping the holes with the fingers, as the keyed

It has been held by some that nekeb (15; Ezk 28<sup>13</sup> AV and RV 'pipes') designates the double flute; but this is inconsistent with the context, and is altogether erroneous. A. B. Davidson renders the word 'grooves.

Again, něhîlôth (נְחִילוֹת) in the heading of I's 5 is

a term of very uncertain meaning.

(b) The 'ugab' (any or any) is a somewhat uncertain term. The LXX renders the word variously,  $\kappa\iota\theta\delta\rho\alpha$  (Gn  $4^{21}$ ),  $\psi\alpha\lambda\mu\delta$ s (Job  $21^{12}$   $30^{31}$ ), and  $\delta\rho\gamma\alpha\nu\rho$  (Ps  $150^{4}$ ). It is not a general term for a musical interaction of the contraction of the instrument (δργανον), as we can see from the context. Some writers think it to have been a syrinx or Pan's pipe, others a bagpipe. But we have really no evidence in support of either view. If means to blow in (which, it must be confessed, is pure conjecture), then the noun would denote wind instruments in general, and this gives a good sense in all the above passages. Thus Jubal (Gn 4<sup>21</sup>) is the inventor of string and wind instruments, and in Ps 150 minnim and 'ugab represent the same divisions of the orchestra.

(c) Mashrökithā (מְּיִרְיּמְיֹּרֶטְיֹי is another of the instruments mentioned in Dn (35. 7. 15). The name is derived from a verb meaning to hiss, and is therederived from a verb meaning to his, and is deter-fore applicable either to the oblique flute or Pan's pipe. Of course the hissing effect is more pro-nounced in playing the syrinx, and it is most probably the instrument meant.
(d) The symphonia (¬,,,,,,,,,,) is also mentioned in Dn (3<sup>5, 15</sup>) alone. The Greek συμφωνία, from which

this word is derived, did not originally denote an instrument, but a concordant interval. Tradition applies it to the bagpipe. Originally the form of this instrument may have been developed from the double flute, one of the pipes being shorter and being used for the melody, while the longer furnished a droning bass accompaniment. We are told by Athenaeus (Lib. x. p. 439) that Antiochus Epiphanes used to dance to the sound of the symphonia. To this day the Italians have a bagpipe called zampuqua or sampogna, and a chifonic or symphonic was an instrument of the same class used in the Middle Ages. In Rome this instrument was introduced in the time of the Empire under the name of thia utricularis or chorus, and soon became highly popular. Seneca (Ep. 76) is indignant at the applause bestowed on a bagpipe player.

(c) The horn (אָשׁ shūphār, אָשְּׁ keren; AV trumpet, and so confused with haṭūz̄krah except where they occur together, when אַשׁ is rendered cornet [see Driver, Joel and Amos, p. 146]) originally consisted of a ram's horn. It was afterwards sometimes made of metal, but the actual ram's horn was always retained for certain purposes. It had a loud piercing tone, was of limited compass, and was wholly unsuited to concerted music. It was used to summon the people to attention, and for making signals. The first mention of it in the OT is at the giving of the law (Ex 19). Its blasts proclaimed the year of Jubilee (Lv 25°). The 'blowing' (אַפְאָדָא), commanded in Nu 29), was probably performed on the shūphār, as it is still employed at that festival. It was also blown at the feast of the New Year and on fastdays. In time of war the shūphār summoned and assembled the army (Jg 3³ā and often), and the prophet foretold that it should announce the recall of the people from exile (Is 27¹³).

MODERN SHÖPHÄR

The shōphār is retained in the service of the modern synagogue: it is blown during the services on New Year's Day (except when that happens to be a Sabbath), at the conclusion of the Day of Atonement, on the 7th day of the Feast of Tabernaeles, and during the entire month of Elul, after the recital of the supplications. The modern shōphār is a real ram's horn, curved at the end, but otherwise straightened by heat.

(f) The trumpet or hazázérah (57826) is the only Heb. instrument of which we have an indubitably

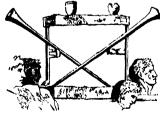

TABLE OF SHEWBREAD AND TRUMPETS. (From Arch of Titus).

authentic representation. On the Arch of Titus two specimens are depicted along with the golden Table of Shewbread. Some little difficulty has been caused by their not tallying perfectly with the description given by Josephus (Ant. 111. xii. 6). He says that the trumpet (assira) was nearly a yard long, a little wider than a flute, with a slight expansion near the mouthpiece, to eatch the breath, and ending in a bell, just as in the wartrumpets. This description corresponds with the form of trumpet shown on a coin of the time of the emperor Hadrian, which bears the inscription of the emperor of Jerusalem.' The instruments on the Arch of Titus, of which we do not see the mouthpiece, are very long, being supported by rests, and gradually swell out into a long and not very wide bell. See, further, Trumper.

The Silver Trumpets are said to have been

The Silver Trumpets are said to have been made by Moses of beaten silver (Nu 10<sup>2</sup>); they were blown by priests; and they belonged to the sacred vessels. The nature and meaning of the signals is indicated in Nu 10<sup>2-10</sup>.

3. Percussion Instruments.—(a) The toph (τ) or tabret is first mentioned in Gn 3127. The LXX and other Greek versions render this word by τρμπανον; in Arab, we have duf, in Spanish aduffa. This instrument was a small hand-drum. The duf of the Arabs is made of a circle of light wood, over the edge of which is stretched a piece of goat-skin. The wood is pierced with five openings, in which thin metal discs are set, in order to give greater effect to the drum-beat. The duf is about 10 in. in diameter, and 2 in. in depth. It is usually played by women to accompany their dances and processions at weddings and public festivals.

The hand-drum is frequently represented both in Egyptian and Assyrian monuments. Some-

ASSYRIAN HAND-DRUM.

times we have an approach to the modern use of the drum. In some cases it is attached to the player by a belt fastened round his waist, while his hands act as drumsticks. One form of this instrument is slightly bulged, like a little barrel. Perhaps the rudeness of the drawing alone accounts for its somewhat square appearance.

The modern Egyptian tabls are of two kinds. The one is like our common military drum, but not so deep; it is hung obliquely. The other is a kind of kettledrum, of tin-copper, with a parchment face; it is generally about 16 in in diameter, and not more than 4 in depth in the centre, and is heaten with two slender sticks.

beaten with two slender sticks.

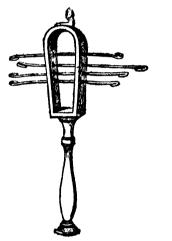

(b) Cymbals are mentioned in the OT under two names, mexiltaim (Dry 2) and zelzelim (Dry 2); the latter only occurs in 2 S 6° and Ps 150. In Zec 14° the RV translates from the by 'the bells of the horses,' but there is no absolute necessity for departing here from the commoner rendering. The Egyptians at the present day decorate the breastleather and head-stalls of their horses with coins and other ornaments, and a metal disc would be better suited for inscriptions than a bell. The word used elsewhere for a bell is prop. In 1 Ch 1519 we are told that cymbals were made of brass.

Two varieties of cymbals have been found in

Egypt and Assyria: the one similar to a modern soup-plate, but having a somewhat larger rim; the other conical in form, with a handle at the peak. The flat cymbals have a hole through which a thong or cord was passed, and were played by clashing the instruments together sideways: of the second kind, the one was brought down on the top of the other. In Egypt, Greece, and Rome, as well as among the Hebrews, the cymbals were used by the conductor to mark the time.

It has been supposed that the צלצלי שמע of Ps 150° (AV 'loud cymbals') were castanets, or metal discs fixed to two fingers of one hand; but this is by no means certain, though such castanets are still used.

(c) The měndan'im (בענענע) are mentioned in 2 S 6°, where the RV renders 'castanets,' and in marg. sistra. The latter suits the root-meaning,

EGYPTIAN SISTRUM

and is supported by the Vulg., where we have systra. The sistrum consisted of two thin metal plates, bent together at the top, and fitted with a handle at the bottom. The plates were pierced with holes, through which rods were passed having rings at their ends. This instrument was used in Egypt to call attention to the various acts of public worship, or to scare away malign influence.

rings at their ends. This instrument was used in Egypt to call attention to the various acts of public worship, or to scare away malign influence.

(d) The word  $sh\bar{a}lishim$  ( $\mathfrak{D}\psi^{\flat}\psi^{\flat}$ ) occurs, evidently as an instrument of some sort, in 1 S 18°. It can hardly mean a trigon (but see Wellhausen, 'Psalms' in PB 230, and references in Driver, Joet and Amos, 236 n.); but what it does mean we do not know. We have no evidence of the existence of the triangle (to which it has been referred) in Assyria or Egypt.

**MUSTARD** ( $\sigma l \nu a \pi \iota$ , sinap i s).—The conditions to be fulfilled by the mustard are that it should be a familiar plant, with a very small seed (Mt 17<sup>20</sup>, Lk 17<sup>6</sup>), sown in the earth, i.e. annual, growing larger than garden herbs ( $\lambda d \chi a \nu o \nu$ , olus, Mt 13<sup>81</sup>),

having large branches (Mk 4<sup>32</sup>), or, in the more exaggerated language of Luke (13<sup>19</sup>), becoming a 'great tree,' attractive to passing birds. The wild mustards of the Holy Land, Sinapis arvensis, L., the field mustard or charlock, and S. alba, L., the field mustard, are familiar weeds, growing in every part of the country. They would have been called σισαπι in the time of Christ, as they are now called khardal=sinapis. The cultivated mustard is Sinapis nigra, L. The seed is well known for its minuteness. The plant grows to a size larger than the garden herbs, with which it is compared. The mustards are annuals, reproduced with extraordinary rapidity wherever the seed finds a lodgment, a particular which seems to be implied in the parable. In fat soil they often attain a height of 10 or 12 ft., and have branches which attain a far less size than these are called shajar='tree' by the Arabs. One of the many examples of this is in the plants of the Borraginaceous genus Arnebia, which are only a few inches to a foot in height, but are known as shajaret el-arneb='the rabbit tree.' It would not seem at all strange to any native to speak of a mustard plant as shajaret el-khardal='mustard tree.' Finally, they are favourites of the birds, which alight upon them to devour their seeds. The Greek word κατσσκήνωσεν does not refer to nesting, but to a temporary rest. We may, then, justly conclude that the traditional and obvious of the passage.

Owing to the expression 'great tree' (Lk 13¹²), some have sought for an arboreal plant. Salvadora Persica, Garcin, has been suggested by Royle, on the authority of Ameuny, who states that this plant is found all along the banks of the Jordan, near Damascus, and is called by the Arabs khardal = 'mustard.' We unhesitatingly reject this plant for the following reasons. (1) It is not found in the localities mentioned, but only around the Dead Sea. It would have been quite unknown to most of the hearers of the parable, and to them only by chance. (2) We have not heard it called khardal, and doubt the fact of its being generally known by this name. But, admitting that it is known locally by this name, as attested by Ameuny, it would not have suggested itself at once to the simple hearers of the parable. (3) Its seed is never sown in gardens, while it is expressly stated that the mustard seed was so planted (Lk 13¹²). (4) It is a perennial shrub, and therefore not a plant conspicuous by its rapid propagation from seed, a point of prime importance in the parable. (5) Although a taller plant than the mustard usually is, it would not suit the literal requirements of a 'great tree.' It is a shrub, seldom more than 6 to 8 ft. tall, and grows in thickets. It would require as much exaggeration to call it a 'great tree' as to so designate the mustard. (6) Salvadora Persica could, by no stretch of the imagination, be called an herb, while of mustard it is expressly said that it is μεῖον τῶν λαχάνων, 'the greatest among herbs' (Mt 13³²). G. E. Post.

MUTH-LABBEN.—See PSALMS.

MUTILATION. — See CRIMES AND PUNISHMENTS, vol. i. p. 525<sup>b</sup>.

MYNDUS (Μόνδος) was a city of Caria, situated on the extreme western extremity of the peninsula on whose southern coast lies Halicarnassus. It plays very little part in ancient history; and its only importance seems to have lain in the silver mines beside it, which were worked in ancient and in mediæval times. From them the site de-

rives its modern name, Gumushli. It was one of the places to which letters in favour of the Jews were sent by the Romans about B.C. 139, 1 Mac 15<sup>23</sup>; cf. DELUS, Cos, CNIDUS, HALICARNASSUS. This fact proves that Myndus must have been a self-governing and independent city at that time, and not one of the cities of the Carian confederacy; see CARIA. It also shows that Jews went there, and the silver trade would naturally attract persons with their financial instincts. On the site, see Paton in Journal of Hellenic Studies, 1887, p. 66; 1896, p. 204.

MYRA (Μύρα or Μύρβα), a city of Lycia.—The name is used in neuter plural, Ac 275, where, however, many authorities have feminine singular. The same doubt between neuter plural and feminine singular exists in Ac 211, where the Western Text adds after Patara και Μύρα, et deinde Myram; some MSS Μύραν in Acta Pauli et Theclæ, 40 (but some MSS Mepav in Acta Pauti et Thecte, 40 (but εν Μύροις, al.); the form in Strabo p. 666 and Ptolemy v. 3, 6, is Μύρα, of doubtful gender and number: but Pliny Nat. Hist. xxxii. 2, 17, Ptolemy viii. 17, 23, use the plural form; Atheneus ii. 53, p. 59, CIG 4288, and Basil Epist. 218, have εν Μύροις: the Byzantine lists frequently have gen. Mipow, probably never Mipos. Many late writers, Theophanes pp. 465, 483 (de Boor), Glykas p. 587, Basil Sel. Vit. S. Theclæ, i. p. 272, Cedrenus pp. 511, 512, Zonaras iii. p. 589, use the plural form; and Malalas varies, p. 365 τη Μυρα, p. 448 τὰ Μυρα. Constantine Porph. de Them. i. p. 36 avoids the name, but says it is called from the sacred  $\mu\nu\rho a$  (suggesting thus the reason why the Christian writers preferred the neuter plural form); Stephanus mentions that both the feminine and the neuter forms were in use; but there is hardly any authority for  $M \nu \rho a$  fem. sing. in any case except accus.; and even there it is inferior. The literary form therefore was certainly  $\tau \delta$  Mé $\rho \alpha$ , but there was evidently also a popular form την Μύραν (with which compare Λύστραν - Λύστροις Ac 146.8 161.2, Clupcam-Clupcis Wölfllin's note on Cæsar Bell. Afr. 3, 1), which has given rise to the modern Dembre. In the words where double declension exists, the tendency to acc. sing. fem. and plural in other cases is marked.

Myra was not one of the greatest cities of Lycia in the Greek period, but rose to importance under the Empire, and became the capital of Lycia under the Byzantine Empire and in the ecclesiastical organization. The reason for its growth lay in the development of navigation. In the older system of sailing by hugging the coast from point to point, Myra was merely one out of many coast towns, and had nothing to give it special importance. But as the bolder method became common of running direct between the Lycian and the Egyptian coasts, keeping off Cape Akamas, the western point of Cyprus, the two harbours that were found most convenient were Myra at the north end of the course and Alexandria at the south. There had been an immense development of trade between the East Ægean coasts and Egypt under the Ptolemies (compare Paton-Hicks, Inscriptions of Cos, p. xxxiii): under the Roman rule Egyptian export trade was diverted towards Italy and Rome (which was to a considerable extent fed on Egyptian grain). As the prevailing wind in the eastern Mediterranean is westerly, the corn-ships for Rome could not make a direct voyage towards the west, but had to use the protection of the irregular coasts of Asia Minor and Crete and the local coastwinds. For that purpose they must either take the long circular course round the Syrian coast, or sail direct across to Lycia; and the steadiness of the western winds tempted to the direct crossing.

Examples of this direct course, showing that it

was regarded as quite usual, are—(1) the Alexandrian corn-ship (Ac 27%) for Rome, which St. Paul found in Myra, Ac 276; (2) an ideal voyage, founded, of course, on contemporary facts, is described in Lucian's Navigium s. Vota.: an Italian corn-ship, sailing from Alexandria, sighted Akamas on the seventh day, but the strength of the west wind prevented it from clearing the cape, and it had to run for the Syrian coast (Cyprus offering no harbours, but only open roadsteads); in ten days from Sidon the ship reached the Khelidonian Islands east from Myra (compare St. Paul's fifteen days, according to the Western Text, from Cæsarea to Myra), and afterwards it failed to keep the proper course in shelter south of Crete (Ac 277), and ultimately on the seventieth day from Alexandria took refuge in the harbour of Pireus, where its great size attracted many visitors, and gave the opportunity for Lucian's Dialogue; (3) Gregory Nazianzen, sailing from Alexandria direct for Greece, ran across the Parthenic Sea (the Levant, defined by Ammianus xxii. 15, 2, as another name for the Issiac Sea), till he came near Cyprus, 'and under Cyprus cut the wave in a straight course for Hellas' (Carmen de vita sua 128 fl., Orat. xviii. 31); he set sail in November, and apparently took twenty days to Rhodes (Carmen de rebus suis 312).

The maritime importance of Myra continued into the Middle Ages. Tomaschek quotes from the pilgrim Sawulf the description of it as portus Adriatici (i.e. the eastern half of the Mediterranean, compare Ac 27°7) maris, sicut Constantinopolis est portus Ægæi maris.† The town by the harbour, strictly speaking, was Andriake, while Myra was 20 stadia or 2½ miles inland; but commonly the port town is called Myra. It was a well-protected harbour; but storms in the neighbourhood are mentioned, such as that which destroyed the Arab fleets in A.D. 807 (Theophanes, p. 483, de Boor); compare others mentioned in Acta S. Nicolai (under Constantine), and in Lucian's Navigium at the Khelidonian Islands.

As Myra was at one end of an unusually long sea-course, the sailors paid and discharged their vows there to the deity that protected their course. The ancient name of this deity is not known: Tozer, in a note to Finlay's History of Greece, i. p. 124, suggests Poseidon. The Christians put in his place St. Nicolas, who was bishop of Myra under Constantine; and that saint became the great sailors' patron for the Levant, as St. Phocas of Sinope was for the Euxine. According to the story, Nicolas was born at Patara and buried at Myra; and the pilgrim Sæwulf touched at these two ports on his return from the Holy Land, just as St. Paul did in the Western Text of Ac 21.

See the descriptions in Benndorf Lykia, Spratt and Forbes, Beaufort, Fellows, Leake, Texier, etc.; Tomaschek Historische Topographie von Kleinasien im Mittelalter (Wien. Akad. Sitzungsber. 1891); Ramsay St. Paul the Trac. pp. 208, 319.

W. M. RAMSAY.

MYRRH.—Two words in Heb. are rendered in AV 'myrrh.' 1. 12 miδr. The LXX tr. it variously:  $\sigma\mu\delta\rho\rho a$  (Ex 3028 etc.),  $\kappa\rho\delta\kappa\nu\rho\sigma$  (Pr 717 B),  $\sigma\tau\alpha\kappa\tau\eta$  (Ca 118 etc.). The Arabs call it murr. It is a gum resin from Balsamodendron Myrrha. Nees, a shrubby tree, which grows in Yemen and the adjacent regions of Africa. The leaves are ternate, with obovate, obtuse leaflets, denticulate at tip, and the fruit ovate, smooth, somewhat larger than a pea. Murr occurs in pieces of irregular form, composed of more or less agglutinated tears, usually covered with the dust caused by their attrition. The colour varies from pale reddish-yellow to red or reddish-brown. The

<sup>\*</sup> ίδα τὰν Κρήταν διξιὰν λαβοντας, κ.τ.λ., Lucian, l.c. † The same passage is referred to in vol. ii. p.

odour is balsamic, and the taste bitter and acrid. Myrrh is astringent, stimulant, and antiseptic. is used in medicine as an astringent and emmenagogue, and its powder is an ingredient of many dentifrices. The tincture is used in gargles, and the powder as a stimulant to foul and indolent ulcers. It was one of the gifts of the Magi (Mt 2"). It was used as a perfume (Ps 458, Pr 7", Ca 118 55), for the purification of women (Est 212), for embalming (Jn 1939), and as an anodyne (Mk  $15^{28}$ ).

2. τ) lôt, στακτή, stactc. This Heb. word is the same as the Arab. lâdhan or ladhân, and the Gr. λήδανον or λάδανον, Lat. ladanum or labdanum. This is a resinous exudation of various species of Cistus ('rock rose'), particularly C. villosus, L., which grows abundantly along the coast and in the mountains of Syria and Palestine. It is a low shrub, of the order Cistinæ, with pink, rose-like flowers, in umbel-like cymes. The leaves are elliptical to obovate-oblong, and more or less wavy. A drink like tea is made from the somewhat aromatic leaves. The exudation is sometimes collected from the beards of goats. In Cyprus men with leathern breeches go through the ladanum thickets, and the resin which adheres to their garments is scraped off and moulded into rolls. It is also collected by a kind of rake or whip, with a double row of leather thongs. It has rubefacient properties, and was formerly a conhas rubefacient properties, and was formerly a solution of warming plasters. Lôt is mentioned only twice (Gn  $37^{25}$  AV and RV text 'myrrh,' RVm 'ladanum,'  $43^{11}$  AV and RV 'myrrh').  $\Sigma \tau \alpha \kappa \tau \dot{\eta}$  is mentioned in Sir  $24^{15}$ . The Turks still value it as a perfume. G. E. Post.

MYRTLE (og hadas, hence aga Hadassah, the Jewish name of Esther).—The Arabic has three words for the myrtle, rihan, as, and hadas, the last of which is identical with the Hebrew. Hadas occurs six times in the OT. In three of these (Neh 8<sup>15</sup>, Is  $41^{19}$  55<sup>13</sup>) the LXX has  $\mu\nu\rho\sigma l\nu\eta$ , in the rest  $\delta\rho\ell\omega\nu$ =' of the hills' (Zec 1<sup>8</sup>· 10· 11, where the translators must have had the reading הַּהָרִים instead סק מיס ביים. The myrtle, Myrtus communis, L., is an evergreen shrub, usually from 3 to 4 ft. high. Occasionally, in moist soil, it attains a height of 8 ft. It flourishes from the sea-level to an altitude of 4000 ft. The southernmost range of Lebanon is called Jebel Rihan, from the abundance of this shrub on its flanks. It grows on bare hillsides and by watercourses in beautiful

green clumps.

Being so low a shrub, it is quite improper to speak of it as forming groves. A variety is cultivated, especially in Danascus, which often reaches a height of 10 or 12 ft., but never attains the proportions of a tree. The translation 'myrtle trees' (Zec 18.10.11) is unwarrantable, as the original has not the word trees 'My (const.), but simply בְּרַסִים 'myrtles.' The flowers are white, about an inch broad, and of a delicate, pretty structure. The berries are first white, and then turn to a bluishblack. They are sweetish-astringent in taste, and are much liked by the natives, who call them hanblas, a corruption of hab el-as ('the berry of the myrtle'). The leaves are lanceolate, dark the myrtle'). The leaves are lanceolate, dark green, and fragrant, especially when pressed and rubbed between the thumb and fingers. The natives use them as follows:—(a) The dried leaves are pounded in a mortar, sifted, and the powder mixed with oil is used to anoint the bodies of young infants, or the dry powder is dusted over the surface to toughen the skin, and prevent excoriations from the friction of the clothing.

(b) The beds of infants are sometimes stuffed with

in the markets, but the writer has never seen the flowers sold, nor has he heard of fragrant water being distilled from them, as alleged by some. G. E. Post.

MYSIA (Mvola) was the name customarily used for the north-western part of Asia Minor, bordering on the Hellespont and the Propontis, and bounded east and south by Bithynia, Phrygia, and Lydia. The Troad is sometimes included in it, and sometimes distinguished from it. the late Roman empire the name fell into disuse, and Hellespontus was substituted for it as the title of a province in the fourth and following centuries. The boundaries were vague and undeterminable; and the uncertainty led to the proverb χωρίς τὰ Μυσῶν και Φρυγῶν, applied to what cannot be defined. Of places mentioned in the Bible, Assos and Troas were in Mysia, Adramyttium on the border between it and Lydia. It formed part of the Roman province Asia.

Mysia is mentioned only in Ac 16<sup>7, 8</sup>. St. Paul, with Silas and Timothy, being prevented by the Spirit from preaching in Asia, turned northward with the intention of entering Bithynia, with its great, populous, and civilized cities, hardly inferior even to Ephesus; but when they came so far north as to be opposite Mysia ( $\kappa a \tau \dot{\alpha} \tau \dot{\eta} \nu M wola\nu$ : for this use of  $\kappa a \tau \dot{\alpha}$  compare Herodotus i. 76, Thucydides vi. 65 and 104, Ac 27; but see Blass on Ac 167.), they were ordered not to enter Bithynia; and they then turned towards the west, passing through but not preaching in Mysia, till they reached the coast at Troas.

A tradition existed that, on this journey through Mysia, Paul and Silas had founded a church at a place named Poketos, between the Rhyndacus and Lyzicus, as is mentioned in the Acta S. Phileteri (Acta Sanctorum, May 19). This is hardly consistent with Ac 167, but is not absolutely contradictory, as, though not regularly evangelizing in Mysia, it is clearly possible that Paul and Silas might convert individuals on the way either at Poketos or at Troas. But the tradition is late, for the Acta Philetari profess to be only of the 4th cent., and may be later. An ancient Mysian tradition existed, assigning to a certain One-siphorus the evangelization of part at least of Mysia: Onesiphorus was martyred at Parium under the proconsulate of Adrian, and this date is a strong proof of trustworthiness, for Adrian was actually proconsul of Asia about A.D. 109-114. It is unlikely that the recollection of so obscure an officer could have been correctly preserved except in a true old tradition: see *Expos. Times*, 1898, p. 495.

W. M. RAMSAY.

MYSTERY.—The term 'mystery' opens up a wide and interesting, though somewhat obscure, field of inquiry to the Christian theologian. Much of it is, however, extra-biblical, and must therefore rather be indicated than discussed in this place. We shall consider, first, the NT use of the word 
\( \mu\text{ort}\) \( \psi\) second, the chief features of the Greek 
\( \my\text{steries}\); and, third, the question how far the 
latter influenced the language of the NT.

i. NT USE OF THE TERM Moorhpoor.—The meaning of this word in classical Greek was anything hidden or secret, especially in the plural τα μυστήρια, the sacred rites above referred to, from which all who had not passed through a ceremony of initiation were excluded. The root verb  $\mu \dot{\omega} \omega$  is formed by that act of closing the lips which it primarily signifies (though it is applied also to the closing of the surface to toughen the skin, and prevent the eyes), and appears alike in the Latin mutus, excoriations from the friction of the clothing.

(b) The beds of infants are sometimes stuffed with the dried leaves, from a belief in their medicinal virtue. Both the berries and the leaves are sold doubtless, in the mystery-plays of the Middle

The verb  $\mu\nu\ell\omega$ , most frequently met with in the passive, means to initiate into the mysteries,—oi μεμινημένοι are the initiated, cf. 3 Mac 230,—and then generally to instruct. St. Paul says, Ph 412 μεμίνημα, RV 'I have learned the secret.'

That which is hidden or secret may, it is evident, be (1) absolutely so, that is, in its own nature inaccessible or incomprehensible, or (2) completely hidden, that is, as yet unrevealed, or (3) partially or comparatively secret or obscure, due to some want of clearness in the medium of communication, as when the expression is figurative instead of being literal.

The first of these, which is emphatically the modern signification of 'mystery,' as that which cannot be known, is practically foreign both to classical and biblical Greek. With regard to it, Cremer (s.v.) quotes two remarks of the Scholiast on Aristophanes (Ran. 459, Av. 1073) bearing out this statement; and though Lightfoot on Col 126 apparently finds this meaning in two passages (I Co 15°1, Eph 5°2), of which the one seems to fall under (2) and the other under (3), he admits that the 'idea is quite accidental, and must be gathered from the special circumstances of the case, for it cannot be inferred from the word (μυστήριον) itself.' This is not, of course, to say that in religion, in the Christian religion itself, there are no difficulties, nothing transcendental or mysterious in the ordinary sense. On the contrary, such difficulties must ever attach to man's thoughts of the infinite and the divine, but it is not upon these elements that the attention of the biblical writers is concentrated. If they are thought of at all, it is rather as the unrevealed than the incomprehensible, the result of seeing through a glass darkly, until the time when man shall know even as also he is known. In the third of the significations noted above, μυστήριον, it has been remarked (Thayer-Grimm, Lexicon, s.v.), like אות and on Rabbinic writers, denotes the mystic or hidden sense, that which is conveyed in a figure, parable, or vision.

"It is plain," says Principal Campbell (Dissertations on the Four Gospels, ix. pt. i.), "that, in this case, the term purther is used comparatively; for, however clear the meaning intended to be conveyed in the apologue, or parable, may be to the intelligent, it is obscure, compared with the literal sense, which, to the unintelligent, proves a kind of veil. The one is, as it were, open to the senses; the other requires penetration and reflection. Perhaps there was some allusion to this import of the term when our Lord said to his disciples, "To you it is given to know the mystery of the kingdom of God; but to them that are without, all these things are done in parables" (Mk 41). The apostles were let into the secret, and got the spiritual sense of the similitude, while the multitude amused themselves with the letter, and searched no further.' the letter, and searched no further.

Thus we have the 'mystery of the seven stars' (Rev 120) and the 'mystery of the woman' (Rev 177). The difficulty or obscurity is here of a subjective character, while that in the case of the second of the three senses which we have distinguished, and which is the most prominent throughout the NT, is objective. In the case of the latter, μυστήριον is correlative to αποκάλυψις, the secret to the discovered or revealed. In so far as revelation has taken place, the 'mystery' is a knowledge of that which had been secret but is so no longer; while yet unrevealed, αποκάλυψις is a possibility only which awaits the time at which it shall become actual and the hidden pass into knowledge. The latter sense is naturally most conspicuous in the passages of the Apoer. in which the word occurs, whether referring to the secret purpose or will of men (To 12<sup>7.11</sup>, Jth 2<sup>2</sup>, 2 Mac 13<sup>21</sup>) or of God (Wis 2<sup>22</sup>), or simply to secrets in general (Sir 22<sup>22</sup> 27<sup>16.17.21</sup>). In the NT the same meaning is perhaps conveyed in 1 Co 13<sup>2</sup> 14<sup>2</sup>, while in 1 Co 15<sup>61</sup> μυστήριον υμίν λέγω we see the mystery in the 15ο μυστήριου όμῶν λέγω we see the mystery in the act of passing out of the one stage into the other.

The great 'mystery' of the NT is the Divine

plan of salvation, hitherto hidden from the world: but now made known in Christ (cf. Ro 1125, Eph 619, Col 1<sup>26</sup>, 1 Ti 3<sup>9, 16</sup>). In this sense the apostles and ministers of Christ become οἰκονόμοι μυστηρίων and ministers of critist become except to 21. It is the 'mystery of his will' (Eph 1°), the 'mystery of God, even Christ' (Col 2² RV), the 'mystery of Christ,' that is, respecting Christ (Col 4³), the 'mystery of the gospel' (Eph 619), but everywhere it is the 'dispensation of the mystery which from all ages hath been hid in God who created all things' (Eph 39). It is noteworthy that, out of 26 (or 27) occurrences of μυστήριον in the NT, 10 should be within the comparatively brief compass of Eph and Col. The saving purpose of God, hitherto a mystery because unrevealed, is still such where it is not yet received, as by those destitute of πίστις or εὐσέβεια (1 Ti 39.18), or in so far as it has not been grasped, e.g. in its extension so as to include the Gentiles (Eph 3<sup>3, 4</sup>). Nor is the term confined to Divine secrets. 'It expresses sometimes those of a different and even contrary nature. Thus the apostle, speaking of the antichristian spirit, says, "The mystery of iniquity doth already work" (2 Th 27). The spirit of antichrist hath begun to (2 Th 2'). The spirit of antichrist hath begun to operate; but the operation is latent and unperceived' (G. Campbell).

An interesting point, and one full of significance for the history of the Church, is the Vulg. rendering of μυστήριον by sacramentum. This is found in Dn 2<sup>18</sup> 4<sup>6</sup>, To 12<sup>7</sup>, Wis 2<sup>22</sup>, Eph 1<sup>9</sup> 3<sup>3, 9</sup> 5<sup>32</sup>, 1 Ti 3<sup>16</sup>, Rev 1<sup>20</sup>. Upon Eph 5<sup>22</sup> is founded the doctrine that marriage is a sacrament. The association of ideas connecting the two words appears to be the reference to religion and the use of the symbol, whether in word or deed. Solemnity, awe-inspiring quality, marked both the mystery and the sacramental rite, whether we derive the latter from its legal or its military reference. Both came to be used in a very general and indefinite way, until the ecclesiastical signification of sacramentum became fixed. Their primary application, however, was obviously the reason why 'sacrament' was first used of baptism and then transferred to the Lord's Supper, while with μυστήριον the opposite process took

place.
ii. The Greek Mysteries. — As the higher thought of Greece found expression in its philosophy, so, though all may not be true of them which the later writers report, it may be said that its deeper feelings found expression in the Mysteries. In these there was, first of all, an element of tradition; they gathered up reminiscences of nature-worship, —man's witness to his sense of dependence upon his natural environment,—and particularly those elements of it which still survived in village custom and observance. But they seem also to have fixed attention upon problems of which nature-worship offered no solution—those suggested by the enigma of death, a certain sense of sin, the thought of an offended Deity, the need of purification. It is still a question how much in the development of these institutions was of native growth, how much was derived from foreign sources, and still more what these foreign Leaving such discussions aside, and sources were. also the tempting subject of Orphism, which is credited with two great contributions to religion—the belief in immortality, and the idea of personal holiness' (L. Campbell), we note Lobeck's division of the multitude of rites which passed under the name of Mysteries into (1) civic mysteries, (2) fanatical rites, whether public or private, and (3) occasional functions, designed to meet individual and special needs.

Belonging to the first class, and under the patronage of the Athenian state, were maintained two forms of the worship of Demeter, the earth-

mother—the Thesmophoria and the Eleusinia. The former were so called from the ancestral precepts (θεσμοί) by which the observances were strictly regulated. They constituted a festival of seed-time, lasted four days, were essentially a country rite; and those who took part in them were married women, the fruitfulness of married life being here, as elsewhere, associated with that of the soil. The most remarkable and elaborate of all the mysteries were, however, those celebrated at Eleusis, certainly in the beginning of the 6th cent. B.C., and perhaps at a much earlier period. They gathered up almost all the elements belonging to such rites which elsewhere are found separately; with the worship of Demeter they combined that of Dionysus; and some of their most profound and interesting features were probably derived from the kindred Orphic Mysteries. The Eleusinia included two annual celebrations—the Lesser Mysteries held at Agræ, a suburb of Athens, in Hysteries held at Agræ, a suburb of Athens, in the month Anthesterion (roughly corresponding to February), and the Greater observed at Eleusis in the month Boedromion (September). The latter, therefore, was the autumn festival, the hiding away of the seed; the former, the spring festival, celebrating its reappearance; the interval between the two being mythologically represented as the sojourn of Persephone, the daughter of Demeter, in the under-world. Every one who desired to be initiated at Eleusis had to pass through the ceremonies at Agræ, and probably a cycle of at least four stages, including two visits to each place, had to be observed. This might be spread over several years, so that it was said: παῖς μύστης καὶ έπόπτης ἀνήρ—it bridged over the passage from youth to manhood. The more important Mysteries (those at Eleusis) were under the control of a body of magistrates, but the active direction was taken by the lεροφάντης, who must be a descendant of Eumolpus, the Thracian bard, to whom the origin of the Mysteries was traditionally attributed. Candidates for initiation, having already qualified at Agræ, were called  $\mu\nu\sigma\tau\alpha$ , and the leader or instructor of a group of such candidates was the  $\mu\nu\sigma\tau\alpha\gamma\omega\gamma\delta$ s. The privilege of participation, at first confined to Athenians, was afterwards extended to all, women as well as men, except slaves, Persians (the hereditary enemy, specially excluded), and infamous or criminal persons. They took an oath of secrecy, were subjected to certain ceremonial restrictions in respect of diet and behaviour, and received some sort of instruction which prepared them for the experiences which lay before them. In the ceremonies themselves, which lasted nine days, from the 15th to the 23rd of the month, 'four acts were distinguished: (a) κάθαρσις, the preliminary purification: (b) σύστασι, the rites and sacrifices which preceded and prepared the way for the actual celebration; (c) τελετή or μύησις, the initiation properly so called; and (d) έποπτεία, the last and highest grade of initiation' (Gardner and Jevons). Secrecy characterized only the last two stages. One of the most interesting features of the occasion was the sacred truce which was pro-claimed at the beginning of the festival, and which was usually observed, though circumstances led to its abandonment during the latter portion of the Peloponnesian war. In the celebrations themselves, only two points can be absolutely fixed—
the purification known as ἄλαδε μύσται ('To the sea, O mystæ'), which took place on the 16th of the month, and the day of Iacchus, the 20th; other features are more or less hypothetically placed (Mommsen, Feste, p. 207)

The probable order was as follows: On the first day, called ἀγυρμός, the assembling, the μύσται joined the group to which they were to be attached, and received the instruction already

alluded to. On the second (the 16th) they went in solemn procession to the seacoast and bathed in the purifying waters. The third, fourth, and fifth days were occupied with various sacrifices, processions, and feasts. The last of these was known as 'the day of the torches,' because in the evening, just before sunset, the great procession of the mystæ, each group led by its δοδούχοι, or torch bearer, set out for the temple at Eleusis, where they seem to have spent the night in visit-ing the places associated with the wandering of Demeter in search of her daughter Persenhone. This procession divides what may be termed the Athenian from the Eleusinian section of the Mysteries. The sixth day (the 20th) was specially sacred, and bore, as we have seen, the name of Iacchus, who was identified with Bacchus (Dionysus), and represented as the husband or son of Parsonlone his status being beauty. son of Persephone, his statue being borne in the procession. The next two nights were occupied with the higher stages of the symbolical cere-mony. These included a further purification, a progress through darkness unrelieved by either moonlight or torchlight, whence the mystar passed into the lighted interior of the Great Hall of Initiation, where they were allowed to see and handle certain sacred objects which none but the έπόπται (those who had received final initiation, έποπτεία) ever beheld. It seems certain that there were some representations of a dramatic character illustrating the myths of the deities involved miracle plays, as we might call them, in which the more profound lessons which those in charge meant to convey were communicated. The return to Athens was made in a jesting mood, both on the part of the mystæ themselves and on that of the general population, which may have been due to the reaction from the strain and solemnity of the preceding days. The ninth day was termed  $\pi \lambda \eta$ μοχόαι from certain peculiar libations with which the rite was brought to an end. Associated with these libations was one of the mystical formulas which were imparted in the course of the proceedings, were esteemed specially sacred, and throw light upon the original character of the festival. The ninth day formula was  $v_{\epsilon}$ ,  $\kappa v_{\epsilon}$ —the first a prayer for rain, the second for fertility; but the most notable of these sayings was that connected with the 'communication of the sacred things' (παράδοσις τῶν lepῶν)—'I have fasted: I have drunk of the potion: I have taken ont of the casket, and after having tasted I have deposited in the basket: I have taken out of the basket again, and have put back into the casket.' The combination of sight and sound, of rhythmic movement, sacred association, mystic formula, and, above all, the obligation of secrecy, must have been deeply impressive, especially after being long looked forward to, and being made the object of careful preparation.

467

Later writers exaggerated many of the features of the Mysteries, whether as Christians they regarded them with suspicion and detestation, or in a wider interest supplemented by the help of imagination what history had left vague and obscure.

'High authorities,' it has been said (L. Campbell, p. 264), 'whose gravity and depth of mind cannot be disputed, bear witness with one voice to the elevating influence of the Eleusinian Mysteries. Sophocles dwells emphatically on the incomparable happiness of the initiated both in life and after death; and Plato, who had a far clearer vision both of God and immortality than any child of Eumolpus, can find no more fitting vehicle for his most transcendent thoughts than the imagery which he borrows from the contemplation of the Mysteries.'

This is not incompatible with the view that little or nothing of positive doctrine was conveyed in the Mysteries, from the symbolism of which

each man was left to take what he would, according to the dictum attributed by Synesius to Aristotle—'He is of opinion that the initiated learned nothing precisely, but received impressions, and were put into a certain frame of mind.' Much has been done by excavations and the careful examination of contemporary inscriptions to throw light upon this interesting subject, but much more in this direction must be accomplished before we can claim to tread with confidence in a region the character of which rendered it peculiarly liable to be misunderstood and misrepresented.

iii. The Mysteries and the NT.—That the writers of the NT have derived much of their language and imagery from the Greek Mysteries, and that a consideration of the different shades of meaning in which μνστήριον is employed in the NT indicates that they have in this reference their unifying element, has been maintained with much ability and ingenuity by A. S. Carman in a paper contributed to the Bibliotheca Sacra for October 1893. The allusions which he recognizes in Scripture are to the following features of the Mysteries:—

'The word μωστήριος and other derivatives of the verb μώς; the word τιλιτή, or the allied adjective form τίλισς with the idea of maturity or perfection; the word ἐνεντιῶ and its derivatives with the associated idea of a personal experience of the Divine fellowship; certain specific allusions to the contrast of light and darkness with the derived ideas of enlightenment, illumination, and the like; the term silence; the ideas of reservation and revelation of religious truth; ideas associated with the office of hierophant, kerux, mystagogue, and the like; and certain formal uses of the expressions touch, taste, handle, behold,—associated with the mystic paradosis' (p. 623).

Carman refers to similar allusions in classical writers and the Church Fathers, but especially in the works of Philo Judeus, and then examines the principal passages of the NT, printing in italies the words in which allusion is supposed to be detected, as in the following example: He 61-5 Let us press on unto perfection. For as touching those who were once enlightened and tasted of the heavenly gift, and were made partakers of the Holy Ghost and tasted the good word of God, etc., where, on this assumption, reference is made to 'the perfective aim of the rites, the characteristic idea of enlightenment, the symbolic tasting, and the participation in the Divine nature' (p. 636).

The attempt thus to trace in the apostolic language direct allusion to the Mysteries is pronounced by Anrich, in his careful and scholarly treatise on the connexion of the Mysteries with Christianity, to be 'wholly unsuccessful' (p. 143 note). This writer regards the approximation of Christianity and the Mysteries, both in idea and usage, as having been introduced by the Gnostics, whose position in this respect Clement of Alexandria and Origen sought to legitimate in a modified form within the Church. For the pre-Gnostic use of μυστήριον and allied terms and ideas he turns with Hatch (Essays in Biblical Greek, pp. 57-62) to Jewish literature, especially the apocryphal books of the OT. In these the plans of a king or general are termed µvoτήρια; they are his secrets, in so far that no one knows about them until he communicates them to (Anrich, p. 144). 'This,' says Hatch, 'was a strictly Oriental conception. A king's "counsel" was his "secret," which was known only to himself and his trusted friends. It was natural to extend the conception to the secret plans of God' (p. 58). Hatch applies this conception to the explanation of the various passages in the NT, and finds it sufficient in every case except the two passages in Rev (120 177) and Eph 522, where he has recourse to the 'light which is thrown back. wards on the NT by Christian writers of the 2nd cent.' (p. 59), in which light μυστήριον is seen to

have a certain parallelism to  $\sigma \dot{\nu} \mu \beta o \lambda o \nu$ ,  $\tau \dot{\nu} \pi o s$ , or  $\pi a \rho a \beta o \lambda \dot{\gamma}$ .

It is doubtless an excellent rule to interpret NT language by reference to the LXX wherever possible: it is to adduce a known cause where others, however plausible or probable, have about them more or less of uncertainty. But may not the latter be unduly and unnecessarily ignored? If a writer under 'the constantly deepening impression produced by prolonged study of the subject that such allusions colour a large portion of those writings of the NT which had Gentile environment' is apt to push his theory too far, in accounting, for example, for the allusions in Eph and Col by the association of Ephesus with the impure rites of the predominant Diana-worship and the fact that Philippi was 'built upon the Thracian frontier, in the pathway of the original course of the Mysteries of Dionysus, and probably also of those of Demeter, as they spread throughout Greece' (Carman, p. 634; cf. Anrich, p. 144 note), may not another whose immediate object is to demonstrate the influence of the LXX underestimate indications of other influences? At least a side reference to the heathen Mysteries could scarcely be denied except upon the supposition, in itself somewhat unlikely, that the NT writers, and particularly St. Paul, were so ignorant of the Mysteries that the term had only its LXX association for their minds, or that the Mysteries had altogether failed to colour by imagery drawn from them the language of the time. The cautious words of Kennedy (Sources of NT Greek, p. 109) should be borne in mind: 'Several of the biblical meanings, though apparaently moulded by the Greek of the OT, may have been common enough in the spoken language as found in Egypt, Asia Minor, and Syria. When it is borne in mind that there are literally almost no remains of the later spoken language except the LXX and the NT, in addition to the Comic writers. the supposition gains colour. At any rate, it shows us that we are not at liberty to make dogmatic assertions even in that sphere of the NT vocabu-lary where the influence of the LXX appears most powerful, the sphere of religious and theological terms.' That a writer like St. Paul, who alludes to the Greek games, the Greek theatre, the Roman camp, should have passed over a phenomenon which offered so many suggestive points of view as the Mysteries, is almost incredible. Hatch himself, in his Hibbert Lectures, ascribes to them great in-fluence upon the language and institutions of the early Church. Clement of Alexandria sees and makes explicit use of the parallelism (*Protrept*. ch. xii.). Lightfoot (on Col 1<sup>26</sup>) holds that there is a connexion between the language of St. Paul and the Mysteries, though he dwells on the 'intentional paradox,' that while 'the heathen mysteries were strictly confined to a narrow circle, the Christian mysteries are freely communicated to all.

If Lightfoot were right in finding in Col traces of an incipient Gnosticism, and if, as Anrich says, the relation between the Greek Mysteries and Christianity began with Gnosticism, the special frequency of reference to the Mysteries in Col and Eph, already noted, would acquire a new significance. But it is fair to say that the present trend of opinion is to follow Hort in giving a Judaic rather than a Gnostic interpretation to the heresies referred to in these Epistles. The tendency to regard the Mysteries as ignored in the NT is possibly due in part to a disinclination to find in them any formative influence upon primitive Christian institutions. For such influence at this early stage it is not contended here; later, as Cheetham remarks (Mysteries, p. 74), the concern is not with words, but things. But, as he also says, 'when Mysteries were everywhere found, their terminology naturally

came to be commonly employed, and to be applied to matters altogether foreign to its original usage.' The question is whether the analogy between the experiences of Christians and those who had undergone the mystic initiation was sufficiently close and striking to account for the former being expressed to some extent in terms of the latter even in the apostolic age. It must be admitted that the balance of authority on this point is somewhat doubtful; we must wait, as already remarked, for further light from inscriptions and other sources upon the usage of the time before it can be definitely decided. Meanwhile it cannot be called illegitimate, as it certainly is an enrichment of NT language, to surround such words as  $\mu\nu\sigma\tau\eta\rho\rho\sigma$ ,  $\tau\ell\lambda\epsilon\iota\sigma$ ,  $\ell\tau\delta\sigma\tau\eta$ s with associations derived from so important an element of contemporary Greek life as the Mysteries.

LITERATURE.—A great deal has been written upon this subject. Its modern treatment dates from the publication of the Agluophanus of O. A. Lobeck in 1829. One of the most recent books is Canon Cheetham's Hulsean Lectures—The Mysteries, Payan and Christian, in the preface to which a good account of the most important works is given. Special reference may be made here to W. M. Ramsay's article in Energet. Brit. 9th ed., to the chapters on the Mysteries in Gardner and Jevons' Manual of Greek Antiquities (1899); in Jevons' Introduction to the History of Religion (1890); and in Professor L. Campbell's Religion in Greek Literature (1898). Compare also Mommsen's Feste der Stadt Athen in Alterthum (1898), a revision of the same author's Heortologie; Anrich's Das antike Mysterienwesen in seinem Einfluss auf das Christenthum (1894); and Wobbermin's Religionsgeschichtliche Studien zur Frage der Beeinflussung des Urchristenthums durch das antike Mysterienwesen (1896). For the use of μοντήριο in the NT see Cremer's Biblicotheological Lexicon; Thayer-Grimm's Lexicon; Principal G. Campbell's Dissertations on the Gospels, ix. pt. 1; Hatch's Essays in Biblical Greek; and Carman's article, Bibliotheca Sacra, vol. 1. pp. 613-639.

A. STEWART.

# N

NAAM (cui).—The eponym of a Calebite family, 1 Ch 4<sup>15</sup> (B Νδομ, Α Νάαμ).—See GENEALOGY, IV. 50.

NAAMAH (πριμ) 'pleasant|'; Nοεμά).—1. Sister of Tubal-cain, daughter of Lamech and Zillah (Gn 4<sup>22</sup>; Josephus, Ant. I. ii. 2). 2. One of Solomon's Ammonitish wives, and mother of Rehoboam (1 K 14<sup>21</sup>·[B\* Μααχάμ, Α Νααμά]<sup>31</sup> [Gr. 12<sup>24</sup>», Β Νααμάμ<sup>3</sup>, 2 Ch 12<sup>13</sup> [Νοομμά]). According to the second Greek narrative, which follows 1 K 12<sup>24</sup>, she was the daughter of Ana, i.e. Hanun, son of Nahash, king of the Ammonites (2 S 10<sup>1-4</sup>, where, however, B reads 'Αννών). If Rehoboam were forty-one at his accession (1 K 14<sup>21</sup>), and not sixteen as in the second Greek account, Naamah must have been married to Solomon before the death of David.

N. J. D. WHITE.

NAAMAH (πρχ); Νωμάν; Luc. Νομά; Vulg.

Neema).— A town of Judah in the lowland or
Shephelah, named in conjunction with Gederoth,
Beth-dagon, and Makkedah, and forming one of
a group of sixteen (Jos 15<sup>37-41</sup>). There is no notice
of it elsewhere. Zophar the Naamathite (πρχ<sub>3</sub>π)
is mentioned in Job (2<sup>11</sup> etc.), but there is nothing
to connect him with this town.

It is proposed to identify Naamah with Naneh (SWP ii. 408); Gederoth, Beth-dagon, and Makkedah being respectively identified as Katrah, Dejûn, and el-Mughar ('the caves'), villages on the northern border of Judah near Ekron and Jabneel. Naneh is a small mud village on low ground 6 miles south of Ludd (Lydda).

C. WARREN.

C. WARREN.

NAMMAN (ΓΡΥ,); BA Ναιμάν; Iuc. Νεεμάν; NT

Νεεμάν (TR), Ναιμάν (WH) = 'plensantness,' perhaps
the name of the god Adonis [Lagarde, Sem. i. 32],
cf. συρμίν τρι plantings of Adonis,' RVm of Is 1710,
where see Dilmann-Kittel's note).\*—1. A Syrian
warrior known to us only through the remarkable cure of his leprosy by the prophet Elisha,
recorded in 2 K 5, and referred to by our Lord
as a rebuke to Jewish exclusiveness, and an illustration of the anomalous manifestations of divine
mercy (Lk 427). According to the Midrash, Naaman
was the man who at the battle of Ramoth-gilead
'drew his bow at a venture' (1 K 2284), and inflicted
on Ahab his fatal wound—a tradition apparently
accepted by Jos. (Ant. VIII. xv. 5), who describes
\*Compare further the name 'σμ, (Naomi) in the Book of

Ruth.

the archer in question as παῖς δễ τις βασιλικὸς τοῦ ᾿Αδάδου, ᾿Αμανὸς ἔνομα. But this identification may have been a mere conjecture, due to the statement in 2 K 5¹ that 'by Naaman J' had given deliverance (¬ηνισή) unto Syria,'—an expression which may naturally be held to refer to the battle of Ramothgilead, since the issue of that engagement is expressly attributed in 1 K 223201. to the counsel of J'' (although G. Rawlinson [in Speaker's Comm.] would rather connect it with Syrian successes against Shalmaneser II. [Anc. Mon. ii. 344, 361]), on the general principle recognized (nearly a century later) in Am 9².

With regard to the date of Naaman's visit to Israel as a suppliant for 'deliverance' of another sort, the sequence of the narrative would lead us to suppose that Ben-Hadad was king of Syria at the time; but no indication is given of the interval that had clapsed since Ahab's death, to enable us to determine who was king of Israel. Ewald (HI 4) prefers the reign of Jehoahaz, and Schenkel (Bib.-Lex.) that of Jehu. But the general view that Jehoram was king seems more probable, in view of the recent Syrian raids (2 K 5<sup>2</sup>), the precarious friendship between the two kings (vv. 5<sup>1</sup>), and the prevalence of paganism and unbelief (v. 26<sup>1</sup>), cf. vv. 7<sup>1</sup>.).

The miraculous character of Naaman's cure exposes it in some degree to the objections taken to Elisha's life as too 'thaumaturgic.' Nöldeke (Schenkel's Bib. Lex.) comments on the absence of antecedent faith on the part of the sufferer, and sees no sign of spirituality in his conversion; but it is only the outstanding features of the incident that have been preserved to us, and on the whole the miracle must be acknowledged to be one of the most dignified in the life of Elisha. Even assuming that there was an ancient Semitic belief in the efficacy of running waters as a cure for leprosy, we find something analogous to this in the miracles of the NT (Jn 9°, Mk 8°). The narrative is 'thoroughly in keeping with the state of things in the time of Elisha' (Kittel, Hist. of Heb. ii. 279). Its portrayal of Naaman's character is natural and lifelike. It does not conecal his pride and irritation at the slight offered to himself (2 K 5°1) and to his country (v. 1°2 Damascus being famous for its noble streams), which was designed doubtless to induce a more humble and reverent spirit in his approach to the God of Israel (cf. vv. 5°6. 9). Yet on the whole it depicts a manly and attractive character, which

won for him the sympathy of the little Jewish maid who was the first to suggest his cure at the hands of Elisha, the warm friendship of his sovereign, who spared no expense (the gold and silver sent with Naaman are generally estimated at upwards of £10,000) and lost no time in seeking to obtain the remedy, and the affectionate devotion of his servants, who were anxious for his welfare and knew how to appeal to his better judgment. One of the most striking features of his character is his sense of gratitude (cf. the healing of the ten lepers in Lk 17<sup>11-19</sup>), which led him to retrace his steps from the Jordan to Samaria, a distance of nearly 30 miles, to thank and reward his benefactor, and to devote himself henceforth to the worship of the God of Israel, which he does with a strength and decision of faith that has scarcely any parallel in the language of Gentile converts in the OT. This was a fulfilment of the hope expressed by Elisha (2 K 5<sup>8</sup>), and justified the lofty attitude which he had assumed towards Naaman when he communicated with him only by messenger, bidding him wash seven times in the Jordan, showing, by this abstention from personal intercourse as well as by his refusal of the gifts customary at heathen oracles (Herod. i. 14. 50) and not forbidden to the prophets of J"(1 S 9<sup>6-9</sup>, 1 K 14<sup>24</sup>, 2 K 4<sup>42</sup>; ct. Mt 10<sup>8</sup>, Ac 8<sup>20</sup>), how little he had in common with the artful and obsequious soreerers familiar to Naaman and his master (2 K 5<sup>6</sup>. 11).

There are two points in which Naaman's conduct has given rise to controversy, viz. (1) his request for two mules' burden of earth to carry away with him for the purpose of offering sacrifice to J"; and (2) the desire to be forgiven when he attended his royal master as heretofore in the temple of Rimmon and bowed down with him. With regard to the first, Naaman simply shared the universal belief of those days, that the god of each land could be served only on his own soil; cf. the com-plaint of David (1 S 26<sup>19</sup>) that he was being driven out to serve other gods. Further, the transporta-tion of earth from the Holy Land in the Middle Ages for the Campo Santos of Italy; the erection of a Jewish synagogue (to which Calmet refers in Comm. Lit. vol. ii.) at Nahardea in Persia, composed entirely of stones and earth brought from Palestine; and even the preference shown for water from the Jordan in Christian baptism, are instances of a similar feeling in later times. to the latter point, when we bear in mind that the obeisance in the house of Rimmon, on the part of Naaman (which he wished to be condoned), was purely external, arising out of his official position and his personal relation to the king ('he leaneth on my hand,' cf. 2 K 7<sup>2, 17</sup>), we see that it does not really imply any attempt to dissemble his convictions, and that his appeal to Elisha may be more reasonably attributed to a sensitive conscience than to a spirit of compromise. There is therefore no warrant for drawing a parallel between Naaman and those who from worldly motives profess a faith and conform to a worship in which they do not believe—a view which has led to much irrelevant discussion. See, further, art. ELISHA in vol. i. p. 695.

In many respects the story lends itself with singular aptitude to the illustration of evangelical and sacramental doctrine; and the passage has been frequently so employed in homiletical literature.

2. According to Gn 46<sup>21, 26</sup> (cf. Nu 26<sup>41</sup>), one of 'the sons of Benjamin' who came with Jacob into Egypt, but more precisely designated in Nu 26<sup>38, 40</sup> and 1 Ch 8<sup>3t</sup>, cf. <sup>7</sup>, as a son of Bela and grandson of Benjamin, and as head of 'the family of the Naamites' (Nu 26<sup>40</sup>, where 'DE' is probably a

textual error for upu; ; so Sam., cf. LXX Noeμανεί). See Naamite.

J. A. M'Clymont.

NAAMATHITE (κρυ], δ Μ(ε)ιναίων βασιλεύς, δ Μ(ε)ιναίως). — The description of Zophar, Joh's friend, in Job 2<sup>11</sup>, 11<sup>1</sup> etc. The name is unknown elsewhere, the rendering of the LXX being hypothetical only. The name Na'amah ('pleasanttown'?) is not infrequent in Syria and Palestine of later days. It indicates a town in the Shephēlah in Jos 15<sup>41</sup>.

W. T. DAVISON.

NAAMITE (יְּנְיֵּמֶהְ).—The patronymic of a family descended from Naaman, who is represented Nu 26<sup>40</sup> as a grandson of Benjamin, but in Gn 46<sup>21</sup> as son, though the LXX agrees with Nu (see NAAMAN, No. 2).

NAARAH (ממצו 'girl').—1. One of the wives of Ashlur the 'father' of Tekoa, 1 Ch 4<sup>56.</sup> (B Θοοδά, A Noopa, Luc. Noepa). 2. A town belonging to the tribe of Ephraim, Jos 16' (ασχι, with π locale; B al κῶμαι αὐτῶν as if for πάριν, A Naapada, Luc. 'Αναιραθά). AV has Naarath (so also Dillm. and Buhl). The same place is called in 1 Ch 7<sup>28</sup> Naaran (γχι; B Naapath, A Naapah). According to the Onomasticon (Lagarde, 283. 142), there was a village Noopah 5 Roman miles from Jericho (cf. the Naapa of Jos. Ant. XVII. iii. 1). This would suit well the ruin el-Auje situated on the river of the same name. Guérin places the site farther up the river at es-Sâmie.

LITRRATURR.—Guérin, Samarie, i. 210 ff., 226 f.; PEF Mem. ii. 392; Neubauer, Géog. du Talm. 163; Buhl, GAP 181; Dillm., Jos. ad loc. J. A. SELBIE.

NAARAI (יוַעָז; B Naapat, A Noopa). — One of David's heroes, 1 Ch 11<sup>37</sup>, described as the son of Ezbai. In the parallel passage, 2 S 23<sup>35</sup>, the name is Paarai, who is called 'the Arbite' (ימָאָרָה'). It is impossible to decide with any confidence between the rival readings יוַנָּי and יַּעָרָי, or to say what is the relation of יַּאָרְדָּ to יַּאָרָה. See Arbite, Ezbai, Paarai, and cf. Kittel's note on 1 Ch 11<sup>37</sup> in SBOT.

## NAARAN, NAARATH.—See NAARAH, No. 2.

**NAATHUS** (A Naa $\theta$ 6s, B  $\Lambda$ 4 $\theta$ 0s), 1 Es  $9^{81}$ .—One of the sons of Addi. The name seems to correspond to Adna in Ezr  $10^{80}$ . The form in B is due to confusion of A and  $\Lambda$ , and to attaching the initial N to the preceding word (' $\Lambda\delta\delta\epsilon(\nu)$ ).

NABAL (\γ\_{ii}, Naβάλ).—S. of Hebron lies one of the few fertile stretches of Judæa, where the soil, less stony than usual, succeeds in covering the limestone skeleton of the country (cf. G. A. Smith, Hist. Geogr. p. 305 f.). In this district, which was settled by the clan Caleb, were clustered Maon, Ziph, and Carmel, on the last of which Nabal lived as a sheepmaster. So it can be understood why, according to Jos. (Ant. VI. xiii. 6), he was a Ziphite, according to 1 S 25° (LXX) a Carmelite, according to v.º a Calebite. His shepherds drove the flocks (3000 sheep and 1000 goats), at the suitable season, to pasture on the uplands of Carmel. Annually the sheep-shearing was celebrated with a feast 'like the feast of a king,' v.ºº. The farmer was of considerable wealth, but of a surly and niggardly temper.

In the desert adjoining this district, David, seeking refuge from Saul, arrived. Living in the wilderness of Maon (so read with LXX for Paran, v.'), he and his men subsisted by levying blackmail from the sheepmasters of the richer plateau above them. From these they exacted a certain tribute in return for their services in protecting the grazing

flocks against the wandering Bedawin of the desert. Accordingly, at one of the shearing-feasts 10 men appeared from David's camp to require this tribute. But Nabal was 'flown with insolence and wine,' and sent back an insulting taunt about the increase of masterless men in the district. His servants, knowing their master's intractable character too well to interfere directly, appealed to his wife, who had woman's wit enough to see and instantly to set about averting the danger. Abigail, having loaded several asses with (probably) something more than the expected tribute, set off to seek David. Shemet him already on the way to execute signal vengeance. Her subtle flattery (which suggested that one so 'senseless' [nābād, see Driver, Par. Psatl. 457] was not worth his anger), her gifts, perhaps herself, softened the leader, and he returned to his camp gratefully acknowledging that she had saved him from a crime. In the morning the shock of discovering what peril he had run, following on his over-night debauch, frightened Nabal into some kind of fit, from which after a few days he died. Thereupon Abigail became wife to David.

NABARIAS (B Ναβαρείας, Α -ρl-), 1 Es 9<sup>44</sup>, appears to correspond to Hashbaddanah in Neh 8<sup>4</sup> (השברנה for השברנה).

NABATHÆANS (οἱ Ναβαταῖοι, 1 Mac 5<sup>26</sup> 9<sup>35</sup>).—See NEBAIOTH.

NABOTH (mizz, Naβουθαί).—A native of Jezreel, who in the time of Ahab owned land near that town. At that period Jezreel was the residence of the kings of Israel (1 K 18<sup>201</sup>, 2 K 8<sup>29</sup>), having probthe kings of Israel (I K 18<sup>201</sup>, 2 K 8<sup>20</sup>), having probably risen into importance through Ahab's policy of allying himself with Phonicia. Naboth's land, which he cultivated as a vineyard, lay close to the royal palace (I K 21<sup>1</sup>, Heb.) or threshing-floor (ib. LXX). The statements are compatible, since the palace at Jezreel was near the city wall (2 K 9<sup>20</sup>). On this piece of ground Ahab cast covetous eyes, since it lay convenient to his own property. Accordingly, he approached Naboth with the offer either to purchase his vineyard or to exchange it for ground of similar value. But, whether he was attached by sentimental ties to his family property, or whether he was governed by an unwritten custom that land should descend in the same tribe and house (cf. Nu 36), Naboth declined the proposal (1 K 21<sup>3</sup>). Ahab, himself a Hebrew who understood his people's temper, was about to desist, however unwillingly (v.4); but Jezebel, a foreigner with Phenician ideas of royal authority, overruled him to grasp with the strong hand. She used his authority to have Naboth falsely accused of speaking evil of God and the kirns and strend to death but the least authority. the king, and stoned to death by the local authorities (v. 517.). The deed made a lasting impression upon the popular mind. Elijah pronounced doom upon the tyrant (v. 2011.); and the deaths of Joram and Jezebel, which took place at the hands of Jehn near this very spot, were regarded as Divine retribution upon the guilty house (2 K 9<sup>257, 367</sup>). In 1 K 22<sup>28</sup> (R) and by Jos. (Ant. VIII. xv. 6) it is even stated that, when Ahab's body was brought home from Ramoth-gilead, his blood was washed from the chariet by the state. from the chariot by the pool of Jezreel.

This incident has many points of interest. It gives a tantalizingly inadequate glimpse into the existence of local tribunals in Israel at that period. It serves to prove the power of local customs, which none but the strongest kings dared override (contrast Josiah's conduct, 2 k 23). It shows how the opposition against Ahab's house arose from social as well as religious feelings, and that prophets like Elijah were influenced by such feelings. It gives, too, one of the sources from

which sprang such condemnations of the kingdom as 1 S 810ff.

LITERATURE.—Kittel, Hist. of Heb. il. 209; W. R. Smith, Proph. of Isr. 77, 87; Cornill, Isr. Prophetismus, 32f.; Wellhausen, Comp. d. Hex. 287.

A. C. WELCH.

NABUCHODONOSOR (Ναβουχοδονοσόρ).— The Gr. form of the name Nebuchadrezzar (which see). This form is retained by RV in the following passages in the Apocrypha: 1 Es 1<sup>2007</sup>, Ad. Est 11<sup>2</sup>, Bar 1<sup>207</sup>. In To 14<sup>15</sup> and throughout the Bk. of Jth the name is given as Nebuchadnezzar.

NACON.—The threshing-floor of Nacon ( $\hat{\rho}$ )  $\hat{\gamma}$   $\hat{\gamma}$   $\hat{\gamma}$   $\hat{\beta}$   $\hat{\beta}$   $\hat{\delta}$   $\hat{\delta$ 

J. F. STENNING. NADAB (μς).—1. (Ναδάβ) the eldest son of Aaron (Ex 6<sup>23</sup>, Nu 3<sup>2</sup> 26<sup>60</sup> [all P], 1 Ch 6<sup>3</sup> (Hob. 6<sup>81</sup> 24<sup>1</sup>). Along with his father, his brother Abihu, and seventy of the elders of Israel, he accompanied Moses to Sinai, and 'saw the God of Israel' (Ex 24<sup>1, pt.</sup> [probably J]); was admitted, along with his three brothers, Abihu, Eleazar, and Ithamar, and their father Aaron, to the priestly office (Ex 281 1012. and on the very day of his consecration (Lv  $10^{126}$  compared with ch. 9) he and Abihu perished (Lv  $10^{1.2}$ , Nu  $3^4$   $26^{61}$  [all P], 1 Ch  $24^2$ ) for offering 'strange fire' (A):  $\aleph$ 8, LXX  $\pi \hat{\nu} \rho$   $d\lambda \lambda \delta \tau \rho \iota \rho \nu$ 9, i.e. strange to the requirements of the law. Wherein the transgression of Nadab and Abihu is supposed to have consisted is not clear. It is often suggested that 'strange' fire means fire taken from a common source instead of from the altar (cf. Lv 1612, Nu 1711 (בהן אש Perhaps של should be taken in the sense of mys 'an offering made by fire,' in which case the offence may have lain in presenting an unauthorized (cf. אָשֶׁר לֹא צָה אֹתָם, 'which he commanded them not,' v.¹) offering. It is possible at the same time, but not certain (see Dillm.), that the writer may have had in view the prescriptions of Ex 30<sup>716, 340</sup> regarding the offering of incense. In v. 66 (which, however, probably belong to a later stratum of P) Aaron and his surviving sons are forbidden to mourn for the victims of the Divine judgment. There is not the slightest warrant for the idea (found in the Midrash and in Aphraates, Hom. 14, and repeated even in modern times) that the prohibition (v. 8t.) against the use of wine or strong drink by priests on duty implies that Nadab and Abihu were intoxicated when they committed their fatal offence. Any superficial plausibility which this notion might derive from the context is entirely taken away by the circumstance that v. 8t. are really a fragment, having no connexion with either v. 6t. or v. 5.

2. A Jerahmeelite family name, 1 Ch  $2^{28.30}$  (Na $\delta d\beta$ ). 3. A Gibeonite family name, 1 Ch  $8^{30}$  (B A $\delta d\delta$ ), A Na $\delta d\beta$ ) =  $9^{36}$  (BA Na $\delta d\beta$ ).

**4.** A king of Israel, son of Jeroboam, 1 K  $14^{20}$  (A  $N\alpha\beta d\tau$ ; the passage is wanting in B). He reigned for two years (c. 915-914 B.C.),  $15^{20}$ . While engaged

in besieging Gibbethon, which was then in the possession of the Philistines, he was assassinated by Baasha, who seized the throne and extirpated the dynasty of Jeroboam,  $v.^{27.0}$ . In  $vv.^{25.27}$  B has  $N\alpha\beta\delta\theta$ , in  $v.^{31}N\alpha\beta\delta\tau$ , while A has in all these passages  $N\alpha\delta\delta\theta$ .

NADABATH (A Ναδαβάθ). — An unidentified town (?), east of the Jordan, in the neighbourhood of which a wedding party of the sons of Jambri was attacked, and many of them slain, by Jonathan and Simon the Maccabees, 1 Mac 9<sup>37π</sup>. Josephus (Ant. XIII. i. 4) gives the name as Γαβαθά (cf. Ν Γαβαδάν); Syr. has Nabath; Vulg. Madaba (i.c. Medeba), as in preceding verse.

NAGGAI (Ναγγαί, AV Nagge).—An ancestor of Jesus, Lk 3<sup>20</sup>. It is the Greek form of the Heb. name το Nogah (which see).

Literature.—SWP vol. i. sheets v. vi.; Guérin, Galilée, i. 887 f.; Dillin. on Jos 19<sup>30</sup>; Neubauer, Géog. du Talin. 189. C. R. CONDER.

NAHALIEL ('σ') 'torrent-valley of God'; B Μανα(να) ήλ [the letters in brackets are inserted above the line], A Νααλήλ; the word is imperfect in F; Luc. Ναχαιήλ; Vulg. Nahaliel).—A station in the journey from the Arnon to Jericho (Nu 21<sup>19</sup> [JE] only), either Wādy Waleh, a N.E. tributary of the Arnon (see Bliss's map in PEFSt, 1895, p. 204, and cf. p. 215), or the Wādy Zerka Ma'in, farther north, which runs into the Dead Sea (see G. A. Smith, HGHL p. 561 f.). The name does not occur in the itinerary of Nu 33.

A. T. CHAPMAN.
NAHALLAL, NAHALOL.—See NAHALAI.

**NAHAM** (1951). — The father of Keilah the Garmite, 1 Ch  $4^{19}$  (B  $N\alpha\chi\ell\theta$ , A  $N\alpha\chi\ell\mu$ , Luc.  $N\alpha\sigma\ell\mu$ ).

NAHAMANI (1271).—One of the twelve heads of the Jewish community, Neh 7' (B Ναεμανεί, Α Ναεμανί, Luc. Ναιμανί), omitted in the parallel passage Ezr 2'. In 1 Es 5's he is called Eneneus (RVm Enenis; B Ενηνις, Α Έννηνιος, Luc. Νεμανί).

NAHARAI (1753;  $\Gamma \epsilon \lambda \omega \rho \dot{\epsilon}$ ; Naaraï).—The armourbearer of Joab, a native of Beeroth (2 S 23°7). In the parallel list (1 Ch 118°) the name is written Nahari (1753; B Na $\chi \omega \rho$ ; A Naa $\rho a \dot{\epsilon}$ ; AV, RV Naharai), the form given by the AV at 2 S 23°7.

NAHASH (#9, 'serpent,' Na4s).—It is probable that all the passages in which this name is found refer to the same individual. He was king of the Ammonites at or before the beginning of Saul's reign, and did not die until David had been some years established at Jerusalem (2 S 10<sup>3</sup>, 1 Ch 19<sup>3</sup>). Such a length of reign is quite possible even if we

accept the tradition that Saul reigned forty years (Jos. Ant. vi. xiv. 9, Ac 1321), but there are many indications that this estimate is excessive. It was 'about a month after' Saul's election by lot at Mizpah (1 S 10<sup>27</sup> LXX, reading מָּבְּחָרָשׁ for מָּבְּחָרָשׁ, so Jos. Ant. VI. v. 1) that Nahash made that attack on Jabesh-gilead which called forth all Saul's latent capacities as a leader, and thus vindicated to all Israel the choice of the Lord. The later narrative, on the other hand, implies (1 S 1212) that the attack of Nahash had been the immediate cause of the people's demand for a king. This discrepancy may be solved, of course, by supposing that Samuel refers to Nahash as having been a standing menace to Israel, and that the invasion of 1 S 11 had been preceded by many similar incursions. Josephus (Ant. VI. v. 1) takes this view, and says that Nahash was in the habit of putting out the right eyes of all Israelites beyond Jordan that came into his power, 'that when their left eyes were covered by their shields they might be wholly useless in war.' The same writer asserts (Ant. vi. v. 3) that Nahash was slain on this occasion; but that is merely his inference from the completeness of the Ammonite defeat. We are not told anything more Amnonite deteat. We are not told anything more about Nahash until the notice of his death (2 S 10<sup>1, 2</sup>), where we learn that he had 'shown kindness to David in time past,' probably after he left Achish (1 S 21<sup>1b</sup>), and because they were both Saul's enemies (so Jerome, Qu. Heb., in loc., and 1 Ch 192). Again, when David was at Mahanaim, 'Shobi the son of Nahash of Rabbah of the children of Ammon' was one of those who befriended him (2 S 17<sup>27</sup>). There seems no reason why we should suppose with Ewald (*HI* iii. 185) that this Nahash was only a member of the royal house, and not the king himself. These two notices seem to indicate some special connexion of Nahash with David, and lend some confirmation to Stanley's theory that the mother of David and his brothers had been originally wife of Nahash the king, and mother of Abigail and Zeruiah (2 S 1725); \* see JESSE. It is fair to add that Wellh. (Text d. BB Sam. p. 201), followed by Gray (Heb. Prop. Names, 91), regards שון אין as a textual error introduced from שין בין היין ס of v. שין אווים itself he thinks probably stood originally in the margin. Budde (SBOT, ad loc.) is inclined to think that Wellh. may be correct, although he himself emends שין to שי (Jesse), which agrees with the facts (cf. 1 Ch 2 ld) and is supported by Luc Tessal.

N. J. D. WHITE.

NAHATH (1933).—1. A 'duke' of Edom, Gn 36<sup>18</sup>. (A Νάχομ,  $D^{\text{ell}}$  Ε Νάχοθ) <sup>17</sup> (A D Νάχοθ, Ε Νάχωρ) = 1 Ch 1<sup>37</sup> (B Νάχες, Α Νάχεθ). The clan of which he is the eponymous head has not been traced. 2. A Kohathite Levite, 1 Ch 6<sup>26</sup>(Hob. <sup>11</sup>) (BA Καῖναθ, Luc. Νάαθ), called in v.<sup>34</sup> Toah, and in 1 S 1<sup>1</sup> Tohu. Kittel (on 1 Ch 6<sup>26</sup> in SBOT) holds this last to be most probably the original form of the name (so also Driver, Text of Sam. p. 3). As Kittel points out, who might readily be corrupted into either via or num, and the latter again into num. 3. A Levite in the time of Hezekiah, who was one of the overseers, under Conaniah and Shimei, in charge of the oblations and tithes and dedicated things, 2 Ch 31<sup>18</sup> (B Μάεθ, Α Νάεθ).

NAHBI (τρ., B Ναβεί, A Ναβά).—The name of one of the twelve men sent by Moses to spy out the land, Nu 13<sup>14</sup>. He was the representative of the tribe of Naphtali.

NAHOR (nin); LXX and NT Na $\chi\omega\rho$ : in AV Jos 24°, Lk 3³4, Nachor).—1. The grandfather of Abraham, son of Serug, and father of Terah (Gn 11²2-²a)

\* Another explanation makes of Nahash a female name, supposing her to be the mother of Abigail.

P, 1 Ch 126, Lk 334). 2. Grandson of the preceding; son of Terah, and brother of Abraham and Haran (Gn 1126, 27 P; cf. Jos 242). In Gn 1129 (J) he is said to have married Milcah, the daughter of his brother Haran; and in 2220-24 (J) twelve sons of Nahor are enumerated, viz. eight by Milcah: Huz,—i.e. Uz, RV Uz, the people of Job's fatherland,—Buz (the tribe of Elihu, Job 32°), Kemuel (the father of Aram), Chosed, Hazo, Pildash, Jidlaph, and Bethuel (father of Laban and Rebekah; cf. Gn 24<sup>15, 24, 47</sup> 29°); and four by a concubine Re'umah: Tebah, Gaham, Tahash, and Ma'acah. In 24<sup>10</sup> (J) the city in Aram-naharaim to which Abraham's servant goes to find a wife for Isaac, i.e. (2743 294) Haran, is called the 'city of Nahor'; and in 3163 (JE) Laban, in concluding the covenant with Jacob, on the borders of Gilead, appeals to 'the God of Abraham, and the God of Nahor,'—the God, that is, or rather, perhaps, the gods, \* of their respective ancestors,—to judge between them. These are all the passages in which Nalior is mentioned. His 'sons' are certainly in several cases (see Buz, 'Uz, Aram, Hazo, Tebah, Ma'acah, Chesed),† and probably in most, not individuals, but tribes (cf. Ishmael, vol. ii. p. 503b, 504<sup>a</sup>; JACOB, p. 533<sup>b</sup>-534<sup>s</sup>): he is thus the unit from which were derived by the Hebrew genealogists a group of Aramaan tribes, resident on the E. or N.E. of Canaan, just as other groups of tribes were derived from Ishmael (Gn 25<sup>12-16</sup>), or from Abraham's concubine Keturah (25<sup>1-4</sup>). Whether Abraham's concubine Keturah (25'-4). Whether or not Nahor was an historical individual, must remain an open question: his relationship to Abraham, whether real or assumed, served in either case as a measure of the degree of relationship which was held to subsist between the tribes referred to him and the descendants of Abraham (cf. above, U.cc.). If the name be not that of an individual, it will naturally be that of a lost tribe, resident once about Haran in Mesopotamia, of which the 'sons' of Nahor were regarded as offshoots, and recollections of which were preserved by the Hebrews (cf. Ewald, *Hist.* i. 310 f., 268 f.): in this case, the marriage of Nahor with his nicce Mileah will represent the analgamation of two kindred tribes (Dillm. on Gn 11<sup>29</sup>, who compares 16<sup>1</sup> 21<sup>1</sup> 36<sup>26</sup>). As contrasted with Abraham, the ancestor of the Israelites (and Edomites), Nahor appears as the ancestor of a group of Aramaan tribes, the most prominent members of which (on account of their connexion with Isaac and Jacob) are LABAN and Rebekah. The contrast between the two parallel branches appears plainly in Gn 31<sup>52</sup> (quoted above), and Jos 24<sup>2</sup> 'Your fathers dwelt of old time beyond the River, even Terah, the father of Abraham, and the father of Nahor: and they served other gods.' The allusion in the last cited passage is to the common home of the ancestors of the Abrahamidæ and Nahoridæ, 'beyond' the Euphrates, i.e. in Aram-naharaim, or 'Mesopotamia,' between the Euphrates in the upper part of its course, and the Habor (now the Khabour), in which was the ancient and important \*Khabour), in which was the ancient and important city of Nahor' (see above), the site of which is well known (see HARAN). There seems, it may well known (see HARAN). be added, to be much probability in Dillmann's view (on Gn 11<sup>28, 81</sup> 12<sup>1</sup>; cf. 24<sup>4, 7</sup>) that, according to J, Haran was the native and not merely the adopted home of Nahor and Abraham (cf. above, vol. i. p. 15\*).

S. R. Driver. vol. i. p. 15a).

\* The verb 'judge' is in the original a plural (though this, in view of Heb. usage, does not absolutely settle the question); ct, also Jos 242 ml. The words 'the God of their father' (i.e. of Terah), which in the Heb. follow awkwardly after 'judge,' are not in LXX, and are very probably a gloss, designed to identify expressly the God of Abraham with the God of Nahor.

to both Bethuel and Laban, Gn 2520 255 3120. 24.

NAHSHON (וושיקו [meaning doubtful] LXX and NT Naa $\sigma(\sigma)$   $\omega_P$ , brother-in-law of Aaron, Ex 6<sup>23</sup> P, descendant in the 5th generation from Judah, 1 Ch 2<sup>9t</sup>, and prince of the tribe of Judah, Nu 1<sup>7</sup> 2<sup>3</sup> 7<sup>12.17</sup> 10<sup>14</sup> P, is mentioned as one of the ancestors of David, Ru 4<sup>20</sup>, 1 Ch 2<sup>10t</sup>, and of Christ, Mt 1<sup>4</sup>, 11. 2<sup>82</sup> Lk 382.

## NAHUM.--

i. Name and Place in the Canon.
ii. The Prophet's birthplace.
iii. Contents of the Book of Nahum.

v. Occasion and date of chs. 2 and 3.
vi. General characteristics of chs. 2 and 3. Literature.

i. NAME AND PLACE IN CANON.—The Book of Nahum occupies the seventh place in the list of the so-called 'Minor Prophets' in the second division of the OT Canon. Its twofold title (Nah 11) at once indicates the subject-matter of the book, 'the oracle' of (concerning) Nineveh (RVm), and furnishes us with the sum of our knowledge regarding its author, 'the book of the vision of Nahun the Elkoshite.' In our canonical Scriptures Nahum is not elsewhere mentioned; in extra-canonical Jewish writings he is referred to in 2 Es 140 and by Josephus, who gives (Ant. IX. xi. 3, Niese, § 239 ff.) a free rendering of Nah 28-18, and assigns to him an impossible date (see below).

Several persons bearing the name Nahum are known to later Jewish history—among them an ancestor of Joseph of Nazareth (Lk 323), and a well-known teacher of the 2nd cent., 'Nahum the Mede' (for whom see Bacher, Die Agada der Tannaiten, i. p. 359), more than once cited in the Mishne (Shabh ii. l. etc.). Another Nahum is Annauen, i. p. 359), more than once cred in the Mishna (Shabb. ii. 1, etc.). Another Nahum is there described as a scribe or copyist (בְּלְבָל larius, Peah, ii. 6). Traces of still another have been discovered by Clermont-Ganneau ('Épigraphes heb. . . . sur des ossuaires juifs,' in Rev. Archéol. Ser. III. t. i. No. 41). The name appears, clea to beye heave new typesument and the server the server of the contraction. also, to have been not uncommon among the Phonicians (see Bookh, CIG ii. 25, 26; CIS i. No. 123a3. b3).

Nahum (DIR) nahhûm—in some codices and editions less correctly DIR nahûm—LXX and NT editions less correctly and naimm—LAA and N1 Naoύμ, in Josephus and CIG (above) inflected Naoύμο, μου, Vulg. Nahum) signifies primarily 'full of consolation or comfort,' t then, perhaps, 'comforter, consoler' (Jerome, consolator), and is probably contracted from the fuller form [177] 'J' is full of consolation' (cf. נְּהֶלְיָה Nehemiah, and the later Jewish name חמיה Clermont-Ganneau, Sceaux et cachets israélites, No. 42 [1883]).

ii. THE PROPHET'S BIRTHPLACE.—Of the per-11. THE PROPHETS BIRTHPLACE.—Or the personality of the prophet, as has been said, nothing whatever is known they beyond the description of him in the title of his book as the Elkoshite (ψρρκη, LXX Έλκεσαῖος, Vulg. Elcesæus), that is, in all probability, as a native of Elkôsh.§ The OT, unfortunately, gives no clue to the situation of Elkôsh. Four sites have been proposed at a propher. various times and with varying degrees of probability. (1) As a product of mediæval fancy, we

\* This rendering of אייָם 'utterance, oracle' (cf. the common expression by Ruy 'to lift up the voice') is certainly preferable to the AV and RV rendering 'burden.'
† The form nahhum is intensive (see Gesenius-Kautzsch, Heb.

Gram. 1898, § 84b, g), from the intensive stem of DRI 'to comfort, console.' The common adjectives יחנון 'full of pity,' באון 'full of compassion,' support by analogy the rendering given above, in preference to an original substantival signification, consolation, comfort' (so Orelli and others). From the same root are derived several other proper names, such as Nehemlah,

Menahem, Nachman, etc.

1 The numerous legends that gathered round his name have been collected by Carpzov in his Introductio, iii. 386 ff.

§ The Targum renders קבית קושי as if Nahum were 'of the family of Koshi.

may dismiss the identification of Elkôsh with the Christian village of Alkûsh, about 27 miles (c. 43 kilometres)\* due North of Mosul, where the tomb of the prophet is still shown (see Layard's description in Nineveh and its Remains (1849), i. 233). This identification, according to Assemani, does not date beyond the 16th cent. of our era, and is, moreover, easily accounted for by the sub-Jonah, whose book also deals with Nineveh, is shown at Nebi Yunus to the South of Mosul. (2) Equally inadmissible is the view of Hitzig and Knobel, that Elkosh was the original name of the town which in the 1st cent. bore the name of Καφαρναούμ (so the best authorities, see CAPER-NAUM), i.e. probably נותר לפר in יקסר the village of Nahum, since, apart from the somewhat precarious etymology, there is nothing in the genuine portion of the Book of Nahum (see below) to suggest a Galilean origin for its author. objection of the Sanhedrin, moreover, expressed in the words, 'Search and see that out of Galilee ariseth no prophet' (Jn 752 RV), could scarcely have taken so emphatic a form had Capernaum been associated in the popular mind with our Nahum. (3) A similar objection applies to the identification, dubious on other grounds, which we owe to Jerome. In the prologue to his commentary on Nahum, he writes: 'Helkesei † usque hodie in Galilæa viculus [est], parvus quidem et vix ruinis veterum ædificiorum indicans vestigia; sed tamen notus Judwis, et mihi quoque a circum-ducente monstratus.' The hamlet which was pointed out to Jerome by his guide as the ancient Elkosh is generally identified with the modern Elkozeh in Northern Galilee, a short distance to the north-east of Ramieh. (4) Inasmuch as the date of Nahum's prophecy—long after the fall of the Northern Kingdom (see below)—rather points in the direction of a Judæan origin, the most probable location of Elkôsh is that furnished by a collection of traditions known as the Lives of the Prophets, formerly ascribed to Epiphanius, from A.D. 367 bishop of Constantia, the ancient Salamis, in Cyprus.

of Constantia, the ancient Salamis, in Cyprus.

This curious work exists in a double form, Greek and Syriac. The former was first published as a genuine work of Epiphanius by Torinus in 1529, in more recent times by Migne (vol. xliii.), Tischendorf (Anecdota Nacra, etc., 1855, 21861), Hall (Journ. of Noc. of Bibl. Excycsis, June 1886, p. 29 ff.), and, from two fresh MSS, Nestle (Die dem Kriphanius zigeschriebenen Vitae Prophetariun in doppelter Recension, pp. 16-35). As to the Syriac form of these traditions, we find them not only appended to the respective prophets in Paul of Tella's Syriac translation (616-617 A.D.) of Origen's Hexaplar text of the Greek OT (see Ceriami's Codex Syro-hexaplaris Ambroxianus photoithographics editus in his Monumenta Sacra, etc., vol. vii. 1874), but in a more or less independent form in various quarters (see Budge, The Rook of the Bee [1886], 74 ff.: Nestle, Syriac Grammar [1896], Chrestomathy, 86f.; translated, Budge, ibid. 69 ff.: Hall (from a Philadelphia MS) in Journ. of the Soc. of Bibl. Exeg. [1887], 28f.). 28 ff.). 28

The portions of the Vitæ Prophetarum relating to Nahum have been edited in Greek and Syriac with full critical apparatus by Nestle (op. cit. 43 f.). The former, in the oldest MS from 'the 6th or 7th century, begins thus: Ναουμάπδ Έκκεσι πέραν τοῦ Ἰσβηγαβαρίν φυλῆς Συμεών, which corresponds to the Syriac: 'Nahum was from Elkôsh (in the country) beyond Bêth Gabrê (בית נברא) of the tribe of Simeon.' Now Beth-Gabre, the Betogabra of

\*So, according to the latest map of this district by Colonel Billerbeck, in the joint monograph by Billerbeck and Jeremias on 'The Downfall of Nineveh and the Prophecy of Nahum of Elkosh' (see the Literature at the end of article).

†This form of the word is itself suspicious, since it presupposes the LXX form of the adjective 'Examples.

A separate off-print from his Marginalien und Materialien.

For further details as to the origin and relation of the recensions see the exhaustive investigation of Professor Nestle (cited above), which the author kindly put at the present writer's disposal for the purpose of this article.

Nestle was the first to call attention to the important bear-

Ptolemy, is beyond question the modern Beit-Jibrin, the ancient Eleutheropolis-about halfway, as the crow flies, between Jerusalem and Gaza—an identification confirmed by the variant בית הרוכ (= Home of the Free) found in some of the Syriac MSS (Nestle, op. cit. 44, and the Chrestomathy, p. 89). Unfortunately, the uncertain authorship of the work in question prevents us from regarding the above statement as a genuine local tradition, as would have been the case had the Lives of the Prophets been a genuine work of Epiphanius, who was born near Eleutheropolis, and there ordained a presbyter. Still we do not hesitate to characterize this tradition as the most credible of the four here adduced. Nahum was thus, it is allowable to infer, a fellow-countryman of Micah, whose native place, Moresheth (Mic 11), according to Eusebius and Jerome, lay a little to the east of Eleutheropolis.

iii. CONTENTS OF THE BOOK OF NAHUM .- The genuine oracle of Nahum is preceded by a psalm (12-21.8) which still bears manifest traces of an original alphabetic or acrostic arrangement (see next section). It begins by asserting the qualities and attributes of J" as 'a God jealous and avenging' (12; cf. RVm), passing into a fine description of the effect on the world of nature when J" appears for judgment on His enemies (vv. 8. 6. 8).\* To those, however, who truly wait upon Him, the J" is true and faithful (v.7). In the second part of the psalm (v.9", where the original alphabetic arrangement has largely disappeared, and where the present text is in some places extremely corrupt, the poet announces the destruction of the enemies of Judah; the yoke that has pressed so long and so heavily on the necks of God's people shall be broken, the enemies' gods cast down, and they themselves brought to an utter end. Already the bearer of the glad tidings is speeding over the hills of Judah (1<sup>15</sup>[Heb. 2<sup>1</sup>]); the final restoration of J"s

land and people is at hand (2<sup>2</sup> [lieb. 3), ‡

In chs. 2<sup>1, 3</sup>-3<sup>19</sup> we have the genuine 'oracle concerning Nineveh.' § It consists of two parts, corresponding to the present division of the chapters. (n) The first part may be described as a triptych, in which, with a few bold and effective strokes, the prophet-artist has painted in succession the siege, the capture, and the final overthrow of Nineveh, with its resulting desolation. First of all he portrays the approach of the besiegers in scarlet uniforms and with steel-mounted | chariots (21.3) then the stubborn fights in the outplaces and broadways without the walls (v.4). On this follows ¶ (v.5) the hurried muster of the troops within, the rush to the walls to place in position the engines of defence (?; see MANTELET).\*\* But the immediate source of danger is elsewhere, for the protecting dams and sluices are burst open (v.6); the result is panic in the palace, which is immediately

ing of the Syriac reading in the ZDPV i. 122 ff. A translation of his communication appeared in the PEFSt, 1879, p. 136 ff.

\* In v.8a in place of the obscure and irrelevant apipp (MT) the parallelism requires us to read with most of the VSS בַּקְמָיו

paralieism requires us to read with most of the vss γτης (Buhl, ZATW v. 181; cf. Davidson, in loc.).
† Adopting the reading of the LXX τοῦς ἐπομένουσιν = γγρ⟩
† The references in the sequel to ch. 2 follow the versenumeration of the EV, which is one less throughout than in the Hebrew.

§ The words, 'Thus saith J",' now found at the head of 112.

are probably part of the original introduction to the oracle.

A conjectural rendering (cf. RV), the meaning of the original min being unknown. The AV rendering 'torches'

original http://www.rests on a mistaken etymology.

"I The proposal of Billerbeck and Jeremias to insert ch. 312-15
between 24 and 29 is quite unnecessary.

""Heb. "Job", lit. 'the coverer,' RV 'mantelet,' apparently a military terminus technicus. An elaborate and technical account of the Assyrian 'siege artillery,' both for attack and defence, with numerous illustrations, is given in Billerbeck and Jeremias' monograph already cited. stormed, and the queen (?)\* captured and carried off amid the lamentations of her maids (v.7). In vain is every effort to rally the panic-stricken defenders (v.8); the city is given over to be looted by the victors (v.9). The final tableau shows the climax of the catastrophe. Nineveh has disappeared! Where stood the queen of cities there is now a 'wild and weary waste' (if thus we may imitate the alliteration (būkāh ūmēbūkāh ūmēbullāķāh) of the original, v.10); to the prophet's unfeigned delight, the Assyrian, once brave as a lion and as cruel, has passed away for ever (v.112.).

unfeigned delight, the Assyrian, once brave as a lion and as cruel, has passed away for ever (v. 11st.).

(b) In ch. 3 the prophet, enamoured of his theme, returns to fill in certain details of the overthrow of this 'city of blood' (v.'), and furnishes us with a graphic word-picture of the final attack (vv. 2. 8)—

'Hark! the whip! Hark! the rattle of the wheels;
And (see!) the prancing steeds and the bounding charlots,
The horsemen charging (?).

The horsemen charging (?),
And the flash of the swords and the glint of the spears,
And the masses of the slain and the heaps of the dead.'

And why has this fate overtaken Nineveh? Because of her unprincipled diplomacy, her harlotries, and her witchcrafts (v.4). As punishment, she will be exposed like a vulgar adulteress to the gibes and insults of the nations she has so long oppressed (vv.5.6). The prophet further dwells complacently on the thought that, in Nineveh's hour of doom and shame, there will be none to comfort her or to bewail her (v.7). Let her not think she will fare better than No-amon, the mistress of Upper Egypt (v.8t.). With the measure wherewith she meted out crueltics unspeakable to the Egyptian capital, it shall be measured to Nineveh in her turn (v.10). For her fortified outposts, with their elleminate defenders, already fall before the invader as readily as ripe figs fall into the mouth of one who but shakes the laden figtree (v.12). Now is the time to prepare for the siege. 'To the mortar-tub and the brick-mould' is the prophet's sarcastic call (v.14)! The countless merchants of the city, a heterogeneous and unpatriotic throng, vanish as locusts vanish with the morning sun. And thus, to the accompaniment of a universal song of joy on the part of all that have suffered at her hands, the city of blood makes her final exit from the stage of history (v.19).

iv. Integrity and Authenticity of the Book.—Until a very few years ago the authenticity of all three chapters of the Book of Nahum was regarded as beyond suspicion, even by scholars so 'advanced' as Kuenen (Onderzoek², ii. § 75), Wellhausen (Skizzen u. Vorarbeiten² [1893], p. 155), and Cornill (Einleit.² 1892, p. 188). Since 1880, however, in various publications (ZDMG xxxiv. 559ff., Carmina Vet. Test. metrice, 212, etc.) Bickell—in this following out indications given by Frohnmeyer and Franz Delitzsch—had maintained that Nah 1²-6 was in reality an alphabetic poem, whose original structure was easily recoverable by means of various slight alterations and transpositions (see esp. ZDMG, ut supra). In 1893 a more successful attempt was made on the same lines by II. Gunkel in Stade's ZATW (xiii. 223 ff.). In this essay Gunkel succeeded, in the present writer's opinion, not only in proving more conclusively than Bickell had done the existence in vv.²-9 of a clearly designed acrostic arrangement for the

\*The word of the original, אַרְאָר, is still unexplained (AV, RV as a proper name, Huzzab, but see margins). The Targum has already אחסילס 'queen.' See art. Huzzab. The following איני מוס לעבוד האיני מוס איני מוס איני

first half of the Hebrew alphabet (x to 5), but in establishing a strong probability that the same arrangement for the second half (p to n) originally appeared in the verses following (1<sup>31</sup>–2<sup>3</sup> of the Hebrew numeration, see footnote above). Bickell has since issued a much improved edition of his restoration (Beiträge zur Semit. Metrik, 1894, being an off-print from the Sitzungsberichte of the Vienna Academy of Sciences), which in its turn has suggested to Gunkel a few emendations, incorporated in a note to his Schöpfung u. Chaos (p. 120 f.). Finally, Nowack in his commentary (see the Literature at end of article) has adopted, and in some points has still further improved upon, the results of his predecessors. As regards the opening verses at least (vv.<sup>2-9</sup>), the changes which the acrostic scheme demands are not more numerous or more radical than those required in several of the other alphabetic poems of the OT, as we propose to show (see small type below). An alphabetic psalm, however, must by its very nature be complete; hence we do not hesitate to affirm that in Nah 12-28 we have the remains of an acrostic psalm, of which the first nine verses (\* to \*) have suffered little, the next four or five (\* to \*) considerably more, and the rest (5 to n) so much that their restoration can never be more than an academic exercise, -words which A. B. Davidson has applied rashly, as we think, to the whole of ch. 1. Each of the twenty-two verses consisted originally of two lines each, each line containing, as a rule, three or four accented words.

The following brief note will sufficiently indicate the plan of the psalm: the N-verse consists of v.2a of the MT, i.e. of two lines of four words each, vv. 2b.3a (71)7') being probably part of the D and 1 verses introduced here by an editor to qualify the general statement in v.2a (Nowack). The N-verse, two lines of three words each, extends from IDDD to end of v.3; the I-verse = v.4a also of six accented words. At v.4b a 7 is needed, and here the VSS certainly had two different verbs, which renders the first YDDN suspicious; read perhaps YM (Gray, Cheyne) or NM (Now.). The T-verse = v.5a, 1 = v.5b; for 1 it is only necessary to transpose DDI to the head of 6a and read YDD (71 = 6b, D=7a. For 'we would propose to read YM (6. Ps 1385), or, as hitherto proposed, delete 1 of YM in v.7b. Now in all these ten verses, involving only one serious interference with MT, we have surely something more than chance coincidences, namely, a conscious design which cannot be explained by the fact that the author allowed himself here and there and perhaps half accidentally to follow the alphabetic order (Driver, Expos. Times, ix. (1897), p. 119—review of Nowack's Kleine Propheter).

Regarding the author of this psalm, we can only say that he lived at some period of the post-exilic history,† when the yoke of the heathen pressed heavily on the people of God, whose coming to judge the oppressor and vindicate His own could not be long delayed. The poem, it was felt at a later period, fitly expressed the general principle of God's avenging justice, of which the destruction of Nineveh was the most striking concrete illustration. Accordingly, it was prefixed as an appropriate introduction to the genuine 'vision of Nahum the Elkoshite.'

v. Occasion and Date of Chs. 2 and 3.—The prophecy itself provides us with two fixed points between which its date must fall. These are the

\* The English-speaking student will find a very lucid account of the proposals of these scholars, with some original suggestions, in G. Buchanan Gray's article, 'The Alphabetical Poem in Nahum,' Expositor, Sept. 1898.

† The artificiality of the acrostic form is generally supposed to

the artificiality of the acrostic form is generally supposed to point to a late rather than an early date for the poems which show this construction. If our psalm is really post-exilic, then 115a (11eb. 21e) is taken from is 527. Other parallels, such as 17 (restored text) = La 325 115b (71) D'E') = Ps 618, partake too much of the nature of theological commonplaces to permit of an assertion of borrowing on the one side or the other, while almost all the points of contact adduced by older commentators (see esp. Strauss, Nahumi Vaticin., Prolegom. xv 1.) are quite illusory.

capture of No-amon (Thebes, 385.) and the downfall of Nineveh itself. Regarding the former event, our terminus a quo, there need be no hesitation in identifying it with the capture and destruction of the capital of Upper Egypt by Assurbanipal in B.C. 664-663 (see Schrader, COT ii. 149ff.; Tiele, Bab.-Assyr. Geschichte, ii. 149ff.). An event of such far-reaching consequences for the Western world would long remain fresh in the minds of men, so that it is quite unnecessary, because of its mention by Nahum, either to assign the prophecy to a date B.C. 660 (so Schrader, loc. cit., and Orelli), or with Wellhausen (Skizzen, etc. v. 160) to suggest whether the prophet may not refer to some later capture, regarding which

history and tradition are alike silent.

With regard, in the next place, to the terminus ad quem, we are now in possession, since 1895, of native cuneiform testimony to the manner and date of the final overthrow of Nineveh. In the course of his excavations in a mound near Hillah (Babylon), Father Scheil came upon a semicircular (Babylon), Father Scheil came upon a semicircular stele of Nabonidus (B.C. 555-538), now in the Imperial Museum at Constantinople (publ. by V. Scheil in Maspero's Recueil de Travaux, etc., 1898, livr. 1, 2; L. Messerschmidt, Die Inschrift der Stele Nabona'ids, 1896; summary by Johns in Expos. Times, vii. (1896), p. 360f.; also, with illustrations, by C. J. Ball in Light from the East, 1899, p. 212 ff.; cf. A. B. Davidson, Nahum, etc. 137 f.). In this inscription it is expressly stated that 'the In this inscription it is expressly stated that 'the aid of the king of the Umman-manda folk'—that is, either the Medes alone, or a mixed folk of which was invoked by Marduk, the great god of Babylon, in order to avenge the insults offered to him by the Assyrians in the days of Sennacherib. Medes alone are credited with the destruction of the cities and temples of Assyria (column ii.), which agrees with the well-known statement of Herodotus (i. 103 ff.).

The date of the fall of Nineveh is also, for the first time, fixed for us within narrow limits. col. x. Nabonidus informs us that the temple of the moon-god Sin at Harran (which had been destroyed by the Medes about the same time as Nineveh) was restored by him fifty-four years after its destruction. This restoration, as we know from another inscription, took place in the third year of Nabonidus' reign (B.C. 553). Hence we obtain 607 as the date of the destruction of Harran and-since Nineveh was doubtless the last to fall before the Medes - B.C. 606 as the nearest ap-

proach to the date of the fall of Nineveh.

These, then, are the two fixed points, viz. B.C. 664-663 and B.C. 606, between which the prophecy of Nahum must be placed. The upper limit, it will be seen, is fatal both to the earliest tradition known to us, according to which Nahum prophesied 115 years before the fall of Nineven (Jos. Ant. IX. xi. 3), and to the conclusions of older scholars, such as Pusey, Nägelsbach, etc., who placed the prophecy in the reign of Hezekiah or the earlier years of Manasseh.

Another factor, which was of the greatest moment in former attempts to fix more definitely the date of our prophecy, must now be set aside, namely, the supposed references in ch. I to the political and religious condition of Judah under the later Assyrian kings. † This chapter, we have seen reason to believe, is no part of the genuine prophecy of Nahum—a conclusion which disposes

\*See Messerschmidt, p. 71 (a general term for northern peoples, including the Medes); Del. IIWB p. 875. According to Ball, op. cit. p. 208 n., the Umman-manda are the 'Medes' of Astyages, who appear, he adds, 'to have been Iranian Soythians' (f).
†Such references were found in vv.9.11 (the 'wicked counsellor'), 19 (the heavy yoke [of Assyria?]), 19 (the religious zeal of the Jews [under Josiah?]), etc., see the commentaries.

at once of the views of two groups of scholars (a) those who, like Kuenen (Onderzoek, § 75), Cornill (Einleit. 2188), and Wildeboer (Die Litteratur d. AT, 1895, pp. 194, 197), lay stress on the fact that the yoke of Assyria was still heavy on the neck of Judah (113), and are therefore compelled to postulate a date c. 624, after which time the power of Assyria rapidly decayed, and Josiah was able to extend his borders at her expense; and (b) those who, like Robertson Smith (art. 'Nahum' in Encyc. Brit.'), basing too exclusively on ch. 1, consider that the prophet had in his eye no particular assailant of Nineveh, but based his no particular assailant of Mineven, but based his prophecy solely on the general principles of the divine moral government. With ch. I falls also the hypothesis advanced by the present writer in 1891 ('The Burden of Nineveh' in Good Words, 1891, 741 ff.)—and by H. Winckler independently in 1892 (Altest. Untersuch. 1892, 124 ff.)—based on a study of the relations between Assyria and Judah during the period in question, that the prophecy is to be placed c. 645 B.C., near the close of the rebellion of Samas-sum-ukin, viceroy of Babylon,

against his brother Assurbanipal.

If, then, as we believe, chs. 2 and 3 alone con-If, then, as we believe, chs. 2 and 3 alone constitute the genuine prophecy of Nahum, the task of determining its date is very materially simplified, for the situation portrayed in these chapters is scarcely open to doubt. It is the moment between the actual invasion of Assyria by a hostile force and the commencement of the attack on its capital. The 'mauler' or destroyer (adopting with most mederns Michaelis' reading with the with most moderns Michaelis' reading 730 for 730) is already on the march (2 [[leb. 2]]); the frontier fortresses have opened their gates to the foe (3 15, where note the tenses). The latter, it is clear (314. 15), has not yet begun to invest the city. Such was the situation when Nahum received the prophetic impulse to proclaim to the 'city of blood' (3') that the cup of her iniquities was full to overflowing. It is needless to attempt to disentangle the statements of classical historians as to the various attacks which Nineveh had to meet during the last years of her existence. The whole of the genuine prophecy palpitates with the conviction that the 'utter end' of the Assyrian is at hand. The closing verses of the prophecy, in particular, are strangely out of place, if the writer hand. has in view any other but the final attack by the Umman-manda of Nabonidus' stele. B.C. 608-607, therefore, we consider to be the date of the vision of Nahum, an approximation as close as is attainable in the case of any book of the OT.

Nothing in these chapters, we may add, compels us to believe that Nahum was himself an eyewitness of the scenes he so vividly portrays. Communication, easy and frequent, had long existed between Nineveh and the tributary West-land, whose inhabitants were therefore well acquainted with her situation and defences. Such an acquaintance, joined to a poet's intuition and a seer's prophetic insight, is sufficient for all the facts.

vi. GENERAL CHARACTERISTICS OF CHS. 2 and 3.—The most striking characteristics of the poetry of Nahum are its intense force and its picturesqueness. Although, as Dr. Pusey has remarked, it is only in the original that 'the grandeur, energy, power, and vividness of Nahum can be fully felt, 'still even in an English dress no one can be insensible to the onward rush of the movement in 2<sup>1.9</sup>, the graphic word-picture of 3<sup>2.3</sup>, the aptness and force of the figures of the lion and his cubs (2<sup>11st</sup>), and of the figures of the hon and his cubs (2<sup>11s.</sup>), and of the locusts' flight (3<sup>17</sup>), the pathos of 3<sup>18</sup>, and similar features. 'Of all the minor prophets none seems to reach the sublimity, the fire, and the daring spirit (audaces spiritus) of Nahum,—such is the judgment passed on our prophet by Bishop Lowth in his classical work on Hebrew Poetry. 'Of all the prophets,' writes a more recent authority, 'he is the one who in dignity and force approaches most nearly to Isaiah' (Driver, LOT's 336; cf. Kirkpatrick, Doct. of the Prophets, p. 250). It is unfortunate that in several passages even of the genuine prophecy the text is uncertain. The use by the prophet of so many apparently technical terms (cf. G. A. Smith's list, The Twelve Prophets, ii. 89) further helps to obscure his meaning

The direct teaching of the book is mainly confined to ch. 1. Its leading thought we have already seen to be the attribute of J" as 'a God jealous \* (cf. Ex 20<sup>5</sup> 34<sup>14</sup>, Dt 4<sup>24</sup>) and avenging,' who, though He suffer long, will assuredly 'take vengeance on his adversaries' (cf. Is 348 634, Dt 3235). The elaboration of this aspect of the Divine nature serves to throw into higher relief the assur-

ance that follows-

'The Lord is good to them that wait upon him (LXX).'
'In the day of trouble will He deliver them.'†
'(Yea) the Lord knoweth them that put their trust in him.'

Passing to chs. 2 and 3, we note one important respect in which Nahum differs from all his predecessors in the prophetic office. His mind is so full of the iniquities and impending punishment of Nineveh, that he has no thought for the short-comings of his own people. In this he presents a striking contrast to his contemporaries, Zephaniah and Jeremiah. Nahum's heart, it has been said, and Jeremiah. Nahum's heart, it has been said, 'for all its bigness, holds room only for the bitternesses, the baffled hopes, the unappeased hatreds of a hundred years' (G. A. Smith, op. cit. ii. 90). In ch. 3, especially, the prophet's indignation burns with a white heat as he lays bare the moral gangrene at the heart of the Assyrian nation, the moral atrophy which was the real source of the weakness that made its sudden and complete weakness that made his sudden and compete collapse without a parallel in history (cf. Strabo, xvi. 1. 3: ἡ μὲν οῦν Νῦνος πόλις ἡφανίσθη παραχρῆμα, κ.τ.λ.). Wanton bloodshed, inhuman cruelty, commercial immorality, bad faith in her political relations,-in his denunciation of these Nahum gave voice less to his own personal conviction than to the outraged conscience of humanity. Assyria in his hands becomes an object-lesson to the empires of the modern world, teaching, as an eternal principle of the divine government of the world, the absolute necessity, for a nation's continued vitality, of that righteousness, personal, civic, and national, which alone 'exalteth a nation.

LITERATURE.—The older commentaries are discussed by O. Strauss (see below); list of titles at close of art. 'Nahum' in Kitto's Biblical Cyclop, 3 (1866). The chief modern commentaries are those on the Minor Prophets generally by Ewald, Pusey, Keil, Hitzig-Steiner's (1881), Orelli (in Strack and Zöcker's series, Eng. tr., T. & T. Clark, Edinburgh), Wellhausen (translation and critical notes in Skizzen und Vorarbeiten, pt. v. 37d ed. [1899]; A. B. Davidson, Nahum, Habakkuk, and Zephaniah (in Cambridge Bible 1896—the best English commentary); Nowack (1897); G. A. Smith, The Twelve Prophets, vol. ii. (1898). To these may be added Farrar, Minor Prophets ('Men of the Bible' series), and Kirkpatrick, Doctrine of the Prophets (2nd ed.). A detailed commentary on the military references is supplied by the monograph of Ad. Billerbeck and Alf. Jeremias, 'Der Untergang Nineveh's und die Weissagungschrift des Nahum von Elkosch,' in Delitzsch und Haupt's Betiräge zur Assyriologie, Bd. iil., 1989, pp. 87-188; A complete monograph, though now largely out of date, is that of Otto Strauss, Nahumi de Nino Vaticinium (1853).

For the more purely critical study of Nahum see the essays of Bickell, Gunkel, and G. B. Gray, on ch. 1 cited in the body of the article; also P. Ruben, 'An Oracle of Nahum' [112-214], in PSBA xx., May 1898, pp. 178-185. For the Versions in general, L. Reinke, Zur Kritik der ülteren Versionen des Propheten Nahum, 1807. For the LXX, Karl Vollers, Das Dockeapropheton, 1887. For the Targum of Jonathan, in addition to Reinke, op. cit. p. 55 ff.,

NAIDUS (A Nácedos, B Nácedos), 1 Es 981, apparently=Benaiah, Ezr 1030.

NAIL.—1. Heb. אָפָר, Aram. פְּפָר, Arab. zufr, a finger nail, Dt 21<sup>12</sup>, \* Dn 4<sup>23</sup>. In Jer 17<sup>1</sup> the word refers to the diamond point of the graver or stylus. 2. מֶר, Arab. watad, a pin or peg of wood, a tent peg. In Syria tent pegs are usually of oak, very roughly shaped and pointed. It was with one of these that Jael treacherously murdered Sisera, Jg 421ff. (see Moore, ad loc.). In Ex 2719 it is said that the pegs of the tabernacle were of copper. In old houses in Lebanon wooden pegs are driven into the walls of rooms, so that articles may be suspended on them. Sometimes the pin is drawn out by the weight of the article hung on it, having been driven into a mass of clay, used as mortar, between the stones of the wall. The 'nail in a sure place' (Is 22<sup>28, 25</sup>) is one wedged firmly between two stones. 3. אַסְסֶר (הַיִּחְיִּהְיִּהְ Ec 12<sup>11</sup>), Arab. mismatr, a nail, generally of metal. In 1 Ch 22<sup>3</sup> it is said that 'David prepared iron in abundance for the nails'; 2 Ch 3° mentions that 'the weight of the nails was 50 shekels of gold.' In the NT אָלָאָנְיָּגָּיִנְ the corresponding word, Jn 2025, see Cross.

W. CARSLAW. **NAIN** (Natv).—This place is mentioned only once in Scripture, in Lk  $7^{11}$ . The site of the ancient village† is well authenticated; it is occupied by the modern Nein, a squalid, miserable collection of mud-hovels, situated on the north-western edge of Tebel ed-Duhy, or the 'Little Hermon,' where the hill slopes down into the plain of Esdraelon. The mountain is called Jebel ed-Duhy from an unknown Mohammedan saint, whose wely or sacred place is on the summit of its conical peak. Around the village are numerous rubbish heaps and stony ruins, which indicate that at one time it must have been a place of much greater importance. not seem to have ever been a walled and fortified place, for no indications of a wall can be seen. But Conder (Tent. Work, p. 122) supposes that by the phrase 'gate of the city,' in the Gospel narrative, we are to understand merely the ordinary entrance among the houses by the open path, just as we commonly speak of 'the gate of the valley' or the 'gate of the pass,' where no gate or wall actually exists. Stanley (SP p. 357) says that 'no convent, no tradition, marks the spot.' But he must have overlooked the rude little mosque so prominent among the houses, strangely enough called the 'Place of our Lord Jesus, Christ,' which, from the significance of its name, must indicate the previous existence on the spot of a Christian chapel, which disappeared at an early period. The rough steep path leading up to the village is unchanged since that memorable day when our Lord traversed it with weary feet, and met the funeral procession of the widow's only son. And behind it, in the face of the rocks that project from the rugged side of the hill, may still be seen shadowy holes and caves, which doubtless mark the old place of sepulture to which the young man's dead body was being carried on its bier. No grander view can be obtained anywhere in Palestine than that which stretches around Nain, from its green nest on the mountain side, amply justifying ts descriptive name, if this is to be derived (with

<sup>\*</sup> On the Divine attribute of jealousy see A. B. Davidson's

<sup>†</sup> Adopting Bickell's restoration በታሚ.

<sup>\* &#</sup>x27;The paring of the nails corresponds to one of the acts by which an Arab widow dissolved her widowhood and became free to marry again' (W. R. Smith, Kinship, 178; cf. OTJC'3 368; Lane, Arab. Lex. 2409; Wellhausen, Reste', 171).
† It must be distinguished from the Nain mentioned by Jos. (BJ Iv. 1.4), which was on the other side of the Jordan, probably in Idumesa.

the Talmud) from a Hebrew word DW, signifying 'beauty' or 'pleasantness.' Within the circle of the surrounding hills some of the most stirring events in Old Testament history have occurred. Below is the extensive plain of Jezreel, which was the great battlefield of Palestine from the days of Nebuchadnezzar to those of Napoleon. Right across are the uplands of Nazareth; to the left are the bare limestone ridges of Gilboa; away in the distance is the white range of Carmel, with a blue gleam of the Mediterranean at its foot; while far up in the north is the snowy top of great Hermon, dominating all the wide view.

The story of Nain has been told in the simplest and most touching manner by the evangelist. Every word is a picture: the desolation of the widowed mother, the compassion of Jesus, the significance of His action in touching the bier, and so becoming ceremonially unclean through this forbidden contact with death, showing that He raised the young man to life not by His absolute power as God, but by the power of His own suffering and death; the pathetic deliverance to the mother of her son, for she needed him most, instead of asking him to forsake all and follow

Jesus as His disciple.

HUGH MACMILLAN.

NAIOTH (my Kerê; Kt. my, i.e. probably my Nāw yath [like now Zar phath, ny] n.e. probably my Nāw yath [like now Zar phath, ny] n.d. my; would both be possible: LXX Aναθ [5 times after εν, a ν having evidently dropped out in transcription, cf. Jg 16 εν Αλσωρηχ for pro ny], cod. A Naνωθ. No root my is known: the form Nāw yath is thus much more probable than Naioth).—The name of a locality in Ramah, mentioned 1 S 19<sup>18, 19, 22, 23, 23</sup> 20<sup>1</sup>, in which David and Samuel took refuge, when the former was pursued by Saul. This is really all that can be said about it: what the nature of the locality was, is entirely uncertain. It is an old explanation, not out of harmony with the context, that the term denotes the home, or conobium, of the prophets (cf. Targ. κιρνω my 'house of instruction,' or school): but the philological basis of this interpretation is very insecure; for my (of which my might be a fem. form) does not mean 'habitation' in general, but denotes in particular an abode of shepherds or sheep (see esp. 2 S 78; and cf. Is 65<sup>10</sup>, Jer 33<sup>12</sup>), or a country habitation, or domain (Job 5<sup>24</sup>, Is 32<sup>18</sup>, Jer 10<sup>25</sup> 25<sup>30</sup> etc.), and is only applied figuratively to other kinds of abode, in poetry (Ex 15<sup>18</sup>, Is 33<sup>20</sup>, Jer 50<sup>7</sup>), or elevated prose (2 S 15<sup>20</sup>): hence it is doubtful whether a word closely allied to this would have been chosen to denote a residence of prophets in a village or town. The absence of the art., not merely in the vocalized text (1 S 19<sup>18</sup> etc.), but in the consonantal text (20<sup>1</sup>), is also an objection to its being supposed to have had an appellative sense. Under the circumstances, we must be satisfied to know that Nāw yath was the name of a locality in Ramah: the original signification of the name, and also the nature of the place denoted by it, are both uncertain. (Ewald's attempted justification of the rendering school, Hist. iii. 49 f., is far too conjectural to be probable: see Driver on 1 S 19<sup>18</sup>). S. R. Driver.

NAME in EV corresponds to the Heb. m., Aram. m., and Gr. δνομα. The Hebrew word is of very ancient and obscure origin. Redslob (ZDMG, 1872, pp. 751-756), tracing it to the root δmw (= \_\_\_\_ = 'to be high'), argues that its fundamental sense is height, and hence (1) a monument

(Gn 11<sup>4</sup>, 2 S 10<sup>13</sup>, Is 55<sup>18</sup>) or mausoleum (Is 56<sup>5</sup>), (2) excellence, majesty, e.g. Ps 54<sup>1</sup>; and that 'name' in the sense of a mere token of distinction represents the last stage in the impoverishment of the original idea. Others (e.g. Lagarde, Bildung der Nomina, p. 160; W. R. Smith, Kinship, p. 213) connect it with the root wim, which gives sign or token as the original meaning. In view of this uncertainty, it will be wise not to base too much in our discussion of the term on the etymology. The Greek term as used in NT has many meanings that are foreign to classical usage, but are due to the direct or indirect influence of the Hebrew term.

In discussing the present subject we have to consider, firstly, the significance of the term and the ideas expressed by it; and, secondly, the various customs connected with the giving of names.

I. THE SIGNIFICANCE OF THE TERM.—1. In in-numerable passages alike in OT and NT the term is used as by ourselves in reference to words by which persons, places, or objects are designated and distinguished from others. It is also by a familiar transference of meaning that it comes to mean reputation or fame; see e.g. 1 S 1820, 2 S 75 2318, and in consequence מיל is sometimes translated in EV by 'renown' Gn 64, Nu 162, or 'famous' 1 Ch 524, Ru 411 (cf. Job 308 'base'=Heb. ישים בול. nameless); it may even by itself and unquelified mean a good reputation, e.g. Pr 22<sup>1</sup>, Ec 7<sup>1</sup>, Sir 41<sup>12</sup>; or, on the other hand, a false reputation, Rev 3<sup>1</sup>. But the more peculiar senses of the term are due to the close relation that was supposed to exist between the name and the personality. It is a widely-spread belief among primitive and less developed peoples that one who knows a person's name has power over the bearer of the name; hence the reluctance to give a stranger one's name. It was but a modification of such belief that made the Hebrew frequently use 'name' as almost an equivalent of the 'personality' or 'character' or nature of the person or thing named; and consequently, when a writer wishes to express forcibly the nature of a person or place, he says he will be called so-and-so, or his name will be so-and-so. Thus when in the future Jerusalem is purged from injustice she will be called 'the city of righteousness' (Is 126); when J" returns to the deserted city after the Exile, its name will be 'J" is there' (Ezk 485). The nature of Egypt is summed up in the name that is given her, 'Rahab that sitteth still'; and the meaning of Is 96 is that the child will actually be all that the of Is 9° is that the child will actually be all that the name 'wonderful,' etc., implies; cf. further 1'r 21<sup>24</sup>, Is 63<sup>16</sup>, and probably Is 62<sup>2</sup> 65<sup>15</sup>. Again, the Greek δνόματα is actually rendered by 'persons' in Ac 1<sup>15</sup>, Rev 11<sup>13</sup>, where the sense closely resembles that of the original term in Nu 1<sup>2</sup> 26<sup>25</sup>, Rev 3<sup>4</sup>, in which cases EV adopts 'names' as its rendering. For instances from Gr. papyri see Deissmann, Neue Ribelstudien 94 f

Bibelstudien, 24 f.

2. It is not difficult to understand how 'name' may express the idea of authority (see e.g. Ex 5<sup>23</sup>, 1 K 21<sup>8</sup>, Est 3<sup>12</sup>, Jn 5<sup>43</sup>), but it is perhaps through this sense that a phrase arose the meaning of which is much less immediately obvious, especially in the EV. In Hebrew we frequently road of some one's name being called over something ('b עו בען אין אין); in EV this idiomatic phrase is generally translated so as to confuse it with the entirely distinct phrase 'to be called by some one's name' ('b בען אין). But the former phrase does not mean that the person or object referred to will bear the name of that person whose 'name is called over it': it means that it will come under his authority, pass into his possession. Thus Joab begs David to be present at the final scene in the siege of Rabbah, lest Joab take the

city, and his name be called over it, i.e. lest the city pass under his authority and not David's (2 S 12<sup>28</sup>). 'All the nations over which J"s name was called ' (Am 912) are all the nations which had once owned J''s authority, i.e. had once formed part of the dominion of Israel –the people of J''. Israel in its confession (Is 6319) says—We are become as they over whom thou never barest rule; as they over whom thy name was not called, i.e. as they who have ceased to be regarded as thy people and subject to thy authority. Women have the name of their husbands called over them, i.e. bename of their husbands called over them, i.e. become subject to their authority at marriage, Is 4!. With regard to the precise sense of 'name' in the phrase there may be difference of opinion: thus Driver (Deuteronomy, p. 306) interprets Joab's saying thus, 'lest I gain the credit of having captured it [Rabbah], and it be counted as my conquest.' But the meaning of the whole phrase is quite clear: in the further words of Driver, 'the phrase expresses the fact of converbing. 'the phrase expresses . . . the fact of ownership whether acquired by actual conquest or otherwise (cf. Ps 49<sup>12</sup> (11))—coupled at the same time with the idea of protection: and occurs frequently, with the idea of protection: and occurs frequently, especially with reference to the people of Israel, Jerusalem, or the temple. The passages are: Am 9<sup>12</sup>, Jer 7<sup>10, 11, 14, 29</sup> 14<sup>9</sup> 15<sup>16</sup> . . . . 25<sup>28</sup> 32<sup>24</sup> 34<sup>16</sup>, 1 K 8<sup>48</sup> (= 2 Ch 6<sup>38</sup>) 60 (all D<sup>2</sup>), Is 63<sup>19</sup>, 2 Ch 7<sup>14</sup>, Dn 9<sup>18, 19</sup>, Cf., in the Apocrypha, Bar 2<sup>15, 26</sup>, 1 Mac 7<sup>37</sup>, and in NT Ac 15<sup>17</sup> (cited by St. James from Am 9<sup>12</sup>), Ja 2<sup>7</sup>. We may allude to one other passage where 'name' probably means 'authority,' viz. Is 26<sup>13</sup> (cf. 63<sup>19</sup>). The words rendered by EV, 'by thee only will we make mention of thy name,' should contain an antithesis to the first part of the verse, 'O LORD our God, other Lords beside thee have had dominion over us,' and consequently must be translated 'but thee, (to wit) thy name (authority), alone will we (in future) mention (i.e. acknowledge)'; for the construction in the Heb. cf. Dillm. in loc.

3. We may pass on now to some of the special ideas that are expressed by the phrase 'name of J"' in the OT, 'name of Jesus,' etc., in the NT. The name of J" as equivalent to the person of J" is represented as the subject or the object of various actions: thus, for example, it sets men on high (I's 20¹). It is loved (Ps 5¹¹¹), praised (Ps 7¹¹¹), sanctified (Is 29²²); it is described, e.g., as being glorious, fearful (Dt 28²²), holy (1 Ch 29¹²), everlasting (Ps 135¹³). But in particular the 'name of J"' is used as a succinct expression for the revealed character of God for all that is known of him. Hence such frequent expressions as to declare (¬¬¬¬p. e.g. Ex ¬¬p. Ex ¬¬p. J" acts for his name's sake (e.g. Ezk 20²) when he so acts that his hitherto revealed nature is not belied; e.g. when he vindicates his power by bringing the people out of Egypt. Wherever J" records his name, according to the early law book (Ex 20²¹), there men are to build an altar to him: what was meant by this 'recording of his name' may be seen by examining the various narratives of the building of altars, i.e. of the observations of this law (see e.g. Gn 12² 22² 26²⁴¹. Jg 6²⁴ [in the light of the preceding narrative], 1 S 14²⁵); it was the indication, by a theophany or by some great success or delivery or the like, of the divine presence and favour; in other words, it was a self-revelation of J" to men. From the time of Deuteronomy onwards Jerusalem became the one special seat of the divine presence in Israel; there, therefore, he is said to cause his name to dwell or abide (Dt 12¹¹ and very often); hence the temple is a house for J"s name, 2 S 7¹², 1 K 8¹²-2° etc.; and even earlier the supremacy of Jerusalem among the shrines of the S. kingdom had become so great that Isaiah (18²) speaks of Zion as the place of J"s name,

unless, with Cheyne (Introd. to Book of Isaiah, p. 313), we regard this verse as post-exilic.

4. Of the numerous shades of meaning connected with and probably springing out of the usage just noticed, we may refer to one or two. 'The name of J"' itself becomes a term to express a theophany in Is 30° (also, according to Cheyne, post-exilie), where it is described 'as coming from far, burning with his anger, and in thick rising smoke,' etc.; with this passage we may perhaps compare 59°. In Is 48° the term is probably used in the transferred sense of the praise which the divine self-manifestation calls forth from men; note the parallel clause and a similar transference of meaning in the parallel phrase 'glory of J"' (see Glory of J" 1, ad fin.). In Zec 14° (cf. Is 56°) the name of J" is the manner in which men recognize the divine self-revelation—in other words, the worship of J"; Hitzig rightly interprets 'his name shall be one' as meaning that the unity of J", which already exists in reality, will then also be acknowledged and recognized on earth.

But in virtue of its most characteristic and frequent usage 'the name of J"' belongs to a series of phrases, to which the 'glory of J",' the face of J",' the angel of J" also belong, by which the Hebrews endeavoured to distinguish between the Deity in himself and the Deity as manifested to and coming into relation with men; or, in earlier times, between the Deity conceived as manifested to and coming into relation with men; or, in earlier times, between the Deity conceived as accompanying his people in their journeyings. In the latter case, however, it is the 'angel of J"' that most frequently figures, and we need call attention only to one peculiar passage (Ex 2321) in which both phrases are combined, and 'the name of J"' is said to be in the angel; the meaning of this appears to be, that though the angel is not J" in his fulness (cf. v. 341), yet J"'s nature is so far in him that what would offend J" will offend him. To the OT usage of the term 'name of J"' we have a parallel, striking at once in its similarity and its dissimilarity, in Phænician. In an inscription (CIS 318) from Sidon we find mention of 'Ashtoreth the name of Baal ('yum namifestation or representative of Baal. In this case, as in the parallel case of 'Tanith the face of Baal ('yum namifestation or representative of Baal. In this case, as in the parallel case of 'Tanith the face of Baal ('yum namifestation or manifestation a new and distinct deity.

5. Finally, in our survey of OT usage we have to notice that in Lv 24<sup>11-16</sup> the name (com) is used as a substitute for J" according to a practice which became very customary in post-biblical Hebrew. It is, however, probable that we owe this usage to the scribes and copyists rather than to the author of the section in question (cf. Geiger, Urschrift, 273 f.).

6. When we turn to NT we find, as we should expect, that in several instances 'the name of the Lord' occurs in actual quotations from OT (see e.g. Mt 12<sup>21</sup> 23<sup>29</sup>, Ac 2<sup>21</sup>, Ro 15<sup>9</sup>, He 2<sup>12</sup>), and that in others the phrases are of the same or nearly the same character as those current in OT (e.g. Mt 6<sup>9</sup>, Jn 17<sup>6-20</sup>). The question is how far does OT usage serve to explain the NT term where, owing to new circumstances and conditions, it has to express ideas in large part new? Is it necessary to presuppose entirely different modes of thought to explain the NT term; or is it possible to explain its new meanings as the natural development out of the old?

Clearly, phrases which differ from the OT equivalents only by the substitution of 'Jesus' for 'J" may be similarly interpreted unless cogent reasons for the contrary be forthcoming:

hence, e.g., 'to prophesy in the name of Jesus' corresponds in NT to prophesy or speak in the name of J" in OT. Such a phrase as 'to believe in the name of Jesus' differs somewhat more from OT usage, and yet is certainly in line with it. It very significantly alternates in the same writer with the phrase 'to believe in Jesus' (see e.g. Jn 112 223 316; 316.18 660); i.e. the name of Jesus is a parallel term to the word 'Jesus' itself, and is most appropriately used in the present phrase because 'the name of Jesus' briefly sums up the personality of Jesus as made known; to believe in his name is to believe in and accept his claims.

But a very different mode of interpretation has been recently advocated by Conybeare. Briefly stated, it is an assimilation of 'the use of the name of Jesus Christ to ancient magic' (JQR ix. 66); or again, in Conybeare's own words, 'Why did Jesus instruct his disciples to cast out demons in his name? Why do we end our prayers with the formula in the name of Jesus Christ our Lord? Why did the Christians glory in the name? Why were they persecuted for the name? The answer to all these questions is furnished by ancient magic' (ib. 581). 'In or by the name of Jesus Christ our Lord' is a 'theurgic formula,' and its use was due to the fact that Christians shared the ancient but still prevalent belief that a god or demon must come when his name is correctly pro-

nounced in an invocation.

Conybeare has clearly shown that this magical view of the name was held by several of the early Fathers as well as by non-Christian and pre-Christian Greek and Latin writers; he has also collected much comparative evidence of the general existence of such a belief relative to names. Further, it may be admitted that in some cases and by some people the name of Jesus may have been regarded as possessing magical efficacy—see e.g. Mt 7<sup>22</sup>, Ac 4<sup>7</sup>; and again that the 'names' referred to in Eph 1<sup>21</sup> (and, therefore, probably also in Ph 2<sup>9</sup>) are names of angels, but that the reference is to the use in exorcisms of names of angels and patriarchs' is far from obvious. It is impossible here to discuss the very numerous passages concerned in detail; but the general reasons which appear to the present writer cogent against admitting Conybeare's mode of interpretation, except in a few isolated passages, may be briefly stated thus: (1) It is obviously inapplicable in many cases, e.g. Mt 18<sup>5</sup>. (2) A number of the phrases, as we have already seen, are identical with, a number more are closely similar to, those found in the OT. The OT terminology may and probably should be traced back ultimately to the magical view of 'name,' but in itself expresses an immeasurably higher type of ideas. But the influence of the OT on both Jesus and the disciples was obviously so great that we have a right in ambiguous cases to adopt the higher interpre-tation suggested by OT usage rather than that suggested by popular Jewish and Greek super-stition. To take a single instance, the analogy of OT instances would lead us to infer from the fact that Simon was surnamed 'Rock,' and the sons of Zebedee 'sons of thunder,' that the names were given because the persons in question possessed qualities described by these new names; and this is surely far more reasonable than to infer 'that the new names were supposed to impart to them (Simon and the sons of Zebedee) new qualities, or fortify their moral characters.' It is unquestionably a right principle to interpret the NT in the light of contemporary ideas; but it is a wrong application of this principle to neglect the most potent of these ideas—those, namely, of the OT.
(3) The magical significance attached to the names by early Christian Fathers, which at first sight most

favours the theory, is explicable by a misunderstanding, under the influence of Greek superstition, of a terminology which must have been but half

intelligible to Greeks and Latins.

II. CUSTOMS CONNECTED WITH THE GIVING OF NAMES.—1. Personal. A child received its name most frequently from the mother (Gn 425 1611 1957. 29526. 85 \* 306. 8. 11. 18. 18. 20. 24. 29 3518 3846., Jg 1324, 1 S 120—all the foregoing are early narratives; 1 Ch 49 716), but frequently also from the father (see especially Hos 14.6.9, Is 63, and in P Gn 53 1615 1719 212, but also in early narratives, Gn 426 529 3518 especially 1108 1 also in early narratives, Gn 426 529 3518 41311, Ex 222 Jg 831; cf. further 1 Ch 723, Job 4214). In Gn 383, 2 S 1224 the text varies (between 'he,' i.e. the father, and 'she,' i.e. the mother, 'called'). More rarely and under exceptional circumstances the child received its name from others; compare in this connexion the stories of Moses receiving his name from Pharaoh's daughter (Ex 210), Ruth's child from the mother's women neighbours (Ru 4<sup>17</sup>), Solomon from a prophet (2 S 12<sup>25</sup>). In some cases the verb which refers to the naming of the child has an indefinite subject; so certainly in Gn 25<sup>25L</sup>, perhaps also in some of the cases referred to above as instances of naming by the father. † In most of the cases just cited 'naming' is immediately connected with birth, and we may perhaps infer that the name was, as a rule, in early times given immediately after birth, as is said to be the case with the modern Arabs (cf. Lane, Arabian Notes, ch. iv. n. 4). In later times the name was given at circumcision, i.e. on the 8th day after birth (Lk 100 221); but of this particular custom we find no trace in OT except in so far as the change of Abraham's name in connexion with the institution of circumcision may point to it (Gn 17 (P)). In the earlier period the name was chosen on account of its significance, and recorded some circumstance connected with the birth, some natural feature of the child, or the parents' wish concerning it, or their gratitude to God for the gift of This is clear from the meaning of the names (see following art.) and also from the numerous narratives cited above, which are good evidence as to general custom, though as accounts of par-ticular instances they are mostly legendary rather than historical. The custom which was already frequent in the time of Christ (Lk 1<sup>5,9</sup>) of naming children after a kinsman, most generally the grandfather, cannot be traced back with any certainty before the 3rd or 4th cent. B.C. The only early evidence for kinsmen even bearing a common name is  $2 S 21^{7t}$ ;  $2 S 13^1 14^{27}$ ;  $2 S 3^3$ ,  $1 K 15^2$ ;  $1 K 22^{40}$ ,  $2 K 8^{16-18\cdot 26}$ ;  $2 K 11^2 8^{26}$ ,  $1 K 22^{28}$ . Of these five instances it will hardly be questioned that some are mere coincidences. Further, in only one instance, the third, is the relation of the two persons concerned direct; in others it is lateral, the cases being those of cousin or nephew and uncle. On the other hand, in the numerous early genealogies which we possess, we find no trace of the custom of naming after ancestors: thus no two kings of Judah (21 in number, and all of the family of David), and no two kings of the same Ephraimite dynasty, bear the same name, nor does the same name recur in any other early genealogy (see Zeph 1<sup>1</sup>; Zec 1<sup>1</sup>; Jer 41<sup>1, 2</sup>; 1 S 9<sup>1</sup> 14<sup>3</sup>; 2 K 9<sup>2</sup> 22<sup>3</sup>; cf. v. 1<sup>2</sup> and Jer 41<sup>2</sup> 22<sup>14</sup>). On the other hand, from the 4th cent. B.C. and onwards the custom became prevalent, not only among the Jews, but also among the Phænicians, Nabatæans, and Palmyrenes.

For sake of distinction, the father's name was sometimes added; as in the case of David, the son of Jesse; and occasionally a person was called

<sup>\*</sup> Also, no doubt, Gn 2934, where we ought to read אַרְאָה = she called (so Ball in SBOT).
† On the cause of the ambiguity in these cases, of. Davidson, Syntax, § 108a.

simply son of so-and-so, often in contempt (e.g. But the familiar Arabic custom of making actual proper names out of such combinations as father of so-and-so, or son of so-and-so, did not exist among the Hebrews. Nor, again, have we any evidence that anything strictly corresponding to our family names was in use; though, of course, there were clan names, and a man might be described as being the 'man' or 'son' of such and such a clan (Jg 101). A woman did not change her name on marriage, though to her own name the description 'wife of so-and-so' was often added (Gn 12<sup>17</sup>, Jg 4<sup>1</sup>). Is 4<sup>1</sup> does not refer to such a custom: for its interpretation see above I. 2. It is not therefore to the family name, but to the memory of a deceased person, that the term 'name' refers in the very frequent phrases 'to blot out' or 'to take away' the name (with reference to childless people; cf. e.g. Nu 274, Dt 256.7, 1 S 2421; cf. in Aramaic, CIS ii. 113); it is the memory, not the actual name, of an ancestor that posterity preserves (cf. Is 56<sup>5</sup>).

Several instances are recorded of change of name

in mature life. But most of these instances are of a special character, and it is therefore difficult to Thus we find (a) three or four instances in the legends of the patriarchs, Gn 32<sup>28</sup> (J) 17<sup>5. 15</sup> 35<sup>10</sup>, Nu 13<sup>16</sup> (P); (b) two instances of the names of kings of Judah being changed (by their Babylonian conqueror) on their accession to the throne (2 K 2334 2417); (c) instances of Hebrews resident in a foreign country taking names of that country (Gn 414, Dn 16h); (d) some instances in NT of new names given denoting some striking quality of the person in question (Mk 3<sup>16, 17</sup>).

On the other hand, after the contact of the Jews with the Greeks, it became quite common for a man to adopt a Greek as well as a Jewish name; in these cases a Greek name similar in sound or significance to the Jewish was often adopted, e.g. Jakim changed his name to Alcimus (Jos. Ant. XII. ix. 7; 1 Mac 7°), and Saul to Paul. Peter is the Greek name with the same signification as Cephas in Aramaic. This was one cause of the custom unknown to early times of a man being referred to by two names at the same time, e.g. Thomas Didymus, Simon Peter, John Mark. other cases the second of two names may denote a man's city, e.g. Judas Iscariot (= איש קריות; cf. Pirke Aboth, 18.4.5 30t. etc.).

2. Cities .- Of the customs connected with the naming of cities we know little beyond what can be inferred from the meaning of the names (see following art.). But we must note that certain nonratives trace back the names of cities to their founders or captors (Gn 4<sup>17</sup>, Nu 32<sup>42</sup>, Dt 3<sup>14</sup>, Jos 19<sup>47</sup>). But these are for the most part, if not entirely, name-myths. How far it points to a custom it is difficult to feel sure, because we are citil informed as to the extent to which the place ill informed as to the extent to which the place names of the OT originated with the Hebrews. The Shemer after whom Samaria was named was probably a clan rather than an individual (Stade in ZATW, 1885, p. 165 ff.). In one instance the new name given by a king of Judah to a conquered town (2 K 147) was that of an old town of Judah. It cannot be inferred from 1 S 1228 that it was customary to name a city after its conqueror (see above, I. 2). In the Greek period, Hebrew (Semitic) names of places as well as of persons gave place to Greek names, e.g. Beth-shan became Scythopolis (Jth 3<sup>11</sup>; cf. Jg 1<sup>27</sup> LXX); but in this, as in so many similar instances, it is the Semitic name which has subsequently survived (mod. Beisan).

G. B. GRAY.

NAMES. PROPER .- How much a name meant to the Hebrews is indicated in the article NAME. The importance attached to names makes the study of them a valuable means to appreciating the religious and social ideas of the Hebrews. An historical study of them enables us in some measure to trace the growth of ideas; a comparative study of Hebrew and other Semitic names brings to light many similarities and some dissimilarities in the Hebrews to their Semitic kinsfolk. In the present article it will be unnecessary to examine these names in any exhaustive manner; but, so far as space allows, the attempt will be made to indicate the large classes into which great numbers of names naturally fall, the degree to which the meaning of the names is ambiguous, the points of similarity and dissimilarity in Hebrew and the cognate languages, and the history of ideas and their prevalence, so far as the existing data permit these to be traced in the proper names. meanings of particular names must be sought for under the several articles.

Proper names fall into two main divisions, according as they are names of persons or names of places. Of these the names of places are, generally speaking, much more ambiguous and difficult of interpretation. But the place names of the OT are also in all probability-once again speaking generally—more ancient than the personal names. It will be convenient, therefore, to deal with them first. It must not, however, be supposed that, in thus dividing the subject, any assumption is made that place names were always independent of personal names, or that the latter were derivative from the former. As a matter of fact, there are probably instances of both kindspersonal names that were originally names of places; place names that were originally names of persons. But certain broad differences in character between personal and place names do suggest that in the main the two classes grew independently of one another. And this is particularly true with regard to names of individual persons, if certain phenomena are rightly interpreted as pointing to the derivation both of some place names and also of some names of individual persons from clan names. But this is an obscure subject, which cannot be discussed here.

I. PLACE NAMES.-1. Obviously, the name of a place may have been long in existence before its first mention in extant records. All names of places in the Bible may therefore, except in those cases in which we have definite evidence to the contrary, have been in existence before the Israelitish conquest of the country. In other words, they may have originated with the Canaanites or other early inhabitants of the land, and not with the Israelites. In several cases we are not left to mere conjecture on this point. We have direct evidence of the pre-Israelitish existence of many names familiar to us in the OT. Thus the Tel el-Amarna tablets mention Aijalon, Hazor, Jerusalem, Lachish, Megiddo, Zorah, and others; the list (15 cent. B.C.) of Tahutmes III.'s conquests includes Abel, Ain, Gath, Migdal, Mishal; and other early Egyptian lists, Beth-anath, Luz, and Secu. The significance of these lists is not exhausted by the

actual number of OT place names which they record, and thus directly prove to be pre-Israelitish. For, in the first place, the mention of Jerusalem proves the biblical writers (Jg 1910, 1 Ch 114x, Jos 15 1816, 22) ill informed in believing that name to be of Israelitish origin, and consequently lessens our confidence in their testimony relative to other names. And, secondly, some of the names actually found in these early records are typical of large classes of OT names. The consequence is, that it classes of OT names. The consequence is, that it is only in the case of a very few names indeed that we can feel confident that they were of Israelitish origin. They must not therefore be indiscriminately used as evidence of Hebrew belief or custom. Fortunately, many of the place names refer to abiding features of the place, not to the changing customs of the inhabitants. To some of these we may turn first.

2. Many names refer to the physical features of the town or its surroundings. Ramah, the name of several places, means 'height'; Geba, Gibeah, and Gibean mean 'hill.' Other names of similar significance are Jogbehah (VAZI='to be high'), Sela (='the cliff'), Shechem (='the shoulder of a hill'). A low-lying situation or the neighbourhood of some hollow seems to be referred to in Beth-emek ('house of the valley'), Horonaim ('the two hollows'), and perhaps Beten (lit. = 'the belly,' so

Arabic بطر,). The nature of the soil gave rise to other names: Argob indicates a rich and earthy soil; Elron, 'barren'; Horeb and Jabesh, 'dry'; Carmel, 'garden-land'; Abel (in several compounds), 'a meadow.' The numerous compounds with En (12) and Beer (122) imply the presence of a spring; Hunmath, Hammoth-dor, and Hammon, of hot springs. The 'white' cliffs of the range are probably commemorated by the name Lebanon; the duskings of its waters by Kidron: the blackness duskiness of its waters by Kidron; the blackness of the soil by Hauran. But these and other names (Hachilah, Zalmon, Adummin, Me-jarkon) which may refer to colour are more or less ambiguous.

3. A very considerable number of place names are names of plants, or are compounded with such names. The shrubs or trees referred to in such names are the acacia (Abel-shittim, Beth-shittah), the apple-tree (Beth-tappuah, En-tappuah, and Tappuah), the palm-tree (Tamar, Baal-tamar, Hazazon-tamar), the terebinth or oak (El-paran=Elath, Elah, Eloth, Elim, and Elon), the pomegranate (the Rock of Rimmon, and probably also En-rimmon, Rimmon, Rimmon, perez, and Gath-rimmon), the cucumber (Dilan), the clive-tree (the Ascent or Mount of Olives), the vine (Abel-cheramim, Beth-haccerem, Eshcol, and probably Sorek and Masrekah), the juniper (Rithmah), the gadatree (Ezion-geber), the almond-tree (Luz), the balsam-tree (valley of Baca), the sycamore-tree (Ginzo), thorn-bushes (Atad, Shamir and perhaps

Another large group consists of names of animals, or words derived from animal names, viz. Aijalon (the stag), Lebaoth, Laish (the lion), Beth-nimrah (the leopard), Ophrah and Ephron (the gazelle), Arad (the wild-ass), Hazar-shual, the land of Shual and Shaalbim (the fox), Zeboim (the hyena), Telaim and Beth-car (the lamb), Parah (the cow), Eneglaim, Eglon (the calf), Hazar-susah (the horse), En-gedi (the kid), Beth-hoglah (the part-ridge), Etam (birds of prey), Ir-nahash (the serpent), Humtah (the lizard), Zorah (the hornet), Akrabbim (scorpions), Gudgodah (the cricket). The derivation of a few of these is uncertain, but in most of them it is unmistakable. It is easy to understand how trees which always occupy the same position may have given a name to a place; it is less easy to feel sure that the other places

derived their names from the abundance of animals in their vicinity. In recent times several scholars have been inclined to seek the origin of these

names in totem clans.

4. Characteristics of a place more liable to change, e.g. its size, the occupation or cultus of its inhabitants, have given rise to other names. these cases we can only be sure that the place corresponded to what the name says about it when the name was given; in other words, we can only be sure, in the case of all names about the date of whose origin we are uncertain, that the name was

The various compounds with Hazar or Hazor, Ir, and Kiriath indicate the character of the city at the time when these names were given, but clearly the Hazor of Jg 4<sup>17</sup> (cf. Amarna tablets, 154<sup>11</sup>) had grown into something more than a *Hazor*, i.e. a fixed settlement as contrasted with the mere encampments of nomads, but also as Again, the contrasted with the walled cities. various Gaths appear to have derived their names from the existence in them of a wine-press: Rabbah from its large, Zoar from its small size; En-mishpat from having been a place for settling

disputes.

5. But most important of the names due to characteristics liable to change are those referring to religious belief and practice. Thus several names of places preserve the names of various deities that were at some time worshipped in Canaan. Thus sun-worship has left its mark on בות an. I has sun-worship has left its mark on Beth-shemesh ('temple or house of the sun'), Enshemesh ('spring of the sun'), The ascent of Heres (i.e. 'the sun'), Timnath-heres ('portion of the sun'); moon-worship, according to some, on Jericho (אָרָין), cf. אָרָרִין), cf. אָרָרִין, cf. אָרָרִין). We can trace the worship of Babylonian deities not only in the Singiliar posingular where Sin and Singil record Sinaitic peninsula where Sin and Sinai record the worship of the Babylonian moon-god Sin, but also in the land of Israel and its immediate proximity. Nebo, the name of a Babylonian deity, is also the name of a town (Nu 328) and a mountain the column of March 2000 and a mountain the column of March 2000 and March 2000 an (Dt 3249) of Moab, and of a town of Judah (Ezr 229); the worship of Anath, the female double of Anu, is reflected in Beth-anath, Beth-anoth, and Anathoth; the name of the Babylonian Bel is, perhaps, to be found in Ebal (Academy, June 27, 1896) and 'A $\rho\beta\eta\lambda\delta$  (=Heb.  $\pi^{2}\gamma$ n Nu 3411; Academy, July 4, 1896). The name of the goddess Ashtoreth appears in Ashteroth-karnaim and Be-eshterah; of the god Dagon in Beth-dagon. An old divine name (familiar in Arabic) is perhaps to be found in Kishon and Elkosh (ZATW, 1897, p. 349).

A large number of names of places refer to the worship of a god by a general title, especially Baal or El, e.g. Baal-meon, Baal-hazor, Penuel, Jezreel. A peculiar feature of the compounds with Baal is that they are not as they stand properly names of places at all, but titles of deities ('owner of the township Meon,' 'owner of the palm-tree'). They have arisen by abbreviation, their original form having been Beth-baal-meon (which also actually occurs Jos 1317, Mesha Inser. 1. 30), Beth-baal-tamar, etc. In some cases, however, Baal was omitted and Beth retained, and thus we find Beth-meon (Jer 48<sup>23</sup>). It is quite possible, therefore, that some of the numerous compounds with Beth which are not now of manifestly religious import were so originally. Names of the type Jezreel, Jabneel are probably to be translated 'Let El sow, build,'

El being the genius of the place.

II. PERSONAL NAMES.—1. Personal names are either simple or compound. The latter in Hebrew generally consist of two, and only in a very few

\* But a more probable etymology of Lebanon has been suggested above, § L 2.

(probably late) names of three elements. The greater number of the compound personal names and in this respect these differ from place names —are sentences, i.e. they make some statement or express some wish, generally of a religious character. The simple names, many of which are very obscure, and also the compound names which are not sentences, generally refer directly or metaphorically to some personal feature or circumstance attending the birth. Some apparently simple names appear to have arisen by abbreviation from compound names, e.g. Nathan (from Elnathan or Nathanel), Shama (= 'he heard,' from Elishama = 'God heard'). The explanations of names found in the OT (e.g. Gn 3<sup>20</sup> 4<sup>25</sup> 5<sup>29</sup> 16<sup>11</sup> 32<sup>28</sup>, Jg 6<sup>32</sup>, 1 S 1<sup>20</sup>, 1 Ch 49) do not generally coincide with their true etymological meaning, but arise from some simi-larity of sound to a word that gave what appeared subsequently a suitable significance to a man's name. Thus Noah (51) cannot be derived from the root beginning with a similar sound which is used in the explanation of it (NDD), Gn 5<sup>29</sup>). The value of these narratives lies chiefly in the evidence they afford as to the kind of idea which names were generally selected to express. Thus the explanation of Esau (Gn 25<sup>20</sup>) indicates that the personal features of the child, of Jacob (Gn 25<sup>20</sup>) that the circumstances of the birth, of Ichabod (1 S 421) that the state of public affairs at the time of the birth, might suggest the choice of a child's name.

2. In classifying the personal names into their chief groups, it will be convenient to follow as far as possible at the same time a chronological order. As we have seen, simple Israelitish names are comparatively more frequent in earlier than in later times. Their origin, too, for the most part goes back to the early period. Most of the apparently simple names that can be first traced in later

periods are really abbreviated compound names. A. SIMPLE NAMES.—Of 28 names recorded in  $Jg \stackrel{\otimes}{=} 16$ , six or eight only are compound, the rest are simple. Several, though apparently personal, were perhaps really clan names. In 2 S 9-20 (time of David) the compounds number 22, the simple names 23. On the other hand, among the names of Jeremiah's contemporaries (3-4 centuries later than David) the compound are several times as numerous as the simple names. Among the simple names of the time of the Judges and David we find the following:—(a) Several names of animals—Deborah ('bee'), Gaal (probably 'beetle'), Tola ('worm'), Caleb ('dog'), Naḥash ('serpent'). Names of this class very rarely appear in the later periods, except that at the time of Josiah we find four (Huldah = 'the weasel,' Achbor = the mouse,' and Shaphan (2 persons)= the rock badger'); all of these are names of unclean animals, and may be due to a recrudescence of ancient superstitious practices of which we certainly find traces somewhat later; cf. Is 6617 (sacrificial eating of the mouse). In any case strictly personal names of this class are not numerous as compared with the clan and place names, and some of them may be indirectly derivative from a totem stage of society. Otherwise we may explain these personal names as the attempt to express metaphorically some characteristic of the child, or the hope that as it grew up it would possess the characteristic of the animal. This would without much difficulty account for Deborah ('bee'), Zibiah ('gazelle,' cf. the comparison Ca 2° 45), but not very obviously for some others. For names of this type among other Semitic peoples, cf. (for the Arabs) Hammer-Purgstall, Ueber die Namen der Araber, pp. 3, 4.
(b) Names of trees.—Tamar ('the palm-tree'),

the name of two women; cf. the comparison in Ca 771. Similar comparisons are to be found in Arabic poetry.

terebinth or oak-tree'), Hadassah (Est 27 'the myrtle'), Keziah ('cassia'), and perhaps Solomon (cf. Wellh. Is. u. jüd. Gesch. 3 p. 103, n. 1) are other instances. For Arabic instances, cf. Hammer-Purgstall, op. cit. p. 3.

(c) Other early simple names are Barak ('light-ning'), Lappidoth ('torches'), Samson (derived from shemesh='sun'), Zadok ('just'), Barzillai

from יברול 'iron').

B. COMPOUND NAMES.—The most numerous of these in OT are the compounds with Yah (= Yahweh); but they are not the earliest. The earliest are compounds with 'ab(i) ('father'), 'ah(i) ('brother'), 'ahm(i) ('kinsman'), 'El(i) ('god'). Of these classes compounds with 'ab, 'ab, and 'amm (-'kinsman'), are not continued. (='kinsman') are not only early, but they seem to have ceased to be formed soon after the time of David, and fell wholly into disuse before the close of the Exile. On the other hand, compounds with 'El, though found in the earliest periods of which we have records, for long furnished fresh formations, and were in frequent use after the Exile. Each of these classes requires some separate discussion.

(a) Compounds with ab, ah, and amm.—Interpretations of particular instances must be sought under the several articles. All that need be attempted here is to indicate the different views that have been held as to the relation of the two elements in the compounds, and as to the more precise significance of the term of kinship. In a name like Abinadab, are the two elements related to one another as construct and genitive, or as subject and predicate? In the former case, is the second element the name of the actual son of the person named, or of a quality, so that the whole name is equal to an adjective? In the latter case, is the of 'abi (of 'sk) a binding vowel, or the lst personal suffix? In other words, does Abinadab mean 'father of Nadab,' or 'father of generosity' (i.e. 'generous'), or 'the father is generous,' or 'my father is generous'? Every possible answer has been given by one or another at one time or another. Against the view that the relation between the two elements is that of construct and genitive, the following objection among others may be urged—(1)'ab, 'ah, 'amm all denote a male kinsman, but the names compounded with them are used indifferently of men and women; examples of such names of women—Abigal, Abital, Abishag; (2) in some cases the elements appear in reverse order, e.g. Ahijah and Joah, Eliab and Abiel. There is little doubt that the relation is predicative; the names are sentences. It is a much more nicely balanced question to decide whether the i in 'abi, 'ahi, 'ammi be the binding vowel or the personal suffix; but in the judgment of the present writer the evidence inclines in favour of the former alternative.

A further ambiguity attaches to the names com-ounded with 'amm. That element has often been pounded with amm. That element has often been rendered 'people.' But the parallelism of several of these names with the compounds with 'ab, 'ab (e.g. Ammiel, Abiel, Hiel), which is even more prominent in Sabæan proper names, the certainty that 'amm had the sense of 'kinsman' in Semitic, and survivals of this meaning in Hebrew, have led most modern investigators to the conclusion that in several compounds (e.g. Ammiel, Eliam Amminadab) amm means kinsman. Yet a third view is that Amm is the proper name of a deity (cf. e.g. Sayce, RP, 2nd series, ii. 123 f.).

In the case of all these names there has been some difference of opinion as to whether the term of kinship refers to the human kinsman (father, brother, uncle), or whether it is a divine title. Opinion prevails in favour of the second alternative. It seems not unlikely that names of this Elah (2 K 15%, 1 K 16) and Elon (the very early type, which are widely distributed over

the Semitic field, originated in totemistic conceptions. It is remarkable that they disappear in the course of Hebrew history, though they continued in use to a late period among, e.g., the

Phonicians and Aramaans.

(b) Before dealing with compounds with 'El, we may briefly refer to a class of names which appear to have been adopted for a time by the Hebrews from the Canaanites among whom they settled, but to have been again almost entirely discarded soon after the time of David. These are the compounds with Adon (Adoni-bezek, Adoni-zedek, Adonijah, Tob-adonijah, and Adonikam); Baal, which has sometimes been mutilated by the scribes into Bosheth = 'shame' (e.g. Meribbaal, Eshbaal); Melech (e.g. Abimelech, Elimelech, Malchiah). 'The main question in the case of these names is whether Baal, Melech, Adon are titles applicable to any gods, and therefore to J'', or proper names of distinct deities. The question is of considerable historical importance; for if it be answered in the latter sense, the names are evidence that Saul and David and Jonathan were worshippers of other gods beside J"; since each of these princes gave names of this class to their children (see ISHBOSHETH, BEELIADA, MEPHIBOSHETH). This view was vigorously maintained by Kuenen, and has recently been revived by Hommel and Kerber; but the trend of scholarly judgment has been against it, and, in the opinion of the present writer, with justice. At the same time there can be little question that the ultimate entire disappearance of the Baal names and almost entire disuse of the compounds with Melech was due to the idolatrons significance which became attached to these words (cf. Hos 2<sup>16</sup> [Heb. <sup>18</sup>]).

(c) Compounds with El.—These names have been

found in almost every Semitic language and dialect. They reach back to a remote antiquity; they continue in use to the latest period. It is possible that they were first used as place and clan names; but some of our earliest names of Hebrew individuals are of this type (e.g. Eliah, Nu 16<sup>1b</sup> (J), Elkanah, 1 S 1<sup>1</sup>). In the case of these and the compounds with Yah, it is important to observe certain differences in the formation of the names. Thus, in the earliest times, compounds in which the divine name is the first element exceed in numbers those in which it forms the second element; this gradually changes until, from the times of Jeremiah onwards, the names in which the divine name forms the second element are many times as numerous as those in which it forms the first. We might perhaps attribute this change, which has the effect of removing the emphasis from the subject to the predicate, to the growth of the monotheistic idea—it being no longer necessary to emphasize what god was re-ferred to when only one was believed in—and the desire to emphasize the activity or quality of God referred to by the predicate. At the same time it must be borne in mind that a similar tendency is (according to Hommel) to be traced in the names of the Sabæans and Babylonians who remained polytheists. In the history of the com-pounds with El, it is to be remarked that at first they outnumbered the compounds with Yah, that from the time of David to the Exile they were quite eclipsed by the compounds of Yah, but that after the Exile they regain much in popularity, especially in certain circles [cf. the priestly list in Ezr 10<sup>18-22</sup>; the list of angels in Enoch, ch. 6 (Greek text, ed. Charles, p. 64); the list of princes in Nu 1<sup>5-16</sup> (P), in which several of the individual names are ancient, but which, as a list, is a late artificial compilation l.

(d) Compounds with Yah before the time of David are very few, and are confined to families

more or less closely connected with the worship In the time of David they grow frequent, and thenceforward never lose their popularity, but gradually drive out almost all other compounds save those compounded with 'El, so that in the post-exilic period, and indeed as early as Jeremiah. Hebrew names consisted for the most part of (1) compounds with the divine proper name J", or (2) the divine title El, which had now become a virtual equivalent for J", since J" was regarded as the only true God, or (3) truncated names—verbs where the implicit subject was God. Special features of interest in names of this class are their rare occurrence among names of women, their almost invariable use for heirs to the throne. whether of Judah or Israel, their rare use as place names (Ananiah and Jeshua being almost the only instances).—An important question connected with the class is whether the names were peculiar to Israel. We find one or two foreigners with names of this type mentioned in OT. But Uriah the Hittite may have adopted this name on taking up his residence among the Hebrews; Tobiah the Ammonite lived at a time when the worship of J" may have passed from Israel to some of the neighbouring peoples (cf. the case of the Samaritans). The decision really rests with the Assyriologists, who are not as yet agreed whether the ia at the end of a great number of Assyrian proper names be a divine name or not.

It remains to add that many of the individual names can be paralleled in several other languages, especially those which refer to the gift of J'' or God (E'l); the thought that the god worshipped has given (viz. the child) is expressed in many Hebrew names, e.g. Elnathan, Nethanel, Jonathan, Nethaniah, Jehozabad, Zebadiah; and also in many names of other peoples, e.g. in the Phenician Eshmuniathan ('Eshmun has given'), Phenician Eshmunathan ('Eshmun has given'), the Assyrian Assur-ah-iddina ('Asshur has given a brother'), the Sabean Wahabailu ('God has given'), and the Palmyrene Zabadnebo ('Nebo has bestowed'). Nor is this parallelism confined to names so early in use as some of the Hebrew names just cited. Corresponding, for instance, to Bezalel (perhaps='in the shadow of God') we have the Assyrian Inu-silli-Bêl ('in Bel's shadow'). But however great this similarity between the But however great this similarity between the class of ideas expressed by the later Jewish names and by other Semitic names may be,—and it is certainly great,—they differ in this very important respect, that the Jewish names refer to one God only, viz. J", and that by means of the proper name J" or the one general term El only.

Much that has been said on the relative prevalence, at different periods, of different types of names, depends on the conclusion established by the present writer elsewhere, viz. that lists of names in P and Chronicles cannot, unless they are independently supported, be cited as evidence of early custom. Hommel's Ancient Hebrew Tradition has in no way affected this conclusion, except in so far as it has by certain analogies confirmed it; for it has not addressed itself to the data on which the conclusion rests. To the character of the individual names in these writings it is impossible to refer at length. But the names recorded only by P contain two classes of which no instance is found elsewhere in OT, viz. compounds with the divine name Shaddai and compounds with Zur ('Rock'), which appears to be a divine title. Hommel has discovered analogous names (e.g. Suri-addana, cf. Jehoaddan) to the latter class in some South Arabian names of the 8th cent. B.C. or somewhat earlier. The compounds with Shaddal (Ammishaddai, Zurishaddai, Shedeur) still remain absolutely unique. It is a pure hypothesis of Hommel's that an Assyrian name which has been transliterated Ammisatana, but by others (e.g. Sayce in PSBA, Nov. 1897, p. 292) Ammiditana, has anything to do with Ammishaddai.

Snyce in PSBA, Nov. 1897, p. 292) Ammuditana, has anything to do with Ammishaddai.

Literature.—Nestle, Die Israel. Eigennamen nach ihrer religionsgeschichtlichen Bedeutung (1870); Gray, HPN (1896). To these two books reference may be made for the earlier literature and for further literature on special points. Grunwald, Die Eigennamen des AT (1895); Kerber, Die religionsgeschichtliche Bedeutung der heb. Eigennamen (1907). For the names in Gn 1-11 see Budde's Urgeschichte; for other important special points, the articles of W. R. Smith on 'Animal and Plant Names,' in Journal of Phil. ix. pp. 75-100; Noldeke in ZDMG, 1886, pp. 148-187 (review of Smith), and 1888, pp. 470-487 (review of Bacthgen's Beiträge); Stade in ZAM (1885), pp. 175-185; Jacob, 'Are there Totem Clans in the OT? in Studies in Biblical Archæology (1894); de Jong, 'Over de met ab ach zamengestelde heb. Elgennamen,' in the Versl. en mededelingen der kon. Akad. van Wetenschappen (Amsterdam), 1880, pp. 52-63; Renan, 'Des noms theophores apocopies, in REJ. v. 161ft.; Jastrow in Journal of Biblical Lit., 1894, pp. 19 ff., 101-127 (on (1) compounds with Boshethe Baal, (2) compounds with yah); Gilbert in Hebraica (April-July 1895); Gray in Expositor, Sept. 1897, pp. 173-190, and Expository Times, Sept. 1897, pp. 55-558 (replies to Hommel's AHT); Barton, 'Native Israelitish Delities,' in Oriental Studies of the Oriental Club of Philadelphia, 1894, and 'The Kinship of Gods and Mon among the early (Semites,' in Journal of Bibl. Lit. xv. pp. 168-182. For comparative purposes, in addition to the recent Hebrew dictionary of Gesenius-Buhl and Oxf. Heb. Lex., the following will be found valuable: the notes in CIS; Fried. Delitzsch, Prolog, eines neuen heb. aram. Wörterbuch zum AT, ch. vi. (for Assyrian parallels); Hommel, AHT, esp. ch. Iii. (for Assyrian and South Arabian parallels); Ledrain, Diet. des noms propres Palmyr

NANÆA (Navala, 2 Mac 113.16).—A goddess worshipped in Syria, Persia, Armenia, and other parts of Asia. Various forms of the name occur, such as Anaitis (Strabo, xv. 733), Anæa (ib. xvi. 738), Aneitis (Plut. Artax. 27), Tanais (Clem. Alex. Protrept. p. 19). By the Greeks this goddess was identified sometimes with Artemis (so Plut. l.c.; Paus. iii. 16. 8), sometimes with Aphrodite (so Clem. Alex. l.c.). She seems to have represented the productive powers of nature, and in many places leρόδουλοι of both sexes were consecrated to her worship. In 2 Mac 1<sup>10-17</sup> we have a legendary account of the death of Antiochus Epiphanes, who is said to have attempted to plunder a temple of Nanæa in Persia, and to have been treacherously killed in the temple by the priests. This temple may be identified with the temple of Artemis (Polyb. xxxi. 2; Jos. Ant. XII. ix. 1), or Aphrodite (Appian. Syr. 66), in the province of Elymais, upon which Antiochus made an unsuccessful attack; but the statement that the king met his death here is certainly untrue (see also I Mac 61-4). plea alleged to have been made by Antiochus, that he wished to marry the goddess Nanæa, may be illustrated by the conduct of M. Antonius at Athens (cf. Rawlinson, Speaker's Comm. ad loc.).

H. A. WHITE. NAOMI (του); LXX B Νωεμείν, Α Νοεμμεί(ν) and Νοομμεί(ν), Luc. Νοομί).—The wife of Elimelech the Ephrathite, of Beth-lehem-judah, who was driven by famine into the land of Moab.

There her husband died, and she was left with her two sons, who married two Moabite women. On the death of her sons, she determined to return to her own country, the land of Judah. On the way she bade

her daughters-in-law go back, each to her mother's house, while she expressed a hope that they might each find another husband. Orpah followed her mother-in-law's advice, but Ruth in loving terms declared that she would not be separated from Naomi. The return of Naomi was a matter of surprise to the people of Bethlehem, and they said, 'Is this Naomi?' Her answer included a double play of words on her own name, 'Call me not Naomi ('pleasant'), call me Mara ('bitter'): for the Almighty hath dealt very bitterly with me . . . why call ye me Naomi, seeing the Lord hath testified ( $\bar{a}n\bar{a}h$ ) against me' (Ru  $1^{2-21}$ ). For the rest of her history, and how she became the nurse of Ruth's child by Boaz, see under RUTH.

H. A. REDPATH. NAPHATH-DOR.—RVm of Jos 12<sup>23</sup>, 1 K 4<sup>11</sup>. See

NAPHISH (נְּמִישׁ). — A son of Ishmael, Gn 2515 (A Na $\phi$ és, D Na $\phi$ é $\theta$ ) = 1 Ch 1<sup>31</sup> (BA Na $\phi$ és) 5<sup>19</sup> (B Na $\phi$ es $\sigma$ aδα $\hat{\epsilon}$ οι, A Να $\phi$ εσα $\hat{\epsilon}$ οι). The clan of which he is the eponymous head has not been traced. last cited passage (1 Ch 519) we are told that along with others of the Hagrites this clan suffered an overwhelming defeat at the hands of the trans-Jordanic tribes (possibly in the time of Saul). In all probability it is their descendants who are mentioned amongst the Nethinim in Ezr 250 as 'the children of Nephisim' (RV, following Kethibh τριρι; Β Ναφεισών, Α Νεφουσείμ) or Nephusim (AV and RVm, following Kerê τριμ). In the parallel passage (Neh 7<sup>52</sup>) the reading is Nephushesim (RV, following Kethibh σρομη; Β Νεφωσασεί, Α -είμ) or Nephishesim (AV and RVm, following Kerê τρφτρι). The reading in 1 Es 5<sup>31</sup> is Naphisi (B Ναφεισεί, A Ναφισί). See, further, Wellhausen-Bleek's, p. 585.

J. A. SELBIE.

Nephisim, Ezr 2<sup>50</sup>; Nephushesim, Nch 7<sup>52</sup>.

NAPHOTH-DOR.—RVm of Jos 112. See Dor.

NAPHTALI (נְּמְּמֶלִי, Νεφθαλείμ) was the fifth son of Jacob, and the second borne to him by Rachel's handmaid Bilhah, Gn 30<sup>7t</sup>. He was thus full brother to Dan, with whose descendants his were afterwards closely associated.

, בְּחִּוּלִי אֱלְהִים נְּפְּקְּקִּיי, exclaimed Rachel at his birth : wrestlings of God have I wrestled.' She had prevailed in a great wrestling match with her sister, for the grace and blessing of God (Dillmann on Gn 30°), as evidenced in the birth of sons; there-

fore she called him Naphtali.

The information regarding Naphtali given in Scrip. is extremely scanty, and it is not greatly augmented by tradition. Targg. Pseudo-Jon. and Jerus. say that he was swift of foot, and that he was the first to tell Jacob that Joseph was alive. This may be due, however, to a certain understanding of Gn 49<sup>21</sup>. When the family went down into Egypt he had four sons (Gn 46<sup>24</sup>). The Targg. above cited say that he was one of the five whom Joseph presented to Pharaoh (Gn 472). According Joseph, he found sepulture in the land of Egypt.

According to the figures given in Nu 14 23,

when the people were numbered in the wilderness of Sinai, the tribe of Naphtali occupied the sixth place with 53,400 men over 20 years old, 'able to go forth to war.' Before entering Canaan Naphtali had fallen to the eighth place with 45,400 (Nu 26<sup>49-50</sup>). The position of Naphtali in the march through the desert was with Dan and Asher, on the north side of the tent of meeting (Nu 2<sup>20</sup>). These three together formed the 'camp of Dan,' numbering in all 157,600 fighting men. When the host moved forward, they acted as rearguerd, setting forth 'hindmost by their standards'

(Nu 2<sup>21</sup>).

With the probable exception of Barak, Naphtali added no distinguished name to Israel's historic roll. The prince and representative of the tribe in the wilderness of Sinai was Ahīra' ben Enan (Nu 1<sup>15</sup> 2<sup>29</sup>). He having perished in the desert, the prince chosen to represent Naphtali in the division of the land was Pedahel ben 'Ammihud (Nu 34<sup>28</sup>). The Naphtalite Nahbī ben Vophsī went with the spies from the wilderness of Faran (Nu 13<sup>14</sup>). At the close of David's reign, Jeremoth ben 'Azriel was over the tribe (1 Ch 27<sup>19</sup>). The mother of Hiram, the cunning artificer in brass, whom Solomon brought from Tyre, is claimed for Naphtali in 1 K 7<sup>14</sup>, but in 2 Ch 2<sup>14</sup> is given to Dan. That Barak belonged to Naphtali has been questioned on the ground that Jg 5<sup>15</sup> seems to associate him with Issachar; but, owing to the confusion of the text (Moore, Judges, in loc.), this point is extremely doubtful, and it is natural to infer, from his residence in Kedesh (Jg 4<sup>8</sup>) and his influence with the mountain tribes (Jg 4<sup>10</sup>), that he was connected

with Naphtali.

Naphtali was the last but one to receive his portion in the land of promise (Jos 1932-89). involved no disadvantage; the district that fell to him included some of the finest land in Palestine, rich and beautifully diversified. On the east it was bounded by the Sea of Galilee and the Upper Jordan. Josephus (Ant. v. i. 20) says it reached eastward to Damaseus. This is improbable, and lacks corroboration. The northern border coincided with that of Israel's possession; while west, south-west, and south, Naphtali marched with Asher, Zebulun, and Issachar. These marches cannot be traced with certainty; but recent identifications of ancient sites, due chiefly to Col. Conder, make possible an approximation (see names of cities in Naphtali). Beginning at the confluence of Wady el-Birch with the Jordan, the line might run westward, following the Jordan, the line might run westward, following the northern side of the valley, including Adami (ed-Damieh, about 10 miles north of Beisan), to Tabor, the lower slopes of which are probably indicated by Aznoth-Tabor, 'the ears of Tabor.' It would then run northward by way of Ziddim (Hattin) and Hukkok (Yakak) to Hannathon (Kefr Anan); thence turning westward, taking in the lands of Ramah (er-Rameh), until it touched the border of Asher, whence, running northward to almost opposite Ture it turned eastward and again almost opposite Ture it turned eastward and again almost opposite Tyre, it turned eastward, and again northward, dividing with Asher the districts now known as Belad Besharah and Belad esh-shukif, the larger portion of which fell to Naphtali. These boundaries include the land lying around the springs of Jordan. This, however, soon passed to Dan (Jos 1947) by means of the raid described in Jg 18, which Naphtali does not seem to have either resisted or resented, possibly because of the close kinship of the tribes. Laish, held by its Phoenician inhabit-ants until attacked by Dan, and Hazor, which is subsequently found in the hands of Jabin, must be added to Beth-shemesh (not yet identified) and Beth-Anath ('Ainitha, 6 miles W.N.W. of Kedes), as cities out of which Naphtali did not drive the Canaanites. Kedesh in Galilee (Jos 207; see KEDESH-NAPHTALI) was set apart as a city of refuge, and this city, along with Hammoth dor and Kartan, with their suburbs, was given to the Levite family of Gershon (Jos 213, 1 Ch 67).

The lofty region to the north-west of the Sea of Galilee formed by far the larger part of the territory of Naphtali. It is in every sense a pleasant land—a country of healthful air and noble scenery. It is plentifully watered, and, compared with the rest of Palestine, well wooded. Olive and lemon trees are specially abundant, while the fig, the mulberry,

and the apricot are general. The vine is cultivated on many a sunny slope, and wide reaches of ploughland in the valleys yield fine crops of wheat and barley. The villages which dot the landscape give evidence of all the comfort and prosperity possible under the present government. Jebel Jermuk, cut off from the Safed hills by the tremendous gorge of Wady Leiman, is the highest mountain in Western l'alestine, reaching a height of nearly 4000 ft. To Naphtali also belonged the plain of Ijon, now Merj A'yûn, in the valley west of Hermon, and the upper valley of the Jordan, from the springs to the Sea of Galilee, both containing much excellent arable and pasture land. As if this were not enough for one whom the Lord blessed with such goodwill (Driver, Deut. p. 413), to Naphtali were assigned the broad fertile terraces by which the land lets itself down from Tabor to the Sea of Galilee, the fruitful level stretches before Hattin, and the Plain of Gennesaret, a tract of unequalled richness and luxuriance on the north-west shore of the lake. To this, doubtless, allusion is made in Dt 3323, where D; should be rendered 'sea,' not 'west, and is certainly the Sea of Galilee. The region has always been famous for its productiveness, 'insomuch that it invites the most slothful to take pains in its cultivation' (Jos. BJ III. iii. 2). It was one of the districts from which Solomon drew provisions, presided over for this purpose by the king's son-in-law Ahimaaz (1 K 4<sup>15</sup>). 'To the inhabitants of such a land the more luxuriant vegetation of the hot lands on either side spread its temptations in vain . . . It is luxury where luxury cannot soften. On these broad heights, open to the sunshine and the breeze, life is free and exhilarating.

## "Naphtali is a hind let loose."

This beautiful figure (Gn 49<sup>21</sup>) fully expresses the feelings which are bred by the health, the spaciousness, the high freedom, and glorious outlook of Upper Galilee' (HGHL¹ 420). The reading, 'Naphtali is a stretched out, i.e. slender, terebinth,' adopted by Ewald (Hist. of Israel, tr. ii. 291), Dillmann (Genesis, ii. 472), and others in preference to MT, is rejected by Delitzsch (Genesis in loc.), with apparently good reason. The figure of a slender tree seems to suit neither the territory nor its inhabitants. The latter appear to have been from the first a robust and numerous people; while neither in shape, nor in the character of its products, is the land at all open to such a description (HGHL¹ 420, note). Delitzsch further points out that why, in the meaning of stretched, slender, is uncorroborated and linguistically improbable. MT is supported by the Targg. and Sam., and is altogether appropriate to people nurtured amid the freedom of the mountains. 'He who giveth goodly words' seems to mark out Naphtali as possessing, in special measure, the gift of eloquence. Of this, however, there is no extant evidence.

His position as a border tribe exposed Naphtali to constant peril from marauding bands, and inroads of hostile neighbours. In conflict with those who sought the spoils of his fair territory, no doubt, was developed that alert, eager, fearless, warlike spirit, which shone so conspicuously under the leadership of Barak and Deborah (Jg 5<sup>18</sup>), and which made the men of these uplands so formidable in later days. A thousand captains and a contingent of 37,000 men 'with shield and spear' were sent to David at Hebron (1 Ch 12<sup>24</sup>). In Tiglath-pileser's first raid against Pekah, Naphtali fell into the hands of Assyria, and the people were taken into captivity (2 K 15<sup>29</sup>; cf. 1 Ch 5<sup>26</sup>, Is 9<sup>1</sup>). The heroic zeal and bravery of the inhabitants of this region in the war of independence was worthy of the greatest traditions of the past (see GALILEE). Josephus, whose knowledge was intimate, testifies

that they were 'inured to war from their infancy,' nor hath the country ever been destitute of men of courage' (BJ III. iii. 2). Much of our Lord's ministry was fulfilled within the borders of Naphtali; and of those chosen to be His companions and witnesses, the chief were natives of this soil.

There are but two towns of any consequence in the territory of Naphtali to-day, both 'holy cities' of the Jews: Tiberias, on the western shore of the Sea of Galilee, with about 5000 inhabitants, where the tombs of Maimonides, Rabbi Akîba, and other great ones are shown, the ruins of the ancient city stretching 2 miles to the south; and Safed, with over 20,000 inhabitants, crowning the mountain north of the sea, dominated by the 'castle hill.' The castle itself, dating from Crusading times, was finally wrecked in the earthquake of 1837, which wrought such havoc both in Safed and in Tiberias. At Meirôn, a few miles north-west of Safed, are the ruins of an ancient synagogue, and the tombs of Hillel and Simeon Bar Yochai. This is a popular Jewish place of pilgrimage. Of the villages representing ancient cities, er-Rameh is perhaps the most prosperous; and on the ridge north of er-Rameh stands the hamlet of el-Buke'a, the highest place of human habitation in Palestine, whose Jewish inhabitants claim to have held it in unbroken possession since Joshua's conquest.

Naphtall, Mount ( ) TO, IT, EV  $\tau \hat{\omega}$   $\delta \rho \epsilon \iota \tau \hat{\omega}$  Ne $\phi$ - $\theta a \lambda \epsilon l$ , Jos 207) was the northmost of the parts into which the central range of Western Palestine was divided, named after the tribes that mainly occupied them—Mount Judah, Mount Ephraim, and Mount Naphtali. It is a mistake in either case to translate 'hill-country' (see, however, Driver in art. HILL-Country). The rendering 'mount' or 'mountain' is in accordance with immemorial usage in these lands. The modern Jebel Safed corresponds generally with the ancient Har Naphtali, and Jebel Nablus with Har Ephraim: the name in each case is taken from the seat of government in the district. No one thinks of translating Jebel Libnan (Mount Lebanon) by 'the hill-country of Lebanon,' although the scenery there is as diversified as in any district in the southern range.

W. EWING.

NAPHTUHIM (Δημρί), Νεφθαλ(ι)είμ, Nephtuim, Nephthuim) is given in Gn 10<sup>13</sup> and 1 Ch 1<sup>11</sup> as the fourth 'son' of Mizraim. Nothing definite is known of a place or people bearing this name. One view, as old as Targ. Jon., transposes the first two consonants, reads Pentaschænum, identifies with Νέφθυς, and puts the situation N.E. of Egypt. An attempt to find an Egyptian etymology takes na as the plural article and Ptah as the god's name, thus yielding naptah, with a meaning 'they of Ptah,' an appropriate name for the district about Memphis, the centre of the Ptah cult. This name, however, does not seem to have been in actual use, in native documents, to denote a place or people. The Ethiopian capital, Napata, mentioned by Ptolemy (iv. 7, 19) is a tempting parallel, but would be more likely to be assigned to Cush. The certainty of Pathrusim being the Egyptian peters or 'southern land' led Erman to suggest a corruption from Δημη led Erman to suggest a corruption from Δημη in orthern land.' If we are to admit corruptions, we may compare the Assyrian form Nathu, given in Assurbanipal's Annals (Col. i. 94, 99), as a district, probably in Lower Egypt. This seems to represent the Egyptian n-idhw, 'the marshes,' and is used in opposition to Patrusi. Herodotus (ii. 165) gives

this name as  $Na\theta\hat{\omega}$ , and indicates that there were two such districts. The disappearance of p may be compensated by the change from t to t in the Assyrian spelling. For other suggestions see Dillmann and Holzinger on Gen. and the references there; Steindorff,  $Beitr.\ zur\ Assyr.$  i. p. 600 f. C. H. W. Johns.

NAPKIN is the EV trn in Lk 1920, Jn 1144 207 (in Ac 1912 [the only other occurrence of the Gr. word] 'handkerchief') of σουδάριον, which is really a Lat. word sudarium\* (from sudor, 'sweat'). The name refers to the use of this article to wipe off perspiration from the hands and face (cf. Quintil. vi. 3). In Lk 1920 the man who had received the one pound, wrapped his lord's money in a sudarium, which may here mean either a species of head-dress like the Arab. kûfiyeh, or a towel or the like (the reader will recall instances in the Arabian Nights Tales of the wrapping up of money in a linen cloth and then concealing it, and also of the carrying of it in the folds of one's turban). The same uncertainty attaches to the meaning of the handkerchiefs (σουδάρια) which are said to have been brought in contact with the person of St. Paul and then used for the healing of the sick, Ac 19<sup>12</sup>. The face of the dead was bound up with a napkin, Jn 11<sup>44</sup> (Lazarus) 20<sup>7</sup> (Jesus). See, also, art. Dress in vol. i. p. 627<sup>b</sup>. J. A. Selbie.

NARCISSUS (Νάρκισσος).—In Ro 1611 St. Paul salutes, among other Roman Christians, those 'of the household of Narcissus, which are in the Lord. The name was common, especially among slaves and freedmen; cf. CIL vi. 4123 (in the household of Livia), 4346, 5206 HELICONIS NARCISSI AVGVS-TIANI: 22875 NARCISSVS · AVG · LIB.; but it is best known as that of the notorious freedman of Claudius, who had been put to death by Agrippina shortly after the accession of Nero, some three or four years before this letter was written (Tac. Ann. xiii. 1; Dio Cass. lx. 34). It was an obvious suggestion that the reference was to members of his household, but the fact that he was already dead when the letter was written seemed to make this impossible. Bishop Lightfoot has, however, suggested that the identification is still possible. When Narcissus was put to death, his property would be confiscated and become the property of the emperor, and his slaves would swell the imperial household, but be distinguished as the Narcissiani. We find servants of Livia called Maccenatiani, as having come from the household of Mæcenas (CIL vi. 4016, 4032); we find also Amyntiani (4035; cf. 8738), Agrippiani, Germaniciani. The same explanation is given for the household of Aristobulus (wh. see). The form Narcissianus occurs, but apparently not necessarily with this meaning, Murat. p. 1150, 4:TI · CLAVDIO · SP · F · NARCISSIANO. The following inscription is later, CIL vi.: D.M | T. FLAVIVS · AVG. LIB | NARCISSVS · FECIT · · · , and lower down : T. FLAVIVS · AVG · LIB · FIRMVS · NARCISSIANVS · · · REFECIT. ANG. LIB. FIRMYS. NARCISSIANYS. REFECIT. It may be possible to work this point out more completely when vol. vi. of the Berlin Corpus of Inscriptions is finished. An inscription quoted by Plumptre (Biblical Studies, p. 428) is of doubtful genuineness. The later traditions about Narcissus are quite valueless. He is made by Pseudo-Hippolytus (de LXX Apostolis, p. 955, ed. Migne), bishop of Athens, and is commemorated on Oct. 31 on Oct. 31.

LITERATURE. — Lightfoot, Philippians, p. 173; Sanday-Headlam, Romans, p. 425; Acta Sanctorum, Oct. vol. xiii. p. 687. A. C. HEADLAM.

NARD.—'Pure nard' is the AVm rendering for "It appears in the Targums as סירוא (Buxtorf, Lex. Talm. 1442).

'spikenard' (Mk 143, RVm 'pistic nard'). See SPIKENARD.

NASBAS (B Νασβάs) occurs only in To 11<sup>18</sup> 'And Achiacharus and Nasbas his brother's son came,' namely, to the wedding of Tobias the son of Tobit. The AV gives in the margin the suggestion of Junius: 'Achiacharus, who is also called Nasbas' (i.e. 'Αχιαχαρ δε καὶ Ν. for 'Αχιάχαρος καὶ Ν.). The MSS and Versions offer the following variants (cf. Ball, Variorum Apocrypha): N 'A. and Nabad his cousins' (but a second hand corrected of ξάδελφοι into the singular); cursives 'A. and Nabas his cousins'; Itala 'A. and Nabal his maternal uncle' (Cod. Sangerm. 15: 'Achiacar in Navis soceri illius'); Syr. 'A. and Laban, his sister's son' (125 omitted in the Thes. Syr. col. 1886); Vulg. 'Achior and Nabath the cousins of Tobias.'

The question whose brother's or sister's son Nasbas was, whether of Tobit (so Vulgate and others) or of Achiacharus, which could not be settled by the data in the Book of Tobit, is now decided in favour of the latter view through the newly published Story of Ahikar and his Nephew. For there can be no doubt as to the identity of these personages; and it is now also certain that we must find the same person (Nasbas) in the Aman of the received text of To 14<sup>10</sup> (see art. AMAN in vol. i. p. 79 and correct there, that the Syriac spells 'Akab' [224] not 'Ahab'); cf. further, Ball, Variorum Apocrypha, where the Sinaitic Text (ἐν τῷ ποιῆσαί με ἐλεημοσύνην) must be translated: 'because he gave me alms,' not 'because I did alms.'

The original form of the name is most probably Nadab, though it is not easy to say on palæographical or other grounds how all the variants could arise, especially the received form Nasbas. See J. R. Harris in the Introduction to The Story of Aḥiķar (London, 1898, pp. xxix, xlv).

NATHAN (p; '(whom God) gave'; Na\$\(\text{A}\) \).—1. Successor of Samuel in the line of prophet statesmen (Sir 47\). When first introduced into the history (2 S 7\) \(^{1-17}\), 1 Ch 17\) he is already David's chief spiritual adviser (cf. 1 K 1\) \(^{27}\) Ker\(\text{E}\). The incident is a remarkable one, whether we regard it as indicative of the prophetic as contrasted with the priestly policy in religious affairs (Ewald, \$HI\$ iii. 131), or as marking an epoch in the development of the Messianic ideal. The transfer of the seat of government from Hebron to Jerusalem was the first step towards the unification of the kingdom. It only remained to centralize the religious system as well, and so render Israel completely homogeneous. The building, therefore, of the temple at Jerusalem was something more than an expression of fervent piety; it was a stroke of far-reaching policy. At first, indeed, it was not altogether successful; but after the fall of the Northern Kingdom the temple became so inextricably associated with the religion of the Hebrews as to involve in its own ruin the system which it was designed to consolidate and preserve. The prophet historian represents Nathan's purely human impulse as favourable to the project. That very night, however, a Divine revelation warned him that the time was not yet ripe for this innovation, and bade him communicate to the king a consolatory promise, which is one of the most important Messianic prophecies in the whole OT. The conception of the Son of David, whose kingdom should have no end, struck the imagination of every subsequent Messianic prophet, and is the most prominent

feature in NT retrospect. The significant variations of the Chronicles in this speech need not here be indicated. But Nathan fulfilled the prophet's truest function in that scene in which his idyllic parable awoke the conscience of his friend and master (2 S 121-15, Ps 51 title). As we read the words of restrained emotion in which Nathan lays bare the meanness and selfishness of David's sin, we feel that their effect must have been, in great measure, due to the peculiarly intimate relations of the king and the prophet. Doubtless it was a consolation to Nathan to be commissioned subsequently (2 S 1225) to bestow on the first child of the now forgiven union his name 'in religion,' 'Jedidiah, after the meaning of Jah' (Ewald, III iii. 168). The infant thus favoured was afterwards to owe his crown to the prophet's astuteness and promptitude. It was Nathan that first detected the plot of Adonijah, and suggested and carried through the plan of action by which it was baffled, and he took a leading part in the joyous coronation ceremony that followed (1 K 1). One is tempted to suggest that the far-seeing and enlightened statesmanship which marked the early years of Solomon's reign was a result of the teaching of Nathan. It is significant that his son Zabud was selected by Solomon as a special priest and 'king's friend' (1 K 4°). The Chronicler ascribes to Nathan histories of David (1 Ch 2929) and of Solomon (2 Ch 929). It remains to add that Jerome (Qu. Heb. on 1 S 17<sup>12</sup>, 2 S 21<sup>21</sup>, 1 Ch 207 27<sup>82</sup>) identifies Nathan with David's nephew Jonathan. He says that he is called Nathan as a prophet, but Jonathan as a warrior, and that when called by the former name his father is not mentioned, since he was not a prophet.

2. Son of David, born at Jerusalem (2 S 514, 1 Ch 144). According to 1 Ch 35 he was third son of Bathshua (Bathsheba), Solomon being fourth. But we should naturally infer from 2 S 1224 that Solomon was the first son of Bathsheba's that lived for any time. The princely family of Nathan is mentioned in Zec 1212 as a specific division of the house of David. St. Luke (311) traces the descent of our Lord from David through Nathan rather than through Solomon, as is done by St. Matthew.

3. Father of Igal (2 S 2326), or brother of Joel (1 Ch 1138), who was one of David's heroes. The text of Chronicles is preferred by Rawlinson, but seems a corruption of that of Samuel.

4. A Judahite (1 Ch 226). 5. One of the deputation sent by Ezra to request Iddo to provide Levites, etc., for the temple (Ezr 816, 1 Es 844).

6. One of those who had taken strange wives (Ezr 1089), called in 1 Es 984 Nathanias.

NATHANAEL.—1. (Na $\theta a \nu a \eta h$ ) one of the 'captains over thousands,' who played a prominent part at Josiah's passover, 1 Es 19. 2. (B Na $\theta a \nu a \eta h a h$ ) a priest who had married a foreign wife, 1 Es  $\theta^{22} = NETHANEL$  of Ezr  $10^{22}$ . 3. (Na $\theta a \nu a \eta h$ ) an ancestor of Judith, Jth  $\theta^{1}$ . 4. See next article.

NATHANAEL (Ναθαναήλ, equivalent to γκρη ['God has given'; cf. the names Dorotheus, Dositheus, Theodore], Nethanel [which see], Nu 18 etc.).—A man of Cana of Galilee (Jn 21²), whom Philip, after having himself been called by Christ, induced to come into the Master's presence (Jn 1⁴σπ.). Our Lord describes him as 'an Israelite indeed,' i.e. one who valued the spiritual privileges, and sought to realize the ideal life of an Israelite; and as a man 'in whom there is no guile,' i.e. not sinless, but sincere and candid, open-minded, and single-hearted, one who was free from the guile of Jacob before he attained to the nobility of Israel. Nathanael showed his candour (1) by not allowing himself to be deterred from coming to see Jesus

through his natural reluctance \* to accept Nazareth, an insignificant townlet, mentioned by no prophet. as the place whence the expected Messiah would come forth; (2) by at once surrendering his prejudice when adequate evidence of Christ's supernatural power was received. His eventual faith in the Messiahship of Jesus could hardly have been due to the mere fact that Christ, unseen by Nathanael, had beheld him under the fig-tree, even assuming that he was seen there engaged in devotion or religious meditation. Christ alludes, doubtless, to some recent crisis or special incident in Nathanael's spiritual experience which had taken place while he sat under the fig-tree—an awakening, perhaps, to a higher ideal of life and duty, or a successful struggle with some strong duty, or a successful struggle with some strong temptation, or a devout longing for the coming of Messiah and His kingdom. He who had then not only seen, but seen into him, must be 'He that should come,' the Son of God (in Messianic sense, cf. Ps 27), and the (spiritual) king of Israel (Is 97). The name of Nathanael occurs only once again in the Gospel history, namely, in Jn 212, where

he is one of the seven to whom the risen Jesus manifested Himself at early dawn after a night of fruitless fishing. One expects to find Nathanael included (like the other disciples who were simultaneously called) among the Twelve apostles. Aug. (Hom. vii. on the Gosp. of Jn.) accounts for his non-selection by the assumption that Nathanael was learned in the law, and that Christ desired to transform the world through unlearned 'apostles. Somewhat similarly, Gregory the Great (Mor. 33. 21) represents our Lord as 'passing over Nathanael in order to show, by the choice of apostles who had nothing praiseworthy of their own, that their sufficiency came not from themselves, but from above. The now widely accepted † identification of Nathanael with Bartholomew is not known to have been adopted until the 9th cent., by the Nestorian Elias, of Damascus (Assem. B. O. iv. p. v).‡ To the considerations already adduced under BAR-THOLOMEW in favour of this suggestion, may be added (1) Nathanael's apparent inclusion (Jn 21<sup>2</sup>) among the 'disciples,' by whom, in the context (Jn 20<sup>245</sup>. 21<sup>14</sup>), the evangelist seems to mean apostles; (2) the fact of most of the other apostles bearing two names, and, in particular, the parallel case of Levi, who is so called in Mk  $2^{14}$ , Lk  $5^{27}$ , and whose other name, *Matthew*, signifies 'gift of Jehovah,' almost equivalent to *Nathanael*. The identification, however, cannot be regarded as more than a plausible conjecture, against which the absence of any hint of the identity in any early writer tells strongly, although not decisively. Nathanael has also been identified with (1) the friend of Cleopas in I.k 24 (Epiph.  $H\alpha r$ . 23, without reason given); (2) Matthew (Thoma in Genes. d. Jn. Ev.), a supposition negatived by the diverse circumstances of Nathanael's call; (3) John himself (Spaeth in Hilg. Zeitsch. 1868), Jn 21<sup>2</sup> being treated as a mistake of the alleged 'supplementer'; (4) Matthias (Hilg. NT extra Can. iv., and, doubtfully, Jn. Lightf. Com. Ac. in. loc., who elsewhere, in his Comm. on

\*Some early writers, however (e.g. Cyril of Alex. Comm. in lcc.), interpret Nathanael's words in Jn 146, not interrogatively, but as an acquiescence in Philip's statement contained in v. 45. Augustine (in loc.), while giving both interpretations, appears to prefer 'From Nazareth some good might come,' and deduces from the answer that Nathanael was a learned man, who had 'looked well into the prophets,' and perceived a hidden reference to Nazareth in their writings.

† Among others, by Ew., Mey., Lange, Keim, Wesl., Newm., Alf., Tren, Millig., Farrar, Westcott. The Apocr. Judicium Petri represents both Bartholomew and Nathanael as apostles.

‡ Elias is followed by Ebedjesu and other Nestorians (Ass. iii. 306). In the West the suggestion is found first in Rupertus of Deutz (12th cent., Com. in loc.), but did not excite much attention until the 16th cent., when it was approved by C. Jansenius (Com. p. 142), and condemned by Baronius as 'levis conjectura' (i. 123).

Mt. and Jn., prefers to identify Nathanael with Bartholomew); (5) Simon the Cananæan, from a misinterpretation of this surname, as if 'of Cana'; and (6) Stephen, owing to Jn 151 and Ac 786 (both the last conjectures mentioned by Chemnitius. Harm. Evan. 312; cf. Lipsius, Apocr. Apos. iii. 152).

LITERATURE (in addition to works quoted).—Kindler in Thes. Theol. Philol. ii. 870ff.; Trench, Studies in the Gospels; N. Marshall, Three Discourses on Nathanael in Sermons, vol. ii.; Newman, Sermons, vol. ii.; M'Laren, Year's Ministry, ii. 169.

NATHANIAS (Nathanias), 1 Es  $9^{34}$  = Nathan, Ezr 1089.

NATHAN-MELECH (אַלְּסְלְחִיּן; Eng. as Vulg.).—An official in the reign of Josiah, whose name is used to designate one of the halls or chambers (חֹשִׁלִי) of the temple (2 K 23<sup>11</sup>; see EUNUCH). Gifts and offerings were received in these chambers (Neh 10<sup>39</sup> (\*\*)), and they may have been assigned particularly to the control of those whose names are attached to them (Jer 35\* 36<sup>10</sup>· 11). In the 'hall of Nathan-melech 'Josiah deposited the horses of the sun (? a group of statuary) which he removed from near the temple entrance (2 K 2311; translate, and he removed the horses . . . to the chamber The express identification of the chamber suggests that it was a permanent repository for these horses rather than an 'office' to which they were handed over. Regarding its situation in the temple area, see PARBAR. The name יוֹנְילֶלְ Melech gave,' is exactly paralleled by הָוֹנֶי and יְנֵינֶלְ 'J" gave,' 'El gave.' It is not necessarily a recognition of an idol god Melech (Molech), for Melech, 'king, was no doubt a title of J". But the name may be a trace of the idol-worship of the 7th cent. (Gray, Heb. Proper Names, pp. 146-148). In the LXX 750 does not seem to have been taken as part of the proper name (Luc. Ναθάν εὐνούχου τοῦ βασιλέως; Β Ναθάν βασιλέως τοῦ εὐνούχου). W. B. STEVENSON.

NATIONS.—See GENTILES, GOIIM, RACES.

NATURAL.—Two different Greek words are thus rendered in AV and RV, which it is necessary here to distinguish. 1. φυσικός, 'that which is according to the nature' (φύσις) of any organism, which is the outcome of its constitution. Thus St. Paul contrasts ή φυσική χρήσις with that which is παρά φύσιν (Ro 120); and in like manner the 'natural branches,' οι κατά φύσιν κλάδοι (Ro 1121), are contrasted with the graft from a foreign stock. It is trasted with the graft from a foreign stock. It is plain that it is impossible to decide finally whether or not any process is or is not φυσικός, unless we understand thoroughly the constitution of the  $\phi \dot{\phi} \sigma s$ . It is only because we assume that we certainly know the true  $\tau \dot{\epsilon} \lambda \sigma$  of sex, that we unhesitatingly condemn as 'unnatural,' abominable practices like those condemned by St. Paul (Ro 120), despite the fact that they are widely prevalent in various parts of the world. Science assures us that they contradict the 'constitution of human nature,' the φύσις of man, and conscience acquiesces in the decision.

There is, however, little dispute as to what is unnatural for man, i.e. that which contradicts the whole system of man's nature, and is not merely repugnant to certain elements of it. But when we ask questions about the distinctions between what is natural and what is supernatural in the universe, difficulties emerge. Certainly (see NATURE, p. 493b), if we understand by  $\phi \phi \sigma s$  'the sum of all that is, nothing is strictly supernatural. But science usually employs the word 'nature' (described in art. NATURE, § 1) as equivalent to the complex of phenomena, the sum of material forces. And we have not yet exhausted the meaning of 'nature' in this sense, for we are not omniscient.

things once considered supernatural are now found to be strictly the results of 'natural' processes, of hitherto undiscovered laws of the physical universe. The progress of science largely consists in enlarging the domain of 'natural' law. Hence of a given event, seemingly anomalous, it may be impossible for the observer to say with confidence that it is not the result of unknown natural law. and that it must be referred to supernatural intervention. The degree of confidence with which this can be asserted in any particular instance must be measured by the completeness of our knowledge of the circumstances and of the agents. And Butler's observation is profound, 'that there may be beings in the universe whose capacities and knowledge and views may be so extensive as that the whole Christian dispensation may to them appear natural, i.e. analogous or conformable to God's dealings with other parts of His creation; as natural as the visible known course of things appears to us. For there scarce seems any other possible sense to be put upon the word, but that only [of] similar, stated, or uniform' (Anal. I. 1 sub fin.). This, however, is only a speculation; the fact remains, that of certain alleged phenomena our knowledge of nature assures us that they are not in accordance with its ordinary laws as known to us, and that they must therefore be classified as supernatural. The classification is provisionally as supermaturat. Ine classification is provisionally necessary, although it may not be scientific subspecie attentiatis. See MIRACLE (p. 383) for a fuller discussion of this point.

2. ψυχικός is twice rendered by 'natural' in the RV, and twice by 'sensual.' The mind of man is frequently spoken of in the NT as twofold (see

frequently spoken of in the NI as twofold (see PSYCHOLOGY), embracing the  $\pi\nu\epsilon\partial\mu a$  or  $\nu\epsilon\partial\nu$ , the higher faculty which he enjoys as made in the image of God, and the  $\psi\nu\chi\eta$ , the lower element which he shares with the beasts. The wisdom which is 'earthly' and 'devilish' is also  $\psi\nu\chi\iota\kappa\eta$  (Ja 315), and the  $\psi\nu\chi\kappa\kappa d$  are described by St. Jude (v. 19) as πνεθμα μη έχοντες. In like manner St. Paul says of the ψυχικός that 'he receiveth not the things says of the  $\psi \nu \chi \iota \kappa \delta \tau$  that 'he receiveth not the things of the Spirit of God' (1 Co 214), and he contrasts the  $\sigma \hat{\omega} \mu \alpha \ \psi \nu \chi \iota \kappa \delta \nu$  of this life with the  $\sigma \hat{\omega} \mu \alpha \ \pi \nu \epsilon \nu \mu \alpha \tau \iota \kappa \delta \nu$  of the life to come (1 Co 1544). 'The natural man' and 'the natural body' are alike of the earth, earthy. It is questionable if the Revisers were well advised \* in retaining the word 'natural' in these last presence as the repulsions of the state of the in these last passages as the rendering of  $\psi \nu \chi \iota \kappa \delta s$ ; 'sensual' gives the meaning better, and the old rendering suggests to the reader a quite unwarrantable antithesis between the 'natural body' and that which is presumed to be 'supernatural.'

J. H. BERNARD. NATURAL HISTORY .- In entering on the study of the natural history of the Bible we have to con-

1. That, with the exception of Solomon + (1 K 433), the authors of the several books were in no sense naturalists. The allusions by 'Solomon' to objects of nature are so few and general as to give us no idea how far he had reduced his knowledge to a scientific form. There is no evidence in the Scriptures written after his day that he formulated and gave to the world a scientific treatise on these subjects. The imperfect descriptions of natural objects given by the Gr. and Rom. and Arab. naturalists many centuries later, make it quite improbable that any treatises of Solomon on plants and animals were such as, had they been pre-served, would have enabled us to identify with accuracy the objects alluded to.

† Supposing we have any productions of his pen in the OT, which is denied with practical unanimity by modern scholars.

2. Apart from the question of the degree of knowledge of natural history possessed by the writers of the Bible, their allusions to natural objects are, for the most part, incidental and general, not scientific. Even in the lists of clean and unclean animals in Lv and Dt a large proportion of the names refer to classes and genera, such as the 'falcon, after its kind'; 'the raven, after its kind'; 'the hawk, after its kind'; 'the heron, after its kind,' etc. etc. It is clear from this that the class or genus was in the mind of the writer, and not an individual species, except in those cases in which there was but one well-known species in Bible lands, as the camel, the coney, the swine, etc.

3. The Heb. literature is confined to the can-nical books. We have no sidelights from other onical books. books in that language to aid us in determining the objects referred to. In the case of objects mentioned but once or a few times only, it is often difficult or impossible to be certain as to what was intended. The LXX gives the judgment of its translators as to the Gr. equivalents in their day. This opinion may not be always well founded. And it is still more probable that in many cases they used a text very different from the MT. The cognate Arab. often sheds light, but in the more difficult cases it is of the least value.

4. The books of the Bible were written by numerous authors, in various parts of the East, and through a period of at least 1000 years. Any one who has endeavoured to collect the common names of plants and animals in any country, but especially in Bible lands, has been struck with the fact that a given name refers to different objects in regions not far apart. For example, in Lebanon the word kaikob is used for several species of maple. In Gilead it is used for Arbutus Andrachne, L., a tree known in the rest of Pal. and Syria as kotlib. The word ballat is properly an acorn, but it is used also for the Portuguese Oak, acorn, but it is used also for the Portuguese Oak, Quercus Lusitanica, Lam., and another species of oak, Q. Cerris, L. Again, the same object has often different names in regions within Bible lands. The cedar of Lebanon has three names within the limits of N. Lebanon, 'arz, 'ibhul, and tnub. The term'arz is also used for the Aleppo Pine. Again, some generic names, as Oak, have no names in Arabic. Some of its species have names, as sindian for Q. coccifera, L., mallul for Q. Lusitanica, Lam., look for Q. Look, Ky., ballul for Q. Cerris, L. It is by no means impossible that the names of plants changed, either by the introduction of foreign terms, or the adoption of local designations into general literature. It may thus happen that a certain name, as cedar (Lv 144), refers happen that a certain name, as cedar (Lv 144), refers to a plant different from that to which it was applied in later times. There may be many such cases.

5. It is certain that the writers of the Bible were not more precise in their designation of objects of natural history than writers in general literature to-day. When speaking of grass, lilies, mustard, thorns, thistles, owls, bats and other sorts of natural objects, of which there are numerous species, belonging perhaps to several genera, writers of the Bible must not be understood as having in mind a particular species. An attempt to find for every allusion to natural objects a particular species, results in confusion of thought, and endless and insoluble controversy. In many cases where individual species are intended, decisive evidence is not to be found as to what the species is. In such cases we have adopted the plan of presenting the evidence for one or more interpretations, and making no attempt at a decision. Fortunately, these are usually the less important animals and plants.

6. In some cases popular errors as to species appear in the EV. Such is the application of

<sup>\*</sup> They have also retained the rendering 'his natural face' for re appearer rin yestesse aves (Ja 123), although they render the Greek literally in their margin.

the term 'mole' (Lv 11<sup>20</sup>) to the mole rat, Spalax typhlus. There are no true moles in Pal. and Syria. But the spalax has the aspect and habits of a mole. Some imaginary animals, as the satyr, are spoken of in the Bible. It is as idle to look for their equivalents in nature as it would be when mentioned in profane literature. But some such monster is a conception well-nigh universal among mankind. In so far as possible it has been the aim of the author in these articles to give the evidences which establish or vitiate the claims of the names adopted in AV and RV, rather than the numerous and conflicting opinions of scholars. Those who may wish to enter into that phase of the question may easily find the topics in the indices of the large number of books on ancient and biblical natural history. Among the principal ancient and mediæval authors who have written on these topics are Pliny, Dioscorides, Theophrastus, Galen, Diodorus Siculus, Strabo, Herodotus, Abu el-Fudli, Avicenna, and Ibn el-Bîtâr. Their testimony, as well as that of others, has been summed up in the erudite works of Bochart (*Hierozoicon*), Celsius (Hierobotanicon), Rosenmüller (Natural History of the Bible), Hiller, Royle, Ursinus (Arbor. Biblic.), Many naturalists have written of the Fauna and Flora of Bible lands. Prominent among them are Hasselquist, Russell, Ehrenberg, Hemprich, Michaelis, Schweinfürth, Ascherson, Carruthers, Wood, Tristram, Houghton, and Boissier. Allusions to natural objects are frequent in all the standard works of travel, especially in Burckhardt, Robinson, Thomson, and Tristram.

Pal. and Syria are at the meeting-point of three continents, Asia, Africa, and Europe. Their animals and plants connect the Fauna and Flora of all. Furthermore, their surface is greatly diversified. Lebanon is over 10,000 and Hermon over 9000 ft. above the sea. A number of peaks of Amanus and Akher Dagh are nearly as high, as also the higher mountains of Sinai. The Jordan Valley is from a little below to 1294 ft. below the Mediterranean. In the 50,000 square miles between Sinai on the S., Taurus on the N., the sea on the W., and the Syrian desert on the E., are maritime plains, seaward and landward mountain slopes, alpine summits, tropical valleys, the quagmires and marsh thickets of the Holeh, the salt lakes and marshes of Aleppo and Palmyra, the rolling plateaus of Moab, Gilead, and Bashan, the ancient lake bed of Code-Syria, and the arid Syrian desert. The natural result of these great diversities of surface and climate is a large number of species and varieties in proportion to the

extent of the land.

A. ANIMAL KINGDOM.—i. Mammals.—Tristram (Fauna and Flora of Pal.) gives the number of mammals in the Holy Land at 113. This number, which has been considerably augmented by subsequent discoveries, is very large in proportion to the size of the country. A number of those mentioned in Scripture, as the lion, the unicorn, and the wild ox, are now extinct. The larger carnivora, once so numerous, are now rare. The leopard is found only in lonely retreats, while the bear is confined to alpine Lebanon and Antilebanon. The hart is no longer found in Pal., but still exists in Amanus. The pygarg (Antilope Addax, Dt 145) is now no longer found, or only on the borders of the desert. Others of the Scripture mammals which remain have become very scarce, as the wild goat, the coney, and the roe-buck. The last is likely soon to become extinct. The following is a complete list of the scriptural and apocryphal mammals:—Antelope (RV;=Wild Ox, AV), Ape, Ass, Wild Ass, Badger (AV;=Seal or Porpoise, RV), Bat, Bear, Behemoth, Boar, Camel, Cat, Cattle, Chamois (Wild Sheep), Coney,

Dog, [Dragon, RV Jackal, La 4<sup>3</sup>], Dromedary (really young Camel, see DROMEDARY), Elephant, Ewe, Fallow Deer (AV;=Roebuck, RV), Ferret (AV;=Gecko, RV), Fox, Gazelle, Goat, Wild Goat, Greyhound, Hare, Hart, Hind, Horse, Hyæna, Jackal, Lamb, Leopard, Lion, Mole, Mouse, Ox, Wild Ox (AV;=Antelope, RV), Pygarg, Ram, Roe, Roebuck (AV;=Gazelle, RV), [Satyr], Sheep, Swinc, Unicorn, Weasel, Whale (AV;=Sea Monster, RV), Wolf. Leaving out the duplications in the two VSS, and animals mentioned under different headings, there are in all 38 different ones, among which, however, are included the dragon and satyr, which are partially or wholly fabulous.

and satyr, which are partially or wholly fabulous.

ii. BIRDS.—The order of the creation of birds in the Mosaic cosmogony (Gn 1<sup>20. 21. 22</sup>) corresponds with the order of their geological appearance, which is in the cretaceous period, after the reign of the reptiles. The aquatic species were the first to appear.\* Birds are generally more highly organized than reptiles and fishes on the one hand, and less so than the higher mammals on the other. They all have feathers, and are oviparous. Hence they are readily distinguished, and seem to have been recognized by 'Moses' as a well-marked class. Some have thought that bats were included in OT among the birds, as they are mentioned at the end of a list of birds (Ly 11<sup>13-19</sup>). But it is not clear that the writer so understood the matter, as the bats come between the birds on the one hand, and insects and reptiles on the other. The exclusion of the unclean birds in the lists of Lv 11 and Dt 14 implies that other birds were eaten. those that were eaten, however, only one, the quail, is mentioned by name. 'Fatted fowl' (1 K 423) is doubtful. It may perhaps be inferred that doves were kept for food in later OT times (Is 603), and hens in NT (Mt 2337), also that sparrows were sold for food (Mt 1023, Lk 123). The numerous allustrations of the state of the sta sions to fowling imply the use of birds so caught for food. The Bible alludes to the migration and singing of birds (Ca 2<sup>11·12</sup>, Ec 12<sup>4</sup>, Jer 8<sup>7</sup>), also to their nesting in the temple (? Ps 84<sup>3</sup>). Pigeons, swallows, sparrows, and other birds find a secure sanctuary now in churches, but esp. in mosques. The Israelites were forbidden to take the mother bird with the young (Dt 22<sup>6,7</sup>), perhaps because the mother at such times will not avail herself of her power of concealment and flight. of the law was to cultivate a merciful regard for the maternal instinct, not merely to preserve game (another possible explanation is quoted by Driver, ad loc.). Allusion is made to the forsaking of the nest (Pr 278), also to flight (Hos 911, Ex 194, Dt 3211-12). More than 350 species of birds have been collected in the Holy Land. Some of these have brilliant plumage, as the Garrulous Roller, the Bee Eater, the Hoopoe, several Kingfishers, the Sun Bird, the White-throated Robin, Tristram's Grackle, the African Darter, etc. But the chief ornithological characteristic of the country is the large number of birds of prey, esp. of the larger kinds, as vultures, eagles, falcons, buzzards, and the fishing water fowl, as pelicans, cranes, herons, cormorants, darters, etc. The coast species resemble those of the maritime regions of the Mediterranean basin. The mountain systems of Lebanon and Antilebanon, with their continuations southward, parallel to the coast, divide the maritime regions of the Systems of Archiver time region from that of the Syrian and Arabian deserts. The avifauna is nearly identical in both the mountain chains. That of the deep cleft of the

<sup>\*</sup>With this statement in the text the reader will do well to compare Driver's art. 'The Cosmogony of Genesis,' in Expositor, Jan. 1886. There on p. 23 a table exhibits the order of appearance thus: according to geology, Fishes, Reptiles (in Carbon. period), Birds; according to Gn, Fishes of all kinds and Birda Reptiles (27).

Jordan and Dead Sea contains a number of Indian and Ethiopian species. The following is a list of and Ethiopian species. The following is a list of Scripture birds:—Bittern (AV;=Porcupine, RV), Cock, Cormorant, Crane (RV;=Swallow, AV), Cuckoo (AV;=Seamew, RV), Dove, Eagle, Fatted Fowl (?), Gier Eagle (AV;=Vulture, RV), Glede, Hawk, Hen, Heron (AV;=Ibis, RVm), Hoopoe, Ibis, Kite (AV;=Falcon, RV), Lapwing, Night Hawk, Osprey, Ossifrage (AV;=Gier Eagle, RV), Ostrich, Owl, Great Owl (AV;=Arrowsnake, RV), Screech Owl (AV;=Night Monster, RV; this refers to a fabulous being, see art. LILLITH). this refers to a fabulous being, see art. LILITH), Little Owl, Horned Owl (RV), Partridge, Peacock, Pelican, Pigeon, Quail, Raven, Sparrow, Stork, Swallow, Swan (AV; Horned Owl, RV), Turtle Dove, Vulture,—in all 34, exclusive of duplicates. Many of these are generic or ordinal terms, in-cluding a large number of species.

iii. REPTILES.—These form a class in Scripture, being mentioned in Gn 7<sup>14, 21</sup>, 1 K 4<sup>33</sup>, Hos 2<sup>18</sup>, and elsewhere, by the side of beasts, birds, and fishes, though naturally not a class in the scientific sense of the term, coextensive with the class of 'Reptiles' of modern naturalists. The four living Orders of Reptiles, Testudinata or Chelonia, the Turtles; Loricata or Crecodilia, the Crocodiles; Sauria, the Lizards; Ophidia, the Serpents,—are all represented in the biblical Fauna. The following reptiles are mentioned in Scripture:—Adder, Arrowsnake (RV; = Great Owl, AV), Asp, Basilisk, Chameleon, Cockatrice, [Dragon, i.e. sea monster, or in Ps 9118 a land serpent], Gecko, Leviathan, Lizard, Monitor (if this is the meaning of köah in Lv 11<sup>20</sup>, see CHAMELEON), Serpent, Viper,—only 12; but several of these are generic or ordinal, and include large numbers of species. There are probably not fewer than 100 species of reptiles in Pal. and Syria.

iv. AMPHIBIANS .- These include Frogs, Toads, Newts, and Salamanders, all of which are represented in the Holy Land. The Frog, however, is the only member of the class mentioned in Scripture.

v. FISHES .- The class of Fishes is recognized in Scripture, but includes cetaceans and many reptiles. They were brought in on the fifth day, with other oviparous creatures, before the viviparous animals of the sixth day. No species of true fish is mentioned by name in the Bible. The only attempt at classification is into clean and unclean, the former having fins and scales, the latter not. The excluded families are the Siluridæ, the Sheath fish; Raidæ, the Skates; Petromyzidæ, the Lampreys; Mataa, the Skittes; retromptime, the Lampreys; Squalidæ, the Sharks; and Murænidæ, the Eels. Solomon 'spake of fishes' (1 K 433). Fish were especially abundant in the Nile (Nu 11<sup>8</sup>, Is 19<sup>8</sup>) and the Sea of Galilee. A number of the species in this lake are identical with those in the Nile, a fact noted by Josephus (BJ III. x. 8). They also abound in the Jordan and its affluents, and the streams which amply into the Mediterranean. the streams which empty into the Mediterranean,
—in all. 33 fresh-water species. The Mediterranean coast species have not been fully studied. They are, however, very numerous. The Dead They are, however, very numerous. The Dead Sea has none, a fact noted by Ezekiel (4710), who illustrates the vivifying power of the holy waters descending from the altar by the fact that they can enable even the Dead Sea to swarm with fish. Arabs have a prejudice against eating fish, hence the immense shoals in the interior waters. On the contrary, the people of the maritime regions are exceedingly fond of them, and the fishing industry is a large one at all the seaports. The government gains a considerable revenue from the tax on fish.

vi. JOINTED ANIMALS.—(a) Insects.—The Holy Land is emphatically a land of insects. They number thousands of species, and have as yet been very imperfectly studied. Those mentioned in Cankerworm, Caterpillar, Crimson (=Cochineal), Flea, Fly, Gnat, Grasshopper, Hornet, Lice, Locust, Moth, Palmerworm, Scarlet (=Cochineal), Wasp,—in all, excluding duplicates, 16, of which, however, a number are generic or ordinal. (b) Scorpions.— Of these there are several species, none of which are distinguished by name. (c) Spiders.—Of these also there are numerous species, and countless individuals.

vii. MOLLUSKS. - Of these there are large numbers, both of land and water species. Few of them are mentioned in Scripture. The Snail, Onycha, are mentioned in Scripture. the operculum of several species of Strombus], Pearl [the product of diseased action in some species of Meleagrina], and other bivalves, Purple [an extract from a species of Murex], make up the meagre list of this immense sub-kingdom.

vin. Worms.—Of these only the Horseleech, an Annelid, and the generic expression Worms, are given. The sub-kingdom is very extensively represented.

ix. CULLENTERATA. — The Mediterranean Sea contains an abundance of species of Sea Anemones, Jelly Fishes, and Corals. Only the latter are men-

tioned in Scripture, with no intimation of species.

x. PORIFERA.—The Sponge is once mentioned (Mt 2748||) in connexion with the crucifixion of our Lord. The allusion is undoubtedly to the common

sponge so familiar to all.

VEGETABLE KINGDOM: BOTANY.—The Flora of Pal. and Syria is exceedingly rich and varied owing to the same causes which have been alluded to in connexion with the Fauna. In the region bounded by Akher Dagh on the N., Sinai on the S., the Mediterranean on the W., and the Syro-Arabian desert on the E., are 124 Orders, 850 Genera, and about 3500 Species of Physiograms and The experience of the writer leads him Acrogens. to believe that there are still many new species to be discovered in the mountains of N. Syria, and in the districts E. of the great north and south cleft of the Orontes, Cole-Syria, the Jordan Valley, and the 'Arabah.

Syria and Pal. may be divided into six botanical regions. (1) The Maritime Plain. Its Flora resembles that of the other coasts of the Levant, but with a few species not elsewhere found. (2) The parallel mountain chains E. and W. of the great cleft, from the level of the Maritime Plain to an altitude of 4000 ft. These chains begin with Amanus, the northernmost peaks of which are divided from Akher Dagh by the valley of the Ak-Su, and the southernmost from Mt. Cassius by the valley of the Orontes. Mt. Cassius is the outlier of the Nusaireh chain, which extends from the valley of the Orontes to that of the Nahr el-Kebir (the ancient Eleutherus), which separates it from Lebanon. Lebanon extends from the Eleutherus to the Leontes. S. of the Leontes the hill-country of Galilee, Samaria, Judæa, and et-Tih constitutes a more or less continuous chain, separated from Sinai by the sandy plain of Debbet er-Ramleh. A parallel chain, E. of the great cleft, begins with Kurd Dagh, and extends southwards under the names of Jebel Bil'as, Antilebanon, Hermon, Gilead, Moab, and Edom, to the Red Sea at 'Akabah. A break occurs in Jaulan, where a tableland, dotted with extinct volcanoes of no great elevation, divides Antilebanon from Gilead. This plain is terminated on the E. by the range of Jebel ed-Druz (Hill of Bashan). These mountain ranges have a characteristic flora, and each section of them has its peculiar species. It would carry us far beyond the limits of this article to enumerate them. (3) The alpine summits of these ranges, principally those of Akher Dagh, Amanus, Cassius, Lebanon, and Antilebanon, have a flora remarkable Scripture are: Ant, Bee, Beetle (AV; = Cricket, RV), for its specialization, and having little of the palæ-

arctic character. (4) The tablelands of Aleppo, Cole Syria, Damascus, Hauran, Gilead, and Moab. These have also many distinctly characteristic plants. (5) The deserts bordering these, and extending southward into et-Tîh and Sinai. have already furnished a notable addition to the Flora, and doubtless contain many undiscovered species. (6) The chasm of the Jordan and Dead Sea. in which a tropical climate prevails, and where a

in which a tropical climate prevails, and where a number of Indian and Ethiopian types are found. The most numerous Orders are Ranunculaceæ, 12 genera, 75 species; Cruciferæ, 72 gen. 240 sp.; Sileneæ, 10 gen. 129 sp.; Leguminosæ, 56 gen. 423 sp.; Umbelliferæ, 73 gen. 190 sp.; Compositæ, 115 gen. 457 sp.; Borragineæ, 26 gen. 110 sp.; Scrophulariaceæ, 17 gen. 131 sp.; Labiatæ, 31 gen. 207 sp.; Chenopodiaceæ, 24 gen. 64 sp.; Liliaceæ, 22 gen. 124 sp.; and Gramineæ, 92 gen. 238 species. Ranunculus has 33 sp., Silene 61, Trigonella 37, Medicago 26, Trifolium 56, Astragalus 124, Vicia 31, Galium 39, Anthemis 28, Verbascum 40, Linaria 24, Scrophularia 19, Veronica 24, Salvia 39, Stachys 25, Euphorbia 41, Allium 42, Cyperus 15, Carex 18. As might have been expected from the dryness of the climate, Ferns are few, being represented by only 15 gen. and 25 are few, being represented by only 15 gen. and 25 species. The Orchids are of the smaller kinds, numbering 11 gen. and 37 species.

The following Scripture plants cannot be determined with certainty, viz.: Algum (almug), baytree (not a tree at all), box, cockle, cypress, gall, fir, gopher wood, hemlock, oil-tree, pannag, poplar, sweet cane, and vine of Sodom.

The following are generic or ordinal, viz.: Bramble, brier, bitter herbs, bulrush, bush, flag, grass, hay, herb, lily, melon, nettle, oak, oil-tree, pulse, reed, rush, thistle, thorn, vetches (RVm for nettles), willow.

The plants which may be known with a fair measure of certainty are distributed in 35 Orders. as follows:-Ranunculacea, fitches; Crucifera, mustard; Capparidea, caper; Cistinea, ladanum; Malvaceæ, cotton; Linaceæ, flax; Vitaceæ, vine; Rutacea, rue; Anacardiacea, balm, balsam, bdel-Rulacce, rue: Anacaraiaceæ, daim, daisam, dueilium (?), frankincense, myrrh, nuts (pistachio, Gn 4311), teil-tree, terebinth; Leguminosæ, beans, juniper (retem), husks (carob), lentils, shittim wood (acacia), rye (kirsenneh); Rosaceæ, almond, apple, hazel (almond); Myrtaceæ, myrtle; Lythrariæ, camphire (henna); Granateæ, pomegranate; Caraiæ, camphire. cucumbers. courd: Umbelliferæ. Cucurbitaceæ, cucumbers, gourd; Umbelliferæ, anise (dill), coriander, cummin, galbanum; Valerianaceæ, spikenard; Compositæ, wormwood; Styracaceæ, styrax; Oleaceæ, olive; Aquilariaceæ, lign aloes; Ebenaceæ, ebony; Solanaceæ, mandrake; Labiateæ, hyssop, mint; Chenopodiaceæ, mallows (saltwort, RV) (malluah); Laurineæ, cassia, cinnamon; Urticaceæ, fig, sycamine, sycomore; Plata-naceæ, chestnut (plane-tree); Juglandaceæ, nut (walnut); Confere, ash (oren), cedar, thyine wood; Palmeæ, palm; Iridaceæ, safiron; Amaryllidaceæ, rose of Sharon (narcissus); Liliaceæ, garlic, leeks, onion; Graminea, barley, millet, spelt, tare, wheat.

Of the above 65 species, 35 are cultivated plants. The foregoing analysis makes it clear that the Hebrews did not study plants as closely as animals, a fact illustrated among the Arabs of the present day. G. E. Post.

NATURE.—Few words have been the source of so much confusion in theology as the word nature, for few words have been employed, as this has been, for a long period in two or three distinct, though related, senses. It will be best to begin our discussion by distinguishing between these different meanings.
1. The word 'nature' is commonly used in

scientific investigation to describe the sum-total

of physical forces-the whole range of the coexistences and sequences of phenomena. In this view it includes the entire domain of the inorganic and organic, the mineral, vegetable, and animal kingdoms. Thus we speak of 'students of nature,' of 'natural science,' or natural philosophy, meaning thereby to describe those departments of human knowledge which are concerned with the material universe. Nature, in this sense, includes man in universe. Nature, in this sense, includes man in respect of that side of his life which he shares with the lower animals. The science which has to do with the diseases of his body is, par excellence, 'Physic.' And the progress of physiology suggests that not only the disorders of his body, suggests that not only the disorders of his body. but some at least of the maladies of his mind, are subject to physical law, and may be made the subject of scientific investigation like any other

493

physical process.

2. Man, however, is possessed of a unique faculty which he does not share with the other inhabitants of this earth—the faculty of self-determining reason and of conscious will. To be able to make a moral choice is his supreme prerogative. He is not altogether the victim of breeding and of circumstance; he is a free agent. And this freedom of his enables him, within certain limits, to initiate movements in the visible order, and to control and guide the material forces of the universe. If we are to regard man in this point of view as a part of nature, we must widen our conception of nature, which will now include not only the kingdom of law, but the kingdom of freedom. Nature, in this second and enlarged sense, does not exclude the possibility of free will; it takes in the moral world; it recognizes moral no less than 'physical' law.

3. The word is often used in yet a larger sense.

Nature is regarded as the sum-total of all that is, or was, or shall be. It is the All, the Universe. And, so defined, it is not exclusive of God, for (to the believer in Him) He is the ens realissimum, the most certain and the most real existence which we can conceive. Nature, in this view, is the kingdom of God, in whom and from whom it draws its life. All its operations are the manifestations of His ceaseless and omnipresent activity. If we use the word consistently in this its largest sense, it is plain that we must abandon the term supernatural. Nothing can be supernatural, nothing can be 'beyond' or 'above' nature, if nature is the sum of all that is. See NATURAL.

So far we have only attempted to define the various connotations which the word 'nature' may And it is to be observed that in whatever sense the word is used the idea is constantly personified, and attributes and operations are ascribed to nature which strictly are proper to persons. When we speak of 'bountiful' nature, we may be thinking of it in sense (1) or in sense (3), and we may have no intention to include or to exclude the idea of God as the Bountiful One. Thus Christ said, 'the earth beareth fruit of herself' (αὐτομάτη, Mk 428), not meaning thereby to suggest that the harvest is not the gift of God. And, on the other hand, it is not to be presumed that every form of words which seems to recognize measured the same as a constant. words which seems to recognize providence or compassion in nature is intended to suggest a Personal and Benevolent Will behind it. For example, some recent theological writers have argued as if they held 'God' to be merely a synonym for 'nature,' and have identified 'God' not with the Personal Author and Governor of nature, but with the order of nature itself. This is to introduce a grave ambiguity into our theological nomenclature; but it is here instanced merely to illustrate the point that our idea of nature is necessarily affected and coloured by our idea of God, and that a definition of nature is hardly complete which does not convey to the mind some clear view concerning its relation

to God. Something, therefore, must be said on this head.

Atheism dismisses the question by refusing to admit that it has a meaning. That there is no God, that there exists nothing but the successions and co-existences of phenomena, is the principle of speculative Atheism. Theoretically, there is no reason why Atheism should not recognize the free agency of man, and so admit the idea of nature in the second sense above described; but, as a matter of fact, Atheism is usually based on philosophical materialism, which can find no place for free will within its borders. That nature is self-created and self-acting is its fundamental thesis. Such a conception is utterly irreconcilable with religion in any true meaning of that ill-used word, and must not be further dealt with here.

But, granting the existence of a Supreme Person whose mind and purpose the operations of nature reflect, in what relation do we conceive Him to stand to the visible order of the world? answer suggested by the first page of the Bible and by the first article of the Christian creeds is that He is its Creator, the 'Maker of heaven and earth, and of all things visible and invisible'; cf. Gn 1<sup>1</sup>, Ex 20<sup>11</sup>, Is 66<sup>1</sup>, Jer 32<sup>17</sup>, Ac 14<sup>18</sup>, Rev 4<sup>11</sup>. The various 'proofs' of the existence of God, in particular that known as the 'cosmological' proof, are concerned with the justification to the intellect of this instinctive belief of mankind, which was present to the Hebrews, as it seems to have been present to every primitive race of men (see GOD). But this conception of God as the Creator of nature is not by itself a satisfying or complete conception of the Supreme. God is not to be regarded, if we are to follow Scripture, only as an Infinite and All-holy Being on whom the world depends for its creation. Reason certainly requires us to believe that the Creator of nature transcends nature; but the heart is not satisfied until it recognizes God not only as the Great Artificer, but as the present source of the world's life, as having entered into history, as never abandoning the universe which He has made. No one really cares to speculate about a Being who is relegated to an ever-receding past, an absentee Creator, pursuing (as it has been said) 'an eternal policy of non-intervention.' And yet such barren Deism is the logical outcome of exclusive attention to that conception of the Supreme which regards Him solely as transcending nature. This was the solely as transcending nature. This was the especial fault of most of the English theology of the 18th century, that it did not realize that (as Butler put it) God is no less nature's Governor than its Author.

It is thus apparent wherein the imperfection in Paley's famous illustration of the watchmaker and the watch consists. An artificer having once constructed a machine and set it going, leaves it to its own devices; the more perfect the machine is, the less will interference be necessary. But that is not a complete account of the relation of God to nature. The analogy breaks down hopelessly in this respect, that nature is not only the creation of God; it is also the sphere of His constant and beneficent activity. 'Of him,' but also 'through him and unto him are all things' (Ro 1136). And this conception of God as a Spirit dwelling in nature and manifesting Himself through nature is frequently expressed in Scripture. 'Whither shall I go from thy Spirit, or whither shall I flee from thy presence?' asks the Psalmist. 'If I ascend up into heaven, thou art there; if I make my bed in Sheol, behold thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea, even there shall thy hand lead me, and thy right hand shall hold me' (Ps 1307-10). Again, to the Psalmist

God is the continual spring of life: 'Thou hidest thy face, they are troubled; thou takest away their breath, they die' (Ps 10429). So also Elihu declares, 'The Spirit of God hath made me, and the breath of the Almighty giveth me life' (Job 334). This conception of God, widely different from that taught by the Deism of the last century, is the conception which the progress of natural science and our increased knowledge of the secrets of nature is bringing more and more into prominence. That God is in nature as well as above nature, that He is at once an Indwelling Spirit and a Transcendent Personality, is the true theistic doctrine of science. Nature does not work independently of Him; all its operations are due to His ceaseless activity. He upholds 'all things by the word of his power' (He 12). The course of history is not a blind mechanical process of evolution; 'the Most High ruleth in the kingdom of men' (Dn 417).

men' (Dn 4").

This is well said in one of the authorized Homities of the Church of England: 'It is not to be thought that God hath created all this whole universal world as it is; and thus once made, hath given it up to be ruled and used after our own wite and device, and so taketh no more charge thereof; as we see the shipwright, after he hath brought his ship to a perfect end, then delivereth he to the mariners, and taketh no more care thereof. Nay, God hath not so created the world, that He is careless of it; but He still preserveth it by His goodness; It estill stayeth it in His creation. For else, without His special goodness, it could not stand long in this condition.'\*

Now, the problem which presents itself here is so to guard our language that it shall not be open to the charge of confounding God with nature. It is hard to steer clear of both Scylla and Charybdis, to avoid Deism on the one side, Pantheism on the other. Greek philosophy furnishes us with instructive illustrations of the difficulty of avoiding fatal error in this matter, if we attempt to construct our theology without the aid of revelation.
If the Epicureans, with their conception of gods who lived at ease a life of undisturbed and dignified repose, went off in the direction of Deism, the Stoics, with their doctrine of God as the soul of the world, were Pantheistic. And this is really a more serious error than the other, because it effectually banishes all true religion. For religion involves belief in a Person, who not only is in constant and intimate relation to nature, but who also enters into communion with men. This is impossible if God be identified with nature, for with a mere abstraction no fellowship can be sought, and to it no worship can be addressed. Pantheism is as impotent as Deism to satisfy the intellectual and the emotional cravings of mankind.

Pantheism is a vague word, and requires closer examination than we have yet given it. Something has been said above of theories which resolve God into the complex of material forces, which identify God and nature, indeed, but by the elimination from the idea of God of its distinctive features, reason, intelligence, personality, goodness, and the like. Such theories, though from one point of view 'Pantheistic,'—for the only Supreme which they recognize is the Universe of Being,—are, from a truer point of view, 'Atheistic,' for they do not admit the existence of any spiritual being higher than ourselves. But idealist philosophies, such as that which was unfolded in the system of Spinoza, do not thus begin and end with the material forces of the phenomenal world; they begin and end with God, in whom as the Great All-pervading Spirit they find the explanation of all existence. Spinoza does not resolve God into nature, but he exalts nature to God, he treats all the operations of nature as the manifestations of supreme spiritual substance. For him, nature is the development of freedom, or, to use his own remarkable language, the processes of the universe

\* Homily for Rogation Week, pt. i.

are the exhibition of the natura naturans (or God) unfolding itself (or Himself) in the natura naturata (or nature). It is plain that, on such a system as this, the 'laws of nature' are absolutely binding on the Divine Life; for the operations of these laws are the manifestations (and the only possible manifestations) of that Life. We have here, indeed, a spiritual interpretation of nature presented to us; every movement in the visible order is, as it were, a sacrament of the Divine Life. But such a doctrine is widely removed from Theism; for while it speaks of a Divine Life, it leaves no room for a Divine Reason, and Will, and Personality. The relation of the Supreme to nature is conceived in such systems rather as the relation of the vital principle to the living plant, than as the relation of the directing mind to the field of experience in which it operates. Certainly, this latter analogy is not complete or final. Our minds produce effects in the physical order only through the medium of our bodies, and even thus only within certain limits and under certain conditions; the power of supreme mind over the universe, which is the of supreme mind over the universe, which is the sphere of its manifestation, cannot be conceived as other than absolute (see MIRACLE). But yet is the analogy true so far as it goes, and it is in harmony with the few hints which Scripture offers on this great subject. The opening verses of St. John's Gospel speak of the creation of all things as the work of the Logos, and of Him as the Life of the world and the Light of men (Jn 11-4). The Logos is not a mere name for the impersonal order of nature; He is the Directing Intelligence which set in array its forces, and continues to guide and control them in their energy. And of the life of man St. Paul quotes with approval the saying of Cleanthes, 'We are also his offspring,' and declares, 'In him we live, and move, and have our being' (Ac 1728). This is the rational and Christian view of nature and of humanity, and it is as widely divergent from Pantheism on the one hand as it is from Deism on the other. An important conclusion is thus reached. Theology, no less than science, leads to the conception of the *Unity* of nature. It is not a mere aggregate of independent forces; it is a totality, which is conceived as One because of the Unity of the Intelligence which created and governs it. Each part ministers to the welfare of the whole; in its growth only the 'fittest' survive, because, were it not for the elimination of the 'unfit,' nature would be not Cosmos but Chaos. It would be 'without form and void,' as in the at would be 'without form and vola,' as in the days before the Divine Spirit moved upon the face of the waters (Gn 1<sup>2</sup>). Nature is One, because of the Unity of its Author; 'I am J" that maketh all things' (Is 44<sup>24</sup>; cf. Rev 4<sup>11</sup>). But unity does not necessarily involve uniformity. The Unity of Nature is an axiom of science and of religion; the Uniformity of Nature, i.e. the rule that 'the same physical causes will always produce the same physical causes will always produce the same physical effects, far from being an axiom, is nothing more than an empirical maxim, convenient for scientific investigation, which has been found to hold good in an enormous number of instances, but which has no a priori necessity and no rational guarantee of universality. Nature is, indeed, governed by law and not by caprice: that we know and are assured of. But such a formula does not settle the matter. A wise and prudent man's life is also governed by law and not by caprice, and yet the intervention of his moral reason, of his power of choice, disturbs from time to time the semblance of uniformity in his conduct. For him the same physical antecedents do not always issue in the same physical consequences, because moral considerations—non-physical motives -may sway him now in this direction, and now

in that. Thus in the case of man, who is a part, and an important part, of nature, the rule of uniformity does not hold absolutely. And when we remember that the Divine Will must be, at the least, as independent of physical law as is man's will, we see no ground for regarding the 'Uniformity of Nature' as a constitutive principle of the Cosmos. It is nothing more than a convenient way of saying that God's laws are general laws; that He does not depart from the usual methods of His rule, without the gravest reasons for intervention. See MIRACLE.

Such conceptions, such problems, are too abstract to occupy the mind of primitive piety. And, as a matter of fact, the word 'nature' does not once occur in the OT. The Hebrews saw the hand of Jehovah everywhere; they recognized that He had made 'the heaven and the earth and the sea, and all that in them is' (Ex 2011), that the thunder was His voice and the lightning flashes His arrows was His voice and the lightning-flashes His arrows of destruction (Ps 18<sup>18</sup>), that fire and hail, snow and vapour, and stormy wind fulfilled His word (Ps 148<sup>9</sup>); but they had no thought of nature as a whole, a totality, which might be conceived of as an abstract idea, without any special reference to the particular phenomena which represent it in the concrete. The power of forming abstract ideas comes late in the development of mental life and the concrete. The power of forming abstract ideas comes late in the development of mental life, and it was not until Hebraism came into contact with Hellenism that the idea of  $\phi \phi \sigma s$  was introduced into Hebrew thought. In 4 Mac 57 we find into Hebrew thought. Antiochus recommending Eleazar to consent to eat swine's flesh, on the ground that it is given to us by nature. And St. Paul argues that 'nature itself teaches' us that a man's head ought to be uncovered, but a woman's covered (1 Co 11<sup>14</sup>). In both of these instances nature is spoken of as a unity, and it is personified in a fashion which would have been unintelligible at an earlier period of Jewish thought. Again, the word occasionally in the writings of St. Paul and in the Bk. of Wis (as it is still) to describe the sum of the properties or characteristics of a species—the system of its constitution (as Butler would put it). system of its constitution (as Butter would put it). E.g., among the subjects on which  $\sigma o \phi l a$  is engaged are mentioned  $\phi \psi \sigma e \iota s$   $f \omega \omega \nu$ , 'the natures of living creatures' (Wis 7<sup>20</sup>), and St. Paul speaks of abominable vices as being  $\pi a \rho a \phi \psi \sigma \iota \nu$  (Ro 1<sup>24</sup>), i.e. contrary to the nature of man; and in Ro 11<sup>24</sup> of a wild olive-tree being grafted into a good olive-tree grafted grafted into a good olive-tree grafted g tree  $\pi a \rho \dot{a}$   $\phi b \sigma u \nu$ , i.e. contrary to its nature. The uncircumcised condition of the Gentiles is described as ή έκ φύσεως ακροβυστία (Ro 227), this being, as we would say, the *natural* state of man. Larger questions are suggested by the apostle's words, 'we were by nature (φύσει) children of wrath' (Eph 28),

which are considered elsewhere. See FALL. It is easy to understand how such expressions and such a usage of the word  $\phi \delta \sigma_{i3}$  should grow up, once the conceptions of the world as a system, and of each animal and plant upon it as possessing a constitution of its own, became familiar. The word only gives rise to ambiguity when we are using it in reference to questions which touch theology; it then becomes necessary to ask whether he who employs it understands it in sense (1) as the complex of the mechanical and chemical forces of the Cosmos, in sense (2) which reckons man's will and reason as part of his  $\phi \delta \sigma_{i3}$ , or in sense (3), the true religious conception, which ultimately refers every operation of phenomenal force to the Agency of Supreme Mind, directing and ordering it in wisdom.

J. H. BERNARD.

NAUGHT, NAUGHTY, NAUGHTINESS.—The Eng. word 'naught' is formed from the Anglo-Saxon na, not, and wiht, a whit, a thing. At an early stage, perhaps under the influence of the verb 'ought,' the spelling 'nought' came in. Then the word was contracted to 'not.' Thus 'naught,' 'nought,' 'not' are all forms of the same word, and do not differ in meaning. In AV of 1611 the spelling is always nought, except in Lk 2311 'Herod, with his men of warre, set him at naught,' and Scrivener (Camb. Paragraph Bible, p. xlvii) says that in this passage 'naught' is a mere error.

The meaning of 'naught' was originally 'not anything,' worthless.' But it soon came to mean 'bad,' vicious,' and this was the usual meaning in the 17th cent. Consequently in the 1638 ed. of AV the word is spelt 'naught' in 2 K 2<sup>19</sup>, Pr 20<sup>14</sup>, the Heb. being yn ra', 'bad'; elsewhere 'nought,' the Heb. being some expression of worthlessness rather than of wickedness. This distinction was preserved by Scrivener, and is found in most mod.

editions of AV.

Examples of 'naught' or 'nought' in the sense of 'bad' are Udall's Erasmus' Paraph. i. fol. 54, Why therfore saye ye that that whiche is good of it selfe cummeth from Beelzebub, who by your owne judgement is al naught?'; Barlowe, Dialoge, p. 76, 'Why do ye then dispise the universall churche, because some of them be noughte?'; Mt 2016 Rhem. 'Is thine eye naught, because I am

good?

Naughty means 'worthless' in Pr 612, Heb. אָרָם אמון means 'worthless' in Pr 613, Heb. פּרָאָר, usually 'a man of Belial,' here 'a naughty person,' RV 'a worthless person.' Cf. Tind. Expos. p. 7 'These and all such are naughty arguments.' Elsewhere it means 'bad,' Pr 174 'A liar giveth ear to a naughty tongue' (אין שון אין 'A liar giveth ear to a naughty tongue' (אין שון אין 'RV 'a mischievous tongue'); Jer 242 'The other basket had very naughty figs' (אין RV 'bad'); basket had very naughty figs' (hy7, RV 'bad'); Wis 12<sup>10</sup> 'they were a naughty generation' (πονηρά η γένεσις αὐτῶν, RV 'their nature by birth was evil'). So in Udall's Erasmus' Paraph. ii. fol. 284 the devil is called a 'naughtie lord.' Latimer (Scrmons, p. 115) says, 'The herte of man is naughti, a croked, and a froward pece of worke.' In the Preface to his Dialoge (p. 35) Barlowe says, 'Where as is enmyte and contention, there is inconstancy and all noughty doyng.' Cf. also Mt 21<sup>41</sup> Rhem. 'The naughtie men he wil bring to naught'; and Milton, Arcopagitica, p. 16, 'Best books to a naughty mind are not unappliable to occasions of evill.'

Naughtiness occurs only in the sense of 'wicked.

Naughtiness occurs only in the sense of 'wickedness': 1 S 17<sup>28</sup> 'I know thy pride, and the naughtiness of thine heart' (אָפָלְ אָי); Pr 11<sup>6</sup> 'Transgressors shall be taken in their own naughtiness' (ন্যা, RV 'mischief'); Wis 412 'The bewitching of naughtiness doth obscure things that are honest' naughtiness doth obscure things that are honest' (βασκανία φαυλότητος); Ja 1<sup>21</sup> 'Lay apart all filthiness and superfluity of naughtiness' (περισσείαν κακίας, RV 'overflowing of wickedness,' RVm 'malice'). Cf. Udall, Erasmus' Paraph. ii. fol. 284, 'The whole world is set altogether on naughtynes'; Mt 22<sup>18</sup> Rhem. 'Jesus knowing their naughtines, said, what do you tempt me Hypocrites?' and Ac 3<sup>26</sup> Rhem. 'To you first God that every one should convert him self from his naughtines.' This word 'naughtiness' is effectively made use of by Driver as the rendering of the Heb. word 'aven in the Psalms and elsewhere (Parallel Psalter, at Ps 7<sup>14</sup> 10<sup>7</sup> etc., and note on p. 449 f.). See VANITY. J. HASTINGS.

NAVE.—The centre part of a wheel through which the axle passes. In AV 'nave' is the rendering of 12, which is also translated 'boss' of a shield in Job

1526, and 'high place' AV, 'eminent place' RV, in in sound. In RV אָה is tr. 'nave,' the word אָה in sound. In RV אָה is tr. 'nave,' the word אָה meaning literally the gathering or binding together, and when applied to a wheel refers to that part which binds together the spokes, i.e. the nave. It is found only in 1 K 7<sup>33</sup> (אַרָּיְרֶת). בּוֹ is tr. in RV 'fello,' or the rim of the wheel. W. Carslaw.

NAYE (Ναυή).—The Gr. form of the Heb. name Nun (which see). It occurs only in Sir 46¹ (AV).

NAYY.—1 K 926-27 10<sup>11. 22</sup> ter, all אָאָר, a fleet, which elsewhere is found only in Is 33<sup>21</sup>, בּאָרִישָּׁים, EV 'galley with oars.' See Galley. Also 1 Mac 1<sup>17</sup>, 2 Mac 12º 14¹, all στόλος. See SHIP; and for 'navy of Tarshish' 1 K 10²² see also TARSHISH.

NAZARENE (Ναζαρηνός from Ναζαρά, like Μαγδαληνή from Μαγδαλά [cf. Dalman's Aramaische Grammatik, p. 141, note 7]; Ναζωραΐος used exclusively in Mt, Jn, Ac, and probably so in I.k.\* The form Natopaios occurs in some MSS).—This term is used in the Gospels, but only by those outside the circle of His intimate friends, to dissame name. In Ac it is also employed by St. Peter (2<sup>22</sup> 3<sup>6</sup> 4<sup>10</sup>), by St. Paul (26<sup>9</sup>), and by the risen Lord (22<sup>8</sup>). In Mt 2<sup>23</sup> the evangelist says that Jesus went to dwell at Nazareth, that 'it might be fulfilled which was spoken by the prophets, that he should be called a Nazarene' (Naturalist). Many interpretations of this passage have been given, none of them entirely satisfactory. The most important are: (1) that which connects it with the word און in Is 11¹; (2) that which assumes a play on the word 'Nazirite'; (3) Hitzig's view that it refers to the word יאַרי in Is 49°; (4) that it has reference to a lost prophecy, or one that was only traditional and never written; (5) that the use of the plural  $\pi\rho\rho\phi\eta\tau\hat{\omega}\nu$  precludes any reference to a single word, and that the evangelist alludes to prophecies asserting that the Messiah would be despised. Jerome, in his commentary on Is 11', objected to the first interpreta-tion on the ground that the f of Naζωραΐος does not correspond to the x of γμ. The same objec-tion applies to Hitzig's view. The objection to (2) tion applies to Hitzig's view. The objection to (2) is that Jesus was not a Nazirite; and to (4) that it is a counsel of despair. The last explanation (5) is already given by Jerome in his commentary to Mt 223, and is perhaps the most probable (cf. Weiss in Meyer's Kommentar, in loc.). Finally, the word Najapalor is used in Ac 24 of the Christians. It is similarly employed by the Jews in the time of Tertullian: 'Unde et ipso nomine nos Judæi Nazaræos appellant per eum' (adv. Marcionem, iv. 8). After this, however, it practically disappears from literature in this sense until about A.D. 400, when it appears as the name of a Christian sect. G. W. THATCHER.

NAZARETH (Ναζαρέθ, Ναζαρέτ, Ναζαράτ, Ναζαράθ, Ναζαρά, mod. Arab. en-Naşira; on etymology and meaning of the name see Swete on Mk l') was situated in a high valley running from S.S.W. to N.N.E. among the most southerly of the limestone hills of the Lebanon range just before it drops down to the Plain of Esdraelon. The base of the valley is about 1200 feet above the level of the Mediterranean, while the western nill (which is higher than the hills on the N. and E.), on which the town was built, rises to a height of 1600 feet. The

\* In Westcott and Hort's text Ναζαρηνός occurs in Mk 134 1047 166, also in Lk 434, where it is probably copied from Mk or a common source. Apart from these instances it occurs only in Lk 2419, where, however, the MSS A, D, etc., read Ναζαραϊό. It thus seems probable that Ναζαρηνίδ was the only form used in the original source of the Synoptic Gospels.

floor of the valley is covered in the season with wild flowers, and the olive, fig, mulberry, lemon, pomegranate, almond, and quince flourish. Want of soil, however, causes many bare spots in the landscape, which is further characterized by the long irregular rows of cactus hedges. The climate is moderate on the whole, though it is hot in the is moderate on the whole, though it is not in the summer and snow is not unknown in the winter. Like many other parts of Palestine, it is subject to severe storms. The old town of N. has entirely disappeared, but, judging by the rock-tombs that remain, it probably extended higher up the western hill than the modern village. It seems to have been a place of no importance for the national life of In 180 click on the remain is not in the seems to have been a place of the parts of the (cf. Jn 146), although it was only a day's journey from the Mediterranean at Carmel, and about the same distance from Capernaum and Tiberias, the same distance from Capernaum and Tiberias, while it was a three days' journey from Jerusalem. Roads go out from it to Sefurieh, Akka, Kefr Kenna, Tiberias, Mt. Tabor, Jaffa, and the Plain of Esdraelon; but no main line of traffic passes through it. The only permanent water supply comes from the Virgin's Spring ('Ain es Sitt Mariam), which rises near the Greek church of Gabriel and is conducted by a canal of about 190 stems to its present outlet. Attempts have 120 steps to its present outlet. Attempts have been made to secure a supply from other sources, but without much success. As the outflow from but without much success. As the outflow from the Virgin's Spring in the summer is only about 170 gallons an hour,—an amount that scarcely suffices for the present population of 7500 people, even with the addition of stored rain-water,—the population of Nazareth could never have been very large. N. is not mentioned in the OT, Josephus, or the Talmud (but cf. Neubauer, Géog. du Talmud, p. 190), and derives its importance entirely from its connexion with the life of Jesus. To 'a city of Galilee, named Nazareth,' Gabriel was sent to the Virgin Mary to announce the was sent to the Virgin Mary to announce the birth of Jesus (Lk 126), from Nazareth Joseph went up to be taxed in Bethlehem (Lk 24), and to it Mary and he returned after the birth of Jesus (Lk 289). Matthew represents Joseph and Mary as going to live at Nazareth after the birth of as going to live at Nazareth after the birth of Jesus, that a prophecy concerning the Messiah might be fulfilled (Mt 2<sup>22</sup>; see NAZARENE). At the age of twelve Jesus was still living at Nazareth (Lk 2<sup>51</sup>), and according to Mark He came from Nazareth of Galilee to be baptized in the Jordan (19). To Nazareth He returned after the Temptation, only, however, to leave it for Capernaum (Mt 4<sup>12</sup>). Finally, it was in the synagogue of Nazareth that He declared Himself the fulfilment of prophecy, and so enraged the people that they led Him out to the hill above the city and sought to throw Him down\* (Lk 416, cf. Mk 61, Mt 1324). From His close association with Nazareth, Jesus was often spoken of as 'the Nazarene' (see article above).

The important features of Nazareth for the life

of Jesus are-

1. It was in Galilee, and hence was not so much under the influence of the temple as of the synagogue. It was also free from the extreme aversion to everything foreign so characteristic of Jerusalem, while at the same time the patriotism of the Gali-

lean was strong and often even turbulent.

2. It was seeluded in so far as it was not on any main road of international trade (see above).

3. Yet it was an excellent post of observation, from which might be seen some of the most varied forms of the active life of North Palestine. Attention has of late rightly been drawn to the magnificent view from the hills above Nazareth. Jerusalem pilgrims, Egyptian and Midianite caravans,

VOL. 111.-32

Roman legions and princes' retinues, all passed within sight. Many phases of Greek and Roman life could be observed from here, both in the town life of such places as Sefurieh and on the main roads of the plains. At the same time national feeling was stirred to its depths by the memories connected with the hill of Carmel, the battlefield of Esdraelon, and the mountains of Gilead.

G. W. THATCHER. G. W. THATCHER.

NAZIRITE (מֵיר; LXX in Nu 618. 31 εὐξάμενος; πΑΖΙΚΙΤΕ (Υ); LAA in Nu 6. \*\* ευξαμένος; in vv. 18. 19. 20 ηνημένος; in Jg 13 \*\* Β ναξείρ, Α ήγιασμένος ναξεραίος; in 13 \*\* 16 \*\* Β ἄγιος, Α ναξειραίος; in Am 2 \*\* ήγιασμένος).—The term πατείν is derived from παταν, \*\* 'to consecrate,' and denotes 'the consecrated one,' the one separated from among Nazirites for life, and Nazirites for a limited period. The law in Nu 6<sup>1-21</sup>, which is of late origin and is the only part of the law taking notice of Nazirites, refers only to the latter class.

According to this law, the Nazirite is one who consecrates himself (or herself,  $\mathbf{v}^2$ ) to the Lord, and is bound by his vow of consecration (a) to abstain all the days of his Naziriteship from the use of wine and all other intoxicating drink, from vinegar formed from wine or strong drink, from any liquor of grapes, from grapes dried or fresh, and indeed from the use of anything produced from the vine (v. st.); (b) not to suffer a razor to come upon his head, but to let the locks of the hair of his head grow long (v. b); and (c) to avoid all ceremonial defilement from contact with any dead body, even that of his nearest relatives (v. 6-8, where, however, wife and child are not mentioned). If through the sudden death of any one beside him he becomes defiled, he must observe the usual rites of purification (Nu 19<sup>11st</sup>); on the seventh day he must shave his head, his hair being cut off, because defilement was specially likely to cling to it, and also perhaps because it was the visible sign of his consecration, which had been rendered invalid; on the eighth day he must offer through the priest, at the door of the sanctuary, two turtle doves or two young pigeons—one for a sin-offering, and the other for a burnt-offering (Lv 57 128 14801. 15<sup>14f. 29f.</sup>); his sin in even unwittingly violating his vow (Lv 4<sup>2f.</sup>, Nu 15<sup>22f.</sup>) being thus atoned for, he must reconsecrate himself to the Lord, and, having offered a he-lamb of the first year for a guilt-offering (Lv 14<sup>12, 21</sup>), he must hold himself consecrated for the whole period involved in his original vow (v. 9-12). On the expiry of that period, the law regulated, with equal minuteness, the way in which he was to return to the sphere of ordinary life. He was brought to the door of the sanctuary, where, through the priest, he offered his oblation to the Lord (vv. 18-17): first (v. 16), a ewelamb of the first year without blemish as a sinoffering for sins committed unwittingly during the days of his separation; then a he-lamb of the first year without blemish as a burnt-offering, along with the customary meal and drink-offerings (Nu 15<sup>82</sup>.); and, last of all, a ram without blemish, along with a basket of unleavened bread (Lv  $7^{12}$ ; cf. also Ex  $29^{24}$ , Lv  $2^4$   $8^2$ ) in addition to the usual meal- and drink-offerings, as a peace-offering or thanksgiving for having been enabled to complete his period of consecration. He then shaved his head at the door of the sanctuary, and put his

\* Not used in Qal; in Niphal, Lv 223, Ezk 145.7, Zec 78 'to separate oneself from,' 'to abstain from'; Hos  $9^{10}$  'to consecrate oneself'; in Hiphil, Lv  $15^{21}$  'to separate,' Nu  $6^{2.3.6.6.12}$  'to separate or consecrate.'

<sup>\*</sup> The traditional site to the south of Nazareth has now been entirely given up in favour of the western hill. (See commentaries on this passage).

hair on the fire under the thank-offerings, as a precaution against its profanation, and as a sign that it was surrendered to the Lord (v. 18). The priest then took the sodden shoulder of the ram along with an unleavened cake and an unleavened wafer out of the basket, put them on the hands of the Nazirite (cf. Lv 8<sup>27</sup>), and waved them as a wave-offering before the Lord. These parts of the sacrifice, in addition to the customary wave-breast and heave-thigh (Lv 7<sup>28f.</sup>), were assigned to the priest (v. 19f.); this increase of what was given to the Lord (in the person of the priest) was probably meant to represent that His participation was greater than usual in the sacrificial meal of the Nazirite, whom He thereby specially acknowledged as His own. Having thus performed his vow, the Nazirite was allowed to drink wine (v. 20), very likely at this sacrificial meal; and he thereby emerged from the state of consecration into ordinary life. If when he took the vow of a Nazirite he took in addition a vow special to himself, he had also at the same time to perform this latter vow.

The Nazirites expressly mentioned in the OT (Samson, Samuel,\* the half-Israelitish Rechabites, and probably also those referred to in Am 2<sup>11.</sup>) belong to the class of Nazirites for life. What is said of them does not exactly correspond with the law in Nu 6. Apart from the fact that Samson and Samuel were dedicated to the Lord by their parents before their birth, 'the restrictions laid upon them were not identical with those specified in that law. Of Samson it is merely said that 'no razor shall come upon his head' (Jg 13°); no mention is made of abstinence from wine, though his mother is forbidden, during her pregnancy, to drink wine or strong drink or to eat any unclean thing (vv.⁴ and ¹), or anything that cometh of the vine (v.¹⁴). Samson came frequently into contact with the dead (Jg 14º.¹¹ 15¹¹²), without his consecration thereby ceasing; and it is assumed by some that he would naturally drink wine at the marriage feast (14¹°). Of Samuel also it is merely said that 'no razor shall come upon his head' (1 S 1¹¹). The Rechabites (2 K 10¹¹6π, Jer 35) not only abstained from wine, but from everything that was characteristic of a settled life; while Amos (2¹²) makes mention only of abstinence from wine. The Nazirate was evidently of a much more manifold character, and played a greater part in the religious life of Israel than the law in Nu suggests. That law is simply an attempt, at a late stage of Israel's history, to regulate an institution that had grown up independently of it. Other abstinences than those specified in it were doubtless occasionally practised; but these three had gradually come to be regarded as what was essential.

Whether the lifelong or the temporary Nazirate was the original form, it is impossible to determine. The case of Samson merely proves that tradition was acquainted with Nazirites for life at a comparatively early period. The law in Nu, as already remarked, refers only to the temporary Nazirate; and the hair of a dead person could not be offered to the Lord. The latter fact, however, is not conclusive against the lifelong Nazirate; for the long locks of the Nazirite might, from

\* That Samuel was a Nazirite is denied by many moderns (e.g. Smend, Nowack). He is nowhere called a Nazirite in the OT; and the special service to which he was dedicated by his mother was that of the sanctuary at Shiloh (18 1<sup>24π</sup>). It is implied in Exk 44<sup>20</sup> that some Semitic priests allowed their hair to grow long. The LXX, which adds to 18 1<sup>21</sup> and he shall not drink wine or strong drink, seems to regard him as a Nazirite. While the Rechabites are held by some to be even the strictest of all the Nazirites, they are held by others to be simply very closely akin to them. 'The only certain historical example of a Nazirite, mentioned in the OT, is Samson' (Driver, Joel and Amos, p. 153).

time to time, have been cut off and offered at the sanctuary, without his thereby ceasing to be a specially consecrated person. Nor can it be said with certainty whether abstinence from wine, etc., or the hair-offering was the original content of the vow. Abstinence from wine is alone mentioned by Amos (212), while, in the case of Samson, both in the announcement of his birth and in the narrative of his exploits, the emphasis is laid entirely upon his unshorn locks. His mother, it is true, is forbidden the use of wine, etc., during the true, is forbidden the use of while, etc., along with her pregnancy; and from this fact, along with others, opposite inferences have been drawn. By most it has been assumed that the omission in the case of Samson himself is purely accidental: the restriction laid upon his mother already implies that he is to be a specially consecrated one from the very beginning of his existence. By others, however, it is argued that Jg 13, which narrates the circumstances attending Samson's birth, contains two traditions of these circumstances, and belongs to a different period from chs. 14-16, in which everything is opposed to the of the view that regards the hair-offering as the essential element, reference is also made to Jer 7<sup>28</sup>, where unshorn hair is called *nezer*, and to Lv 25<sup>5</sup>. <sup>11</sup>, where the vine that was left undressed during the Sabbatic year and the year of Jubilee is called a nāzīr; but in view of Am 2<sup>12</sup> those passages are not decisive. Nazirites are mentioned so seldom in the OT\* that on such points we must refrain from dogmatic statements; but on the whole it seems probable that the temporary Nazirate was the most common form, and that from the first abstinence from wine was one of the restrictions imposed on them. There is no instance in the OT of a female Nazirite.

Regarding the meaning of the restrictions to which they were subjected there is now very general agreement. (1) Abstinence from wine, etc. This was the strictly ascetic element in the vow of the Nazirite. It has often been explained as symbolizing abstinence from all deliciæ carnis; but, as Dillmann remarks, if the Nazirite was forbidden all deliciæ carnis, he would have had to avoid them, not merely symbolically, but in reality. It finds an analogy in the late law forbidding the priests to drink wine or strong drink, while engaged in the service of the sanctuary (Lv 10<sup>8n</sup>.); and some have accordingly explained it as meant merely to secure at all times the sobriety of mind becoming in a man specially dedicated to God (cf. Hos 4<sup>11</sup>). But the prohibition extended not only to wine and strong drink, but to the whole produce of the vine. It is now, therefore, generally explained as 'a reaction in favour of the primitive simplicity of Israel in the days before it came into contact with Canaanite civilization and Canaanite religion, 'a religious protest against Canaanite civilization in favour of the simple life of ancient times' (W. R. Smith, The Prophets of Israel, p. 84 f.). 'All Semitic nomads view wine-growing and wine-drinking as essentially foreign to their traditional mode of life. Canaan, on the contrary, is pre-eminently a land of the grape, and the Canaanite worship was full of Dionysiac elements. Wine was the best gift of the Baalim, and winedrinking was prominent in their luxurious worship' (ib.). This reaction in favour of a simple nomadic life was carried furthest by the Rechabites; but though the Nazirites generally did not carry their protest so far, still, by their abstinence

<sup>\*</sup>All the passages in which they are mentioned are cited above. In La 47 'Nazirites' should be 'princes' or 'nobles,' princes as well as priests being among the liebrews consecrated persons; cf. Gn 4925, Dt 3816, where Joseph is called the Nazv among his brethren.

from the use of wine, etc., they sought to exhibit in their manner of living the idea of genuine

Israelites.\*

(2) The long hair of the Nazirite was the visible mark of his consecration; like the high priest's mark of his consecration; like the high priests 'mitre' with the inscription 'Holy to the Lord' (Ex 2836. 298 3930, Lv 89, where the Heb. word for 'crown' or 'diadem' is the same as that rendered 'consecration' in Nu 6; cf. also Lv 21<sup>12</sup>, 2 S 1<sup>10</sup>, 2 K 11<sup>12</sup>), it was the sign, manifest to all, that he was a God-consecrated man. The law in Nu 6 even calls it his 'consecration' (v.19; see also vv.7.9.11.18, Jer 729), and enacts that, when the period of his vow is over, it must be offered to the Lord along with the peace offerings (v.18). In Samson's case it is also the seat of his personal strength; as soon as it is cut off, his special relation to Jehovah ceases, and he becomes weak as other men (Jg 16<sup>17-22</sup>). The general idea under-lying this restriction is that whatever is to be, or has been, consecrated to God must be kept inviolate, in the condition in which it has come from its maker's hand (cf. Ex 2025, Lv 2224, Nu 192, Dt 1519 213, 1 S 67). But it is the Nazirite himself, and not merely his hair, that is consecrated to Jehovah: how, then, are we to explain the emphasis laid on the latter? 'The hair,' says W. R. Smith, 'is regarded by primitive peoples as a living and important part of the body . . . it is often regarded as the special seat of life and strength.' 'All over the world the head and hair of persons under taboo are peculiarly sacred and inviolable, and the primitive notions about the hair as a special seat of life are quite sufficient to account for this. . . . It is easy, for example, to understand why, if an important part of the life resides in the hair, a man whose whole life is consecrated—e.g. a Maori chief, or the Flamen Dialis, or in the Semitic field such a person as Samuel or Samson—should either be forbidden to cut his hair at all, or should be compelled, when he does so, to use special precautions against the profanation of the holy growth  $(RS^2)$  pp. 324, 483). The inviolability of the Nazirite's hair is thus the manifest token of the consecration of his whole personality to Jehovah. †

(3) The requirement to avoid all uncleanness due to contact with the dead is simply an enhancement of what is required of every Israelite, and more especially of the priests (Lv 21<sup>1st</sup>). One that has specially devoted himself to the service of Jehovah must naturally avoid everything ceremonially defiling. He must come into contact with nothing that renders him unfit for the service of the living and holy God. In this respect, so long as his vow lasted, the Nazirite stood on a level with the levitically holiest person among the people, viz. the high priest (Lv 21111, where only father and mother are mentioned). Though Samson does not seem to have been subject to this restriction, the importance attached to it generally is manifest from what is said in Nu 6

\* A similar hostility to the use of wine is found among many

\* A similar hostility to the use of wine is found among many ancient peoples. Among the Romans the priest of Jupiter was forbidden even to touch the vine; the Nabatæans of the Syrian desert were forbidden to use wine; among the Arabs also, long before the Koran, there was a strong repugnance to the vine. 'Like all barbarians, the Arabs were fond enough of getting drunk; but wine was a foreign and costly luxury, and the opposition to its use found distinguished advocates before Mohammed' (W. R. Smith, op. cit. p. 383).
† Among the ancient Arabs we find a similar connexion between the hair and vows; the pligrim allowed his hair to grow until his vow was paid; he then cut it off and thereby returned to the state of ordinary secular life. He was not even permitted to comb and wash his locks till the pligrimage was accomplished. This rule was not ascetic; it was simply a consequence of the fact that the hair of his head was inviolable. Pilgrims to Mecca are still forbidden to cut the hair of their head or event to pare their nails during their pilgrimage.

1 Schultz remarks (p. 110) that this restriction naturally did sot prevent one from engaging in the holy wars of Jehovah.

sot prevent one from engaging in the holy wars of Jehovah.

as to the Nazirite who has been accidentally defiled.

The Nazirites are mentioned so seldom in the OT that we cannot trace the history of this peculiar institution. It may be confidently assumed, however, that it grew up spontaneously on Israelitish soil, and that, too, as early as the time of the Judges. Israel had been unable to conquer the Canaanites completely, and, through intercourse with the latter, was gradually losing its distinctive char-If it was to maintain its existence and acter. fulfil its vocation as the people of Jehovah, it must return to the customs which the fathers had brought with them out of the desert. The Nazirites were leading representatives of this reaction: 'they were men, who, when the sensual and selfindulgent habits of the Canaanites threatened to make their way into Israel, endeavoured by a vow of abstinence to set an example of moderation and self-denial, which might help to preserve the old simplicity of Israelitish life' (Driver, Joel and Amos, p. 152f.). They were a class of persons 'holy to the Lord' in a peculiar sense. That which formed the basis of their consecration was neither birth nor office, but a vow of a special kind. In an ordinary vow, a man consecrated some material thing; the Nazirites consecrated themselves (Nu 6<sup>2, 5</sup>). Occasionally parents dedicated their unborn child to the life of a Nazirite (e.g. Samson and Samuel), in which case the mother had, during her pregnancy, also to abstain from the use of wine, etc. (Jg 13<sup>4.7.14</sup>). As a rule, however, and probably originally, the Nazirite, following an inner prompting, which he recognized as coming from the Lord (Am 211), dedicated himself. He thereby devoted himself wholly, for a limited time or for life, to the positive service of Jehovah. Though his vow committed him to certain abstinences, it was not, at least originally, a vow of mere abstinence; the life that he led was not necessarily that of a mere ascetic. As representing to his fellow-countrymen the ideal of a genuine Israelite, he naturally abstained from everything that was out of keeping with that ideal; but these abstinences were simply consequences of his state of positive consecration. Nor did his yow compel him to withdraw from fellowship with his fellow-men; there is nothing in the OT to indicate that the Nazirites generally either lived apart by themselves or in guilds like 'the sons of the prophets.' The Nazirite was originally a zealot for the national religion; he was one that had devoted himself to the service of Jehovah and His people. The service to which his vow called him might be very manifold: now it might possibly be to spend much of his time in prayer or in the service of the sanctuary, or to protest against current evils by a life of asceticism; and now it might be to fight the nation's foes or to rule the nation as judge. Whatever the service might be, he was regarded as a special instrument whereby God worked on behalf of His people. Samson, as being a Nazirite, is to deliver Israel out of the hand of the Philistines (Jg 13°); he achieves his various exploits because the Spirit of the Lord moved him or came mightily upon him (Jg 13<sup>26</sup> 14<sup>6</sup> 19 15<sup>14</sup>); and Amos (2<sup>11</sup>) regards it as a mark of God's grace towards Israel that He not only raised up prophets from among their sons, but also from among their young men Nazirites, who by their abstinence from wine protested against the sensuality that evidently abounded so greatly in the northern kingdom during the reign of Jeroboam II. 'The temporary Nazirate afterwards became a purely private asceticism, which the individual vowed to God in order to secure the fulfilment of this or that desire. Perhaps the early Nazirites also hoped to obtain something for themselves in

return for their abstinence. But above everything they served the whole community; they sought to exhibit, both for Israel and for Jehovah, the true nature of Israel. They felt themselves impelled to do so, after the manner of the prophets, by the Spirit of Jehovah. They did not thereby acquire any merit for themselves; it was a mark of the grace of Jehovah to His people, that He raised up Nazirites' (Smend?, p. 95f.).

500

It must not be assumed that the Nazirites were necessarily saintly men, in the modern sense of that expression. Their consecration to J" certainly implied a separation in several respects from ordinary secular life; but they might nevertheless be men of a very secular spirit. In speaking of them, we must therefore guard against using exaggerated language. It must not be forgotten, however, that Amos, who had a very ethical conception of J", says that they were raised up by the Lord (2<sup>11</sup>), and regards it as a grievous sin on the part of the Israelites that they tempted them to break their vow (v. 12). It may safely be inferred from this that the Nazirites known to him personally or from tradition were men of real moral worth, good gifts of God to His sinful but beloved people.

From the circumstance that the restrictions imposed upon the Nazirites were similar to those imposed upon the priests, and especially upon the high priest, it has been often inferred that the former represented the idea of the priestly life. But there is no positive evidence in support of this inference. Amos does not class them along with the priests, but with the prophets; we do not hear of their ever discharging priestly functions; and the similarity of the restrictions in the two cases is sufficiently explained by the fact that Nazirites and priests were alike specially consecrated persons. The former were men in whom (at least in early times) 'the characteristic spirit of Israel expressed

itself most clearly and most uniquely' (Schultz). The Nazirites were doubtless more numerous than the few notices of them in the OT might lead us to suppose. Am 2<sup>115</sup> and the Rechabites show that they were found both in Israel and in Judah down to a late period in the history of both kingdoms. After the Return from the Exile the institution flourished again, and naturally, considering the strictly legal character of post-exilic Judaism, in the form prescribed by the law in Nu 6. They are mentioned in 1 Mac 3<sup>45</sup> and also in Josephus (BJ II. xv. 1, Ant. XIX. vi. 1). We also hear of 300 Nazirites being together, and finding difficulty in providing the sacrifices required at the expiry of their period of separation, in the time of Alexander Jannæus. By this time, however, the Nazirate had lost its old significance, and had become a purely private asceticism. The vow was generally taken in times of sickness or other trouble, or when one was making a journey; it was looked on as a means whereby one might secure the fulfilment of some wish, or escape some feared danger. 'I shall become a Nazirite, if such and such a thing happen,' became a common formula of asseveration; and this formula was abused so as to compel some against their will to become Nazirites. The scribes also exercised their ingenuity upon the law in Nu 6, developing it more fully, rendering it more precise, and bringing it into complete harmony with the historical instances. They disallowed a Nazirite vow for a shorter period than 30 days; they distinguished between the lifelong Nazirate in accordance with the law, and that after the manner of Samson; the former permitted the Nazirite to cut his hair from time to time (after

\* Samuel, if we rightly regard him as a Nazirite, was also a

the example of Absalom (2 S 14<sup>26</sup>), whom they regarded as a Nazirite), while the latter permitted him to come into contact with a dead body, without having in consequence to go through the legal process of purification. But even in these days genuine piety was by no means extinct, and there must have been some among the Nazirites who were animated by a genuinely religious spirit. John the Baptist is described as a Nazirite for life (Lk 1<sup>16</sup>), as was also, according to Eusebius (*HE* II. xxiii. 3, following Hegesippus), James the brother of our Lord. Anna (Lk 2<sup>361</sup>) also is supposed by some to have been a Nazirite, but this is a mere conjecture.

conjecture.

Ac 21<sup>176</sup> shows that the early Jewish Christians occasionally took the temporary Nazirite vow. It is also an illustration of the custom mentioned by Josephus (Ant. XIX. vi. 1), that wealthy Jews paid, in the case of poor Nazirites, the cost of the sacrifices required on the expiry of the period covered by the vow, and thus enabled poorer Israelites to undertake such a vow. Those who were thus 'at charges' for these poorer Nazirites, having themselves been purified for the purpose, might appear along with them in the temple, and had probably to regard themselves as consecrated persons until all the prescribed rites were duly performed. The seven days mentioned in v. 27 do not imply that in such cases they had also to take a vow for seven days; the expression merely informs us that, in this particular instance, seeing there were four vows to be paid, it required seven days to offer the necessary sacrifices (cf. v. 28 'until

days to offer the necessary sacrifices (cf. v. 26 'until the offering was offered for every one of them'). In connexion with Ac 18<sup>18</sup> the question has been raised, whether St. Paul himself had taken a Nazirite vow. According to the rules laid down by the scribes, such a vow might be made outside of Palestine; but it had to be performed, in harmony with Nu 6<sup>18</sup>, at the temple in Jerusalem. As to this, the only point of difference between the schools of Hillel and Shammai referred to the length of time during which the person who had vowed the vow in a heathen land must reside in Palestine before he was permitted to pay it at the temple. The school of Shammai demanded a residence in Palestine of only thirty days, which was the shortest and most common period of consecration; whereas the school of Hillel insisted that it must be for the whole time to which the vow originally referred. Nor can St. Paul's shearing of his head have been in consequence of levitical defilement contracted during the vow period (Nu 6°); for, according to the seribes, in the case of the defiled Nazirite, the shearing of the head had to take place in the holy land (though not necessarily at the temple); and on the eighth day he had to offer his sacrifice of cleansing at the temple (cf. Nu 610). The yow in question cannot therefore have been a strictly Nazirite vow. In order, nevertheless, to vindicate its character as a real Nazirite vow, some have supposed that, having been living among Gentiles, the apostle shore his head at the beginning of his period of consecration, after the analogy of the Nazirite who had been in any way defiled; while others have supposed that it was a vow of special consecration to God, involving a temporary growth of the hair, and a subsequent cutting of it off, and that such a vow, though simply analogous to the Nazirite vow, and not involving a personal appearance at the temple, or the co-operation of the priests, was allowed to Jews of the Dispersion as a substitute for the strictly legal vow. It is admitted, however, that there is no evidence in support of these suppositions. It was evidently a private vow which the apostle had taken, and which he paid by shearing his head at Cenchress.

LITERATURE.—The art. 'Nasiriat.' in Herzog, RE<sup>2</sup>, by Oehler and v. Orelli; 'Nasirier,' in Schenkel's Bibel-Lexikon, by Dillmann, and in Riehm's HWB<sup>2</sup>, by Riehm; Dillmann, Numeri, Deuteronomium und Josua, 81 ff.; Budde, Das Buch der Richter, 90 ff.; Driver, The Books of Joel and Amos, 152 f.; W. B. Smith, 'RS<sup>2</sup> 823 ff., 481 ff.; Schults, Attest. Theologie's, 109 ff. (Eng. tr. 1. 161 ff.); Smend, Lehrbuch der attest. Religionsgenichter<sup>3</sup>, 93-96; Oehler, Theologie des Alten Testaments, §185 [Eng. tr. ii. 17 ff.]; Ewald, Die Alterthümer des Volkes Israel<sup>3</sup>, 113 ff.; Nowack, Lehrb. die Alterthümer des Volkes Israel<sup>3</sup>, 113 ff.; Nowack, Lehrb. die Alterthümer des Volkes Israel<sup>3</sup>, 113 ff.; Nowack, Lehrb. die Arch. ii. 138 ff.; Benninger, Heb. Archäologie, 430 ff.; Vilmar, 'Die symbolische Bedeutung des Nasiriergelübdes,' in SK, 1864, p. 438 ff.; Grill, 'Ueber Bedeutung und Ursprung des Nasiriergelübdes,' in Jahrbb. f. protest. Theologie, 1830, p. 645 ff.; G. B. Gray, 'The Nazirite,' in Journ. of Theol. Studies, vol. i. p. 201 ff. (Jan. 1900).

NEAH.—Named only in Jos 19<sup>13</sup> σιμο τικότο του 'Rimmon stretching to the Nε αh' (Β' Υεμμωνά Αμαθάρ 'Aoγά, A 'Υεμμωνάμ' Μαθαρίμ' 'Αννουά). The name has not been recovered. Knobel identifies it with Neiel of v. τ, comparing the relation of the words Jabneh and Jabneel. This does not help us much in any case, for the site of Neiel itself has not been discovered, and it was probably considerably west of Neah.

C. R. CONDER.

NEAPOLIS (Néa Ilóus, 'new city') was the port at which St. Paul landed, when, in accordance with his vision at Troas (Ac 16°), he sailed thence for Macedonia (Ac 16¹¹) to begin his ministry in Europe. It was the seaport of Philippi, which lay about 10 miles inland. Its position has been generally identified, or at least closely associated, with that of the modern town (of about 5000 inhabitants) called Kavalla, in the vicinity of which various remains have been found pointing to an earlier town of some importance, especially a great aqueduct bringing water from some distance, and stones bearing Greek or Latin inscriptions. Cousinéry (Voyage dans la Macédoine, ii. p. 119 ff.) and Tafel (de Via Egnatia) have argued in favour of a site some 10 miles farther to the west, where there is a deserted harbour called Eski or Old Kavalla; but Hackett (see art. 'Neapolis' in Smith's DB) appears to have finally settled the matter in favour of the town now bearing the name of Kavalla. The latter is situated on the bay which takes its name from it, at a point where, nearly opposite to the island of Thasos, a promontory projects, having a harbour on either side; that one which faced the west, especially, affording so suitable an anchorage that at the time of the battle of Philippi the triremes of Brutus and Cassius were moored in the bay of Neapolis (Appian, Bell. Civ. iv. 106). Its earlier name would seem to have been Daton or Datos, for Strabo designates Neapolis 'a town of the Dateni,' and a port (Niµn), and streams, and shipbuilding, and lucrative gold-mines, whence comes the proverb as to the "good things of Daton" (Strabo, vii. fr. 36). Probably the place received the newer name on becoming the seat of some fresh colony (from Thasos or from Athens?). Pliny (HNiv. 18) treats Neapolis as belonging to Thrace; but Strabo (vii. 330) and Ptolemy (iii. 13) connect it with Macedonia.

NEARIAH (17721).—1. A descendant of David, 1 Ch 3<sup>282</sup>. 2. A Simeonite, 1 Ch 4<sup>42</sup>. In both these passages B and A have Nωαδ(ε)ιά, but Luc. has Nαριού and Ναριός. The interchange of Γ and Γ accounts for the difference between MT and BA of LXX. Which has preserved the true reading must remain uncertain.

NEBAIOTH (n'τι or n'τι, Sam. n'κτι; LXX Ναβαιώθ).—Firstborn of Ishmael, Gn 25<sup>15</sup> 28° 36°, 1 Ch 12°. In Is 60° coupled with Kedar as the name of a pastoral tribe. The same tribe is mentioned repeatedly in the Cylinder Rm 1 of Assur-

banipal also in company with Kedar; the Assyrian form of the name is Na-ba-ai-te. In col. 8, 1l. 15 ff. of that inscription we learn that their king Natnu, who was the first prince of the tribe that paid homage to the Assyrians, joined the revolting Arabs, but was defeated by Assurbanipal's forces. Their country is described as 'very distant' (ashar-shu ruuku) in 1. 58; Glaser (Skizze, ii. 267, etc.) places them in the Arabian provinces Yemamah and Kaṣīm, but it may be doubted whether they can be localized so exactly. His opinion, however, that the name has no connexion with the Nabatwans, is probably to be accepted. In the despatch K. 562 (S. A. Smith, ii. 36) there is a reference to the Niba'ati, who probably represent the same tribe; and a king Nadan is mentioned in K. 524 (ib. 54), who may or may not be the king of Nebaioth. The king's name seems to be the equivalent of the Hebrew Nathan; it may have been altered by the Assyrian transcriber. The etymology of the name Nebaioth is probably to be found in Arabic; according to the Lisan al-Arab, xx. 172, nabawat would mean 'lofty places, eminences.' The name certainly seems to be a feminine plural, which would exclude connexion with the Nabat.

NEBALLAT (בלְכֹּלְ: BA om., κα. a mg int Naβaλλάτ).— A town mentioned only after the Captivity, along with Lod and Ono, as inhabited by Benjamites, Neh 11<sup>24</sup>. It is probably the modern Best Nebala, a village N.E. of Lydda.

NEBAT (ΕΞ1; Naβάτ (Naβάθ)).—Father of Jeroboam I. (1 K 1126 and onwards). The constant designation of Jeroboam I. as 'ben-Nebat' is probably the usage of a writer later than Jeroboam ben-Joash. It is intended, doubtless, to distinguish the two kings. On the first occasion of its use (1 K 1126), the formula has been added at the expense of appropriateness, since Jeroboam is further described as the son of a widow (B νίδε γνυαικότ χήρας). 'Son of Nebat' may have been absent from the earliest form of the narrative. It is wanting in LXX of 1 K 12246 (from B). It is less probable that 'widow woman' is secondary. Nebat was therefore dead before his son's advancement under Solomon. The name perhaps signifies 'brightness.' Its equivalence to 'MEDI 'God is splendour' has been suggested (Cheyne, JQR xi. 559). That is known as a Sabæan name (Gesenius, HWB 12). The interpretation 'Nabatæan' conflicts with 1 K 1126 ('Nebat, an Ephraimite').

NEBO (\lambda\_i, Naβ\delta, Assyr. Nabium, contracted Nabu, 'the Prophet').—Nebo was the interpreter of the will of Bel-Merodach of Babylon, and consequently had a shrine in E-Saggilla, the great temple of Bel, at Babylon. But his own temple was E-Zida (now Birs.i-Nimr\dd) in Borsippa, the suburb of Babylon. He was the son of Merodach and Zarpanit, and the husband of Tasmit 'the hearer.' He presided over literature and science, and the cuneiform system of writing was regarded as his creation. Hence, in the pre-Semitic Sumerian language of Chald\u00e8a, he is termed dim-sar, 'the scribe.' Among his titles are those of 'the wise,' 'the intelligent,' 'the creator of the oracle,' the maker of writing,' 'the opener,' and 'enlarger of the ear.' Assurbanipal traces to him his zeal for knowledge. 'Nebo and Tasmit had given him broad ears and seeing eyes,' he says, so that he had caused the older literature of the country to be republished, as well as 'the secrets of Nebo, the list of all the characters that exist.' In later days Nebo was identified with Nusku, a solar deity of fire, who was the messenger of Bel of Nippur, just as Nebo was the messenger of Bel-

Merodach of Babylon. In the period of Bab. influence in Western Asia (B.C. 3800-1400) the name and worship of Nebo were carried into Syria with those of other Babylonian deities. Hence we find a Mount Nebo in Moab (Dt 3249, Is 152), and a town of Nebo in Reuben (Nu 323); see the following two articles. In Is 461 Bel-Merodach and Nebo represent the city of Babylon, over which they presided. In the days of the later Chaldwan empire, the kings' names were for the most part compounds with Nebo (e.g. Nabopolassar, Nebuchadrezzar, Nabonid). See, further, Schrader, KAT<sup>2</sup> 412 f. [COT ii. 105 f.]; Meyer, Gesch. i. 179; Tiele, Gesch. 207 ff., 532 f. The name Abed-nego (Dn 17 etc.) is for Abed-nebo, i.e. 'servant of Nebo.'

NEBO.—1. Town in Moab (1). Moabite Stone π1; LXX Nαβαύ, Nαβώ; Vulg. Nabo, Nebo); mentioned in Nu 32³ between Sebam (=Sibmah) and Beon (=Baal-meon), and 32³® between Kiriathaim and Baal-meon, as among the cities taken from Sihon and given by Moses to Reuben, and in 1 Ch 5³ between Aroer and Baal-meon, in connexion with the Reubenite (clan) Bela, and in Is 15² with Medeba, Jer 48¹ with Kiriathaim, and Jer 48²² between Dibon and Beth-diblathaim, as a Moabite city, which either had been or was to be laid waste. Nu 32 is from P on basis of JE; Is 15 and Jer 48 rest on an ancient oracle on Moab (cf. Moλβ, p. 412). On the Moabite Stone, Il. 14–17, Mesha tells us: 'Chemosh said to me, "Take Nebo against Israel," and I went by night and fought against it from break of dawn till noon; and I took it, and put them (the inhabitants) all to death, 7000 men and boys (?), and women (?), and girls (?), and female slaves, for I had made it taboo to Ashtar-Chemosh. And I took thence the altar-hearths (?) of Jehovah and offered (?) them before Chemosh.' Nebo is not mentioned in the catalogue of Reubenite towns in Jos 13¹5-2².

Eusebius (Onomasticon, 283, 93, 100) and Jerome (de Situ et Nom.) distinguish the town, Naβώρ, Nabo, from the mountain, Nabau, Nabau, and place the town 8 miles south of Heshbon, and identify it with Chanaath (Kenath), or Nobah. Bukl (Geogr. 266) holds that the site of Nebo is to be looked for amongst the ruins on Mt. Nebo (Jebel Neba). Either the mountain received the name Nebo as containing a sanctuary of Nebo (cf. Nebo [god]), and the town was named after it; or the sanctuary was in the town, and the mountain was named after it; or the town and the mountain were so named independently, because each contained a sanctuary of Nebo.

Jerome, on Is 15², states that there was at Nebo,

Jerome, on is 10°, states that there was at Nedo, 'Belphegor,' i.e. Baal-peor, the idol of Chemosh.

2. Town in Judah (Δ); Nαβειά, Ναβιά, Ναβού, Ναβιό; Vulg. Nebo); mentioned Ezr 2<sup>26</sup>, Neh 7<sup>38</sup> 'the other Nebo,' as giving name to the 'children' or 'men of Nebo' who returned with Zerubbabel. According to Ezr 10<sup>48</sup>, in the time of Ezra and Nehemiah, seven 'children of Nebo' had foreign wives whom they were cornelled to discard.

wives, whom they were compelled to discard.

As Nebo, in Ezr 2, Neh 7, follows Bethel and Ai, it should be represented in the Greek (1 Es 5<sup>21</sup>) by Neιφels B, Φινείs A, which follows Betolion. But Lucian has Maκβels, and the number of the 'children of Niphis,' 156, is that given to Magbish in Ezr-Neh. Hence Neιφεls, etc., is held to represent Magbish (RVm, Meyer, Entstehung, 145). This Nebo is often identified with Nob, C. Is 10<sup>22</sup>, Neh 11<sup>22</sup>, and the Nobal or Nebal of Neh 10<sup>20</sup>, which is probably the clan of Nob, corresponding to the 'children of Nob.' The site of Nebo has been fixed at Beit Nubla, 12 miles N.W. of Jerusalem, and 8 from Lydda, or at Nuba, 4 miles south of Adullam (Armstrong, Names and Places, etc.; Buhl, Geogr. p. 198; Meyer, Entstehung, etc. pp. 145, 149, 155 f.).

It follows from the passages in Ezr-Neh that families from Nebo (Nob) had remained together in the Exile, and returned together, and thus became a post-exilic clan named after their original home. Beit Nubâ is the Nobe or Anob of Jerome's Onomasticon, the Betenoble or Castellum Arnaldi of the Crusaders (Lane-Poole, Saladin, pp. 332-339).

the Crusaders (Lane-Poole, Saladin, pp. 332-339).

The mention in 1 Ch 88 of Benjamite settlers in Moab suggests the possibility of a Benjamite colony in the Moabite Nebo, which when driven across the Jordan founded the western Nebo.

In 1 S 30.90 Tisch. prints B as reading έν Νομβέ, Swete έν Νοό; but the context excludes identification with our Nebo.

W. H. BENNETT.

NEBO, MT. (מָרִיבָּר, Ναβαό).—The mountain from which Moses viewed the promised land before his death. The word Nebo occurs in connexion with Moses only in Dt 32<sup>49</sup> (the command to ascend) and Dt 34<sup>1</sup> (account of the ascent) [both P]. It is found in the itinerary, Nu 33<sup>47</sup> (P). Comparing the command as given in Dt 3<sup>37</sup> and Nu 27<sup>12</sup> (closely parallel in substance but not in expression with Dt 3<sup>37</sup>) with the ascent described Dt 34<sup>14</sup>, and noting the 'mountains of Abarim' of Nu 33<sup>47</sup>, it follows that (1) Mt. Nebo forms part of the range of Abarim, and (2) the Top (head) of Pisgah (D) and Mt. Nebo (P) are alternative designations of the same spot (cf. Driver on Dt 34<sup>1</sup> in Internat. Crit. Comm.). Its situation may be determined within narrow limits. A ridge runs out west from the plateau of Moab (see note death. The word Nebo occurs in connexion with runs out west from the plateau of Moab (see note on Mishor in art. Medebal, sinking gradually; at first a broad brown field of arable land, then a at first a broad brown field of arable land, then a flat top crowned by a ruined cairn (to which the name Neba applies), then a narrower ridge ending in the summit called Siaghah, whence the slopes fall steeply on all sides (Conder, Heth and Moab, p. 129). Neba is 5 miles S.W. of Heshbon and 91 W. of the north-east end of the Dead Sea. From it Western Palestine is in sight; but the view to the E. is shut out by the higher edge of the Mishor, and to the S. by the ridge running out from el-Maslubiyeh. Passing westward from Neba along Maslubyeh. Passing westward from Neba along the ridge to its western summit Siaghah, a distance of about 1½ mile, the whole of the Jordan Valley opens out to view, and the traveller may see Gilead, Hermon, Tabor, Ebal and Gerizin, Neby Samwil and the Mt. of Olives, Jericho, the Lower Jordan and the Dead Sea as far as Engedi. Puller descriptions may be found in Tristram, Land of Moab, p. 325; Bible Places, p. 360; Conder, Heth and Moab, p. 129 f.; G. A. Smith, HGHL p. 563; and Driver on Dt 34. The view may well be described as embracing 'all the land.' It has been questioned whether all the places mentioned need questioned whether all the places mentioned in Dt 34<sup>1-3</sup> can be seen from any point of the ridge. Those who wish to pursue this inquiry in detail may be referred to an article in *PEFSt* for April 1898, 'The Prospect from Pisgah,' by W. F. Birch. The 'hinder sea' RV (that is, westward, RVm), 'utmost sea' AV, is generally taken to mean the Mediterranean, as in Dt 11<sup>24</sup>; and this search be seen from any point of the Nebs range. cannot be seen from any point of the Neba range, though one traveller speaks of 'a faint and disthough one traveller speaks of 'a faint and distant bluish haze' in the direction of Mt. Carmel. Birch says, 'From no mountain on the east side of the Dead Sea is it possible to see the Mediterranean near Judah. Higher mountains intervene.' He suggests that 'the hinder sea' in this passage means the Dead Sea, as being behind Moses when he began his survey. But the passage need not imply that the Mediterranean is included in the view from Nebo or Pisgah. When rightly translated it runs as follows: 'And J" showed him all the land—(even) Gilead as far as Dan, and all Naphtali, and the land of Ephraim and Manasseh, and all the land of Judah as far as

the hinder sea, and the South and the Round [see Ciccar], (even) the plain of Jericho, the city of palm-trees as far as Zoar.' The writer says that God showed Moses all the land (compare the words of Dt 3", and what follows is his description of its extent, in which he states quite correctly that Judah extends as far as the hinder sea or Mediterranean.

Moses parted from the people whom he had led to their inheritance before undertaking that last mysterious journey; and of what he was permitted to see, it may be said, as of his sepulchre, no man knoweth it unto this day. The passage, translated as above, reduces the force of an objection which has been urged. Why should the land of Gilead be shown to Moses after he had already traversed it in the campaigns against Sihon and Og, and allotted it to the 2½ tribes? Josephus (Ant. Iv. viii. 48) mentions Nebo as a very high mountain opposite Jericho; and Eusebius in the Onomasticon puts it 6 Roman miles west of Heshbon. The position seems to have been forgotten, for until recent times Jebel Attarus, a mountain about 10 miles to the south of the Neba ridge, has been identified with Nebo.

A. T. CHAPMAN. NEBUCHADNEZZAR.—See NEBUCHADREZZAR.

NEBUCHADREZZÄR (נְבוּכְּרְרָאצָר, afterwards corrupted into Nebuchadnezzar, ξείς [καβουχοδονοσόρ, Nabuchodonosor].—The Bab. Nabu-kudurriuzur ('O Nebo, defend the landmark'), the eldest son of Nabopolassar, and founder of the Bab. empire, who reigned from B.C. 604 to 561. A younger brother of his, Nebo-sum-lisir, is men-tioned in a contract-tablet dated in the reign of Nabopolassar. He seems to have been of Kalda or Chaldaan origin, like Merodach-baladan. According to Abydenus (Euseb. Chron. i. 9), he married Amuhia the daughter of the 'Median' (i.e. Manda) king. In B.C. 605 he defeated Pharaohnecho in a great battle at Carchemish (now Jerablûs) on the Euphrates (Jer 46<sup>2-12</sup>), and drove the Egyptians out of W. Asia. Bab. power was now established as far as the frontier of Egypt, and the king of Judah became a Bab. vassal. At this moment Nabopolassar died, and Nebuch. was recalled to Babylon, where he was proclaimed king, B.C. 604. Nebuch, now entered upon an era of wars and building. Of the wars we have hitherto learned but little from the inscriptions, which are filled with accounts of his building operations. Tyre, which had revolted, was be-sieged from the 7th year of his reign (Jos. c. Ap. i. 21) for 13 years, and apparently captured (but see Ezk 29<sup>18</sup>; art. BABYLONIA in vol. i. p. 229<sup>a</sup>, also Expos. Times, 1899, pp. 378, 475, 520). In the 40th year of Nebuch.'s reign (see contract-tablet in RP, new series, iv. 99 f.), it was full of Bab. officials. After the investment of Tyre, Nebuch. marched against Jerus., where Jehoiakim had also rebelled against Jerus., where Jehoiakim had also rebelled (2 K 24). Jehoiakim was put to death (according to Jos. Ant. x. vi. 3), and his son Jehoiachin placed on the throne. Three months later he was deposed, and carried captive to Babylonia, his uncle Zedekiah being appointed king in his place. Zedekiah, however, intrigued with Apries of Egypt, and threw off the Bab. yoke. For the third time, accordingly, Nebuch. invaded Judah; the Egyp. army was forced to retreat (Jer 376-4). the Egyp. army was forced to retreat (Jer 375-8), and Jerus. was closely besieged. At the end of two years (B.C. 586) Jerus, was taken, the palace and temple destroyed, and the upper classes carried into exile (2 K 25<sup>1st</sup>.). Zedekiah, who had escaped from the city, was captured near Jericho, and

\*Any one urging the above objection assumes that these campaigns are historical. For a discussion of this point see HGHL, App. III. p. 662.

brought to Nebuch. at Riblah, near Hamath, where his eyes were put out, and his sons and chief nobles put to death. Gedaliah, a Jew, was made governor of Judah, the Babylonian garrison there being placed under the command of Nebuzaradan (2 K 25<sup>st.</sup>). It is to this period that we should probably assign the inscriptions of Nebuchadrezzar which have been found on the bank of the Nahr el-Kelb, north of Beyrout, and in the Wady Brissa, on the road to Hamath. A fragment of his annals informs us that in his 37th year (B.C. 567) he made a campaign against Amasis of Egypt, overrunning a portion of the Delta (see Jer 46<sup>13–26</sup>, Ezk 29<sup>2–20</sup>), and defeating the soldiers of 'Phut of the Ionians' (Putu Yavan). He was succeeded by his son Evil-Merodach in B.C. 561.

Babylon, which had been destroyed by Senna-cherib, and rebuilt by Esarhaddon, became one of the wonders of the world under Nebuchadrezzar. He made it practically impregnable with three lines of wall, the two principal of which were called the Imgur-Bel and the Nimitti-Bel. He also surrounded it with a deep moat, and lined the bed of the Euphrates, which passed through the city, with brick, building walls and quays on either side. He lavished an enormous amount of treasure on the temples of Babylonia and the other cities of Chaldea; built a new palace which was completed in 'fifteen days'; and is said to have erected 'a hanging garden' for his 'Median' wife. Great canals were dug or reopened throughout Babylonia; a huge reservoir was constructed near Sippar for storing the water needed in irrigation; and a port was founded on the shores of the Persian Gulf. Nebuch. gives an account of his architectural works in the India House inscription (translated by Ball, RP, new ser. iii. pp. 102–123). We gather from his inscriptions that he was a man of peculiarly devout and religious character (see Sayce, Religion of the Ancient Babylonians, p. 97). Cf., further, Schrader, KAT<sup>2</sup> 361 ff. [COT ii. 47 ff.]; Meyer, Gesch. i. 579, 587 ff.; Tiele, Gesch. 410, 421 ff.; Jastrow, Rel. of Bab. and Assyria, 241 ff. A. H. SAYCE.

NEBUSHAZBAN (γριψίως; LXX omits; Theodotion, quoted from the Hexapla in Qmg, has Nαβουσαζαβάν. The writing of the final small, and the substitution of the final small, and the substitution of t instead in Kennicott's MSS, is probably due to the desire to mutilate names compounded with those of heathen deities, as exemplified in the name of Abed-nego for Abed-Nebo; compare also Nimrod and Nisroch).

—This official was rab-şārtş (=rabū-ŝa-rēŝu, 'chief captain' or 'chief of the captains') \* at the time of Nebuchadnezzar's capture of Jerusalem (Jer 3913). To all appearance there were among the officials of the Babylonian court many who bore the same title, and there is no reason to suppose, therefore, that Ashpenaz (Dn 1<sup>3</sup>) succeeded Nebushazban as rab-ṣārtṣ—indeed, another official of the same title is mentioned in Jer 39<sup>3</sup>. The name Nebushazban occurs in the Assyro-Babylonian inscriptions under the form of Nabu-suzibanni, 'Nebo, save me,' the first time in a list of names printed in WAI ii. 64, col. i. 1. 32, and again in Inschriften von Nabonidus, 161, 1. 6. This latter text is dated in the 4th year of Nabonidus, that is, 34 years after the capture of Jerusalem; and although it is not by any means impossible that the personage named may be identical with that mentioned in Jer 3918, it must be assumed, in the absence of any confirmation, that he is a different individual. The name is quite Babylonian in its form, the first element, Nebu, being the Hebrew reproduction of the divine name Nabû (Nebo, Nebu) found in Nebuchadnezzar and Nebuzaradan (Nabû-zēr-iddina). The second

\* This title, in accordance with the use of  $q\bar{q}$  rig elsewhere in OT, is generally translated 'chief of the sunuchs.'

element, sazib, is the imperative sing. of the Shaper element, staro, is the imperative sing, of the Shaper of \$zzbu, 'to save,' the third element being the pronominal suffix [an]ni indicating the 1st person (object). In all probability, proof could easily be found that the Hebrew form approximates very closely to the popular Babylonian pronunciation, in which the i of \$\delta z \text{id} z \text{id} was probably suppressed (cf. Kurbanni for Kurubanni).

T. G. PINCHES.

NEBUZARADAN ([τειγητ], Νεβουζαρδάν, Bab. Nabu-zira-iddina, 'Nebo has given a seed '), a name Naturation and the contraction of the work of the carrying out the wishes and policy of his master (2 K 25<sup>8-20</sup>). He selected the captives, and brought the leading supporters of Zedekiah to Nebuchadnezzar at Riblah. Five years later he was again sent to Palestine, and carried away from it into exile 745 persons (Jer 52°). This was after the murder of Gedaliah.

A. H. SAYCE. NECHO, NECHOH.—See NECO.

NECK (צואר τράχηλος).—1. The neck under the yoke was a figure borrowed from agriculture, and implied a state of ownership, dependence, and toil. The broken yoke was recovered freedom (Gn 27<sup>40</sup>, Is 10<sup>27</sup>, Jer 27<sup>8</sup>, Ac 15<sup>10</sup>). Closely connected with this was the stiffness of the Closely connected with this was the stiffness of the neck that refused to recognize God's right to possess, command, and direct (Dt 31", Jer 72", Neh 3°). 2. The foot on the neck was an emblem of complete subjection, borrowed from military conquest (Jos 10", Ro 16', cf. Ps 110'). It is frequently seen on the Egyptian monuments. RV correctly tr. 2 S 22<sup>41</sup> (=Ps 18<sup>40</sup>) 'Thou hast made mine enemies turn their backs to me, for AV 'Thou hast civen me the necks of mine enemies'. 'Thou hast given me the necks of mine enemies' (cf. Ex 23", 2 Ch 296, Jer 18" etc.). 3. For the neck adorned with a chain, the words in garon מות אינון gargārāh [only in pl. הרור" throat are also used (Pr 1°, Ezk 16¹¹). 4. To fall upon the neck is a form of salutation in the East (Gn 33° 46°, Lk 15%). The head is laid on one shoulder and then on the other close to the cheek. It is still part of the usual act of salutation when a meeting takes place between relatives or intimate friends of the same sex. It is the brotherly kiss of the monks and Oriental clergy. With them a custom originating in natural affection has descended to ecclesiastical routine and automatic formality.

For Mt 186 (and parallels) see MILLSTONE.

G. M. MACKIE.

NECO.—The name is written in Hierogl.

AV Necho, RV Necoh); Gr. Νεκῶs (Herod.), Νεχαώ
(Manetho, LXX). The sources for the history
of this Pharaoh, who succeeded his father
Psammetichus I. as second king of the 26th

Dynasty + (R.C. 610-594). are the references to G. M. MACKIE. Dynasty † (B.C. 610-594), are the references to him in the OT and a short notice by Herodotus. No native monuments of historical importance from his reign have come to light. The 26th Dynasty is localized by Manetho at Sais in the Delta. It is, however, possible that, although residing principally there, the family was of Ethiopian descent (see Schäfer in Æg. Ztschr. xxxiii. 116). Psammetichus had initiated a policy of larger commercial interests which, unknown to the Egypt of preceding dynasties, had already reached a considerable development in his son's

\* See vol. i. p. 656, note. † He is sometimes called Neco II., to distinguish him from the prince whom Esarhaddon had set up in Memphis and Sais, and who was probably the father of Psammetichus I.

reign. The monarchy relied now, both in foreign wars and against internal revolts, not upon native troops, but upon Ionian and Carian mercenaries. But Neco aimed also at a more extended influence at sea, and set about constructing a canal which should, by joining the waters of the upper Delta and the Bitter Lakes, make navigation between the Mediterranean and Red Sea possible (Herod. ii. 158). But the work was not finished by him: whether owing to discouragement from an oracle or to the pressure of external politics, the canal was abandoned, to be completed eventu-ally by Darius.\* The fleets of triremes which he built on both seas (ib. 159), and the Phonician expedition which he engaged to circumnavigate Africa (iv. 42), were further results of the same

policy.

The information in 2 K 2329ff. as to his Syrian campaign (in 608) corresponds to a shorter account by Herodotus (ii. 159). The desire to regain the lost ascendency in Asia was always in Egypt a sufficient motive for such an undertaking; immediate inducement may have been the defencelessness of Assyria, but recently overthrown by the onslaught of the new Babylonian monarchy. We are told that, during their northward march, the Egyptians were encountered by the army of Assyria's vassal, Josiah of Judah, at Megiddo (2 K 23<sup>20</sup>n, and a mere amplification of this in 2 Ch 35<sup>20</sup>n,) or, according to Herod. (l.c.), at Magdolus (Μαγδω his way to the Euphrates; but, on arriving there, returned, capturing on his southward journey the town of Kadytis, and sending in gratitude his armour to the shrine of the Didymæan Apollo at Branchidæ. Certain points in the story are, however, obscure. The locality of the battle is either (1) Megiddo S. of Mt. Carmel, which—though Herodotus' πεζŷ speaks for this—would be outside Josiah's frontier; τ or (2) Migdol = Magdolus, in which case there is a choice between several places of the page that in Egypt S. of Polysians. in which case there is a choice between several places of the name, that in Egypt, S. of Pelusium, being the least probable. W. Max Müller (in Mitt. Vorderas. Ges. 1898, 3. 54) proposes Migdal-Gad (Jos 15<sup>37</sup>); Winckler (in Orient. Lit. Z. 1898, 395, and in Benzinger's B. d. Könige, 207) recalls another Migdol, the Turris Stratonis (Cæsarea) S. of Akko. Kadytis again has been taken for Jerusalem, for Kadesh on the Orontes, and—the most probable view—for Gara (of Hared iii) 5. most probable view—for Gaza (cf. Herod. iii. 5 and Jer 471).

Neco, pursuing his Asiatic policy, refused to countenance the popular election of Josiah's son, Jehoahaz, to the throne. During a second campaign the newly elected king was seized at Riblah, and taken to end his days in Egypt. He was re-placed by his elder brother Eliakim, whose name was changed, perhaps in compliment to the anti-Babylonian party, to Jehoiakim. Through him Neco was able to exact from the Jews, as earlier Pharaohs had so often done in Syria, a considerable fine—100 talents of silver and a talent of gold (2 K 23<sup>38</sup>).

Now, however, he found himself forced to face the advancing power that had destroyed Nineveh. Nebuchadrezzar II., son of Nabopolassar, led a Babylonian army against him, and completely routed him at Carchemish (604). All his Syrian provinces were at the disposal of the victors (2 K

<sup>&</sup>quot;Augustus subsequently turned his attention to this canal; hence, suggests Lumbroso (l'Egitto dei Greei, 23), the name of the eastern province, Augustamnica.
† Cauer in Pauly-Wissowa, RE 810, 'statue.'
† Maspero still (letter to present writer, 1899) holds this the most probable.
† Josephus (Ant. x. v. 1), it is true, has Mer34; but presumably he misread this from Heb. 1712. (See G. A. Smith, Hist Georg A05)

eogr. 405). | Stade, Geschichts, i. 674.

247), and, for some years at any rate, the Egyptians did not venture to interfere in Asiatic politics. In 594 Neco died, and was buried at Sais. The recorded burial of an Apis bull in his 16th year confirms the duration of the reign given by Herodotus. W. E. CRUM. Herodotus.

NECROMANCY.—See SORCERY.

NEDABIAH (n;γγ).—A descendant of David, 1 Ch 318 (Β Δενεθεί, Α\* Ναβαδίας, Luc. Ναδαβιά).

NEEDLE'S EYE (τρήμα [var. lec. τρυπήμα] ραφίδος, Mt 19<sup>24</sup>; τρυμαλιά ραφίδος, Mk 10<sup>26</sup>; τρήμα βελόνης, Lk 18<sup>25</sup>).—The impossibility of a camel's passing through the eye of a needle is used by Jesus to emphasize the difficulty of a rich man's entering emphasize the difficulty of a first man a characteristic into the kingdom of God. An attempt is sometimes made to explain the needle's eye as a reference to the small door, a little over 2 ft. square, in the large heavy gate of a walled city. This mars the figure without materially altering the meaning, and receives no justification from the language and traditions of Palestine. There is no custom of calling this small opening 'the eye'; it is usually named 'the small door,' 'hole,' or 'window.' If there were such a custom, it would not help the interpretation suggested, because Orientals never speak of the eye of a needle; it is simply the slit or hole, in hur, Arab. khurm. The literal meaning is therefore to be preferred.\* See, further, Swete on Mk 10<sup>25</sup>, and art. CAMEL in vol. i. p. 345<sup>5</sup>.

G. M. MACKIE.

NEEDLEWORK is tra in AV of two Heb. expressions: (a) DD TANKE (Ex 26<sup>36</sup> 27<sup>16</sup> 28<sup>30</sup> 36<sup>37</sup> 38<sup>18</sup> 39<sup>30</sup>), the exact rendering of which is 'work of the variegator' (so QPB uniformly; RV gives 'work of the embroiderer'); (b) ADD (JG 5<sup>30</sup> bis, Ps 45<sup>14</sup>, 1 Ch 29<sup>2</sup>, and 8 times in Ezk), a name which also signifies 'variegated work' (Moore, Judges, ad 10<sup>30</sup> and is used of embroiders in which petterns loc.), and is used of embroidery in which patterns were worked with a needle in various colours (RV in Jg 'embroidery,' in Ps and 7 times in Ezk 'broidered work'; once 'divers colours,' so also 1 Ch 29<sup>3</sup>. Against this being 'embroidery,' see

esp. Dillm. on Ex 26<sup>38</sup>).

Needlework is much prized and universally practised in the East. Lace is made of great delicacy and beauty of pattern, and designs in different colours of silk, rendered more lustrous by threads of silver and gold, are sewn upon cotton, linen, silk, and woollen materials. Children devote themselves to it at an early age; among the poorer classes young women earn their marriage portion by patiently and skilfully pro-ducing work of considerable market value, and among the secluded women of rich Oriental families the gradual progress of a piece of needlework is a subject of interest and a connecting link in empty hours and aimless days.

G. M. MACKIE. NEESING.—There are in Middle English two distinct verbs fness and nesse. The former means 'to breathe hard' and is connected with the Gr. robeathe hard and is connected with the Gr. πνέω; the latter, which is pure Teut., though not found in Anglo-Sax., means 'to sneeze.' Sneeze,' which has now replaced 'neese,' is in fact simply a dialectic variety of that word (of. 'lightly' and 'slightly'). In the 1611 ed. of AV the word 'neese' is accepted from Coverdale in 2 K 425 'the child neesed seven times.' The meaning is evidently 'sneezed' (Heb. ¬1)' Po. of ¬1)', prob. onomatopoetic. of sternuo, and mod. [וְרִר], prob. onomatopoetic, cf. sternuo), and mod. editors (since 1762) have so spelt it (though Scriv-

ener returns to the older spelling 'neesed'). the word of. Chapman, Odysseys, xix. 732, 736-For

This said, about the house, in echoes round. At seach, about the house, in ecnose round, ther son's strange neesings made a horrid sound; At which the Queen yet laugh'd, and said, "Go call The stranger to me. Heard'st thou not, to all My words last utter'd, what a neesing brake From my Telemachus?"

But in Job 4118 we find in 1611 AV 'By his neesings a light doth shine,' which again comes down from Coverdale. Modern editors have retained the spelling 'neesings' here, perhaps from a feeling that the modern 'sneeze' did not express the meaning, as it certainly does not. The Heb. (העייט) is a different word from that found in 2 K 41s, and clearly refers to the crocodile's habit of inflating itself, as it lies basking in the sun, and then forcing the heated breath through its nostrils: this in the sun appears like a stream of light (Dav.). Now this is the meaning not of neese, but of fnese. Wyclif's word in 1388 ed. is 'fnesynge,' and it is probable that Coverdale, by whose time the verb fnese had gone out of use, adopted 'neese' either as the same word or its nearest equivalent. In any case 'neesings' should no longer be retained, Amer. RV; the modern word is 'sneezings' as in Jer 8<sup>16</sup> Wyclif has (1382) 'Fro Dan is herd the fnesting of his hors,' and there, though the Heb. word (מְּנֶנְיֵּה) is different, the meaning is the same, and AV has 'snorting,' after Douay 'snoring (sic) noyse.'

J. HASTINGS.

NEGEB (σίμς, lit. 'the dry'; LXX νάγεβ, ἡ ἔρημος) was a name specially applied to that district south was a name specially applied to that district south of Judah which in comparison with the rest of Pal. was waterless.\* From the fact that this region did lie to the south of Judæa rose the later use of the word to indicate that point of the compass.+ This use became so habitual, the original sense of Negeb as a geographical term so obscured, that AV ignored the distinction. Wilton (*The Negeb*, London, 1863) was among the first to call attention to its exact sense, and RV has restored the more accurate tr<sup>n</sup>. About forty passages in OT can be understood only when this is remembered. Thus, e.g., Abraham is represented (Gn 13') as going up from Egypt into the land of the Negeb, while of course the direction of his march was not southwards but northwards.

The hill-country (277) of Judah near Hebron marks the limit of the Negeb on the north. On the E. its mountains form steep and barren precipices above the Southern Ghor and the Arabah. descends more gradually and with wider wadis toward the sandy tract along the Mediterranean. On the S. the plateau of Jebel el-Magrah, 'about 70 miles long and 40 to 50 broad,' marks the natural boundary, though it is probable that, when the inhabitants were able to possess themselves of what are now the mountains of the Azazimeh, the name of Negeb may have extended to these also.

The entire district is mountainous, composed of ridges, which run in general from E. to W. and which rise from el-Magrah towards the 'hill' of Judah in a succession of great terraces. These are drained by a number of wadis, shorter and more abrupt on the E., wider and more gradual on the One result of this characteristic of the Negeb was that no great road ever ran through it from north to south. Trade and war flowed between Pal. and Egypt along 'the way of the sea,' the shore-road by Gaza and the Wady el-'Arish. The peoples of the N. and N.E. would seek Egypt

to part of the same region. † Of. the use of 西, (lit. 'seawards,' i.e. Mediterraneanwards) in the sense of west

<sup>\*</sup> On the ingenious but futile proposal to substitute 'cable' (πέμιλες) for 'camel' (πέμιλες), found as early as Cyril of Alexandria, see Hastings and Nestle in Expos. Times, ix. (1898), 388, 474.

Of. the modern Daroma with the same meaning and applied

by what is the modern Hajj road, which leaves the Negeb precipices well to the W. of it. Traders from Gaza to Akabah and Arabia could avoid the worst of these mountains by skirting them on the Worst of these mountains by skirting them on the W. and crossing into the Arabah to the south-ward of Jebel el-Magrah. Only the men of Hebron and S. Judah, in order to reach these points, would probably be forced to climb one of the steep passes of Magrah—Yemen, Sufah, or Fikreh.\* The country was always isolated. A further consequence of this character belonging to the district was that the Negeb formed a natural frontier to Judah on the south. No army, especially if it possessed cavalry or chariots, could reach Hebron and Jerus. in this direction. Only once do we read of an invasion entering by this route, when Chedorlaomer (Gn 14), after rounding the S. end of the Dead Sea, led his army across the plateau of the Amalekites,' and so fell on Hazazontamar.+

In comparison with Judah the country is barren and waterless, though in comparison with the desert et-Tih it is fertile. 'Almost sudden was the transition to the upland wilderness, the Negeb, a series of rolling hills clad with scanty herbage here and there, especially on their northern faces. Nothing can be barer than the south-country of Judah, neither grand desolation, nor wild, but utter barrenness-not a tree nor shrub, but stunted herbage covered with myriads of white snails which afford food to thousands of birds.' So writes Tristram (Land of Israel, p. 360 f.), and he adds that the suddenness of the transition (he was travelling northwards) has a geological cause, because the soft limestone covers on these hills the hard crystalline which makes the south wilderness hopeless. But Palmer (Descrt of Exodus, vol. ii.) states that there are abundant signs that this region in earlier times was cultivated, and maintained a large population. Toward the S. there are many rude cairns from a prehistoric period, and hazerim or stone enclosures for folding sheep. Toward the N., and especially the N.W., the ruins of towns are frequent, the hillsides are covered with flint-heaps over which to train vines, many of the wadis show signs of cultivation in terraces and dams which would keep and use the winter torrents that stream through these. This latter torrents that stream through these. This latter feature of the cultivation has largely determined the fate of the Negeb. The artificial character of the irrigation, without which cultivation was impossible, depended for its continuance upon peace and settled order among the population. Whenever this was granted to the Negeb, its towns bloomed into a fitful importance; but, whenever this ceased, the neglected works fell into ruin, the desert reasserted itself, the Bedawin swarmed in from the south, or the people reverted to that earlier condition. And what has always aided earlier condition. And what has always aided that reversion has been that the country when in its natural condition is stated to be the very ground for browsing camels.

Thus the Negeb was the favourite home of the early Israelites, while they were still nomads. Here their forefathers are represented as wandering between the more settled Egypt and Palestine (Abraham Gn 20<sup>1</sup>, Isaac 24<sup>29</sup>, Jacob 37<sup>1</sup> 46<sup>5</sup>). The original home of the traditional Avvim may be looked for in this district (Jos 13st.), and of them the chief characteristic which is noted (Dt 22) is that they 'dwelt' in hazērim, those stone enclosures of a nomad-race which depends on its flocks. But, when Israel approached this border

from the wilderness, the spies reported that the Negeb was inhabited, not by Avvim, but by Amalek (Nu 13<sup>20</sup>, cf. Gn 14'); and this people associated with the Canaanites (Nu 14<sup>25</sup> . 40) was strong enough to repel the invaders at Zephath-hormah, the modern Sebaita. It is possible that Amalek held the plateau, while the Canaanites occupied the more cultivated wadis. With Amalek as old inhabitants of the land 1 S 27° associates the Geshurites and the Gizrites or Girzites.

The region was overrun by Simeon when that tribe turned southward with Judah from Jericho; at least the cities assigned to Simeon (Jos 19:-9) lie here. Along with them went the Kenites, who, with the natural instinct of a clan which had never known anything except the life of nomads, settled near Amalek (Jg 1<sup>16</sup>\*). But the shock of conquest, where it succeeded, shook down the artificial cultivation; Amalek till the days of Saul was ever on one flank, the Philistines rose into strength upon the other side; Simeon was probably from the beginning the rudest of all the clans (Gn 34, etc.). This tribe, never left in peace, needing peace more than the others, and planted in a district which peculiarly required peace, could not maintain itself, and merged partly into Judah, partly into the Southern Bedawin. The cities of the Negebare enumerated in Jos 15<sup>21-32</sup>, and assigned there to Judah. On the edge of this district, at Ziklag, Achish planted David (1 S 27<sup>8</sup>). One cannot but suspect

that by means of this outpost of men, who were already accustomed to border war, he hoped to cover, against the raids of the lawless border tribes, the route down to Egypt, and possibly that to Akabah. Incidentally it is noted (1 S 30<sup>14</sup> 27<sup>10</sup>) that the south country was divided at this period into the Negeb of the Cherethites, of Jerahmeel, of the Kenites, of Judah and of Caleb, to which Jg 116 may add that of Arad (for details see these names). During the royal period the Negeb was considered a part of Judah, and shared the fortunes of that kingdom. Jeremiah (1319) speaks of it as belonging to Judah, and as suffering, perhaps more than the rest of the country, from the troubles of his time; but in an exhaustive list of the districts which made up the Southern realm (1726 3244 3318) he promises restoration to the Negeb as to the rest. Obadiah (v. 191.) anticipates that its cities shall possess Edom, from which some have inferred that Edom, which finally overran this district, was then pressing on the borders of the weakened kingdom. See, further, on this passage, art. OBADIAH, p. 579.

LITERATURE.—See references in the body of the article. Most of the usual books on Pal. geography devote a section to this subject. Of these, Robinson, BRP, is here the best. E. Wilton, The Negeb, and Trumbull, Kadesh Barnea, are devoted to that district, but are popular. The most thorough work is still that of Palmer, Desert of the Exodu, vol. ii.

A. C. WELCH.

NEGINAH, NEGINOTH.—See PSALMS.

NEGO (גנוֹא [once Dn 329 אנגי]).-Found only in the compound proper name Abed-nego ('yervant of Nego') given by the prince of the eunuchs to Azariah, one of Daniel's three companions, Dn 17 2<sup>ω</sup> 31<sup>2π</sup>. (LXX and Theod. 'Αβδεναγώ). It is practically certain that we is a corruption, which may be set down to the mistake of a copyist or, more probably, of the author of Dn, from 121 NEBO (wh. see). Cf. the use of Nebuchadnezzar for the correct form -rezzar. This is the view of Hitzig, Gratz, Schrader (KAT 429 [COT ii. 126]), Sayce (HCM 532), etc., and is supported by the discovery of the name 'Abed-nebo' on a bilingual Assyr.-Aram. tablet of the 7th cent. (iii. Rawl. 46 col. i. 82) and in two Aramaic inscriptions of the 6th and 5th cents. B.C. discovered, one of them by Flinders Petrie and the other by Sayce, on the sandstone " Read in the last clause ' went and dwelt with Amalek."

<sup>\*</sup>Those indomitable road-makers, the Romans, did not shun even these hills, as the Peutinger tables and broken milestones

to Egypt detailed a force to reduce Jerus, but led his principal army by a route clear of these barren hills.

rocks north of Silsilis in Upper Egypt (see HCM 177 n.). The same name was borne, long after the Christian era, by heathen Syrians (Bevan, Daniel, p. 61). It is possible that the author of Dn purposely changed Nebo into Nego, in order to obscure the reference to a heathen deity.

J. A. SELBIE.

NEHELAMITE, THE (τοζημο).—An epithet applied to Shemaiah, a false prophet who opposed Jeremiah, Jer 29<sup>24, 21, 29</sup>. According to analogy the word should mean an inhabitant of Nehelam, but which should mean an inhabitant of Neistan, but there is no place of that name mentioned in the Bible. This, however, is not a fatal objection. The Targ, derives the word from a place Helam, LXX  $\Lambda l \lambda d \mu$ , which is mentioned in 2 S  $10^{16.17}$  as apparently near the Euphrates. The LXX in apparently near the Euphrates. The LXX in Jer 36 [Heb. 29] has B Αίλαμείτην, ΑκΟ Έλαμίτην. Vulg. agrees with English Versions. 'Nehelamite' might also be related to the personal name *Helem* (1 Ch 7<sup>35</sup>, Zec 6<sup>14</sup>). The AVm 'dreamer' is of course incorrect, yet there can be little doubt that a play on the words אילם מולם and באח 'to dream' was in the prophet's mind. This verb and the cognate noun (בּוֹלֵים) are used specifically in Jer (23<sup>25, 37, 28, 82</sup>, cf. Dt 13<sup>2, 4, 5</sup>) of the dreams of false prophets. The words elsewhere are scarcely ever used of the words elsewhere are scarcely ever used of the higher inspiration, being employed, e.g., of Jacob, Gn 28<sup>12</sup>; Joseph, 37<sup>567</sup>; Pharaoh and his servants, 40<sup>567</sup>. 41<sup>167</sup>. (all E, not elsewhere in Hex.); of a lower order of prophets than Moses, Nu 12<sup>5</sup> (cf. Job 33<sup>15</sup>); of the Midianite, Jg 7<sup>18, 15</sup>; the object of Saul's desire, 1 S 28<sup>6, 16</sup>; of Solomon, 1 K 3<sup>15</sup>; of old men in latter days, Jl 2<sup>26</sup>; of Nebuchadnezzar, Dn 2<sup>167</sup>.; of Daniel, Dn 1<sup>17</sup>.

N. J. D. WHITE. NEHEMIAH (πρη1).—1. One of the twelve heads of the Jewish community, Ezr 2<sup>2</sup> (B Νεέμιος, Α -ας) = Neh 7<sup>7</sup> (BA Νεέμια), 1 Es 5<sup>8</sup> Nehemlas. 2. The son of Azbuk, the ruler of half the district of Bethzur, who helped to repair the wall of Jerusalem, Neh 316 (Neεμίας). 3. See the following article.

NEHEMIAH (הָקְּמָה).—Nehemiah is a conspicuous instance of the right man in the right place. It was his privilege to render great service to his nation, for which both his character and his posiand God-fearing; he knew how to exercise the inflexible will of an autocrat, as well as to be persuasive when that would best accomplish the good end he had in view. Our reliable informa-tion concerning Nehemiah and his times is contained almost wholly in the parts of his memoirs which have come down to us.\* We may regret that this memoir was not preserved in full, but we cannot but rejoice in what we have; for it affords us a picture of this great patriot which is clear and well-proportioned. It gives us no information, however, about his early life or ancestry, except in the heading that he was the son of Hacaliah (Neh 11).

The first of Chisley, the ninth month (our Dec.), of the 20th year + of Artaxerxes I. ‡ Longimanus, B.C. 445, found Neh. in Susa, the chief city of Elam, and the winter residence of the Persian court

\* See EZRA-NEHEMIAH, BOOK OF. Torrey holds that only chs. 1. 2. 383-39 [Eng. 41-9] are genuine memoirs of Nehemiah. The rest of the book he assigns to the Chronicler; and this, with the whole of Ezr as a historical source, he says, 'has no value whatever'—Comp. and Hist. Value of Ezr. Neh. 1896 (Beihefts zur ZAW). zur ZAW).

† If Chislev and Nisan (cf. 11 and 21) were both in the 20th

f If Chislev and Nisan (cf. 11 and 21) were both in the 20th year of Artaexexes, Neh. must have reckoned the year from the autumn. Nisan was the first month of the Jewish as well as of the Bab. year. If Neh. reckons in the usual way, his audience with the king (21) must be placed in the king's 21st year, and so s.o. 444. On the chronology see Nowack, Heb. Arch. i. 21sf.; Berth.-Rys. Kom.<sup>2</sup> 254; Schrader, KAT<sup>2</sup>, in loc.

† Torrey says that we do not know which Artaxerxes is referred to in Neh. He is inclined to put the composition of Neh about the year 8.0, 372 (7).

Neh about the year B.C. 872 (?).

(Del. Paradies, 326). A company of men, among whom was his brother Hanani, had just returned from Jerusalem. Neh. eagerly questioned them about the condition of the city and of the people who with Ezra had been struggling to rebuild the State. Their report was most depressing to the patriot: 'The remnant which is left from the captivity there in the province are in evil plight and in great reproach; the wall of Jerus, is broken down, and its gates are burned with fire' (11-8).

down, and its gates are burned with fire' (11-8).

Does Hanani refer to the destruction of the city by command of Nebuch. in 586 (2 K 256m.), or to a recent catastrophe? In favour of the former view it may be urged that we have no record of either the rebuilding of the walls and the setting up of the gates, or their second destruction. Whatever may be the date of Ezr 48-28 (see Ezr.-Neh., Book or), it is evident that the rebuilding described there was merely begun, not finished. The enemies of the Jews procured an edict to stop the building, but not to destroy the little that was already restored. If such a destruction had taken place, it is singular that it should be mentioned neither by Ezra nor by the compiler. On the other hand, if the destruction reported by Hanani had taken place more than a century before, the report would not be unexpected news, and consequently would not make so great an impression upon Nehemiah. It might be urged that he had hoped that measures had been taken to continue the restoration, and was depressed to learn that nothing was being done. But Neh.'s narrative lends no colour to such an interpretation. See, further, Stade, GVI ii. 161; Benjamin, Pervia (Story of the Nations), 127; Montefiore, Hübbert Lect. 1892, 311; Cheyne, Bamp. Lect. 1898, 71, 82, 231 f., JRL 37 ff.; Grätz, Hist. of the Jews, Eng. tr. i. 383.

When Neh. heard the had news he test down

When Neh. heard the bad news he 'sat down and wept, and mourned for days, fasting and praying before the God of heaven.' His prayer, which is full of Deuteronomic expressions (OTJC<sup>2</sup> 427), acknowledges the sins of the Jewish people, but calls upon God to fulfil His promise in view of the repentance of the people, and to 'grant his servant (Neh.) mercy before this man,' i.e. the king (1<sup>4-11</sup>). The prayer put into Neh.'s mouth by Josephus is somewhat different: 'How long, O wilt Thou overlook our nation, while it suffers so

great miseries, and while we are made the prey and spoil of all men?' (Ant. XI. v. 6).

Nehemiah's position as cupbearer \* to the king ensured him an audience; and as the office was a high one with rich emoluments, he had a point of advantage in preferring a request, and the means to accomplish his purpose. Yet it was four months before his wishes were made known to the king. He was waiting a favourable opportunity; and this came only when he was called to serve the wine when 'no one else was before the king' (21b acc. to LXX). (21b acc. to LXX). His agitation was so great when the decisive moment came that his face betrayed him, and he was sore afraid as the king reprovingly asked him the cause of his dejection. However, he stated his troubles frankly: 'Have I not reason for a dejected countenance, since the city of the graves of my fathers lies in ruins, and its gates are destroyed by fire? (29). Encouraged by the king, he asked permission to go to Jerus. to rebuild the city. As Neh. mentions the fact that rebuild the city. As Neh. mentions the fact that the queen was sitting by her lord at the time (2°), she may have exerted her influence in his favour. At all events the king granted his officer a limited leave of absence, gave him letters to the governors of the provinces west of the Euphrates, and to Asaph, the keeper of the royal forest, that Neh. might secure timber for the gates of the citadel of the temple, for the wall of the city, and for the temple itself.‡ Neh. set out with an armed escort furnished by the king, and on the way delivered the letters to the governors, not to apprise them of

\* On the cupbearer see Rawlinson, Ezra and Neh. (Men of the Bible), 86; Ewald, HI v. 148; Xen. Cyrop. i. 3. 8; and art. CUPBEARER.

† From the queen's presence Cheyne and others suppose that Neh, was a eunuch (Introd. to Is. 311). Some hold that Ps 127 was directed against Nehemiah.

† On the motives of Artaxerxes see Stanley, Jewish Ch. iii. 111.

his plans, as Gratz supposes, but to secure his passage through the country, his letters to them being virtually passports. At the outset he learned of the hostility of Sanballat and Tobiah, who were troubled at the news that a man had come from Persia to seek the welfare of the Israelites (27-10).

Neh. waited for three days (211) to study the situation, then without disclosing his plans to any one (2<sup>125</sup>) he made a night inspection \* of the walls attended only by his guard, or by Hanani and a few others who had come with him from Susa. few others who had come with him from Sussa.

'A city was in antiquity a city in the full sense of the word only if it preserved its walls' (Stade).

An exilic poet had cried, 'build thou the walls of Jerusalem' (Ps 51<sup>18</sup>), and Neh. was determined now to remove Jerusalem's reproach. Accordingly he assembled the leaders and said to them, 'You see the evil plight we are in, in that Jerus. is in ruins, and its gates burned with fire' (2<sup>17</sup>), at the same time informing them of the powers which the king had conferred upon him, and of his purpose to restore the walls. The people saw the opportunity, and responded readily to the call. Sanballat and Tobiah, joined now by Geshem, or Copher as Wallbauer and responded readily to the call. Gosham as Wellhausen says it should be read (Isr. Gesch. 2 169), insinuated the charge of rebellion against Neh.; but the charge neither intimidated him nor checked the zeal of the people.

It is impossible to tell how extensive the damage to the walls was. The word used by Neh. in 1<sup>3</sup> and 213 (715) implies that there were only breaches to repair; but these were evidently of wide extent. Neh. was fortunate in securing the aid of the whole population of Jerus., and of several companies from other parts of Judah. There were men from Jericho, Tekoa, Gibeon, Mizpah, Zanoah, and Keilah. Men of every class laboured at the walls with their own hands: it is said to the discredit of the nobles of Tekoa, as if it were an exceptional case, that they refused to put their neck to the work (3°); we find express mention of priests, Levites, goldsmiths, and perfumers (or apothecaries) among the labourers. Neh. divided the work among the various bodies with characteristic insight; we read of five cases in which men were working at the breaches close by their own dwellings (3<sup>10. 25. 25-20</sup>).

Some serious difficulties had to be met, however, before all the breaches could be closed. Sanballat, finding that his insinuation of rebellion had been ineffective, and that the Jews were evidently serious in their purpose to rebuild, tried to rouse the army stationed in Samaria; Tobiah indulged freely in ridicule, trying to persuade himself that the labour of the Jews could not accomplish Neh.'s the labour of the Jews could not accomplish Neh.'s purpose. 'If a fox should go up on their stone wall, he would break it down' (3<sup>387</sup>. Eng. 4<sup>187</sup>.) The people did not heed the scoffing, but continued their work with a will. When all the breaches were closed with a wall half its proper height, Sanballat and his allies, augmented now by guerilla bands of Arabians, Ammonites, and Ashdodites, realized that prompt and vigorous action was necessary if the almost incredible progress of the necessary if the almost incredible progress of the wall was to be stopped. They resolved to march secretly to Jerus. and stop the restoration by force of arms (4\*, Eng. 4<sup>11</sup>). Meanwhile the working under

\* On Neh.'s night ride see Stanley, op. cit. iii. 112; Wright, JBL, 1896, 129-134, and PEFSt, April 1896. The last two articles give the important light from Bliss's recent excava-

high pressure was telling upon men unused to such labour as laying a massive stone wall, especially when the clearing away of the rubbish was so difficult and laborious a part of the task. But their burdens could not be lightened yet; in fact, the activity of the enemy now added much to their hardships. Reports came in of the intended attack, and Neh. at once armed his workmen for resistance.\* He was acting according to the authority vested in him by the king, while his enemies were taking the law into their own hands. The Jews exchanged the trowel for the sword, and were stationed to defend the most unprotected places in the wall. The enemy had counted upon a surprise. When they saw the Jews armed and drawn up for battle, they abandoned their purpose to attack, and the builders resumed their work. But the enemy evidently remained in the neighbourhood waiting a chance to take the Jews at a disadvantage, so that the labourers on the wall kept their swords by their side, and a part of the men were detailed to hold the larger weapons and defensive armour in readiness. Neh. kept a and defensive armour in readiness. Nen. kept a trumpeter by him to give warning of the point of attack (4<sup>5-17</sup>, Eng. 4<sup>12-29</sup>). The people were all now obliged to remain in the city at night, for the enemy held possession of the outlying country, and the city could not be left for a single hour without vigilant defenders; so critical was the time, that Neh. and the people alike slept in their clothes. Yet there is no record of an actual battle, and such silence is a pretty sure indication that the Samaritans and their allies never ventured on an open attack, and never found the coveted opportunity for a surprise; but the vigilance and precautions of Neh. show plainly that the danger was for a long time imminent.

Another form of trouble now required the leader's attention. The people who were labouring at the walls had been obliged to abandon their usual occupations, many of them to leave their homes and fields. The enemy overran the country disand fields. The enemy overran the country unstricts at will, and very likely plundered the homes of those who were working at the walls. Supplies were getting scarce for such people, so that they had to mortgage their fields and vineyards and houses, either to get food or to pay the king's tribute. Many had pledged their children for debt, and these were sold as slaves. The wealthier classes had taken advantage of the necessity of the poor. Neh. was justly angry, and promptly summoned the offenders before a public meeting. He reviewed his own generous course, and appealed to them to be liberal, restoring the mortgaged land, and remitting a part of the debt which the people were unable to pay. It is pleasant to know that his request was responded to cordially; and the people took an oath to execute their pledge

(ch. 5).

The walls were finished amidst such trying difficulties, and there only remained the doors to be set up in the gates to make the city's defences complete. But Nehemiah's enemies had not yet given up. Having failed to intimidate him by threats, or discourage him by ridicule, or take him unawares by force, they now tried cunning. Four times they invited him to meet them in conference in the valley of Ono in the land of Benjamin; but Neh. replied that he could not leave the great work he was engaged in (61-4). A fifth messenger came with an open letter + from Sanballat saying that it

tions.

† 'Accompany Neh. on his lonely ride around the burned walls of Jerus., and listen to Sanballat mocking at the Jews for attempting to revive the stones out of the heaps of rubbish; you will then recognize the occasion of this psalm [102], and sympathize with the plaintive words—

For thy servanta take pleasure in her stones, And it pitteth them to see her in the dust' (10214).

—Cheyne, Bamp. Lect. 70 f.

<sup>&</sup>quot;The Heb. text in 46 (Eng. 412) is obscure and confused. The LXX furnishes a clear and satisfactory reading: 'And it was so that when the Judsans who dwelt by them came, they said to us, They are coming up from all places against us.' The first news of the intended assault was brought by the workmen who lived at remote parts.

† It is said that an open letter was an insult; see Thomson, The Land and the Book, iii. 631.

was reported that Neh, aspired to the kingdom of Judah and had appointed prophets to proclaim him, and giving warning that word of this rumour would surely reach the king; Sanballat asked for a conference, as if he wished to aid Neh. in clearing himself of the charge. Neh, knew well that auto-cratic kings listened eagerly to such imputations, and were not apt to investigate very closely, preferring to err on the (for them) safe side; nevertheless he rested secure in his integrity, and accused Sanballat of feigning the charges out of his own evil mind (6<sup>5-9</sup>). Sanballat all the while had allies and emissaries in Jerus. (6<sup>17-19</sup>), and, having failed himself to get within reach of the leader, he set them to work. A prophet named Shemaiah counselled Neh. to shut himself in the temple at night to avoid assassination. Other prophets were also hired to stir up his fears, and induce him to take a step that would lead to his downfall (6<sup>10-14</sup>). But

they reckoned without their host.

By the month Elul (Aug.-Sept.), of what year we do not know, the restoration was complete, having been accomplished, we are told, in the remarkably short time of fifty-two days + (6<sup>13</sup>). Neh. appointed his brother Hanani, who had evidently come with him from Susa (of. 1<sup>2</sup>), and Hananiah the governor of the castle, in charge over Jerus.; he enjoined them strictly to keep the gates shut until the sun was well up in the heavens, t and to keep a guard posted. The latter command was not easy of execution, for the people in Jerus. were few, and the houses for the most part still in ruins. It was apparently difficult to induce people to take up residence in the city.§ Those who did so voluntarily were commended as patriots, and one of every ten drawn by lot was obliged to move from the country to the city (7 111.). The completion of the walls was celebrated with a great dedication service. Walls and gates and people were purified, and two processions formed to move around the the head of one company, and Neh. of the other, until they met near the temple, where the ceremonies of thanksgiving and dedication culminated in sacrifices and rejoicings. Appointments were also made for the proper observance of the temple rites (12<sup>sym</sup>.). These things being completed, Jerus. being once more a city without reproach, social and religious order being well established, and Neh.'s leave of absence expiring, he returned to the court of Persia (136). Rawlinson holds that he was recalled, but there is no evidence for such a theory.

How long Neh. had been in Jerus. is uncertain. The text bears How long Neh. had been in Jerus, is uncertain. The text bears conflicting testimony not easy to reconcile. The memoirs are in this part preserved only in somewhat mutilated fragments. In 51s we appear to have a sufficiently definite statement that the first stay at Jerus, was twelve years: 'From the day when he appointed me to be governor in the land of Judah, from the twentieth year even to the thirty-second year of Artaxerxes the king, twelve years, I and my brothers did not eat the governor's bread.' But in 185 Neh. says, 'While all this was going on I was

\* The prophets of the time were opposed to Neh. and apparently in league with the hostile neighbours, Monteflore, \$12; see also Wellh. Geech. \* 194. But these prophets, interior as they were to their predecessors of pre-exilic days, felt that Neh., like Ears, was reconstituting Judaism on lines not in harmony with prophetism; and in a measure they were right. See, for a fuller development of this view, Kuenen, Rel. of 1sr. il. 238 fl. † According to Jos. (Ant. XI. v. 8) the wall was two years and four months in building; according to Ewald, Hist. v. 157, nearly five years. The fifty-two days is not only a very short time for such a great work, but also for the conditions described in ch. 5 to develop. Yet there was every motive for urgent haste. Perhaps only the main part of the work was accomplished in the fifty-two days.

Perhaps only the main part of the work was accomplished in the fifty-two days.

i Sunrise being the usual time for opening the gates.
§ See Milman, Hist. of the Jews, vol. i. p. 437.

I According to Grätz, Hist. 394, this celebration took place two years and four months after Neh,'s arrival in Jerus,; according to Rawlinson, Esr.-Neh. 150, not till Neh,'s second visit. There are no good grounds for the latter view.

¶ On the relation of Esra and Neh. in their administration, and on the promulgation of the Law (Neh 8-10), see art. Ezra; and Kosters, Wiederherstellung Israels, 1895.

not in Jerus.: for in the thirty-second year of Artaxerxes the king of Babylon, I went unto the king, and asked of the king a leave of absence. And I went to Jerusalem.' This verse is obsoure, and its meaning uncertain. 'I went unto the king may refer to Neh.'s return from Jerus., or to his entering the royal presence to prefer his request. The other doubtful clause is literally 'to end of days, and is generally taken as a reference to the undefined period between Neh.'s return to the king and his second departure. The words favour this interpretation, the context the notion of a limited leave as rendered above. See the commentaries on the passage.

Neh. either returned to the king after twelve years' absence, and then, after a period of a year as Kuenen supposes, or three or four years as Gräts holds, secured a second leave; or else he returned sooner, and in the thirty-second year, B.C. 433, started again for Jerusalem. 514 in the latter case would mean that Neh. was the real governor of Judah even when absent on court duty, ruling by his appointed deputies. On the whole, this view seems more probable than the other; for it seems unlikely that the king, who required Neh. to stipulate a limit to his leave before he would grant it (25), would agree to so long a period as twelve years. Neh.'s chief purpose was to rebuild the walls: if this took only fifty-two days, there would be no reason for a long stay. The events narrated might all easily take place in three or four years, and they are described as initial movements. If Neh, had protracted his stay, we should probably be informed of the years, and they are described as industrial movements. It will not protracted his stay, we should probably be informed of the doings of such an active and zealous man. Then, again, the supposed interval of a year or so does not allow time for the development of the evils which confronted Neh. in his second administration, especially for the appearance of a mixed speech among the children of half-foreign parentage (1824).

During Nehemiah's absence at the Persian court, serious evils had made their appearance in Jerusalem. Sanballat and his allies had been checkmated; Jerus. had been freed from external enemies: but internal disorders had sprung up which affected the life of the people harmfully. Eliashib had housed Tobiah in one of the temple chambers (13<sup>41</sup>); the Levites \* were not supplied with their lawful portions (see Mal 37-12), so that they were compelled to seek their living as laymen, or wander about homeless (1310) as in the days of Micah (see Jg 17 f.). On the Sabbath day, work in the fields went on as usual (1315); produce was carried to the market in Jerus.; and the Tyrian merchants sold fish and merchandise on that day (v. 18). In spite of Ezra's great effort, marriages with foreign women were common, and the children of such marriages spoke partly the language of their mothers (v. 25t.). Even a grandson of Eliashib the high priest had married a daughter of Neh.'s inveterate enemy Sanballat (v. 25). It is highly probable that the report of these evils impelled Neh.'s return. When he arrived he set about the necessary reforms with characteristic vigour. Tobiah's belongings were cast out of the temple chamber, and it was restored to its sacred uses (13st.). The people were compelled to pay the tithe † for the support of the Levites and other temple officers (v. 1s). The city gates were ordered to be closed during the whole of the Sabbath, the vendors who then set up their stalls outside of the gates were threatened so that they were afraid to renew the offence (v. 19ff.). The men with foreign wives suffered disgrace and punishment, and the people were put under oath to discontinue this violation of the Law. The arch-offender, Eliashib's grandson, was banished from Jerus. (v. 20ff.). According to Jos. (Ant. XI. vii. 2, viii. 2), Manasseh, a brother of Jaddua, married Nicaso the daughter of Sanballat, left Jerus. and built the rival temple on Gerizim. Josephus places these events in the time of Alexander, but he was not a master of chronology, e.g he places Neh. in the time of Xerxes; and many hold that this Manasseh was the son of Joiada and grandson of Eliashib (see Kuenen, Rel. Isr. ii. 236; Montefiore, Hib. Lect. 351; Ryle, Can. 92).

In spite of the effort of the author of the beautiful story of Ruth to soften the harsh spirit of the leaders, Ezra and Neh. held the same decided view against foreign marriages, though from different motives. The great offence in Ezra's eyes was the

<sup>\*</sup> Monteflore regards this condition partly as a result of 'the old quarrel between priests and Levites' (Htb. Lect. 360).
† This was a tithe of corn, wine, and oil, as in Dt 1422ff.; see Ryle, Canon of the OT, 86.

Infringement of the sacred law. But Neh., while he was impressed with the dangerous consequences of such alliances, citing the sin of Solomon and the have it wrought (18<sup>28</sup>), held the great evil to be the imperilling of the mother tongue by the introduction of foreign elements. From this it would appear that already the Old Heb. speech was in danger, and the patriotism of the people was appealed to to preserve it from extinction. How long it lasted as a living tongue after this time is uncertain. But the seeds of death must have been apparent.

Tradition was as little silent about Neh. as about Ezra (see Ewald, Hist. v. 161 ff.). To these two men 'grateful posterity has attributed all the beneficial institutions, of whose origin it was ignorant.' Among the worthies praised by Jesus the son of Sirach is Neh., whose 'memorial is great, who raised up for us the walls that were fallen, and set up the gates and bars, and raised up our homes again' (Sir 4913). In 2 Mac 1185, we read that Neh. purified the sacrifices with the water taken from the pit where the priests had hid the sacred fire. His literary activity was also known: 'The same things were related both in the public archives and in the records that concern Neh., and how he, founding a library, gathered together the books about the kings and prophets, and the books of David and letters of kings about sacred gifts' (2 Mac 213. See Ryle, Can. 102; W. R. Smith, OTJC2 170 f. On the character of the letters in which this passage occurs see ZAW, 1890, i. 110 ff.).

Neh. rendered a great service to his people, and its effect was more enduring than that of Ezra. was magnanimous in his generosity towards his subjects. He even purchased the liberty of many Jews held as slaves in strange lands (5°); he had refused the remuneration which belonged to his office; and he entertained at his own expense 150 of the chief Jews (5<sup>17</sup>). But he was by no means unconscious of his virtue, nor unhopeful of receiving a suitable reward from God; in 519 (cf. 13<sup>14-31</sup>) he records a favourite prayer: 'Remember unto me, O my God, for good, all that I have done for this people' (see Montefiore, *Hib. Lect.* 211). He shows also the vindictive spirit found in some of the psalmists (3<sup>366</sup>, Eng. 4<sup>46</sup> 13<sup>36</sup>; see also Cheyne, *Bamp. Lect.* 78). But a frank acknowledgment of such weaknesses does not obscure the real greatness of the man. It has been truly said of him that he was 'the only man who had at once the spirit to awaken the old fire of national enthusiasm, and the power both to heal dissensions within and to repel attacks from without' (The Psalms Chronologically arranged, by Four Friends, 311). On Neh.'s character and work, see further Wellh. Gesch. 173; Rawlinson, Ezr. and Neh. ch. xi.; Renan, Hist. of the People of Isr. bk. vii. 82 ff. Josephus says of Neh.: 'He was a man of good and righteous character, and very ambitious to make his own nation happy; and he hath left the walls of Jerus. as an eternal monument of himself' (Ant. XI. v. 8).

For other literature, beyond that quoted in the above article, see EZRA-NEHEMIAH, BOOK OF.

1. W. BATTEN.

NEHEMIAH, BOOK OF.—See EZRA-NEHEMIAH, BOOK OF.

**NEHEMIAS** (Ne $\epsilon\mu$ las).—1. 1 Es 5°, one of the leaders of the first return from captivity under Zerub. = Nehemiah, Ezr 2°, Neh 7°. 2. (B Na $\iota\mu$ las) 1 Es 5°°, Nehemiah the contemporary of Ezra. The insertion of his name here appears to be due to an incorrect gloss on  $\Lambda \tau \theta a \rho las$  or 'the Tirshatha,' Neh. being usually called by that title. In the canonical parallels (Ezr 2°°, Neh 7°°) the name is absent, and the Tirshatha alluded to is Zerubbabel.

H. St. J. THACKERAY. NEHILOTH.—See PSALMS.

NEHUM (מאת).—One of the twelve heads of the Jewish community, Neh 77. This form of the name

is probably due to a scribal error, the parallel passage (Ezr 2<sup>2</sup>) having Rehum (ανη; A Ίρεούμ, Luc. Ρείούμ). In Neh the LXX supports MT, reading Ναούμ. The name appears in 1 Es 5<sup>8</sup> as Rolmus (B Ῥδειμος, A ਬ Ῥριμελιος).

NEHUSHTA (κρψη; Luc. Νεεσθάν, Β Νεσθά, A Ναισθά).—Wife of king Jehoiakim and mother of Jehoiachin; a native of Jerusalem (2 K 248). She was taken a prisoner to Babylon with her son in 597 (2 K 2412), and no doubt died there. Regarding her father, see Elnathan. The vowels of MT and the rendering of Jerome, æs ejus, connect the word with νψη; 'bronze.' Barzillai is possibly another example of a proper name derived from the name of a metal. But the stem consonants of the word are those also of ψη; 'serpent,' and animal names are characteristic of the period (Gray, Heb. Proper Names, p. 103 f.). The Lucianic transliteration identifies the name with Nehushtan (2 K 184).

W. B. Stevenson.

NEHUSHTAN.—In the received text of 2 K 184 we read that Hezekiah, in addition to removing the! bāmoth (EV 'high places'), with their mazzēbahs (RV 'pillars'), throughout the country, carried his zeal for reform so far as to 'cut down the Asherah' (so RV; see Asherah)—presumably that attached to the Temple at Jerusalem—and to break in pieces 'the brazen serpent that Moses had made: for unto those days the children of Israel did burn incense to it: and he (Hezekiah) called it Nehushtan.' The doubts which so many recent critics have expressed regarding the historicity of the greater part of this verse we need not pause to examine, inasmuch as it must be, and is, admitted that at least the statement with which the verse closes, and which alone concerns us here, is certainly historical. The further question as to the relation of this incident to the Pentateuch narrative, Nu 2146 (sep. v.), also lies without the purview of this article (see Serpent [Brazen]). Two points, however, appear to demand examination, viz.: (1) the signification of the name here applied to the object destroyed, and (2) the reason alleged for its destruction.

(1) The name of 'Nehushtan.' Two significations of Něhushtān ([πψη]) are possible. (a) That clearly intended by the Massoretic punctuators, and since generally adopted, viz. 'the brazen thing' [opus]eencum κατ' ἐξοχήν. According to this view, Něhushtān is a denominative from κψη něhůsheth by addition of the formative suffix-ān (so Ges. Buhl, Stade, König, Lehrgeb. ii. § 60. 9°, Barth, Nominalbildg. § 207°). The further idea of the Massoretes, reflected in our EV, that this name was given to the venerable object by Hezekiah at the time of its destruction, must, however, be rejected. The context requires rather that we should find in Něhushtān the name by which it was popularly known, and this may be got by a slight change in the pointing of the verb (cf. Lucian's text και ἐκάλεσαν αὐτον Νεεσθάν, and see the Commentaries). (b) The transliteration of the word in the oldest Greek versions (A Νεσθάν, B Νεσθαλεί, and best of all Νεεσθάν, Lucian) suggests affinity with ψη παħάsh 'serpent' rather than with něhôsheth 'brass.' For in 2 K 24° the name of the queen-mother, who appears in MT as κρψη; Νěhushtā, appears in A as Ναισθά, which is identical with B's Νεσθά, Luc. Νεσσθάν (see ΝΕ-ΗυSΗΤΑ). But it is far more probable that the personal name Nehushtā is to be classed with the other 'serpent-names,' ΝΑΗΑSΗ and ΝΑΗSΗΟΝ (which see), than with the derivatives of něhôsheth. Hence it is possible, at least, that the name of this object of the Hebrews' veneration—pronounced with vowels other than those of Něhushtān—was also connected in the popular

mind with nāhāsh, perhaps in the signification 'the [sacred] serpent' or 'the serpent' par excellence (cf. for form and signification | 19,17).\*

(2) The reason for the destruction of the Nebushtan is clearly stated. Whatever may have been its origin—to inquire into this would be to anticipate the article SERPENT (BRAZEN) in vol. iv.—it had in recent times become an object of idolatrous worship. Incense was offered to it as to a divine being. Its continued existence, therefore, was incompatible with, and would have been a constant menace to, that purer form of the religion of J" which it was the aim of Hezekiah and his spiritual advisers to introduce.

A. R. S. KENNEDY.

NEIEL ('Ντυ; Β' Ίναήλ, Α' Ανιήλ).—A place on
the borders of Zebulun and Asher, apparently north
of Cabul, Jos 19<sup>27</sup>; possibly the same place as Neah
of v. <sup>18</sup>. The site is uncertain.

NEIGHBOUR (μν shākhên, Arab. saken, γείτων 'inhabitant'; μνς κατόδιλ, Arab. karth, ὁ πλησίον, περίοικο 'near'; μν τᾶ, πνην απίτh, φίλος 'friend').

The law of neighbourhood is of great importance and influence in the East. It takes rank after family life with regard to the number and authority of the customs created and regulated by it. Neighbourhood is not an occasional incident, but a constant necessity of Oriental social life, and the latter

cannot be understood apart from it.

The importance of neighbourhood is due to the fact that there are no farmhouses scattered over the agricultural districts of Palestine. For purposes of common safety, the population is congregated in the villages, following in this respect the custom of the pastoral tribes in their encampments. From these villages, where the houses are generally built quite close to each other, the peasants go out to their daily labours in the surrounding fields. Domestic life is thus touched at every point by the larger circle of neighbourhood. Originating under circumstances of common danger, this social condition has now passed into a kindly preference of use and wont. Such village life is now regarded as a convenience. The Oriental dislikes silence and solitude; very rarely takes a solitary walk for pleasure; chooses summer lodgings where neighbours are numerous; and, in renting, buying, or building a house, considers first of all the character of the neighbours.

Among the modern inhabitants of Palestine the Arab. karth, 'near,' on account of the surviving similarity of social circumstance, means, like the Heb. karthh, both 'neighbour' and 'relative.' The sense of religious protection and union that enshrined the family life is seen in expanded form in large towns such as Damascus and Jerusalem, where Christians, Jews, and Moslems occupy

different parts of the town.

All the Bible references to neighbourhood indicate that it was an institution of high social value, with privileges to be enjoyed and duties to be

discharged.

1. Its helpfulness is stated in the maxim of Pr 2710 'Better is a neighbour that is near than a brother that is afar off.' The Arabs have a familiar proverb to the same effect, and they further happily indicate the service that can be rendered by a friend or neighbour by saying, 'You
